

1  
00:00:03,300 --> 00:00:09,259

[Music]

2  
00:00:14,599 --> 00:00:12,199

I'm concerned and I was glad to hear a

3  
00:00:16,640 --> 00:00:14,609

dick ship yesterday that I'm not the

4  
00:00:19,519 --> 00:00:16,650

only one who's concerned about the SSC

5  
00:00:21,710 --> 00:00:19,529

and the direction that we've been going

6  
00:00:23,179 --> 00:00:21,720

some so yes as I said I've got the red

7  
00:00:25,880 --> 00:00:23,189

flags up and throwing down the gauntlet

8  
00:00:28,369 --> 00:00:25,890

if anybody wants to take me up so I

9  
00:00:31,190 --> 00:00:28,379

think it's time to reassess our

10  
00:00:34,420 --> 00:00:31,200

standards and it says we we have heist

11  
00:00:36,950 --> 00:00:34,430

and Evon our double standards are high

12  
00:00:38,360 --> 00:00:36,960

but I'm going to hit the website and the

13  
00:00:40,400 --> 00:00:38,370

things that I've we're going to talk

14

00:00:43,220 --> 00:00:40,410

about most of them are on our website

15

00:00:44,690 --> 00:00:43,230

and at the council meeting the other day

16

00:00:46,940 --> 00:00:44,700

we were talking about we want to go to

17

00:00:49,400 --> 00:00:46,950

industry and look for industry sponsors

18

00:00:51,860 --> 00:00:49,410

I'll guarantee you that any industry out

19

00:00:53,600 --> 00:00:51,870

there you know in the straight world the

20

00:00:55,580 --> 00:00:53,610

first thing they do to check your abs go

21

00:00:59,600 --> 00:00:55,590

to go look at your website and some of

22

00:01:01,430 --> 00:00:59,610

our stuff will not stand scrutiny one of

23

00:01:03,049 --> 00:01:01,440

first of all acknowledge there's a lot

24

00:01:05,569 --> 00:01:03,059

of good work that's going on so I'm not

25

00:01:08,420 --> 00:01:05,579

talking about a lot of any of these

26

00:01:10,190 --> 00:01:08,430

folks no but one of the things that's

27

00:01:12,410 --> 00:01:10,200

notice is often there's a price

28

00:01:13,910 --> 00:01:12,420

personally that has been paid by these

29

00:01:16,249 --> 00:01:13,920

people who have stepped forward left

30

00:01:19,160 --> 00:01:16,259

their careers and made statement the

31

00:01:22,099 --> 00:01:19,170

other issue is most of the time these

32

00:01:25,599 --> 00:01:22,109

folks are working with extremely weak

33

00:01:29,120 --> 00:01:25,609

signals that's that's kind of a norm

34

00:01:31,429 --> 00:01:29,130

laughter I had was gonna give this talk

35

00:01:36,800 --> 00:01:31,439

Roger Nelson came out with his chart

36

00:01:38,359 --> 00:01:36,810

this is when Sai Baba died and he issued

37

00:01:41,059 --> 00:01:38,369

this and is by the way there's a

38

00:01:43,760 --> 00:01:41,069

statistically significant and but his

39  
00:01:46,730 --> 00:01:43,770  
comment here was you know these are very

40  
00:01:48,499 --> 00:01:46,740  
weak signals that they're working on to

41  
00:01:50,029 --> 00:01:48,509  
his credit he also pointed out there

42  
00:01:52,399 --> 00:01:50,039  
were two events that happened about the

43  
00:01:54,379 --> 00:01:52,409  
same time one was the royal wedding the

44  
00:01:57,559 --> 00:01:54,389  
other was the death of Osama and they

45  
00:02:01,120 --> 00:01:57,569  
did not get a statistically significant

46  
00:02:03,319 --> 00:02:01,130  
event don't really know why pair labs

47  
00:02:05,510 --> 00:02:03,329  
Bob and Brenner here but they've been

48  
00:02:08,479 --> 00:02:05,520  
working on this and again what you see

49  
00:02:11,390 --> 00:02:08,489  
are small but statistically significant

50  
00:02:15,500 --> 00:02:11,400  
concern signals over long periods of

51  
00:02:17,420 --> 00:02:15,510  
time Dean Radin it is a presentiment

52  
00:02:20,240 --> 00:02:17,430  
experiments as well as the other one

53  
00:02:22,130 --> 00:02:20,250  
same sorts of thing very small signal

54  
00:02:22,820 --> 00:02:22,140  
now these are important understanding

55  
00:02:27,830 --> 00:02:22,830  
the

56  
00:02:31,310 --> 00:02:27,840  
important to really understand those

57  
00:02:33,080 --> 00:02:31,320  
things I want to mention Jack how can

58  
00:02:34,940 --> 00:02:33,090  
here the work that he's done in pique

59  
00:02:37,910 --> 00:02:34,950  
you know you got the Dinsdale award last

60  
