

1  
00:00:25,690 --> 00:00:06,940

[Music]

2  
00:00:28,630 --> 00:00:25,700

I want to address something which I

3  
00:00:32,040 --> 00:00:28,640

picked up well Dominique was talking and

4  
00:00:34,209 --> 00:00:32,050

the audience was responding to her and

5  
00:00:36,729 --> 00:00:34,219

that is the question about the

6  
00:00:39,480 --> 00:00:36,739

differences in frequencies and

7  
00:00:45,750 --> 00:00:39,490

vibrations electric and magnetic

8  
00:00:49,200 --> 00:00:45,760

energies and so forth radiesthesia

9  
00:00:51,970 --> 00:00:49,210

developed out of the subjective

10  
00:00:54,940 --> 00:00:51,980

appreciation of what was going on in

11  
00:00:59,680 --> 00:00:54,950

reality and those who are investigating

12  
00:01:05,410 --> 00:00:59,690

it found a way to objectify it via the

13  
00:01:07,420 --> 00:01:05,420

pendulum or by dowsing therefore they

14

00:01:10,450 --> 00:01:07,430

came up with a whole different frame of

15

00:01:16,050 --> 00:01:10,460

reference than what we in modern times

16

00:01:23,349 --> 00:01:19,690

electricity and magnetism not by virtue

17

00:01:25,809 --> 00:01:23,359

of our subjective appreciation of

18

00:01:28,389 --> 00:01:25,819

reality but because we had developed

19

00:01:30,219 --> 00:01:28,399

certain kinds of instrumentation they

20

00:01:33,069 --> 00:01:30,229

could pick these kinds of things up

21

00:01:36,129 --> 00:01:33,079

these are two totally different frames

22

00:01:38,709 --> 00:01:36,139

of reference they may share some things

23

00:01:41,800 --> 00:01:38,719

in common but we certainly don't know

24

00:01:45,550 --> 00:01:41,810

enough yet about that but it's important

25

00:01:48,809 --> 00:01:45,560

to keep that in mind now I'll go into my

26

00:01:55,019 --> 00:01:48,819

own work which I'm sure will be

27

00:02:03,120 --> 00:01:59,709

what you see here is a photograph of

28

00:02:05,409 --> 00:02:03,130

Wilhelm Reich operating a cloudbuster

29

00:02:08,469 --> 00:02:05,419

know I'm sure you all know what a

30

00:02:12,460 --> 00:02:08,479

cloudbuster is by virtue of the name yes

31

00:02:15,580 --> 00:02:12,470

it busts klaus and i have been using it

32

00:02:17,510 --> 00:02:15,590

to bust clouds and make rain and

33

00:02:20,390 --> 00:02:17,520

disperse pollution

34

00:02:23,720 --> 00:02:20,400

for over 50 years not the same

35

00:02:26,360 --> 00:02:23,730

instrument as Reich but another which is

36

00:02:30,620 --> 00:02:26,370

similar and you'll notice that the

37

00:02:33,530 --> 00:02:30,630

instrument is composed of ten hollow

38

00:02:36,770 --> 00:02:33,540

metal tubes which are extensible and the

39

00:02:44,990 --> 00:02:36,780

whole thing pivots around something like

40

00:02:48,620 --> 00:02:45,000

like a howitzer this is me when I had

41

00:02:53,450 --> 00:02:48,630

hair with with the cloudbuster that I

42

00:02:55,880 --> 00:02:53,460

used in eastern Pennsylvania and there

43

00:03:00,710 --> 00:02:55,890

we did a lot of work in breaking up

44

00:03:03,680 --> 00:03:00,720

droughts and we had variations of this

45

00:03:08,470 --> 00:03:03,690

built and I worked in Israel and here in

46

00:03:11,540 --> 00:03:08,480

the West Coast on different projects

47

00:03:14,570 --> 00:03:11,550

now Reich believes that the way the

48

00:03:20,170 --> 00:03:14,580

cloudbuster worked is that Oregon energy

49

00:03:23,690 --> 00:03:20,180

which he defined and demonstrated was

50

00:03:27,140 --> 00:03:23,700

attracted this is a cosmic energy in our

51  
00:03:29,960 --> 00:03:27,150  
atmosphere and it was attracted to these

52  
00:03:33,620 --> 00:03:29,970  
long metal tubes he found that out quite

53  
00:03:36,410 --> 00:03:33,630  
serendipitously and then if you grounded

54  
00:03:40,100 --> 00:03:36,420  
so-called the tubes into flowing water

55  
00:03:42,199 --> 00:03:40,110  
or a large body of water then there

56  
00:03:44,720 --> 00:03:42,209  
would be a redistribution of this energy

57  
00:03:46,790 --> 00:03:44,730  
in the atmosphere and one of the

58  
00:03:49,640 --> 00:03:46,800  
manifestations of this would be

59  
00:03:52,460 --> 00:03:49,650  
destruction of clouds clouds were

60  
