A TALE OF TWO
ESP PRACTITIONERS

DAQING PIAO

SOCIETY
FOR
SCIENTIFIC
EXPLORATION

1
00:00:11,030 --> 00:00:07,430
so what i'm going to talk about is a

2
00:00:12,070 --> 00:00:11,040
tale of two esp practitioners and the

3
00:00:13,910 --> 00:00:12,080
one

4
00:00:17,109 --> 00:00:13,920
happened before world war two and the

5
00:00:18,550 --> 00:00:17,119
one happened just during the last

6
00:00:21,349 --> 00:00:18,560
some years

7
00:00:23,429 --> 00:00:21,359
so let me see okay so

8
00:00:25,589 --> 00:00:23,439
here i'm going to just introduce some

9
00:00:28,710 --> 00:00:25,599
details of this

10
00:00:30,870 --> 00:00:28,720
region the paper appearing in jssc

11
00:00:33,350 --> 00:00:30,880
and then i'm going also to try to

12
00:00:35,030 --> 00:00:33,360
connect with uh

13
00:00:37,190 --> 00:00:35,040

a book

14
00:00:40,069 --> 00:00:37,200
and to

15
00:00:42,830 --> 00:00:40,079
introduce some fascinating stories of

16
00:00:44,389 --> 00:00:42,840
this polish

17
00:00:45,990 --> 00:00:44,399
engineer

18
00:00:49,670 --> 00:00:46,000
so um

19
00:00:50,790 --> 00:00:49,680
i think we yeah we in this uh this field

20
00:00:52,069 --> 00:00:50,800
we all

21
00:00:55,750 --> 00:00:52,079
know the

22
00:00:56,950 --> 00:00:55,760
introduction of zener cart

23
00:01:00,950 --> 00:00:56,960
in the

24
00:01:03,270 --> 00:01:00,960
1930s by carl zeiner and the jb line

25
00:01:05,109 --> 00:01:03,280
as an objective

26
00:01:06,950 --> 00:01:05,119
means to

27
00:01:08,630 --> 00:01:06,960
assess their

28
00:01:11,750 --> 00:01:08,640
psychic

29
00:01:13,270 --> 00:01:11,760
performance and over there so this was

30
00:01:14,550 --> 00:01:13,280
the standard

31
00:01:20,630 --> 00:01:14,560
uh

32
00:01:23,350 --> 00:01:20,640
five positions each position has five

33
00:01:25,590 --> 00:01:23,360
possibilities so for this combination we

34
00:01:27,670 --> 00:01:25,600
would think of about the

35
00:01:31,510 --> 00:01:27,680
the permutations

36
00:01:35,190 --> 00:01:31,520
and in this the latest this paper

37
00:01:36,789 --> 00:01:35,200
published by jsc over there those five

38
00:01:40,469 --> 00:01:36,799

character quotes

39
00:01:43,030 --> 00:01:40,479
all the come up with about 45 million

40
00:01:45,510 --> 00:01:43,040
permutations

41
00:01:47,749 --> 00:01:45,520
for the per code so i'm going to talk

42
00:01:48,550 --> 00:01:47,759
about that a little bit

43
00:01:50,310 --> 00:01:48,560
so

44
00:01:52,830 --> 00:01:50,320
um

45
00:01:55,270 --> 00:01:52,840
so here this

46
00:01:59,910 --> 00:01:55,280
study and

47
00:02:03,670 --> 00:01:59,920
it contained a single blind test for the

48
00:02:07,990 --> 00:02:03,680
initial demonstration for the authors to

49
00:02:11,670 --> 00:02:08,000
identify or confirm a gifted child a

50
00:02:14,949 --> 00:02:11,680
teenager and then later on there are two

51
00:02:17,830 --> 00:02:14,959
studies and both double blind and then

52
00:02:21,589 --> 00:02:17,840
performed in two different cities in

53
00:02:24,790 --> 00:02:21,599
china and over here this uh there

54
00:02:26,949 --> 00:02:24,800
the sample the double blind sample was

55
00:02:29,830 --> 00:02:26,959
prepared in beijing

56
00:02:31,110 --> 00:02:29,840
by a friend of the lead officer and then

57
00:02:33,270 --> 00:02:31,120
those two

58
00:02:36,150 --> 00:02:33,280
the initial single blind the

59
00:02:40,150 --> 00:02:36,160
