

1  
00:00:00,600 --> 00:00:09,780

[Music]

2  
00:00:18,319 --> 00:00:13,799

in 1952 Wilhelm Reich the physician and

3  
00:00:24,929 --> 00:00:18,329

scientists first published his report on

4  
00:00:30,269 --> 00:00:24,939

ways of modifying the weather using long

5  
00:00:34,410 --> 00:00:30,279

metal tubes grounded through flexible

6  
00:00:38,910 --> 00:00:34,420

metal cable into water and the effect of

7  
00:00:41,729 --> 00:00:38,920

doing this is to break up clouds among

8  
00:00:44,009 --> 00:00:41,739

other things and Reich initially noted

9  
00:00:48,689 --> 00:00:44,019

that and he called his device the cloud

10  
00:00:50,669 --> 00:00:48,699

buster I immediately ran out garnered a

11  
00:00:56,689 --> 00:00:50,679

friend who lived in Lakewood New Jersey

12  
00:00:59,880 --> 00:00:56,699

and we built one of these and began to

13  
00:01:02,459 --> 00:00:59,890

show that indeed this thing actually

14

00:01:05,130 --> 00:01:02,469

works when you take these 10 foot long

15

00:01:06,660 --> 00:01:05,140

metal pipes ground them into water and

16

00:01:09,510 --> 00:01:06,670

point them at a cloud the cloud will

17

00:01:12,450 --> 00:01:09,520

dissipate within a few minutes compared

18

00:01:15,960 --> 00:01:12,460

to other clouds of a similar size which

19

00:01:18,060 --> 00:01:15,970

will remain intact over the next twenty

20

00:01:20,700 --> 00:01:18,070

to thirty years I experimented a great

21

00:01:25,470 --> 00:01:20,710

deal with this device in many different

22

00:01:28,410 --> 00:01:25,480

kinds of weather and found that using

23

00:01:30,750 --> 00:01:28,420

controlled situations that there was no

24

00:01:34,500 --> 00:01:30,760

question that the device could do as

25

00:01:37,590 --> 00:01:34,510

advertised furthermore if one understood

26

00:01:40,980 --> 00:01:37,600

the dynamics of energy as Reika

27

00:01:44,310 --> 00:01:40,990

understood it in the atmosphere and you

28

00:01:47,130 --> 00:01:44,320

understood normal or mainstream weather

29

00:01:54,390 --> 00:01:47,140

conditions it was possible to create

30

00:02:02,350 --> 00:01:59,520

this is a photograph of Reich with his

31

00:02:06,880 --> 00:02:02,360

one of his original cloud busters that's

32

00:02:10,270 --> 00:02:06,890

him in the center this device consists

33

00:02:12,640 --> 00:02:10,280

of about the tubes are about one and a

34

00:02:16,240 --> 00:02:12,650

half inches in diameter and they extend

35

00:02:19,480 --> 00:02:16,250

from about 10 to 18 feet and you can't

36

00:02:28,530 --> 00:02:19,490

see the the grounding cables but they're

37

00:02:35,470 --> 00:02:31,960

this is a graphic of how Reich

38

00:02:37,960 --> 00:02:35,480

understood that this worked when you

39

00:02:40,480 --> 00:02:37,970

apparent orgone energy which he had

40

00:02:43,090 --> 00:02:40,490

discovered years before and had provided

41

00:02:47,290 --> 00:02:43,100

a lot of interesting biophysical

42

00:02:52,150 --> 00:02:47,300

confirmation of seems to have an effect

43

00:02:53,650 --> 00:02:52,160

of concentrating and holding moisture so

44

00:02:56,280 --> 00:02:53,660

that if you point and it's also

45

00:03:00,100 --> 00:02:56,290

attracted to metal as Wright discovered

46

00:03:02,350 --> 00:03:00,110

using other apparatus so if you point

47

00:03:05,170 --> 00:03:02,360

such an apparatus like a cloud Buster at

48

00:03:08,229 --> 00:03:05,180

a cloud the center of a cloud the cloud

49

00:03:10,509 --> 00:03:08,239

will dissipate because as reich

50

00:03:13,420 --> 00:03:10,519

understood it the energy moves to the

51  
00:03:18,880 --> 00:03:13,430  
pipes and without the energy the

52  
00:03:23,310 --> 00:03:18,890  
moisture will simply drop now this is a

53  
00:03:27,759 --> 00:03:23,320  
way of decreasing of destroying clouds

54  
00:03:29,770 --> 00:03:27,769  
you can create clouds by pointing I met

55  
00:03:33,039 --> 00:03:29,780  
or making them grow by simply pointing

56  
00:03:35,770 --> 00:03:33,049  
the cloud buster away from them and this

57  
00:03:38,949 --> 00:03:35,780  
but will relatively increase the

58  
00:03:41,740 --> 00:03:38,959  
potential of organ energy at a place

59  
00:03:44,050 --> 00:03:41,750  
away from the point place where you're

60  
00:03:45,970 --> 00:03:44,060  
pointing and moisture will be attracted

61  
00:03:49,690 --> 00:03:45,980  
to these concentrations of energy and

62  
00:03:52,090 --> 00:03:49,700  
the cloud will grow in the northern

63  
00:03:56,710 --> 00:03:52,100

hemisphere the movement of weather is

64

00:04:00,160 --> 00:03:56,720

from west to east so that if you point

65

00:04:02,020 --> 00:04:00,170

the cloud Buster to the east what you'll

66

