

1
00:00:04,640 --> 00:00:02,180
so unfolding I mean I recently learned

2
00:00:07,550 --> 00:00:04,650
just two weeks ago that the latest

3
00:00:09,230 --> 00:00:07,560
camera if you have the money is a

4
00:00:11,299 --> 00:00:09,240
thousand times more sensitive than our

5
00:00:14,419 --> 00:00:11,309
camera when could even do this in real

6
00:00:16,160 --> 00:00:14,429
time and so we can look forward to to

7
00:00:26,330 --> 00:00:16,170
new discoveries as the technology

8
00:00:29,179 --> 00:00:26,340
unfolds thank you for some questions a

9
00:00:31,759 --> 00:00:29,189
lot of them I'd like to send one

10
00:00:35,319 --> 00:00:31,769
question and that is a few years ago at

11
00:00:39,139 --> 00:00:35,329
the ssea reported an experiment in which

12
00:00:41,540 --> 00:00:39,149
using intention one changed the

13
00:00:43,810 --> 00:00:41,550

reflectivity off a piece of glass you

14

00:00:46,760 --> 00:00:43,820

could measure the effects of that

15

00:00:51,110 --> 00:00:46,770

fantastic have thought of a pub so the

16

00:00:55,459 --> 00:00:51,120

question that I asked myself and I'm

17

00:00:58,040 --> 00:00:55,469

also going to ask you is how much or do

18

00:01:00,529 --> 00:00:58,050

we know that we are measuring what we

19

00:01:03,709 --> 00:01:00,539

think we're measuring in your case are

20

00:01:06,710 --> 00:01:03,719

you measuring actual changes in the

21

00:01:10,370 --> 00:01:06,720

cosmic rays or are you measuring noise

22

00:01:11,539 --> 00:01:10,380

in the camera yes yeah right or decrease

23

00:01:12,950 --> 00:01:11,549

noise in the camera because we're

24

00:01:15,050 --> 00:01:12,960

dealing with actual or some sort of

25

00:01:17,780 --> 00:01:15,060

structure the answer of course is we

26
00:01:21,700 --> 00:01:17,790
don't though already knows we're getting

27
00:01:24,320 --> 00:01:21,710
we're getting what we open yet and until

28
00:01:26,179 --> 00:01:24,330
until we can ultimately actually measure

29
00:01:28,039 --> 00:01:26,189
the the nature of the camera process

30
00:01:29,390 --> 00:01:28,049
separate from the cosmic rays or do

31
00:01:32,120 --> 00:01:29,400
shielding or do these other kinds of

32
00:01:34,280 --> 00:01:32,130
experiments it's an unknown question

33
00:01:37,249 --> 00:01:34,290
whether it's out there or in there we

34
00:01:39,350 --> 00:01:37,259
don't know it well we infer based on a

35
00:01:41,090 --> 00:01:39,360
lot of research that what's being picked

36
00:01:42,410 --> 00:01:41,100
up is out there but whether the

37
00:01:44,179 --> 00:01:42,420
transformation is occurring to the

38
00:01:45,620 --> 00:01:44,189

electronics of the camera or actually

39

00:01:56,360 --> 00:01:45,630

affecting the structure of the cosmic

40

00:01:56,370 --> 00:02:01,020

Oh

41

00:02:01,030 --> 00:02:06,540

for what

42

00:02:06,550 --> 00:02:19,770

vegetables my family

43

00:02:24,339 --> 00:02:22,479

it's a wonderful weather we've done a

44

00:02:25,809 --> 00:02:24,349

number of experiments like not to be

45

00:02:28,000 --> 00:02:25,819

referred here on the effects of human

46

00:02:31,270 --> 00:02:28,010

intention on by a photon emission of

47

00:02:32,680 --> 00:02:31,280

plants and I don't know how you define a

48

00:02:42,400 --> 00:02:32,690

called dead plants these plans were at

49

00:02:46,870 --> 00:02:42,410

least cut absolutely in fact the what's

50

00:02:48,759 --> 00:02:46,880

really interesting is that the certain

51
00:02:51,640 --> 00:02:48,769
