

**THE DEPARTMENT OF
DEFENSE AND
UFOS REDUX**

J O H N A L E X A N D E R

**SOCIETY
FOR
SCIENTIFIC
EXPLORATION**

1
00:00:09,560 --> 00:00:07,700
you know all of what you just heard is

2
00:00:12,440 --> 00:00:09,570
very interesting Held's a colleague

3
00:00:16,420 --> 00:00:12,450
we've been at this for decades literally

4
00:00:19,159 --> 00:00:16,430
and what I'm going to suggest is that

5
00:00:21,470 --> 00:00:19,169
while the story that came out in New

6
00:00:23,569 --> 00:00:21,480
York Times said Wow is it wonderful and

7
00:00:28,190 --> 00:00:23,579
new I'm gonna tell you about some things

8
00:00:30,709 --> 00:00:28,200
that are probably not so new yeah this

9
00:00:33,170 --> 00:00:30,719
is some young guy who was in the

10
00:00:36,260 --> 00:00:33,180
Pentagon and decided to do that I'll

11
00:00:39,220 --> 00:00:36,270
tell you about my position just so you

12
00:00:42,610 --> 00:00:39,230
know UFOs by definition must be real

13
00:00:45,349 --> 00:00:42,620

that doesn't state what they are the

14

00:00:47,450 --> 00:00:45,359

evidence that supports the physical

15

00:00:51,649 --> 00:00:47,460

evidence supporting you know the reality

16

00:00:54,049 --> 00:00:51,659

I think is absolutely overwhelming and

17

00:00:57,200 --> 00:00:54,059

my bottom line in fact lastly in the

18

00:01:02,599 --> 00:00:57,210

book is that whatever this is it is

19

00:01:06,170 --> 00:01:02,609

terribly complex I also do all my things

20

00:01:07,610 --> 00:01:06,180

with a bias so you know up front a lot

21

00:01:10,820 --> 00:01:07,620

of people don't know what their bias to

22

00:01:13,810 --> 00:01:10,830

of mine is in mine is that when you look

23

00:01:16,340 --> 00:01:13,820

at all this wide range of phenomena from

24

00:01:19,340 --> 00:01:16,350

you know remote viewing near-death

25

00:01:21,370 --> 00:01:19,350

studies post-mortem communication even

26

00:01:25,430 --> 00:01:21,380

interspecies communication

27

00:01:27,680 --> 00:01:25,440

psychokinesis and even cryptozoology and

28

00:01:30,890 --> 00:01:27,690

you are follows I think they're all

29

00:01:33,200 --> 00:01:30,900

connected and it consciousness is a key

30

00:01:37,370 --> 00:01:33,210

piece they've been involved in studies

31

00:01:39,770 --> 00:01:37,380

with most of them so here's a good news

32

00:01:42,440 --> 00:01:39,780

and the bad news as you keep saying you

33

00:01:44,060 --> 00:01:42,450

know what the government knows what is

34

00:01:45,350 --> 00:01:44,070

the government here you know first of

35

00:01:47,600 --> 00:01:45,360

all you have to understand the

36

00:01:49,790 --> 00:01:47,610

complexity of the government we have

37

00:01:52,370 --> 00:01:49,800

three branches and the government is you

38

00:01:55,490 --> 00:01:52,380

know the executive legislative and

39

00:01:57,260 --> 00:01:55,500

judicial when you start looking at what

40

00:02:00,080 --> 00:01:57,270

does that mean in the pure number of

41

00:02:03,350 --> 00:02:00,090

people civilian or talking federal

42

00:02:08,150 --> 00:02:03,360

government level about 2.7 million

43

00:02:11,850 --> 00:02:08,160

civilians in there more than two million

44

00:02:16,170 --> 00:02:11,860

additional in the military both active

45

00:02:19,410 --> 00:02:16,180

and Reserve well the years about a 10%

46

00:02:22,500 --> 00:02:19,420

figure what we know from various surveys

47

00:02:25,170 --> 00:02:22,510

is about 10% of the population believe

48

00:02:27,390 --> 00:02:25,180

they have seen a UFO begin at the

49

00:02:30,270 --> 00:02:27,400

broader phenomenon you get up in the 70%

50

00:02:33,030 --> 00:02:30,280

level who have in it that means a whole

51
00:02:36,270 --> 00:02:33,040
lot of these people have probably seen

52
00:02:40,620 --> 00:02:36,280
UFOs but from an institutional

53
00:02:42,840 --> 00:02:40,630
perspective most some don't care okay

54
00:02:44,490 --> 00:02:42,850
when you get institutionally don't care

55
00:02:46,800 --> 00:02:44,500
but it doesn't mean that a few people

56
00:02:49,290 --> 00:02:46,810
and the selected group that Hal just

57
00:02:53,580 --> 00:02:49,300
talked about do care and some of them

58
00:02:55,290 --> 00:02:53,590
passionately here's this one you're one

59
00:02:59,070 --> 00:02:55,300
of my favorite lines is the Pentagon

60
00:03:01,890 --> 00:02:59,080
says well the Pentagon says nothing it's

61
00:03:05,100 --> 00:03:01,900
a big stone building with you know

62
00:03:07,800 --> 00:03:05,110
twenty five thirty thousand people in

63
00:03:11,360 --> 00:03:07,810

there that come with a wide variety of

64

00:03:14,400 --> 00:03:11,370

belief systems and experiences and

65

00:03:16,290 --> 00:03:14,410

contrary to popular belief like the

66

00:03:18,780 --> 00:03:16,300