00:04:04,330 --> 00:04:02,030

be doing is setting up a stream of

67

00:04:06,890 --> 00:04:04,340

energy movement to your West

68

00:04:09,800 --> 00:04:06,900

clouds will form in the West

69

00:04:12,229 --> 00:04:09,810

in due time they will pass overhead of

70

00:04:14,270 --> 00:04:12,239

the operator and the moisture will drop

71

00:04:16,069 --> 00:04:14,280

his reign and Reich was able to

72

00:04:18,949 --> 00:04:16,079

demonstrate this many times as a matter

73

00:04:21,710 --> 00:04:18,959

of fact became a bit famous when he

74

00:04:23,870 --> 00:04:21,720

saved the blueberry crop in Maine and I

75

00:04:25,700 --> 00:04:23,880

were and other people who are interested

76

00:04:30,050 --> 00:04:25,710

in Reich's work were able to confirm

77

00:04:32,800 --> 00:04:30,060

this many many many times so when we

78

00:04:37,370 --> 00:04:32,810

came to about 1983

79

00:04:39,920 --> 00:04:37,380

or 1982 I received a message from an old

80

00:04:43,850 --> 00:04:39,930

friend indeed a counselor of mine at

81

00:04:45,170 --> 00:04:43,860

camp who had maintained some contact

82

00:04:48,140 --> 00:04:45,180

with me through his kids who were

83

00:04:50,060 --> 00:04:48,150

interested in my work and this was dick

84

00:04:52,850 --> 00:04:50,070

Fox it was a wealthy philadelphia

85

00:04:55,810 --> 00:04:52,860

businessman and dick had made serious

86

00:04:58,159 --> 00:04:55,820

contributions to the state of israel and

87

00:05:01,850 --> 00:04:58,169

was a member of the american jewish

88

00:05:05,510 --> 00:05:01,860

committee and dick asked me if I could

89

00:05:09,260 --> 00:05:05,520

help break the drought in Israel well

90

00:05:12,350 --> 00:05:09,270

this has been a six-year drought with

91

00:05:14,390 --> 00:05:12,360

lowering water levels in the Sea of

92

00:05:16,490 --> 00:05:14,400

Galilee from year to year until it

93

00:05:18,920 --> 00:05:16,500

wasn't a dangerous situation

94

00:05:21,740 --> 00:05:18,930

see if Galilee for those of you don't

95

00:05:24,770 --> 00:05:21,750

know it is the main water source for all

96

00:05:26,899 --> 00:05:24,780

of agriculture aside from this the

97

00:05:30,469 --> 00:05:26,909

rainfall in the winter in the summer

98

00:05:35,029 --> 00:05:30,479

there is no moisture as the whole

99

00:05:38,270 --> 00:05:35,039

weather patterns change so they draw

100

00:05:40,750 --> 00:05:38,280

their moisture from the Sea of Galilee

101  
00:05:43,969 --> 00:05:40,760  
and it's actually transformed and

102  
00:05:46,850 --> 00:05:43,979  
transported via eventually by almost

103  
00:05:49,640 --> 00:05:46,860  
capillary like tubes which drop the

104  
00:05:53,659 --> 00:05:49,650  
moisture dropped by drop onto the crop

105  
00:05:56,899 --> 00:05:53,669  
as it's needed so I said well it's

106  
00:06:00,920 --> 00:05:56,909  
certainly worth a try so dick and I went

107  
00:06:04,010 --> 00:06:00,930  
over to to Israel and we reckon ordered

108  
00:06:05,899 --> 00:06:04,020  
and cleared the decks legally and there

109  
00:06:09,890 --> 00:06:05,909  
was no problem with our doing this kind

110  
00:06:12,409 --> 00:06:09,900  
of work there we found out and it seemed

111  
00:06:14,450 --> 00:06:12,419  
like a actually a good situation in

112  
00:06:17,510 --> 00:06:14,460  
which we could help especially if we

113  
00:06:20,090 --> 00:06:17,520

went there in the winter because that's

114

00:06:22,670 --> 00:06:20,100

when the climate changes

115

00:06:25,580 --> 00:06:22,680

through the winter you can get 40 up to

116

00:06:27,680 --> 00:06:25,590

44 inches of rain and although they

117

00:06:31,130 --> 00:06:27,690

hadn't had much rain for the previous

118

00:06:32,690 --> 00:06:31,140

six years we thought that if we went in

119

00:06:35,450 --> 00:06:32,700

the winter we would optimize our

120

00:06:37,790 --> 00:06:35,460

possibilities of helping so this was not

121

00:06:43,460 --> 00:06:37,800

a controlled experiment obviously it was

122

00:06:46,010 --> 00:06:43,470

a field trial so Kathleen Erickson and I

123

00:06:51,500 --> 00:06:46,020

went over the next year that was a

124

00:06:53,330 --> 00:06:51,510

January of 83 and what we hope to do was

125

00:06:56,230 --> 00:06:53,340

to if any weather was going to come

126  
00:06:59,690 --> 00:06:56,240  
through we hope that we could enhance it

127  
00:07:01,790 --> 00:06:59,700  
if no weather was scheduled we hope to

128  
00:07:05,500 --> 00:07:01,800  
be able to create it I have been able to

129  
00:07:11,510 --> 00:07:05,510  
do both of these things many many times

130  
00:07:16,340 --> 00:07:11,520  
in the previous 10 to 20 years so let's

131  
00:07:21,080 --> 00:07:16,350  
