

1
00:00:14,360 --> 00:00:10,640
there have been six experiments

2
00:00:19,790 --> 00:00:14,370
measuring the final fluxes repaired of

3
00:00:24,410 --> 00:00:19,800
years and not with them not not too much

4
00:00:26,689 --> 00:00:24,420
overlap in there in time one of the best

5
00:00:28,820 --> 00:00:26,699
experiments of the Japanese one cooked

6
00:00:31,790 --> 00:00:28,830
cameo Carver gives no evidence of time

7
00:00:35,540 --> 00:00:31,800
variation they measure high-energy

8
00:00:39,049 --> 00:00:35,550
neutrino six MeV or more another

9
00:00:42,530 --> 00:00:39,059
experiment Korg Alex in that was running

10
00:00:46,400 --> 00:00:42,540
several years at a deck aid ago in Gran

11
00:00:51,080 --> 00:00:46,410
Sasso in Italy measures lower energy

12
00:00:53,119 --> 00:00:51,090
elect new tree nose water one MeV now to

13
00:00:55,910 --> 00:00:53,129

my mind that experiment shows clear

14

00:00:59,090 --> 00:00:55,920

evidence of time variation of the other

15

00:01:02,389 --> 00:00:59,100

decalur of the neutron flux but most

16

00:01:05,420 --> 00:01:02,399

expose experimentalists feel neutron

17

00:01:11,240 --> 00:01:05,430

flux can't theory and therefore it

18

00:01:18,520 --> 00:01:11,250

doesn't therefore it doesn't vary one

19

00:01:23,900 --> 00:01:21,200

evidence that need to hear it changes

20

00:01:28,370 --> 00:01:23,910

our legs

21

00:01:32,690 --> 00:01:28,380

well George is the last slide I showed

22

00:01:36,719 --> 00:01:32,700

showing an apparent relationship between

23

00:01:39,180 --> 00:01:36,729

floors and changes it indicate the only