00:02:40,010 --> 00:02:37,920  
year but I really wanted the thing from

61  
00:02:43,570 --> 00:02:40,020  
Richard Fineman you think science is

62  
00:02:45,830 --> 00:02:43,580  
certain less just a mistake on your part

63  
00:02:48,350 --> 00:02:45,840

let me transfer to some of the other

64

00:02:50,600 --> 00:02:48,360

things last year I gave a whole talk on

65

00:02:53,600 --> 00:02:50,610

the men who stare at goats and if you

66

00:02:56,510 --> 00:02:53,610

want it's on the website now too you can

67

00:02:59,540 --> 00:02:56,520

go and look up the presentation my point

68

00:03:02,030 --> 00:02:59,550

is this there is zero evidence that

69

00:03:04,820 --> 00:03:02,040

anybody or any goat ever died from being

70

00:03:07,910 --> 00:03:04,830

stared at there are strong evidence that

71

00:03:14,680 --> 00:03:07,920

that did not happen and having said that

72

00:03:19,280 --> 00:03:17,540

I'm gonna skip this well let me talk to

73

00:03:22,370 --> 00:03:19,290

him there's a new book out called area

74

00:03:24,320 --> 00:03:22,380

51 and I just met better the problem

75

00:03:27,020 --> 00:03:24,330

that I see is this what she did is she

76  
00:03:30,440 --> 00:03:27,030  
embedded some folks in real heroes who

77  
00:03:32,240 --> 00:03:30,450  
created area 51 the u2 the sr-71 who

78  
00:03:34,850 --> 00:03:32,250  
risked their lives in some cases gave

79  
00:03:37,970 --> 00:03:34,860  
them and at the end of the book she says

80  
00:03:40,940 --> 00:03:37,980  
Oh Roswell happened the Soviets did it

81  
00:03:44,210 --> 00:03:40,950  
and we were involved in experiments just

82  
00:03:45,920 --> 00:03:44,220  
like Josef Mengele literally linking

83  
00:03:48,470 --> 00:03:45,930  
these people with these kinds of

84  
00:03:51,040 --> 00:03:48,480  
experiments and saying we the u.s. are

85  
00:03:54,500 --> 00:03:51,050  
doing the same things as Josef Mengele

86  
00:03:56,930 --> 00:03:54,510  
really hit the guys got kind of

87  
00:03:58,910 --> 00:03:56,940  
blindsided on this and to talk about two

88  
00:04:02,270 --> 00:03:58,920

areas one of them your phone this is

89

00:04:04,880 --> 00:04:02,280

kind of the spectrum of beliefs in UFOs

90

00:04:07,400 --> 00:04:04,890

runs from the bunkers to aliens among us

91

00:04:09,920 --> 00:04:07,410

I suspect most of our people are

92

00:04:14,000 --> 00:04:09,930

somewhere in this category between you

93

00:04:16,430 --> 00:04:14,010

know we're skeptics they exist to UFOs

94

00:04:18,140 --> 00:04:16,440

probably exist the problem of UFO

95

00:04:21,860 --> 00:04:18,150

community right now is they're living

96

00:04:23,840 --> 00:04:21,870

down here that says aliens are among us

97

00:04:28,550 --> 00:04:23,850

walking and one out and that's the

98

00:04:31,760 --> 00:04:28,560

prevailing view my pointer is that what

99

00:04:34,460 --> 00:04:31,770

they want is quote disclosure my

100

00:04:36,500 --> 00:04:34,470

argument is UFOs are not the greatest

101  
00:04:38,330 --> 00:04:36,510  
story never told and

102  
00:04:41,660 --> 00:04:38,340  
it has happened and happened and

103  
00:04:43,850 --> 00:04:41,670  
happened the point is you have all of

104  
00:04:45,650 --> 00:04:43,860  
these presidents alright suppose you'll

105  
00:04:47,750 --> 00:04:45,660  
recognize just me just say a lot of

106  
00:04:51,290 --> 00:04:47,760  
important people have already come out

107  
00:04:53,630 --> 00:04:51,300  
said UFOs are real UFO community now

108  
00:04:55,700 --> 00:04:53,640  
says they good enough we want full

109  
00:04:58,940 --> 00:04:55,710  
disclosure and that's somewhere around

110  
00:05:04,400 --> 00:04:58,950  
yeah we have trade agreements we're

111  
00:05:08,210 --> 00:05:04,410  
working with the ETS and whatnot they

112  
00:05:09,710 --> 00:05:08,220  
are deathly serious in this area now one

113  
00:05:12,680 --> 00:05:09,720

of the problems it is yeah it just

114

00:05:15,980 --> 00:05:12,690

happened to pick one area perception

115

00:05:17,930 --> 00:05:15,990

there's about 3,000 pilot cases on board

116

00:05:21,050 --> 00:05:17,940

so it's actually the guy who gets this

117

00:05:23,600 --> 00:05:21,060

they get about seven cases a year I

118

00:05:26,000 --> 00:05:23,610

