1
00:00:06,320 --> 00:00:04,370
yes good morning everyone this morning's

2
00:00:08,200 --> 00:00:06,330
talk is by Bell bingston and it's

3
00:00:11,540 --> 00:00:08,210
entitled leaving the critics behind

4
00:00:14,990 --> 00:00:11,550
transit transitioning to pragmatic

5
00:00:17,210 --> 00:00:15,000
application of scientific anomalies so

6
00:00:19,670 --> 00:00:17,220
bill I think I'll give you a microphone

7
00:00:23,109 --> 00:00:19,680
no I got a mic oh okay I guess you want

8
00:00:28,609 --> 00:00:23,119
I won't throw my voice or something yeah

9
00:00:29,740 --> 00:00:28,619
fourth day huh it's buns of steel a week

10
00:00:31,189 --> 00:00:29,750
are we gonna make it through this thing

11
00:00:32,659 --> 00:00:31,199
okay

12
00:00:34,400 --> 00:00:32,669
well I thought I'd make a couple of

13
00:00:36,139 --> 00:00:34,410

presidential comments that'll only take

14
00:00:38,930 --> 00:00:36,149
about ten seconds because I don't have

15
00:00:41,479 --> 00:00:38,940
much presidential to say but I would

16
00:00:44,090 --> 00:00:41,489
like to talk about first a grand

17
00:00:46,369 --> 00:00:44,100
philosophical question I'm going to tell

18
00:00:48,950 --> 00:00:46,379
you an anecdote and then I'm going to

19
00:00:51,380 --> 00:00:48,960
transition to some current research that

20
00:00:53,479 --> 00:00:51,390
I'm working on right now which I think

21
00:00:56,150 --> 00:00:53,489
will illustrate the transition to

22
00:00:58,340 --> 00:00:56,160
pragmatic applications and I'm going to

23
00:01:00,950 --> 00:00:58,350
encourage folks to start shifting a

24
00:01:02,240 --> 00:01:00,960
mindset a little bit so first we'll

25
00:01:04,399 --> 00:01:02,250
start with a grand philosophical

26
00:01:08,210 --> 00:01:04,409
question that is of course was Dylan

27
00:01:09,950 --> 00:01:08,220
right my experience is you can find the

28
00:01:12,020 --> 00:01:09,960
answer to almost any question looking at

29
00:01:14,750 --> 00:01:12,030
Dylan's lyrics but in this particularly

30
00:01:16,910 --> 00:01:14,760
the question are the times are changing

31
00:01:20,749 --> 00:01:16,920
and and by the times of changing I'm

32
00:01:23,359 --> 00:01:20,759
talking about our people out there in

33
00:01:25,399 --> 00:01:23,369
the world in the real world becoming

34
00:01:26,929 --> 00:01:25,409
softer in their attitudes toward

35
00:01:30,590 --> 00:01:26,939
scientific anomalies and I would suggest

36
00:01:32,510 --> 00:01:30,600
to you that they are and the question

37
00:01:34,130 --> 00:01:32,520
would be why and that would be for a

38
00:01:36,469 --> 00:01:34,140

different talk if he gave me in a couple

39
00:01:38,569 --> 00:01:36,479
extra hours is it because the folks in

40
00:01:41,210 --> 00:01:38,579
this room and elsewhere have accumulated

41
00:01:45,770 --> 00:01:41,220
so much data that it's hit a critical

42
00:01:48,130 --> 00:01:45,780
mass I don't think so is it because

43
00:01:51,950 --> 00:01:48,140
science advances one funeral at a time

44
00:01:54,469 --> 00:01:51,960
that that's a possibility and I would

45
00:01:56,630 --> 00:01:54,479
argue that there's a change in the

46
00:01:59,179 --> 00:01:56,640
culture and the change in the culture

47
00:02:01,100 --> 00:01:59,189
the background assumptions the kind of

48
00:02:03,469 --> 00:02:01,110
faith-based assumptions that people have

49
00:02:05,959 --> 00:02:03,479
about the way the world works has been

50
00:02:07,459 --> 00:02:05,969
transitioning and that would be an

51
00:02:08,749 --> 00:02:07,469
interesting question for the sociology

52
00:02:11,570 --> 00:02:08,759
of knowledge but again that's not the

53
00:02:13,300 --> 00:02:11,580
point here so I'd rather I can make it

54
00:02:16,069 --> 00:02:13,310
simpler by just telling an anecdote

55
00:02:18,559 --> 00:02:16,079
here's the anecdote a few months ago I

56
00:02:21,050 --> 00:02:18,569
was invited to give a talk to the

57
00:02:23,119 --> 00:02:21,060
startup Institute for venture science

58
00:02:24,380 --> 00:02:23,129
everybody in the SS he knows about that

59
00:02:27,860 --> 00:02:24,390
because I've sent out an email blast

60
00:02:29,209 --> 00:02:27,870
saying we got money anybody wanted me if

61
00:02:31,550 --> 00:02:29,219
the PA doesn't know about that I'd be

62
00:02:33,319 --> 00:02:31,560
happy to tell so the Institute for

63
00:02:35,330 --> 00:02:33,329

venture science is starting it out of

64
00:02:37,640 --> 00:02:35,340
the University of Washington and it's

65
00:02:39,140 --> 00:02:37,650
spearheaded by Jerry Pollock and the

66
00:02:41,720 --> 00:02:39,150
general idea is can we raise a lot of

67
00:02:43,970 --> 00:02:41,730
money get a big endowment and do

68
00:02:45,949 --> 00:02:43,980
multiple sites of the same question over

69
00:02:48,470 --> 00:02:45,959
multiple years and they have a very

70
00:02:50,360 --> 00:02:48,480
humble goal of raising ten billion

71
00:02:53,390 --> 00:02:50,370
dollars and that's probably more than

72
00:02:55,369 --> 00:02:53,400
most you carry with you today but so I

73
00:02:56,839 --> 00:02:55,379
was invited out there and and the

74
00:02:57,920 --> 00:02:56,849
general idea is we're gonna invite a

75
00:03:01,099 --> 00:02:57,930
bunch of people who have large

76
00:03:02,539 --> 00:03:01,109
checkbooks can they come here venture

77
00:03:04,520 --> 00:03:02,549
science can be here interesting new

78
00:03:06,429 --> 00:03:04,530
stuff and will they write checks in

79
00:03:09,619 --> 00:03:06,439
support of that can we change the world

80
00:03:11,119 --> 00:03:09,629
that's really the idea so I was invited

81
00:03:13,129 --> 00:03:11,129
for better for worse to be one of the

82
00:03:15,289 --> 00:03:13,139
speakers at this thing but a hundred

83
00:03:19,449 --> 00:03:15,299
people are there I got to get off this

84
00:03:27,110 --> 00:03:23,539
different ages so most of the folks

85
00:03:29,210 --> 00:03:27,120
there were on the back end some folks

86
00:03:32,930 --> 00:03:29,220
were on the front end of the lifecycle

87
00:03:35,030 --> 00:03:32,940
and I went on and for a reasonably long

88
00:03:37,280 --> 00:03:35,040

period of time talking about 35 years of

89
00:03:38,539 --> 00:03:37,290
healing research and all its promise and

90
00:03:39,800 --> 00:03:38,549
all this kind of thing and I'm telling

91
00:03:42,619 --> 00:03:39,810
what I think a reasonably interesting

92
00:03:46,670 --> 00:03:42,629
phenomenon so for example just on this

93
00:03:49,640 --> 00:03:46,680
one pardon me if I go analog does the

94
00:03:51,649 --> 00:03:49,650
State of Mind work does it matter

95
00:03:53,119 --> 00:03:51,659
and so I updated for this and I've data

96
00:03:54,319 --> 00:03:53,129
for this and I have data for this and

97
00:03:55,849 --> 00:03:54,329
I've dead so I'm praying I'm presenting

98
00:03:58,250 --> 00:03:55,859
data and I'm overwhelming them with data

99
00:04:00,949 --> 00:03:58,260
and the older folks are flopping on the

100
00:04:04,360 --> 00:04:00,959
floor they're excited but then I was

101
00:04:06,710 --> 00:04:04,370
assigned to a table of 12 year olds so

102
00:04:08,809 --> 00:04:06,720
under a certain age everybody looks 12

103
00:04:10,429 --> 00:04:08,819
to me so I was assigned to reach 12 year

104
00:04:12,979 --> 00:04:10,439
olds and they had little alligators and

105
00:04:15,199 --> 00:04:12,989
stuff and so they were sitting around a

106
00:04:17,240 --> 00:04:15,209
table and I'm supposed to talk about the

107
00:04:18,740 --> 00:04:17,250
stuff and they're 12 and and so I'm

108
00:04:20,089 --> 00:04:18,750
saying well isn't that interesting and

109
00:04:22,670 --> 00:04:20,099
that interesting in that interesting and

110
00:04:25,310 --> 00:04:22,680
and so they they and then they looking

111
00:04:25,610 --> 00:04:25,320
at me blankly and they go yeah that's

112
00:04:32,420 --> 00:04:25,620
real

113
00:04:35,000 --> 00:04:32,430

yeah isn't it obvious

114
00:04:36,260 --> 00:04:35,010
and I of course I've been working 35

115
00:04:37,670 --> 00:04:36,270
years trying to get this stuff that

116
00:04:39,350 --> 00:04:37,680
nailed down and they're going like you

117
00:04:44,120 --> 00:04:39,360
know that's pretty boring and boy you're

118
00:04:45,830 --> 00:04:44,130
old we know that this stuff is real

119
00:04:50,000 --> 00:04:45,840
give me a break so the only question is

120
00:04:51,530 --> 00:04:50,010
what can you do with it I mean the stuff

121
00:04:53,300 --> 00:04:51,540
exists give me a break of course is

122
00:04:55,070 --> 00:04:53,310
healing of course is remote-viewing of

123
00:04:57,200 --> 00:04:55,080
course you get consciousness akin to do

124
00:04:58,939 --> 00:04:57,210
give me a bold are you you know it's

125
00:05:00,980 --> 00:04:58,949
basically the question to me and I'm

126
00:05:04,159 --> 00:05:00,990
going well you know I'm getting older

127
00:05:05,390 --> 00:05:04,169
yeah but but but it was a clear

128
00:05:06,800 --> 00:05:05,400
generation so they wonder what can you

129
00:05:09,680 --> 00:05:06,810
do with this the second thing is it can

130
00:05:11,390 --> 00:05:09,690
we experience it and that's their

131
00:05:14,180 --> 00:05:11,400
mindset so I'm going graphs charts

132
00:05:15,890 --> 00:05:14,190
