

RECORDING HEALING INTENTION

BILL BENGSTON

**SOCIETY
FOR
SCIENTIFIC
EXPLORATION**

1
00:00:12,470 --> 00:00:07,970
this continues the practical part of the

2
00:00:14,750 --> 00:00:12,480
program here's the short version maybe

3
00:00:16,490 --> 00:00:14,760
an illustration yesterday I was having

4
00:00:18,490 --> 00:00:16,500
lunch with Garrett and he asked me a

5
00:00:21,200 --> 00:00:18,500
pretty straightforward question he said

6
00:00:23,120 --> 00:00:21,210
you think you'll ever get a handle on

7
00:00:27,080 --> 00:00:23,130
this healing stuff in your lifetime and

8
00:00:28,550 --> 00:00:27,090
I said no and so I've been doing this

9
00:00:30,200 --> 00:00:28,560
for quite a bit of time but I don't

10
00:00:32,869 --> 00:00:30,210
really have a handle on trying to

11
00:00:35,030 --> 00:00:32,879
understand it it's it's my primary goal

12
00:00:36,530 --> 00:00:35,040
but in the meantime because it's

13
00:00:38,200 --> 00:00:36,540

probably not going to be finished in my

14

00:00:40,880 --> 00:00:38,210

lifetime I'm now trying to develop

15

00:00:43,040 --> 00:00:40,890

practical applications and so this talk

16

00:00:45,229 --> 00:00:43,050

is primarily about practical

17

00:00:46,910 --> 00:00:45,239

applications and sound systems so I've

18

00:00:48,020 --> 00:00:46,920

done a lot of experiments I'll roam up

19

00:00:50,540 --> 00:00:48,030

here for a while I've done a lot of

20

00:00:54,470 --> 00:00:50,550

experiments these are just in vivo

21

00:00:56,840 --> 00:00:54,480

experiments on mice so I have a bunch of

22

00:00:58,939 --> 00:00:56,850

them in a whole variety of places I have

23

00:01:01,549 --> 00:00:58,949

a bunch in a whole variety of places I

24

00:01:04,150 --> 00:01:01,559

have an equal number of in vitro I have

25

00:01:06,290 --> 00:01:04,160

an equal number of this that the other

26

00:01:08,870 --> 00:01:06,300

I'm going to be focused on the practical

27

00:01:10,850 --> 00:01:08,880

application so this is primarily for the

28

00:01:13,340 --> 00:01:10,860

ERV of folks who aren't particularly

29

00:01:16,480 --> 00:01:13,350

familiar with my research this is gonna

30

00:01:19,460 --> 00:01:16,490

be a real short two-minute summary

31

00:01:21,830 --> 00:01:19,470

Healing happens and I can demonstrate

32

00:01:24,410 --> 00:01:21,840

that it does not have a decline effect

33

00:01:26,749 --> 00:01:24,420

under certain conditions we can get a

34

00:01:30,350 --> 00:01:26,759

very reliable phenomena from from

35

00:01:32,570 --> 00:01:30,360

healing I'm reasonably confident and I'm

36

00:01:33,830 --> 00:01:32,580

probably wrong but I'm reasonably

37

00:01:36,410 --> 00:01:33,840

confident that there's a dose response

38

00:01:38,539 --> 00:01:36,420

and so we've done a whole this is going

39

00:01:40,550 --> 00:01:38,549

to be would be a separate talk I could

40

00:01:43,130 --> 00:01:40,560

go into all sorts of dose permutations

41

00:01:44,810 --> 00:01:43,140

but healing is not magical too many

42

00:01:48,380 --> 00:01:44,820

people think of this as magical thinking

43

00:01:51,380 --> 00:01:48,390

it's conventional versus this healing

44

00:01:53,179 --> 00:01:51,390

conforms to law like patterns and so I'm

45

00:01:56,510 --> 00:01:53,189

reasonably confident that there's a dose

46

00:01:58,399 --> 00:01:56,520

response I'm reasonably confident and of

47

00:02:00,709 --> 00:01:58,409

course I always had the caveat probably

48

00:02:03,800 --> 00:02:00,719

wrong but I'm reasonably confident that

49

00:02:06,770 --> 00:02:03,810

healing is nonlinear you don't have an

50

00:02:09,259 --> 00:02:06,780

accumulated effect that that has a

51
00:02:11,479 --> 00:02:09,269
symptomatic correlate rather healing

52
00:02:14,270 --> 00:02:11,489
converts to something along the lines of

53
00:02:16,230 --> 00:02:14,280
a phase transition nothing seems to be

54
00:02:17,850 --> 00:02:16,240
happening nothing seems to be happening

55
00:02:19,860 --> 00:02:17,860
seems to be having an there's a sudden

56
00:02:22,440 --> 00:02:19,870
dramatic transformation I'll show you a

57
00:02:24,960 --> 00:02:22,450
little bit of that I'm reasonably

58
00:02:27,480 --> 00:02:24,970
confident probably wrong that healing

59
00:02:29,250 --> 00:02:27,490
has no energy involved I know that's

60
00:02:32,120 --> 00:02:29,260
heretical and that would be a separate

61
00:02:35,640 --> 00:02:32,130
talk I think it is rather information

62
00:02:37,500 --> 00:02:35,650
I'm reasonably confident that there's a

63
00:02:40,290 --> 00:02:37,510

resonant bond between the healer and

64

00:02:42,570 --> 00:02:40,300

Healy it's not entanglement it's a fluid

65

00:02:44,430 --> 00:02:42,580

connection and there are patterns which

66

00:02:47,670 --> 00:02:44,440

increase the bond and their patterns

67

00:02:50,400 --> 00:02:47,680

which decrease the bottom I'm reasonably

68

00:02:52,350 --> 00:02:50,410

confident that healing has very little

69

00:02:54,380 --> 00:02:52,360

to do with conscious intention I

70

00:02:57,870 --> 00:02:54,390

understand that that's heretical also

71

00:02:59,670 --> 00:02:57,880

that it is not necessary for a person to

72

00:03:02,550 --> 00:02:59,680

get into a particular state of mind that

73

00:03:04,220 --> 00:03:02,560

produces healing as an outcome rather we

74

00:03:07,170 --> 00:03:04,230

have the causal sequence reversed

75