demonstration and the two the double

60
00:02:42,949 --> 00:02:40,160
blind the laboratory tests they were

61
00:02:44,710 --> 00:02:42,959
performed in those two cities in the

62
00:02:47,509 --> 00:02:44,720
eastern part of china and in the

63
00:02:51,589 --> 00:02:47,519

southern part of china

64
00:02:55,030 --> 00:02:51,599
so in terms of their demonstration and

65
00:02:57,670 --> 00:02:55,040
then the third uh their test

66
00:03:01,910 --> 00:02:57,680
so this is an

67
00:03:04,630 --> 00:03:01,920
eastern province of china and here is

68
00:03:07,589 --> 00:03:04,640
their shanghai and this is the young

69
00:03:11,030 --> 00:03:07,599
river so over there there were there is

70
00:03:14,309 --> 00:03:11,040
a city this city is believed to be close

71
00:03:17,670 --> 00:03:14,319
to the hometown of their gifted child

72
00:03:20,470 --> 00:03:17,680
and then i worked in shanghai for

73
00:03:23,190 --> 00:03:20,480
several years and the most of the cities

74
00:03:26,390 --> 00:03:23,200
by the southern part of this yeah where

75
00:03:30,830 --> 00:03:27,910
so uh

76
00:03:33,350 --> 00:03:30,840
okay so this uh the

77
00:03:37,750 --> 00:03:33,360
uh demonstration

78
00:03:39,910 --> 00:03:37,760
a city called the yangzhou where it has

79
00:03:42,229 --> 00:03:39,920
maybe uh several thousand years of

80
00:03:45,509 --> 00:03:42,239
history and it

81
00:03:49,270 --> 00:03:45,519
it has a large lake and by the river so

82
00:03:51,910 --> 00:03:49,280
it was rich in terms of the literature's

83
00:03:56,070 --> 00:03:51,920
cultures so that was believed to be

84
00:03:57,750 --> 00:03:56,080
where it is close to their 15 years old

85
00:03:59,190 --> 00:03:57,760
gifted child

86
00:04:02,390 --> 00:03:59,200
and their

87
00:04:06,149 --> 00:04:02,400
third the third demonstration was done

88
00:04:09,030 --> 00:04:06,159

in this city called the woo sea it's uh

89
00:04:15,350 --> 00:04:09,040
yeah it's also by a large lake along

90
00:04:17,670 --> 00:04:16,229
and

91
00:04:23,350 --> 00:04:17,680
the

92
00:04:27,749 --> 00:04:23,360
in this

93
00:04:30,950 --> 00:04:27,759
uh uh capital city of hainan province in

94
00:04:33,590 --> 00:04:30,960
the southern part of china which

95
00:04:35,909 --> 00:04:33,600
has a street from the mainland and so

96
00:04:38,550 --> 00:04:35,919
this is the capital city where is this

97
00:04:42,070 --> 00:04:38,560
like that and then at very southern

98
00:04:45,670 --> 00:04:42,080
border there was actually a nuclear the

99
00:04:47,909 --> 00:04:45,680
submarine base of chinese army so that's

100
00:04:50,710 --> 00:04:47,919
where they're right now so there are

101
00:04:52,390 --> 00:04:50,720
actually a lot of projects over there

102
00:04:54,310 --> 00:04:52,400
just uh

103
00:04:55,990 --> 00:04:54,320
off the western there the military

104
00:04:58,230 --> 00:04:56,000
projects over there so but you can see

105
00:05:00,950 --> 00:04:58,240
this submarine over there

106
00:05:03,909 --> 00:05:00,960
so this is and so here is the capital

107
00:05:08,550 --> 00:05:03,919
city and right by over here it's a

108
00:05:09,590 --> 00:05:08,560
tourism city so just like miami like so

109
00:05:13,110 --> 00:05:09,600
so that's

110
00:05:16,390 --> 00:05:13,120
so there so this capital city was where

111
00:05:19,110 --> 00:05:16,400
the kid was invited for the first the

112
00:05:21,350 --> 00:05:19,120
laboratory double blind test

113