see I want to add one further thing this

132  
00:07:22,790 --> 00:07:21,090  
is me with hair with a cloud buster we

133  
00:07:25,040 --> 00:07:22,800  
eventually built and we used in

134  
00:07:28,310 --> 00:07:25,050  
Pennsylvania and it was brought to

135  
00:07:32,690 --> 00:07:28,320  
California when I moved to California

136  
00:07:35,810 --> 00:07:32,700  
and it occasions me to remark on one

137  
00:07:40,460 --> 00:07:35,820  
other aspect of this work one that that

138  
00:07:43,700 --> 00:07:40,470

Reich never described when I was in the

139

00:07:45,980 --> 00:07:43,710

East I worked with Bob John and and

140

00:07:49,040 --> 00:07:45,990

Brenda Dunn and came to understand the

141

00:07:52,490 --> 00:07:49,050

role of intention in creating physical

142

00:07:54,370 --> 00:07:52,500

reality and while I was working with

143

00:07:57,530 --> 00:07:54,380

this particular cloud Buster in

144

00:07:59,540 --> 00:07:57,540

Inverness California there's a Tomales

145

00:08:00,680 --> 00:07:59,550

Bay there and it's a marvelous spot to

146

00:08:05,000 --> 00:08:00,690

do this kind of work

147

00:08:07,490 --> 00:08:05,010

I made a an observation which really

148

00:08:12,020 --> 00:08:07,500

changed things about how this upper

149

00:08:14,660 --> 00:08:12,030

other system worked typically if it's a

150

00:08:17,870 --> 00:08:14,670

if it's a totally cloudless day and

151  
00:08:20,720 --> 00:08:17,880  
there's no breeze at all and I've seen

152  
00:08:23,990 --> 00:08:20,730  
this many many times when trying to

153  
00:08:26,960 --> 00:08:24,000  
create rain or disperse pollution when

154  
00:08:30,290 --> 00:08:26,970  
that happens as soon as you lift up the

155  
00:08:32,670 --> 00:08:30,300  
cloud Buster pipes you begin to get a

156  
00:08:36,120 --> 00:08:32,680  
movement of air it's on

157  
00:08:39,300 --> 00:08:36,130  
thinkable and I noticed this many many

158  
00:08:41,850 --> 00:08:39,310  
times well this particular device as you

159  
00:08:45,269 --> 00:08:41,860  
can see it's heavy and it's powered it's

160  
00:08:49,130 --> 00:08:45,279  
motor powered and through a long cable

161  
00:08:52,019 --> 00:08:49,140  
60 foot long cable well one day as I was

162  
00:08:55,019 --> 00:08:52,029  
approaching the device with the ID in

163  
00:08:57,930 --> 00:08:55,029

mind of what I was going to do and the

164

00:09:00,570 --> 00:08:57,940

sky was completely still not a whiff of

165

00:09:03,530 --> 00:09:00,580

a breeze and I'm thinking about it and

166

00:09:08,130 --> 00:09:03,540

before I gave him get to the cables a

167

00:09:10,650 --> 00:09:08,140

breeze comes up and I say well this

168

00:09:13,139 --> 00:09:10,660

thing is working because I known many

169

00:09:14,430 --> 00:09:13,149

times before that you know breezes don't

170

00:09:17,010 --> 00:09:14,440

come up just like that

171

00:09:18,600 --> 00:09:17,020

when I'm when I'm when I'm going to go

172

00:09:21,660 --> 00:09:18,610

when I'm working with it or in other

173

00:09:23,220 --> 00:09:21,670

conditions so I remembered my work with

174

00:09:25,079 --> 00:09:23,230

Bob and Brenda and I realized well

175

00:09:27,300 --> 00:09:25,089

intention is another factor that goes

176

00:09:29,250 --> 00:09:27,310

into this and of course that shouldn't

177

00:09:32,460 --> 00:09:29,260

be surprising because we're working here

178

00:09:38,010 --> 00:09:32,470

with fundamental energetic situations

179

00:09:40,920 --> 00:09:38,020

this is a beneath or a substrate for

180

00:09:43,070 --> 00:09:40,930

mass changes and this is where I believe

181

00:09:46,670 --> 00:09:43,080

at least that intention where the mind

182

00:09:49,680 --> 00:09:46,680

intersects physical reality so I

183

00:09:52,019 --> 00:09:49,690

formulated that the cloud Buster and I

184

00:09:56,250 --> 00:09:52,029

and the atmosphere formed a functional

185

00:09:58,890 --> 00:09:56,260

unity and that this is why one is able

186

00:10:01,440 --> 00:09:58,900

to get effects which are long-lasting

187

00:10:04,380 --> 00:10:01,450

and why you can't simply put the thing

188

00:10:06,300 --> 00:10:04,390

up and expect it and go away and expect

189

00:10:08,820 --> 00:10:06,310

it to continue working it will for a

190

00:10:15,569 --> 00:10:08,830

little bit but then within a few hours

191

00:10:18,300 --> 00:10:15,579

it stops so well there's another there's

192

00:10:19,860 --> 00:10:18,310

another factor to which a right didn't

193

00:10:22,710 --> 00:10:19,870

know about or described and that was

194

00:10:25,380 --> 00:10:22,720

again something I learned from the work

195

00:10:28,290 --> 00:10:25,390

at pair and that is that when two or

196

00:10:34,740 --> 00:10:28,300

