

Society for Scientific Exploration

1  
00:00:24,339 --> 00:00:16,080

[Music]

2  
00:00:25,659 --> 00:00:24,349

thank you it's it's great honor to be

3  
00:00:28,330 --> 00:00:25,669

here let me just give you a warning

4  
00:00:29,799 --> 00:00:28,340

right away that this presentation may

5  
00:00:31,600 --> 00:00:29,809

make you feel uncomfortable the science

6  
00:00:34,150 --> 00:00:31,610

won't but some of the other things about

7  
00:00:36,790 --> 00:00:34,160

the person may so with that being said

8  
00:00:39,460 --> 00:00:36,800

let me just try to tell you a little bit

9  
00:00:42,640 --> 00:00:39,470

about me for a second I've had a long

10  
00:00:45,910 --> 00:00:42,650

career at Intel and digital equipment

11  
00:00:47,760 --> 00:00:45,920

and Silicon Valley startups for some 35

12  
00:00:52,210 --> 00:00:47,770

years I'm basically a business

13  
00:00:55,720 --> 00:00:52,220

technology person and I got into this

14

00:00:59,470 --> 00:00:55,730

and I'll explain a little why just out

15

00:01:01,780 --> 00:00:59,480

of general curiosity my real company is

16

00:01:04,450 --> 00:01:01,790

is frontline aerospace and we do drones

17

00:01:06,850 --> 00:01:04,460

and quickly pivoted towards gas turbine

18

00:01:10,539 --> 00:01:06,860

efficiency where we talk about you know

19

00:01:11,980 --> 00:01:10,549

saving 10 to 40% in in fuel and gas

20

00:01:12,550 --> 00:01:11,990

turbines but that's really not why I'm

21

00:01:17,739 --> 00:01:12,560

here

22

00:01:20,739 --> 00:01:17,749

Papp and the mystery of the noble gas

23

00:01:21,910 --> 00:01:20,749

engine I had some synchronicities that

24

00:01:24,940 --> 00:01:21,920

occurred for those people that are

25

00:01:27,129 --> 00:01:24,950

familiar with with that back in November

26  
00:01:28,410 --> 00:01:27,139  
of 13 where I was talking to Tom Valon

27  
00:01:31,559 --> 00:01:28,420  
on the phone I said what's the latest

28  
00:01:33,940 --> 00:01:31,569  
interesting of overunity

29  
00:01:35,590 --> 00:01:33,950  
thought and he said well you got to look

30  
00:01:38,559 --> 00:01:35,600  
at the noble gas engine that's why then

31  
00:01:40,510 --> 00:01:38,569  
I I called my dad who's in the front row

32  
00:01:42,370 --> 00:01:40,520  
dr. Bob wood and said have you ever

33  
00:01:44,980 --> 00:01:42,380  
heard of the PAP engine and he said well

34  
00:01:48,099 --> 00:01:44,990  
you know I was just editing a book by

35  
00:01:51,039 --> 00:01:48,109  
Tompkins and he has a whole chapter

36  
00:01:52,480 --> 00:01:51,049  
about that and so I said wow that's

37  
00:01:55,089 --> 00:01:52,490  
interesting and then I looked up on the

38  
00:01:57,069 --> 00:01:55,099

web and so Wow I found a dis explosion

39

00:01:59,589 --> 00:01:57,079

article that Richard Fineman was at and

40

00:02:03,399 --> 00:01:59,599

then I found the the Cal Tech editor who

41

00:02:05,379 --> 00:02:03,409

was was there and he did a project for a

42

00:02:06,789 --> 00:02:05,389

senior project on sunspots and so did I

43

00:02:08,290 --> 00:02:06,799

so there's all these things that

44

00:02:11,230 --> 00:02:08,300

happened in like six hours is it okay

45

00:02:12,699 --> 00:02:11,240

that's it I'm gonna dig into this and so

46

00:02:15,069 --> 00:02:12,709

I started to dig into it you know so I

47

00:02:16,960 --> 00:02:15,079

did what I do and that sort of be an

48

00:02:18,610 --> 00:02:16,970

investigative journalist be a patent

49

00:02:19,350 --> 00:02:18,620

lawyer about this you know look at the

50

00:02:21,210 --> 00:02:19,360

technology

51  
00:02:23,940 --> 00:02:21,220  
much as I can that's why I sort of dug

52  
00:02:26,280 --> 00:02:23,950  
in and tried to and my conclusion is

53  
00:02:29,070 --> 00:02:26,290  
that this is a very solvable problem

54  
00:02:30,420 --> 00:02:29,080  
right now this is the quick agenda we'll

55  
00:02:32,340 --> 00:02:30,430  
talk about Joe Papp sort of this

56  
00:02:34,650 --> 00:02:32,350  
chronology some of the data sources that

57  
00:02:37,230 --> 00:02:34,660  
I use the technical how does it work and

58  
00:02:40,590 --> 00:02:37,240  
and what to do next the quick overview

59  
00:02:42,240 --> 00:02:40,600  
of the PAP engine is you you have when

60  
00:02:44,310 --> 00:02:42,250  
it's expanded this is just sort of an

61  
00:02:46,350 --> 00:02:44,320  
internal combustion engine diagram when

62  
00:02:50,670 --> 00:02:46,360  
it's expanded you have these noble gases

63  
00:02:55,260 --> 00:02:50,680

and chlorine in the in the bottom of and

64  
00:02:58,020 --> 00:02:55,270  
deoxygenated water gas at the bottom and

65  
00:03:02,370 --> 00:02:58,030  
and to electrolysis pieces let's see if

66  
00:03:04,080 --> 00:03:02,380  
I can get the laser pointer well it it

67  
00:03:06,690 --> 00:03:04,090  
goes on from two electrodes you're

68  
00:03:08,580 --> 00:03:06,700  
making a little hydrogen and then then

69  
00:03:10,290 --> 00:03:08,590  
when it compresses up there's an

70  
00:03:13,370 --> 00:03:10,300  
electric spark that goes across and it

71  
00:03:16,170 --> 00:03:13,380  
explodes the UV light triggers the

72  
00:03:18,510 --> 00:03:16,180  
chlorine and the hydrogen gas and it

73  
00:03:21,350 --> 00:03:18,520  
explodes very rapidly and back and forth

74  
00:03:23,880 --> 00:03:21,360  
and that's sort of how it how it works

75  
00:03:26,850 --> 00:03:23,890  
so that's the quick overview all

76

00:03:29,910 --> 00:03:26,860

Daleville more deeply into it as we go

77

00:03:33,030 --> 00:03:29,920

on but anyway a quick overview of pap he

78

00:03:37,050 --> 00:03:33,040

was born in 33 in Hungary he got a job

79