00:05:24,550 --> 00:05:21,360

and then in terms of the sample

114
00:05:27,830 --> 00:05:24,560
preparation this was the information

115
00:05:29,909 --> 00:05:27,840
that the friend of the lead also

116
00:05:33,830 --> 00:05:29,919
in beijing she

117
00:05:37,110 --> 00:05:33,840
generated using excel random and

118
00:05:40,310 --> 00:05:37,120
generation their function for generator

119
00:05:41,189 --> 00:05:40,320
there are five codes kids the keys and

120
00:05:42,390 --> 00:05:41,199
those

121
00:05:47,029 --> 00:05:42,400
key were

122
00:05:49,350 --> 00:05:47,039
comprised of their 26

123
00:05:52,390 --> 00:05:49,360
the alphabetical

124
00:05:56,070 --> 00:05:52,400
24 i guess alphabetical and then all

125
00:06:00,790 --> 00:05:56,080
their characters and the 10 the

126
00:06:03,990 --> 00:06:00,800
arabic numbers total of 34 possibilities

127
00:06:08,309 --> 00:06:04,000
for each code and then five calls and

128
00:06:12,309 --> 00:06:08,319
then printed on an a4 size paper so

129
00:06:15,909 --> 00:06:12,319
those multiple the lines and then

130
00:06:19,029 --> 00:06:15,919
cut them and then fold them to nine to

131
00:06:20,710 --> 00:06:19,039
ten and basically folds to completely

132
00:06:21,990 --> 00:06:20,720
seal that

133
00:06:24,950 --> 00:06:22,000
and then

134
00:06:28,230 --> 00:06:24,960
so the other one was also

135
00:06:31,909 --> 00:06:28,240
uh basically stapled after it was sealed

136
00:06:35,590 --> 00:06:31,919
and then it was stapled on both sides so

137
00:06:40,309 --> 00:06:35,600
and then also i believe before ceiling

138
00:06:44,309 --> 00:06:40,319

they also had one part being peered off

139
00:06:46,950 --> 00:06:44,319
to make it a unique irregular key just

140
00:06:50,390 --> 00:06:46,960
like ancient military the combined was

141
00:06:54,390 --> 00:06:50,400
using basically to add additional

142
00:06:57,909 --> 00:06:54,400
measures to prevent the following the

143
00:06:59,990 --> 00:06:57,919
practices and also on site when the

144
00:07:01,749 --> 00:07:00,000
authors were

145
00:07:04,950 --> 00:07:01,759
conducting the measurement and the

146
00:07:05,830 --> 00:07:04,960
laboratory experiments they also hand

147
00:07:08,469 --> 00:07:05,840
wrote

148
00:07:11,350 --> 00:07:08,479
numbers unique numbers on those to

149
00:07:15,510 --> 00:07:11,360
basically safeguard the uniqueness of

150
00:07:19,110 --> 00:07:17,430
to make sure that the experiment was

151
00:07:23,670 --> 00:07:19,120
right

152
00:07:25,830 --> 00:07:23,680
so and over here so this was so

153
00:07:30,309 --> 00:07:25,840
um

154
00:07:33,830 --> 00:07:30,319
uh i so i i had access to one of the

155
00:07:35,110 --> 00:07:33,840
videos this was a screenshot of a couple

156
00:07:38,870 --> 00:07:35,120
of video

157
00:07:42,550 --> 00:07:38,880
uh video there the the moments but i

158
00:07:45,510 --> 00:07:42,560
discussed the experimenter and also

159
00:07:48,790 --> 00:07:45,520
they're one of the also over there and

160
00:07:51,270 --> 00:07:48,800
also describes this and so

161
00:07:54,150 --> 00:07:51,280
just um pause that for this but that's

162
00:07:56,869 --> 00:07:54,160
the best the maximum that i can show and

163
00:07:58,790 --> 00:07:56,879

share with you guys and but according to

164
00:08:01,350 --> 00:07:58,800
my understanding and the communication

165
00:08:03,430 --> 00:08:01,360
this was how it was done so it was done

166