00:03:55,310 --> 00:03:52,470  
considered by Reich to be concentrations

61  
00:03:58,130 --> 00:03:55,320  
of Oregon energy that attracted moisture

62  
00:04:00,470 --> 00:03:58,140  
to them if you could remove the energy

63  
00:04:03,199 --> 00:04:00,480

as he was able to do with the cloud

64

00:04:07,010 --> 00:04:03,209

buster then the moisture would dissipate

65

00:04:09,710 --> 00:04:07,020

to the rest of the atmosphere and I

66

00:04:13,520 --> 00:04:09,720

found in my own research doing this

67

00:04:16,670 --> 00:04:13,530

hundreds of times that not only did his

68

00:04:19,610 --> 00:04:16,680

hypothesis seem to be correct but one

69

00:04:23,240 --> 00:04:19,620

had to add something to it and that was

70

00:04:25,880 --> 00:04:23,250

the operators intention this came about

71

00:04:28,219 --> 00:04:25,890

on my part after studying with Bob John

72

00:04:30,030 --> 00:04:28,229

and Brendan done at Princeton and it

73

00:04:33,770 --> 00:04:30,040

became very clear to me

74

00:04:38,100 --> 00:04:33,780

shortly thereafter my work there that

75

00:04:41,550 --> 00:04:38,110

the cloudbuster this one that I had here

76  
00:04:43,650 --> 00:04:41,560  
in California was I needed the operators

77  
00:04:49,800 --> 00:04:43,660  
intention there was my intention of

78  
00:04:52,170 --> 00:04:49,810  
course in in this case now in

79  
00:04:57,020 --> 00:04:52,180  
anticipation of working on droughts in

80  
00:05:00,140 --> 00:04:57,030  
the American Midwest and in Colorado

81  
00:05:02,880 --> 00:05:00,150  
Dominique and I decided to set up a

82  
00:05:05,450 --> 00:05:02,890  
cloud busting weather control station

83  
00:05:13,640 --> 00:05:05,460  
and near her home in Evergreen Colorado

84  
00:05:16,500 --> 00:05:13,650  
and we assembled a crew and here we are

85  
00:05:18,960 --> 00:05:16,510  
starting I'm going to train the crew on

86  
00:05:24,120 --> 00:05:18,970  
how to use this device and here we are

87  
00:05:25,710 --> 00:05:24,130  
in a park near evergreen and there are

88  
00:05:28,500 --> 00:05:25,720

the members of the crew assembling the

89

00:05:33,840 --> 00:05:28,510

device Dominique in the left hand panel

90

00:05:36,660 --> 00:05:33,850

is doing some radio static sensing using

91

00:05:39,420 --> 00:05:36,670

a pendulum and you'll notice that the

92

00:05:41,990 --> 00:05:39,430

that there are these hollow flexible

93

00:05:46,140 --> 00:05:42,000

metal cables leading off the end of the

94

00:05:50,010 --> 00:05:46,150

the solid metal rods and they lead into

95

00:05:51,810 --> 00:05:50,020

a stream which is to the right in the

96

00:05:54,540 --> 00:05:51,820

right-hand panel also in left hand panel

97

00:05:58,860 --> 00:05:54,550

you can see that there are stakes with

98

00:06:02,130 --> 00:05:58,870

orange ribbons on them and these are the

99

00:06:06,600 --> 00:06:02,140

results of the information that

100

00:06:10,050 --> 00:06:06,610

Dominique was picking up the idea was

101  
00:06:12,240 --> 00:06:10,060  
that she would try we thought that there

102  
00:06:15,720 --> 00:06:12,250  
was could be an energy field surrounding

103  
00:06:18,510 --> 00:06:15,730  
this device and that was on the basis of

104  
00:06:19,250 --> 00:06:18,520  
some preliminary operations that we had

105  
00:06:23,130 --> 00:06:19,260  
done before

106  
00:06:26,310 --> 00:06:23,140  
so what Dominique did was to approach

107  
00:06:31,650 --> 00:06:26,320  
the device from several different angles

108  
00:06:34,500 --> 00:06:31,660  
and when she were the intention in her

109  
00:06:37,350 --> 00:06:34,510  
mind that she's looking for that place

110  
00:06:39,690 --> 00:06:37,360  
if there's a field where that field

111  
00:06:41,270 --> 00:06:39,700  
would first appear as she approached the

112  
00:06:43,670 --> 00:06:41,280  
device and

113  
00:06:48,980 --> 00:06:43,680

when she picked this place that spot up

114

00:06:52,150 --> 00:06:48,990

we would drive a stake now most

115

00:06:55,520 --> 00:06:52,160

important for this particular operation

116

00:07:00,110 --> 00:06:55,530

was the fact that when we got too close

117

00:07:03,980 --> 00:07:00,120