government it is not a megalithic

67

00:03:20,850 --> 00:03:18,790

organization where everybody agrees on

68

00:03:25,500 --> 00:03:20,860

everything and some of them you know

69

00:03:28,020 --> 00:03:25,510

they humanly disagree what am i as I did

70

00:03:32,550 --> 00:03:28,030

this one up to look it turns out that

71

00:03:35,330 --> 00:03:32,560

there are now 962 field grade our flag

72

00:03:39,690 --> 00:03:35,340

grade officers meeting generals and

73

00:03:42,000 --> 00:03:39,700

admirals within the Department of

74

00:03:43,860 --> 00:03:42,010

Defense I extrapolated and looked at

75

00:03:45,420 --> 00:03:43,870

held mentioned the end of Blue Book

76

00:03:49,199 --> 00:03:45,430

content we'll come to that in a minute

77

00:03:52,560 --> 00:03:49,209

my guess is conservatively there's at

78

00:03:55,290 --> 00:03:52,570

least 6,000 general officers applied

79

00:03:59,460 --> 00:03:55,300

grade officers since that time if that

80

00:04:01,680 --> 00:03:59,470

many have seen UFOs book one of the

81

00:04:03,420 --> 00:04:01,690

things I mentioned I talked to the

82

00:04:07,290 --> 00:04:03,430

director of one of these three-letter

83

00:04:10,290 --> 00:04:07,300

agencies who said a well this is going

84

00:04:13,199 --> 00:04:10,300

back a we don't do that B I'll tell you

85

00:04:16,500 --> 00:04:13,209

about the ones I saw so you have a

86

00:04:18,379 --> 00:04:16,510

director of an agency who has personal

87

00:04:20,509 --> 00:04:18,389

experience that does not

88

00:04:23,899 --> 00:04:20,519

translate into institutional

89

00:04:27,290 --> 00:04:23,909

responsibilities so my question is not

90

00:04:31,999 --> 00:04:27,300

why do these studies pop up is why

91

00:04:36,950 --> 00:04:32,009

aren't there a lot more now part of the

92

00:04:40,730 --> 00:04:36,960

problem is this oh this is a ranger is

93

00:04:44,989 --> 00:04:40,740

killed on his fourteenth combat tour and

94

00:04:48,649 --> 00:04:44,999

so what I ask is from a DoD perspective

95

00:04:52,249 --> 00:04:48,659

just where is it that you think UFOs fit

96

00:04:54,610 --> 00:04:52,259

on their priority lists being that we

97

00:04:57,679 --> 00:04:54,620

have been constantly in conflict since

98

00:04:59,980 --> 00:04:57,689

2001 there's a the longest Wars that

99

00:05:04,640 --> 00:04:59,990

we've had so there is an issue of

100

00:05:08,709 --> 00:05:04,650

prioritization one of the things I think

101
00:05:11,809 --> 00:05:08,719
that's important is that very few people

102
00:05:14,629 --> 00:05:11,819
understand how large organizations work

103
00:05:19,309 --> 00:05:14,639
and that's really a key issue and a lot

104
00:05:24,019 --> 00:05:19,319
of critical thinking is lacking in many

105
00:05:27,260 --> 00:05:24,029
many areas so the key question from the

106
00:05:29,899 --> 00:05:27,270
government's perspective is compared to

107
00:05:33,019 --> 00:05:29,909
what with all of things that are going

108
00:05:37,129 --> 00:05:33,029
on and the same thing even with UFOs

109
00:05:39,320 --> 00:05:37,139
most people believe in UFOs a very small

110
00:05:42,110 --> 00:05:39,330
segment think it's really important so

111
00:05:49,579 --> 00:05:42,120
most people you know say okay that's

112
00:05:52,070 --> 00:05:49,589
real but so what not really important so

113
00:05:54,079 --> 00:05:52,080

about big organizations and the bottom

114

00:05:57,050 --> 00:05:54,089

line is what I really want to get to

115

00:05:59,179 --> 00:05:57,060

here this is how they work top

116

00:06:02,029 --> 00:05:59,189

priorities are of course retaining power

117

00:06:04,100 --> 00:06:02,039

of the Golden Rule meaning who has the

118

00:06:07,399 --> 00:06:04,110

gold makes the rules and their logic

119

00:06:10,639 --> 00:06:07,409

based organizations but at the bottom

120

00:06:14,360 --> 00:06:10,649

line is in the US government there are

121

00:06:17,779 --> 00:06:14,370

no departments of good ideas so whoever

122

00:06:20,149 --> 00:06:17,789

has responsibility here has to take you

123

00:06:22,779 --> 00:06:20,159

know interest in these areas and fit it

124

00:06:27,350 --> 00:06:22,789

into their institutional

125

00:06:28,519 --> 00:06:27,360

responsibilities um when I say this is

126
00:06:32,659 --> 00:06:28,529
not new

127
00:06:35,869 --> 00:06:32,669
um health knows as well is in the early

128
00:06:39,769 --> 00:06:35,879
1980s I actually created a group very

129
00:06:44,479 --> 00:06:39,779
similar to what lissandra and others

130
00:06:46,759 --> 00:06:44,489
brought up um we had Army Navy Air Force

131
00:06:49,639 --> 00:06:46,769
all participants the intelligence

132
00:06:53,479 --> 00:06:49,649
community from various agencies across

133
00:06:56,889 --> 00:06:53,489
the board al was one and a number of our