atoms and molecules also emit code

52
00:02:53,050 --> 00:02:51,650
biophotons ie they emit photons and to

53
00:02:54,759 --> 00:02:53,060
my knowledge no one has ever taken a

54
00:02:56,110 --> 00:02:54,769
plant just had it and then you've got

55
00:02:57,699 --> 00:02:56,120
all the bacteria growing I mean there's

56
00:03:01,720 --> 00:02:57,709
a lot of things that are going to be a

57
00:03:03,660 --> 00:03:01,730
focal light okay but they what is

58
00:03:07,030 --> 00:03:03,670
important is that we've done research

59
00:03:10,089 --> 00:03:07,040
indicating that healers with their

60
00:03:12,520 --> 00:03:10,099
intention can either increase or

61
00:03:15,070 --> 00:03:12,530
decrease the amount of bio photon

62
00:03:17,920 --> 00:03:15,080
emission of plants with their intention

63
00:03:19,930 --> 00:03:17,930

so this is a bi-directional effect and I

64

00:03:21,430 --> 00:03:19,940

don't know about the question of if it's

65

00:03:29,420 --> 00:03:21,440

a quote living or dead from the plant

66

00:03:36,539 --> 00:03:32,309

for a has the subject of disability and

67

00:03:42,509 --> 00:03:36,549

you're doing episodic Curren my dishes

68

00:03:45,660 --> 00:03:42,519

for radius and waivers via there were

69

00:03:47,250 --> 00:03:45,670

two reasons number one we were looking

70

00:03:50,220 --> 00:03:47,260

for anything that could pick up

71

00:03:51,599 --> 00:03:50,230

structure and as you know that although

72

00:03:54,990 --> 00:03:51,609

there are assumptions that we make with

73

00:03:57,690 --> 00:03:55,000

Fourier analysis the empirically you can

74

00:04:01,349 --> 00:03:57,700

still apply it and secondly it was

75

00:04:05,129 --> 00:04:01,359

mostly convenience there was a very

76

00:04:06,629 --> 00:04:05,139

simple way for us to do something that

77

00:04:08,699 --> 00:04:06,639

could give us ultimately something that

78

00:04:11,280 --> 00:04:08,709

was measurable so I would say honestly

79

00:04:13,440 --> 00:04:11,290

it was mostly practical at this point

80

00:04:15,390 --> 00:04:13,450

and what's interesting is we've not done

81

00:04:18,979 --> 00:04:15,400

three experiments I'm just reporting one

82

00:04:22,170 --> 00:04:18,989

is it quote works so it becomes a tool

83

00:04:32,140 --> 00:04:22,180

without with the qualification of not

84

00:04:37,150 --> 00:04:35,200

you can see the time to hammer so if the

85

00:04:39,340 --> 00:04:37,160

effects as soon as you see the effect

86

00:04:40,660 --> 00:04:39,350

will not start searching for wavelet

87

00:04:43,450 --> 00:04:40,670

analysis too thanks it's a good

88

00:04:51,590 --> 00:04:43,460

suggestion area did you look at a lot of

89

00:04:59,400 --> 00:04:56,159

the answer is not yet but what we have

90

00:05:02,159 --> 00:04:59,410

done is we've explored other intention

91

00:05:04,650 --> 00:05:02,169

conditions and found that intention

92

00:05:06,659 --> 00:05:04,660

conditions matter so I would not be

93

00:05:08,909 --> 00:05:06,669

surprised if other healers might have

94

00:05:10,890 --> 00:05:08,919

different effects but my working

95

00:05:13,200 --> 00:05:10,900

hypothesis is that those that those

96

00:05:15,629 --> 00:05:13,210

healers who work with the notion of a

97

00:05:17,730 --> 00:05:15,639

universal energy that were working with

98

00:05:19,590 --> 00:05:17,740

the notion of a higher energy that we're

99

00:05:21,270 --> 00:05:19,600

going to see some universality of the
