Executive Meeting Center

1
00:00:09,049 --> 00:00:04,070
well hello everybody and thank you very

2
00:00:13,160 --> 00:00:09,059
much for accepting my talk I've been

3
00:00:16,640 --> 00:00:13,170
doing this work on life energy for quite

4
00:00:22,010 --> 00:00:16,650
a few years and now have a number of

5
00:00:24,640 --> 00:00:22,020
articles published but then I guess a

6
00:00:28,970 --> 00:00:24,650
few of you will know about this journal

7
00:00:30,950 --> 00:00:28,980
which is only an online journal and it's

8
00:00:35,450 --> 00:00:30,960
only being set up fairly recently it's

9
00:00:41,000 --> 00:00:35,460
called the journalist entropy anyway I

10
00:00:45,380 --> 00:00:41,010
want to move on us as fast as possible

11
00:00:49,250 --> 00:00:45,390
to get through the real nub of the talk

12
00:00:52,819 --> 00:00:49,260
which is about global meditations how to

13
00:00:56,360 --> 00:00:52,829

enhance global meditations but so I'll

14

00:01:03,740 --> 00:00:56,370

just include the experimental results

15

00:01:09,410 --> 00:01:03,750

which are directly relevant to that so I

16

00:01:13,789 --> 00:01:09,420

started with my interest started with an

17

00:01:17,719 --> 00:01:13,799

interesting orgonite which is just metal

18

00:01:22,580 --> 00:01:17,729

particles set in in a dielectric matrix

19

00:01:24,590 --> 00:01:22,590

and it's similar to the walls of wilhelm

20

00:01:29,080 --> 00:01:24,600

reich all going accumulator

21

00:01:35,300 --> 00:01:29,090

metal and organic in this case the

22

00:01:39,340 --> 00:01:35,310

orgonite as does not serve as a a source

23

00:01:43,609 --> 00:01:39,350

in itself but it kind of it amplifies

24

00:01:46,819 --> 00:01:43,619

any other source around it so it will

25

00:01:52,280 --> 00:01:46,829

amplify in this case the energy from the

26

00:01:58,389 --> 00:01:52,290

Sun but in this case this one also has a

27

00:02:02,209 --> 00:01:58,399

geometric aspect and it's modeled on the

28

00:02:07,370 --> 00:02:02,219

enormous pyramids built in Russia

29

00:02:13,760 --> 00:02:07,380

recently which like the Egyptian ones

30

00:02:25,070 --> 00:02:20,380

I also have one based only on geometry

31

00:02:32,120 --> 00:02:25,080

now this is how I developed a

32

00:02:35,420 --> 00:02:32,130

quantitative method of dowsing and so

33

00:02:42,230 --> 00:02:35,430

what I find is I'm using dowsing rods

34

00:02:46,640 --> 00:02:42,240

and walking towards the source I find a

35

00:02:49,400 --> 00:02:46,650

series of rings where the rods come

36

00:02:52,600 --> 00:02:49,410

together and between the Rings they open

37

00:02:56,240 --> 00:02:52,610

up again and then finally there's

38

00:03:00,940 --> 00:02:56,250

there's a gap before you get to the

39

00:03:08,210 --> 00:03:06,140

well out of suggestion from Jim Lyons a

40

00:03:12,620 --> 00:03:08,220

colleague of mine he said why don't you

41

00:03:17,120 --> 00:03:12,630

measure this gap and it might relate to

42

00:03:23,420 --> 00:03:17,130

the energy of the source so what I did

43

00:03:27,290 --> 00:03:23,430

was charge some water just by putting it

44

00:03:32,090 --> 00:03:27,300

close to the orgonite and then measured

45

00:03:38,540 --> 00:03:32,100

out volumes of water and I measured this

46

00:03:41,690 --> 00:03:38,550

gap in inches and amazingly enough found

47

00:03:47,750 --> 00:03:41,700

a linear relation I've done this a

48

00:03:51,830 --> 00:03:47,760

couple of times now this is a very

49

00:03:58,070 --> 00:03:51,840

important aspect in relation to the

50

00:04:02,540 --> 00:03:58,080

global meditation it seems that Dow

51
00:04:05,420 --> 00:04:02,550
scible energy can be sent non locally by

52
00:04:09,710 --> 00:04:05,430
means of quantum entanglement between

53
00:04:12,080 --> 00:04:09,720
two identical images on paper one near

54
00:04:16,759 --> 00:04:12,090
the source and the other additives

55
00:04:25,760 --> 00:04:20,599