00:03:09,480 --> 00:03:07,180

healing happens and the person has the

76

00:03:12,630 --> 00:03:09,490

option of experiencing that healing or

77

00:03:14,460 --> 00:03:12,640

not a sensitive person will experience

78

00:03:16,770 --> 00:03:14,470

it a non sensitive person won't

79

00:03:19,260 --> 00:03:16,780

experience it but it has no difference

80

00:03:21,450 --> 00:03:19,270

in in terms of sensitivity or what you

81

00:03:25,010 --> 00:03:21,460

experience in terms of the functional

82

00:03:27,690 --> 00:03:25,020

outcome of the healing separate talk and

83

00:03:31,140 --> 00:03:27,700

I could go on but I don't have that much

84

00:03:35,370 --> 00:03:31,150

time so for today the question is can we

85

00:03:38,550 --> 00:03:35,380

capture healing reproduce it does it

86

00:03:40,860 --> 00:03:38,560

store can we capture it and then deliver

87

00:03:42,300 --> 00:03:40,870

it through some mechanism and so I'll

88

00:03:43,800 --> 00:03:42,310

give you an idea of the healing and

89

00:03:46,590 --> 00:03:43,810

again this is primarily for the herbal

90

00:03:48,090 --> 00:03:46,600

folks what I do and the models that I

91

00:03:50,040 --> 00:03:48,100

work with I take a standard

92

00:03:51,960 --> 00:03:50,050

off-the-shelf model that everybody knows

93

00:03:53,850 --> 00:03:51,970

about that's been studied to death you

94

00:03:55,380 --> 00:03:53,860

know the outcome it's a reliable outcome

95

00:03:57,660 --> 00:03:55,390

there are thousands of published studies

96

00:04:00,080 --> 00:03:57,670

on this stuff and then I insert a single

97

00:04:02,580 --> 00:04:00,090

variable which is my healing technique

98

00:04:04,380 --> 00:04:02,590

so we know what's going to happen what

99

00:04:06,720 --> 00:04:04,390

happens if you put this into the system

100

00:04:08,370 --> 00:04:06,730

and so I've done this certainly with

101
00:04:09,750 --> 00:04:08,380
hundreds of people but I've also done it

102
00:04:12,900 --> 00:04:09,760
with hundreds and hundreds of mice and

103
00:04:14,310 --> 00:04:12,910
as well as other other carriers of this

104
00:04:16,590 --> 00:04:14,320
so this particular model that you're

105
00:04:19,199 --> 00:04:16,600
going to see is a very tight model it's

106
00:04:21,000 --> 00:04:19,209
a mammary cancer we have a hundred

107
00:04:23,220 --> 00:04:21,010
percent death within twenty seven days

108
00:04:26,100 --> 00:04:23,230
the standard deviation of death is three

109
00:04:27,220 --> 00:04:26,110
days it's a very tight model and most

110
00:04:29,200 --> 00:04:27,230
people doing Mercer

111
00:04:31,060 --> 00:04:29,210
trying to get the distribution to change

112
00:04:33,130 --> 00:04:31,070
to see if they could get for example a

113
00:04:36,790 --> 00:04:33,140

normal distribution to look a little bit

114

00:04:39,910 --> 00:04:36,800

more like a negative skew 100 percent of

115

00:04:43,600 --> 00:04:39,920

the mice die in 27 days they die nastily

116

00:04:46,000 --> 00:04:43,610

it's a non metastatic it grows it grows

117

00:04:48,250 --> 00:04:46,010

and then the mouse dies of either the

118

00:04:51,130 --> 00:04:48,260

internal organs being crushed and or

119

00:04:54,490 --> 00:04:51,140

malnutrition it's ugly we insert a

120

00:04:57,010 --> 00:04:54,500

variable this is me at brown dress

121

00:04:59,410 --> 00:04:57,020

funnily and we used my healing technique

122

00:05:01,300 --> 00:04:59,420

that I developed a whole bunch of you

123

00:05:03,580 --> 00:05:01,310

know about this and the question is what

124

00:05:05,110 --> 00:05:03,590

happens when you insert this healing

125

00:05:07,630 --> 00:05:05,120

technique into a model which has a

126

00:05:11,530 --> 00:05:07,640

hundred percent death and what we get is

127

00:05:13,630 --> 00:05:11,540

quite anomalous the tumor grows healing

128

00:05:15,940 --> 00:05:13,640

does not conform to the wishes of the

129

00:05:17,950 --> 00:05:15,950

healer it's not a psychokinetic effect

130

00:05:23,200 --> 00:05:17,960

you can't direct this thing healing

131

00:05:25,210 --> 00:05:23,210

happens the tumor grows it looks like

132

00:05:29,650 --> 00:05:25,220

it's it's looking bad the thing starts

133

00:05:31,300 --> 00:05:29,660

to slip it starts to ulcerate we first

134

00:05:32,800 --> 00:05:31,310

time it's happening I'm panicking

135

00:05:34,780 --> 00:05:32,810

because I think everybody's dying and

136

00:05:36,730 --> 00:05:34,790

suffering but if you can see the coat

137

00:05:38,500 --> 00:05:36,740

from where you're sitting it's clear if

138

00:05:41,670 --> 00:05:38,510

you can see the eyes the eyes are clear

139

00:05:44,140 --> 00:05:41,680

this is a healthy Mouse that's ugly

140

00:05:46,390 --> 00:05:44,150

soon after this I'm not showing in this

141

00:05:48,550 --> 00:05:46,400

the tumor will implode and then my

142

00:05:50,260 --> 00:05:48,560

secured I'm going to show you a phase

143

00:05:52,570 --> 00:05:50,270

transition here just because it's very

144

00:05:54,790 --> 00:05:52,580

cool this is a different mouse this is a

145

00:05:56,800 --> 00:05:54,800

mouse 22 days subsequent to injection

146

00:05:59,110 --> 00:05:56,810

you can see an ulceration I hope from

147

00:06:03,760 --> 00:05:59,120

where you sit I'll show you the the same

148

00:06:05,230 --> 00:06:03,770

mouse six days later just because that's

149