00:08:06,710 --> 00:08:03,440
in a suit like

167
00:08:09,029 --> 00:08:06,720
the hotel rooms so the leader also will

168
00:08:11,430 --> 00:08:09,039
will be in the inner room and then there

169
00:08:14,070 --> 00:08:11,440
are in there in the outer room and the

170
00:08:16,309 --> 00:08:14,080
living room you will have a table have

171
00:08:18,710 --> 00:08:16,319
the kids sitting over here have some

172
00:08:20,309 --> 00:08:18,720
samples over here they have a camera and

173
00:08:22,710 --> 00:08:20,319
other surveillance

174
00:08:24,869 --> 00:08:22,720
being just over here to make a

175
00:08:28,230 --> 00:08:24,879
continuous surveillance

176
00:08:30,710 --> 00:08:28,240
and that kid was about 14 to 15 years

177
00:08:33,190 --> 00:08:30,720
old and then the name appearing in the

178
00:08:36,949 --> 00:08:33,200
paper was disgraced

179
00:08:39,350 --> 00:08:36,959
she was introduced to the leader also by

180
00:08:42,389 --> 00:08:39,360
the second author they happen to have

181
00:08:45,030 --> 00:08:42,399
the same last name but i do not know if

182
00:08:47,590 --> 00:08:45,040
they have any their family relationship

183
00:08:48,310 --> 00:08:47,600
and then was also assisted

184
00:08:51,110 --> 00:08:48,320
in

185
00:08:54,870 --> 00:08:51,120
by the third officer and so

186
00:08:57,190 --> 00:08:54,880
so in one places by this gentleman

187
00:08:58,550 --> 00:08:57,200
another place is by the gentlemen or at

188
00:09:01,269 --> 00:08:58,560

least the two

189
00:09:03,110 --> 00:09:01,279
gentlemens and then also the kid was

190
00:09:04,470 --> 00:09:03,120
apparently accompanied the twitter

191
00:09:07,110 --> 00:09:04,480
testing

192
00:09:10,070 --> 00:09:07,120
site by her parents

193
00:09:14,070 --> 00:09:10,080
and then they were no one to have

194
00:09:19,110 --> 00:09:16,949
and then in terms of the results in the

195
00:09:21,269 --> 00:09:19,120
analysis it we

196
00:09:24,150 --> 00:09:21,279
needed to come up with they needed to

197
00:09:27,030 --> 00:09:24,160
come up with some objective measures so

198
00:09:29,990 --> 00:09:27,040
i i suggest them to use this called the

199
00:09:32,310 --> 00:09:30,000
merit of match or marriage of imaginance

200
00:09:35,910 --> 00:09:32,320
essentially we have a five character

201
00:09:39,110 --> 00:09:35,920
codes and then any code that matches

202
00:09:40,470 --> 00:09:39,120
will give a number of one any

203
00:09:44,949 --> 00:09:40,480
not matching

204
00:09:48,310 --> 00:09:44,959
so in this case it's two

205
00:09:50,790 --> 00:09:48,320
uh codes two digits of the codes they

206
00:09:54,070 --> 00:09:50,800
match so this will come up just sum them

207
00:09:57,110 --> 00:09:54,080
up this will give a total number of two

208
00:10:01,190 --> 00:09:57,120
so this would come up with any number of

209
00:10:03,670 --> 00:10:01,200
zero no match at all or five which is a

210
00:10:06,710 --> 00:10:03,680
complete match

211
00:10:09,430 --> 00:10:06,720
over here so the trial begins by

212
00:10:11,190 --> 00:10:09,440
basically their kid was asked to do the

213
00:10:13,350 --> 00:10:11,200

trial and then

214
00:10:16,310 --> 00:10:13,360
and then so just

215
00:10:19,030 --> 00:10:16,320
either pick up their being given by a

216
00:10:21,350 --> 00:10:19,040
random nutrition sample by the examiners

217
00:10:24,710 --> 00:10:21,360
or sometimes the kid will pick up her

218
