

Society for Scientific Exploration

1
00:00:03,300 --> 00:00:09,570

[Music]

2
00:00:14,320 --> 00:00:12,190

like good morning everyone my talk this

3
00:00:16,600 --> 00:00:14,330

morning is entitled chemical biology and

4
00:00:19,749 --> 00:00:16,610

radionics and healing but it could just

5
00:00:23,530 --> 00:00:19,759

as easily I could just as easily flipped

6
00:00:26,019 --> 00:00:23,540

terms around and talk about radionics

7
00:00:27,850 --> 00:00:26,029

chemical biology and healing so this is

8
00:00:29,650 --> 00:00:27,860

gonna be an overview talk and he these

9
00:00:34,900 --> 00:00:29,660

are some of the points I hope to catch

10
00:00:36,670 --> 00:00:34,910

today so my first of all my definitions

11
00:00:38,619 --> 00:00:36,680

of the terms in the title are gonna be

12
00:00:42,340 --> 00:00:38,629

something like the following chemical

13
00:00:46,270 --> 00:00:42,350

biology is a focus on this smaller

14

00:00:48,940 --> 00:00:46,280

aspects of biochemistry radionics for

15

00:00:54,819 --> 00:00:48,950

those unfamiliar with it is this was a

16

00:00:57,069 --> 00:00:54,829

sort of a transmission based method to

17

00:01:00,340 --> 00:00:57,079

bolt to treat diseases and also is based

18

00:01:02,800 --> 00:01:00,350

on incorporates the idea of reading so

19

00:01:05,649 --> 00:01:02,810

that you do a reading and then you can

20

00:01:08,050 --> 00:01:05,659

broadcast in the vibrational you know

21

00:01:11,800 --> 00:01:08,060

with the idea of vibration being going

22

00:01:16,209 --> 00:01:11,810

both ways and the someone mentioned

23

00:01:17,830 --> 00:01:16,219

earlier I think build it about hair hair

24

00:01:21,340 --> 00:01:17,840

and reading and envelopes those types of

25

00:01:26,739 --> 00:01:21,350

ideas were in radionics since abrams

26

00:01:28,480 --> 00:01:26,749

time in the 20s finally dealing will be

27

00:01:30,249 --> 00:01:28,490

the reversal the disease state and

28

00:01:33,429 --> 00:01:30,259

return to normal physiology and

29

00:01:37,480 --> 00:01:33,439

structure much like the examples bill

30

00:01:41,169 --> 00:01:37,490

cited earlier and so in the course of my

31

00:01:43,059 --> 00:01:41,179

reading i'll mention dr. Hale there whom

32

00:01:45,749 --> 00:01:43,069

I'll describe momentarily

33

00:01:48,760 --> 00:01:45,759

cited the work of Felix Bloch and

34

00:01:51,429 --> 00:01:48,770

Purcell in 1953 whether for their

35

00:01:56,109 --> 00:01:51,439

nuclear magnetic resonance work as a

36

00:01:57,819 --> 00:01:56,119

possible mechanism so the ideas I'd like

37

00:01:59,919 --> 00:01:57,829

to cover right now and the researchers

38

00:02:02,309 --> 00:01:59,929

are first of all the person I've been

39

00:02:05,500 --> 00:02:02,319

researching for a long time

40

00:02:10,000 --> 00:02:05,510

physiologist William F coke and

41

00:02:12,430 --> 00:02:10,010

he used very small molecules carbonyl

42

00:02:16,810 --> 00:02:12,440

compounds with molecular weights of

43

00:02:18,730 --> 00:02:16,820

maybe 80 to 200 are good examples and he

44

00:02:20,650 --> 00:02:18,740

treated all kinds of diseases but in

45

00:02:26,710 --> 00:02:20,660

particular he was most noted for cancer

46

00:02:29,260 --> 00:02:26,720

but diabetes tuberculosis in humans in

47

00:02:31,840 --> 00:02:29,270

addition to mastitis

48

00:02:33,520 --> 00:02:31,850

in dairy cattle and there was a little

49

00:02:36,070 --> 00:02:33,530

bit of mouse research but for the most

50

00:02:39,070 --> 00:02:36,080

part he didn't need it you accomplished

51
00:02:42,640 --> 00:02:39,080
that earlier building stands work I want

52
00:02:45,090 --> 00:02:42,650
to compare to this as I have in the past

53
00:02:46,690 --> 00:02:45,100