more bonded people are working together

197

00:10:40,650 --> 00:10:34,750

on to displace an rej that it will work

198

00:10:43,319 --> 00:10:40,660

better than otherwise and Kathleen and I

199

00:10:45,350 --> 00:10:43,329

were bonded at the time and we were

200

00:10:49,819 --> 00:10:45,360

working in great harmony in

201  
00:10:51,620 --> 00:10:49,829  
operation and I think that this had a

202  
00:10:54,829 --> 00:10:51,630  
great deal to do with the success that

203  
00:10:57,620 --> 00:10:54,839  
we eventually got I should also mention

204  
00:10:59,600 --> 00:10:57,630  
that this concept of two people working

205  
00:11:00,710 --> 00:10:59,610  
together two or more actually working

206  
00:11:03,650 --> 00:11:00,720  
together in harmony

207  
00:11:06,650 --> 00:11:03,660  
there's also mentioned by the educator

208  
00:11:09,889 --> 00:11:06,660  
in philosopher Roger weir and he called

209  
00:11:12,740 --> 00:11:09,899  
it in shared presence and it's

210  
00:11:15,199 --> 00:11:12,750  
apparently a very ancient concept which

211  
00:11:21,860 --> 00:11:15,209  
goes back thousands of years to the

212  
00:11:25,790 --> 00:11:21,870  
Chinese so moving on we began our work

213  
00:11:27,019 --> 00:11:25,800

in Haifa excuse me one second just to

214

00:11:28,699 --> 00:11:27,029

give you some idea of what can be

215

00:11:31,100 --> 00:11:28,709

accomplished with this device in terms

216

00:11:35,690 --> 00:11:31,110

of weather making

217

00:11:41,210 --> 00:11:35,700

here's a weather map satellite map from

218

00:11:43,040 --> 00:11:41,220

July 1990 1977 19th of July and you can

219

00:11:48,460 --> 00:11:43,050

see there's the site of the cloudbuster

220

00:11:51,019 --> 00:11:48,470

station this thing worked right here in

221

00:11:54,050 --> 00:11:51,029

Pennsylvania and working with that large

222

00:11:58,389 --> 00:11:54,060

apparatus I showed you and you can see

223

00:12:02,689 --> 00:11:58,399

the black globs are weather patterns and

224

00:12:12,439 --> 00:12:02,699

and moisture and clouds to the west so

225

00:12:16,490 --> 00:12:12,449

we start at 1101 and by 231 on the 19th

226

00:12:18,740 --> 00:12:16,500

you can see the shift in the weather

227

00:12:20,900 --> 00:12:18,750

patterns and the movement towards the

228

00:12:23,720 --> 00:12:20,910

site of the cloudbuster station it's

229

00:12:31,120 --> 00:12:23,730

almost as if this stuff is streaming up

230

00:12:34,639 --> 00:12:31,130

towards here and it continues through

231

00:12:38,720 --> 00:12:34,649

later in the day on the 19th 4:00 in the

232

00:12:41,329 --> 00:12:38,730

afternoon and it's obvious that we're

233

00:12:44,660 --> 00:12:41,339

about to be at the cloudbuster site

234

00:12:48,319 --> 00:12:44,670

we're about to be covered with with rain

235

00:12:51,470 --> 00:12:48,329

and that's exactly what happened we got

236

00:12:53,630 --> 00:12:51,480

copious amounts of rain now I should

237

00:12:55,370 --> 00:12:53,640

mention in this respect that one of the

238

00:12:57,860 --> 00:12:55,380

things that the cloudbuster do it does

239

00:12:58,970 --> 00:12:57,870

as I've ascertained is that when you

240

00:13:03,139 --> 00:12:58,980

point it directly up

241

00:13:07,629 --> 00:13:03,149

Zenith it seems to entrain a intense

242

00:13:09,949 --> 00:13:07,639

vertical motion down to the earth and

243

00:13:12,050 --> 00:13:09,959

when you get that this is what's

244

00:13:14,810 --> 00:13:12,060

manifested on a physical level as low

245

00:13:17,329 --> 00:13:14,820

pressure systems and you get all of the

246

00:13:21,439 --> 00:13:17,339

processes of weather formation you know

247

00:13:23,000 --> 00:13:21,449

condensation of moisture and so forth so

248

00:13:25,819 --> 00:13:23,010

one of the main kinds of things that we

249

00:13:29,030 --> 00:13:25,829

do in operating this device to make rain

250

00:13:31,100 --> 00:13:29,040

is to draw from the zenith he called it

251  
00:13:33,230 --> 00:13:31,110  
to dry colder to draw because he felt

252  
00:13:40,400 --> 00:13:33,240  
that he was drawing energy into the

253  
00:13:46,370 --> 00:13:40,410  
system so we began in haifa which is in

254  
00:13:51,710 --> 00:13:46,380  
northern israel we're getting anything

255  
00:13:53,900 --> 00:13:51,720  
yeah up here and as you see and as i'll

256  
00:13:56,870 --> 00:13:53,910  
mention a bit later we tracked our way

257  
00:14:00,050 --> 00:13:56,880  
south along the coast and then cut over

258  
00:14:05,180 --> 00:14:00,060  
to the Dead Sea and then South to a lot

259  
00:14:10,939 --> 00:14:05,190  
at the southern tip of Israel we started

260  
00:14:15,110 --> 00:14:10,949  
out on the 12th of January completely