134
00:07:00,709 --> 00:06:56,899
friends who had you know from aerospace

135
00:07:03,669 --> 00:07:00,719
industry all actively involved they all

136
00:07:07,129 --> 00:07:03,679
had top-secret STI level clearances

137
00:07:09,129 --> 00:07:07,139
literally an old point up I happened to

138
00:07:12,289 --> 00:07:09,139

be all males had to know who you were

139

00:07:15,279 --> 00:07:12,299

but what we found out was kind of not

140

00:07:17,859 --> 00:07:15,289

what we expected and primarily that was

141

00:07:21,499 --> 00:07:17,869

nobody's minding the store

142

00:07:23,779 --> 00:07:21,509

um tell mentioned the accountant report

143

00:07:27,469 --> 00:07:23,789

I don't think you can underestimate the

144

00:07:30,829 --> 00:07:27,479

damage that was done by that it was a

145

00:07:34,639 --> 00:07:30,839

very cursory report not well done of the

146

00:07:36,439 --> 00:07:34,649

material inside actually the body of the

147

00:07:39,649 --> 00:07:36,449

text does not match the summary

148

00:07:42,589 --> 00:07:39,659

recommendations in conclusions written

149

00:07:45,469 --> 00:07:42,599

by Condon but the top line is he was

150

00:07:48,859 --> 00:07:45,479

right the question to Compton was not

151

00:07:51,559 --> 00:07:48,869

are UFOs real it was is this a threat

152

00:07:54,229 --> 00:07:51,569

and haven't been abated so you have to

153

00:07:58,639 --> 00:07:54,239

say Connolly know if it's probably not a

154

00:08:01,489 --> 00:07:58,649

threat this was our sentence suspected

155

00:08:03,709 --> 00:08:01,499

the scenario an area of disagreement and

156

00:08:06,559 --> 00:08:03,719

some others something is true but it was

157

00:08:07,879 --> 00:08:06,569

that Roswell was real looked at and said

158

00:08:10,369 --> 00:08:07,889

what the hell don't know what this is

159

00:08:11,919 --> 00:08:10,379

we'll pack it up and revisit it

160

00:08:15,259 --> 00:08:11,929

periodically

161

00:08:17,689 --> 00:08:15,269

now here are some actual slides that

162

00:08:19,339 --> 00:08:17,699

were done but I can say at least 30

163

00:08:21,879 --> 00:08:19,349

years ago what you'll see are the

164

00:08:24,949 --> 00:08:21,889

parallels between the current problems

165

00:08:27,169 --> 00:08:24,959

that it was a threat to potential for

166

00:08:29,599 --> 00:08:27,179

cover and deception the advanced

167

00:08:32,809 --> 00:08:29,609

technology we were looking at that and

168

00:08:36,049 --> 00:08:32,819

one that hal mentioned in this case the

169

00:08:38,679 --> 00:08:36,059

Soviet this is bad old days the Soviet

170

00:08:40,940 --> 00:08:38,689

breakthrough would be unacceptable

171

00:08:44,270 --> 00:08:40,950

didn't matter said weather

172

00:08:47,090 --> 00:08:44,280

not can't tell that is important let me

173

00:08:50,570 --> 00:08:47,100

apologize the people not steeped in UFO

174

00:08:51,920 --> 00:08:50,580

and I'll be glad to explain these cases

175

00:08:55,310 --> 00:08:51,930

I'm going to hit some of them feel

176
00:08:58,400 --> 00:08:55,320
pretty quickly but what did what did we

177
00:09:00,430 --> 00:08:58,410
see so again we're talking 1980s but

178
00:09:03,080 --> 00:09:00,440
this going back you had seen

179
00:09:06,170 --> 00:09:03,090
accelerating fast acceleration zero to

180
00:09:09,710 --> 00:09:06,180
four thousand or instantaneously a right

181
00:09:13,670 --> 00:09:09,720
angle turns as you know with g-forces at

182
00:09:15,800 --> 00:09:13,680
29 stealth something that appears here

183
00:09:17,960 --> 00:09:15,810
that you know you know period appears

184
00:09:22,210 --> 00:09:17,970
and disappears sometimes on radar

185
00:09:26,000 --> 00:09:22,220
sometimes visually and in erection with

186
00:09:28,970 --> 00:09:26,010
electrical systems in some cases

187
00:09:31,270 --> 00:09:28,980
without damage eyewitness reports

188
00:09:34,070 --> 00:09:31,280

hundreds you know and it varied from

189

00:09:37,430 --> 00:09:34,080

individuals to thousands of people

190

00:09:39,470 --> 00:09:37,440

seeing the thing the duration the people

191

00:09:43,280 --> 00:09:39,480

income it's just a flash of you know

192

00:09:46,580 --> 00:09:43,290

light passing light well sometimes the

193

00:09:50,200 --> 00:09:46,590

durations lasted ill from months to you

194

00:09:52,310 --> 00:09:50,210

know and recur over days to months and

195

00:09:53,840 --> 00:09:52,320

distance pay everybody thinks is a

196

00:09:56,450 --> 00:09:53,850

bright light in the sky some of these

197

00:09:59,110 --> 00:09:56,460

and one case I'll get to and he says you

198

00:10:03,920 --> 00:09:59,120

mean the one I touched highly credible

199

00:10:06,470 --> 00:10:03,930

witnesses physical evidence again thirty

200