might mention regarding my new book I

119

00:05:28,520 --> 00:05:26,010

had pilots write me and say I've been an

120

00:05:31,760 --> 00:05:28,530

airline pilot 30 40 years I've never

121

00:05:33,980 --> 00:05:31,770

seen a UFO must not exist so there's

122

00:05:37,220 --> 00:05:33,990

some quick calculations on it because

123

00:05:41,360 --> 00:05:37,230

3,000 sounds like a lot she says well we

124

00:05:45,050 --> 00:05:41,370

got about seven reported annually if I'm

125

00:05:47,690 --> 00:05:45,060

guessing 1% or reported there's

126

00:05:50,120 --> 00:05:47,700

seventeen point five billion flying

127

00:05:54,650 --> 00:05:50,130

hours on here and you end up with an

128

00:05:58,190 --> 00:05:54,660

effect at zero point zero zero zero four

129

00:06:00,050 --> 00:05:58,200

percent in other words one hand sounds

130

00:06:03,160 --> 00:06:00,060

like it's there's a lot going on the

131

00:06:05,690 --> 00:06:03,170

other is reality is it's really rare

132

00:06:08,000 --> 00:06:05,700

there are no limits to crazy when you

133

00:06:10,610 --> 00:06:08,010

get into this if you get on you will

134

00:06:13,700 --> 00:06:10,620

find reports on the internet that I let

135

00:06:17,180 --> 00:06:13,710

a nuclear attack against aliens in the

136

00:06:19,460 --> 00:06:17,190

Dulce tunnels I don't care how crazy you

137

00:06:21,440 --> 00:06:19,470

want to get there's folks out there and

138

00:06:28,160 --> 00:06:21,450

they say you get in the literature there

139

00:06:31,370 --> 00:06:28,170

are no lower limits and this is frankly

140

00:06:33,590 --> 00:06:31,380

one of the bestsellers in there the

141

00:06:35,330 --> 00:06:33,600

other problem we have is the press it

142

00:06:37,760 --> 00:06:35,340

was a great case in Bentwaters haven't

143

00:06:40,730 --> 00:06:37,770

got time to get into it be willing but

144

00:06:42,740 --> 00:06:40,740

the press ends up last December somebody

145

00:06:45,710 --> 00:06:42,750

suggested that hey maybe they drop an

146

00:06:48,140 --> 00:06:45,720

Apollo capsule like we'd lose an Apollo

147

00:06:49,580 --> 00:06:48,150

capsule someplace just happens to land

148

00:06:53,960 --> 00:06:49,590

outside of the

149

00:06:56,090 --> 00:06:53,970

a base at Bentwaters but the point is

150

00:06:58,520 --> 00:06:56,100

that this is total nonsense

151  
00:07:00,380 --> 00:06:58,530  
and yet the British press you know they

152  
00:07:03,140 --> 00:07:00,390  
just regard all the facts but the press

153  
00:07:05,660 --> 00:07:03,150  
black gloms onto it because it's you

154  
00:07:07,880 --> 00:07:05,670  
know it's in the noise but it makes it

155  
00:07:11,660 --> 00:07:07,890  
gets attention how does it affect us

156  
00:07:14,630 --> 00:07:11,670  
three years ago here upstairs in the

157  
00:07:16,700 --> 00:07:14,640  
room we invited this guy now the problem

158  
00:07:21,110 --> 00:07:16,710  
is that he really was the minister of

159  
00:07:23,960 --> 00:07:21,120  
defense of Canada and he made a series

160  
00:07:26,950 --> 00:07:23,970  
of claims I will be blunt I tried to get

161  
00:07:30,020 --> 00:07:26,960  
the invitation cancelled it didn't work

162  
00:07:32,930 --> 00:07:30,030  
but some of you may know of course a day

163  
00:07:35,900 --> 00:07:32,940

after Roswell problem here is that's one

164

00:07:36,500 --> 00:07:35,910

of the best-selling books on UFOs of all

165

00:07:39,980 --> 00:07:36,510

times

166

00:07:42,620 --> 00:07:39,990

and yet almost no evidence that any of

167

00:07:45,740 --> 00:07:42,630

it is actually true in fact a lot of you

168

00:07:48,740 --> 00:07:45,750

know it can almost be totally denied but

169

00:07:52,670 --> 00:07:48,750

they're talking about the US and ET is

170

00:07:55,280 --> 00:07:52,680

having a shooting war right now now

171

00:07:57,200 --> 00:07:55,290

again remember who's saying us and this

172

00:07:59,990 --> 00:07:57,210

is part of the problem you got the high

173

00:08:01,880 --> 00:08:00,000

level people out here suggesting that we

174

00:08:04,520 --> 00:08:01,890

didn't have said we've been involved

175

00:08:07,010 --> 00:08:04,530

they said the Cold War was a cover for

176  
00:08:09,800 --> 00:08:07,020  
ET I actually challenged the answer was