261  
00:14:17,439 --> 00:14:15,120  
cloudless day the forecast was for clear

262  
00:14:19,490 --> 00:14:17,449  
to partly cloudy for 48 hours

263  
00:14:22,370 --> 00:14:19,500

forecasting systems weren't nearly as

264

00:14:24,590 --> 00:14:22,380

good then as they are now and of course

265

00:14:27,139 --> 00:14:24,600

nobody was making a forecast for changes

266

00:14:31,730 --> 00:14:27,149

on a long term like six months or yearly

267

00:14:33,980 --> 00:14:31,740

basis and we drew for one hour from

268

00:14:38,000 --> 00:14:33,990

Zenith and the intention was to enhance

269

00:14:40,699 --> 00:14:38,010

the the possibly anticipated rainfall by

270

00:14:42,019 --> 00:14:40,709

creating this vertical action from the

271

00:14:45,769 --> 00:14:42,029

atmosphere to the earth

272

00:14:48,230 --> 00:14:45,779

and we worked for about an hour a little

273

00:14:52,460 --> 00:14:48,240

bit longer and there was no immediately

274

00:14:58,730 --> 00:14:52,470

observable change we also drew from the

275

00:15:02,480 --> 00:14:58,740

east in order to create a an increase in

276

00:15:06,829 --> 00:15:02,490

energy charge to the west over the

277

00:15:08,569 --> 00:15:06,839

Mediterranean Sea and we were grounded

278

00:15:13,579 --> 00:15:08,579

into the Mediterranean Sea

279

00:15:15,859 --> 00:15:13,589

time the next morning we got up the sky

280

00:15:19,549 --> 00:15:15,869

was hazy with high winds coming from the

281

00:15:24,350 --> 00:15:19,559

east which was consistent with the

282

00:15:25,999 --> 00:15:24,360

energetic build-up to the West forecasts

283

00:15:27,889 --> 00:15:26,009

were changing there was a possibility of

284

00:15:29,169 --> 00:15:27,899

rain in central and southern Israel

285

00:15:31,999 --> 00:15:29,179

later in the day

286

00:15:34,639 --> 00:15:32,009

within 10 minutes of beginning our

287

00:15:37,669 --> 00:15:34,649

operations discrete clouds began to form

288

00:15:39,590 --> 00:15:37,679

out of this AZ sky directly in relation

289

00:15:42,699 --> 00:15:39,600

to the direction we were pointing the

290

00:15:45,229 --> 00:15:42,709

cloud Buster by the end of an hour of

291

00:15:47,600 --> 00:15:45,239

the operation the sky was almost

292

00:15:50,389 --> 00:15:47,610

completely overcast and when we drove

293

00:15:55,129 --> 00:15:50,399

away from the site it began to rain this

294

00:15:57,499 --> 00:15:55,139

was unexpected and unfortunetly we got

295

00:16:00,499 --> 00:15:57,509

up was raining heavily with a forecast

296

00:16:02,389 --> 00:16:00,509

for rain over the entire country we

297

00:16:04,220 --> 00:16:02,399

worked in a break in the rain for about

298

00:16:06,979 --> 00:16:04,230

a half an hour in the afternoon with the

299

00:16:10,460 --> 00:16:06,989

intention of increasing the duration of

300

00:16:12,340 --> 00:16:10,470

the rainfall the result of this was

301  
00:16:15,949 --> 00:16:12,350  
continuous rain for the next five days

302  
00:16:21,409 --> 00:16:15,959  
with nine feet of snow falling on Mount

303  
00:16:24,799 --> 00:16:21,419  
Hermon and four inches of rain into the

304  
00:16:26,559 --> 00:16:24,809  
Sea of Galilee weather maps showed

305  
00:16:29,299 --> 00:16:26,569  
development of a low-pressure system

306  
00:16:31,340 --> 00:16:29,309  
developing off the coast but it was

307  
00:16:34,429 --> 00:16:31,350  
unrelated to previous atmospheric

308  
00:16:36,829 --> 00:16:34,439  
patterns and a series of cold fronts

309  
00:16:38,809 --> 00:16:36,839  
formed which wracked Israel with

310  
00:16:43,519 --> 00:16:38,819  
precipitation on the following several

311  
00:16:47,109 --> 00:16:43,529  
days we moved down feeling we could do

312  
00:16:54,970 --> 00:16:47,119  
no more there so we moved down to

313  
00:17:02,689 --> 00:16:57,979

this was the only time that we were ever

314

00:17:04,939 --> 00:17:02,699

surprised by the army here we are

315

00:17:08,569 --> 00:17:04,949

dragging along with a look which an

316

00:17:11,990 --> 00:17:08,579

apparatus looked like a howitzer by a

317

00:17:17,149 --> 00:17:12,000

truck and we're out in the middle of of

318

00:17:19,610 --> 00:17:17,159

the by the sea and all of a sudden these

319

00:17:22,180 --> 00:17:19,620

commandos pop up all around us what are

320

00:17:25,260 --> 00:17:22,190

we doing well I had a cover story which

321

00:17:28,330 --> 00:17:25,270

we were measuring you know changes in

322

00:17:30,550 --> 00:17:28,340

ionization in the atmosphere and it was

323

00:17:36,370 --> 00:17:30,560

convincing enough for them and so they

324

00:17:38,620 --> 00:17:36,380

let us go on so we worked in Ascalon for

325

00:17:40,750 --> 00:17:38,630