00:06:08,170 --> 00:06:05,240

really ridiculous I'm going to do it

150

00:06:10,150 --> 00:06:08,180

again if you're not pulling back the fur

151

00:06:11,980 --> 00:06:10,160

there's no sign this Mouse ever had

152

00:06:13,600 --> 00:06:11,990

cancer nothing's happening nothing's

153

00:06:16,120 --> 00:06:13,610

happening nothing's happening they're

154

00:06:18,280 --> 00:06:16,130

cured that's the pattern sudden phase

155

00:06:19,570 --> 00:06:18,290

transition we can do this with people

156

00:06:21,820 --> 00:06:19,580

we've done it with a few hundred people

157

00:06:25,870 --> 00:06:21,830

although it's reasonably hard to get

158

00:06:27,610 --> 00:06:25,880

people into those little cages so we

159

00:06:32,320 --> 00:06:27,620

tend to work with young people small

160

00:06:34,180 --> 00:06:32,330

people and ectomorphs so here's the

161

00:06:36,490 --> 00:06:34,190

question that's the phenomenon in a

162

00:06:39,150 --> 00:06:36,500

nutshell how do we capture it can we

163

00:06:41,400 --> 00:06:39,160

capture it can we store it and can

164

00:06:45,600 --> 00:06:41,410

make it a scalable phenomenon that can

165

00:06:48,720 --> 00:06:45,610

be delivered so we got two questions how

166

00:06:51,270 --> 00:06:48,730

to capture it can we recognize when it's

167

00:06:57,360 --> 00:06:51,280

been captured and can we deliver it

168

00:06:59,490 --> 00:06:57,370

that's the plot healing seems to be able

169

00:07:01,740 --> 00:06:59,500

to be stored and just looking ahead very

170

00:07:04,680 --> 00:07:01,750

quickly it can be stored in both

171

00:07:08,070 --> 00:07:04,690

biological systems meaning life it can

172

00:07:10,590 --> 00:07:08,080

also be stored in stuff the stuff that

173

00:07:12,570 --> 00:07:10,600

we've started in can be organic the

174

00:07:15,360 --> 00:07:12,580

stuff we've started in can be inorganic

175

00:07:17,190 --> 00:07:15,370

I mean this probably teaches us

176
00:07:19,050 --> 00:07:17,200
something I just not bright enough yet

177
00:07:21,960 --> 00:07:19,060
to figure out what it teaches us so we

178
00:07:24,060 --> 00:07:21,970
can store it in life we can store it in

179
00:07:27,990 --> 00:07:24,070
stuff we can store it whether that stuff

180
00:07:30,420 --> 00:07:28,000
is organic or inorganic so from biology

181
00:07:33,090 --> 00:07:30,430
the mouse you saw for example got that

182
00:07:35,610 --> 00:07:33,100
going to cure seems to be cured for life

183
00:07:37,200 --> 00:07:35,620
and these mice which are cured are

184
00:07:40,620 --> 00:07:37,210
immune to cancer for the rest of their

185
00:07:44,780 --> 00:07:40,630
life and we can reinsert a can't get

186
00:07:47,040 --> 00:07:44,790
cancer again so we can take for example

187
00:07:48,690 --> 00:07:47,050
these are actually rats because when I

188
00:07:51,960 --> 00:07:48,700

couldn't get good pictures of mice but

189

00:07:54,390 --> 00:07:51,970

we we have a rat over here that has been

190

00:07:56,250 --> 00:07:54,400

treated it's gone through the ulceration

191

00:07:59,070 --> 00:07:56,260

and it's done all those things and here

192

00:08:02,790 --> 00:07:59,080

we have a mouse that has a rat that has

193

00:08:04,650 --> 00:08:02,800

cancer it's got the tumor it's all that

194

00:08:07,830 --> 00:08:04,660

kind of stuff if we take stuff out of

195

00:08:10,680 --> 00:08:07,840

this and it can be blood or cells and we

196

00:08:12,659 --> 00:08:10,690

put it into this mouse no human

197

00:08:15,860 --> 00:08:12,669

intervention in terms of healing

198

00:08:17,909 --> 00:08:15,870

everybody's cured that indicates

199

00:08:21,750 --> 00:08:17,919

biological storage of the healing

200

00:08:24,750 --> 00:08:21,760

information what if we do it to stuff

201

00:08:26,700 --> 00:08:24,760

well here's organic material we have

202

00:08:29,940 --> 00:08:26,710

treated cell medium this is the stuff in

203

00:08:34,170 --> 00:08:29,950

which cells are grown we treat the cell

204

00:08:36,540 --> 00:08:34,180

medium and then we put cells into the

205

00:08:38,969 --> 00:08:36,550

cell medium here's you probably won't be

206

00:08:40,709 --> 00:08:38,979

able to read that we grow cancer cells

207

00:08:41,880 --> 00:08:40,719

we did this primarily with human

208

00:08:44,700 --> 00:08:41,890

leukemia we're about to start a

209

00:08:47,520 --> 00:08:44,710

replication in Providence but we put you

210

00:08:49,920 --> 00:08:47,530

in leukemia in the treated cells and the

211

00:08:52,769 --> 00:08:49,930

cells probably don't believe much but we

212

00:08:56,280 --> 00:08:52,779

put that we put the cells in the treated

213

00:08:57,930 --> 00:08:56,290

after one week nothing happens but in

214

00:09:02,120 --> 00:08:57,940

the second week you have a sudden

215

00:09:03,540 --> 00:09:02,130

explosion the cancer cells grow at a

216

00:09:05,610 --> 00:09:03,550

proximate rate

217

00:09:09,630 --> 00:09:05,620

yeah the average is about a 600 percent

218

00:09:12,389 --> 00:09:09,640

increase in cancer growth some people

219

00:09:16,920 --> 00:09:12,399

get upset with cancer growth if you're

220

00:09:21,389 --> 00:09:16,930

treating cells in a well-played they're

221

00:09:23,690 --> 00:09:21,399

your client cancers your client cancer

222

00:09:26,160 --> 00:09:23,700

likes to reproduce this is another theme

223

00:09:30,090 --> 00:09:26,170