things tables you know the protocol and

133
00:05:17,779 --> 00:05:15,900
they're going on yeah who cares give me

134
00:05:20,480 --> 00:05:17,789
a break the stuffs obvious what are you

135
00:05:21,980 --> 00:05:20,490
going to do with it so what I'm going to

136
00:05:23,689 --> 00:05:21,990
do with it I said well you know I

137
00:05:25,370 --> 00:05:23,699
actually have a research protocol about

138
00:05:26,540 --> 00:05:25,380

that and I'm actually working on it

139
00:05:28,700 --> 00:05:26,550
right now the other stuff is more

140
00:05:30,140 --> 00:05:28,710
fundamental but can we develop practical

141
00:05:35,080 --> 00:05:30,150
applications I think it's a reasonable

142
00:05:37,190 --> 00:05:35,090
question and it appeals to younger folks

143
00:05:38,810 --> 00:05:37,200
after a certain age I don't know what it

144
00:05:45,170 --> 00:05:38,820
is but it can be investigated if we can

145
00:05:48,589 --> 00:05:45,180
get running seriously old like 40 so for

146
00:05:52,070 --> 00:05:48,599
today I want to say let's see can we do

147
00:05:54,409 --> 00:05:52,080
this can we other data that suggests

148
00:05:57,170 --> 00:05:54,419
healing can be stored and it can be

149
00:05:58,310 --> 00:05:57,180
applied and how do we solve that problem

150
00:06:00,379 --> 00:05:58,320
now I'm not going to give you the answer

151
00:06:05,480 --> 00:06:00,389
I'm going to say here's what I'm working

152
00:06:10,219 --> 00:06:05,490
on can we build a killer app or a healer

153
00:06:12,409 --> 00:06:10,229
app can we deliver healing that's the

154
00:06:14,510 --> 00:06:12,419
question so I'm going to focus on some

155
00:06:17,659 --> 00:06:14,520
cancer stuff SSE folks have seen some of

156
00:06:20,270 --> 00:06:17,669
these before pH folks may not this is

157
00:06:22,339 --> 00:06:20,280
the nut I got my analog this is the

158
00:06:24,560 --> 00:06:22,349
number of formal experiments on mammary

159
00:06:25,760 --> 00:06:24,570
cancer done at this is the number done

160
00:06:27,860 --> 00:06:25,770
at done at Donna

161
00:06:30,080 --> 00:06:27,870
so all I'm trying to say is I've done a

162
00:06:31,370 --> 00:06:30,090
lot of stuff done a lot of work and I

163
00:06:35,270 --> 00:06:31,380

can show you some ugly pictures of

164
00:06:37,430 --> 00:06:35,280
animals and I've done other stuff an

165
00:06:39,230 --> 00:06:37,440
oncogenic and nude mice you know I mean

166
00:06:42,260 --> 00:06:39,240
most people don't think of mark

167
00:06:44,180 --> 00:06:42,270
I saw really related but Newton my score

168
00:06:45,529 --> 00:06:44,190
for a particular reason I've done a lot

169
00:06:49,550 --> 00:06:45,539
of different stuff in vivo and in vitro

170
00:06:51,920 --> 00:06:49,560
and I'm gonna focus just very quickly on

171
00:06:54,499 --> 00:06:51,930
some of the data so we'll show you what

172
00:06:56,510 --> 00:06:54,509
is it that we're trying to record what

173
00:06:59,480 --> 00:06:56,520
is it we're trying to store and what is

174
00:07:02,120 --> 00:06:59,490
it we're trying to deliver so this is

175
00:07:04,189 --> 00:07:02,130
what are we trying to deliver details

176
00:07:06,559 --> 00:07:04,199
don't matter we're taking mice models

177
00:07:10,129 --> 00:07:06,569
that are off the shelf that have

178
00:07:12,050 --> 00:07:10,139
lifespan of about a month they die after

179
00:07:15,649 --> 00:07:12,060
about a month he inject them with cancer

180
00:07:18,200 --> 00:07:15,659
they die so we have a mouse and the

181
00:07:19,939 --> 00:07:18,210
mouse and this is what happens and the

182
00:07:22,909 --> 00:07:19,949
tumor gets bigger it's an ugly way to

183
00:07:24,260 --> 00:07:22,919
die the the mouse dies from having its

184
00:07:25,339 --> 00:07:24,270
internal organs crushed and/or

185
00:07:28,460 --> 00:07:25,349
malnutrition

186
00:07:31,969 --> 00:07:28,470
it's very ugly work I don't know how

187
00:07:34,180 --> 00:07:31,979
else to do it so there's at least 2,000

188
00:07:37,159 --> 00:07:34,190

publications on this model alone

189
00:07:40,490 --> 00:07:37,169
everybody knows they die in a month so

190
00:07:41,659 --> 00:07:40,500
it's ugly oncology research you're

191
00:07:43,070 --> 00:07:41,669
trying to figure out how to get the

192
00:07:44,510 --> 00:07:43,080
lifespan longer all this kind of stuff

193
00:07:46,870 --> 00:07:44,520
rodents don't like it and they say you

194
00:07:49,790 --> 00:07:46,880
know give me a break

195
00:07:53,540 --> 00:07:49,800
make it stop I'm trying to make it stop

196
00:07:55,760 --> 00:07:53,550
so the answer it turns out is healing so

197
00:07:57,620 --> 00:07:55,770
you get Margaret MOCA took this picture

198
00:07:59,390 --> 00:07:57,630
and as Margaret will point out if you

199
00:08:03,110 --> 00:07:59,400
get really good-looking people to put

200
00:08:04,879 --> 00:08:03,120
their hands around a cage we never

201
00:08:07,760 --> 00:08:04,889
figured that out did we why ugly people

202
00:08:08,959 --> 00:08:07,770
can't heal so if you get really

203
00:08:10,399 --> 00:08:08,969
good-looking people put their hands

204
00:08:12,140 --> 00:08:10,409
around the cage you do a particular

205
00:08:14,570 --> 00:08:12,150
healing technique which I'm not going to

206
00:08:18,589 --> 00:08:14,580
talk about now weird stuff happens and

207
00:08:21,620 --> 00:08:18,599
what happens is this the tumor grows the

208
00:08:26,839 --> 00:08:21,630
tumor grows the tumor starts to slit

209
00:08:28,939 --> 00:08:26,849
open the tumor opens and he was the

210
00:08:31,550 --> 00:08:28,949
kicker and the mice are cured for the

211
00:08:33,170 --> 00:08:31,560
life span now I'd like to point out

212
00:08:37,100 --> 00:08:33,180
something from a parapsychological point

213
00:08:39,670 --> 00:08:37,110

of view this is not PK healing doesn't

214
00:08:41,659 --> 00:08:39,680
happen the way I want it to this is not

215
00:08:44,329 --> 00:08:41,669
consciousness imposing its will on

216
00:08:46,100 --> 00:08:44,339
nature I figured you know I get this

217
00:08:47,930 --> 00:08:46,110
stuff early and I go this is kind of a

218
00:08:49,760 --> 00:08:47,940
thing to the mice and then they wouldn't

219
00:08:51,350 --> 00:08:49,770
get cancer because I'm you know the big

220
00:08:53,269 --> 00:08:51,360
radiator or something like that

221
00:08:56,329 --> 00:08:53,279
and and no matter what you do tumors

222
00:08:57,710 --> 00:08:56,339
grow and they go through this ugly

223
00:09:00,560 --> 00:08:57,720
transformation but the mouse is actually

224
00:09:02,690 --> 00:09:00,570
healthy and then the thing implodes so

225
00:09:06,710 --> 00:09:02,700
it's not going according to my will

226
00:09:09,759 --> 00:09:06,720
healing is not pk nature does nature and

227
00:09:15,889 --> 00:09:09,769
we're simply enabling nature to nature I

228
00:09:17,930 --> 00:09:15,899
don't know if that's natural so we can

229
00:09:19,610 --> 00:09:17,940
do this on any kind or different kinds

230
00:09:22,699 --> 00:09:19,620
it's a different kind of cancer just to

231
00:09:25,490 --> 00:09:22,709
show you the same idea external non

232
00:09:29,150 --> 00:09:25,500
metastatic tumor gets bigger and bigger

233
00:09:30,740 --> 00:09:29,160
and then if we do the stuff and doing

234
00:09:32,810 --> 00:09:30,750
the stuff it's not me incidentally I'm

235
00:09:35,210 --> 00:09:32,820
not a healer I get faculty members

236
00:09:39,949 --> 00:09:35,220
volunteers students anybody who's in

237
00:09:41,420 --> 00:09:39,959
experience can do this these mice they

238
00:09:43,819 --> 00:09:41,430

get cured in a couple of different ways

239
00:09:45,290 --> 00:09:43,829
we don't know why the first way you got

240
00:09:48,410 --> 00:09:45,300
a tumor and then it's like somebody lets

241
00:09:50,240 --> 00:09:48,420
the air out and then the mystery is that

242
00:09:53,420 --> 00:09:50,250
an arrow appears to grow and it's back

243
00:09:56,750 --> 00:09:53,430
we don't know why it's the arrow I'm

244
00:09:59,180 --> 00:09:56,760
after and and other times you get this

245
00:10:00,620 --> 00:09:59,190
ulceration and it implodes and all that

246
00:10:02,240 --> 00:10:00,630
kind of stuff and you can do this and

247
00:10:04,850 --> 00:10:02,250
you can tell once it's cured it's really

248
00:10:08,150 --> 00:10:04,860
cured for life we can do this with

249
00:10:11,480 --> 00:10:08,160
people though they they whine when you

250
00:10:15,110 --> 00:10:11,490
put them into cages and you can watch

251
00:10:18,160 --> 00:10:15,120
the the the whatever whatever the the

252
00:10:23,060 --> 00:10:18,170
medical test is you can watch it to cure

253
00:10:25,970 --> 00:10:23,070
so here's some of the questions can we

254
00:10:30,410 --> 00:10:25,980
reverse engineer this can we make it a

255
00:10:34,910 --> 00:10:30,420
practical application and can we sorry

256
00:10:37,910 --> 00:10:34,920
Ken can we make it scalable so can we

257
00:10:41,240 --> 00:10:37,920
distribute this widely so healing isn't

258
00:10:45,920 --> 00:10:41,250
a treating B healing becomes a system

259
00:10:50,319 --> 00:10:45,930
and how do we engineer that system so

260
00:10:56,389 --> 00:10:54,769
should we make a gizmo now I'm not going

261
00:10:57,680 --> 00:10:56,399