and I've done quite a lot of this using

56
00:04:27,950 --> 00:04:25,770
different kinds of images of course two

57
00:04:33,619 --> 00:04:27,960
pieces of white paper don't work at all

58
00:04:39,589 --> 00:04:33,629
and what works best is an image which is

59
00:04:43,219 --> 00:04:39,599
both complex and unique so that's the

60
00:04:46,420 --> 00:04:43,229
one I've been using quite a lot which

61
00:04:53,749 --> 00:04:46,430
I've generated myself it's pretty unique

62
00:04:58,129 --> 00:04:53,759
but even this one here is doesn't look

63
00:05:02,839 --> 00:04:58,139

so unique and not so complex and what

64

00:05:06,020 --> 00:05:02,849

that is actually is the logo of a man

65

00:05:10,399 --> 00:05:06,030

called Carl veldt's somewhere in the

66

00:05:13,879 --> 00:05:10,409

United States and he employs organites

67

00:05:17,450 --> 00:05:13,889

in his radionics instrument and he keeps

68

00:05:20,300 --> 00:05:17,460

his his logo close to the organite and

69

00:05:24,110 --> 00:05:20,310

invites people to download it from the

70

00:05:27,290 --> 00:05:24,120

net and douse it or whatever so I did

71

00:05:32,360 --> 00:05:27,300

this and certainly I could pick up the

72

00:05:34,459 --> 00:05:32,370

energy across the Atlantic well so I

73

00:05:39,070 --> 00:05:34,469

thought to do this experiment which I

74

00:05:43,370 --> 00:05:39,080

rather like the organized of course

75

00:05:46,820 --> 00:05:43,380

receiving energy from the Sun that comes

76
00:05:50,719 --> 00:05:46,830
up to a maximum about midday but kelvins

77
00:05:53,749 --> 00:05:50,729
logo reaches its maximum later in the

78
00:06:00,820 --> 00:05:53,759
afternoon presumably when the Sun is

79
00:06:05,450 --> 00:06:00,830
high over eastern United States well

80
00:06:07,610 --> 00:06:05,460
that's all dowsing so nobody believes

81
00:06:11,140 --> 00:06:07,620
dowsing scientists weren't except

82
00:06:15,980 --> 00:06:11,150
dowsing of course so what if objective

83
00:06:19,219 --> 00:06:15,990
measures can I use to back it up well

84
00:06:21,170 --> 00:06:19,229
the one I really liked to do more of but

85
00:06:23,839 --> 00:06:21,180
I can't afford it and the university

86
00:06:28,200 --> 00:06:23,849
won't let me do it anymore but I do have

87
00:06:31,770 --> 00:06:28,210
some results with water charged

88
00:06:39,629 --> 00:06:31,780

by being closely organized for example

89

00:06:45,360 --> 00:06:39,639

and so I got these few results this is

90

00:06:47,700 --> 00:06:45,370

the absorption spectrum of a number of

91

00:06:51,150 --> 00:06:47,710

samples of water

92

00:06:53,670 --> 00:06:51,160

it's difference from control so the

93

00:06:56,450 --> 00:06:53,680

control uncharged water would be just

94

00:07:01,249 --> 00:06:56,460

zero all the way along the bottom and

95

00:07:05,460 --> 00:07:01,259

here you have the dark blue line is

96

00:07:10,980 --> 00:07:05,470

water being close to organize all the

97

00:07:15,390 --> 00:07:10,990

others are non-charged non-locally with

98

00:07:18,719 --> 00:07:15,400

one image one copy of the image closely

99

00:07:26,089 --> 00:07:18,729

organized and the other close to water

100

00:07:29,249 --> 00:07:26,099

at some I think 30 meters distance so I

101
00:07:32,580 --> 00:07:29,259
wish I could do more of that per turn I

102
00:07:35,939 --> 00:07:32,590
can't afford it at the moment

103
00:07:39,270 --> 00:07:35,949
this is the other objective measure much

104
00:07:43,529 --> 00:07:39,280
more difficult and time consuming it is

105
00:07:47,339 --> 00:07:43,539
growth of seedlings so in this case I'm

106
00:07:51,600 --> 00:07:47,349
using as a source this non inductive

107
00:07:55,170 --> 00:07:51,610
coil pulsed with 10 kilohertz it's just

108
00:07:58,529 --> 00:07:55,180
sort of any old frequency and it's

109
00:08:00,930 --> 00:07:58,539
surrounded by one copy of the image the

110
00:08:06,170 --> 00:08:00,940
other copy of the image at a distant

