

## MECHANISMS FOR IMPRINTING WATER

- Cyril Smith- Professor Electrical Engineering  
University of Salford, UK
- Imprinted water with resonant frequencies generated from a toroid coil generating potential A fields
- Subject measurement using radiaesthesia
- With succussion - threshold -  $B = 7.5 \times 10^{-6} \text{ T}$
- With succussion - threshold -  $A = 2 \times 10^{-11} \text{ T}$
- E not involved
- Mechanical/Magnetic energy to format
- Potential fields to supply information

1  
00:00:05,720 --> 00:00:03,439  
a magnetic field so we are now getting

2  
00:00:07,490 --> 00:00:05,730  
into the realms of the talk that was

3  
00:00:09,560 --> 00:00:07,500  
kind of an introduction because I want

4  
00:00:12,650 --> 00:00:09,570  
to talk about how energy can be

5  
00:00:16,210 --> 00:00:12,660  
imprinted someone mentioned that the

6  
00:00:18,830 --> 00:00:16,220  
paper out there about the Russian

7  
00:00:21,410 --> 00:00:18,840  
article about biophysical properties of

8  
00:00:25,340 --> 00:00:21,420  
water imprinted with electromagnetic

9  
00:00:27,740 --> 00:00:25,350  
fields I'm going to go one step further

10  
00:00:29,330 --> 00:00:27,750  
in this particular talk but first I want

11  
00:00:31,849 --> 00:00:29,340  
to just mention the different kinds of

12  
00:00:35,720 --> 00:00:31,859  
energy field which have been used to

13  
00:00:38,810 --> 00:00:35,730

imprint or activate or potent potential

14

00:00:41,889 --> 00:00:38,820

eyes water and classical electromagnetic

15

00:00:44,119 --> 00:00:41,899

fields are actually now well-established

16

00:00:47,630 --> 00:00:44,129

even in the bio electromagnetic

17

00:00:49,520 --> 00:00:47,640

community they have been studying

18

00:00:52,580 --> 00:00:49,530

electromagnetic field interactions with

19

00:00:54,200 --> 00:00:52,590

biological systems and then some Russian

20

00:00:55,880 --> 00:00:54,210

scientists I think originally said well

21

00:00:57,319 --> 00:00:55,890

never mind the biological system let's

22

00:00:59,209 --> 00:00:57,329

just look at the water and treat the

23

00:01:01,400 --> 00:00:59,219

water with an electromagnetic field and

24

00:01:05,299 --> 00:01:01,410

then add it to the biological system and

25

00:01:11,060 --> 00:01:05,309

sure enough water does have a memory and

26

00:01:14,719 --> 00:01:11,070

in this case it can last for days maybe

27

00:01:16,280 --> 00:01:14,729

weeks but certainly days and that's an

28

00:01:17,990 --> 00:01:16,290

anomaly right there when you turn off

29

00:01:20,780 --> 00:01:18,000

the source of an electromagnetic field

30

00:01:23,929 --> 00:01:20,790

any structuring of the water should

31

00:01:25,609 --> 00:01:23,939

dissolve and dissipate and so you know

32

00:01:28,730 --> 00:01:25,619

what's going on what's the mechanism i

33

00:01:31,039 --> 00:01:28,740

will talk about that fe at the end but

34

00:01:32,480 --> 00:01:31,049

there are now studies that show other

35

00:01:35,090 --> 00:01:32,490

portions of the electromagnetic spectrum

36

00:01:36,940 --> 00:01:35,100

including visible light also have

37

00:01:39,380 --> 00:01:36,950

similar effects acoustic energy

38

00:01:41,690 --> 00:01:39,390

potential energy fields which I'll talk

39

00:01:46,010 --> 00:01:41,700

about in a minute and even consciousness

40

00:01:47,840 --> 00:01:46,020

all now known to affect water in fact

41

00:01:49,460 --> 00:01:47,850

last year I talked about my research

42

00:01:53,149 --> 00:01:49,470

with consciousness for those who weren't

43

00:01:55,190 --> 00:01:53,159

here and how water can store conscious

44

00:01:57,530 --> 00:01:55,200

intention and then be transferred to a

45

00:02:01,639 --> 00:01:57,540

biological system so i'm not going to

46

00:02:04,899 --> 00:02:01,649

talk about that again but just FYI okay

47

00:02:07,080 --> 00:02:04,909

so here are some of the actual physical

48

00:02:11,580 --> 00:02:07,090