healing is a response to the need of the

224

00:09:31,980 --> 00:09:30,100

healy speculation if we take that and

225

00:09:34,350 --> 00:09:31,990

stick it in a mouse I suspect it will

226

00:09:37,530 --> 00:09:34,360

collapse haven't done together we can

227

00:09:39,090 --> 00:09:37,540

take treated water bottles we do the

228

00:09:41,100 --> 00:09:39,100

healing technique on the water bottles

229

00:09:43,949 --> 00:09:41,110

we feed that to mice we never meet the

230

00:09:46,949 --> 00:09:43,959

mice or cure and so we've got something

231

00:09:48,720 --> 00:09:46,959

is storing I think pretty obviously now

232

00:09:50,600 --> 00:09:48,730

the question is how do we detect and how

233

00:09:54,350 --> 00:09:50,610

can we tell whether or not it's stored

234

00:09:57,240 --> 00:09:54,360

can we tell by gizmos can we tell by

235

00:09:58,350 --> 00:09:57,250

stuff can we tell by mice can we tell

236

00:10:01,949 --> 00:09:58,360

how do you tell what little thing is

237

00:10:03,509 --> 00:10:01,959

stored so here's my team a couple of

238

00:10:05,160 --> 00:10:03,519

these folks are in the audience now this

239

00:10:07,500 --> 00:10:05,170

is John McMichael who's hiding over

240

00:10:09,990 --> 00:10:07,510

there Mike Turner is hiding up there

241

00:10:11,639 --> 00:10:10,000

Dean Radin who many of you know is I

242

00:10:13,079 --> 00:10:11,649

think in Petaluma taken peoples

243

00:10:15,120 --> 00:10:13,089

temperature we don't know why he does

244

00:10:16,710 --> 00:10:15,130

this he goes around taking people

245

00:10:19,199 --> 00:10:16,720

temperature so he's doing that and Sarah

246

00:10:20,790 --> 00:10:19,209

Besim is our lab person in Providence

247

00:10:23,280 --> 00:10:20,800

hopefully she's working I don't know if

248

00:10:26,310 --> 00:10:23,290

you give her Monday or Sunday off so the

249

00:10:28,250 --> 00:10:26,320

question is if we could store and

250

00:10:30,300 --> 00:10:28,260

deliver this is the best solution

251

00:10:33,540 --> 00:10:30,310

biological or it's the best solution

252

00:10:36,990 --> 00:10:33,550

through stuff if we go biological we got

253

00:10:39,990 --> 00:10:37,000

an FDA if we go through stuff I get it

254

00:10:43,319 --> 00:10:40,000

maybe perhaps hope we can do an end run

255

00:10:45,960 --> 00:10:43,329

around the FDA so a physical solution is

256

00:10:49,860 --> 00:10:45,970

more scalable it's more reproducible and

257

00:10:53,699 --> 00:10:49,870

there are fewer regulatory agencies so

258

00:10:55,259 --> 00:10:53,709

we take cotton and we do the healing

259

00:10:58,259 --> 00:10:55,269

technique this goes back to the great

260

00:11:00,240 --> 00:10:58,269

Bernie grad who discovered that healing

261

00:11:02,309 --> 00:11:00,250

can be stored in cotton it seems to turn

262

00:11:05,070 --> 00:11:02,319

into a universal donor and the question

263

00:11:08,130 --> 00:11:05,080

is if we juice up cotton

264

00:11:10,949 --> 00:11:08,140

can life recognize it and can gizmos

265

00:11:13,050 --> 00:11:10,959

recognize it so we can store the healing

266

00:11:15,210 --> 00:11:13,060

and the cotton can the mouse recognize

267

00:11:16,860 --> 00:11:15,220

it can a gizmo do you have anything that

268

00:11:18,660 --> 00:11:16,870

can recognize whether it's been stored

269

00:11:22,079 --> 00:11:18,670

and does it make a difference if there's

270

00:11:27,240 --> 00:11:22,089

a healing need now healing is a response

271

00:11:29,970 --> 00:11:27,250

to need I think here's what happens in

272

00:11:31,680 --> 00:11:29,980

my particular healing technique a couple

273

00:11:34,290 --> 00:11:31,690

of odd things happen one everybody

274

00:11:36,690 --> 00:11:34,300

becomes left-handed furious but it's

275

00:11:39,300 --> 00:11:36,700

universal everybody becomes left-handed

276

00:11:41,639 --> 00:11:39,310

and the mice if you can see there will

277

00:11:44,280 --> 00:11:41,649

try to go to actually this exact spot on

278

00:11:46,230 --> 00:11:44,290

the left hand we spin the cage still go

279

00:11:47,880 --> 00:11:46,240

to that spot on the left hand when

280

00:11:50,009 --> 00:11:47,890

they're cured they no longer go to that

281

00:11:52,259 --> 00:11:50,019

spot on the left hand it makes no

282

00:11:54,750 --> 00:11:52,269

difference what kind of mouse it is once

283

00:11:56,850 --> 00:11:54,760

they're cured if we had this in a motion

284

00:11:58,560 --> 00:11:56,860

picture you'd see them rotating to get

285

00:12:00,449 --> 00:11:58,570

to the spot on the left hand once

286

00:12:02,690 --> 00:12:00,459

they're cured they don't do that because

287

00:12:07,680 --> 00:12:02,700

they have no need

288

00:12:11,069 --> 00:12:07,690

so we juice up some cotton and then we

289

00:12:11,940 --> 00:12:11,079

put cancer cells near so we have cotton

290

00:12:13,590 --> 00:12:11,950

that's charged

291

00:12:15,269 --> 00:12:13,600

we have cotton that hasn't been charged

292

00:12:17,370 --> 00:12:15,279

if we have cotton that hasn't been

293

00:12:19,860 --> 00:12:17,380

charged and we put cancer cells near

294

00:12:21,840 --> 00:12:19,870

them nothing happens if you put cotton

295

00:12:27,180 --> 00:12:21,850

that's charged you put cancer cells near

296

00:12:29,190 --> 00:12:27,190

them we get genomic changes cancer cells

297