to the device we would get sick and it

118

00:07:05,840 --> 00:07:03,990

was practically instantaneous that is we

119

00:07:09,950 --> 00:07:05,850

would both feel pulling pains in the

120

00:07:14,200 --> 00:07:09,960

abdomen nausea and headaches we moved

121

00:07:17,540 --> 00:07:14,210

away and put water on our hands and face

122

00:07:24,560 --> 00:07:17,550

and recovered and then Dominique did her

123

00:07:28,790 --> 00:07:24,570

measurements this is a the cloud Buster

124

00:07:30,440 --> 00:07:28,800

was pointed approximately here and you

125

00:07:33,850 --> 00:07:30,450

can see that there is what you might

126

00:07:36,590 --> 00:07:33,860

consider a large hole in an otherwise

127

00:07:40,820 --> 00:07:36,600

what had previously been a fairly solid

128

00:07:43,640 --> 00:07:40,830

Bank of clouds and we have done many

129

00:07:45,350 --> 00:07:43,650

many control experiments demonstrating

130

00:07:48,230 --> 00:07:45,360

that there's no question that you can

131

00:07:51,260 --> 00:07:48,240

break up this cloud and not that cloud

132

00:07:53,510 --> 00:07:51,270

or this cloud versus 20 other clouds

133

00:07:56,360 --> 00:07:53,520

that stay intact and I have done this

134

00:07:59,330 --> 00:07:56,370

literally dozens and dozens of times and

135

00:08:04,070 --> 00:07:59,340

we have controlled studies of using this

136

00:08:07,480 --> 00:08:04,080

device to create rain and compared it to

137

00:08:14,270 --> 00:08:07,490

weather forecasts and previous

138

00:08:21,590 --> 00:08:14,280

precipitation records now this was the

139

00:08:23,000 --> 00:08:21,600

pattern of that we got from these the

140

00:08:27,200 --> 00:08:23,010

field that we thought we were

141

00:08:30,800 --> 00:08:27,210

investigating the red dot with the

142

00:08:32,500 --> 00:08:30,810

letters AED that stands for our term for

143

00:08:37,909 --> 00:08:32,510

the cloud Buster which is atmospheric

144

00:08:43,190 --> 00:08:37,919

energy engineering device the black dots

145

00:08:45,710 --> 00:08:43,200

are where the stakes were put in and by

146

00:08:47,600 --> 00:08:45,720

direction of energy flow we mean that

147

00:08:50,060 --> 00:08:47,610

would be the movement down through the

148

00:08:52,610 --> 00:08:50,070

pipes from the atmosphere and then into

149

00:08:52,610 --> 00:08:52,620

the stream

150

00:09:00,560 --> 00:08:56,000

I found it quite interesting that there

151  
00:09:07,850 --> 00:09:00,570  
was this by lobar appearance of of the

152  
00:09:11,980 --> 00:09:07,860  
field and I had been familiar with this

153  
00:09:15,280 --> 00:09:11,990  
kind of configuration into some kinds of

154  
00:09:17,780 --> 00:09:15,290  
electromagnetic instruments or

155  
00:09:20,510 --> 00:09:17,790  
transmitters and probably some of you

156  
00:09:26,170 --> 00:09:20,520  
will know more about that than I do and

157  
00:09:31,940 --> 00:09:26,180  
please let me know we were going to

158  
00:09:35,240 --> 00:09:31,950  
repeat this experiment and put mung

159  
00:09:39,290 --> 00:09:35,250  
beans in the field see how they would

160  
00:09:44,840 --> 00:09:39,300  
grow our experience was that whatever

161  
00:09:49,250 --> 00:09:44,850  
this energy was was not pleasant for us

162  
00:09:51,290 --> 00:09:49,260  
and Dominique actually identified it

163  
00:09:54,110 --> 00:09:51,300

through the use of the pendulum special

164

00:09:56,890 --> 00:09:54,120

pendulum as being negative electric

165

00:09:58,880 --> 00:09:56,900

carrying which she mentioned in her talk

166

00:10:01,449 --> 00:09:58,890

which would mean that it's probably

167

00:10:05,570 --> 00:10:01,459

dangerous to hang around these things

168

00:10:09,980 --> 00:10:05,580

well we decided to repeat the experiment

169

00:10:12,140 --> 00:10:09,990

with far more samples of mung beans that

170

00:10:14,990 --> 00:10:12,150

were placed within an outside of the

171

00:10:20,060 --> 00:10:15,000

field to test their rate of germination

172

00:10:23,570 --> 00:10:20,070

and rate of sprouting so I came back to

173

00:10:27,650 --> 00:10:23,580

Evergreen approximately four months

174

00:10:31,850 --> 00:10:27,660

later and we set up cloudbuster

175