measurements that have been

49

00:02:15,030 --> 00:02:11,590

done on energized water whatever form of

50

00:02:17,250 --> 00:02:15,040

energy was used to imprint the water I

51  
00:02:18,660 --> 00:02:17,260  
mean everything from standard pH and

52  
00:02:21,119 --> 00:02:18,670  
solubility measurements the more

53  
00:02:23,330 --> 00:02:21,129  
esoteric measurements of electrical

54  
00:02:29,339 --> 00:02:23,340  
properties and zeta potentials and

55  
00:02:31,440 --> 00:02:29,349  
oxygen and surface tension and and the

56  
00:02:34,470 --> 00:02:31,450  
last two and the bottom our particular

57  
00:02:36,509 --> 00:02:34,480  
interest because this is what I have

58  
00:02:38,520 --> 00:02:36,519  
used and I'm going to report about in

59  
00:02:41,100 --> 00:02:38,530  
this particular talk the use of various

60  
00:02:45,240 --> 00:02:41,110  
forms of spectroscopy to measure the

61  
00:02:47,750 --> 00:02:45,250  
excited state of the solvent molecules

62  
00:02:50,069 --> 00:02:47,760  
the water itself or in the case of

63  
00:02:53,970 --> 00:02:50,079

ultraviolet it's actually measuring the

64

00:02:56,210 --> 00:02:53,980

oxygen dissolved in the water now there

65

00:02:58,589 --> 00:02:56,220

is a distinction between a vibrational

66

00:03:01,050 --> 00:02:58,599

transition and an electronic transition

67

00:03:07,130 --> 00:03:01,060

but these various forms of spectroscopy

68

00:03:09,270 --> 00:03:07,140

do measure these transitions and are

69

00:03:11,759 --> 00:03:09,280

well-known in both in the case of

70

00:03:14,610 --> 00:03:11,769

homeopathic remedies and energized water

71

00:03:17,009 --> 00:03:14,620

to show differences between treated and

72

00:03:18,449 --> 00:03:17,019

untreated I'm not really going to talk

73

00:03:21,030 --> 00:03:18,459

about the biology in this particular

74

00:03:23,250 --> 00:03:21,040

talk but there are lots of biological

75

00:03:25,470 --> 00:03:23,260

endpoints which have been measured with

76

00:03:27,660 --> 00:03:25,480

energized water whether it is a

77

00:03:29,330 --> 00:03:27,670

homeopathic remedy or whether it is an

78

00:03:31,920 --> 00:03:29,340

electromagnetic field or whether it's

79

00:03:33,839 --> 00:03:31,930

consciousness and I guess we talked

80

00:03:36,300 --> 00:03:33,849

about that earlier in the conference in

81

00:03:40,110 --> 00:03:36,310

regard to to build Bankston's work with

82

00:03:42,750 --> 00:03:40,120

conscious is built his energies quote to

83

00:03:45,000 --> 00:03:42,760

be transferred to water and I think this

84

00:03:46,890 --> 00:03:45,010

is an important area because says Bob

85

00:03:48,839 --> 00:03:46,900

John was talking about in the first

86

00:03:50,729 --> 00:03:48,849

panel this is where we can generate

87

00:03:53,430 --> 00:03:50,739

products this is where we can take our

88

00:03:55,860 --> 00:03:53,440

subtle energies and our esoteric

89

00:03:59,509 --> 00:03:55,870

anomalies and actually transfer

90

00:04:02,940 --> 00:03:59,519

information to water and have a stable

91

00:04:08,009 --> 00:04:02,950

preparation which can produce biological

92

00:04:11,250 --> 00:04:08,019

effects and actually make a product ok

93

00:04:13,170 --> 00:04:11,260

so the and now I want to get into the

94

00:04:16,080 --> 00:04:13,180

meat of what I'm talking about today

95

00:04:17,550 --> 00:04:16,090

and what I want to talk about is non

96

00:04:20,909 --> 00:04:17,560

classical forms of electromagnetic

97

00:04:22,980 --> 00:04:20,919

fields and their role in imprinting

98

00:04:24,930 --> 00:04:22,990

water now the first person to really do

99

00:04:28,020 --> 00:04:24,940

this with Cyril Smith who was a

100

00:04:31,409 --> 00:04:28,030

professor of electrical engineering in

101  
00:04:33,450 --> 00:04:31,419  
England and he was quite interested in

102  
00:04:35,580 --> 00:04:33,460  
it aight fields now classic

103  