about three days and the forecast was

326

00:17:43,540 --> 00:17:40,760

rain on the 22nd that was the last day

327

00:17:47,440 --> 00:17:43,550

of our work there and again we worked to

328

00:17:49,960 --> 00:17:47,450

augment rain and on the 22nd it rained

329

00:17:51,670 --> 00:17:49,970

and it eventually covered most of the

330

00:17:54,130 --> 00:17:51,680

country with flooding in the Negev and

331

00:17:56,590 --> 00:17:54,140

snow in the northern mountains and we

332

00:17:59,320 --> 00:17:56,600

tracked our way down to a lot down in

333

00:18:00,820 --> 00:17:59,330

here and it practically never rains

334

00:18:02,530 --> 00:18:00,830

there they get 2 inches of rain a year

335

00:18:08,860 --> 00:18:02,540

and we set the cloudbuster up and

336

00:18:10,030 --> 00:18:08,870

started to sprinkle so we felt that we

337

00:18:12,550 --> 00:18:10,040

were successful and there was a little

338

00:18:15,550 --> 00:18:12,560

more that we could do at that time so we

339

00:18:17,230 --> 00:18:15,560

called a Bernie our contact with the

340

00:18:19,210 --> 00:18:17,240

American Jewish Committee and said well

341

00:18:22,420 --> 00:18:19,220

we're ready to go into Phase two which

342

00:18:25,000 --> 00:18:22,430

was to train a student and set up a

343

00:18:28,110 --> 00:18:25,010

permanent base so they could use this

344

00:18:31,000 --> 00:18:28,120

year after year if they needed to and

345

00:18:34,510 --> 00:18:31,010

Bernie just screamed at me and he said

346

00:18:36,910 --> 00:18:34,520

you did that and I said yes Bernie that

347

00:18:39,700 --> 00:18:36,920

was our plan and we did do that we did

348

00:18:40,990 --> 00:18:39,710

create this rain he says well I have to

349

00:18:43,000 --> 00:18:41,000

think about it now although he had

350

00:18:46,150 --> 00:18:43,010

agreed previously you know that we were

351

00:18:49,090 --> 00:18:46,160

gonna follow through with phase two so

352

00:18:52,120 --> 00:18:49,100

he wanted me to come up and Kathleen and

353

00:18:56,740 --> 00:18:52,130

I to track up to Jerusalem and work with

354

00:19:00,490 --> 00:18:56,750

his assistant Yaakov panini Yaakov is an

355

00:19:04,320 --> 00:19:00,500

old-timer a Six Day War veteran and

356

00:19:07,570 --> 00:19:04,330

worked with the worked with the

357

00:19:09,630 --> 00:19:07,580

agricultural service so this was really

358

00:19:11,730 --> 00:19:09,640

one of the most startling times of

359

00:19:15,400 --> 00:19:11,740

experiences I've ever had with this

360

00:19:17,080 --> 00:19:15,410

because Yaakov knew everybody in

361

00:19:18,790 --> 00:19:17,090

Bethlehem and he showed took us to

362

00:19:21,340 --> 00:19:18,800

places nobody else could get in and he

363

00:19:24,550 --> 00:19:21,350

was a also a guide and everybody all the

364

00:19:27,100 --> 00:19:24,560

Arabs knew him but we were set up with a

365

00:19:29,710 --> 00:19:27,110

cloudbuster in a place where the the

366

00:19:33,910 --> 00:19:29,720

tubes were grounded into an aqueduct

367

00:19:35,860 --> 00:19:33,920

which ran into King Solomon's pools well

368

00:19:38,920 --> 00:19:35,870

this is starting to blow my mind

369

00:19:42,400 --> 00:19:38,930

because here I am you know in the 20th

370

00:19:45,070 --> 00:19:42,410

century and I've got this future

371

00:19:46,780 --> 00:19:45,080

space-age device which I'm operating and

372

00:19:50,860 --> 00:19:46,790

it's grounded into something which is

373

00:19:54,340 --> 00:19:50,870

2000 2000 years old you can understand

374

00:19:56,260 --> 00:19:54,350

the the possible you know mental

375

00:19:58,690 --> 00:19:56,270

disconnect all these kinds of things

376

00:20:04,330 --> 00:19:58,700

going on nevertheless it was a cool day

377

00:20:06,700 --> 00:20:04,340

and Jakov yeah totally I cough you point

378

00:20:09,340 --> 00:20:06,710

to a cloud and we'll break it up so he

379

00:20:11,620 --> 00:20:09,350

points to a cloud and much to all of our

380

00:20:14,799 --> 00:20:11,630

sadhana Sherman holes formed in the

381

00:20:17,760 --> 00:20:14,809

cloud in the exact position that the

382

00:20:22,810 --> 00:20:17,770

pipes were mounted on this rack and

383

00:20:23,230 --> 00:20:22,820

Jakov said I don't believe it but I see

384

00:20:32,020 --> 00:20:23,240

it

385

00:20:35,740 --> 00:20:32,030

was up to dick Fox and the thing finally

386

00:20:45,640 --> 00:20:35,750

got lost in the Israeli bureaucracy but

387

00:20:48,150 --> 00:20:45,650

we felt we'd been successful fascinating

388

00:20:51,310 --> 00:20:48,160

stuff there is time for questions

389

00:20:56,070 --> 00:20:51,320

anybody have question please come up

390

00:21:00,440 --> 00:20:57,970

[Music]