00:12:33,030 --> 00:12:29,200

can recognize whether the cotton has

298

00:12:35,790 --> 00:12:33,040

been charged can gizmos technical term

299

00:12:37,410 --> 00:12:35,800

detect charge cotton so we've done all

300

00:12:39,360 --> 00:12:37,420

sorts of stuff with all sorts of fancy

301

00:12:41,670 --> 00:12:39,370

gizmos and people are talking about

302

00:12:44,550 --> 00:12:41,680

various I don't know the plural is maybe

303

00:12:47,190 --> 00:12:44,560

gives my various gives my and what can

304

00:12:49,590 --> 00:12:47,200

they do and what do they see and and we

305

00:12:51,569 --> 00:12:49,600

can't find a gizmo that can tell what a

306

00:12:53,250 --> 00:12:51,579

cotton has been charged or not I've even

307

00:12:54,810 --> 00:12:53,260

put it under an electron microscope I

308

00:12:56,730 --> 00:12:54,820

don't know what I was looking for but I

309

00:12:58,350 --> 00:12:56,740

can can you tell the difference between

310

00:13:00,210 --> 00:12:58,360

a charged piece of cotton and an

311

00:13:03,480 --> 00:13:00,220

uncharged piece of cotton we can't find

312

00:13:09,449 --> 00:13:03,490

anything to date they can do it except

313

00:13:11,939 --> 00:13:09,459

life in need a mouse in need a cell

314

00:13:14,569 --> 00:13:11,949

indeed something that's wrong they can

315

00:13:17,560 --> 00:13:14,579

recognize what a cotton has been charged

316

00:13:19,060 --> 00:13:17,570

this is me playing men in black

317

00:13:21,340 --> 00:13:19,070

with Dean we were doing some infrared

318

00:13:23,530 --> 00:13:21,350

stuff and here's the question can we

319

00:13:26,290 --> 00:13:23,540

record the charging of the cotton and

320

00:13:29,080 --> 00:13:26,300

then can we play it back and reproduce

321

00:13:32,530 --> 00:13:29,090

the healing can we take the humans out

322

00:13:39,040 --> 00:13:32,540

of the equation thereby making it

323

00:13:44,020 --> 00:13:39,050

scalable so this is Faraday cage at ions

324

00:13:46,450 --> 00:13:44,030

it's a big sucker it's heavy sucker

325

00:13:48,040 --> 00:13:46,460

it's a spacious sucker if you've never

326

00:13:51,880 --> 00:13:48,050

been in a Faraday cage you want to do it

327

00:13:53,740 --> 00:13:51,890

it's a lot of fun and we put stuff in

328

00:13:55,960 --> 00:13:53,750

there we put stuff in there we put stuff

329

00:13:58,480 --> 00:13:55,970

in there we put stuff in there we put

330

00:14:00,670 --> 00:13:58,490

more stuff in there we put more stuff in

331

00:14:02,380 --> 00:14:00,680

there we put 38 detectors in there and

332

00:14:03,970 --> 00:14:02,390

the reason for the 38 detectors is

333

00:14:05,830 --> 00:14:03,980

simple we have no idea what we're doing

334

00:14:08,380 --> 00:14:05,840

and so what we're trying to do is

335

00:14:13,000 --> 00:14:08,390

maximize the possibilities so if we can

336

00:14:14,620 --> 00:14:13,010

go from a hundredth of a Hertz up to can

337

00:14:16,180 --> 00:14:14,630

we capture anything in there that'll be

338

00:14:18,490 --> 00:14:16,190

useful that's the question so not

339

00:14:20,740 --> 00:14:18,500

knowing and having no theoretical basis

340

00:14:22,600 --> 00:14:20,750

we kind of threw it were throwing stuff

341

00:14:24,730 --> 00:14:22,610

at the wall and seeing if anything

342

00:14:27,670 --> 00:14:24,740

sticks that's the general idea so we got

343

00:14:30,100 --> 00:14:27,680

38 detectors in there we had to build a

344

00:14:32,740 --> 00:14:30,110

water process supercomputer because we

345

00:14:34,420 --> 00:14:32,750

got a monstrous data set and we did a

346

00:14:37,780 --> 00:14:34,430

whole bunch of iterations of things

347

00:14:40,180 --> 00:14:37,790

inside the most significant thing that

348

00:14:42,760 --> 00:14:40,190

we did in the inside the tube is we had

349

00:14:45,370 --> 00:14:42,770

three people using my healing technique

350

00:14:47,440 --> 00:14:45,380

holding pieces of cotton that's all they

351
00:14:49,810 --> 00:14:47,450
were doing they're holding pieces of

352
00:14:53,470 --> 00:14:49,820
cotton and 38 detectors are running

353
00:14:55,690 --> 00:14:53,480
inside this Faraday cage what happens

354
00:14:58,180 --> 00:14:55,700
what is that signal and we'll the

355
00:15:01,510 --> 00:14:58,190
replaying of that signal reproduce the

356
00:15:03,460 --> 00:15:01,520
phenomenon so we've looked at objective

357
00:15:05,380 --> 00:15:03,470
measures we've looked at all the gizmos

358
00:15:07,270 --> 00:15:05,390
we look at all this kind of thing and we

359
00:15:09,340 --> 00:15:07,280
can't see anything that's particularly

360
00:15:10,810 --> 00:15:09,350
significant Mike Turner did about a

361
00:15:12,760 --> 00:15:10,820
whole bunch of the signal analysis

362
00:15:15,370 --> 00:15:12,770
there's nothing there that would account

363
00:15:17,410 --> 00:15:15,380

for functional curing so there's little

364

00:15:19,390 --> 00:15:17,420

weak chirps in this little list at very

365

00:15:21,040 --> 00:15:19,400

low frequency a little lat but that's

366

00:15:22,420 --> 00:15:21,050

not going to account for the phenomenon

367

00:15:26,260 --> 00:15:22,430

of healing happening from here to

368

00:15:27,910 --> 00:15:26,270

Australia so let's be real the kind of

369

00:15:28,329 --> 00:15:27,920

little chirps that we're getting it's

370

00:15:29,710 --> 00:15:28,339

not a

371

00:15:31,860 --> 00:15:29,720