00:10:09,230 --> 00:10:06,480

years ago we had many other things that

201
00:10:11,960 --> 00:10:09,240
were mentioned here lots and lots of

202
00:10:15,470 --> 00:10:11,970
physical evidence already and obtained

203
00:10:17,090 --> 00:10:15,480
this is a most interesting case over

204
00:10:19,850 --> 00:10:17,100
ninety minutes for the planes flying

205
00:10:23,300 --> 00:10:19,860
around multiple radars picking it up and

206
00:10:26,330 --> 00:10:23,310
a signals intercept it still don't have

207
00:10:29,840 --> 00:10:26,340
no one highly researched and bottom

208
00:10:34,580 --> 00:10:29,850
lines have no idea what what it is say

209
00:10:37,670 --> 00:10:34,590
why don't sound lights this is nineteen

210
00:10:40,580 --> 00:10:37,680
eighty four this is a old DSP now old

211
00:10:42,800 --> 00:10:40,590
DSP satellite in geosynchronous orbit

212
00:10:45,410 --> 00:10:42,810
something very hot clue

213
00:10:48,680 --> 00:10:45,420

right by what you see is that that dark

214

00:10:50,930 --> 00:10:48,690

line that's a high tower sensor so you

215

00:10:53,000 --> 00:10:50,940

see something very hot in a very cold

216

00:10:55,550 --> 00:10:53,010

regime flying and headed down towards

217

00:10:58,760 --> 00:10:55,560

Earth this was taken over Point Barrow

218

00:11:02,840 --> 00:10:58,770

Alaska again something very hot up there

219

00:11:05,000 --> 00:11:02,850

don't understand it I went into NORAD

220

00:11:07,340 --> 00:11:05,010

headquarters and asked you a question

221

00:11:09,890 --> 00:11:07,350

I said you know do you see things fly

222

00:11:14,450 --> 00:11:09,900

around very fast accelerates sharp turns

223

00:11:18,790 --> 00:11:14,460

they said UFOs yes um it kind of had two

224

00:11:23,290 --> 00:11:18,800

common but I said since items it's 280

225

00:11:26,480 --> 00:11:23,300

thousands of reports logged into NORAD

226

00:11:29,630 --> 00:11:26,490

cache Landrum is a case you don't know

227

00:11:32,210 --> 00:11:29,640

it two women a boy seriously radiated

228

00:11:34,280 --> 00:11:32,220

should have been at LD 100 I mean from

229

00:11:38,329 --> 00:11:34,290

the severity and onset of symptoms

230

00:11:41,060 --> 00:11:38,339

should have been dead didn't die us

231

00:11:43,990 --> 00:11:41,070

katsu air for Scott sued came to us in

232

00:11:47,300 --> 00:11:44,000

the army had a friend of mine who

233

00:11:49,460 --> 00:11:47,310

investigated it there's no doubt that

234

00:11:51,890 --> 00:11:49,470

they were physically damaged but it

235

00:11:56,270 --> 00:11:51,900

wasn't us we were getting sued as if it

236

00:11:57,950 --> 00:11:56,280

was an experimental craft the Japanese

237

00:12:01,100 --> 00:11:57,960

airline flight this is another one

238

00:12:04,340 --> 00:12:01,110

that's we had multiple radars confirming

239

00:12:06,230 --> 00:12:04,350

it they reported something as big as an

240

00:12:09,980 --> 00:12:06,240

aircraft carrier flying up with them

241

00:12:11,780 --> 00:12:09,990

over Alaska this is interesting in

242

00:12:14,930 --> 00:12:11,790

germane one of the things I got it had

243

00:12:16,670 --> 00:12:14,940

been an Inspector General him some

244

00:12:20,420 --> 00:12:16,680

friends came back to me with a bunch of

245

00:12:22,790 --> 00:12:20,430

cases these were done by Alaskan Scouts

246

00:12:26,150 --> 00:12:22,800

and the point is that they understand

247

00:12:28,240 --> 00:12:26,160

the environment but the key issue was

248

00:12:30,500 --> 00:12:28,250

the reports were sitting in a drawer and

249

00:12:32,360 --> 00:12:30,510

somebody who knew I had personal net

250

00:12:35,120 --> 00:12:32,370

just picked him up and sent him back as

251
00:12:37,970 --> 00:12:35,130
opposed to there's some place to send

252
00:12:40,070 --> 00:12:37,980
this stuff this is a kind of one of the

253
00:12:43,370 --> 00:12:40,080
drawings that came from you had these

254
00:12:47,300 --> 00:12:43,380
big craft women said but they knew is it

255
00:12:49,720 --> 00:12:47,310
was flying against the wind and even saw

256
00:12:52,210 --> 00:12:49,730
clouds that were going as witness

257
00:12:56,170 --> 00:12:52,220
wouldn't happen the the Gulf Breeze case

258
00:12:58,509 --> 00:12:56,180
is one books written on this but the

259
00:13:01,120 --> 00:12:58,519
point was that it this is one that we

260
00:13:02,829 --> 00:13:01,130
had a duration of three years got to the

261
00:13:04,930 --> 00:13:02,839
point where people went out every night

262
00:13:08,829 --> 00:13:04,940
it was so common to sit on the beach and

263
00:13:13,660 --> 00:13:08,839

watch for sightings we had the Iranian

264

00:13:15,850 --> 00:13:13,670

case 76 this is one where two aircraft

265

00:13:18,370 --> 00:13:15,860

their American Air Force went in

266