00:04:37,560 --> 00:04:35,590  
electromagnetic fields are described in

104  
00:04:40,140 --> 00:04:37,570  
terms of the electric component magnetic

105  
00:04:42,450 --> 00:04:40,150  
component which are both force fields

106  
00:04:45,749 --> 00:04:42,460  
you know you really have to you know

107  
00:04:48,360 --> 00:04:45,759  
they produce a force and they have a

108  
00:04:51,120 --> 00:04:48,370  
macroscopic effect on matter which is

109  
00:04:53,670 --> 00:04:51,130  
well known but in the original

110  
00:04:55,020 --> 00:04:53,680  
mathematical equations they realized

111  
00:04:57,180 --> 00:04:55,030  
that they needed to introduce another

112  
00:04:59,730 --> 00:04:57,190  
term the magnetic vector potential or

113  
00:05:01,290 --> 00:04:59,740

the a field to really accurately

114

00:05:03,900 --> 00:05:01,300

describe the interaction of

115

00:05:08,310 --> 00:05:03,910

electromagnetic fields with matter now a

116

00:05:10,860 --> 00:05:08,320

fields were thought to be a mathematical

117

00:05:12,659 --> 00:05:10,870

construct for many many years but it was

118

00:05:17,219 --> 00:05:12,669

only relatively recently where they

119

00:05:21,420 --> 00:05:17,229

actually measured a macroscopic effect

120

00:05:24,510 --> 00:05:21,430

of a fields and were able to show that

121

00:05:29,550 --> 00:05:24,520

an a field does affect the spin of an

122

00:05:32,250 --> 00:05:29,560

electron ok so I silversmiths work aside

123

00:05:34,339 --> 00:05:32,260

we're going to go into my work where I

124

00:05:38,629 --> 00:05:34,349

actually used ultraviolet spectroscopy

125

00:05:43,670 --> 00:05:38,639

measure energized water in this case the

126

00:05:47,159 --> 00:05:43,680

the energy was generated from a

127

00:05:52,320 --> 00:05:47,169

particular setup which I will talk in a

128

00:05:55,800 --> 00:05:52,330

minute and I'm going to show that right

129

00:05:57,600 --> 00:05:55,810

now well ok so this is an example of the

130

00:06:01,379 --> 00:05:57,610

kind of effect with that you see with

131

00:06:05,100 --> 00:06:01,389

homeopathy where the ultraviolet spectra

132

00:06:08,100 --> 00:06:05,110

of the control is the upper graph and in

133

00:06:09,990 --> 00:06:08,110

this case there was a decrease in the

134

00:06:12,089 --> 00:06:10,000

spectra depending on the kind of

135

00:06:15,930 --> 00:06:12,099

energized water you get you get a

136

00:06:18,749 --> 00:06:15,940

different phenomena at different regions

137

00:06:21,529 --> 00:06:18,759

of the spectrum between 200 and 240

138

00:06:24,610 --> 00:06:21,539

nanometers so this is some previous work

139

00:06:27,129 --> 00:06:24,620

in the present work

140

00:06:29,590 --> 00:06:27,139

what I did was I wanted to prepare the

141

00:06:32,650 --> 00:06:29,600

classical electromagnetic field with the

142

00:06:36,159 --> 00:06:32,660

nonclassical in this case a force free

143

00:06:37,570 --> 00:06:36,169

field so we have a fundamental setup

144

00:06:40,870 --> 00:06:37,580

which allow us to cancel all the

145

00:06:44,890 --> 00:06:40,880

electric and magnetic force fields using

146

00:06:48,310 --> 00:06:44,900

a by filer coil in contrast to a

147

00:06:53,950 --> 00:06:48,320

solenoid coil okay and the experimental

148

00:06:55,000 --> 00:06:53,960

setup is based on other by fire coil is

149

00:06:58,180 --> 00:06:55,010

based on the concept where you have

150

00:07:00,760 --> 00:06:58,190

equal and opposing currents which cancel

151

00:07:02,980 --> 00:07:00,770

the magnetic and electric force fields

152

00:07:06,279 --> 00:07:02,990

associated with electromagnetic energy

153

00:07:08,560 --> 00:07:06,289

this concept has been used by others not

154

00:07:12,990 --> 00:07:08,570

in terms of information imprinting and

155

00:07:16,900 --> 00:07:13,000

water but has been used to generate

156

00:07:22,420 --> 00:07:16,910

anti-gravity and it's just like another

157