to know I'm not going to give you the

262
00:10:58,910 --> 00:10:57,690
answer by the end of today because I

263
00:11:02,269 --> 00:10:58,920

don't know the answer I'm just showing

264
00:11:03,740 --> 00:11:02,279
you a line of research so in order to

265
00:11:04,870 --> 00:11:03,750
make this work you got to be able to

266
00:11:08,769 --> 00:11:04,880
store it

267
00:11:12,980 --> 00:11:08,779
and you got to be able to access it and

268
00:11:16,400 --> 00:11:12,990
the storing seems to occur in both

269
00:11:20,420 --> 00:11:16,410
biology and stuff stuff is a technical

270
00:11:22,970 --> 00:11:20,430
word so from biology and this is from a

271
00:11:24,560 --> 00:11:22,980
whole boatload of experiments no mouse

272
00:11:26,150 --> 00:11:24,570
has ever had a recurrence of cancer

273
00:11:29,690 --> 00:11:26,160
we're talking hundreds and hundreds of

274
00:11:32,120 --> 00:11:29,700
mice they're immune to repeated

275
00:11:35,150 --> 00:11:32,130
reinjection z' of the cancer now that's

276
00:11:37,610 --> 00:11:35,160
reasonably interesting an infected mouse

277
00:11:40,970 --> 00:11:37,620
can be cured by cell transplantation

278
00:11:43,850 --> 00:11:40,980
from a treated Mouse that's reasonably

279
00:11:46,699 --> 00:11:43,860
interesting we can kill the cell line so

280
00:11:48,949 --> 00:11:46,709
it no longer seeds forward that's

281
00:11:51,440 --> 00:11:48,959
reasonably interesting and maybe who

282
00:11:52,389 --> 00:11:51,450
knows and this is speculation gotta get

283
00:11:56,389 --> 00:11:52,399
my pointer

284
00:11:58,400 --> 00:11:56,399
maybe it's an immune response maybe it's

285
00:12:01,760 --> 00:11:58,410
a cell signaling problem maybe it's I

286
00:12:03,650 --> 00:12:01,770
don't know but I can make a distinction

287
00:12:05,930 --> 00:12:03,660
here between basic questions I'd like to

288
00:12:07,550 --> 00:12:05,940

know is the cancer being cured by mu not

289
00:12:09,680 --> 00:12:07,560
through immunology is it being cured

290
00:12:11,150 --> 00:12:09,690
through a B C or D these are basic

291
00:12:13,100 --> 00:12:11,160
questions but even if we don't have the

292
00:12:14,510 --> 00:12:13,110
answer to the basic questions can we

293
00:12:16,790 --> 00:12:14,520
reverse-engineer it anyway

294
00:12:19,880 --> 00:12:16,800
I don't know how aspirin works but if

295
00:12:21,910 --> 00:12:19,890
you take it this happens so a basic

296
00:12:24,740 --> 00:12:21,920
question versus an applied question I

297
00:12:27,769 --> 00:12:24,750
I'm in favor of both but right now I'm

298
00:12:28,910 --> 00:12:27,779
seeing the applied question so even if

299
00:12:31,069 --> 00:12:28,920
you don't know what we're doing can we

300
00:12:35,389 --> 00:12:31,079
reverse engineer it so you can do this

301
00:12:37,790 --> 00:12:35,399
for example you take a mouse this mouse

302
00:12:42,019 --> 00:12:37,800
has been treated by the by the healing

303
00:12:43,819 --> 00:12:42,029
stuff and you take some cells you take

304
00:12:47,060 --> 00:12:43,829
some blood you put it in an untreated

305
00:12:49,389 --> 00:12:47,070
mouse with no healing and you'll cure it

306
00:12:51,769 --> 00:12:49,399
now that's reasonably interesting

307
00:12:53,930 --> 00:12:51,779
something's going on biologically that

308
00:12:57,710 --> 00:12:53,940
stores it and it apparently could be

309
00:13:00,050 --> 00:12:57,720
passed from mammal to mammal it can be

310
00:13:02,030 --> 00:13:00,060
passed from cell to cell can we turn

311
00:13:03,620 --> 00:13:02,040
that into something that can be applied

312
00:13:07,670 --> 00:13:03,630
even if we don't understand everything

313
00:13:10,639 --> 00:13:07,680

that's going on that's the question so

314
00:13:13,340 --> 00:13:10,649
what happens if we apply healing to

315
00:13:15,439 --> 00:13:13,350
materials so I'm going to give you just

316
00:13:17,810 --> 00:13:15,449
some real quick stuff on cell medium

317
00:13:18,940 --> 00:13:17,820
these are other experiments and treated

318
00:13:21,710 --> 00:13:18,950
water

319
00:13:25,250 --> 00:13:21,720
so what happens if instead of treating

320
00:13:27,800 --> 00:13:25,260
cage of mice you treat a bunch of cell

321
00:13:31,490 --> 00:13:27,810
media so this is the stuff in which

322
00:13:33,680 --> 00:13:31,500
cells are going to be grown well it

323
00:13:36,350 --> 00:13:33,690
turns out that if you apply this the

324
00:13:38,600 --> 00:13:36,360
treated cell media to cells stuff

325
00:13:41,060 --> 00:13:38,610
happens and I'm talking not subtle stuff

326
00:13:44,210 --> 00:13:41,070
happens on the order of depends on the

327
00:13:45,740 --> 00:13:44,220
experiment six hundred percent change so

328
00:13:49,330 --> 00:13:45,750
these are not little teeny subtle

329
00:13:52,970 --> 00:13:49,340
effects what happens if you treat water

330
00:13:56,930 --> 00:13:52,980
well if you treat water and you give the

331
00:13:59,510 --> 00:13:56,940
water to mice the mice get cured now

332
00:14:04,540 --> 00:13:59,520
that's reasonably interesting also so

333
00:14:06,740 --> 00:14:04,550
what's happening to the water but and

334
00:14:08,570 --> 00:14:06,750
here comes the difference between the

335
00:14:12,440 --> 00:14:08,580
basic question and the applied question

336
00:14:16,970 --> 00:14:12,450
on a basic level is that immunology is

337
00:14:17,960 --> 00:14:16,980
it is it is it is it basic question

338
00:14:20,210 --> 00:14:17,970

wants to know what's the pattern what's

339
00:14:23,240 --> 00:14:20,220
going on we have methodological

340
00:14:26,750 --> 00:14:23,250
confounds and resonant bonding resonant

341
00:14:30,560 --> 00:14:26,760
bonding means that in our experiments

342
00:14:34,360 --> 00:14:30,570
mice seem to get bonded if I treat one

343
00:14:39,380 --> 00:14:36,500
physically separate mice seem to get

344
00:14:41,600 --> 00:14:39,390
better if they're in our experiment now

345
00:14:44,690 --> 00:14:41,610
I could segue this into a discussion of

346
00:14:47,450 --> 00:14:44,700
a placebos different different talk and

347
00:14:51,620 --> 00:14:47,460
I'm reasonably certain that I understand

348
00:14:53,360 --> 00:14:51,630
that placebos are not psychological of a

349
00:14:55,100 --> 00:14:53,370
sequence of experiments that'll that'll

350
00:14:57,200 --> 00:14:55,110
parse this out but I'm reasonably

351
00:14:58,970 --> 00:14:57,210
certain see placebos are psychological

352
00:15:01,130 --> 00:14:58,980
they're an actual physical resonant

353
00:15:04,100 --> 00:15:01,140
bonding between spatially separate

354
00:15:05,960 --> 00:15:04,110
groups if I take a group of people and I

355
00:15:08,060 --> 00:15:05,970
have half here you got a half chance to

356
00:15:10,310 --> 00:15:08,070
get in the stimulus you folks have a

357
00:15:12,590 --> 00:15:10,320
half chance of getting a stimulus and I

358
00:15:15,080 --> 00:15:12,600
give you a stimulus everybody's going to

359
00:15:17,120 --> 00:15:15,090
be affected and the larger the group the

360
00:15:18,680 --> 00:15:17,130
stronger the effect will be and I can go

361
00:15:21,230 --> 00:15:18,690
into all sorts of stuff about placebos

362
00:15:25,190 --> 00:15:21,240
about that it's interesting it happens

363
00:15:26,510 --> 00:15:25,200

in our experiments so some people call

364
00:15:27,770 --> 00:15:26,520
this entanglement I don't like

365
00:15:31,340 --> 00:15:27,780
entanglement

366
00:15:31,970 --> 00:15:31,350
I like resonant bonding so if I take a

367
00:15:34,040 --> 00:15:31,980
bunch of

368
00:15:36,020 --> 00:15:34,050
mice and some become randomly controls

369
00:15:38,120 --> 00:15:36,030
and some become other controls and some

370
00:15:39,530 --> 00:15:38,130
become and some become it seems that a

371
00:15:42,290 --> 00:15:39,540
treatment to one is a treatment to all

372
00:15:45,260 --> 00:15:42,300
and it's an interesting basic question

373
00:15:47,570 --> 00:15:45,270
how organisms become bonded that's not

374
00:15:49,910 --> 00:15:47,580
the point here it's simply saying that

375
00:15:52,340 --> 00:15:49,920
for our purposes today they do become

376
00:15:53,810 --> 00:15:52,350
bonded they can become bonded and the

377
00:15:56,780 --> 00:15:53,820
patterns are pretty interesting in and

378
00:15:58,610 --> 00:15:56,790
of themselves now if you if you bond

379
00:16:00,680 --> 00:15:58,620
groups let's say you're doing

380
00:16:03,920 --> 00:16:00,690
traditional pharmacology and I'm testing

381
00:16:05,450 --> 00:16:03,930
drug X and so half the people are

382
00:16:07,430 --> 00:16:05,460
getting the drug and half the people are

383
00:16:09,590 --> 00:16:07,440
getting a placebo well what happens if

384
00:16:11,660 --> 00:16:09,600
the people get in the placebo are also

385
00:16:13,910 --> 00:16:11,670
bonded to the people getting the active

386
00:16:15,230 --> 00:16:13,920
drug and they all have an effect will

387
00:16:16,660 --> 00:16:15,240
the end of that study there's going to

388
00:16:19,700 --> 00:16:16,670

be no difference between the two groups

389
00:16:22,700 --> 00:16:19,710
when act in actuality both groups have

390
00:16:24,950 --> 00:16:22,710
been treated if you come to the

391
00:16:26,330 --> 00:16:24,960
statistical conclusion if there's no

392