111
00:08:12,540 --> 00:08:06,180
location so it is in an incubator where

112
00:08:15,420 --> 00:08:12,550
the seedlings are growing so iPhone what

113
00:08:18,480 --> 00:08:15,430

being able to take out these seedlings

114

00:08:23,120 --> 00:08:18,490

which are on plastic grids and weigh

115

00:08:32,880 --> 00:08:28,860

here's some results but without a line

116

00:08:35,510 --> 00:08:32,890

anyway so this is the weight added to

117

00:08:37,020 --> 00:08:35,520

the to the grids and seedlings

118

00:08:42,480 --> 00:08:37,030

day to

119

00:08:46,010 --> 00:08:42,490

and the test yeah

120

00:08:48,750 --> 00:08:46,020

which are called mote scalar field and

121

00:08:52,170 --> 00:08:48,760

as against the control and the

122

00:08:57,150 --> 00:08:52,180

difference is three ground highly

123

00:08:59,910 --> 00:08:57,160

significant but it takes is a eight

124

00:09:05,940 --> 00:08:59,920

experiments each of about three days so

125

00:09:12,950 --> 00:09:05,950

it takes a lot of time well now I have

126

00:09:17,010 --> 00:09:12,960

to introduce the subject of warmers

127

00:09:21,600 --> 00:09:17,020

surprisingly not very many people know

128

00:09:24,210 --> 00:09:21,610

very much about it but I just quickly

129

00:09:26,700 --> 00:09:24,220

introduced it almost is a sort of

130

00:09:31,430 --> 00:09:26,710

general name given to what's often

131

00:09:37,350 --> 00:09:31,440

called white gold and these atoms have

132

00:09:39,270 --> 00:09:37,360

extraordinary properties I'm not going

133

00:09:44,880 --> 00:09:39,280

to go through them but I especially want

134

00:09:50,870 --> 00:09:44,890

to point to the affinity for alkali

135

00:09:54,390 --> 00:09:50,880

metals and this gives rise to the

136

00:09:57,870 --> 00:09:54,400

favoured method a simple method to

137

00:10:01,680 --> 00:09:57,880

concentrate or MERS from seawater

138

00:10:04,320 --> 00:10:01,690

you just had caustic soda and you get

139

00:10:08,040 --> 00:10:04,330

this white precipitate mainly magnesium

140

00:10:10,800 --> 00:10:08,050

hydroxide that comes down and there you

141

00:10:14,760 --> 00:10:10,810

have your concentrated orleans which my

142

00:10:17,370 --> 00:10:14,770

wife and i take by mouth from time to

143

00:10:24,350 --> 00:10:17,380

time and i put it on my garden with very

144

00:10:28,020 --> 00:10:24,360

good results well here i made a rather

145

00:10:33,780 --> 00:10:28,030

serendipitous mistake i wanted for some

146

00:10:36,090 --> 00:10:33,790

reason to dissolve this precipitate so

147

00:10:39,660 --> 00:10:36,100

my hand went up to

148

00:10:42,120 --> 00:10:39,670

hopefully hydrochloric acid oh it was a

149

00:10:45,590 --> 00:10:42,130

little bottle of phosphoric acid that a

150

00:10:48,780 --> 00:10:45,600

friend had sent me I don't know why but

151

00:10:52,620 --> 00:10:48,790

anyway I thought well let's use

152

00:10:56,580 --> 00:10:52,630

phosphoric acid so what happened was the

153

00:10:58,920 --> 00:10:56,590

the white precipitate dissolved

154

00:11:01,440 --> 00:10:58,930

initially and then very soon in a few

155

00:11:04,400 --> 00:11:01,450

seconds came down again as a much

156

00:11:10,140 --> 00:11:04,410

heavier crystalline precipitate

157

00:11:15,450 --> 00:11:10,150

presumably magnesium phosphate well I

158

00:11:18,260 --> 00:11:15,460

was dowsing these and concurrently with

159

00:11:22,170 --> 00:11:18,270

this crystalline precipitate coming down

160

00:11:25,130 --> 00:11:22,180

there was a huge increase in townsville

161

00:11:33,600 --> 00:11:25,140

energy so I thought that was interesting

162

00:11:36,600 --> 00:11:33,610

and yes that that well that the

163

00:11:40,020 --> 00:11:36,610

described what happens so I then bought

164

00:11:45,690 --> 00:11:40,030

some magnesium phosphate and added it to

165

00:11:48,570 --> 00:11:45,700

a solution of dead sea salt and right