I'm going to suggest just for

54
00:02:48,720 --> 00:02:46,700
conceptually think of it as a

55
00:02:52,540 --> 00:02:48,730
transmission whether or not it's correct

56
00:02:55,270 --> 00:02:52,550
that's bills issue and similarly like

57
00:02:57,670 --> 00:02:55,280
Coke bills treated cancer and I'll

58
00:03:01,990 --> 00:02:57,680
explain the chiral and a chiral aspects

59
00:03:04,630 --> 00:03:02,000
later George Lakoff ski was a French

60
00:03:06,610 --> 00:03:04,640
franco-russian researcher who was known

61
00:03:08,410 --> 00:03:06,620
for his multiwave oscillator and he too

62
00:03:12,720 --> 00:03:08,420
treated cancer and I'll show some

63
00:03:15,430 --> 00:03:12,730

pictures of him his work and and then

64

00:03:18,040 --> 00:03:15,440

hailed whom I mentioned earlier was

65

00:03:21,190 --> 00:03:18,050

doing some radionics research in his

66

00:03:23,440 --> 00:03:21,200

life at the end of his life and some of

67

00:03:26,229 --> 00:03:23,450

the examples of diseases that were

68

00:03:29,290 --> 00:03:26,239

treated by Abrams early on the founder

69

00:03:31,060 --> 00:03:29,300

of radionics were tuberculosis and

70

00:03:32,740 --> 00:03:31,070

cancer but I'm drawing a distinction

71

00:03:36,509 --> 00:03:32,750

here because although most people think

72

00:03:39,580 --> 00:03:36,519

of radionics as involving healing

73

00:03:44,020 --> 00:03:39,590

there's also the anti healing aspect

74

00:03:46,540 --> 00:03:44,030

that hale talked about discussed in his

75

00:03:48,060 --> 00:03:46,550

research and then finally I want to

76

00:03:50,650 --> 00:03:48,070

bring in something that might seem

77

00:03:51,729 --> 00:03:50,660

unrelated but that's the work of Tom

78

00:03:55,840 --> 00:03:51,739

Dijkstra whom everyone here probably

79

00:03:59,440 --> 00:03:55,850

knows and his ideas of olfaction e/m

80

00:04:01,479 --> 00:03:59,450

olfaction in insects and so these are

81

00:04:03,190 --> 00:04:01,489

cures and then I'm gonna argue I'm going

82

00:04:05,550 --> 00:04:03,200

to suggest that these are this the

83

00:04:09,400 --> 00:04:05,560

olfaction idea is a similar

84

00:04:10,960 --> 00:04:09,410

manifestation of of the healing process

85

00:04:13,210 --> 00:04:10,970

so rather than call it healing I'm

86

00:04:15,059 --> 00:04:13,220

calling it a bio effect in these four we

87

00:04:16,650 --> 00:04:15,069

have healing and in this

88

00:04:18,659 --> 00:04:16,660

we have a different reaction being

89

00:04:21,330 --> 00:04:18,669

initiated that's what I'm suggesting and

90

00:04:25,830 --> 00:04:21,340

I'm gonna go into the what that would

91

00:04:28,370 --> 00:04:25,840

imply from from the chemistry of it so

92

00:04:31,320 --> 00:04:28,380

first of all I want to talk about how I

93

00:04:33,120 --> 00:04:31,330

about the genesis of this talk and that

94

00:04:35,640 --> 00:04:33,130

has to do when I was going through some

95

00:04:39,210 --> 00:04:35,650

of William J Hales papers and this is a

96

00:04:41,850 --> 00:04:39,220

bit of Hale's biography he did his PhD

97

00:04:44,189 --> 00:04:41,860

at Harvard did a little year in year in

98

00:04:46,230 --> 00:04:44,199

Europe was professor chemistry at

99

00:04:48,689 --> 00:04:46,240

University of Michigan for 15 years was

100

00:04:52,080 --> 00:04:48,699

invited to Midland Michigan by Herbert

101
00:04:54,150 --> 00:04:52,090
Dow the founder Dow Chemical to talk

102
00:04:56,670 --> 00:04:54,160
about to discuss organic organic

103
00:05:00,120 --> 00:04:56,680
chemistry her Bergdahl realized they

104
00:05:03,029 --> 00:05:00,130
needed to get with organic chemistry yep

105
00:05:05,490 --> 00:05:03,039
to have some organic chemistry research

106
00:05:10,200 --> 00:05:05,500