planing the phenomenon this is what I

372

00:15:34,960 --> 00:15:31,870

mean by we don't know what we're doing

373

00:15:39,400 --> 00:15:34,970

so what happens if we make a recording

374

00:15:41,170 --> 00:15:39,410

and we play this to cancer cells will

375

00:15:42,670 --> 00:15:41,180

they be able to recognize it in the way

376

00:15:46,210 --> 00:15:42,680

that they were able to recognize the

377

00:15:48,189 --> 00:15:46,220

charge cotton so we get incubators and

378

00:15:50,530 --> 00:15:48,199

we stick cancer cells inside the

379

00:15:52,119 --> 00:15:50,540

incubators and we have speakers now I

380

00:15:54,280 --> 00:15:52,129

got to tell you this just for

381

00:15:55,869 --> 00:15:54,290

perspective of scale it costs us a

382

00:15:58,960 --> 00:15:55,879

little over three hundred thousand

383

00:16:04,059 --> 00:15:58,970

dollars to make this recording we bought

384

00:16:06,369 --> 00:16:04,069

an amplifier for \$49 from Amazon and I

385

00:16:09,280 --> 00:16:06,379

think we got expensive speakers or \$50

386

00:16:11,829 --> 00:16:09,290

so our hardware there on that end was

387

00:16:15,579 --> 00:16:11,839

slightly under \$100 and so we do this

388

00:16:18,369 --> 00:16:15,589

and we play we put we put cancer cells

389

00:16:21,189 --> 00:16:18,379

in there and we play this recording to

390

00:16:24,220 --> 00:16:21,199

them at various dose responses and we

391

00:16:26,590 --> 00:16:24,230

look at it at four hours and 24 hours

392

00:16:28,480 --> 00:16:26,600

and 48 hours and we look at cancer cell

393

00:16:30,249 --> 00:16:28,490

we look at the genes we look at the

394

00:16:32,499 --> 00:16:30,259

genes we look at the genes we look at

395

00:16:34,660 --> 00:16:32,509

the genes we look at the genes we look

396

00:16:39,720 --> 00:16:34,670

at a lot of genes we've looked at 167

397

00:16:41,739 --> 00:16:39,730

genes a couple of them seem promising

398

00:16:49,199 --> 00:16:41,749

they seem to have to do with

399

00:16:57,999 --> 00:16:55,110

for this part we have 68 out of 167

400

00:17:01,749 --> 00:16:58,009

producing reasonably reliable genomic

401
00:17:03,369 --> 00:17:01,759
changes the recording and the signal

402
00:17:05,409 --> 00:17:03,379
analysis which I'm skipping here for

403
00:17:07,149 --> 00:17:05,419
time there's almost nothing in it

404
00:17:09,929 --> 00:17:07,159
yet this thing that has almost nothing

405
00:17:13,630 --> 00:17:09,939
in it is producing biological effects

406
00:17:16,990 --> 00:17:13,640
cancer cells can recognize it so 68 out

407
00:17:20,439 --> 00:17:17,000
of 167 have significant genes gene

408
00:17:24,429 --> 00:17:20,449
changes we can give us a tentative

409
00:17:26,130 --> 00:17:24,439
conclusion that intention can be

410
00:17:30,789 --> 00:17:26,140
captured and released

411
00:17:33,070 --> 00:17:30,799
maybe we can scale it we've tested the

412
00:17:36,399 --> 00:17:33,080
recording versus people doing hands-on

413
00:17:37,990 --> 00:17:36,409

and it turns out the recording is a

414

00:17:41,260 --> 00:17:38,000

little we think the recording is a

415

00:17:42,010 --> 00:17:41,270

little bit weaker than hands-on we don't

416

00:17:43,120 --> 00:17:42,020

know why that

417

00:17:46,540 --> 00:17:43,130

because we don't know what we're

418

00:17:49,150 --> 00:17:46,550

recording but the hands-on healing has

419

00:17:50,290 --> 00:17:49,160

not been completely captured we think we

420

00:17:52,690 --> 00:17:50,300

don't know if that's because of the

421

00:17:55,030 --> 00:17:52,700

digitization and we've lost information

422

00:17:58,390 --> 00:17:55,040

by digitizing we got to replicate this

423

00:18:00,190 --> 00:17:58,400

by analogue etc etc but hands-on is to a

424

00:18:03,690 --> 00:18:00,200

little bit stronger than the recording

425

00:18:06,940 --> 00:18:03,700

at least in terms of the genomic outcome

426

00:18:08,680 --> 00:18:06,950

these first three incidentally are now

427

00:18:10,870 --> 00:18:08,690

be going to be published I hope in the

428

00:18:12,400 --> 00:18:10,880

next week in a conventional biology

429

00:18:14,470 --> 00:18:12,410

journal so this is reasonably

430

00:18:16,450 --> 00:18:14,480

significant this is not an alternative

431

00:18:20,220 --> 00:18:16,460

thing this is a conventional biology

432

00:18:24,480 --> 00:18:20,230

journal and said whoa yeah let's do this

433

00:18:27,580 --> 00:18:24,490

we left out the forth conclusion

434

00:18:29,530 --> 00:18:27,590

conditions space if you play the

435

00:18:31,900 --> 00:18:29,540

recording to people who are sensitive

436

00:18:32,980 --> 00:18:31,910

they go ooh and they flop on the floor

437

00:18:35,980 --> 00:18:32,990

and they do all those kinds of things

438

00:18:37,810 --> 00:18:35,990

and then when you turn it off this is a

439

00:18:41,710 --> 00:18:37,820

hundred percent of time the sensitive

440

00:18:44,320 --> 00:18:41,720

say it's not off I hold up the plug and

441

00:18:46,000 --> 00:18:44,330

I go no it's unplugged it's off some

442

00:18:48,910 --> 00:18:46,010

plug all that kind of stuff and I go

443

00:18:53,020 --> 00:18:48,920

it's not off so sensitives are annoying

444

00:18:54,880 --> 00:18:53,030

but you got to follow their lead so what

445

00:18:56,560 --> 00:18:54,890

we tried is we played the recording and

446

00:18:58,060 --> 00:18:56,570