00:03:41,160 --> 00:03:37,060

at the Academy of Sciences in in Hungary

80

00:03:45,960 --> 00:03:41,170

he left Hungary at the revolution went

81

00:03:48,509 --> 00:03:45,970

to Canada and then went on to the US the

82

00:03:52,050 --> 00:03:48,519

first problem with pap is that he came

83

00:03:54,390 --> 00:03:52,060

over from Hungary and created this 300

84

00:03:57,180 --> 00:03:54,400

mile per hour submarine allegedly and

85

00:03:58,350 --> 00:03:57,190

this is a picture of his engine power

86

00:04:01,680 --> 00:03:58,360

plant on the right and you wrote a book

87

00:04:02,490 --> 00:04:01,690

about this and he went from Montreal to

88

00:04:05,039 --> 00:04:02,500

Brest

89

00:04:08,670 --> 00:04:05,049  
over in France and 300 miles per hour

90

00:04:10,920 --> 00:04:08,680  
and said he did that and he's a great

91

00:04:14,759 --> 00:04:10,930  
draftsman he had the skills and drew

92

00:04:16,469 --> 00:04:14,769  
these fancy pictures of his design and

93

00:04:19,280 --> 00:04:16,479  
build it and there's photographs of it

94

00:04:24,060 --> 00:04:19,290  
and so forth but at the same time he's

95

00:04:27,090 --> 00:04:24,070  
sort of bipolar wacko and he really went

96

00:04:28,830 --> 00:04:27,100  
across the Atlantic at an airplane and

97

00:04:31,620 --> 00:04:28,840  
hit himself in the head and was floating

98

00:04:32,519 --> 00:04:31,630  
off a naval base when they picked him up

99

00:04:34,469 --> 00:04:32,529  
and he was

100

00:04:38,969 --> 00:04:34,479  
tarah graded by the French guru Mir

101

00:04:42,389 --> 00:04:38,979

which is the FBI at the time and he

102

00:04:46,649 --> 00:04:42,399

admits to doing this but nevertheless he

103

00:04:49,769 --> 00:04:46,659

really had something and so he got a lot

104

00:04:53,579 --> 00:04:49,779

of baggage from that and and left Canada

105

00:04:56,039 --> 00:04:53,589

and went to Southern California and in

106

00:04:59,189 --> 00:04:56,049

October of 68 after he just finished

107

00:05:01,889 --> 00:04:59,199

filing all his patents he he convinced

108

00:05:07,139 --> 00:05:01,899

the naval undersea warfare Center in

109

00:05:09,719 --> 00:05:07,149

Pasadena at the time to take his sort of

110

00:05:11,849 --> 00:05:09,729

noble gas soup that he had created out

111

00:05:13,229 --> 00:05:11,859

to the desert and do an explosion and

112

00:05:15,059 --> 00:05:13,239

we'll talk about that and there was also

113

00:05:17,699 --> 00:05:15,069

an explosion at the environmental

114

00:05:21,329 --> 00:05:17,709

environmental ah which I'll talk about

115

00:05:23,489 --> 00:05:21,339

and then General Dynamics did one so

116

00:05:26,699 --> 00:05:23,499

this is the cannon explosion video which

117

00:05:28,739 --> 00:05:26,709

you can see on the web you know three

118

00:05:31,139 --> 00:05:28,749

inch stainless steel 3/8 inch diameter

119

00:05:33,979 --> 00:05:31,149

about a foot of concrete all around and

120

00:05:38,219 --> 00:05:33,989

they take it out to the desert and they

121

00:05:42,119 --> 00:05:38,229

videotape at all and he he injects about

122

00:05:45,619 --> 00:05:42,129

ten cc's of gas into each out of each

123

00:05:47,969 --> 00:05:45,629

one of these flasks into the breach and

124

00:05:49,409 --> 00:05:47,979

I've got witnesses that were there and

125

00:05:51,479 --> 00:05:49,419

saw him do him and every time he did it

126  
00:05:53,129 --> 00:05:51,489  
more his hands started shaking more and

127  
00:05:55,649 --> 00:05:53,139  
more and more this is according to Cecil

128  
00:05:57,959 --> 00:05:55,659  
Bumgardner which I'll talk about so this

129  
00:06:01,079 --> 00:05:57,969  
is a picture it's kind of hard to see

130  
00:06:04,409 --> 00:06:01,089  
but there's a little syringe like metal

131  
00:06:06,869 --> 00:06:04,419  
cylinder there in pictured so the UV

132  
00:06:09,539 --> 00:06:06,879  
light doesn't trigger the chlorine

133  
00:06:12,409 --> 00:06:09,549  
hydrogen gas that's in there and he

134  
00:06:14,879 --> 00:06:12,419  
plugs it all in and it goes kaboom and

135  
00:06:17,009 --> 00:06:14,889  
it blows everything to kingdom come

136  
00:06:18,929 --> 00:06:17,019  
and so I asked what our Navy SEAL

137  
00:06:21,419 --> 00:06:18,939  
commander friends you know how much c4

138  
00:06:23,249 --> 00:06:21,429

does that take to blow this up and he

139

00:06:25,529 --> 00:06:23,259

sort of said well it's really hard to

140

00:06:28,229 --> 00:06:25,539

estimate without you know details but

141

00:06:31,199 --> 00:06:28,239

nevertheless I think point force 0.7

142

00:06:33,839 --> 00:06:31,209

pounds of c-4 which is 1.4 mega joules

143

00:06:38,669 --> 00:06:33,849

for about 50 cc's of gas so it's clearly

144

00:06:40,739 --> 00:06:38,679

something not chemical my quick estimate

145

00:06:43,109 --> 00:06:40,749

was you know it's ten to the twelfth

146

00:06:46,380 --> 00:06:43,119

joules per kilogram oh that's just

147

00:06:48,840 --> 00:06:46,390

gigantic energy

148

00:06:51,540 --> 00:06:48,850

considering you know and then there's

149

00:06:53,270 --> 00:06:51,550

either an cluster impact fusion anybody

150

00:06:57,120 --> 00:06:53,280

ever heard of cluster impact fusion

151

00:06:59,730 --> 00:06:57,130

nobody SR I 1990 this I think it went

152

00:07:01,830 --> 00:06:59,740

classified but nevertheless let me talk

153

00:07:03,450 --> 00:07:01,840

to you about this other explosion was in

154

00:07:06,360 --> 00:07:03,460

the environment expiring lot this is LA

155

00:07:08,610 --> 00:07:06,370

Times article PAP had this demonstration

156

00:07:10,950 --> 00:07:08,620

with seventy people including dr.