so Hale left the University of Michigan

107
00:05:12,600 --> 00:05:10,210
and founded Dow Chemicals department of

108
00:05:13,320 --> 00:05:12,610
the organic chemistry research division

109
00:05:16,999 --> 00:05:13,330
of Tao chemical

110
00:05:19,620 --> 00:05:17,009
and then early round in his life he was

111
00:05:22,589 --> 00:05:19,630
on the National Research Council and

112
00:05:25,339 --> 00:05:22,599
then in the 30s after he left out he he

113
00:05:28,140 --> 00:05:25,349

was a founder of Kemmer G which is the

114

00:05:30,570 --> 00:05:28,150

root words Fork energy or chemistry

115

00:05:32,820 --> 00:05:30,580

obviously and then OG has worked so he

116

00:05:34,409 --> 00:05:32,830

was kind of a pioneer and so people know

117

00:05:38,700 --> 00:05:34,419

about Henry Ford's idea of soybeans

118

00:05:40,050 --> 00:05:38,710

that's the work of William J Hale so in

119

00:05:44,460 --> 00:05:40,060

going through his papers I found this

120

00:05:46,290 --> 00:05:44,470

really interesting letter so what Hale

121

00:05:47,969 --> 00:05:46,300

was doing is he was drawing up

122

00:05:49,800 --> 00:05:47,979

perspectives for the home a tronic

123

00:05:52,409 --> 00:05:49,810

Foundation which was doing radeon acree

124

00:05:56,249 --> 00:05:52,419

search and he was querying the three

125

00:05:59,480 --> 00:05:56,259

principals for some biographical

126
00:06:02,939 --> 00:05:59,490
information and this this quote appeared

127
00:06:04,499 --> 00:06:02,949
in curtis Upton's reply to william hale

128
00:06:06,839 --> 00:06:04,509
for the biographical information

129
00:06:09,930 --> 00:06:06,849
then came the bus coach in Bantam egg

130
00:06:11,399 --> 00:06:09,940
that so that's a chicken the buff coach

131
00:06:13,140 --> 00:06:11,409
and benham egg that hatched out with a

132
00:06:15,120 --> 00:06:13,150
pheasant feather on the chick

133
00:06:17,580 --> 00:06:15,130
since the eggs were being charged with

134
00:06:19,260 --> 00:06:17,590
the stresses of a of a feather from a

135
00:06:20,909 --> 00:06:19,270
pheasant so what he would have done he's

136
00:06:22,980 --> 00:06:20,919
put a pheasant feather in them in the

137
00:06:24,899 --> 00:06:22,990
machine you broadcast it and the chick

138
00:06:26,820 --> 00:06:24,909

hashed out where the pheasant feather I

139

00:06:27,629 --> 00:06:26,830

don't have it it was sort of like that

140

00:06:30,270 --> 00:06:27,639

was

141

00:06:32,070 --> 00:06:30,280

he mentioned this because in to explain

142

00:06:34,230 --> 00:06:32,080

his interest his ongoing interest at

143

00:06:36,629 --> 00:06:34,240

radionics and his fascination with it so

144

00:06:39,809 --> 00:06:36,639

Hale wanted to so what they had been

145

00:06:42,300 --> 00:06:39,819

doing with the UH cockle process Upton

146

00:06:43,409 --> 00:06:42,310

news armstrong company and they were the

147

00:06:46,339 --> 00:06:43,419

principles in the home a tronic

148

00:06:50,159 --> 00:06:46,349

foundation they were principally doing

149

00:06:55,019 --> 00:06:50,169

insect research I mean trying to do pest

150

00:06:56,969 --> 00:06:55,029

control for agricultural work so when

151
00:06:59,100 --> 00:06:56,979
you think about this claim it seems

152
00:07:01,019 --> 00:06:59,110
pretty amazing that how is it that

153
00:07:02,939 --> 00:07:01,029
you're changing the makeup of a chicken

154
00:07:05,219 --> 00:07:02,949
to look like a pheasant so I'm going to

155
00:07:07,019 --> 00:07:05,229
suggest that we entertain the idea that

156
00:07:08,730 --> 00:07:07,029
this is correct that this really

157
00:07:11,879 --> 00:07:08,740
happened so let's think about what would

158
00:07:15,119 --> 00:07:11,889
it take for to accomplish to affect that

159