00:16:28,580 --> 00:16:26,340
difference between the two and therefore

393
00:16:30,980 --> 00:16:28,590
and you'll say well therefore nothing

394
00:16:33,590 --> 00:16:30,990
happened that's a type two error for use

395
00:16:35,030 --> 00:16:33,600
statistical yees so it's called you

396
00:16:37,190 --> 00:16:35,040
thought nothing happened because

397
00:16:39,410 --> 00:16:37,200
something happened everywhere what

398
00:16:41,360 --> 00:16:39,420
happens if all of mice are cured and no

399
00:16:43,040 --> 00:16:41,370
mouse has ever been cured before what

400
00:16:44,930 --> 00:16:43,050
happens if all of my secured you say I'm

401
00:16:46,190 --> 00:16:44,940
nothing happened because there's no

402
00:16:48,950 --> 00:16:46,200
difference weenus than that so I'm sorry

403
00:16:52,220 --> 00:16:48,960
everybody got cured nothing there was no

404
00:16:54,350 --> 00:16:52,230
effect that's a type two error so a

405
00:16:57,890 --> 00:16:54,360
quick example here down-and-dirty

406
00:17:00,170 --> 00:16:57,900
pointer volunteers treating cages

407
00:17:02,120 --> 00:17:00,180
treating cages treating cages hundred

408
00:17:04,010 --> 00:17:02,130
meters at least a control that nobody

409
00:17:06,320 --> 00:17:04,020
who knows the technique has seen second

410
00:17:08,780 --> 00:17:06,330
controls not even known I mean people

411
00:17:12,170 --> 00:17:08,790
play tricks on each other and other labs

412
00:17:17,770 --> 00:17:12,180
going on not connected to our research

413
00:17:22,520 --> 00:17:17,780

but same cancer all of ours are cured

414
00:17:23,780 --> 00:17:22,530
this drives incidentally Rupert crazy he

415
00:17:26,420 --> 00:17:23,790
and I have been going after each other

416
00:17:29,330 --> 00:17:26,430
for 15 years so I love his ideas but it

417
00:17:32,030 --> 00:17:29,340
don't quite apply to this the the

418
00:17:34,310 --> 00:17:32,040
connection the the resonance is a little

419
00:17:36,620 --> 00:17:34,320
bit more selective than a generic if you

420
00:17:37,910 --> 00:17:36,630
go to a general field effect then

421
00:17:41,030 --> 00:17:37,920
everything in between would have been

422
00:17:43,430 --> 00:17:41,040
affected this is not a field effect of

423
00:17:46,600 --> 00:17:43,440
this I mean like again I got gobs of

424
00:17:51,009 --> 00:17:46,610
data healing is not a field effect

425
00:17:53,419 --> 00:17:51,019
so the resonant bonds appear to be fluid

426
00:17:54,919 --> 00:17:53,429
you can make bonds you can break bonds

427
00:17:56,480 --> 00:17:54,929
everybody here has felt a connection to

428
00:17:58,850 --> 00:17:56,490
something everybody's felt a lack of

429
00:18:00,680 --> 00:17:58,860
connection to something I connect to the

430
00:18:02,810 --> 00:18:00,690
table I love this table then tomorrow I

431
00:18:06,139 --> 00:18:02,820
hate this table what changed not the

432
00:18:08,350 --> 00:18:06,149
table the bond I have to the table and

433
00:18:10,669 --> 00:18:08,360
now just same thing with my goldfish

434
00:18:14,990 --> 00:18:10,679
which is harder because because I don't

435
00:18:18,200 --> 00:18:15,000
have one but it's so from a basic point

436
00:18:21,080 --> 00:18:18,210
of view it's a really good series of

437
00:18:23,090 --> 00:18:21,090
questions why did the water do it was it

438
00:18:25,100 --> 00:18:23,100

the water itself or was it resonant

439
00:18:28,820 --> 00:18:25,110
bonding was it or was it resonant

440
00:18:31,220 --> 00:18:28,830
bonding these are basic questions but

441
00:18:33,889 --> 00:18:31,230
the bottom line is whether we understand

442
00:18:36,230 --> 00:18:33,899
the mechanism how I got from A to B the

443
00:18:38,029 --> 00:18:36,240
damn stuff still gets cured and can I

444
00:18:39,289 --> 00:18:38,039
reverse engineer it so again I'm making

445
00:18:42,799 --> 00:18:39,299
the difference between a basic question

446
00:18:46,159 --> 00:18:42,809
and an applied question basic questions

447
00:18:48,499 --> 00:18:46,169
are important like questions let's pay a

448
00:18:50,090 --> 00:18:48,509
little more attention to them so

449
00:18:51,919 --> 00:18:50,100
basically I don't know how this stuff

450
00:18:54,889 --> 00:18:51,929
happens was it the treated water or was

451
00:18:58,430 --> 00:18:54,899
it resonant bonding I don't know but the

452
00:19:00,379 --> 00:18:58,440
question remains can we store it even if

453
00:19:02,690 --> 00:19:00,389
we don't understand it and can we

454
00:19:06,529 --> 00:19:02,700
reproduce the effect and can we scale it

455
00:19:09,470 --> 00:19:06,539
up reasonable question here's from my

456
00:19:11,779 --> 00:19:09,480
partners in crime John McMichael who

457
00:19:15,560 --> 00:19:11,789
will speak in the afternoon is doing the

458
00:19:16,190 --> 00:19:15,570
biological stuff his data you come back

459
00:19:18,919 --> 00:19:16,200
this afternoon

460
00:19:22,369 --> 00:19:18,929
you're gonna flop on the floor his stuff

461
00:19:24,379 --> 00:19:22,379
is so he's one of my partners in crime

462
00:19:26,720 --> 00:19:24,389
he may be arrested before he gets up

463
00:19:30,649 --> 00:19:26,730

here my other partner in crime will also

464
00:19:32,299 --> 00:19:30,659
be talking right after me Dean thinks

465
00:19:34,310 --> 00:19:32,309
I'm crazy keeps taking my temperature I

466
00:19:36,139 --> 00:19:34,320
don't know what that's about so you know

467
00:19:38,119 --> 00:19:36,149
when I saw I come in there I make a sin

468
00:19:40,999 --> 00:19:38,129
and he goes up to open your mouth

469
00:19:43,850 --> 00:19:41,009
because he is sick lovely blip you know

470
00:19:46,159 --> 00:19:43,860
like that so one has an obsession with a

471
00:19:48,529 --> 00:19:46,169
thermometer and one but anyway so we do

472
00:19:49,850 --> 00:19:48,539
the physics and engineering and we do

473
00:19:53,720 --> 00:19:49,860
the biology and we're trying to figure

474
00:19:56,359 --> 00:19:53,730
this out so if we think about this it

475
00:19:57,830 --> 00:19:56,369
seems the biological has a lot going for

476
00:19:59,360 --> 00:19:57,840
it you can take stuff out you can

477
00:20:03,860 --> 00:19:59,370
transplant it and it'll

478
00:20:07,010 --> 00:20:03,870
reproduce the cure but yeah what if what

479
00:20:08,750 --> 00:20:07,020
if we make a cancer vaccine does that

480
00:20:12,650 --> 00:20:08,760
sound like a good thing I mean I'm not

481
00:20:14,240 --> 00:20:12,660
being facetious and from a basic science

482
00:20:15,890 --> 00:20:14,250
perspective yet it's a wonderful thing

483
00:20:18,890 --> 00:20:15,900
but then what would I do with it

484
00:20:20,690 --> 00:20:18,900
so I think I'll go to the FDA and go hey

485
00:20:22,640 --> 00:20:20,700
I did some hocus-pocus and now I have a

486
00:20:24,590 --> 00:20:22,650
cancer vaccine you know can I do you

487
00:20:27,799 --> 00:20:24,600
mind if I inject this into everybody you

488
00:20:30,110 --> 00:20:27,809

know and they'll go oh please you know

489
00:20:32,570 --> 00:20:30,120
by all means and and so there may be a

490
00:20:36,310 --> 00:20:32,580
roadblock or two if the solution becomes

491
00:20:39,770 --> 00:20:36,320
biological however what happens if it's

492
00:20:43,820 --> 00:20:39,780
what if we can record it and play it

493
00:20:46,790 --> 00:20:43,830
back and it reproduces that that would

494
00:20:48,560 --> 00:20:46,800
be kind of cool yes so what has more

495
00:20:50,419 --> 00:20:48,570
likelihood of succeeding probably the

496
00:20:55,520 --> 00:20:50,429
biological which is cooler the physical

497
00:20:58,940 --> 00:20:55,530
because if we get a healer app and we

498
00:21:01,600 --> 00:20:58,950
upload it into the cloud and now we can

499
00:21:03,610 --> 00:21:01,610
say we don't understand how it works but

500
00:21:06,100 --> 00:21:03,620
you want to be cured

501
00:21:09,410 --> 00:21:06,110
we're okay what do you do or you don't

502
00:21:12,250 --> 00:21:09,420
go ahead criticize the methodology and

503
00:21:14,750 --> 00:21:12,260
so this is where I'm shooting for first

504
00:21:18,290 --> 00:21:14,760
so the physical solution is more

505
00:21:20,270 --> 00:21:18,300
scalable it's more easy the FDA can't do

506
00:21:22,669 --> 00:21:20,280
anything let's let's start to upload

507
00:21:24,200 --> 00:21:22,679
some cures into the cloud and see what

508
00:21:26,390 --> 00:21:24,210
happens and give it away would it be fun

509
00:21:29,180 --> 00:21:26,400
undermining industry apologies to any

510
00:21:32,360 --> 00:21:29,190
oncologist here so here's how we're

511
00:21:34,340 --> 00:21:32,370
starting we're using cotton

512
00:21:36,560 --> 00:21:34,350
well we've also used a little water and

513
00:21:38,630 --> 00:21:36,570

sometimes crystals but the question is

514
00:21:40,669 --> 00:21:38,640
well the reason for cotton is

515
00:21:42,560 --> 00:21:40,679
anecdotally and also experimentally

516
00:21:44,360 --> 00:21:42,570
going back to the great grad at McGill

517
00:21:47,150 --> 00:21:44,370
University a half-century ago

518
00:21:51,530 --> 00:21:47,160
cotton seems to be a very good storage

519
00:21:52,610 --> 00:21:51,540
vehicle basic question why what happens

520
00:21:54,799 --> 00:21:52,620
if you put it under an electron

521
00:21:58,100 --> 00:21:54,809