177  
00:08:11,480 --> 00:08:09,810  
I'm not going to nitpick I said I don't

178  
00:08:17,000 --> 00:08:11,490  
think the Cold War is nitpicking

179  
00:08:19,820 --> 00:08:17,010  
let's now let me go to our website right

180  
00:08:21,860 --> 00:08:19,830  
now and I'm not blaming Adam I think he

181  
00:08:24,920 --> 00:08:21,870  
does a does a great job with ringing on

182  
00:08:27,080 --> 00:08:24,930  
our website right now it says we know

183  
00:08:29,360 --> 00:08:27,090  
that spaceships from other planets have

184  
00:08:31,940 --> 00:08:29,370  
been visiting earth for decades you know

185  
00:08:34,730 --> 00:08:31,950  
we need to extend a welcome mantling

186  
00:08:36,740 --> 00:08:34,740  
problem here again you got the industry

187  
00:08:40,640 --> 00:08:36,750  
is gonna come in this is what they find

188  
00:08:45,230 --> 00:08:40,650

on our website today let me talk about

189

00:08:47,780 --> 00:08:45,240

remote viewing now I was on the founding

190

00:08:49,700 --> 00:08:47,790

board of urbe and they really get upset

191

00:08:51,740 --> 00:08:49,710

when I say that cuz sometimes it works

192

00:08:55,190 --> 00:08:51,750

there's no doubt remote viewing does

193

00:08:58,730 --> 00:08:55,200

work at times says Joe mcmoneagle 0:01

194

00:09:00,980 --> 00:08:58,740

great case he was getting the target was

195

00:09:03,440 --> 00:09:00,990

Lawrence Livermore this is what he drove

196

00:09:05,900 --> 00:09:03,450

if you ever been deliver more this road

197

00:09:10,460 --> 00:09:05,910

really stands out well worth watching

198

00:09:12,650 --> 00:09:10,470

you know great target he was also given

199

00:09:15,620 --> 00:09:12,660

one of the ones as an example of what

200

00:09:17,570 --> 00:09:15,630

really works at a kh-11 photograph he

201  
00:09:20,690 --> 00:09:17,580  
was they were giving him a target grid

202  
00:09:23,980 --> 00:09:20,700  
coordinates way up north was a Soviet

203  
00:09:26,390 --> 00:09:23,990  
target and he came back and he reported

204  
00:09:28,190 --> 00:09:26,400  
that well they asked him that you first

205  
00:09:30,560 --> 00:09:28,200  
identified the building then they said

206  
00:09:33,020 --> 00:09:30,570  
what's in the buildings okay number of

207  
00:09:35,450 --> 00:09:33,030  
submarines there has 20 launch tubes

208  
00:09:37,900 --> 00:09:35,460  
forward of the sail nobody's ever seen

209  
00:09:40,850 --> 00:09:37,910  
that before double hulled

210  
00:09:42,200 --> 00:09:40,860  
a lot of different things now our

211  
00:09:44,840 --> 00:09:42,210  
response they gave it to the boat

212  
00:09:46,340 --> 00:09:44,850  
builders and they said that can't be

213  
00:09:49,340 --> 00:09:46,350

true there's no indication they're

214

00:09:51,410 --> 00:09:49,350

changing design and besides we can't do

215

00:09:54,200 --> 00:09:51,420

that it's too big if it went to depth it

216

00:09:56,420 --> 00:09:54,210

would crush this was the picture that he

217

00:09:58,850 --> 00:09:56,430

made of it and the satellite came on

218

00:10:03,410 --> 00:09:58,860

there was a typhoon class submarine we

219

00:10:04,760 --> 00:10:03,420

had totally missed it so this is another

220

00:10:07,580 --> 00:10:04,770

one just took it with Ingo Swann was

221

00:10:09,830 --> 00:10:07,590

with him last November an interesting

222

00:10:12,260 --> 00:10:09,840

target down here again not just remote

223

00:10:14,450 --> 00:10:12,270

viewing but actually using a model clay

224

00:10:17,240 --> 00:10:14,460

that's Bob Durant as the remote viewer

225

00:10:21,170 --> 00:10:17,250

civilian remote viewer who did that

226

00:10:24,350 --> 00:10:21,180

target now I am tired of hearing about

227

00:10:27,290 --> 00:10:24,360

the myth of military-grade remote

228

00:10:30,200 --> 00:10:27,300

viewing doesn't work I hope you should

229

00:10:33,110 --> 00:10:30,210

stay with me okay you see this guy is

230

00:10:35,450 --> 00:10:33,120

the trainer of all of those people that

231

00:10:37,400 --> 00:10:35,460

you've heard about he is that she was

232

00:10:39,710 --> 00:10:37,410

the guy stepping forward made a huge

233

00:10:41,420 --> 00:10:39,720

career one of the first things he

234

00:10:43,700 --> 00:10:41,430