00:07:18,149 --> 00:07:15,129
change so these are some of so these are

160
00:07:19,649 --> 00:07:18,159
the questions I'm asking of what would

161
00:07:20,999 --> 00:07:19,659
be required so I'm just I would

162
00:07:24,360 --> 00:07:21,009
encourage you to think about that and

163
00:07:28,589 --> 00:07:24,370

what would be required to make to effect

164

00:07:32,309 --> 00:07:28,599

these changes in the egg and so I ran

165

00:07:35,610 --> 00:07:32,319

across the idea of chiral catalysis and

166

00:07:40,619 --> 00:07:35,620

then I did a little reading and found

167

00:07:42,749 --> 00:07:40,629

this lecture by REO Shino Yoli and in

168

00:07:45,719 --> 00:07:42,759

summary he says naturist chiral so going

169

00:07:47,850 --> 00:07:45,729

to his Nobel Prize lecture chirality

170

00:07:50,100 --> 00:07:47,860

again is for those unfamiliar with it

171

00:07:51,990 --> 00:07:50,110

you know your left hand and your right

172

00:07:53,249 --> 00:07:52,000

hand are presumably pretty close to

173

00:07:58,499 --> 00:07:53,259

identical but the difference is their

174

00:08:00,929 --> 00:07:58,509

opposite so he talks about physiological

175

00:08:04,610 --> 00:08:00,939

processes are very dependent upon the

176

00:08:07,559 --> 00:08:04,620

correct in aunt immers and I'm saying

177

00:08:10,619 --> 00:08:07,569

here this is I think key chiral

178

00:08:13,619 --> 00:08:10,629

receptors require absolute configuration

179

00:08:15,990 --> 00:08:13,629

to for control and seemingly it was

180

00:08:17,760 --> 00:08:16,000

fairly recent that that drug companies

181

00:08:19,519 --> 00:08:17,770

for example have been incorporating this

182

00:08:22,050 --> 00:08:19,529

because he said there were some

183

00:08:25,709 --> 00:08:22,060

disasters when racemic mixtures that

184

00:08:28,320 --> 00:08:25,719

means an equal mixture of both were used

185

00:08:30,869 --> 00:08:28,330

in drugs and a different in antemer has

186

00:08:32,310 --> 00:08:30,879

a different effect so the so the idea

187

00:08:34,560 --> 00:08:32,320

what I want you to come away from here

188

00:08:37,290 --> 00:08:34,570

is the idea of transmission in radionics

189

00:08:39,809 --> 00:08:37,300

from the chicken egg so your so somehow

190

00:08:41,939 --> 00:08:39,819

one way or another

191

00:08:43,649 --> 00:08:41,949

the information from the pheasant

192

00:08:45,780 --> 00:08:43,659

feathers being broadcast transmitted to

193

00:08:47,849 --> 00:08:45,790

the egg and the egg the chick whatever

194

00:08:50,220 --> 00:08:47,859

is receiving it

195

00:08:52,590 --> 00:08:50,230

hail also claimed that sent can be

196

00:08:54,989 --> 00:08:52,600

broadcast so I mentioned if they were

197

00:08:57,780 --> 00:08:54,999

doing insect control so in a letter to

198

00:09:01,859 --> 00:08:57,790

one of his former Dow Chemical

199

00:09:03,720 --> 00:09:01,869

colleagues and mr. greevy wasn't very

200

00:09:06,269 --> 00:09:03,730

receptive to these ideas so he was

201
00:09:08,069 --> 00:09:06,279
challenging him that they could send oh

202
00:09:10,169 --> 00:09:08,079
they could transmit odors that I think

203
00:09:13,729 --> 00:09:10,179
he said ten to twenty miles and you

204
00:09:24,809 --> 00:09:20,939
okay so okay okay now since I started

205
00:09:27,629 --> 00:09:24,819
with hail it's important to talk about

206
00:09:28,889 --> 00:09:27,639
the real originator of radionics and

207
00:09:32,309 --> 00:09:28,899
that was dr. Albert Abrams

208
00:09:34,859 --> 00:09:32,319
he was a San Francisco MD and he had

209
00:09:36,090 --> 00:09:34,869
learned I mean he had become aware

210
00:09:39,900 --> 00:09:36,100
through these phenomena through

211
00:09:46,280 --> 00:09:39,910
percussion and then developed the radion