391

00:21:04,250 --> 00:21:00,450

yes dick one question I have regarding

392

00:21:07,280 --> 00:21:04,260

this is the water you're drawing for the

393

00:21:09,440 --> 00:21:07,290

rain is presumably coming from other

394

00:21:12,710 --> 00:21:09,450

areas and other areas would likely be

395

00:21:16,310 --> 00:21:12,720

dry or not get the rain as a result of

396

00:21:18,470 --> 00:21:16,320

your actions then the water that we're

397

00:21:20,680 --> 00:21:18,480

drawing like I mean the rain would

398

00:21:25,310 --> 00:21:20,690

presumably fall elsewhere if you hadn't

399

00:21:27,140 --> 00:21:25,320

there wasn't no there was no rain yeah

400

00:21:29,480 --> 00:21:27,150

well you what what you're saying implies

401  
00:21:31,790 --> 00:21:29,490  
that rain would have been there but

402  
00:21:32,930 --> 00:21:31,800  
there was no rain or so do you think

403  
00:21:35,690 --> 00:21:32,940  
there would not have been any rain

404  
00:21:38,720 --> 00:21:35,700  
elsewhere had you not done what you did

405  
00:21:41,090 --> 00:21:38,730  
I think there wouldn't have been any

406  
00:21:43,280 --> 00:21:41,100  
rain over israel at least so but i mean

407  
00:21:45,620 --> 00:21:43,290  
say in the US for example i have no idea

408  
00:21:47,930 --> 00:21:45,630  
about that okay which when we work here

409  
00:21:49,940 --> 00:21:47,940  
which we've done many times on the west

410  
00:21:53,000 --> 00:21:49,950  
coast we try to track these things

411  
00:21:55,640 --> 00:21:53,010  
across the country to see what the you

412  
00:21:57,560 --> 00:21:55,650  
know what is happening downstream so to

413  
00:21:59,300 --> 00:21:57,570

413 speak and we do have some idea about

414

00:22:02,420 --> 00:21:59,310

that but when i was there i had no

415

00:22:07,970 --> 00:22:02,430

access to adequate information okay

416

00:22:12,830 --> 00:22:07,980

thanks York why am I so surprised to see

417

00:22:17,390 --> 00:22:12,840

you at the microphone it seems fairly

418

00:22:19,990 --> 00:22:17,400

safe to say that you you won't find

419

00:22:22,820 --> 00:22:20,000

anything on the NOAA website about

420

00:22:27,290 --> 00:22:22,830

orgone energy modifications to the

421

00:22:29,750 --> 00:22:27,300

weather nor on I as I haven't checked

422

00:22:31,220 --> 00:22:29,760

this but I doubt that things like cloud

423

00:22:33,920 --> 00:22:31,230

seeding and other forms of weather

424

00:22:38,480 --> 00:22:33,930

intervention will discuss it either if

425

00:22:42,580 --> 00:22:38,490

the effect is as obvious as replicable

426  
00:22:49,130 --> 00:22:46,220  
do you see any obstacle to trying to get

427  
00:22:53,480 --> 00:22:49,140  
together a large scale team for a

428  
00:22:56,180 --> 00:22:53,490  
demonstration project and get this into

429  
00:22:58,360 --> 00:22:56,190  
the cognizance of the world and the

430  
00:23:03,550 --> 00:22:58,370  
scientific community once and for all

431  
00:23:06,620 --> 00:23:03,560  
there's no resistance on my part but

432  
00:23:08,339 --> 00:23:06,630  
just the I'll read this you'll all

433  
00:23:10,899 --> 00:23:08,349  
recognize the

434  
00:23:13,299 --> 00:23:10,909  
this is a letter we submitted this

435  
00:23:15,430 --> 00:23:13,309  
information to the Israeli oath they

436  
00:23:18,149 --> 00:23:15,440  