they've probably familiar with coast to

235

00:10:46,160 --> 00:10:43,710

coast I came out there and when Hale

236

00:10:48,920 --> 00:10:46,170

Bopp was approaching said oh by the way

237

00:10:49,670 --> 00:10:48,930

behind Hale Bopp this is his wishes of

238

00:10:52,580 --> 00:10:49,680

some kind

239

00:10:58,730 --> 00:10:52,590

carrying pathogens they only come in and

240

00:11:00,470 --> 00:10:58,740

wipe out earth hasn't happened the next

241

00:11:03,230 --> 00:11:00,480

claim you go on the websites and check

242

00:11:05,960 --> 00:11:03,240

this all this is still there the farmer

243

00:11:10,280 --> 00:11:05,970

revote her a predicted with pin per

244

00:11:11,810 --> 00:11:10,290

precise accuracy where Steve Fossett you

245

00:11:15,230 --> 00:11:11,820

may remember Steve possible the pilots

246

00:11:16,879 --> 00:11:15,240

who crashed out there now he was found

247

00:11:18,619 --> 00:11:16,889

in the Sierra Nevadas

248

00:11:21,530 --> 00:11:18,629

did say he would be found the Sierra

249

00:11:23,989 --> 00:11:21,540

Nevadas that's an area of 28,000 miles

250

00:11:25,939 --> 00:11:23,999

the only mine of them on mountains in

251

00:11:30,619 --> 00:11:25,949

the area and the logical place for a

252

00:11:32,509 --> 00:11:30,629

crash as for the precise locations he

253

00:11:36,049 --> 00:11:32,519

was off by 60 miles which would have

254

00:11:37,579 --> 00:11:36,059

limited to about 11,000 square miles

255

00:11:39,889 --> 00:11:37,589

you know how precise he narrowed it down

256

00:11:41,960 --> 00:11:39,899

and of course the point is remote

257

00:11:44,030 --> 00:11:41,970

viewing had absolutely nothing to do

258

00:11:46,429 --> 00:11:44,040

with finding Fossett but if you go on

259

00:11:49,460 --> 00:11:46,439

the website today this is what you see

260

00:11:51,979 --> 00:11:49,470

there now he also told me a number of

261

00:11:53,780 --> 00:11:51,989

things and you can find some of the some

262

00:11:56,509 --> 00:11:53,790

stuff with Martians nobody had told me

263

00:11:58,849 --> 00:11:56,519

we were living in Santa Fe at Los Alamos

264

00:12:01,609 --> 00:11:58,859

that they're landing on top of Mount

265

00:12:04,429 --> 00:12:01,619

Baldy and they come down here and ended

266

00:12:06,289 --> 00:12:04,439

up at Santa Fe Institute there were

267

00:12:12,889 --> 00:12:06,299

tunnels that ran underground they went

268

00:12:15,319 --> 00:12:12,899

there now very gold mine would Institute

269

00:12:17,119 --> 00:12:15,329

was involved anything like that but

270

00:12:19,280 --> 00:12:17,129

there's a whole story and this will come

271

00:12:20,780 --> 00:12:19,290

back to us in just a little bit you know

272

00:12:23,329 --> 00:12:20,790

that they come to earth because of a

273

00:12:27,289 --> 00:12:23,339

cosmic accident they're on both planets

274

00:12:29,419 --> 00:12:27,299

they live in caves in Sirius effectively

275

00:12:31,909 --> 00:12:29,429

had babies doing it now

276

00:12:34,579 --> 00:12:31,919

Larry beat me to this one the other day

277

00:12:36,319 --> 00:12:34,589

and I thought appropriately when we saw

278

00:12:37,759 --> 00:12:36,329

this you know everybody laughed the guy

279

00:12:40,460 --> 00:12:37,769

predicted the end of the world probably

280

00:12:44,269 --> 00:12:40,470

saw it and so what happened three days

281

00:12:47,600 --> 00:12:44,279

later he says really happened but it was

282

00:12:48,470 --> 00:12:47,610

invisible emperor has no clothes now one

283

00:12:49,850 --> 00:12:48,480

of the things that we were talking about

284

00:12:51,650 --> 00:12:49,860

this point people who had given up

285

00:12:55,759 --> 00:12:51,660

fortunes sold their property to go out

286

00:12:59,329 --> 00:12:55,769

to meet the end of the world this guy's

287

00:13:02,119 --> 00:12:59,339

has this is a hundred and four assets of

288

00:13:03,559 --> 00:13:02,129

more than 104 million dollars so and

289

00:13:05,299 --> 00:13:03,569

this was not the first time his

290

00:13:08,059 --> 00:13:05,309

erroneously predicted the end of the

291

00:13:10,069 --> 00:13:08,069

world so the tie between reality money

292

00:13:13,460 --> 00:13:10,079

and these sorts of things just not there

293