166

00:11:53,310 --> 00:11:48,580

enough in a few few minutes the dow

167

00:11:58,140 --> 00:11:53,320

scible energy went up enormously and why

168

00:12:01,080 --> 00:11:58,150

should this be when then sea salt even

169

00:12:06,570 --> 00:12:01,090

the crystalline dead sea salt has almost

170

00:12:10,560 --> 00:12:06,580

no danceable energy i think i can only

171

00:12:14,670 --> 00:12:10,570

think of this as somehow on going into

172

00:12:19,519 --> 00:12:14,680

the magnesium phosphate crystals the

173

00:12:23,129 --> 00:12:19,529

almost atoms are lying themselves into

174

00:12:26,040 --> 00:12:23,139

bose-einstein conjugate I couldn't go

175

00:12:31,460 --> 00:12:26,050

into the physics that I know the

176

00:12:40,699 --> 00:12:36,540

well a really important thought that

177

00:12:44,040 --> 00:12:40,709

followed this was the question whether

178

00:12:46,319 --> 00:12:44,050

when this the almost atoms are coming

179

00:12:51,720 --> 00:12:46,329

together like that whether they might

180

00:12:56,670 --> 00:12:51,730

become imprinted with information so I

181

00:13:01,460 --> 00:12:56,680

chose some sort of information that

182

00:13:06,299 --> 00:13:01,470

could be measured and which was

183

00:13:10,379 --> 00:13:06,309

frequency information and here's the

184

00:13:13,379 --> 00:13:10,389

experiment I had in this case and the

185

00:13:16,579 --> 00:13:13,389

frequencies provided from frequency

186

00:13:19,350 --> 00:13:16,589

generator to two metal plates and

187

00:13:22,110 --> 00:13:19,360

between the metal plates is a flat piece

188

00:13:25,910 --> 00:13:22,120

of organite to supply the life energy

189

00:13:29,340 --> 00:13:25,920

and there's the image around them and

190

00:13:33,980 --> 00:13:29,350

the distant location you have the

191

00:13:38,069 --> 00:13:33,990

receiving setup with the image and a

192

00:13:41,429 --> 00:13:38,079

flask of dead sea salt solution and I've

193

00:13:45,540 --> 00:13:41,439

just tipped some magnesium phosphate

194

00:13:47,549 --> 00:13:45,550

into this in this case the five

195

00:13:51,530 --> 00:13:47,559

frequencies are being cycled through

196

00:13:54,449 --> 00:13:51,540

rather quickly so to make make sure that

197

00:14:01,650 --> 00:13:54,459

the system is picking up every one of

198

00:14:05,210 --> 00:14:01,660

them now how can I measure frequency

199

00:14:09,389 --> 00:14:05,220

well you can't measure it directly I

200

00:14:14,720 --> 00:14:09,399

made use of dr. Cyril Smith who has

201
00:14:16,470 --> 00:14:14,730
developed extremely sensitive and

202
00:14:20,329 --> 00:14:16,480
quantitative

203
00:14:27,389 --> 00:14:20,339
method of dowsing frequencies so he just

204
00:14:30,870 --> 00:14:27,399
puts the sample between no he has his

205
00:14:35,460 --> 00:14:30,880
pendulum between the sample and a signal

206
00:14:36,360 --> 00:14:35,470
generator and the coil so he and he did

207
00:14:39,329 --> 00:14:36,370
this blind

208
00:14:41,939 --> 00:14:39,339
I sent these samples off to him and this

209
00:14:44,460 --> 00:14:41,949
is just one sample by the way I've sent

210
00:14:46,620 --> 00:14:44,470
these off to him and he doused them

211
00:14:52,069 --> 00:14:46,630
blind and you can see there was a

212
00:14:59,579 --> 00:14:56,310
well that's frequency so can you store

213
00:15:03,629 --> 00:14:59,589

any kind of information including

214

00:15:07,680 --> 00:15:03,639

perhaps healing or meditation in this

215

00:15:13,170 --> 00:15:07,690

way of course healing a meditation can't

216

00:15:15,590 --> 00:15:13,180

be measured but I thought well let's see

217

00:15:19,980 --> 00:15:15,600

if we can store the information

218

00:15:23,340 --> 00:15:19,990

contained in this image so here's the

219

00:15:26,370 --> 00:15:23,350

dead sea salt solution with magnesium

220

00:15:32,030 --> 00:15:26,380

phosphate poured into it

221

00:15:38,189 --> 00:15:32,040