microscope what happens if all basic

522
00:22:00,350 --> 00:21:58,110
questions but cotton seems to work now I

523
00:22:02,510 --> 00:22:00,360
go to the practical so if I take a piece

524
00:22:04,310 --> 00:22:02,520
of cotton and do whatever and then Mark

525
00:22:06,710 --> 00:22:04,320
takes it and he gives it to Roger and

526
00:22:08,210 --> 00:22:06,720
then Roger cuts and gives it and and so

527
00:22:10,400 --> 00:22:08,220
we got anecdote upon anecdote that

528
00:22:11,760 --> 00:22:10,410
cotton is interesting and we have some

529
00:22:13,460 --> 00:22:11,770
pretty interesting

530
00:22:16,080 --> 00:22:13,470
data of coming grad at McGill University

531
00:22:18,570 --> 00:22:16,090
that cotton seems to be very very good

532
00:22:21,090 --> 00:22:18,580
at storing so the question is if we

533
00:22:22,320 --> 00:22:21,100
start putzing with cotton and we're

534
00:22:29,370 --> 00:22:22,330
hoping we're asking the right questions

535
00:22:33,630 --> 00:22:29,380
can biology recognize charge cotton can

536
00:22:35,820 --> 00:22:33,640
gizmos recognize charge cotton so if I

537
00:22:38,340 --> 00:22:35,830
charge cotton and I put it in your

538
00:22:39,480 --> 00:22:38,350

biological stuff will they know can they

539
00:22:40,920 --> 00:22:39,490
tell the difference being charged and

540
00:22:44,580 --> 00:22:40,930
uncharged and then of course can we

541
00:22:46,170 --> 00:22:44,590
extract the stuff can get Mo's recognize

542
00:22:46,680 --> 00:22:46,180
charge cotton and Dean's can address

543
00:22:51,000 --> 00:22:46,690
that

544
00:22:52,410 --> 00:22:51,010
he's the gizmo guy and does it make a

545
00:22:55,290 --> 00:22:52,420
difference and this is a methodological

546
00:22:56,700 --> 00:22:55,300
question if there's a healing need see I

547
00:22:58,380 --> 00:22:56,710
don't think healing is pk

548
00:23:00,930 --> 00:22:58,390
I think healing comes from the Healey

549
00:23:02,490 --> 00:23:00,940
and it depends on the idiosyncratic

550
00:23:04,500 --> 00:23:02,500
needs of the moment which is why you

551
00:23:06,570 --> 00:23:04,510
want to do cotton rather than what

552
00:23:08,090 --> 00:23:06,580
happens between healer and Healey what

553
00:23:10,020 --> 00:23:08,100
happens when the healer in Helius is

554
00:23:11,550 --> 00:23:10,030
interesting but not relevant to this

555
00:23:14,790 --> 00:23:11,560
because that depends on the

556
00:23:17,280 --> 00:23:14,800
idiosyncrasies of the Healey cotton

557
00:23:19,770 --> 00:23:17,290
seems to be universal donor you want to

558
00:23:21,570 --> 00:23:19,780
find out what happens take cotton find

559
00:23:23,210 --> 00:23:21,580
out what it is give it to someone and

560
00:23:25,110 --> 00:23:23,220
then do a subtraction problem

561
00:23:27,810 --> 00:23:25,120
technically very difficult but

562
00:23:29,700 --> 00:23:27,820
conceptually I think it makes sense so

563
00:23:31,410 --> 00:23:29,710

healing seems to happen if there's a

564
00:23:33,180 --> 00:23:31,420
need I got experiments with functional

565
00:23:34,950 --> 00:23:33,190
MRIs and EEG s and all that stuff

566
00:23:36,540 --> 00:23:34,960
showing that the healing happens

567
00:23:38,040 --> 00:23:36,550
virtually automatically regardless of

568
00:23:39,390 --> 00:23:38,050
your state of mind you don't need to get

569
00:23:41,940 --> 00:23:39,400
into a particular state of mind to heal

570
00:23:45,330 --> 00:23:41,950
you just have to okay take it take

571
00:23:50,550 --> 00:23:45,340
whatever you need but it depends on the

572
00:23:51,690 --> 00:23:50,560
need is there a need so needs seems to

573
00:23:54,690 --> 00:23:51,700
matter I'm going to show you just

574
00:23:58,560 --> 00:23:54,700
something really interesting sidebar

575
00:24:01,350 --> 00:23:58,570
here in my experiments mice and cells

576
00:24:03,350 --> 00:24:01,360
but mice will go to your left hand

577
00:24:05,640 --> 00:24:03,360
everybody this is an interesting sidebar

578
00:24:09,990 --> 00:24:05,650
everybody in my healing technique

579
00:24:11,330 --> 00:24:10,000
becomes left-handed curious but worth

580
00:24:14,700 --> 00:24:11,340
exploring

581
00:24:17,139 --> 00:24:14,710
everybody's left-handed by the end of

582
00:24:19,209 --> 00:24:17,149
learning how to cure

583
00:24:22,329 --> 00:24:19,219
so the mites will also go to your left

584
00:24:24,159 --> 00:24:22,339
hand but only if there's a need little

585
00:24:26,409 --> 00:24:24,169
kids will do this two dogs will do this

586
00:24:27,519 --> 00:24:26,419
cats will do this so if you hold out

587
00:24:29,619 --> 00:24:27,529
your hands they're going to go to a

588
00:24:30,759 --> 00:24:29,629

particular spot on your left hand and it

589
00:24:33,099 --> 00:24:30,769
doesn't make any difference really what

590
00:24:34,899 --> 00:24:33,109
you have so here's an example we spin

591
00:24:37,180 --> 00:24:34,909
the cage mice don't like that and then

592
00:24:38,499 --> 00:24:37,190
you put your hands down and they'll go

593
00:24:39,539 --> 00:24:38,509
to this spot and I'll actually take

594
00:24:41,769 --> 00:24:39,549
turns

595
00:24:44,049 --> 00:24:41,779
once they're cured they don't have no

596
00:24:45,279 --> 00:24:44,059
interest in you whatsoever nor have I

597
00:24:48,399 --> 00:24:45,289
ever gotten to thank you note from a

598
00:24:51,029 --> 00:24:48,409
mouse which is probably appropriate

599
00:24:53,950 --> 00:24:51,039
because I gave them the cancer but it is

600
00:24:55,119 --> 00:24:53,960
so so this is this is actually what

601
00:24:57,549 --> 00:24:55,129
happens and it doesn't make a difference

602
00:24:58,989 --> 00:24:57,559
what kind of Mouse you're doing what

603
00:25:01,899 --> 00:24:58,999
kind of cancer you're doing so this

604
00:25:05,649 --> 00:25:01,909
works with cancer a cancer be cancer see

605
00:25:08,409 --> 00:25:05,659
kid a kid be kid see dog a dog be dog

606
00:25:10,539 --> 00:25:08,419
see everybody but adults can recognize

607
00:25:12,459 --> 00:25:10,549
that healing is a left hand phenomenon

608
00:25:17,529 --> 00:25:12,469
and that they know when to go for it if

609
00:25:18,879 --> 00:25:17,539
they need it if you're old and you start

610
00:25:20,499 --> 00:25:18,889
to learn what you're supposed to do

611
00:25:24,310 --> 00:25:20,509
rather than paying attention to what

612
00:25:27,039 --> 00:25:24,320
naturally happens so here are some

613
00:25:29,079 --> 00:25:27,049

studies with Cottonelle these are all

614
00:25:32,440 --> 00:25:29,089
pilots these are all preliminary and

615
00:25:35,680 --> 00:25:32,450
we're seeing what happens so we did as

616
00:25:39,159 --> 00:25:35,690
we taped some cotton to the bottom of a

617
00:25:40,329 --> 00:25:39,169
mouse cage we don't know the dose we

618
00:25:41,649 --> 00:25:40,339
don't know how big the cotton should be

619
00:25:43,450 --> 00:25:41,659
we don't know how long it should live

620
00:25:44,799 --> 00:25:43,460
there we should we don't we don't know I

621
00:25:47,259 --> 00:25:44,809
mean we don't know a lot of stuff but

622
00:25:51,070 --> 00:25:47,269
just throw in cotton at the mouse what

623
00:25:53,739 --> 00:25:51,080
happens it did not cure the mice so just

624
00:25:55,479 --> 00:25:53,749
throwing cotton at the mice now we have

625
00:25:57,399 --> 00:25:55,489
some questions about dose we have some

626
00:25:59,169 --> 00:25:57,409
questions about size we have some quell

627
00:26:01,839 --> 00:25:59,179
mean we have a lot of questions but at

628
00:26:03,940 --> 00:26:01,849
least in our prelim didn't work so the

629
00:26:06,519 --> 00:26:03,950
the invivo stuff the right all out of

630
00:26:08,889 --> 00:26:06,529
the gate can do animals the cancerous

631
00:26:11,109 --> 00:26:08,899
animals recognize charge cotton if the

632
00:26:14,019 --> 00:26:11,119
recognition of charge cotton is is

633
00:26:16,060 --> 00:26:14,029
operationalized by are you cured no we

634
00:26:19,180 --> 00:26:16,070
didn't get a cure yet hopefully we'll

635
00:26:22,479 --> 00:26:19,190
get a cure down the road if we do this

636
00:26:25,509 --> 00:26:22,489
to sell cell growth and this is with no

637
00:26:29,889 --> 00:26:25,519
healing need details don't matter and we

638
00:26:30,700 --> 00:26:29,899

just kind of tape cotton to cells and we

639
00:26:34,090 --> 00:26:30,710
do

640
00:26:37,960 --> 00:26:34,100
they grow differently no healing need no

641
00:26:40,720 --> 00:26:37,970
difference and frankly if you're into

642
00:26:42,850 --> 00:26:40,730
the mindset of does need there be a

643
00:26:43,930 --> 00:26:42,860
healing need that kind of makes sense if

644
00:26:46,630 --> 00:26:43,940
you don't need anything what are you

645
00:26:47,860 --> 00:26:46,640
taking what's the point so cells grow

646
00:26:50,320 --> 00:26:47,870
but they don't really care whether

647
00:26:56,350 --> 00:26:50,330
Cotton's there but what if there's a

648
00:27:02,139 --> 00:26:56,360
need what if we wound them and then put

649
00:27:05,669 --> 00:27:02,149
cotton and here you have effects so

650
00:27:10,419 --> 00:27:05,679
cells use is very loose conceptually

651
00:27:14,950 --> 00:27:10,429
cells with a need can recognize what a

652
00:27:17,799 --> 00:27:14,960
cotton is charged or not cells without a