00:10:26,790 --> 00:10:24,720
own and then just get into their state

219
00:10:29,910 --> 00:10:26,800
and then try to

220
00:10:32,389 --> 00:10:29,920
try to sketch write down a reading and

221
00:10:35,430 --> 00:10:32,399
then the reading was checked after each

222
00:10:38,230 --> 00:10:35,440
trial to give the agent the feedback and

223
00:10:40,710 --> 00:10:38,240
then would start the next trial so each

224
00:10:42,310 --> 00:10:40,720
trial was completed with with the

225
00:10:45,590 --> 00:10:42,320
confirmation

226
00:10:47,430 --> 00:10:45,600
of correct or not so the agent had a

227
00:10:50,710 --> 00:10:47,440
feedback

228
00:10:52,790 --> 00:10:50,720
and then so let's let me go through this

229
00:10:55,190 --> 00:10:52,800
there are the results so

230
00:10:57,590 --> 00:10:55,200
so the paper presented the testing

231
00:11:00,310 --> 00:10:57,600
result first and the demonstration in

232
00:11:03,110 --> 00:11:00,320
the discussion but i would like to just

233
00:11:05,590 --> 00:11:03,120
show here the disc the demonstration

234
00:11:08,550 --> 00:11:05,600
when the leader officer met there the

235
00:11:11,430 --> 00:11:08,560
the the girl at the very first time and

236
00:11:14,069 --> 00:11:11,440
gave her three tasks and this sample was

237
00:11:17,190 --> 00:11:14,079
prepared single blinded they just by the

238
00:11:18,710 --> 00:11:17,200

by the lead officer and now so this was

239
00:11:20,870 --> 00:11:18,720
the first code

240
00:11:23,190 --> 00:11:20,880
and then the second the code and then

241
00:11:25,750 --> 00:11:23,200
the third code was

242
00:11:28,230 --> 00:11:25,760
a deliberate remain the same as the

243
00:11:30,710 --> 00:11:28,240
first one and then the region of that

244
00:11:33,990 --> 00:11:30,720
was discussed in the discussion

245
00:11:36,470 --> 00:11:34,000
and then the first one took the kid

246
00:11:37,910 --> 00:11:36,480
about over half an hour it was a

247
00:11:41,590 --> 00:11:37,920
complete match

248
00:11:45,350 --> 00:11:41,600
the second one took six minutes

249
00:11:49,110 --> 00:11:45,360
of one digit and third one was also a

250
00:11:50,550 --> 00:11:49,120
complete match so this gave the authors

251
00:11:53,110 --> 00:11:50,560
their their

252
00:11:55,269 --> 00:11:53,120
their confidence to move ahead

253
00:11:57,590 --> 00:11:55,279
so and then so

254
00:12:01,110 --> 00:11:57,600
later on so the kid and then to the

255
00:12:03,190 --> 00:12:01,120
leader also he funded the the the work

256
00:12:06,790 --> 00:12:03,200
so their kid and her parents were

257
00:12:09,829 --> 00:12:06,800
invited to this uh the hainan province

258
00:12:13,430 --> 00:12:09,839
to do their tests and for this test it

259
00:12:16,790 --> 00:12:13,440
had 16 trials came up with three

260
00:12:22,470 --> 00:12:21,430
and then this was a few months later and

261
00:12:25,430 --> 00:12:22,480
so

262
00:12:28,470 --> 00:12:25,440
in the in the city that was close to the

263
00:12:32,710 --> 00:12:28,480

kids hong kong they conducted another

264
00:12:36,150 --> 00:12:32,720
trial of 18 at the trials and then there

265
00:12:40,150 --> 00:12:36,160
were two completed matches and this

266
00:12:43,110 --> 00:12:40,160
could be considered as declining

267
00:12:46,150 --> 00:12:43,120
so uh when these

268
00:12:50,150 --> 00:12:46,160
numbers were put together essentially

269
00:12:54,470 --> 00:12:50,160
only we counted their double blind tests