212
00:09:53,850 --> 00:09:49,189
MD until he started getting into

213
00:09:59,699 --> 00:09:53,860

electronic medicine let's see so I found

214

00:10:01,109 --> 00:09:59,709

a 1925 edition of a book citing radion

215

00:10:05,179 --> 00:10:01,119

of case histories and it looks like

216

00:10:08,189 --> 00:10:05,189

you're seeing TB was commonly mentioned

217

00:10:09,389 --> 00:10:08,199

cancer was there and I kind of went

218

00:10:10,650 --> 00:10:09,399

through because they were it was a

219

00:10:17,580 --> 00:10:10,660

heterogeneous collection of case

220

00:10:25,650 --> 00:10:22,740

so so this was a little bit of to show

221

00:10:29,340 --> 00:10:25,660

you how poor his reception was this was

222

00:10:30,870 --> 00:10:29,350

was the comment by the head of the

223

00:10:33,780 --> 00:10:30,880

British Medical Society talking about

224

00:10:36,120 --> 00:10:33,790

the abuse Abrams Abrams received by

225

00:10:37,860 --> 00:10:36,130

American medical authorities okay so I

226

00:10:41,820 --> 00:10:37,870

want to move on the idea of chirality

227

00:10:44,100 --> 00:10:41,830

and transmission here's another view

228

00:10:52,110 --> 00:10:44,110

much like Tom Dijkstra's that insects

229

00:10:55,740 --> 00:10:52,120

locate by smell and that's being radar

230

00:10:57,930 --> 00:10:55,750

and so again if you're smelling

231

00:11:01,170 --> 00:10:57,940

if Noyola Ruiz right then that would

232

00:11:02,940 --> 00:11:01,180

mean that for an insect to be able to

233

00:11:04,080 --> 00:11:02,950

discriminate between the two it would

234

00:11:07,890 --> 00:11:04,090

have to be able to discriminate between

235

00:11:10,650 --> 00:11:07,900

two and anta MERS okay I'm gonna have to

236

00:11:12,810 --> 00:11:10,660

go really quickly here now getting back

237

00:11:16,020 --> 00:11:12,820

to how this might relate to bills work

238

00:11:18,570 --> 00:11:16,030

you'd the the koch cares the abram

239

00:11:22,590 --> 00:11:18,580

skiers and bingston skiers i'll follow a

240

00:11:25,080 --> 00:11:22,600

fairly similar remission pattern these

241

00:11:28,080 --> 00:11:25,090

are bills comments from his 2001 talk

242

00:11:29,460 --> 00:11:28,090

and so he talks here as he did today

243

00:11:33,510 --> 00:11:29,470

about bursts of healing large

244

00:11:35,220 --> 00:11:33,520

alterations he guess i didn't mention it

245

00:11:38,880 --> 00:11:35,230

but he talks about skin being off and

246

00:11:40,500 --> 00:11:38,890

let's see so these were some of dr.

247

00:11:42,960 --> 00:11:40,510

cokes compounds i'm gonna have to go

248

00:11:49,350 --> 00:11:42,970

through very quickly here this this I

249

00:11:51,960 --> 00:11:49,360

wanted to show because this was is an

250

00:11:53,580 --> 00:11:51,970

example oh no this is dr. coke slide so

251
00:11:56,160 --> 00:11:53,590
here's a really extreme case of breast

252
00:11:57,980 --> 00:11:56,170
cancer and normally I don't or he

253
00:12:00,780 --> 00:11:57,990
wouldn't usually do

254
00:12:02,280 --> 00:12:00,790
mastectomy 's but this one was obviously

255
00:12:04,080 --> 00:12:02,290
pretty bad but so it's important to

256
00:12:06,720 --> 00:12:04,090
notice like Bill talked earlier about

257
00:12:08,370 --> 00:12:06,730
skin and his earlier talk you'll notice

258
00:12:10,110 --> 00:12:08,380
how bad the skin is in this patient and

259
00:12:16,080 --> 00:12:10,120
notice how much better it is in the

260
00:12:17,820 --> 00:12:16,090
subsequent patient okay so now bill was

261
00:12:23,220 --> 00:12:17,830
bill had found in his book that

262
00:12:25,680 --> 00:12:23,230
radiation negatively influences negative

263
00:12:27,630 --> 00:12:25,690

I mean impairs his ability to heal dr.