then it goes in and you get the genomic

447

00:18:59,500 --> 00:18:58,070

changes in the incubator and then we

448

00:19:03,030 --> 00:18:59,510

turn off the recording and then three

449

00:19:08,049 --> 00:19:03,040

days later we put in more cancer cells

450

00:19:10,450 --> 00:19:08,059

damn sensitives they still change we've

451
00:19:11,850 --> 00:19:10,460
conditioned the space now this would

452
00:19:15,460 --> 00:19:11,860
have incredible methodological

453
00:19:18,040 --> 00:19:15,470
implications another talk if you're

454
00:19:20,320 --> 00:19:18,050
doing an experiment and space can be

455
00:19:23,980 --> 00:19:20,330
conditioned see where I'm going this is

456
00:19:25,840 --> 00:19:23,990
reasonably interesting next steps which

457
00:19:27,790 --> 00:19:25,850
I'm not going to get to very many we're

458
00:19:30,010 --> 00:19:27,800
doing now replicating by playing the

459
00:19:32,530 --> 00:19:30,020
recording to mice and doing further a

460
00:19:34,030 --> 00:19:32,540
signal processing and all that and so

461
00:19:35,680 --> 00:19:34,040
we've just finished we don't have the

462
00:19:37,299 --> 00:19:35,690
data and yet the talk would be different

463
00:19:40,630 --> 00:19:37,309

two weeks from now as it would be

464

00:19:42,940 --> 00:19:40,640

different a month from then we injected

465

00:19:45,280 --> 00:19:42,950

cancer cells into the animals and we

466

00:19:48,010 --> 00:19:45,290

tried different doses of the recording

467

00:19:50,409 --> 00:19:48,020

here's a quick picture of a set up in

468

00:19:52,120 --> 00:19:50,419

Providence same idea we've got the

469

00:19:54,280 --> 00:19:52,130

speakers we got the amplifier but now

470

00:19:59,140 --> 00:19:54,290

instead of cancer cells in an incubator

471

00:20:01,870 --> 00:19:59,150

we've got mice in a mouse room you can

472

00:20:05,020 --> 00:20:01,880

see we got ulcerations again we had a

473

00:20:06,850 --> 00:20:05,030

complication here I've got to stop I'll

474

00:20:08,919 --> 00:20:06,860

talk to you on the side something's

475

00:20:11,260 --> 00:20:08,929

happening to the mice folks it's

476

00:20:14,560 --> 00:20:11,270

reasonably interesting we have much more

477

00:20:26,020 --> 00:20:14,570

data to come stay tuned thank you to our

478

00:20:33,170 --> 00:20:30,830

open for questions yeah I'm trying to

479

00:20:34,760 --> 00:20:33,180

figure out a possible contradiction and

480

00:20:37,550 --> 00:20:34,770

one of your early slides you said

481

00:20:40,430 --> 00:20:37,560

intention didn't matter and then in one

482

00:20:43,370 --> 00:20:40,440

of your conclusions you said that it did

483

00:20:45,770 --> 00:20:43,380

matter so no which is it

484

00:20:47,770 --> 00:20:45,780

i I think I either misspoke or you

485

00:20:51,070 --> 00:20:47,780

misheard something happened

486

00:20:54,260 --> 00:20:51,080

intention matters attention does not

487

00:20:56,060 --> 00:20:54,270

attention attention does not so state of

488

00:20:58,370 --> 00:20:56,070

mind would matter because it's a state

489

00:21:02,300 --> 00:20:58,380

of joy apparently as you're cycling to

490

00:21:03,830 --> 00:21:02,310

no joy the most dominant thing you'll

491

00:21:09,620 --> 00:21:03,840

feel while healing is just utter

492

00:21:13,160 --> 00:21:09,630

god-forsaken boredom okay if that works

493

00:21:17,240 --> 00:21:13,170

like it's boring to do this hour after

494

00:21:19,340 --> 00:21:17,250

hour is exhausting so bill you mentioned

495

00:21:22,310 --> 00:21:19,350

telomere length can you tell me were you

496

00:21:24,050 --> 00:21:22,320

getting longer telomeres as a result of

497

00:21:26,900 --> 00:21:24,060

your healing we think too early to

498

00:21:30,500 --> 00:21:26,910

conclude for sure but the answer is yes

499

00:21:37,730 --> 00:21:30,510

you think so we hope but d-did you think

500

00:21:39,590 --> 00:21:37,740

that's what you found so the mice are

501
00:21:42,260 --> 00:21:39,600
attracted to a certain point on your

502
00:21:44,180 --> 00:21:42,270
left hand well they need healing what

503
00:21:46,970 --> 00:21:44,190
about people what do they feel same

504
00:21:49,430 --> 00:21:46,980
thing so but you know most adults will

505
00:21:53,690 --> 00:21:49,440
talk themselves out of a natural flow of

506
00:21:55,820 --> 00:21:53,700
anything so if you take a mouse it'll go

507
00:21:57,680 --> 00:21:55,830
to the left hand if a little kid will do

508
00:21:59,270 --> 00:21:57,690
the same thing so if a little kid you

509
00:22:00,680 --> 00:21:59,280
don't argue with a little kid you got a

510
00:22:02,030 --> 00:22:00,690
two-year-old walking around the

511
00:22:04,130 --> 00:22:02,040
two-year-old will walk to that part

512
00:22:08,390 --> 00:22:04,140
until they're cured what do they say

513
00:22:14,450 --> 00:22:08,400

what do they feel like they should be

514

00:22:16,760 --> 00:22:14,460

there bill you mentioned that these

515

00:22:19,040 --> 00:22:16,770

results are at least your first three

516

00:22:21,200 --> 00:22:19,050

conclusion points are going to be

517

00:22:25,420 --> 00:22:21,210

published in a mainstream biological

518

00:22:32,750 --> 00:22:25,430

journal in within a week what journal

519

00:22:35,420 --> 00:22:32,760

dose-response yeah once it's out I'd be

520

00:22:37,790 --> 00:22:35,430

happy to ship it to anybody wants it so

521