00:13:21,340 --> 00:13:18,380

approached the craft had had been seen

267

00:13:23,560 --> 00:13:21,350

again multiple radars vector din as the

268

00:13:24,069 --> 00:13:23,570

approach he said when I went to fire the

269

00:13:26,639 --> 00:13:24,079

missiles

270

00:13:30,759 --> 00:13:26,649

all of a sudden electronics are shut off

271

00:13:33,850 --> 00:13:30,769

this had spun out and came away like

272

00:13:35,740 --> 00:13:33,860

electronic system came back up done a

273

00:13:38,019 --> 00:13:35,750

lot of work and directed energy weapons

274

00:13:39,550 --> 00:13:38,029

I know how to shut you down I don't know

275

00:13:41,980 --> 00:13:39,560

how to shut you down and bring you back

276

00:13:46,210 --> 00:13:41,990

up again so that was well beyond

277

00:13:52,960 --> 00:13:46,220

capability and again this is in 76 this

278

00:13:55,180 --> 00:13:52,970

is a case in 86 over some Paolo the it

279

00:13:57,220 --> 00:13:55,190

went on for three hours lots of jets

280

00:13:59,980 --> 00:13:57,230

invol the key issue that was different

281

00:14:03,850 --> 00:13:59,990

here is the air Minister went public and

282

00:14:07,600 --> 00:14:03,860

said yeah verily this happened most of

283

00:14:11,139 --> 00:14:07,610

time you know such officials remain

284

00:14:14,350 --> 00:14:11,149

silence missiles now this is a famous

285

00:14:19,449 --> 00:14:14,360

case faded giant we had missiles that

286

00:14:22,780 --> 00:14:19,459

were shut down two silos one six out of

287

00:14:24,730 --> 00:14:22,790

eight another system 10 out of 10

288

00:14:28,750 --> 00:14:24,740

missiles so upskirt they law if

289

00:14:31,329 --> 00:14:28,760

everybody's you might be expect lots of

290

00:14:34,269 --> 00:14:31,339

studies done on it came away with have

291

00:14:36,100 --> 00:14:34,279

no idea what did that we weren't alone

292

00:14:39,730 --> 00:14:36,110

this is one that Georgians have picked

293

00:14:42,129 --> 00:14:39,740

up when he was in the Soviet Union came

294

00:14:44,970 --> 00:14:42,139

back since a case the difference in

295

00:14:48,069 --> 00:14:44,980

their says you have a UFO flew over and

296

00:14:50,889 --> 00:14:48,079

sat there for about seven or eight hours

297

00:14:52,540 --> 00:14:50,899

hundreds of witnesses and all of a

298

00:14:55,269 --> 00:14:52,550

sudden their missiles started spinning

299

00:14:56,460 --> 00:14:55,279

up getting ready to launch and say my

300

00:15:00,690 --> 00:14:56,470

god were about to

301
00:15:04,020 --> 00:15:00,700
World War three and we have no way to

302
00:15:06,780 --> 00:15:04,030
stop it this coin case is one that's

303
00:15:09,480 --> 00:15:06,790
really interesting in that helicopter

304
00:15:13,650 --> 00:15:09,490
flying lawn for people on suddenly gets

305
00:15:16,470 --> 00:15:13,660
picked up and lifted to consider yup you

306
00:15:20,420 --> 00:15:16,480
have all of the crew that's on the

307
00:15:24,240 --> 00:15:20,430
helicopter you have the ground

308
00:15:25,380 --> 00:15:24,250
observations again Bentwaters I think if

309
00:15:27,090 --> 00:15:25,390
you're not familiar with it or

310
00:15:29,940 --> 00:15:27,100
Woodbridge this is one of the cases you

311
00:15:37,680 --> 00:15:29,950
had you had 60 it are probably 80 now

312
00:15:39,770 --> 00:15:37,690
highly credible witnesses um no the it

313
00:15:42,420 --> 00:15:39,780

happened again over a period of days

314

00:15:47,010 --> 00:15:42,430

walked in and deputy base commander

315

00:15:48,810 --> 00:15:47,020

along things went out to resolve it he

316

00:15:50,850 --> 00:15:48,820

said you know notice five outside that

317

00:15:53,280 --> 00:15:50,860

and all of a sudden here's an object is

318

00:15:55,560 --> 00:15:53,290

floating through the trees splits into

319

00:15:57,840 --> 00:15:55,570

five pieces go zipping off in different

320

00:16:00,390 --> 00:15:57,850

direction to fly over them and shoot a

321

00:16:02,580 --> 00:16:00,400

laser beam in his feet again highly

322

00:16:04,440 --> 00:16:02,590

credible witnesses many and we've now

323

00:16:08,150 --> 00:16:04,450

come up with radar sighting to it in

324

00:16:11,090 --> 00:16:08,160

Belgium we had many many of them um a

325

00:16:13,650 --> 00:16:11,100

major problem areas signal-to-noise

326

00:16:14,850 --> 00:16:13,660

meaning can't sort out what's what's

327

00:16:18,120 --> 00:16:14,860

real and what's not real

328

00:16:23,790 --> 00:16:18,130

um there was material samples what's the

329

00:16:26,730 --> 00:16:23,800

chain of custody on them um al went

330

00:16:30,480 --> 00:16:26,740

through most of these you know signed

331

00:16:34,230 --> 00:16:30,490

grudges or the historical pieces and

332

00:16:36,420 --> 00:16:34,240

mine went from basically 84 to 88 the