653
00:27:23,440 --> 00:27:17,809
need can't tell whether cotton is

654
00:27:24,220 --> 00:27:23,450
charged or not and the details here I'm

655
00:27:26,680 --> 00:27:24,230
just saying

656
00:27:28,440 --> 00:27:26,690
stuff happens details you know will work

657
00:27:31,690 --> 00:27:28,450
out and all that kind of thing

658
00:27:35,230 --> 00:27:31,700
healing need what happens if we take

659
00:27:38,200 --> 00:27:35,240
Yuman breast cancer and expose them to

660
00:27:40,090 --> 00:27:38,210
charge cotton is there any change so we

661
00:27:43,180 --> 00:27:40,100
let's start moving down and seeing what

662
00:27:45,370 --> 00:27:43,190
what happens here well it turns out six

663
00:27:49,210 --> 00:27:45,380

genes have significant changes they can

664
00:27:52,779 --> 00:27:49,220
recognize whether cotton is charged now

665
00:27:55,149 --> 00:27:52,789
that's reasonably interesting so you put

666
00:27:57,159 --> 00:27:55,159
regular old cotton off the shelf and and

667
00:28:00,970 --> 00:27:57,169
you know that's fine but if you put

668
00:28:04,480 --> 00:28:00,980
cotton charged cotton to a cell a cancer

669
00:28:08,110 --> 00:28:04,490
cell it it responds so the witness if

670
00:28:10,360 --> 00:28:08,120
you will is a cell in need the cells not

671
00:28:13,180 --> 00:28:10,370
need seems less likely to be able to

672
00:28:18,310 --> 00:28:13,190
witness whether or not healing is being

673
00:28:19,720 --> 00:28:18,320
offered reasonably interesting so now we

674
00:28:21,340 --> 00:28:19,730
can turn the question which I'm only

675
00:28:23,919 --> 00:28:21,350
going to skirt very quickly here because

676
00:28:25,810 --> 00:28:23,929
beans going to take it up is there a

677
00:28:28,029 --> 00:28:25,820
detectable difference in the signal

678
00:28:29,680 --> 00:28:28,039
between treated and untreated cotton so

679
00:28:32,139 --> 00:28:29,690
now instead of looking at can a cell

680
00:28:33,639 --> 00:28:32,149
recognize it or can a mouse recognize it

681
00:28:37,210 --> 00:28:33,649
now the question is can a gizmo

682
00:28:40,149 --> 00:28:37,220
recognize it the gizmos can gizmos tell

683
00:28:42,340 --> 00:28:40,159
whether cotton or water or crystals have

684
00:28:44,499 --> 00:28:42,350
been charged or not and then of course

685
00:28:45,999 --> 00:28:44,509
the follow-up would be can we catch

686
00:28:47,649 --> 00:28:46,009
sure it and can we see if we can

687
00:28:53,589 --> 00:28:47,659
reproduce it with the the thing we

688
00:28:55,989 --> 00:28:53,599

capture so here we bring out the 18 so

689
00:28:58,569 --> 00:28:55,999
fortunately in ions we had superheroes

690
00:29:02,199 --> 00:28:58,579
present and and this did look like a job

691
00:29:05,049 --> 00:29:02,209
for Superman and so that became the the

692
00:29:06,189 --> 00:29:05,059
the situation out there we sometimes we

693
00:29:09,969 --> 00:29:06,199
have fun you know even though we're

694
00:29:11,619 --> 00:29:09,979
doing research so I'm just gonna gloss

695
00:29:13,619 --> 00:29:11,629
over this right quickly cuz Dean's gonna

696
00:29:16,930 --> 00:29:13,629
be focused on it but we've got his

697
00:29:19,029 --> 00:29:16,940
shielded cage in which we put cotton in

698
00:29:25,269 --> 00:29:19,039
which we charge cotton in which we do

699
00:29:27,069 --> 00:29:25,279
various things and I leave you and not

700
00:29:29,309 --> 00:29:27,079
leave you but here's the question does

701
00:29:33,309 --> 00:29:29,319
it matter whether the detector is alive

702
00:29:35,619 --> 00:29:33,319
so Dean's going to talk about gizmos the

703
00:29:37,689 --> 00:29:35,629
gizmos presumably aren't alive in the

704
00:29:38,889 --> 00:29:37,699
way we usually think about life cells

705
00:29:41,199 --> 00:29:38,899
are alive and the way we think about

706
00:29:46,419 --> 00:29:41,209
life but it's not just cells or no sells

707
00:29:50,019 --> 00:29:46,429
it sells in need mice and need biology

708
00:29:51,369 --> 00:29:50,029
and need as the detector so does it

709
00:29:53,019 --> 00:29:51,379
matter whether the detector is alive

710
00:29:56,829 --> 00:29:53,029
it's a reasonably interesting question

711
00:29:58,569 --> 00:29:56,839
now we're talking about can we record

712
00:30:00,939 --> 00:29:58,579
and I'm glossing over this because Dean

713
00:30:03,489 --> 00:30:00,949

I'll do the details but he's got a

714
00:30:06,819 --> 00:30:03,499
gazillion it's a real number a gazillion

715
00:30:08,439 --> 00:30:06,829
detectors in his cage detecting a

716
00:30:10,749 --> 00:30:08,449
variety of things which I can leave for

717
00:30:13,539 --> 00:30:10,759
him to describe detecting a variety of

718
00:30:16,329 --> 00:30:13,549
things and basically the plot is here's

719
00:30:20,649 --> 00:30:16,339
some cotton so if we're in there charged

720
00:30:24,819 --> 00:30:20,659
in cotton and he's got every detector on

721
00:30:28,569 --> 00:30:24,829
the planet going can we take that

722
00:30:32,109 --> 00:30:28,579
recording and play that recording to

723
00:30:36,399 --> 00:30:32,119
cells in need can we play that recording

724
00:30:38,579 --> 00:30:36,409
to mice in need will that reproduce the

725
00:30:40,779 --> 00:30:38,589
phenomenon and that becomes the question

726
00:30:43,869 --> 00:30:40,789
know the odds of us getting in the first

727
00:30:45,639 --> 00:30:43,879
run you know I'm great but and so will

728
00:30:47,289 --> 00:30:45,649
exposure to these recordings so we've

729
00:30:48,519 --> 00:30:47,299
made our first recording so I'm going to

730
00:30:49,739 --> 00:30:48,529
just tell you something real quick I

731
00:30:51,200 --> 00:30:49,749
still got a couple minutes

732
00:30:53,299 --> 00:30:51,210
the

733
00:30:55,250 --> 00:30:53,309
I'm gonna offer Dean and I are both

734
00:30:57,169 --> 00:30:55,260
gonna offer this to anybody who wants to

735
00:30:58,880 --> 00:30:57,179
hear the recording so at lunch we

736
00:31:01,279 --> 00:30:58,890
normally have lunch from 12:30 to 2:00

737
00:31:02,990 --> 00:31:01,289
we're gonna set this thing up so if you

738
00:31:05,360 --> 00:31:03,000

want to hear some of our recordings and

739
00:31:08,750 --> 00:31:05,370
see if you stop flopping on the floor if

740
00:31:09,950 --> 00:31:08,760
in and we're gonna play it at 1:30 so if

741
00:31:12,139 --> 00:31:09,960
you come back it you want to come back

742
00:31:13,519 --> 00:31:12,149
in half hour early from lunch you can

743
00:31:15,440 --> 00:31:13,529
experience we're gonna put them over the

744
00:31:17,840 --> 00:31:15,450
big speakers and you know we probably

745
00:31:20,450 --> 00:31:17,850
lose happier but you know it's for

746
00:31:22,850 --> 00:31:20,460
science but so if you want to hear this

747
00:31:24,169 --> 00:31:22,860
that they will see if we have any

748
00:31:26,240 --> 00:31:24,179
miracle cures and all that kind of stuff

749
00:31:27,649 --> 00:31:26,250
so the question is will exposure to

750
00:31:30,380 --> 00:31:27,659
these recordings reproduce the

751
00:31:31,909 --> 00:31:30,390
biological responses so it's pretty

752
00:31:33,440 --> 00:31:31,919
exciting we're starting to play people

753
00:31:35,990 --> 00:31:33,450
are flopping on the floor but we have

754
00:31:37,880 --> 00:31:36,000
not yet done a formal study on whether

755
00:31:40,970 --> 00:31:37,890
the recordings will reproduce this in

756
00:31:42,260 --> 00:31:40,980
cells or animals with need and will it

757
00:31:45,019 --> 00:31:42,270
make a difference whether they have need

758
00:31:46,970 --> 00:31:45,029
or not need that's starting in I hope we

759
00:31:52,519 --> 00:31:46,980
hope early September we should have the

760
00:31:55,159 --> 00:31:52,529
answer by the end of October something

761
00:31:57,019 --> 00:31:55,169
along so this is a work in progress and

762
00:31:59,630 --> 00:31:57,029
again my point has been to make a

763
00:32:05,090 --> 00:31:59,640

distinction between the basic questions

764
00:32:07,899 --> 00:32:05,100
all beautiful but let's move on let's

765
00:32:11,450 --> 00:32:07,909
start to apply this stuff it's a

766
00:32:12,590 --> 00:32:11,460
ridiculous question does healing happen

767
00:32:16,519 --> 00:32:12,600
give me a break

768
00:32:18,139 --> 00:32:16,529
that's just not interesting the basic

769
00:32:20,899 --> 00:32:18,149
questions behind how it happens are

770
00:32:23,240 --> 00:32:20,909
interesting and the applications of it

771
00:32:25,340 --> 00:32:23,250
are interesting but if there are critics

772
00:32:30,260 --> 00:32:25,350
back there go well I'm not sure about

773
00:32:31,639 --> 00:32:30,270
healing well then they're idiots I mean

774
00:32:34,310 --> 00:32:31,649
this would be like saying we need one

775
00:32:35,930 --> 00:32:34,320
more remote viewing study to see whether

776
00:32:37,820 --> 00:32:35,940
or not there's such a thing can

777
00:32:40,039 --> 00:32:37,830
consciousness affect random number

778
00:32:42,710 --> 00:32:40,049
generators well we only got thirty years

779
00:32:44,600 --> 00:32:42,720
at Princeton I think it's the 31st year

780
00:32:46,519 --> 00:32:44,610
that would convince me you know I mean

781
00:32:48,710 --> 00:32:46,529
it really sounds silly so if there's a

782