and then I filtered out that the

222

00:15:44,269 --> 00:15:38,199

magnesium phosphate and and dried it and

223

00:15:49,199 --> 00:15:44,279

put it near a source of life energy and

224

00:15:53,790 --> 00:15:49,209

then I doused this image on paper at a

225

00:15:59,900 --> 00:15:53,800

distant location to see whether the life

226

00:16:06,689 --> 00:15:59,910

energy here was being sent non locally

227

00:16:10,889 --> 00:16:06,699

by means of the of a image being stored

228

00:16:15,710 --> 00:16:10,899

in this little tube and it did work very

229

00:16:24,950 --> 00:16:21,110

so in the same way with a person in

230

00:16:28,220 --> 00:16:24,960

place in the image the energy of the

231

00:16:29,210 --> 00:16:28,230

image can be doused over his his

232

00:16:34,910 --> 00:16:29,220

photograph

233

00:16:39,070 --> 00:16:34,920

so I've stored my wife my wife's person

234

00:16:42,680 --> 00:16:39,080

on almost magnesium phosphate and then

235

00:16:46,250 --> 00:16:42,690

when I can dowse actually her life

236

00:16:48,500 --> 00:16:46,260

energy but in this case the almost

237

00:16:52,040 --> 00:16:48,510

magnesium phosphate containing her

238

00:16:57,650 --> 00:16:52,050

information is placed near the orgonite

239

00:17:00,850 --> 00:16:57,660

and I can douse the energy of the

240

00:17:08,449 --> 00:17:00,860

orgonite over the photograph of my wife

241

00:17:12,920 --> 00:17:08,459

very well this can also of course be

242

00:17:16,400 --> 00:17:12,930

used in principle for remote healing so

243

00:17:20,439 --> 00:17:16,410

the healer would focus on the Healey or

244

00:17:24,319 --> 00:17:20,449

photographs of the Healey and add the

245

00:17:29,270 --> 00:17:24,329

magnesium phosphate to the dead sea salt

246

00:17:35,830 --> 00:17:29,280

solution and then later you can use this

247

00:17:42,710 --> 00:17:35,840

is orgonite with the the imprinted

248

00:17:45,050 --> 00:17:42,720

almost magnesium phosphate inside it in

249

00:17:46,670 --> 00:17:45,060

the form of radio transmission I've

250

00:17:51,590 --> 00:17:46,680

tried this a couple of times but I

251
00:17:54,590 --> 00:17:51,600
account reports very obvious results so

252
00:18:00,650 --> 00:17:54,600
now I come to suggestions for the

253
00:18:04,550 --> 00:18:00,660
enhancement of vocal meditation well of

254
00:18:08,140 --> 00:18:04,560
course this is I just go to the bottom

255
00:18:10,460 --> 00:18:08,150
our capitalist industrials

256
00:18:13,160 --> 00:18:10,470
civilization is going down the tubes at

257
00:18:14,920 --> 00:18:13,170
a rate or not so I think this is very

258
00:18:20,030 --> 00:18:14,930
urgent

259
00:18:25,020 --> 00:18:20,040
something to be done you would all know

260
00:18:29,460 --> 00:18:25,030
these results of the Maharishi Institute

261
00:18:33,300 --> 00:18:29,470
years ago I think that we can't argue

262
00:18:35,790 --> 00:18:33,310
with these results so what I'm

263
00:18:40,260 --> 00:18:35,800

suggesting in the first place is a very

264

00:18:44,690 --> 00:18:40,270

simple situation just that the

265

00:18:48,630 --> 00:18:44,700

individual meditator or group

266

00:18:51,320 --> 00:18:48,640

meditations would just have some sort of

267

00:18:56,240 --> 00:18:51,330

image of the world either a map or

268

00:18:59,220 --> 00:18:56,250

photograph from space and this

269

00:19:05,300 --> 00:18:59,230

meditation might be sent to the whole

270

00:19:08,610 --> 00:19:05,310

world non-locally and of course the

271

00:19:11,340 --> 00:19:08,620

meditators themselves provide life

272

00:19:13,320 --> 00:19:11,350

energy which is essential it's essential

273

00:19:16,290 --> 00:19:13,330

to have some life energy for this to

274

00:19:19,110 --> 00:19:16,300

occur that's why some people or some

275

00:19:24,480 --> 00:19:19,120

physicists trying to do it and being

276

00:19:27,510 --> 00:19:24,490

very successful without life energy and