270
00:12:59,190 --> 00:12:54,480
a total of 34 trials five digits and

271
00:13:01,910 --> 00:12:59,200
then 34 permutations per position so

272
00:13:04,790 --> 00:13:01,920
when you put them together and they came

273
00:13:07,110 --> 00:13:04,800
up with a full hit of five times and

274
00:13:09,990 --> 00:13:07,120
then if you put this into a binomial

275
00:13:12,870 --> 00:13:10,000
distribution their alls were

276
00:13:15,509 --> 00:13:12,880
significantly below this this number but

277
00:13:18,790 --> 00:13:15,519
we just registered this number

278
00:13:21,030 --> 00:13:18,800
so it was uh basically not

279
00:13:22,710 --> 00:13:21,040
explainable by any any chance

280
00:13:23,590 --> 00:13:22,720
expectation

281
00:13:26,710 --> 00:13:23,600
and

282
00:13:28,949 --> 00:13:26,720
in terms of my involvement so i

283
00:13:31,509 --> 00:13:28,959
personally i never met

284
00:13:34,030 --> 00:13:31,519
any of the authors in person but i

285
00:13:37,829 --> 00:13:34,040
believe shane approached me around early

286
00:13:38,790 --> 00:13:37,839
2021 i believe was he was suggested by

287
00:13:40,550 --> 00:13:38,800
dr

288
00:13:44,150 --> 00:13:40,560

lopez

289
00:13:47,189 --> 00:13:44,160
and then this is edwin may so this is

290
00:13:50,069 --> 00:13:47,199
the lead ulcer and then so basically so

291
00:13:54,150 --> 00:13:50,079
they know each other and then so i think

292
00:13:56,310 --> 00:13:54,160
by by dr jah he introduced to me and

293
00:13:59,430 --> 00:13:56,320
then so i had a communication with the

294
00:14:01,189 --> 00:13:59,440
lead officer over the times after that

295
00:14:03,750 --> 00:14:01,199
and about the shin

296
00:14:05,590 --> 00:14:03,760
his hearing is significantly impaired

297
00:14:08,150 --> 00:14:05,600
very difficult to

298
00:14:10,230 --> 00:14:08,160
have a live communication he also had

299
00:14:12,470 --> 00:14:10,240
broken his bone

300
00:14:15,189 --> 00:14:12,480
some time ago recovered but they're not

301
00:14:17,829 --> 00:14:15,199
in very good health conditions so he

302
00:14:20,470 --> 00:14:17,839
discussed the cases with me and we also

303
00:14:23,990 --> 00:14:20,480
discussed many other other

304
00:14:26,790 --> 00:14:24,000
tests he did over there in china and we

305
00:14:29,670 --> 00:14:26,800
mostly part we had a consensus and he

306
00:14:32,389 --> 00:14:29,680
later saw my comments on this manuscript

307
00:14:35,750 --> 00:14:32,399
and then after i saw the manuscript i

308
00:14:38,870 --> 00:14:35,760
saw the revision their request and then

309
00:14:40,790 --> 00:14:38,880
guidance from jsc i agreed to help

310
00:14:44,550 --> 00:14:40,800
and then so we

311
00:14:47,829 --> 00:14:44,560
introduced this result analysis rewrote

312
00:14:50,389 --> 00:14:47,839
their entire manuscript and then after

313
00:14:53,110 --> 00:14:50,399

two more rounds of revision and then it

314
00:14:56,710 --> 00:14:53,120
was published but i did decline the

315
00:15:00,949 --> 00:14:56,720
co-authorship but i was behind the final

316
00:15:04,230 --> 00:15:00,959
version so with this i also like to just

317
00:15:06,949 --> 00:15:04,240
introduce this i'm having this book with

318
00:15:09,829 --> 00:15:06,959
me and then so i recently got this book

319
00:15:13,670 --> 00:15:09,839
it was so fascinating and it was written

320
00:15:16,310 --> 00:15:13,680
by mary rose barrenton and she was a