333

00:16:39,210 --> 00:16:36,430

key issue though contrary to popular we

334

00:16:42,450 --> 00:16:39,220

were never stopped I was at very very

335

00:16:44,570 --> 00:16:42,460

high levels I did the pregnancy test so

336

00:16:47,340 --> 00:16:44,580

but haules asked for something and

337

00:16:52,530 --> 00:16:47,350

always got it and with one notable

338

00:16:54,450 --> 00:16:52,540

exception all almost supportive now one

339

00:16:56,160 --> 00:16:54,460

of the things that happen SDI was one of

340

00:16:57,960 --> 00:16:56,170

the biggest programs out there was a

341

00:17:00,600 --> 00:16:57,970

five billion dollar program so he

342

00:17:04,250 --> 00:17:00,610

decided to transition and ask for money

343

00:17:06,960 --> 00:17:04,260

um here's a guy who's monitoring space

344

00:17:08,030 --> 00:17:06,970

clearly when we walked in I had folks

345

00:17:12,380 --> 00:17:08,040

with me for

346

00:17:16,160 --> 00:17:12,390

CIA dia NSA and Air Force Space Command

347

00:17:18,050 --> 00:17:16,170

and Lola he had no idea what the topic

348

00:17:20,120 --> 00:17:18,060

was believe his eyes glazed over and

349

00:17:22,310 --> 00:17:20,130

within a few seconds after we started I

350

00:17:23,900 --> 00:17:22,320

enter started the introduction you go

351

00:17:29,320 --> 00:17:23,910

the wait a minute who are you guys

352

00:17:32,630 --> 00:17:29,330

really um but this point was that he had

353

00:17:35,120 --> 00:17:32,640

gone into this and we were done asking

354

00:17:37,880 --> 00:17:35,130

for money and his bottom line was I

355

00:17:40,070 --> 00:17:37,890

can't do that and it wasn't the agent

356

00:17:42,940 --> 00:17:40,080

wasn't you hadn't got his attention an

357

00:17:46,220 --> 00:17:42,950

interest the point was if I get caught

358

00:17:47,510 --> 00:17:46,230

spending money in this area they're not

359

00:17:49,370 --> 00:17:47,520

going to take that money wait they're

360

00:17:53,180 --> 00:17:49,380

going to take a lot more the assumption

361

00:17:56,120 --> 00:17:53,190

is that you're not a good Stewart the

362

00:17:59,390 --> 00:17:56,130

Nimitz case is interesting we saw that

363

00:18:02,300 --> 00:17:59,400

with the hell's presentation all those

364

00:18:05,330 --> 00:18:02,310

things are real but the point is that's

365

00:18:08,060 --> 00:18:05,340

not really new that had been around for

366

00:18:11,270 --> 00:18:08,070

you know those characteristics had been

367

00:18:14,060 --> 00:18:11,280

observed for decades I did this to

368

00:18:16,670 --> 00:18:14,070

compare the study of between what we did

369

00:18:19,550 --> 00:18:16,680

and what held a news really only a

370

00:18:22,340 --> 00:18:19,560

couple of areas where you see different

371

00:18:25,210 --> 00:18:22,350

but in all cases you have credible

372

00:18:27,700 --> 00:18:25,220

witnesses multi-sensory compar

373

00:18:30,740 --> 00:18:27,710

confirmation unique materials

374

00:18:33,350 --> 00:18:30,750

unexplained maneuvers high strangeness

375

00:18:36,650 --> 00:18:33,360

certainly different one difference was

376

00:18:41,060 --> 00:18:36,660

we got funding Luke got very modest

377

00:18:43,910 --> 00:18:41,070

funding and lots of personal interest we

378

00:18:46,490 --> 00:18:43,920

had no institution again many people who

379

00:18:49,690 --> 00:18:46,500

were individually interested based on

380

00:18:53,420 --> 00:18:49,700

their background and what they had seen

381

00:18:56,390 --> 00:18:53,430

but know one of the key issues though no

382

00:18:58,760 --> 00:18:56,400

central authority I understand that's

383

00:19:01,640 --> 00:18:58,770

improving a bit but one of the things we

384

00:19:02,620 --> 00:19:01,650

had looked forward of the reports all go

385

00:19:06,410 --> 00:19:02,630

together

386

00:19:08,450 --> 00:19:06,420

the bottom line is no solution I think I

387

00:19:11,180 --> 00:19:08,460

would say they've got some hints from a

388

00:19:14,630 --> 00:19:11,190

physics perspective but as far as real

389

00:19:16,250 --> 00:19:14,640

solution to these issues not there so

390

00:19:17,870 --> 00:19:16,260

what does a government be people think

391

00:19:20,700 --> 00:19:17,880

the government should be involved in

392

00:19:22,980 --> 00:19:20,710

this what do they bring advanced

393

00:19:26,789 --> 00:19:22,990

censors brainpower from labs credible

394

00:19:28,409 --> 00:19:26,799

witness sometimes modest funding but

395

00:19:30,960 --> 00:19:28,419

almost certainly they're going to bring

396

00:19:34,700 --> 00:19:30,970

a classification aspect that a lot of

397

00:19:37,470 --> 00:19:34,710

this is risk avoidance I can say

398

00:19:39,600 --> 00:19:37,480

institutionally they do not do and today