00:32:52,330 --> 00:32:48,720
critic back there goes I wonder if

783
00:32:58,370 --> 00:32:52,340
consciousness cannot get away from me

784
00:32:59,299 --> 00:32:58,380
enough already folks psy exists let's

785
00:33:00,790 --> 00:32:59,309
move on to the more interesting

786
00:33:03,880 --> 00:33:00,800
questions

787
00:33:06,460 --> 00:33:03,890
healing exists let's move on to the more

788
00:33:11,650 --> 00:33:06,470

interesting questions in this particular

789
00:33:14,140 --> 00:33:11,660
case I got half of me I think I'm

790
00:33:16,630 --> 00:33:14,150
bipolar I got half of me who's very

791
00:33:18,340 --> 00:33:16,640
interested in the basic questions but

792
00:33:28,169 --> 00:33:18,350
what the hell maybe we can make a healer

793
00:33:35,379 --> 00:33:30,759
don't take it

794
00:33:41,109 --> 00:33:35,389
I don't believe get away from me

795
00:33:42,639 --> 00:33:41,119
the I acknowledge funders I think in the

796
00:33:44,799 --> 00:33:42,649
future it'll also be the Institute for

797
00:33:47,079 --> 00:33:44,809
venture science but right now emerald

798
00:33:49,839 --> 00:33:47,089
gate Charitable Trust is funding the

799
00:33:58,029 --> 00:33:49,849
project we're working on here and I

800
00:34:00,609 --> 00:33:58,039
thank you for your attention I think you

801
00:34:03,279 --> 00:34:00,619
know some of the questions and if there

802
00:34:04,930 --> 00:34:03,289
are questions about the Giz my then I'm

803
00:34:06,669 --> 00:34:04,940
going to deflect that and then Dean will

804
00:34:10,359 --> 00:34:06,679
handle those but just in terms of the

805
00:34:12,309 --> 00:34:10,369
plot got and give me a hard time Doug

806
00:34:16,359 --> 00:34:12,319
okay I'm gonna start I admire your work

807
00:34:18,700 --> 00:34:16,369
but listen there's a rich history of

808
00:34:21,430 --> 00:34:18,710
international healing for humans and I'm

809
00:34:23,829 --> 00:34:21,440
gonna make the point heal humans are

810
00:34:25,809 --> 00:34:23,839
much more complex I have no good friend

811
00:34:28,149 --> 00:34:25,819
who's a spiritual healer we could use

812
00:34:30,069 --> 00:34:28,159
that term and he's had 30 years

813
00:34:32,319 --> 00:34:30,079

experience and it's much more

814
00:34:34,960 --> 00:34:32,329
complicated with humans I'll give you

815
00:34:36,849 --> 00:34:34,970
one example and I've done some of this

816
00:34:39,099 --> 00:34:36,859
myself you can create instantaneous

817
00:34:41,980 --> 00:34:39,109
healings for most people they don't last

818
00:34:43,990 --> 00:34:41,990
you need to do something over 20 or 30

819
00:34:45,549 --> 00:34:44,000
days something like that to get the

820
00:34:47,230 --> 00:34:45,559
intentionality because there's lots of

821
00:34:49,779 --> 00:34:47,240
other stuff going on in their own

822
00:34:51,849 --> 00:34:49,789
creating this okay if say affecting the

823
00:34:53,859 --> 00:34:51,859
field and I think if you're going to go

824
00:34:55,480 --> 00:34:53,869
forward you got to get working with some

825
00:34:58,150 --> 00:34:55,490
of the people there was a rich history

826
00:34:59,680 --> 00:34:58,160
and intentional healing what works and

827
00:35:01,569 --> 00:34:59,690
what doesn't work and I could hook you

828
00:35:04,329 --> 00:35:01,579
up the guy has 30 years experience there

829
00:35:06,039 --> 00:35:04,339
was a really interesting question and

830
00:35:08,140 --> 00:35:06,049
there's a lot of men there and then you

831
00:35:09,609 --> 00:35:08,150
don't so you keep it going but a really

832
00:35:11,799 --> 00:35:09,619
interesting question that I'm not aware

833
00:35:15,400 --> 00:35:11,809
of any studies on is comparative healing

834
00:35:17,440 --> 00:35:15,410
so for example my technique and I'm

835
00:35:19,510 --> 00:35:17,450
ducking what it is I'm not hiding it I

836
00:35:23,289 --> 00:35:19,520
just don't have time my technique does

837
00:35:26,200 --> 00:35:23,299
XY and Z and other techniques don't but

838
00:35:28,359 --> 00:35:26,210

they're better at a B and C so why is

839
00:35:30,579 --> 00:35:28,369
Healing Touch able to do this and I

840
00:35:32,529 --> 00:35:30,589
can't why can I do this but Reiki can't

841
00:35:35,370 --> 00:35:32,539
these are really interesting questions

842
00:35:37,870 --> 00:35:35,380
if we get the protocol here though

843
00:35:40,060 --> 00:35:37,880
imagine my stuff seems to work very

844
00:35:42,550 --> 00:35:40,070
strongly on cancer I don't know why

845
00:35:44,020 --> 00:35:42,560
it'll also work and do Alzheimers it'll

846
00:35:45,940 --> 00:35:44,030
also work it and I can give you a list

847
00:35:47,170 --> 00:35:45,950
of things it'll do I can also give you a

848
00:35:49,690 --> 00:35:47,180
list of things that it doesn't seem to

849
00:35:51,280 --> 00:35:49,700
do but maybe other techniques will do it

850
00:35:53,350 --> 00:35:51,290
and if we can get the protocol down and

851
00:35:58,080 --> 00:35:53,360
we can store the stuff maybe the

852
00:36:01,570 --> 00:35:58,090
application will be you take the stored

853
00:36:06,810 --> 00:36:01,580
Reiki for this take the stored for that

854
00:36:14,410 --> 00:36:10,870
get the pawn go thank you Bill

855
00:36:16,390 --> 00:36:14,420
the slides showing the breast cancer is

856
00:36:18,940 --> 00:36:16,400
that your work you know where that was

857
00:36:20,770 --> 00:36:18,950
healed with intention yeah I did I

858
00:36:23,500 --> 00:36:20,780
started clinically out of curiosity

859
00:36:26,620 --> 00:36:23,510
tried to disprove this I'm a skeptic

860
00:36:28,900 --> 00:36:26,630
okay I can't make the data stop and and

861
00:36:31,510 --> 00:36:28,910
so did so I I come from this skeptically

862
00:36:34,150 --> 00:36:31,520
and so I started out and I didn't go to

863
00:36:36,970 --> 00:36:34,160

mice until I had done several hundred

864
00:36:40,630 --> 00:36:36,980
humans so so several hundred years who I

865
00:36:42,370 --> 00:36:40,640
agree are more difficult but after

866
00:36:43,840 --> 00:36:42,380
several hundred humans who went to into

867
00:36:45,580 --> 00:36:43,850
the lamp to try to figure out what is

868
00:36:47,020 --> 00:36:45,590
this stuff because it doesn't make any

869
00:36:49,270 --> 00:36:47,030
sense and I don't believe it I

870
00:36:52,120 --> 00:36:49,280
experience it bill is that person still

871
00:36:54,490 --> 00:36:52,130
alive and what would stop them from at

872
00:36:56,110 --> 00:36:54,500
home taking a sample from themselves and

873
00:36:58,930 --> 00:36:56,120
injecting it into somebody who needed

874
00:37:02,770 --> 00:36:58,940
healing well what would stop them from

875
00:37:05,020 --> 00:37:02,780
doing that is probably sanity but it but

876
00:37:06,340 --> 00:37:05,030
as far as I'm aware and the problem with

877
00:37:09,130 --> 00:37:06,350
people is that there's a file drawer a

878
00:37:10,870 --> 00:37:09,140
problem but as far as I'm aware I mean

879
00:37:13,840 --> 00:37:10,880
in 35 years no one has ever gotten

880
00:37:16,480 --> 00:37:13,850
anything back whether you could just

881
00:37:18,790 --> 00:37:16,490
start a lock on the line of ejections I

882
00:37:21,730 --> 00:37:18,800
don't know but but that goes to will

883
00:37:24,100 --> 00:37:21,740
then you got the FDA as opposed to what

884
00:37:27,460 --> 00:37:24,110
if I hear the app you can't control the

885
00:37:29,790 --> 00:37:27,470
app again I'm not trying to fix people

886
00:37:32,830 --> 00:37:29,800
I'm trying to undermine an industry I

887
00:37:34,930 --> 00:37:32,840
really like that idea of getting around

888
00:37:37,150 --> 00:37:34,940

the FDA by not using a compound not

889
00:37:40,810 --> 00:37:37,160
using a device so it doesn't require any

890
00:37:42,970 --> 00:37:40,820
approval so good job there it hasn't

891
00:37:46,450 --> 00:37:42,980
worked yet but thank you in anticipation

892
00:37:47,920 --> 00:37:46,460
yes yeah so there's dozens of drugs on

893
00:37:49,630 --> 00:37:47,930
the market that they don't know how they

894
00:37:52,510 --> 00:37:49,640
work but they keep selling and they so

895
00:37:53,870 --> 00:37:52,520
are in our medical culture we don't know

896
00:37:56,060 --> 00:37:53,880
we don't need to know how

897
00:37:58,040 --> 00:37:56,070
something works too no but you have to

898
00:38:00,890 --> 00:37:58,050
get through certain hoops and you'll see

899
00:38:02,390 --> 00:38:00,900
again and that John McMichael stuff is

900
00:38:04,820 --> 00:38:02,400
astonishing but they're still working

901
00:38:06,020 --> 00:38:04,830
out what's the mechanism of action does

902
00:38:07,190 --> 00:38:06,030
this stuff work it's not an interesting

903
00:38:10,670 --> 00:38:07,200
question anymore

904
00:38:12,620 --> 00:38:10,680
and it's been demonstrated that animal

905
00:38:15,110 --> 00:38:12,630
models are not representative or not

906
00:38:16,820 --> 00:38:15,120
good models so what's the word you like

907
00:38:19,340 --> 00:38:16,830
you don't like entangled what's the word

908
00:38:22,370 --> 00:38:19,350
you use I use resonance resonance so

909
00:38:25,640 --> 00:38:22,380
think about what kind of results you

910
00:38:27,860 --> 00:38:25,650
might see if you're healing didn't have

911
00:38:29,480 --> 00:38:27,870