00:13:15,559 --> 00:13:13,470

now he said everybody laughed last time

294

00:13:19,579 --> 00:13:15,569

this came up this morning in question

295

00:13:22,609 --> 00:13:19,589

because in 2008 we had this presented to

296

00:13:25,220 --> 00:13:22,619

us and you're and of course the point is

297

00:13:28,129 --> 00:13:25,230

quite at the end said hey but you've got

298

00:13:29,119 --> 00:13:28,139

to use remote viewing and get base it

299

00:13:30,480 --> 00:13:29,129

against reality

300

00:13:34,290 --> 00:13:30,490

we've got reality

301

00:13:37,260 --> 00:13:34,300

Elly axe is still there hasn't moved so

302

00:13:39,810 --> 00:13:37,270

the response was happened in another

303

00:13:44,760 --> 00:13:39,820

youniverse I'm sorry this sounds an

304

00:13:47,130 --> 00:13:44,770

awful lot like Harold Camping yeah and

305

00:13:49,340 --> 00:13:47,140

by the way if you came up with us all

306

00:13:53,579 --> 00:13:49,350

remote-viewing could be possible you got

307

00:13:56,880 --> 00:13:53,589

infinity squared as possibilities now

308

00:13:59,220 --> 00:13:56,890

last year we had another talk here this

309

00:14:02,130 --> 00:13:59,230

this was not scheduled but it popped in

310

00:14:06,120 --> 00:14:02,140

there it was talking about technology on

311

00:14:07,170 --> 00:14:06,130

Mars and part of it says that you know

312

00:14:09,150 --> 00:14:07,180

one of the slides is no

313

00:14:12,750 --> 00:14:09,160

extraterrestrials current current

314

00:14:15,930 --> 00:14:12,760

inhabitants could be humans possible

315

00:14:18,180 --> 00:14:15,940

military applications you can't see in

316

00:14:22,380 --> 00:14:18,190

the back so I'll read this this is from

317

00:14:24,000 --> 00:14:22,390

our website today ok this is not adding

318

00:14:26,670 --> 00:14:24,010

things to it this is there are

319

00:14:29,100 --> 00:14:26,680

unregistered flights going out of Cape

320

00:14:34,650 --> 00:14:29,110

Canaveral all the time that are never

321

00:14:36,780 --> 00:14:34,660

recorded to Mars let's understand if you

322

00:14:38,730 --> 00:14:36,790

live in Florida every time you lost from

323

00:14:40,319 --> 00:14:38,740

Canaveral you may not know what's on

324

00:14:43,590 --> 00:14:40,329

there but you damn sure know there was a

325

00:14:46,500 --> 00:14:43,600

launch so that we're sneaking it out so

326

00:14:49,560 --> 00:14:46,510

I argued that no this is not possible by

327

00:14:51,780 --> 00:14:49,570

the way when we went to the moon NASA

328

00:14:55,410 --> 00:14:51,790

had five point five percent of the

329

00:14:57,810 --> 00:14:55,420

budget in order to fund Apollo right now

330

00:14:59,880 --> 00:14:57,820

they're at zero point five percent we

331

00:15:01,319 --> 00:14:59,890

can't get back to the moon and you want

332

00:15:04,560 --> 00:15:01,329

to assert that we've got you know

333

00:15:07,410 --> 00:15:04,570

interactions going on with Mars yeah

334

00:15:09,030 --> 00:15:07,420

here's the problem as I see it for the

335

00:15:11,250 --> 00:15:09,040

SSE with these things there

336

00:15:14,790 --> 00:15:11,260

you know credibility is hard to gain

337

00:15:16,139 --> 00:15:14,800

it's really easy to lose and the other

338

00:15:17,880 --> 00:15:16,149

problem is you're not gonna be the only

339

00:15:20,970 --> 00:15:17,890

ever you're going to be known by your

340

00:15:24,930 --> 00:15:20,980

lower limits so I think we really have a

341

00:15:28,250 --> 00:15:24,940

problem and if you don't believe that

342

00:15:35,460 --> 00:15:28,260

look what's happened to Washington as to

343

00:15:38,490 --> 00:15:35,470

you know where their credibility is okay

344

00:15:40,680 --> 00:15:38,500

really quickly yeah I get asked if I

345

00:15:43,910 --> 00:15:40,690

have agenda I did write a book say why

346

00:15:46,250 --> 00:15:43,920

cuz I'm a masochist but

347

00:15:48,790 --> 00:15:46,260

Genda s I think there's a need to make

348

00:15:51,560 --> 00:15:48,800

it permissible for scientists to study

349

00:15:54,680 --> 00:15:51,570

phenomenology without risking their

350

00:15:56,900 --> 00:15:54,690

reputation their career and if we have

351

00:16:01,009 --> 00:15:56,910

this kinds of stuff up it will not be

352