157

00:07:14,910 --> 00:07:10,960

richard fineman of Caltech who was there

158

00:07:17,010 --> 00:07:14,920

and they set it all up and the engine

159

00:07:18,690 --> 00:07:17,020

was running and so forth and then fine

160

00:07:20,310 --> 00:07:18,700

man runs over and pulls the plug out and

161

00:07:21,660 --> 00:07:20,320

perhaps his well you really shouldn't do

162

00:07:24,720 --> 00:07:21,670

that the plug was for some

163

00:07:26,850 --> 00:07:24,730

instrumentation that was monitoring

164

00:07:28,920 --> 00:07:26,860

things and and then eventually PAP got

165

00:07:30,630 --> 00:07:28,930

more irritated and said well you really

166

00:07:32,160 --> 00:07:30,640

ought to plug that back in and so he

167

00:07:34,140 --> 00:07:32,170

plugged it back in and blows up kills

168

00:07:37,680 --> 00:07:34,150

Jack Edward Hartman who was a Mattel

169

00:07:39,540 --> 00:07:37,690

engineer who was also a friend of I had

170

00:07:40,920 --> 00:07:39,550

another friend who was a Mattel engineer

171

00:07:43,880 --> 00:07:40,930

a new jack Hartmann another

172

00:07:47,030 --> 00:07:43,890

synchronicity others range isn't injured

173

00:07:49,650 --> 00:07:47,040

and fine was guilty of involuntary

174

00:07:53,070 --> 00:07:49,660

manslaughter and settled settled out of

175

00:07:55,320 --> 00:07:53,080

court with Caltech Jack Edward Hartman

176

00:07:58,920 --> 00:07:55,330

is the interesting guy he was

177

00:08:02,610 --> 00:07:58,930

I've got his autopsy and they did a you

178

00:08:05,550 --> 00:08:02,620

know radiation scan for him two days

179

00:08:07,080 --> 00:08:05,560

after his autopsy very unusual to have

180

00:08:10,410 --> 00:08:07,090

that that was the actual device that

181

00:08:12,180 --> 00:08:10,420

they were using at the time so Fineman

182

00:08:15,660 --> 00:08:12,190

settles out of court and he writes this

183

00:08:19,530 --> 00:08:15,670

article skeptical in skeptical inquirer

184

00:08:21,300 --> 00:08:19,540

but in general its it's his beliefs pap

185

00:08:24,210 --> 00:08:21,310

was a fraud you know and it's just his

186

00:08:26,960 --> 00:08:24,220

hubris and lack of ability to just step

187

00:08:29,220 --> 00:08:26,970

back and and continue to investigate but

188

00:08:34,230 --> 00:08:29,230

nevertheless Fineman settles out of

189

00:08:36,900 --> 00:08:34,240

court and there's a lawsuit between pap

190

00:08:39,270 --> 00:08:36,910

and and and rahzar which is the

191

00:08:41,790 --> 00:08:39,280

environment expand in the legal

192

00:08:43,440 --> 00:08:41,800

documents there's a carve-out in the

193

00:08:46,560 --> 00:08:43,450

back saying between our agreement that

194

00:08:50,160 --> 00:08:46,570

this solid fuel that i invented for my

195

00:08:53,640 --> 00:08:50,170

submarine is not part of the agreement

196

00:08:54,810 --> 00:08:53,650

and so the question is how the heck you

197

00:08:57,000 --> 00:08:54,820

know we were talking about these noble

198

00:08:59,130 --> 00:08:57,010

gas soups that explode

199

00:09:00,540 --> 00:08:59,140

how does he doing with a solid fuel to

200

00:09:01,829 --> 00:09:00,550

so one

201  
00:09:05,930 --> 00:09:01,839  
thought is you know is this solid

202  
00:09:14,090 --> 00:09:10,110  
that's a possibility and then I got

203  
00:09:17,220 --> 00:09:14,100  
involved found the the court appointed

204  
00:09:19,139 --> 00:09:17,230  
John Phillips who was a lawyer at the

205  
00:09:21,449 --> 00:09:19,149  
time to arbitrate these two back and

206  
00:09:23,550 --> 00:09:21,459  
forth for a couple years and he tried

207  
00:09:25,290 --> 00:09:23,560  
really hard to get he thought there was

208  
00:09:28,110 --> 00:09:25,300  
something very serious and real and

209  
00:09:29,940 --> 00:09:28,120  
important in this engine demonstrations

210  
00:09:31,259 --> 00:09:29,950  
and so forth and he tried to get these

211  
00:09:33,990 --> 00:09:31,269  
people to work together for a couple of

212  
00:09:37,889 --> 00:09:34,000  
years and he's currently the ambassador

213  
00:09:40,170 --> 00:09:37,899

to Italy right now and he still believes

214

00:09:42,030 --> 00:09:40,180

to this day that there's something

215

00:09:44,430 --> 00:09:42,040

important here with this

216

00:09:47,400 --> 00:09:44,440

after spending a long time talking with

217

00:09:50,130 --> 00:09:47,410

all the parties involved and he

218

00:09:53,490 --> 00:09:50,140

confirmed many aspects of what I've read

219

00:09:57,810 --> 00:09:53,500

and researched all about the Joe Papp

220

00:09:59,730 --> 00:09:57,820

Engine III did an interview with David

221

00:10:03,990 --> 00:09:59,740

Ansley who was a San Jose Mercury News

222

00:10:06,210 --> 00:10:04,000

reporter down the road and he wrote a

223

00:10:09,620 --> 00:10:06,220

big article about the PAP engine right