264

00:12:29,480 --> 00:12:27,640

coke talked about that as well and this

265

00:12:31,739 --> 00:12:29,490

is from his doctor

266

00:12:34,769 --> 00:12:31,749

19:29 book I'm gonna go the next page

267

00:12:39,030 --> 00:12:34,779

here these are a chap these are chapters

268

00:12:40,650 --> 00:12:39,040

in the 1929 book so they're that so it's

269

00:12:42,540 --> 00:12:40,660

clear that he showed there was a

270

00:12:44,730 --> 00:12:42,550

recovery that had a common reaction

271

00:12:46,199 --> 00:12:44,740

talked about rate of reaction talked

272

00:12:48,359 --> 00:12:46,209

about the absorption of tissue and

273

00:12:50,939 --> 00:12:48,369

factors that prevent recovery that would

274

00:12:53,579 --> 00:12:50,949

be radiation would be one of those okay

275

00:12:55,530 --> 00:12:53,589

here here are cokes molecules or three

276

00:12:58,889 --> 00:12:55,540

of his compounds are most commonly used

277

00:13:01,919 --> 00:12:58,899

compounds okay I'm gonna have to fast

278

00:13:05,939 --> 00:13:01,929

forward as you can see the molecules are

279

00:13:08,790 --> 00:13:05,949

planar and maybe and so a chiral here a

280

00:13:11,009 --> 00:13:08,800

chiral there and now I want to go back

281

00:13:12,929 --> 00:13:11,019

to that previous quote in blue now bill

282

00:13:15,150 --> 00:13:12,939

talked about the speed that which is

283

00:13:17,730 --> 00:13:15,160

mice remit so I would argue that bills

284

00:13:20,489 --> 00:13:17,740

mice remit very quickly because they

285

00:13:22,259 --> 00:13:20,499

hadn't had a long they hadn't been sick

286

00:13:24,840 --> 00:13:22,269

for long it's a very artificial state to

287

00:13:27,749 --> 00:13:24,850

be injected few people get injections by

288

00:13:29,579 --> 00:13:27,759

giant needles but but when a disease

289

00:13:31,980 --> 00:13:29,589

when a cancer condition did arrive very

290

00:13:33,629 --> 00:13:31,990

quickly out of blue shall we say this is

291

00:13:34,860 --> 00:13:33,639

what dr. Koch found when the system is

292

00:13:37,799 --> 00:13:34,870

suddenly flooded with attacks and

293

00:13:40,110 --> 00:13:37,809

especially with one sensitive to the

294

00:13:42,449 --> 00:13:40,120

toxin rapid girl that spread this tissue

295

00:13:44,220 --> 00:13:42,459

is the sub such cases recover

296

00:13:46,319 --> 00:13:44,230

exceedingly rapidly so that's already

297

00:13:48,389 --> 00:13:46,329

that's what dr. Koch wrote in 1929

298

00:13:54,449 --> 00:13:48,399

probably out of print by the time that

299

00:13:58,829 --> 00:13:54,459

was born let's see so let's see here

300

00:13:59,999 --> 00:13:58,839

it's gonna be here is Alec offski case

301

00:14:03,090 --> 00:14:00,009

I'm citing it even though it's very

302

00:14:04,889 --> 00:14:03,100

different but you're gonna see you're

303

00:14:06,929 --> 00:14:04,899

gonna see a similar pattern this is what

304

00:14:10,710 --> 00:14:06,939

I'm gonna call two photos this is where

305

00:14:13,110 --> 00:14:10,720

this was March 1934 this is where the

306

00:14:16,350 --> 00:14:13,120

case came when the when the patient when

307

00:14:19,259 --> 00:14:16,360

she arrived about a month later this is

308

00:14:22,230 --> 00:14:19,269

where this is the regression he noticed

309

00:14:23,999 --> 00:14:22,240

there the dark spots and then a month

310

00:14:26,419 --> 00:14:24,009

after this picture was taken notice a

311

00:14:28,799 --> 00:14:26,429

significant amount of improvement and

312

00:14:30,119 --> 00:14:28,809

there's a little black spot there but

313

00:14:33,569 --> 00:14:30,129

you can see her eyes are beginning to

314

00:14:38,170 --> 00:14:33,579

recur and that was lupus of the face is

315

00:14:41,680 --> 00:14:38,180

what Lacaze described that as let's see

316

00:14:44,530 --> 00:14:41,690

that's not different okay

317

00:14:49,000 --> 00:14:44,540

here's some little similar work-related

