WPD

1  
00:00:03,350 --> 00:00:01,760  
as I was doing here and some of the

2  
00:00:05,360 --> 00:00:03,360  
things he does know that I'm coming here

3  
00:00:06,829 --> 00:00:05,370  
and fortunately he didn't come to today

4  
00:00:08,810 --> 00:00:06,839  
died I have a little embarrassment to

5  
00:00:10,720 --> 00:00:08,820  
discuss it sir but I do see that in

6  
00:00:13,100 --> 00:00:10,730  
universities you have a very own

7  
00:00:15,379 --> 00:00:13,110  
political in terms of unit the ownership

8  
00:00:25,939 --> 00:00:15,389  
issues and stuff so I think I stress

9  
00:00:28,710 --> 00:00:25,949  
that very much curious is given the kind

10  
00:00:30,430 --> 00:00:28,720  
of changes going on at all

11  
00:00:33,550 --> 00:00:30,440  
world they

12  
00:00:37,720 --> 00:00:33,560  
we will see more or fewer of these types

13  
00:00:41,830 --> 00:00:37,730

of paths on referring to the stick throw

14

00:00:45,490 --> 00:00:41,840

the dog catch the shaping of a swing

15

00:00:56,030 --> 00:00:45,500

from side to side and the use of a

16

00:01:00,540 --> 00:00:58,530

thank the both I think some things that

17

00:01:02,610 --> 00:01:00,550

make it to the more public eye I'm very

18

00:01:03,660 --> 00:01:02,620

familiar with the law and the issues

19

00:01:06,660 --> 00:01:03,670

that relate to that type of thing

20

00:01:09,240 --> 00:01:06,670

there's actually been patent up the case

21

00:01:11,340 --> 00:01:09,250

a lot of case law recently that i think

22

00:01:12,510 --> 00:01:11,350

would probably invalidate so some of

23

00:01:15,120 --> 00:01:12,520

those patents might exist that are

24

00:01:17,310 --> 00:01:15,130

probably invalid now and i personally

25

00:01:19,380 --> 00:01:17,320

think the way the law has changed it's

26

00:01:21,690 --> 00:01:19,390

actually made it a little bit too too

27

00:01:23,850 --> 00:01:21,700

onerous for patenting certain types of

28

00:01:26,580 --> 00:01:23,860

methods or software their systems and

29

00:01:34,160 --> 00:01:26,590

i'm hoping to see a little bit of a pull

30

00:01:34,170 --> 00:01:41,870

to close associates here for tea bags

31

00:01:58,289 --> 00:01:49,819

a year process though and I think my

32

00:02:01,200 --> 00:01:58,299

the time especially if she falls on my

33

00:02:04,200 --> 00:02:01,210

slide I had mentioned and the slide

34

00:02:06,870 --> 00:02:04,210

mentions that you say he's probably

35

00:02:09,150 --> 00:02:06,880

correct that I skipped over an important

36

00:02:10,559 --> 00:02:09,160

part on my slide which is for foreign

37

00:02:13,890 --> 00:02:10,569

patents if you want to get protection

38

00:02:16,440 --> 00:02:13,900

abroad you have to file prior to any

39

00:02:18,089 --> 00:02:16,450  
disclosure I probably so all these

40

00:02:20,850 --> 00:02:18,099  
people I was on my slide I didn't

41

00:02:22,080 --> 00:02:20,860  
mention it but yeah so there's a one

42

00:02:24,449 --> 00:02:22,090  
year grace period in the United States

43

00:02:26,339 --> 00:02:24,459  
but you have to file prior to any

44

00:02:29,100 --> 00:02:26,349  
disclosure if you want to have

45

00:02:31,050 --> 00:02:29,110  
protection abroad and then I didn't get

46

00:02:33,120 --> 00:02:31,060  
into foreign protection once you file

47

00:02:43,550 --> 00:02:33,130  
then you have a one-year period to

48

00:02:47,940 --> 00:02:45,720  
q

49

00:02:50,339 --> 00:02:47,950  
a new survey the Patent Office of

50

00:02:53,460 --> 00:02:50,349  
happening back and develop the new