eventually got to the Israeli

437  
00:23:20,489 --> 00:23:18,159  
Oceanographic and limnological research

438  
00:23:24,759 --> 00:23:20,499

department

439

00:23:27,069 --> 00:23:24,769

dear mr. Fox neo hey but none passed on

440

00:23:29,049 --> 00:23:27,079

to me your letter of March 14th I've

441

00:23:31,389 --> 00:23:29,059

read the papers you sent concerning the

442

00:23:33,430 --> 00:23:31,399

ergonomic weather control the results

443

00:23:34,930 --> 00:23:33,440

are interesting and puzzling however I

444

00:23:36,759 --> 00:23:34,940

think that the most urgent work which

445

00:23:38,649 --> 00:23:36,769

has to be done presently there's a

446

00:23:41,229 --> 00:23:38,659

thorough and systematic research of the

447

00:23:42,879 --> 00:23:41,239

phenomena in order to understand it the

448

00:23:44,919 --> 00:23:42,889

operation practical results are

449

00:23:47,409 --> 00:23:44,929

secondary mainly because it seems

450

00:23:49,199 --> 00:23:47,419

unreasonable to use a possibly powerful

451  
00:23:52,539 --> 00:23:49,209  
tool without knowing what we are doing

452  
00:23:54,180 --> 00:23:52,549  
it wasn't secondary to the farmers who

453  
00:23:57,609 --> 00:23:54,190  
got the water out of the Sea of Galilee

454  
00:23:59,049 --> 00:23:57,619  
following our work such a research work

455  
00:24:01,139 --> 00:23:59,059  
to be carried out by a group of

456  
00:24:03,489 --> 00:24:01,149  
scientists including various disciplines

457  
00:24:04,809 --> 00:24:03,499  
under the guidance of a physicists

458  
00:24:07,479 --> 00:24:04,819  
having an interdisciplinary background

459  
00:24:09,939 --> 00:24:07,489  
in physical sciences I will recommend

460  
00:24:14,169 --> 00:24:09,949  
you York this is far beyond the

461  
00:24:16,180 --> 00:24:14,179  
capabilities oh oh I oh I r io L R could

462  
00:24:18,609 --> 00:24:16,190  
be involved in further stages but could

463  
00:24:20,949 --> 00:24:18,619

not initiate it I am personally

464

00:24:23,649 --> 00:24:20,959

interested in any progress I'm sure most

465

00:24:27,369 --> 00:24:23,659

of you have got similar kinds of letters

466

00:24:30,989 --> 00:24:27,379

in your own kind of work and it's the

467

00:24:33,819 --> 00:24:30,999

nature of the bureaucratic beast

468

00:24:36,999 --> 00:24:33,829

we've just got 30 seconds left but a

469

00:24:40,119 --> 00:24:37,009

quick question what you've shown this

470

00:24:43,269 --> 00:24:40,129

time that I haven't seen before was the

471

00:24:46,659 --> 00:24:43,279

effect of intention and how do you know

472

00:24:49,419 --> 00:24:46,669

that this isn't entirely an effect of

473

00:24:51,939 --> 00:24:49,429

intention where the cloudbuster is

474

00:24:56,019 --> 00:24:51,949

simply a vehicle for that intention well

475

00:24:58,839 --> 00:24:56,029

I did some experiments it's is known

476

00:25:01,569 --> 00:24:58,849

long before this work that by simply

477

00:25:03,549 --> 00:25:01,579

looking at a cloud you can destroy it if

478

00:25:06,999 --> 00:25:03,559

that's your intention so I tried that

479

00:25:10,599 --> 00:25:07,009

yes I could do that but nowhere near the

480

00:25:12,159 --> 00:25:10,609

rapidity and intensity that it happens

481

00:25:15,329 --> 00:25:12,169

when you are co functioning with