318

00:14:50,830 --> 00:14:49,010

stuff perhaps what happens when with

319

00:14:54,130 --> 00:14:50,840

tissue growth so the idea I'm going for

320

00:14:57,190 --> 00:14:54,140

is is there a chiral complex signal much

321

00:14:59,830 --> 00:14:57,200

like the pheasant feather when you when

322

00:15:01,360 --> 00:14:59,840

the tissue has been there long enough

323

00:15:04,780 --> 00:15:01,370

and is transplanted you have the form of

324

00:15:07,330 --> 00:15:04,790

the foot if it's transplanted early then

325

00:15:09,640 --> 00:15:07,340

you get a tail so the idea would be from

326

00:15:11,050 --> 00:15:09,650

Becker that the signal that informs the

327

00:15:12,880 --> 00:15:11,060

tail of the structure the tail growth is

328

00:15:17,050 --> 00:15:12,890

coming from here whereas in this case

329

00:15:19,810 --> 00:15:17,060

it's obviously coming from the arm when

330

00:15:23,920 --> 00:15:19,820

it's done when it's had time to have it

331

00:15:38,470 --> 00:15:23,930

signal from here okay I guess my time is

332

00:15:40,690 --> 00:15:38,480

up any questions yeah could you talk a

333

00:15:43,570 --> 00:15:40,700

little bit about the mechanism they use

334

00:15:45,370 --> 00:15:43,580

to transfer in radionics like to

335

00:15:48,670 --> 00:15:45,380

transfer the energy in with information

336

00:15:51,190 --> 00:15:48,680

well Hale you mean so Hale talked about

337

00:15:53,710 --> 00:15:51,200

a broadcast a broadcasting device and he

338

00:15:56,680 --> 00:15:53,720

he described he devoted two pages of his

339

00:15:59,770 --> 00:15:56,690

last book to this and he said it uses

340

00:16:01,630 --> 00:15:59,780

about as much energy as a like a 75 watt

341

00:16:03,760 --> 00:16:01,640

light bulb and the idea is I'm not quite

342

00:16:06,070 --> 00:16:03,770

sure how it works but that you put you

343

00:16:07,840 --> 00:16:06,080

have a Botha target that you want it

344

00:16:09,970 --> 00:16:07,850

sent to of the signal sent to and

345

00:16:11,130 --> 00:16:09,980

whatever it is you want sent to the

346

00:16:17,730 --> 00:16:11,140

target

347

00:16:20,620 --> 00:16:17,740

so there's have I answered your question

348

00:16:22,720 --> 00:16:20,630

and so isn't that picture could be a

349

00:16:24,010 --> 00:16:22,730

target his last book was called chemin

350

00:16:30,280 --> 00:16:24,020

vision and he only devotes about two

351

00:16:36,809 --> 00:16:30,290

pages to it okay 1951 I believe any

352

00:16:39,910 --> 00:16:38,949

thanks so much for your talk I don't

353

00:16:42,519 --> 00:16:39,920

hear very many people talk about

354

00:16:44,980 --> 00:16:42,529

psychotronics do you want to mention the

355

00:16:47,160 --> 00:16:44,990

psychotronics association in their

356

00:16:49,900 --> 00:16:47,170

conference coming up later this year

357

00:16:51,970 --> 00:16:49,910

what what I like to mention it yeah

358

00:16:54,429 --> 00:16:51,980

I assume you're probably aware of it or

359

00:16:56,049 --> 00:16:54,439

I have I have attended one once yes yeah

360

00:16:57,610 --> 00:16:56,059

there are a couple of people here that I

361

00:16:59,139 --> 00:16:57,620

think know about it but and it was

362

00:17:01,360 --> 00:16:59,149

really cool seeing when I was there I

363

00:17:02,799 --> 00:17:01,370

think was 2002 there were old radionics

364

00:17:04,149 --> 00:17:02,809

means being auctioned off and it was

365

00:17:06,069 --> 00:17:04,159

really cool seeing the giant wooden

366

00:17:08,679 --> 00:17:06,079

boxes with a million knobs on them yeah

367

00:17:09,819 --> 00:17:08,689

but I was new to that then so I just as

368

00:17:11,230 --> 00:17:09,829

some people didn't know about this

369

00:17:13,059 --> 00:17:11,240

organization I thought I'd mentioned

370

00:17:16,059 --> 00:17:13,069

that there is this organization called

371

00:17:23,519 --> 00:17:16,069

the u.s. psychotronics Association and