321
00:15:18,470 --> 00:15:16,320
british parapsychologist

322
00:15:22,470 --> 00:15:18,480
and it looked like a password last year

323
00:15:25,350 --> 00:15:22,480
and then this is there was ian

324
00:15:27,910 --> 00:15:25,360
stevenson we all know founder of the

325
00:15:30,790 --> 00:15:27,920
division of perceptive studies in

326
00:15:33,509 --> 00:15:30,800
university of virginia and there was a

327
00:15:38,030 --> 00:15:33,519
geofia

328
00:15:42,150 --> 00:15:38,040
weaver she is a native of poland so they

329
00:15:45,670 --> 00:15:42,160
documented this very fascinating stories

330
00:15:48,550 --> 00:15:45,680
of this polish engineer and at the high

331
00:15:51,590 --> 00:15:48,560
social stand and it turns so that

332
00:15:54,069 --> 00:15:51,600
engineer according to the book he

333
00:15:56,470 --> 00:15:54,079
i think he was born in russia and had a

334
00:15:59,910 --> 00:15:56,480
successful business in russia but later

335
00:16:05,030 --> 00:15:59,920
returned to poland and the likely killed

336
00:16:06,269 --> 00:16:05,040
by nazis around 1943 or 1944 and then he

337
00:16:08,550 --> 00:16:06,279
had

338
00:16:09,509 --> 00:16:08,560

extraordinary the

339
00:16:11,590 --> 00:16:09,519
um

340
00:16:14,629 --> 00:16:11,600
the abilities of

341
00:16:15,990 --> 00:16:14,639
psychometry and the client violence so

342
00:16:19,509 --> 00:16:16,000
this many

343
00:16:22,389 --> 00:16:19,519
people with very high social standards

344
00:16:25,590 --> 00:16:22,399
and then they were involved in testing

345
00:16:27,829 --> 00:16:25,600
him over there particularly joseph

346
00:16:30,790 --> 00:16:27,839
pierce sardisk he was the command

347
00:16:33,509 --> 00:16:30,800
military combined of poland in world war

348
00:16:35,910 --> 00:16:33,519
one and later ahead of the state and

349
00:16:37,990 --> 00:16:35,920
then charles richard

350
00:16:41,910 --> 00:16:38,000
won the nobel prize in physiology in

351
00:16:44,710 --> 00:16:41,920
1913 so and they were all just involved

352
00:16:48,629 --> 00:16:44,720
in conducting the studies on this

353
00:16:52,310 --> 00:16:48,639
gentleman's ability and then some were

354
00:16:54,150 --> 00:16:52,320
this book documented most of them

355
00:16:56,150 --> 00:16:54,160
probably half of them were double blind

356
00:16:58,790 --> 00:16:56,160
studies and there are also some single

357
00:17:01,030 --> 00:16:58,800
blind due to the conditions that it just

358
00:17:02,150 --> 00:17:01,040
couldn't prepare in advance

359
00:17:04,309 --> 00:17:02,160
and there

360
00:17:07,110 --> 00:17:04,319
and also it wasn't done during the time

361
00:17:08,150 --> 00:17:07,120
when french was the language of the

362
00:17:11,110 --> 00:17:08,160
science

363
00:17:12,789 --> 00:17:11,120

so but over here here are some so there

364
00:17:15,189 --> 00:17:12,799
are the psychometry part i don't want to

365
00:17:18,949 --> 00:17:15,199
talk about but the cloud violence apart

366
00:17:21,990 --> 00:17:18,959
basically there uh this stephen had to

367
00:17:24,230 --> 00:17:22,000
identify the ceo the targets either

368
00:17:26,549 --> 00:17:24,240
sketch them just by sketching them and

369
00:17:29,750 --> 00:17:26,559
you can see over here all those are

370
00:17:32,789 --> 00:17:29,760
marked with this orange triangle over

371
00:17:35,350 --> 00:17:32,799
there the ones scheduled by this stephen

372
00:17:38,230 --> 00:17:35,360