277

00:19:29,310 --> 00:19:27,520

here's a situation where the Russian

278

00:19:33,560 --> 00:19:29,320

pyramids presumably

279

00:19:34,770 --> 00:19:33,570

are seen to be improving the local

280

00:19:37,770 --> 00:19:34,780

environment

281

00:19:41,250 --> 00:19:37,780

this is a very powerful source I've

282

00:19:47,450 --> 00:19:41,260

developed recently but we won't go into

283

00:19:51,780 --> 00:19:47,460

the complications of that but it could

284

00:19:55,800 --> 00:19:51,790

perhaps without human meditation send

285

00:19:59,640 --> 00:19:55,810

life energy to the world this is the

286

00:20:07,470 --> 00:19:59,650

final one where you would in this case

287

00:20:10,050 --> 00:20:07,480

have a tube containing almost magnesium

288

00:20:14,820 --> 00:20:10,060

phosphate which had previously been

289

00:20:19,770 --> 00:20:14,830

imprinted by a during a group meditation

290

00:20:25,120 --> 00:20:19,780

or ritual hopefully storing the effects

291

00:20:34,370 --> 00:20:29,930

well that's my suggestion I don't think

292

00:20:41,289 --> 00:20:34,380

we're going to that thank you very much

293

00:20:45,169 --> 00:20:41,299

[Applause]

294

00:20:49,580 --> 00:20:45,179

could you briefly describe how the

295

00:20:53,919 --> 00:20:49,590

Russian sure image local area in what

296

00:21:00,860 --> 00:20:53,929

way well of course it can't be measured

297

00:21:02,149 --> 00:21:00,870

exactly but they they think they they've

298

00:21:05,470 --> 00:21:02,159

built I don't know

299

00:21:08,990 --> 00:21:05,480

twelve or fifteen of these pyramids and

300

00:21:14,240 --> 00:21:09,000

in the locality of two of them out in

301
00:21:17,830 --> 00:21:14,250
the country one they say to wildflowers

302
00:21:21,680 --> 00:21:17,840
which had disappeared and reappeared and

303
00:21:30,610 --> 00:21:21,690
in another one near a lake the stalks

304
00:21:36,260 --> 00:21:33,230
was troubled by some aspects of your

305
00:21:40,639 --> 00:21:36,270
presentation that seemed to be getting

306
00:21:43,549 --> 00:21:40,649
things backwards for example you seem to

307
00:21:47,450 --> 00:21:43,559
be talking about increasing the pH of a

308
00:21:52,039 --> 00:21:47,460
solution by adding an acid to it and the

309
00:21:55,010 --> 00:21:52,049
the time difference between the the the

310
00:21:58,460 --> 00:21:55,020
the local source and the remote source

311
00:22:01,070 --> 00:21:58,470
driven by the organ or glow go

312
00:22:03,350 --> 00:22:01,080
you were attributing a later solar cycle

313
00:22:05,350 --> 00:22:03,360

to a location to that as far as I

314

00:22:10,180 --> 00:22:05,360

understood was to the east of you I

315

00:22:15,940 --> 00:22:10,190

wonder if you could clarify this a bit I

316

00:22:19,920 --> 00:22:15,950

don't quite my hearings not very good

317

00:22:25,330 --> 00:22:19,930

can you just encapsulated in

318

00:22:29,860 --> 00:22:25,340

okay point one you spoke of increasing

319

00:22:32,320 --> 00:22:29,870

the pH of a solution and then a few

320

00:22:37,030 --> 00:22:32,330

moments later spoke of reaching for an

321

00:22:45,690 --> 00:22:37,040

acid to add to it to do that acids lower

322

00:22:48,730 --> 00:22:45,700

pH increasing is only to precipitate the

323

00:22:52,780 --> 00:22:48,740

magnesium hydroxide which carries down

324

00:22:57,550 --> 00:22:52,790

they are almost with it the the later

325

00:23:02,050 --> 00:22:57,560

adding acid was just a serendipitous

326

00:23:06,460 --> 00:23:02,060

mistake you know the the most of the

327

00:23:09,340 --> 00:23:06,470

work which I've talked about is done

328

00:23:12,520 --> 00:23:09,350

with just magnesium phosphate that I

329

00:23:15,480 --> 00:23:12,530

bought from a chemical company and dead

330

00:23:20,410 --> 00:23:15,490

sea salt solution there's no question of

331

00:23:23,020 --> 00:23:20,420

pH at all nothing to do with pH no I'm