399

00:19:42,570 --> 00:19:39,610

I will argue than many of them see this

400

00:19:44,430 --> 00:19:42,580

is a high risk not from the up own

401
00:19:48,450 --> 00:19:44,440
perspective but from a public-relations

402
00:19:52,470 --> 00:19:48,460
of perspective so where do we go I put

403
00:19:54,330 --> 00:19:52,480
up the Human Genome Project because this

404
00:19:58,710 --> 00:19:54,340
is what I think we need the human genome

405
00:20:01,590 --> 00:19:58,720
they had to study 39 or 3.3 billion

406
00:20:05,519 --> 00:20:01,600
pairs they had multiple agencies

407
00:20:08,940 --> 00:20:05,529
involved it ran from 1990 to the 2003

408
00:20:11,820 --> 00:20:08,950
before they were able to actually get

409
00:20:15,389 --> 00:20:11,830
completion at a cost of about three

410
00:20:18,750 --> 00:20:15,399
billion dollars here's what I think is

411
00:20:21,240 --> 00:20:18,760
decided I think we need an issue on a

412
00:20:23,490 --> 00:20:21,250
global scope should government be

413
00:20:25,769 --> 00:20:23,500

involved yeah probably to some that you

414

00:20:27,960 --> 00:20:25,779

need top scientists I think what the

415

00:20:31,250 --> 00:20:27,970

project is called for was something

416

00:20:35,130 --> 00:20:31,260

looks like the human genome problem

417

00:20:37,320 --> 00:20:35,140

project on steroids and with that I

418

00:20:41,149 --> 00:20:37,330

guess is two orders of magnitude more

419

00:20:44,460 --> 00:20:41,159

money meaning it would be 300 billion

420

00:20:49,830 --> 00:20:44,470

and it takes it I also don't have a lot

421

00:20:53,669 --> 00:20:49,840

of expectation to it so it's a

422

00:20:56,940 --> 00:20:53,679

phenomenon that's a global it's

423

00:21:01,139 --> 00:20:56,950

definitely real and massive amounts of

424

00:21:03,930 --> 00:21:01,149

evidence where we're gonna go they don't

425

00:21:07,200 --> 00:21:03,940

know by the point has been down this

426
00:21:08,850 --> 00:21:07,210
road before many times but moving up to

427
00:21:25,030 --> 00:21:08,860
a front-burner item except for

428
00:21:30,410 --> 00:21:26,540
thanks Johnny

429
00:21:32,150 --> 00:21:30,420
so I really take this issue of

430
00:21:37,700 --> 00:21:32,160
signal-to-noise problem I think it's a

431
00:21:40,250 --> 00:21:37,710
very pertinent and in the International

432
00:21:42,920 --> 00:21:40,260
Monetary Fund in April came out with

433
00:21:44,990 --> 00:21:42,930
reportable the largest main problems

434
00:21:49,180 --> 00:21:45,000
facing the planet right now in an issue

435
00:21:51,050 --> 00:21:49,190
to climate change and labor market

436
00:21:53,780 --> 00:21:51,060
disruptions do that artificial

437
00:21:55,940 --> 00:21:53,790
intelligence and boxing like that one of

438
00:21:59,120 --> 00:21:55,950

the major multitude find was what they

439

00:22:01,670 --> 00:21:59,130

called reality fatigue and it's that

440

00:22:04,040 --> 00:22:01,680

when you get so much information we're

441

00:22:07,010 --> 00:22:04,050

creating these kind of cesspools of self

442

00:22:09,320 --> 00:22:07,020

propagated propaganda and the era of the

443

00:22:11,090 --> 00:22:09,330

big news or you can just kind of tent to

444

00:22:14,060 --> 00:22:11,100

whatever signal and you find the most

445

00:22:16,910 --> 00:22:14,070

salient it's really hard to suss out

446

00:22:19,400 --> 00:22:16,920

what reality actually is and someone a

447

00:22:22,070 --> 00:22:19,410

character like yourself is you know has

448

00:22:24,710 --> 00:22:22,080

it's kind of by personality and then in

449

00:22:26,960 --> 00:22:24,720

the opinions of everyone rather like

450

00:22:27,850 --> 00:22:26,970

either half of people around more and I

451
00:22:29,680 --> 00:22:27,860
don't happen

452
00:22:32,620 --> 00:22:29,690
you don't have some conspiracy I got a

453
00:22:34,299 --> 00:22:32,630
question here so I guess it's like when

454
00:22:36,220 --> 00:22:34,309
we're ready to move forward in guesses

455
00:22:37,750 --> 00:22:36,230
how do we get some kind of stable ground

456
00:22:39,669 --> 00:22:37,760
because you've you're identified one

457
00:22:44,860 --> 00:22:39,679
niche which is this governments longer

458
00:22:46,780 --> 00:22:44,870
but even as a community like remote

459
00:22:49,180 --> 00:22:46,790
viewing we can provoke you and think

460
00:22:50,830 --> 00:22:49,190
that we're signaling some target we're

461
00:23:00,190 --> 00:22:50,840
just targeting our own conspiratorial

462
00:23:04,030 --> 00:23:00,200
mindsets you know so it's really good

463
00:23:06,159 --> 00:23:04,040

luck my advice I deal with the skeptics

464

00:23:08,010 --> 00:23:06,169

are quite about and my advice to the

465

00:23:11,140 --> 00:23:08,020

skeptical community is do nothing

466