224

00:10:12,030 --> 00:10:09,630

out the pons Fleischmann activity in 89

225

00:10:14,069 --> 00:10:12,040

and he interviewed four different

226

00:10:16,710 --> 00:10:14,079

sources and confirmed many aspects of

227

00:10:19,019 --> 00:10:16,720

this situation I interviewed Cecil

228

00:10:22,319 --> 00:10:19,029

Bumgardner who's alive today and he was

229

00:10:24,269 --> 00:10:22,329

a TRW employee he confirmed that the PAP

230

00:10:26,970 --> 00:10:24,279

engine was running in a conference room

231

00:10:29,760 --> 00:10:26,980

closed conference room for hours on end

232

00:10:31,410 --> 00:10:29,770

he was at the desert explosion we can

233

00:10:35,670 --> 00:10:31,420

there's a long interview article with

234

00:10:37,980 --> 00:10:35,680

him and infinite energy bill Tompkins

235

00:10:41,340 --> 00:10:37,990

was another interesting fellow he worked

236

00:10:45,180 --> 00:10:41,350

at TRW and managed the PAP project

237

00:10:47,189 --> 00:10:45,190

eventually PAP had this explosion and

238

00:10:49,199 --> 00:10:47,199

then disappeared and went to TRW and

239

00:10:51,870 --> 00:10:49,209

they set him up with a classified

240

00:10:54,000 --> 00:10:51,880

program and he quickly Tompkins broke

241

00:10:59,550 --> 00:10:54,010

the project into two projects one a bomb

242

00:11:02,850 --> 00:10:59,560

project and one a engine project and so

243

00:11:06,360 --> 00:11:02,860

they they married kept working along the

244

00:11:09,569 --> 00:11:06,370

way Tompkins confirmed the chlorine gas

245

00:11:11,610 --> 00:11:09,579

and this noble gas soup were key

246

00:11:13,199 --> 00:11:11,620

elements of what's going on and then one

247

00:11:13,670 --> 00:11:13,209

day he came to work and everything was

248

00:11:16,010 --> 00:11:13,680

zeroed

249

00:11:19,820 --> 00:11:16,020

of his his green sheets in his budget

250

00:11:22,100 --> 00:11:19,830

and so he was really pissed about this

251  
00:11:27,350 --> 00:11:22,110  
and his boss said go talk to sy Ramos

252  
00:11:29,600 --> 00:11:27,360  
the R and TR W and Remo said you know

253  
00:11:32,150 --> 00:11:29,610  
hey I had to cancel it I was asked to

254  
00:11:33,500 --> 00:11:32,160  
I'm pissed about this too I don't think

255  
00:11:35,870 --> 00:11:33,510  
they've canceled the bomb project

256  
00:11:40,490 --> 00:11:35,880  
element of it all I have a good friend

257  
00:11:42,889 --> 00:11:40,500  
who spent his life in the Air Force in

258  
00:11:44,420 --> 00:11:42,899  
nuclear surety and then in private

259  
00:11:46,760 --> 00:11:44,430  
industry worried about nuclear surety

260  
00:11:49,790 --> 00:11:46,770  
and I and I said Ron is there anything

261  
00:11:55,210 --> 00:11:49,800  
different or anything between a chemical

262  
00:11:58,280 --> 00:11:55,220  
bomb and a nuke and he stared at me and

263  
00:12:00,290 --> 00:11:58,290

just nodded his head he didn't answer

264

00:12:02,630 --> 00:12:00,300

the question but that's what he did and

265

00:12:04,850 --> 00:12:02,640

so this is an example of something that

266

00:12:07,130 --> 00:12:04,860

might be in between the two Hines

267

00:12:08,990 --> 00:12:07,140

klostermann who's down in Mountain View

268

00:12:13,250 --> 00:12:09,000

raised some money did some work about

269

00:12:15,440 --> 00:12:13,260

this and rauner and their rwg and

270

00:12:17,329 --> 00:12:15,450

there's many other people that have done

271

00:12:20,420 --> 00:12:17,339

experiments and worked and raised money

272

00:12:22,550 --> 00:12:20,430

to try to figure out how this works but

273

00:12:24,440 --> 00:12:22,560

they all fail to get a true power

274

00:12:27,110 --> 00:12:24,450

input-output test which is the holy

275

00:12:29,870 --> 00:12:27,120

grail of everything and until you've got

276

00:12:31,519 --> 00:12:29,880

that you don't have anything so that's

277

00:12:33,440 --> 00:12:31,529

been the challenge I've looked at all

278

00:12:35,510 --> 00:12:33,450

sorts of other data sources and I keep

279

00:12:38,240 --> 00:12:35,520

gathering more and more intelligence

280

00:12:40,640 --> 00:12:38,250

about what this is going on and I've got

281

00:12:42,650 --> 00:12:40,650

more I just learned you today that my

282

00:12:43,760 --> 00:12:42,660

appeal to the FBI came back and said

283

00:12:47,660 --> 00:12:43,770

well yeah we found some more information

284

00:12:50,420 --> 00:12:47,670

about Joseph Papp and will respond to

285

00:12:51,949 --> 00:12:50,430

you in our appeal so all we'd probably

286

00:12:56,199 --> 00:12:51,959

know the six months before I get back a

287

00:12:58,790 --> 00:12:56,209

big stack if fineman's FBI file stops in

288

00:13:01,069 --> 00:12:58,800

1960 and there's a whole bunch of stuff

289

00:13:02,750 --> 00:13:01,079

that's past 1960 what you can't have