00:22:38,130 --> 00:22:37,800

the purpose of a cancer cell is to grow

522

00:22:41,010 --> 00:22:38,140

out

523

00:22:42,870 --> 00:22:41,020

control it has no regulations so the

524

00:22:44,610 --> 00:22:42,880

cell lines that you're doing with when

525

00:22:46,680 --> 00:22:44,620

they're given the healing they just do

526

00:22:49,260 --> 00:22:46,690

what they're destined to do they grow

527

00:22:51,150 --> 00:22:49,270

exponentially are their cell lines that

528

00:22:53,400 --> 00:22:51,160

aren't cancer cell lines and have you

529

00:22:55,260 --> 00:22:53,410

tried any of this one nah it's just

530

00:22:57,990 --> 00:22:55,270

ordinary cancer cell oh no no no

531

00:23:01,200 --> 00:22:58,000

ordinary cells not cancers are there I

532

00:23:02,810 --> 00:23:01,210

did that once I'm trying to member what

533

00:23:05,400 --> 00:23:02,820

universe have been in too many labs

534

00:23:06,330 --> 00:23:05,410

nothing happens there without a need

535

00:23:08,790 --> 00:23:06,340

nothing happens

536

00:23:10,500 --> 00:23:08,800

okay the normal cells don't go out of

537

00:23:11,340 --> 00:23:10,510

control about what they're programmed to

538

00:23:13,560 --> 00:23:11,350

do okay

539

00:23:16,170 --> 00:23:13,570

my guess is then you're trying something

540

00:23:18,060 --> 00:23:16,180

like a PK experiment you're and that

541

00:23:20,580 --> 00:23:18,070

would probably inquire not only

542

00:23:23,820 --> 00:23:20,590

intention but attention healing does not

543

00:23:26,760 --> 00:23:23,830

conform to your wishes desires Direction

544

00:23:28,740 --> 00:23:26,770

plans chapters however you call it

545

00:23:31,520 --> 00:23:28,750

healing happens on its own terms and

546

00:23:34,410 --> 00:23:31,530

we're trying to understand the terms

547

00:23:35,880 --> 00:23:34,420

thanks so much for the tuck I have

548

00:23:37,650 --> 00:23:35,890

someone of my family who recently came

549

00:23:40,620 --> 00:23:37,660

down with cancer and they're reasonably

550

00:23:43,800 --> 00:23:40,630

open-minded not as much as all of us but

551
00:23:46,820 --> 00:23:43,810
uh reasonably so do you need any more

552
00:23:50,850 --> 00:23:46,830
guinea pigs well we don't we don't use

553
00:23:52,230 --> 00:23:50,860
clinical situations as guinea pigs there

554
00:23:54,030 --> 00:23:52,240
are people who practice this technique

555
00:23:56,880 --> 00:23:54,040
all over the place and we could talk

556
00:24:00,060 --> 00:23:56,890
okay but I don't I don't do

557
00:24:02,130 --> 00:24:00,070
experimentation on humans the reason I

558
00:24:04,770 --> 00:24:02,140
got into the lab is after we had a few

559
00:24:06,750 --> 00:24:04,780
hundred of human cases I wasn't learning

560
00:24:08,010 --> 00:24:06,760
anything and I couldn't tell why

561
00:24:10,620 --> 00:24:08,020
something was happening

562
00:24:11,940 --> 00:24:10,630
so in the case of a clinical condition

563
00:24:13,650 --> 00:24:11,950

did they get better because they ate a

564

00:24:15,840 --> 00:24:13,660

grapefruit or because they didn't eat a

565

00:24:18,090 --> 00:24:15,850

grapefruit in the case of lab work I can

566

00:24:19,290 --> 00:24:18,100

control the variables much more all

567

00:24:25,320 --> 00:24:19,300

right thanks so much we'll be in touch

568

00:24:28,050 --> 00:24:25,330

yep great talk as usual can you say as

569

00:24:31,050 --> 00:24:28,060

much or as little as you if you want to

570

00:24:35,520 --> 00:24:31,060

know but about how do you know when

571

00:24:37,530 --> 00:24:35,530

healing is is being done as he is B in

572

00:24:41,310 --> 00:24:37,540

terms of what the what the humans are

573

00:24:43,290 --> 00:24:41,320

doing oh very simple I have no idea and

574

00:24:45,630 --> 00:24:43,300

it's it's a complete it's a complete

575

00:24:47,730 --> 00:24:45,640

surprise to me there's not going to be a

576

00:24:50,040 --> 00:24:47,740

single pattern we tend to focus on

577

00:24:51,600 --> 00:24:50,050

central tendency

578

00:24:52,860 --> 00:24:51,610

you know what is the aggregate or what's

579

00:24:54,870 --> 00:24:52,870

the average is something along those

580

00:24:58,110 --> 00:24:54,880

lines but on any individual case there's

581

00:25:00,810 --> 00:24:58,120

an enormous unexplained variance so I

582

00:25:04,860 --> 00:25:00,820

can't tell when something happens but

583

00:25:07,500 --> 00:25:04,870

what happens in mice in men in John

584

00:25:09,780 --> 00:25:07,510

Steinbeck it no matter no matter how how

585

00:25:11,340 --> 00:25:09,790

we do this you never know when John

586

00:25:14,250 --> 00:25:11,350

Steinbeck is going to make that phase

587

00:25:19,050 --> 00:25:14,260

transition but it it almost always

588

00:25:23,190 --> 00:25:19,060

occurs that way you have humans involved

589

00:25:26,640 --> 00:25:23,200

in the experiments right not it only but

590

00:25:27,690 --> 00:25:26,650

you we talk about healing I mean if you

591

00:25:31,350 --> 00:25:27,700

just had the mice

592

00:25:33,060 --> 00:25:31,360

I remember you talked about this at

593

00:25:34,890 --> 00:25:33,070

length in previous previous

594

00:25:36,240 --> 00:25:34,900

presentations and it looks like we're

595

00:25:38,550 --> 00:25:36,250

running out more she's gonna say let's

596

00:25:41,130 --> 00:25:38,560

talk in the back of the room I think so