00:16:02,780 --> 00:16:01,019

beneficial this is a chance shots you'll

353

00:16:04,220 --> 00:16:02,790

never see if you don't recognize them

354

00:16:06,470 --> 00:16:04,230

that's the amusing Randi

355

00:16:09,319 --> 00:16:06,480

but even though role ray hyman that

356

00:16:11,689 --> 00:16:09,329

there's not some skeptics do nothing

357

00:16:15,730 --> 00:16:11,699

because most of these groups self

358

00:16:19,100 --> 00:16:15,740

emulate and the conclusions of this

359

00:16:22,699 --> 00:16:19,110

researchers are working with very very

360

00:16:24,920 --> 00:16:22,709

weak signals the media focuses on the

361

00:16:27,470 --> 00:16:24,930

noise if we're going to continue a

362

00:16:29,569 --> 00:16:27,480

scientific organization think we need to

363

00:16:38,900 --> 00:16:29,579

not be contributing to the noise thank

364

00:16:40,790 --> 00:16:38,910

you excellent I'm sure there's a lot of

365

00:16:45,620 --> 00:16:40,800

questions we had people I should line up

366

00:16:48,130 --> 00:16:45,630

here so I feeling lazy and that way we

367

00:16:50,380 --> 00:16:48,140

can be sort of somewhat organized and

368

00:16:54,230 --> 00:16:50,390

then we can take turns okay

369

00:16:55,250 --> 00:16:54,240

John I applaud it applaud you for what

370

00:16:57,319 --> 00:16:55,260

you're saying here I don't always agree

371

00:17:01,280 --> 00:16:57,329

with you but you make a lot of good

372

00:17:04,100 --> 00:17:01,290

points so the problem is how do you not

373

00:17:08,289 --> 00:17:04,110

throw out good stuff along with the

374

00:17:12,260 --> 00:17:08,299

chaff in other words often we criticize

375

00:17:13,970 --> 00:17:12,270

other organizations for being biased and

376

00:17:16,939 --> 00:17:13,980

just throwing out a lot of valuable

377

00:17:19,280 --> 00:17:16,949

information and so our goal is to try to

378

00:17:22,010 --> 00:17:19,290

be inclusive even if we end up with some

379

00:17:23,659 --> 00:17:22,020

trash which we have to throw out you can

380

00:17:26,630 --> 00:17:23,669

do that if you wish to die

381

00:17:28,700 --> 00:17:26,640

I think it will drive the organization

382

00:17:31,220 --> 00:17:28,710

Center so how do what do you want to use

383

00:17:33,020 --> 00:17:31,230

is the criterion to make a distinction

384

00:17:35,480 --> 00:17:33,030

well I think when you get things that

385

00:17:43,310 --> 00:17:35,490

are demonstrably false now that would be

386

00:17:45,770 --> 00:17:43,320

a good place to stop okay John thank you

387

00:17:48,320 --> 00:17:45,780

very much you're touching on issues

388

00:17:52,130 --> 00:17:48,330

which unfortunately I have a lot of

389

00:17:54,289 --> 00:17:52,140

insight on and there were times when we

390

00:17:55,790 --> 00:17:54,299

also had to go through the same thing

391

00:17:58,100 --> 00:17:55,800

you're talking about

392

00:17:59,690 --> 00:17:58,110

and when certain people retired from the

393

00:18:02,990 --> 00:17:59,700

military that didn't stop them from

394

00:18:05,510 --> 00:18:03,000

becoming very vocal and that fed back

395

00:18:07,340 --> 00:18:05,520

and gave us the bad image in our program

396

00:18:09,590 --> 00:18:07,350

while we were still running and an under

397

00:18:12,020 --> 00:18:09,600

classified level so it really did hurt

398

00:18:13,580 --> 00:18:12,030

us badly and I think that's one of the

399

00:18:16,400 --> 00:18:13,590

factors that you eventually led to

400

00:18:19,310 --> 00:18:16,410

losing some congressional and support so

401  
00:18:21,050 --> 00:18:19,320  
yeah it's a real issue and I painfully

402  
00:18:22,790 --> 00:18:21,060  
aware of it in some of the characters

403  
00:18:25,430 --> 00:18:22,800  
and you know I have talked about many

404  
00:18:28,790 --> 00:18:25,440  
times but don't you think it's possible

405  
00:18:32,030 --> 00:18:28,800  
to have some kind of this cannot exactly

406  
00:18:35,510 --> 00:18:32,040  
disclaimer but some extra space if we're

407  
00:18:37,910 --> 00:18:35,520  
going in the SSE website where you might

408  
00:18:41,090 --> 00:18:37,920  
actually say here are some issues have

409  
00:18:43,520 --> 00:18:41,100  
come up as a unit as a group we don't

410  
00:18:45,590 --> 00:18:43,530  