00:07:26,800 --> 00:07:22,430

whole topic but these kinds of anti

158

00:07:29,409 --> 00:07:26,810

parallel configurations produce effects

159

00:07:32,170 --> 00:07:29,419

where you can actually measure the the

160

00:07:34,180 --> 00:07:32,180

weight of an object and it decreases so

161

00:07:38,350 --> 00:07:34,190

these are some references so okay in the

162

00:07:41,170 --> 00:07:38,360

present experimental design I have two

163

00:07:43,180 --> 00:07:41,180

kinds of coils a classic solenoid coil

164

00:07:45,670 --> 00:07:43,190

where the current runs parallel now

165

00:07:49,570 --> 00:07:45,680

because the current input is 43

166

00:07:53,740 --> 00:07:49,580

kilohertz we have a time varying signal

167

00:07:57,790 --> 00:07:53,750

going in and as an the two different

168

00:07:59,200 --> 00:07:57,800

coils were matched because they have a

169

00:08:01,000 --> 00:07:59,210

different impedance and different

170

00:08:05,200 --> 00:08:01,010

electrical properties so that the total

171

00:08:07,450 --> 00:08:05,210

power was the same in both coils the

172

00:08:08,770 --> 00:08:07,460

coil on the right is to buy file or coil

173

00:08:12,040 --> 00:08:08,780

where the current goes in opposite

174

00:08:15,600 --> 00:08:12,050

directions and you know in on the left

175

00:08:20,560 --> 00:08:15,610

again we go down to the magnetic field

176

00:08:22,330 --> 00:08:20,570

present in a class classic coil like

177

00:08:25,360 --> 00:08:22,340

this you have a magnetic field which to

178

00:08:28,629 --> 00:08:25,370

be an e field and the a field that I

179

00:08:31,420 --> 00:08:28,639

talked about in the by file or winding

180

00:08:33,040 --> 00:08:31,430

the be filled and the a field

181

00:08:35,230 --> 00:08:33,050

were calculated in this particular case

182

00:08:36,940 --> 00:08:35,240

by bilt tiller this was a collaboration

183

00:08:40,360 --> 00:08:36,950

that we did together several years ago

184

00:08:43,650 --> 00:08:40,370

and you can see the magnitude of the of

185

00:08:45,460 --> 00:08:43,660

the a field and the B field are

186

00:08:49,210 --> 00:08:45,470

negligible when you get down to the

187

00:08:52,420 --> 00:08:49,220

minus 13 Tesla it's basically a

188

00:08:54,070 --> 00:08:52,430

negligible field so what we're doing

189

00:08:57,790 --> 00:08:54,080

here is we're creating an environment

190

00:08:59,380 --> 00:08:57,800

where there is no force fields present

191

00:09:03,250 --> 00:08:59,390

and there is no magnetic vector

192

00:09:05,140 --> 00:09:03,260

potential either and you put the sample

193

00:09:06,990 --> 00:09:05,150

of water inside for an hour and a half

194

00:09:09,250 --> 00:09:07,000

you measure the ultraviolet spectroscopy

195

00:09:11,560 --> 00:09:09,260

immediately after and these are the kind

196

00:09:14,200 --> 00:09:11,570

of results you get on the upper six

197

00:09:16,300 --> 00:09:14,210

separate experiments the upper graph

198

00:09:19,630 --> 00:09:16,310

represents the experiments with the

199

00:09:21,820 --> 00:09:19,640

classical solenoid coil and you can see

200

00:09:24,940 --> 00:09:21,830

that the values vary plus and minus

201  
00:09:29,080 --> 00:09:24,950  
point 05 around the zero if you can find

202  
00:09:32,140 --> 00:09:29,090  
the zero up up there and here the zero

203  
00:09:36,030 --> 00:09:32,150  
is here and in the case of these by fire

204  
00:09:39,850 --> 00:09:36,040  
coil you always produce a negative

205  
00:09:43,180 --> 00:09:39,860  
change in the absorption spectra that

206  
00:09:45,580 --> 00:09:43,190  
suggests that there's less oxygen and

207  
00:09:48,330 --> 00:09:45,590  
that might be due to change in the

208  
00:09:51,700 --> 00:09:48,340  
oxygen itself it might be due to the

209  
00:09:55,150 --> 00:09:51,710  
ability of this the structuring of the

210  
00:09:57,940 --> 00:09:55,160  
water to protect the oxygen so that it's