00:10:35,590 --> 00:10:31,860

in a but it was this time it was a

176  
00:10:39,019 --> 00:10:35,600  
different site we had it grounded into a

177  
00:10:42,920 --> 00:10:39,029  
stream in which there were torrents of

178  
00:10:44,449 --> 00:10:42,930  
water moving and that I ascribe to be

179  
00:10:49,610 --> 00:10:44,459  
one of the major differences in these

180  
00:10:58,430 --> 00:10:55,040  
the problem was that the intensity of

181  
00:11:01,370 --> 00:10:58,440  
the field when we were close to it was

182  
00:11:03,910 --> 00:11:01,380  
so strong that we could stay for only a

183  
00:11:07,430 --> 00:11:03,920  
very short period of time

184  
00:11:10,519 --> 00:11:07,440  
matter of fact because I was the one in

185  
00:11:11,990 --> 00:11:10,529  
charge of putting out the mung beans and

186  
00:11:14,990 --> 00:11:12,000  
taking them down and all of that

187  
00:11:18,760 --> 00:11:15,000  
throughout the day I had quite an

188  
00:11:23,210 --> 00:11:18,770

excessive exposure and by the fourth day

189

00:11:26,180 --> 00:11:23,220

doing this operation the device was up

190

00:11:29,480 --> 00:11:26,190

for hours at a time and I was exposed to

191

00:11:31,460 --> 00:11:29,490

it for hours at a time by the end of the

192

00:11:38,360 --> 00:11:31,470

fourth day when I tried to go to bed and

193

00:11:42,620 --> 00:11:38,370

sleep I couldn't I had severe paroxysmal

194

00:11:45,530 --> 00:11:42,630

atrial fibrillation as a physician I

195

00:11:47,600 --> 00:11:45,540

know what that is and it was so strong

196

00:11:50,840 --> 00:11:47,610

that my body was actually being moved

197

00:11:54,070 --> 00:11:50,850

around the bed my heart was thumping so

198

00:11:58,150 --> 00:11:54,080

hard of course I was frightened because

199

00:12:03,730 --> 00:11:58,160

these things can be dangerous but

200

00:12:09,160 --> 00:12:03,740

fortunately I had on tap a healer who

201  
00:12:11,390 --> 00:12:09,170  
whom I called and he worked on me and in

202  
00:12:15,920 --> 00:12:11,400  
approximately a couple of hours I was

203  
00:12:20,510 --> 00:12:15,930  
able to settle down the cardiac symptoms

204  
00:12:25,100 --> 00:12:20,520  
stopped and I was able to sleep I got

205  
00:12:28,760 --> 00:12:25,110  
out of Dodge the next day went back to

206  
00:12:30,769 --> 00:12:28,770  
Selah because I knew that an elevation

207  
00:12:33,850 --> 00:12:30,779  
of 8,000 feet which is where we were

208  
00:12:37,550 --> 00:12:33,860  
working was not good for my heart and

209  
00:12:40,040 --> 00:12:37,560  
that helped and nevertheless it took me

210  
00:12:47,620 --> 00:12:40,050  
in other four days to be completely free

211  
00:12:51,489 --> 00:12:47,630  
of symptoms and to feel healthy again so

212  
00:13:01,400 --> 00:12:58,309  
in conclusion we have evidence that

213  
00:13:04,090 --> 00:13:01,410

first place there is a so-called what we

214

00:13:07,309 --> 00:13:04,100

call a field this has never been

215

00:13:10,849 --> 00:13:07,319

measured before around any of these

216

00:13:12,079 --> 00:13:10,859

so-called organ otic devices that were

217

00:13:18,619 --> 00:13:12,089

invented by Reich

218

00:13:21,679 --> 00:13:18,629

and in our experience in Colorado it can

219

00:13:26,749 --> 00:13:21,689

be seen that this field can be of a

220

00:13:30,650 --> 00:13:26,759

negative nature and of course we've only

221

00:13:34,249 --> 00:13:30,660

just begun to tap into this and we

222

00:13:37,519 --> 00:13:34,259

intend to continue unfortunately because

223

00:13:39,799 --> 00:13:37,529

we had to cut the operation short we

224

00:13:43,759 --> 00:13:39,809

were not able to get enough data on the

225

00:13:47,949 --> 00:13:43,769

beam development and growth but in the

226

00:13:51,799 --> 00:13:47,959

meantime I found a smaller version and

227

00:13:55,009 --> 00:13:51,809

less potentially lethal version of this

228

00:14:00,289 --> 00:13:55,019

device which produces some of the same

229

00:14:00,889 --> 00:14:00,299

feelings and we will revisit that in the

230

00:14:03,110 --> 00:14:00,899

future

231

00:14:10,260 --> 00:14:03,120

thank you

232

00:14:17,580 --> 00:14:10,270

[Applause]