290

00:13:05,000 --> 00:13:02,760

access to yet and if I've appealed

291

00:13:06,319 --> 00:13:05,010

fineman's FBI file as well but anyway

292

00:13:08,960 --> 00:13:06,329

PAP is a whack job

293

00:13:14,569 --> 00:13:08,970

you know he's paranoid he's a conniver

294

00:13:18,260 --> 00:13:14,579

he he's genius he's a workaholic

295

00:13:20,300 --> 00:13:18,270

he's he's basically bipolar with

296

00:13:22,519 --> 00:13:20,310

munchausen syndrome he shot himself in

297

00:13:24,530 --> 00:13:22,529

the shoulder one time he doesn't believe

298

00:13:26,990 --> 00:13:24,540

anybody he's secretive in many different

299

00:13:29,480 --> 00:13:27,000

ways and he was so secretive and weird

300

00:13:32,240 --> 00:13:29,490

but he drove his wife over the edge and

301

00:13:33,920 --> 00:13:32,250

his wife freaked out and basically slit

302

00:13:37,310 --> 00:13:33,930

his daughter's wrists and tried to

303

00:13:41,060 --> 00:13:37,320

commit suicide to herself and you know I

304

00:13:44,120 --> 00:13:41,070

interviewed Gary Szabo who was was there

305

00:13:47,390 --> 00:13:44,130

at the time basically lived that and he

306

00:13:49,430 --> 00:13:47,400

PAP died in 89 left a huge probate

307

00:13:53,560 --> 00:13:49,440

issues five million dollars in IRS back

308

00:13:56,660 --> 00:13:53,570

taxes deceived a bunch of people and

309

00:13:59,170 --> 00:13:56,670

left his family penniless so that's the

310

00:14:02,180 --> 00:13:59,180

part that was probably disturbing there

311

00:14:05,480 --> 00:14:02,190

but nevertheless I think he really had

312

00:14:07,520 --> 00:14:05,490

something so the question is how does

313

00:14:09,140 --> 00:14:07,530

this work so I looked at these various

314

00:14:11,030 --> 00:14:09,150

data sources the patents the interviews

315

00:14:13,490 --> 00:14:11,040

all everything I could find and so what

316

00:14:16,160 --> 00:14:13,500

I think is this ionized noble gas soup

317

00:14:18,320 --> 00:14:16,170

seems to be a key component this 27

318

00:14:22,630 --> 00:14:18,330

point 1 megahertz RF frequency which

319

00:14:24,370 --> 00:14:22,640

does enhancement of the ionization

320

00:14:27,560 --> 00:14:24,380

reversible chlorine and hydrogen

321

00:14:30,430 --> 00:14:27,570

reaction which is documented in gaseous

322

00:14:33,740 --> 00:14:30,440

photo chlorination books and other

323

00:14:35,810 --> 00:14:33,750

science Sparks and magnetic fields

324

00:14:38,570 --> 00:14:35,820

sparks we'll talk about that a little

325

00:14:41,810 --> 00:14:38,580

bit electrolysis maybe that's a little

326

00:14:44,510 --> 00:14:41,820

HHO involvement radiation alpha beta

327

00:14:47,210 --> 00:14:44,520

gamma and then deoxygenated water which

328

00:14:52,240 --> 00:14:47,220

he uses and mentions in the patents so

329

00:14:55,010 --> 00:14:52,250

there's there's some interesting soup of

330

00:14:58,850 --> 00:14:55,020

ideas here that could be figured out

331

00:15:02,240 --> 00:14:58,860

hopefully but anyway in essence this is

332

00:15:05,690 --> 00:15:02,250

oscillating pressure of you compress it

333

00:15:08,870 --> 00:15:05,700

all and the hydrogen and the chlorine

334

00:15:10,730 --> 00:15:08,880

gas become very explosive when you hit

335

00:15:12,350 --> 00:15:10,740

them with UV light and they come down

336

00:15:15,140 --> 00:15:12,360

and then they they have a very slow

337

00:15:17,840 --> 00:15:15,150

reaction and they come back and so

338

00:15:20,810 --> 00:15:17,850

that's very well understood and written

339

00:15:26,240 --> 00:15:20,820

up there's also the dynamometer test the

340

00:15:28,610 --> 00:15:26,250

only real sort of proof that PAP did

341

00:15:32,180 --> 00:15:28,620

anything real you know they they had

342

00:15:33,350 --> 00:15:32,190

this test 776 foot-pounds of torque one

343

00:15:35,960 --> 00:15:33,360

hundred and seven horsepower very

344

00:15:38,000 --> 00:15:35,970

torque engine normally you know engines

345

00:15:39,590 --> 00:15:38,010

are like one to one horsepower to torque

346

00:15:43,960 --> 00:15:39,600

but this is seven to one

347

00:15:46,550 --> 00:15:43,970

is this faked maybe I don't think so

348

00:15:48,710 --> 00:15:46,560

but anyway this there's some of the

349

00:15:51,860 --> 00:15:48,720

mixtures of the chlorine gas and the

350

00:15:53,509 --> 00:15:51,870

mixtures change with time depending upon

351

00:15:55,790 --> 00:15:53,519

which patent there's three patents

352

00:15:58,189 --> 00:15:55,800

related to this chlorine gas and UV

353

00:16:00,769 --> 00:15:58,199

light explode not just like normal

354

00:16:02,840 --> 00:16:00,779

combustion where things explode sort of

355

00:16:05,389 --> 00:16:02,850

serially it's the speed of light it goes

356

00:16:07,579 --> 00:16:05,399

across all of the atoms and kaboom the