necessarily agree or not agree agree we

411  
00:18:47,930 --> 00:18:45,600  
just want you missed it and my point is

412  
00:18:52,340 --> 00:18:47,940  
on our website there are no disclaimers

413  
00:18:55,070 --> 00:18:52,350

I showed you the one of you know Paul

414

00:18:57,710 --> 00:18:55,080

Hellyer's I mean it says we believe that

415

00:18:59,180 --> 00:18:57,720

et is here and we're interacting with

416

00:19:02,120 --> 00:18:59,190

them and have been and we ought to be

417

00:19:04,870 --> 00:19:02,130

welcome on that the same thing and I

418

00:19:08,420 --> 00:19:04,880

began I think Adams done a great job

419

00:19:10,370 --> 00:19:08,430

with what he's had to work but again if

420

00:19:11,360 --> 00:19:10,380

we want to go to outside industry as

421

00:19:12,830 --> 00:19:11,370

we're talking about looking for

422

00:19:15,560 --> 00:19:12,840

corporate sponsorship and they're going

423

00:19:17,990 --> 00:19:15,570

to come in and look you'd better be

424

00:19:19,790 --> 00:19:18,000

credible and you can identify things as

425

00:19:21,110 --> 00:19:19,800

hypothetical and settle inside I don't

426

00:19:24,530 --> 00:19:21,120

think any problem with that

427

00:19:28,970 --> 00:19:24,540

but again when you get to LAX is not

428

00:19:31,520 --> 00:19:28,980

underwater pretty demonstrable two quick

429

00:19:33,050 --> 00:19:31,530

questions now one I came from AT&T

430

00:19:34,910 --> 00:19:33,060

Laboratories I've been a member for a

431

00:19:36,920 --> 00:19:34,920

couple of years and when I talked to my

432

00:19:39,200 --> 00:19:36,930

vice president at the labs to say what

433

00:19:42,410 --> 00:19:39,210

am I going to do for my vacation she

434

00:19:46,970 --> 00:19:42,420

said and I tried to explain this logic

435

00:19:49,450 --> 00:19:46,980

way I have to read lips all right so her

436

00:19:51,890 --> 00:19:49,460

response was you're a weird boy I

437

00:19:53,630 --> 00:19:51,900

actually don't want to hear that kind of

438

00:19:55,790 --> 00:19:53,640

response because I think you mentioned

439

00:19:57,620 --> 00:19:55,800

there's some fabulous stuff there the

440

00:19:59,120 --> 00:19:57,630

second part of this was I couldn't agree

441

00:20:01,010 --> 00:19:59,130

more I hope to see a lot of rigor and

442

00:20:02,960 --> 00:20:01,020

the reason I came is to see if there's

443

00:20:04,520 --> 00:20:02,970

anything I can do just to help a little

444

00:20:06,350 --> 00:20:04,530

bit there's some techniques we developed

445

00:20:09,530 --> 00:20:06,360

at the labs and the machine learning

446

00:20:11,570 --> 00:20:09,540

community boosting that

447

00:20:15,980 --> 00:20:11,580

machine learning but they can be used I

448

00:20:18,110 --> 00:20:15,990

think to you to optimize signals the

449

00:20:20,450 --> 00:20:18,120

signal-to-noise ratio so I think there's

450

00:20:25,730 --> 00:20:20,460

some techniques we can apply to help

451

00:20:28,850 --> 00:20:25,740

with this exact problem thanks John

452

00:20:32,210 --> 00:20:28,860

since we don't discuss a lot of internal

453

00:20:34,550 --> 00:20:32,220

stuff before the wider community the

454

00:20:38,780 --> 00:20:34,560

rest of the SSC has no way to know that

455

00:20:42,650 --> 00:20:38,790

at the council meeting I made the

456

00:20:47,750 --> 00:20:42,660

mistake of volunteering to be chair of

457

00:20:49,520 --> 00:20:47,760

the online presence committee but in my

458

00:20:51,050 --> 00:20:49,530

capacity in that position I'll be

459

00:20:54,830 --> 00:20:51,060

working with Adam I'll be working with

460

00:20:58,240 --> 00:20:54,840

Mike Wilson I I would like to invite you

461

00:21:01,340 --> 00:20:58,250

to please send me or somebody your

462

00:21:04,160 --> 00:21:01,350

evaluation of what on the SSC website

463

00:21:07,280 --> 00:21:04,170

you see as really preposterous

464

00:21:09,350 --> 00:21:07,290

demonstrably untrue or discreditable I

465

00:21:11,600 --> 00:21:09,360

don't promise that we will follow all of

466

00:21:13,850 --> 00:21:11,610

your suggestions but I promise that they

467

00:21:15,920 --> 00:21:13,860

will be paid attention to appreciate it

468

00:21:17,760 --> 00:21:15,930

but some of its demonstrable you there