233

00:14:27,000 --> 00:14:23,430

thank you are you willing to assist with

234

00:14:31,570 --> 00:14:27,010

California's rain situation this year

235

00:14:34,420 --> 00:14:31,580

yeah well there were three rains since

236

00:14:36,670 --> 00:14:34,430

the first of the year there were all the

237

00:14:41,680 --> 00:14:36,680

result of these weather control

238

00:14:44,050 --> 00:14:41,690

operations now there is something to

239

00:14:48,400 --> 00:14:44,060

keep in mind and that is that this

240

00:14:54,580 --> 00:14:48,410

device is not a mechanical device yes it

241

00:14:56,910 --> 00:14:54,590

has mechanical parts but the operators

242

00:15:00,340 --> 00:14:56,920

intention is extremely important and

243

00:15:03,130 --> 00:15:00,350

some of my co-workers are beginning to

244

00:15:06,010 --> 00:15:03,140

appreciate that but there's another

245

00:15:10,060 --> 00:15:06,020

factor and it's extremely important that

246

00:15:13,000 --> 00:15:10,070

is the state of the atmosphere what one

247

00:15:16,450 --> 00:15:13,010

works with this you're forming there's a

248

00:15:20,140 --> 00:15:16,460

co functioning principle between the

249

00:15:24,610 --> 00:15:20,150

apparatus and the atmosphere and myself

250

00:15:30,310 --> 00:15:24,620

a resonance has to be established if the

251  
00:15:33,370 --> 00:15:30,320  
atmosphere is not ready to rain you can

252  
00:15:36,040 --> 00:15:33,380  
force it to do it through long hard work

253  
00:15:39,240 --> 00:15:36,050  
and I've done that but here in

254  
00:15:43,690 --> 00:15:39,250  
California there has to be a body of

255  
00:15:47,140 --> 00:15:43,700  
precipitable air to work with and now

256  
00:15:50,320 --> 00:15:47,150  
we're beginning to move out of that time

257  
00:15:53,190 --> 00:15:50,330  
in the year where you can have access to

258  
00:15:57,340 --> 00:15:53,200  
that large body a precipitable air

259  
00:15:59,890 --> 00:15:57,350  
however if it's dry as I'm sure it will

260  
00:16:05,769 --> 00:15:59,900  
be when the rainy season fall comes

261  
00:16:11,990 --> 00:16:08,749  
you mentioned in your talk that you've

262  
00:16:14,300 --> 00:16:12,000  
been working with cloud busters for

263  
00:16:19,670 --> 00:16:14,310

about 50 years and of course Reich was

264

00:16:22,460 --> 00:16:19,680

working with them before you were how is

265

00:16:25,639 --> 00:16:22,470

it that this is is the first time you've

266

00:16:27,650 --> 00:16:25,649

encountered a a field of harmful

267

00:16:29,509 --> 00:16:27,660

negative energy emanating from the

268

00:16:30,829 --> 00:16:29,519

vicinity of the cloud Buster you at

269

00:16:32,600 --> 00:16:30,839

least you didn't say anything about

270

00:16:36,189 --> 00:16:32,610

having gotten sick around them in the

271

00:16:40,759 --> 00:16:36,199

past an excellent question

272

00:16:44,179 --> 00:16:40,769

fact of the matter is that do a prior to

273

00:16:47,300 --> 00:16:44,189

this time as I say I had worked with it

274

00:16:50,689 --> 00:16:47,310

for a long period of time and when the

275

00:16:54,079 --> 00:16:50,699

device I was using before was hand

276

00:16:56,480 --> 00:16:54,089

operated am built and moved and I would

277

00:16:58,639 --> 00:16:56,490

be behind it and by the end of working

278

00:17:02,509 --> 00:16:58,649

with it my whole body would be shaking

279

00:17:06,669 --> 00:17:02,519

this was I was much younger and I could

280

00:17:10,250 --> 00:17:06,679

get over it in about three or four days

281

00:17:13,610 --> 00:17:10,260

and eventually however it took its toll

282

00:17:14,990 --> 00:17:13,620

I developed chronic fatigue syndrome and

283

00:17:21,319 --> 00:17:15,000

I'm practically certain it was due to

284

00:17:23,179 --> 00:17:21,329

that kind of work now I believe that

285

00:17:26,270 --> 00:17:23,189

there's been a change in the atmosphere

286

00:17:29,230 --> 00:17:26,280

and that the kind of stuff that we're

287

00:17:34,370 --> 00:17:29,240

pulling into this device is different

288

00:17:36,440 --> 00:17:34,380

either in intensity quality or both than

289

00:17:39,620 --> 00:17:36,450

when I was operating this as a much

290

00:17:42,350 --> 00:17:39,630

younger man and that would be an

291

00:17:44,960 --> 00:17:42,360

interesting question there was nothing

292

00:17:49,970 --> 00:17:44,970

that you could tell from observation the

293

00:17:52,430 --> 00:17:49,980

sky was blue clear beautiful day and yet

294

00:17:55,520 --> 00:17:52,440

when we began with this operation there

295

00:17:59,659 --> 00:17:55,530

was an instant reaction that both of us

296

00:18:04,520 --> 00:17:59,669

and as I described so this remains to be

297

00:18:08,750 --> 00:18:04,530

worked on and understood right called it

298

00:18:11,570 --> 00:18:08,760

or Anor he was able to induce the same

299

00:18:14,779 --> 00:18:11,580

kind of reaction by putting a victim

300

00:18:17,810 --> 00:18:14,789

excuse-me radioactive materials inside

301  
00:18:18,620 --> 00:18:17,820  
an organ accumulator and letting it stay

302  
00:18:21,890 --> 00:18:18,630  
there

303  
00:18:23,840 --> 00:18:21,900  
for hours at a time and if you read his

304  
00:18:27,500 --> 00:18:23,850  
report it's very similar to what I

305  
00:18:30,530 --> 00:18:27,510  
described and what we experienced the

306  
00:18:32,150 --> 00:18:30,540  