resonance with the the slaughter of all

912
00:38:31,820 --> 00:38:29,490
of these mice when it's no absolutely

913
00:38:34,520 --> 00:38:31,830

yes and and the mice work is horrible I

914
00:38:37,280 --> 00:38:34,530
agree and and we try as quickly and as

915
00:38:38,390 --> 00:38:37,290
fast and as little as you can do you try

916
00:38:40,790 --> 00:38:38,400
to get out of that stuff

917
00:38:42,620 --> 00:38:40,800
I completely agree yet so I'm not

918
00:38:45,290 --> 00:38:42,630
advocating this I'm saying I don't have

919
00:38:49,329 --> 00:38:45,300
a plan B I mean I try it you know if we

920
00:38:55,249 --> 00:38:52,670
sorry yes bill this wonderful research

921
00:38:57,170 --> 00:38:55,259
and it's I'm really happy to see that

922
00:38:59,720 --> 00:38:57,180
you're pursuing this I just had a

923
00:39:02,239 --> 00:38:59,730
question are you going to be testing the

924
00:39:04,609 --> 00:39:02,249
the recordings you know using analog

925
00:39:06,319 --> 00:39:04,619
recorders as well as digital because

926
00:39:08,210 --> 00:39:06,329
there may be some things that analogs

927
00:39:10,460 --> 00:39:08,220
will pick up that digital screens

928
00:39:13,640 --> 00:39:10,470
recordings or Dean's recordings are

929
00:39:14,989 --> 00:39:13,650
digital but we have the the idea and

930
00:39:16,789 --> 00:39:14,999
we've kicked around the idea of analog

931
00:39:18,920 --> 00:39:16,799
and I may be doing some different kinds

932
00:39:20,450 --> 00:39:18,930
of recordings reasonably soon just

933
00:39:22,730 --> 00:39:20,460
trying to you know I don't know how

934
00:39:26,829 --> 00:39:22,740
what's going to work and do it digital

935
00:39:30,140 --> 00:39:26,839
and analog and I we don't know but yes I

936
00:39:32,809 --> 00:39:30,150
dr. Benson would use doctor in the

937
00:39:34,640 --> 00:39:32,819
ss-sorry session yes bill what you're

938
00:39:35,870 --> 00:39:34,650

doing is so important and phenomenal I

939
00:39:38,059 --> 00:39:35,880
just don't quite understand why

940
00:39:39,950 --> 00:39:38,069
everybody isn't studying you and your

941
00:39:43,430 --> 00:39:39,960
work well I'm not interested in being in

942
00:39:46,160 --> 00:39:43,440
that scene I'd rather be the

943
00:39:49,880 --> 00:39:46,170
investigator oh yeah I just have two

944
00:39:52,519 --> 00:39:49,890
questions one when you when you have a

945
00:39:54,890 --> 00:39:52,529
healed Mouse and you inject something to

946
00:39:57,620 --> 00:39:54,900
an unhealed or untreated mouse is it

947
00:39:59,539 --> 00:39:57,630
blood or is it tissue cells that you're

948
00:40:01,400 --> 00:39:59,549
inject either either one yeah

949
00:40:03,049 --> 00:40:01,410
so anything you inject you don't know

950
00:40:08,359 --> 00:40:03,059
about anything but we've done cells as

951
00:40:10,819 --> 00:40:08,369
well second question when you the idea

952
00:40:13,670 --> 00:40:10,829
that the mouse is once treated is then

953
00:40:16,640 --> 00:40:13,680
or cured is then has lifelong immunity

954
00:40:19,400 --> 00:40:16,650
is incredible and is it immunity to that

955
00:40:21,049 --> 00:40:19,410
particular same time no okay the other

956
00:40:23,690 --> 00:40:21,059
good the question I have a whole scroll

957
00:40:25,940 --> 00:40:23,700
of basic questions I'm going to ask and

958
00:40:28,729 --> 00:40:25,950
and and one of them is is the immunity

959
00:40:32,150 --> 00:40:28,739
cross cancers but I don't have that done

960
00:40:33,620 --> 00:40:32,160
yet but that's up there very high up on

961
00:40:36,200 --> 00:40:33,630
the want to do list so if you've been

962
00:40:39,229 --> 00:40:36,210
fixed a breast cancer can you get the

963
00:40:40,880 --> 00:40:39,239

other kind of cancer don't know ah this

964
00:40:42,829 --> 00:40:40,890
is also partially an answer to the

965
00:40:45,950 --> 00:40:42,839
previous question of why isn't everybody

966
00:40:48,099 --> 00:40:45,960
studying this as some people know I'm

967
00:40:52,549 --> 00:40:48,109
now working at the Kentucky cancer

968
00:40:54,589 --> 00:40:52,559
registry and my my bosses are mainstream

969
00:40:57,259 --> 00:40:54,599
cancer researchers I've tried talking to

970
00:40:59,089 --> 00:40:57,269
them about SSE stuff and they're

971
00:41:00,859 --> 00:40:59,099
completely uninterested in anything that

972
00:41:01,990 --> 00:41:00,869
hasn't been replicated in peer-reviewed

973
00:41:04,260 --> 00:41:02,000
journals

974
00:41:07,420 --> 00:41:04,270
and of course you've done a lot of

975
00:41:09,160 --> 00:41:07,430
presentations at the SSC presentations

976
00:41:12,220 --> 00:41:09,170
that these conferences aren't

977
00:41:14,200 --> 00:41:12,230
peer-reviewed I've I'm what aware of one

978
00:41:15,940 --> 00:41:14,210
article in the JSC which is

979
00:41:18,460 --> 00:41:15,950
peer-reviewed but isn't Arab Liam

980
00:41:20,440 --> 00:41:18,470
pressive to medical researchers and I

981
00:41:22,120 --> 00:41:20,450
believe you've got one article in

982
00:41:26,320 --> 00:41:22,130
Explorer which I don't remember whether

983
00:41:27,910 --> 00:41:26,330
Explorer is peer-reviewed or not so also

984
00:41:29,830 --> 00:41:27,920
alternative and complementary medicine

985
00:41:34,390 --> 00:41:29,840
so there's more than probably you're

986
00:41:36,550 --> 00:41:34,400
aware of yes there is more than I'm

987
00:41:39,190 --> 00:41:36,560
aware of and I'm grateful that you've

988
00:41:40,930 --> 00:41:39,200

got more peer-reviewed publications I'd

989
00:41:46,620 --> 00:41:40,940
like to get a list from you yep yep

990
00:41:50,440 --> 00:41:46,630
about a dozen I'm first of all amazed

991
00:41:53,490 --> 00:41:50,450
I'd like to ask you if if in your if in

992
00:41:57,360 --> 00:41:53,500
your work you've attempted to have a

993
00:42:02,110 --> 00:41:57,370
someone who had a human who had cancer

994
00:42:04,660 --> 00:42:02,120
apply your technique to a mouse and then

995
00:42:06,910 --> 00:42:04,670
there could be an assumption that some

996
00:42:08,560 --> 00:42:06,920
of the people that you had getting

997
00:42:10,990 --> 00:42:08,570
successful results might have had

998
00:42:12,850 --> 00:42:11,000
undiagnosed cancers I wonder if you have

999
00:42:17,500 --> 00:42:12,860
addressed I've never never done anything

1000
00:42:20,500 --> 00:42:17,510
like that have people who have looked

1001
00:42:22,380 --> 00:42:20,510
there certainly people who have had used

1002
00:42:25,090 --> 00:42:22,390
to have cancer learn my technique

1003
00:42:26,560 --> 00:42:25,100
because I very much encourage with

1004
00:42:29,170 --> 00:42:26,570
people if you're going to do this that

1005
00:42:31,000 --> 00:42:29,180
do it yourself you don't need you don't

1006
00:42:33,220 --> 00:42:31,010
need me and you need to be a participant

1007
00:42:36,100 --> 00:42:33,230
in the process but I don't know whether

1008
00:42:40,540 --> 00:42:36,110
that changes their treatment of some

1009
00:42:44,230 --> 00:42:40,550
something else that I don't know if you

1010
00:42:47,440 --> 00:42:44,240
used a cancer patient on a healthy Mouse

1011
00:42:49,330 --> 00:42:47,450
right would that induce what if you

1012
00:42:53,530 --> 00:42:49,340
didn't get a healing from a cancer

1013
00:42:56,110 --> 00:42:53,540

patient yeah into the mouse that was do

1014
00:42:59,050 --> 00:42:56,120
I are you asking can you store the the

1015
00:43:01,150 --> 00:42:59,060
bad stuff and transmit it yeah I don't

1016
00:43:02,680 --> 00:43:01,160
have any formal experiment I would be

1017
00:43:05,530 --> 00:43:02,690
willing to bet the ranch the answer's no

1018
00:43:09,100 --> 00:43:05,540
that you'd be fine yeah yeah I don't

1019
00:43:10,690 --> 00:43:09,110
think healing no matter you can be the

1020
00:43:13,090 --> 00:43:10,700
people in my experiments can come into

1021
00:43:14,980 --> 00:43:13,100
the I mean there's a huge range of

1022
00:43:15,700 --> 00:43:14,990
people who have done this and some of

1023
00:43:19,480 --> 00:43:15,710
them

1024
00:43:20,530 --> 00:43:19,490
difficulty with believers but but I none

1025
00:43:22,180 --> 00:43:20,540
of them believed none of them have any

1026
00:43:24,730 --> 00:43:22,190
experience they're essentially blank

1027
00:43:26,200 --> 00:43:24,740
slates some of them are sensitive some

1028
00:43:27,579 --> 00:43:26,210
of they're not sensitive some of them

1029
00:43:29,440 --> 00:43:27,589
feel stuff when they do it some don't

1030
00:43:33,900 --> 00:43:29,450
and none of that has any do with healing

1031
00:43:37,240 --> 00:43:33,910
efficacy none of those things matter and

1032
00:43:39,310 --> 00:43:37,250
sometimes they don't they're sick people

1033
00:43:41,470 --> 00:43:39,320
get sick I don't think it affects their

1034
00:43:43,420 --> 00:43:41,480
treatment at all in fact if anything I

1035
00:43:45,160 --> 00:43:43,430
think probably treating someone when

1036
00:43:50,349 --> 00:43:45,170
you're sick will be beneficial to you

1037
00:43:52,030 --> 00:43:50,359
thank you Bill thank you Bill and just

1038
00:43:54,130 --> 00:43:52,040

before you leave I would like to give

1039
00:43:56,829 --> 00:43:54,140
you one caution dating back to the 20s

1040
00:43:58,720 --> 00:43:56,839
there was a guy prosecuted for having