00:23:14,560 --> 00:23:11,150

because the UFO these others will self

467

00:23:16,120 --> 00:23:14,570

Emily I've got my UFO briefings I have a

468

00:23:19,240 --> 00:23:16,130

slide that says you know there's no

469

00:23:21,610 --> 00:23:19,250

lower limits to crazy and I don't care

470

00:23:23,080 --> 00:23:21,620

how crazy a story you put out there and

471

00:23:25,659 --> 00:23:23,090

when you go to the many of the UFO

472

00:23:28,900 --> 00:23:25,669

conferences those are the folks who have

473

00:23:32,250 --> 00:23:28,910

the most attendees and it is I mean it

474

00:23:34,510 --> 00:23:32,260

can be wild and wonderful and problem

475

00:23:36,789 --> 00:23:34,520

particular when you get to the media who

476
00:23:38,860 --> 00:23:36,799
tries to report on it for them as to

477
00:23:44,710 --> 00:23:38,870
sort out was not and it's often the

478
00:23:46,510 --> 00:23:44,720
loudest wheel and you know sex with

479
00:23:48,669 --> 00:23:46,520
aliens is one of the things that cells

480
00:23:53,970 --> 00:23:48,679
and the reptilians and like I said I

481
00:23:57,100 --> 00:23:53,980
don't care how crazy your story is so

482
00:23:58,690 --> 00:23:57,110
now this is by the way from SSE

483
00:24:01,870 --> 00:23:58,700
perspective this has been one of the

484
00:24:04,900 --> 00:24:01,880
issues along how do you raise reality

485
00:24:06,940 --> 00:24:04,910
you know of these events to a point

486
00:24:10,299 --> 00:24:06,950
where it is taken seriously and

487
00:24:14,140 --> 00:24:10,309
particularly in a venue where truth no

488
00:24:16,570 --> 00:24:14,150

longer matters we're no longer fact data

489

00:24:23,780 --> 00:24:16,580

fact driven and that that's a societal

490

00:24:30,210 --> 00:24:27,030

hello thank you for a great talk I'm

491

00:24:32,130 --> 00:24:30,220

curious what your opinion is of Stephen

492

00:24:40,730 --> 00:24:32,140

Frears disclosure project and

493

00:24:45,270 --> 00:24:43,410

not sure how to answer this politically

494

00:24:48,390 --> 00:24:45,280

correct but watch your wallet it would

495

00:24:50,670 --> 00:24:48,400

be the bottom line yeah now Frank

496

00:24:55,080 --> 00:24:50,680

everything Grier sends out ends with

497

00:25:17,040 --> 00:24:55,090

send me money results are exceedingly

498

00:25:20,070 --> 00:25:17,050

limited so caveat emptor I'm sorry I

499

00:25:23,220 --> 00:25:20,080

miss him I don't hear well I'm behind

500

00:25:42,540 --> 00:25:23,230

the speaker so does somebody want to say

501
00:25:44,340 --> 00:25:42,550
me what I did what the question you see

502
00:25:47,540 --> 00:25:44,350
an article is coming out Patrick's

503
00:25:52,260 --> 00:25:47,550
publishing I guess next week

504
00:25:56,970 --> 00:25:52,270
what's a threat I mean that's a very

505
00:25:59,280 --> 00:25:56,980
subjective issue I'll raise the one by

506
00:26:01,950 --> 00:25:59,290
the way when I did the study we raised

507
00:26:04,260 --> 00:26:01,960
things as threat and we did that to be

508
00:26:06,750 --> 00:26:04,270
within the institutional boundaries if

509
00:26:09,570 --> 00:26:06,760
you're going to allocate money the

510
00:26:11,940 --> 00:26:09,580
Department of Defense is just that it is

511
00:26:14,580 --> 00:26:11,950
allocated against threats of some

512
00:26:17,460 --> 00:26:14,590
various nature so if you want to fence

513
00:26:20,790 --> 00:26:17,470

money you'd better label things as a

514

00:26:22,380 --> 00:26:20,800

threat how people see them is very

515

00:26:25,350 --> 00:26:22,390

unfortunately we now live in a

516

00:26:27,990 --> 00:26:25,360

fear-based society as well so kind of

517

00:26:30,390 --> 00:26:28,000

across the board we try to scare the

518

00:26:31,200 --> 00:26:30,400

hell out of people for every camp any

519

00:26:34,680 --> 00:26:31,210

reason

520

00:26:38,200 --> 00:26:34,690

again another societal issue but what's

521

00:26:47,420 --> 00:26:44,810

what one of my lives is just because you

522

00:26:49,730 --> 00:26:47,430

don't understand that does not mean it's

523

00:26:51,440 --> 00:26:49,740

a threat I've unfortunately you know

524

00:26:53,150 --> 00:26:51,450

many of these things are couched in

525

00:26:56,120 --> 00:26:53,160

those terms if you don't understand it

526

00:26:58,940 --> 00:26:56,130

it must be a threat one of the issues I

527

00:27:00,800 --> 00:26:58,950

get into a long discussion again with

528

00:27:04,550 --> 00:27:00,810

Hallam there's yesterday as a program

529

00:27:06,470 --> 00:27:04,560

manager how much money or anybody on the

530

00:27:09,830 --> 00:27:06,480

government now how much money you're

531

00:27:12,140 --> 00:27:09,840

going to allocate against finding issues

532

00:27:15,830 --> 00:27:12,150

where you have a very low probability of