357

00:16:11,120 --> 00:16:07,589

whole thing explodes in a very vicious

358

00:16:15,009 --> 00:16:11,130

and manner gaseous flow to chlorination

359

00:16:18,170 --> 00:16:15,019

is a great book as a chapter all about

360

00:16:22,850 --> 00:16:18,180

shows propagation of hydrogen atoms can

361

00:16:25,189 --> 00:16:22,860

track you go back and forth so with

362

00:16:27,350 --> 00:16:25,199

sharply-defined explosion limits which I

363

00:16:30,139 --> 00:16:27,360

mentioned and there's other articles on

364

00:16:31,160 --> 00:16:30,149

an explosion of hydrogen and oxygen and

365

00:16:32,809 --> 00:16:31,170

chlorine because you have these two

366

00:16:34,850 --> 00:16:32,819

electrodes creating some hydrogen and

367

00:16:35,569 --> 00:16:34,860

oxygen and the chlorine gas and then

368

00:16:37,519 --> 00:16:35,579

explode

369

00:16:41,420 --> 00:16:37,529

there's Russians did an interesting

370

00:16:43,689 --> 00:16:41,430

article in 1956 on the thermal reaction

371

00:16:46,939 --> 00:16:43,699

of fluorine and hydrogen which is a

372

00:16:48,590 --> 00:16:46,949

translation that there seems to be a lot

373

00:16:51,319 --> 00:16:48,600

of science around this time that pap

374

00:16:54,410 --> 00:16:51,329

would have been absorbed into and and

375

00:16:56,179 --> 00:16:54,420

sucked into there's a here's a word

376

00:16:58,040 --> 00:16:56,189

cloud which I can email to somebody

377

00:16:59,509 --> 00:16:58,050

about you take the patent and run it

378

00:17:02,300 --> 00:16:59,519

through a word cloud and see all the

379

00:17:04,819 --> 00:17:02,310

various ideas that come up and eight

380

00:17:08,059 --> 00:17:04,829

talks specifically about various gases

381

00:17:10,490 --> 00:17:08,069

and chlorine States and so forth this is

382

00:17:13,340 --> 00:17:10,500

a south african patent in 1981 which

383

00:17:15,949 --> 00:17:13,350

changes the noble gas mixed a little bit

384

00:17:18,319 --> 00:17:15,959

and each gas is ionized separately and

385

00:17:20,390 --> 00:17:18,329

these added coils and magnetic fields to

386

00:17:23,899 --> 00:17:20,400

this there's a lot of different elements

387

00:17:26,059 --> 00:17:23,909

that need to be studied could this be

388

00:17:26,929 --> 00:17:26,069

you know Ken shoulders work where you

389

00:17:29,779 --> 00:17:26,939

know you have this high-performance

390

00:17:32,899 --> 00:17:29,789

spark going across at the top of when

391

00:17:36,380 --> 00:17:32,909

everything is compressed could that be

392

00:17:39,919 --> 00:17:36,390

an explanation as to how he's getting

393

00:17:41,870 --> 00:17:39,929

excess energy out of this I also did a

394

00:17:43,039 --> 00:17:41,880

remote viewing with Joe mcmoneagle how

395

00:17:45,230 --> 00:17:43,049

many people have heard of Joe mcmoneagle

396

00:17:48,440 --> 00:17:45,240

before okay many people so I sent him

397

00:17:50,299 --> 00:17:48,450

this are this envelope of JP 2083 which

398

00:17:52,220 --> 00:17:50,309

happens to be Joe Papp 2083 it's his

399

00:17:54,289 --> 00:17:52,230

social security number and I said

400

00:17:56,630 --> 00:17:54,299

when's the first discovery of this what

401

00:17:58,490 --> 00:17:56,640

is this secret to making the fuel is it

402

00:18:02,120 --> 00:17:58,500

in the classified world what's the best

403

00:18:05,690 --> 00:18:02,130

fuel today you know does it tap the CPE

404

00:18:06,980 --> 00:18:05,700

how does this work and and he's still

405

00:18:09,980 --> 00:18:06,990

working on this but some of the

406

00:18:12,669 --> 00:18:09,990

preliminary responses came back like

407

00:18:14,720 --> 00:18:12,679

this he said it's a chemical concoction

408

00:18:18,590 --> 00:18:14,730

hydrogenation of different molecular

409

00:18:20,630 --> 00:18:18,600

components in this torus coplanar you

410

00:18:24,350 --> 00:18:20,640

can serve read the rest of it and he

411

00:18:27,590 --> 00:18:24,360

drew an embodiment of a gas turbine

412

00:18:30,350 --> 00:18:27,600

ramjet it's just normal air breathing

413

00:18:33,110 --> 00:18:30,360

but at the end you inject a special

414

00:18:35,510 --> 00:18:33,120

additive fuel to make it go better we're

415

00:18:38,210 --> 00:18:35,520

still getting more data about what's

416

00:18:41,320 --> 00:18:38,220

this you know how does it really work

417

00:18:44,180 --> 00:18:41,330

and from from a intuitive point of view

418

00:18:46,400 --> 00:18:44,190

so what's next really is we're looking

419

00:18:50,210 --> 00:18:46,410

at more investigations I keep digging in

420

00:18:52,340 --> 00:18:50,220

with the various science elements of

421

00:18:53,960 --> 00:18:52,350

what I can discover and the witnesses

422

00:18:56,750 --> 00:18:53,970

and people that were around and saw this

423

00:18:59,090 --> 00:18:56,760