relationship between orang or and what

307  
00:18:35,090 --> 00:18:32,160  
dominique describes this negative

308  
00:18:38,740 --> 00:18:35,100  
electric green it's fascinating to think

309  
00:18:43,190 --> 00:18:38,750  
about and we will try to find ways to

310  
00:18:46,760 --> 00:18:43,200  
experiment I have a question that we

311  
00:18:49,940 --> 00:18:46,770  
hear yeah that relates to the the water

312  
00:18:52,820 --> 00:18:49,950  
especially the rapidly running water so

313  
00:18:55,910 --> 00:18:52,830

as you know viktor schauberger talked

314

00:18:59,180 --> 00:18:55,920

about rapidly running water as being

315

00:19:01,910 --> 00:18:59,190

living water and in terms of what I

316

00:19:05,960 --> 00:19:01,920

presented yesterday I would suggest that

317

00:19:07,790 --> 00:19:05,970

there's a lot of easy water in that easy

318

00:19:10,910 --> 00:19:07,800

water is negatively charged

319

00:19:14,060 --> 00:19:10,920

if you connect these tubes to the

320

00:19:16,490 --> 00:19:14,070

negatively charged water the tips of the

321

00:19:18,410 --> 00:19:16,500

tubes will become negatively charged and

322

00:19:20,690 --> 00:19:18,420

I think there are possibly two

323

00:19:22,880 --> 00:19:20,700

consequences of that the first is that

324

00:19:25,130 --> 00:19:22,890

you'll be pulled toward that negatively

325

00:19:28,190 --> 00:19:25,140

charged negative charge as you as

326

00:19:30,740 --> 00:19:28,200

reported because the negative charge

327

00:19:32,750 --> 00:19:30,750

will induce equal and opposite charge on

328

00:19:35,450 --> 00:19:32,760

you and so there should be a drawing

329

00:19:37,520 --> 00:19:35,460

force which which you reported and the

330

00:19:40,370 --> 00:19:37,530

second is that you know the clouds are

331

00:19:43,340 --> 00:19:40,380

just full of charge and and so it makes

332

00:19:47,780 --> 00:19:43,350

sense as hypothetically at least that

333

00:19:50,320 --> 00:19:47,790

somehow this this charge in in those

334

00:19:54,230 --> 00:19:50,330

tubes could somehow impact the the

335

00:19:58,010 --> 00:19:54,240

clouds charge and perhaps that could be

336

00:20:00,050 --> 00:19:58,020

involved in in the genesis of the of the

337

00:20:03,620 --> 00:20:00,060

precipitation so i'm just wondering

338

00:20:06,770 --> 00:20:03,630

whether the the entire system could be

339

00:20:10,010 --> 00:20:06,780

essentially electrical or charged base

340

00:20:12,170 --> 00:20:10,020

in in nature and the second is was a

341

00:20:14,690 --> 00:20:12,180

question i just didn't quite understand

342

00:20:16,010 --> 00:20:14,700

if it produces precipitation then i

343

00:20:18,050 --> 00:20:16,020

didn't understand why

344

00:20:20,360 --> 00:20:18,060

if there are clouds there's a clearing

345

00:20:22,760 --> 00:20:20,370

that you you showed I guess I would have

346

00:20:25,460 --> 00:20:22,770

expected more

347

00:20:28,670 --> 00:20:25,470

a dense cloud there instead of no cloud

348

00:20:31,070 --> 00:20:28,680

well you probably didn't notice because

349

00:20:33,110 --> 00:20:31,080

I didn't draw attention to it but to the

350

00:20:36,890 --> 00:20:33,120

left of that area of clearing was an

351

00:20:39,020 --> 00:20:36,900

area of very dense clouds which hadn't

352

00:20:44,570 --> 00:20:39,030

been there before if you know how to

353

00:20:47,240 --> 00:20:44,580

work with this we'll call it charge in

354

00:20:49,760 --> 00:20:47,250

the atmosphere and you know the natural

355

00:20:54,950 --> 00:20:49,770

progression of weather systems through

356

00:20:57,200 --> 00:20:54,960

your area you can manipulate the

357

00:20:59,480 --> 00:20:57,210

atmosphere the charge in the atmosphere

358

00:21:02,630 --> 00:20:59,490

so that you can actually build the

359

00:21:06,920 --> 00:21:02,640

clouds and I've done that many many many

360

00:21:10,030 --> 00:21:06,930

times but I I really appreciated your

361

00:21:12,530 --> 00:21:10,040

talk yesterday and and what you said

362

00:21:15,880 --> 00:21:12,540

immediately registered with me with

363

00:21:20,890 --> 00:21:15,890

respect to this work there's a definite

364

00:21:24,760 --> 00:21:20,900

identity there my own efforts and

365

00:21:30,320 --> 00:21:24,770

measuring standardly well known

366

00:21:32,360 --> 00:21:30,330

electromagnetic impulses and charges so

367

00:21:36,380 --> 00:21:32,370

far have failed around the cloudbuster

368

00:21:39,770 --> 00:21:36,390

I've tried it but nothing registers

369

00:21:44,770 --> 00:21:39,780

we've three more quick questions in the

370

00:21:49,190 --> 00:21:44,780

queue and then we'll break for rate yes

371

00:21:52,190 --> 00:21:49,200

Nick in relation to constructing the

372

00:21:55,610 --> 00:21:52,200

device are are their designs to

373

00:21:58,400 --> 00:21:55,620

construct the device properly so it will

374

00:22:01,040 --> 00:21:58,410

work and secondly are there protocols

375

00:22:03,620 --> 00:22:01,050

that either you or others have written

376

00:22:05,600 --> 00:22:03,630

up or could write up for the successful

377

00:22:08,120 --> 00:22:05,610

operation of the device so the

378

00:22:11,140 --> 00:22:08,130

experimenters could use it and also for

379

00:22:15,740 --> 00:22:11,150

to protect them from these negative

380

00:22:17,920 --> 00:22:15,750