and so if I was to say well what should

424

00:19:01,490 --> 00:18:59,100

you really do next and this is what I

425

00:19:03,320 --> 00:19:01,500

would do is I go spend 750 K to go

426

00:19:06,320 --> 00:19:03,330

continue doing more research and

427

00:19:09,830 --> 00:19:06,330

experiment design and get the people

428

00:19:13,730 --> 00:19:09,840

together so would my estimate a year 750

429

00:19:16,490 --> 00:19:13,740

K so the reasons that you would go on

430

00:19:18,500 --> 00:19:16,500

and go do this is that there's something

431

00:19:19,159 --> 00:19:18,510

real here the explosions I don't think

432

00:19:21,860 --> 00:19:19,169

can be faked

433

00:19:24,350 --> 00:19:21,870

there really is anomalous big energy

434

00:19:27,730 --> 00:19:24,360

repeated several times there seems to be

435

00:19:32,840 --> 00:19:27,740

a reduction to practice with a proven

436

00:19:35,750 --> 00:19:32,850

dynamometer test the proof is doable you

437

00:19:39,350 --> 00:19:35,760

can recreate this or make smaller scale

438

00:19:41,450 --> 00:19:39,360

and try to work through it all I think

439

00:19:44,030 --> 00:19:41,460

the risk of a null result is very low

440

00:19:47,299 --> 00:19:44,040

because you've already seen that this

441

00:19:48,950 --> 00:19:47,309

can work and then it's got the course

442

00:19:51,860 --> 00:19:48,960

civilization changing potential which is

443

00:19:53,630 --> 00:19:51,870

why we're all here and then low capital

444

00:19:57,020 --> 00:19:53,640

outlay and then the return on investment

445

00:20:00,649 --> 00:19:57,030

is is astronomical so those are the sort

446

00:20:03,120 --> 00:20:00,659

of concluding marks and and pitch really

447

00:20:05,370 --> 00:20:03,130

for why you might want to

448

00:20:07,940 --> 00:20:05,380

push it this and now if anybody's got a

449

00:20:11,070 --> 00:20:07,950

seven or \$50,000 check I'm sure you can

450

00:20:13,680 --> 00:20:11,080

focus on many different choices at this

451  
00:20:17,580 --> 00:20:13,690  
conference today to where you would put

452  
00:20:20,220 --> 00:20:17,590  
your money so with that comment let me

453  
00:20:36,240 --> 00:20:20,230  
just go right to questions did I make it

454  
00:20:41,340 --> 00:20:36,250  
in 20 minutes yeah yeah yes

455  
00:20:43,320 --> 00:20:41,350  
fascinating 750 K sounds like a lot but

456  
00:20:44,670 --> 00:20:43,330  
it's actually a very small fraction of

457  
00:20:52,590 --> 00:20:44,680  
the amount of money that's been spent

458  
00:20:53,850 --> 00:20:52,600  
both given to Jo right I think lotion

459  
00:20:58,230 --> 00:20:53,860  
thirty million dollars is what I've

460  
00:20:59,360 --> 00:20:58,240  
heard you hold down this whole you have

461  
00:21:03,510 --> 00:20:59,370  
a special insider

462  
00:21:06,900 --> 00:21:03,520  
well this special insight is nope

463  
00:21:11,550 --> 00:21:06,910

everybody has failed to do the science

464

00:21:12,960 --> 00:21:11,560

that this room would love to see is what

465

00:21:14,850 --> 00:21:12,970

we've had is experimenters and

466

00:21:17,190 --> 00:21:14,860

entrepreneurs and no classically trained

467

00:21:21,660 --> 00:21:17,200

scientists that would go plug at this

468

00:21:23,130 --> 00:21:21,670

and work at it in an honest way so that

469

00:21:26,460 --> 00:21:23,140

I guess that's the answer to my question

470

00:21:48,320 --> 00:21:26,470

or your question did that do it for you

471

00:21:53,060 --> 00:21:51,049

thank you fascinating historical

472

00:21:55,700 --> 00:21:53,070

development but I'm totally confused

473

00:21:58,130 --> 00:21:55,710

that is it an engine and if it's an

474

00:22:01,399 --> 00:21:58,140

engine what does it do does it does it

475

00:22:03,980 --> 00:22:01,409

produce more more energy than it you put

476

00:22:06,289 --> 00:22:03,990

into it yes yes it's it's an engine a

477

00:22:08,750 --> 00:22:06,299

feuleless engine you feed it no fuel you

478

00:22:11,840 --> 00:22:08,760

and you gasses in it it runs perpetually

479

00:22:13,250 --> 00:22:11,850

and generates work okay that's what I

480

00:22:22,669 --> 00:22:13,260

thought you were gonna say yeah thank

481

00:22:24,710 --> 00:22:22,679

you yeah I'm not clear about the role of

482

00:22:28,029 --> 00:22:24,720

the noble gases in it can you say

483

00:22:30,590 --> 00:22:28,039

something about what they do

484

00:22:34,820 --> 00:22:30,600

that's a great question I'm not sure of

485

00:22:38,840 --> 00:22:34,830

the role either other than maybe their

486

00:22:41,419 --> 00:22:38,850

their ionized to different levels

487

00:22:44,629 --> 00:22:41,429

maybe they I'm just speculating I don't

488

00:22:46,340 --> 00:22:44,639

have an answer there but that's what's

489

00:22:49,870 --> 00:22:46,350

written up in the patent and seems to be