consequences and the the third thing is

381

00:22:20,420 --> 00:22:17,930

could it be that the increase in

382

00:22:23,630 --> 00:22:20,430

electrosmog that has occurred over the

383

00:22:25,640 --> 00:22:23,640

past 50 years with you know now Wi-Fi

384

00:22:28,290 --> 00:22:25,650

and all kinds of other electromagnetic

385

00:22:31,260 --> 00:22:28,300

ways maybe is contributed to the

386

00:22:34,800 --> 00:22:31,270

- this increasing negativity that you

387

00:22:36,690 --> 00:22:34,810

may have experienced with respect to the

388

00:22:40,770 --> 00:22:36,700

last question my answer is an

389

00:22:44,700 --> 00:22:40,780

unequivocal yes we're killing ourselves

390

00:22:46,320 --> 00:22:44,710

with electrosmog and I think it is

391

00:22:49,280 --> 00:22:46,330

producing what as I mentioned before

392

00:22:50,820 --> 00:22:49,290

what right call Dior noir effect a

393

00:22:54,660 --> 00:22:50,830

hyperexcitability

394

00:22:56,370 --> 00:22:54,670

of the energy in the atmosphere and I

395

00:22:59,610 --> 00:22:56,380

think that that is more directly related

396

00:23:01,320 --> 00:22:59,620

to drought than anything else because

397

00:23:04,860 --> 00:23:01,330

the atmosphere becomes intensely

398

00:23:07,650 --> 00:23:04,870

expansive and you get high pressure

399

00:23:09,990 --> 00:23:07,660

systems which sustain themselves over

400

00:23:13,530 --> 00:23:10,000

long periods of time and then you get

401  
00:23:16,400 --> 00:23:13,540  
droughts and of course you get reactions

402  
00:23:20,700 --> 00:23:16,410  
to that in terms of heavy rainfalls

403  
00:23:24,570 --> 00:23:20,710  
precipitation which is had never been

404  
00:23:28,440 --> 00:23:24,580  
seen before and so forth with respect to

405  
00:23:31,920 --> 00:23:28,450  
the protocols reich described it in his

406  
00:23:35,400 --> 00:23:31,930  
publications and i've written that up

407  
00:23:37,860 --> 00:23:35,410  
and that's available for anyone who

408  
00:23:43,230 --> 00:23:37,870  
wants to get in touch with me i believe

409  
00:23:44,940 --> 00:23:43,240  
i published it in a few places there are

410  
00:23:47,880 --> 00:23:44,950  
many ways to build cloud busters I

411  
00:23:51,270 --> 00:23:47,890  
personally build dozens of them of all

412  
00:23:55,050 --> 00:23:51,280  
different sizes and I know people who

413  
00:23:58,320 --> 00:23:55,060

build rotary cloud busters it's a series

414

00:24:00,840 --> 00:23:58,330

of tubes that that are handheld and the

415

00:24:05,820 --> 00:24:00,850

whole thing rotates around you know a

416

00:24:08,460 --> 00:24:05,830

base electric motor-driven base and it

417

00:24:12,000 --> 00:24:08,470

worked of course I don't know how much

418

00:24:16,260 --> 00:24:12,010

was me and how much was the device but

419

00:24:20,490 --> 00:24:16,270

my assumption is that I cofunction with

420

00:24:24,150 --> 00:24:20,500

the device it's a resonance which is

421

00:24:27,540 --> 00:24:24,160

establish yes dick today we have an

422

00:24:31,620 --> 00:24:27,550

active global program of aerial dumping

423

00:24:36,330 --> 00:24:31,630

of chemicals aluminium strontium barium

424

00:24:38,649 --> 00:24:36,340

so called geoengineering to lessen

425

00:24:41,560 --> 00:24:38,659

global warming purportedly

426  
00:24:43,810 --> 00:24:41,570  
allegedly I'm curious to know what's

427  
00:24:46,119 --> 00:24:43,820  
your take on the effect on atmospheric

428  
00:24:49,690 --> 00:24:46,129  
orgone from these so-called chemtrails

429  
00:24:52,450 --> 00:24:49,700  
and is the cloud busting can they can it

430  
00:24:53,859 --> 00:24:52,460  
have any impact on dispelling this this

431  
00:24:56,560 --> 00:24:53,869  
terrible white haze

432  
00:24:58,869 --> 00:24:56,570  
I know don'ts yeah I've seen it there's

433  
00:25:00,999 --> 00:24:58,879  
no question about it in my mind I mean

434  
00:25:03,820 --> 00:25:01,009  
in terms of what does the cloud buster

435  
00:25:07,570 --> 00:25:03,830  
do to these chemtrails if anything well

436  
00:25:08,649 --> 00:25:07,580  
I've never I've never used it directly

437  
00:25:14,019 --> 00:25:08,659  
on chemtrails

438  
00:25:17,409 --> 00:25:14,029

but I've noticed that when my co

439

00:25:19,419 --> 00:25:17,419

operator works out of Mount Shasta on

440

00:25:22,839 --> 00:25:19,429

the drought that we've had here in

441

00:25:26,769 --> 00:25:22,849

California that the sky gets much

442

00:25:30,129 --> 00:25:26,779

clearer brighter and softer and the

443

00:25:31,930 --> 00:25:30,139

chemtrails listen and I there's no

444

00:25:34,269 --> 00:25:31,940

question in my mind that the chemtrails

445

00:25:38,200 --> 00:25:34,279

are polluting our atmosphere and no

446

00:26:02,210 --> 00:25:38,210

matter what the alleged intention there

447

00:26:09,440 --> 00:26:05,560

hi Richard I have some fairly pragmatic

448

00:26:11,360 --> 00:26:09,450

questions to ask your suggestions one of

449

00:26:14,020 --> 00:26:11,370

which is it seems to me that you're

450

00:26:17,360 --> 00:26:14,030

having a very tough time with the organ

451  
00:26:19,700 --> 00:26:17,370  
pollution or negative energy effects on

452  
00:26:21,620 --> 00:26:19,710  
yourself and I wonder if it had struck

453  
00:26:24,500 --> 00:26:21,630  
you that maybe recruiting some younger

454  
00:26:26,330 --> 00:26:24,510  
recruits and training them to do some of

455  
00:26:29,419 --> 00:26:26,340  
your functions might be very helpful

456  
00:26:31,730 --> 00:26:29,429  
that's thought number one wait I

457  
00:26:33,919 --> 00:26:31,740  
couldn't quite hear okay the last part

458  
00:26:36,080 --> 00:26:33,929  
of what you said I was suggesting that

459  
00:26:38,270 --> 00:26:36,090  
you recruit some young people to help

460  
00:26:40,640 --> 00:26:38,280  
you in your experiments because it seems

461  
00:26:43,159 --> 00:26:40,650  
that it's becoming rather energetically

462  
00:26:46,250 --> 00:26:43,169  
unviable for you to do this concentrated

463  
00:26:51,140 --> 00:26:46,260

work too much well I have a stable of

464

00:26:53,570 --> 00:26:51,150

them locked up at my place I'm very glad

465

00:26:57,169 --> 00:26:53,580

you confessed that today will note that

466

00:26:59,390 --> 00:26:57,179

but don't tell okay not a word the

467

00:27:02,409 --> 00:26:59,400

second question I have which is just

468

00:27:04,399 --> 00:27:02,419

curious idle curiosity which is this

469

00:27:07,460 --> 00:27:04,409

everybody who lives in the Bay Area

470

00:27:09,470 --> 00:27:07,470

knows that very frequently we get fog in

471

00:27:11,960 --> 00:27:09,480

the mornings that then evaporates and

472

00:27:14,000 --> 00:27:11,970

I'm wondering if this is maybe a fertile

473

00:27:15,860 --> 00:27:14,010

source of water that could be captured

474

00:27:18,110 --> 00:27:15,870

in the early mornings when it still

475

00:27:23,390 --> 00:27:18,120

exists before the sky goes blue and it

476

00:27:26,990 --> 00:27:23,400

evaporates I have worked on fogs

477

00:27:30,039 --> 00:27:27,000

and I must say that it's very difficult

478

00:27:34,700 --> 00:27:30,049

you will get an initial precipitation of

479

00:27:36,470 --> 00:27:34,710

the fog as the fog dissipates a far

480

00:27:40,029 --> 00:27:36,480

better way as to what they do in

481

00:27:43,100 --> 00:27:40,039

Inverness they actually collect fog drip

482

00:27:45,440 --> 00:27:43,110

from the trees and channel it into

483

00:27:47,360 --> 00:27:45,450

cisterns and they use that for drinking

484

00:27:49,760 --> 00:27:47,370

water yes I'm aware of that

485

00:27:52,430 --> 00:27:49,770

yeah and then the third question I have

486

00:27:54,710 --> 00:27:52,440

and you see with that system I wouldn't

487

00:27:57,380 --> 00:27:54,720

have to use my stable of young people

488

00:27:59,539 --> 00:27:57,390

that would avoid this stable problem yes

489

00:28:03,830 --> 00:27:59,549

that's true you would have a stable

490

00:28:06,500 --> 00:28:03,840

system and an unstable system my final

491

00:28:09,020 --> 00:28:06,510

question is usually when people run

492

00:28:11,899 --> 00:28:09,030

across these large scale events and want

493

00:28:14,749 --> 00:28:11,909

to research them they formed say they

494

00:28:16,459 --> 00:28:14,759

create some analog system to test them

495

00:28:18,439 --> 00:28:16,469

in the laboratory or at least on a much

496

00:28:20,419 --> 00:28:18,449

smaller scale than the natural scale

497

00:28:22,310 --> 00:28:20,429

would be and I'd wondered if you'd had

498

00:28:26,930 --> 00:28:22,320

any thoughts about that as a possible

499

00:28:29,689 --> 00:28:26,940

approach give me an example of what you

500

00:28:31,909 --> 00:28:29,699

mean by an analog scale what I mean is

501

00:28:35,539 --> 00:28:31,919

that you could you can create local

502

00:28:38,419 --> 00:28:35,549

weather systems in small areas inside

503

00:28:41,119 --> 00:28:38,429

some kind of building space or in a

504

00:28:44,539 --> 00:28:41,129

laboratory where you've got concentrated

505

00:28:46,459 --> 00:28:44,549

fog or you've got an analog or some copy

506

00:28:49,539 --> 00:28:46,469

of a rain cloud as far as that's

507

00:28:53,689 --> 00:28:49,549

possible to do or to look at just the

508

00:28:55,339 --> 00:28:53,699

condensation of water vapor given the

509

00:28:57,859 --> 00:28:55,349

different technologies that you would

510

00:29:01,219 --> 00:28:57,869

want to bring to bear on it you know one

511

00:29:03,559 --> 00:29:01,229

could do that not my bag but one could

512

00:29:05,569 --> 00:29:03,569

do that and but anybody wants to

513

00:29:07,789 --> 00:29:05,579

convince themselves of it whether or not

514

00:29:10,699 --> 00:29:07,799

this kind of thing works just go down to

515

00:29:13,639 --> 00:29:10,709

your local electrical supply house get

516

00:29:18,139 --> 00:29:13,649

three 10-foot long hollow metal tubes

517

00:29:20,359 --> 00:29:18,149

and some greenfield cable lash the tubes

518

00:29:22,969 --> 00:29:20,369

together hook the Greenfield cable on

519

00:29:27,169 --> 00:29:22,979

the end of them dump it into water and

520

00:29:31,339 --> 00:29:27,179

you know kill it you know or disable a

521

00:29:32,749 --> 00:29:31,349

cloud or two in the sky which has you

522

00:29:37,309 --> 00:29:32,759

know a number of them and you can

523

00:29:41,419 --> 00:29:37,319

convince yourself it's not difficult as

524

00:29:44,869 --> 00:29:41,429

for in so far as doing research and I'm

525

00:29:48,559 --> 00:29:44,879

gonna find our scale what you suggest

526

00:29:55,959 --> 00:29:48,569

you know has merit this is why we have

527

00:30:02,120 --> 00:29:58,320

thank you very much dick