490

00:22:55,310 --> 00:22:49,880

the other replicators have ignored the

491

00:22:57,139 --> 00:22:55,320

the thorium 2% electrodes and just and

492

00:23:00,759 --> 00:22:57,149

the chlorine gas and have just focused

493

00:23:03,980 --> 00:23:00,769

on this noble gas soup with sparks and

494

00:23:06,440 --> 00:23:03,990

that's sort of how the third parties

495

00:23:13,039 --> 00:23:06,450

have taken this rather than what Papp

496

00:23:15,070 --> 00:23:13,049

originally described in his patents have

497

00:23:18,169 --> 00:23:15,080

you considered the possibility given

498

00:23:21,289 --> 00:23:18,179

that Papp was so paranoid and secretive

499

00:23:24,379 --> 00:23:21,299

that one of the reasons efforts hitherto

500

00:23:26,539 --> 00:23:24,389

to replicate has failed is that he

501  
00:23:30,950 --> 00:23:26,549  
didn't include all of the actual

502  
00:23:33,529 --> 00:23:30,960  
information in his patents yes I think

503  
00:23:37,070 --> 00:23:33,539  
that's that's accurate but I think the

504  
00:23:41,720 --> 00:23:37,080  
first patent is the most interesting and

505  
00:23:43,310 --> 00:23:41,730  
honest and I I filed for the original

506  
00:23:46,250 --> 00:23:43,320  
patent application and there's some

507  
00:23:52,070 --> 00:23:46,260  
interesting changes in that versus what

508  
00:23:55,759 --> 00:23:52,080  
was actually published so divining the

509  
00:23:58,610 --> 00:23:55,769  
truth out of those patents is I guess

510  
00:24:00,950 --> 00:23:58,620  
the challenge and don't have a clean

511  
00:24:03,660 --> 00:24:00,960  
answer for you

512  
00:24:04,350 --> 00:24:03,670  
but he wanted to protect what he had I

513  
00:24:06,600 --> 00:24:04,360

think so

514

00:24:08,880 --> 00:24:06,610

it's honest that he would say these are

515

00:24:10,560 --> 00:24:08,890

the ranges and gases that he I want to

516

00:24:13,650 --> 00:24:10,570

use I want to try to protect some of

517

00:24:16,950 --> 00:24:13,660

this hey he seemed to be much more free

518

00:24:22,890 --> 00:24:16,960

with the mechanics of the engine rather

519

00:24:28,140 --> 00:24:22,900

than the secret sauce of the fuel behind

520

00:24:32,580 --> 00:24:28,150

you is there any is there any sense that

521

00:24:35,310 --> 00:24:32,590

any of this is in use with the US

522

00:24:40,170 --> 00:24:35,320

military as a secret technology or some

523

00:24:42,870 --> 00:24:40,180

other group the the only testimony that

524

00:24:45,300 --> 00:24:42,880

I have for that is my friend Ron who

525

00:24:48,240 --> 00:24:45,310

said there's something in between

526

00:24:51,540 --> 00:24:48,250

chemical and nuclear and that's not

527

00:24:53,280 --> 00:24:51,550

really demonstrative but the answer

528

00:24:57,690 --> 00:24:53,290

should come back and we'll keep

529

00:25:02,220 --> 00:24:57,700

exploring that potential I my gut says

530

00:25:04,680 --> 00:25:02,230

yes Ryan um you said that PAP night in

531

00:25:06,540 --> 00:25:04,690

1989 I believe it was yes and I'm

532

00:25:08,220 --> 00:25:06,550

wondering if in your research and

533

00:25:12,030 --> 00:25:08,230

digging into so many things which I

534

00:25:14,490 --> 00:25:12,040

highly come in did you check into the to

535

00:25:17,360 --> 00:25:14,500

see after he died what became of his

536

00:25:19,410 --> 00:25:17,370

papers because if he had some secretive

537

00:25:23,250 --> 00:25:19,420

information that he may have kept out of

538

00:25:25,350 --> 00:25:23,260

the pen as Yorke suggested which he may

539

00:25:27,420 --> 00:25:25,360

very well have he might have had it in

540

00:25:29,610 --> 00:25:27,430

his papers that which may have been able

541

00:25:32,100 --> 00:25:29,620

to be retrieved after he died yeah

542

00:25:34,890 --> 00:25:32,110

that's a great story over lunch yeah his

543

00:25:36,870 --> 00:25:34,900

his the IRS came in and bonded

544

00:25:40,410 --> 00:25:36,880

everything in his garage or wherever he

545

00:25:43,350 --> 00:25:40,420

had it and then the the area was broken

546

00:25:45,720 --> 00:25:43,360

into later on and there was a police

547

00:25:47,850 --> 00:25:45,730

reports filed for this and many people

548

00:25:51,810 --> 00:25:47,860

have been after that exact thing

549

00:25:55,410 --> 00:25:51,820

there are many caches of original papers

550

00:25:58,530 --> 00:25:55,420

and documents spread around Szabo jr.

551

00:26:01,500 --> 00:25:58,540

has some Klosterman has some Rohnert has

552

00:26:04,740 --> 00:26:01,510

some it's scattered to the wind I think

553

00:26:09,799 --> 00:26:04,750

the answer is it's not there it's in his

554

00:26:14,460 --> 00:26:13,500

can we use up to five minutes okay thank

555

00:26:18,120 --> 00:26:14,470

you thank you

556

00:26:24,409 --> 00:26:18,130

[Applause]