and all the other was the original one

373
00:17:40,470 --> 00:17:38,240
that was basically disclosed after the

374
00:17:43,110 --> 00:17:40,480
stephen made the sketches

375
00:17:45,750 --> 00:17:43,120
and you can see that

376
00:17:47,270 --> 00:17:45,760
so this is a there are some that were

377
00:17:48,470 --> 00:17:47,280
extraordinarily

378
00:17:49,270 --> 00:17:48,480
uh

379
00:17:50,390 --> 00:17:49,280
just

380
00:17:51,909 --> 00:17:50,400
a match

381
00:17:54,789 --> 00:17:51,919
and here are

382
00:17:57,350 --> 00:17:54,799
so this i what i took over here

383
00:17:59,750 --> 00:17:57,360
photographed from the book was were not

384
00:18:02,150 --> 00:17:59,760
all there are there were others okay but

385
00:18:03,669 --> 00:18:02,160
those were some very representative

386
00:18:05,430 --> 00:18:03,679
stuff

387
00:18:19,430 --> 00:18:05,440
and

388
00:18:22,150 --> 00:18:19,440

was sealed in a lead a small lead

389
00:18:24,789 --> 00:18:22,160
container and then when the reading

390
00:18:27,430 --> 00:18:24,799
was done and then the container was

391
00:18:30,870 --> 00:18:27,440
basically cut open and then so the

392
00:18:34,230 --> 00:18:30,880
original sample was taken out to

393
00:18:35,029 --> 00:18:34,240
examine their their the reading so

394
00:18:38,070 --> 00:18:35,039
they're

395
00:18:40,830 --> 00:18:38,080
from the red cards itself it's also just

396
00:18:42,549 --> 00:18:40,840
the experiments were impeccable to my

397
00:18:46,470 --> 00:18:42,559
understanding

398
00:18:48,710 --> 00:18:46,480
and then so so so i as an engineer i i

399
00:18:51,190 --> 00:18:48,720
often like to see what's going on over

400
00:18:53,549 --> 00:18:51,200
here so one of the one of the favorite

401
00:18:56,310 --> 00:18:53,559
quote that i like to have is from

402
00:18:58,870 --> 00:18:56,320
jacksonville he mentioned that the side

403
00:18:59,909 --> 00:18:58,880
research should lead not to follow

404
00:19:01,990 --> 00:18:59,919
physics

405
00:19:04,710 --> 00:19:02,000
and on the other hand yesterday i was

406
00:19:09,190 --> 00:19:04,720
watching more and i found this edward

407
00:19:11,909 --> 00:19:09,200
kelly of dopes his their kids the quotes

408
00:19:13,830 --> 00:19:11,919
was somehow resonating with me so he

409
00:19:15,990 --> 00:19:13,840
said that the soldier

410
00:19:17,909 --> 00:19:16,000
first to take home lesson certainly he

411
00:19:21,830 --> 00:19:17,919
was associated with near-death

412
00:19:25,190 --> 00:19:21,840
experiences but he was in the rhine lab

413
00:19:27,750 --> 00:19:25,200

before so he knew other side or

414
00:19:30,870 --> 00:19:27,760
something related to what we would

415
00:19:32,390 --> 00:19:30,880
discuss today he is he mentioned that in

416
00:19:34,470 --> 00:19:32,400
a general sense

417
00:19:37,350 --> 00:19:34,480
so he said that the first take-home

418
00:19:40,390 --> 00:19:37,360
lesson is whether we like it or not

419
00:19:43,510 --> 00:19:40,400
science phenomena exist as effects of

420
00:19:46,789 --> 00:19:43,520
nature and the science is going to have

421
00:19:50,150 --> 00:19:46,799
to grip with the fact of that somehow

422
00:19:51,510 --> 00:19:50,160
i think we all agree upon this

423
00:19:55,590 --> 00:19:51,520
and but

424
00:19:58,150 --> 00:19:55,600
so this book also it has a record of

425
00:20:01,350 --> 00:19:58,160
stephen's own words and ed stephen he

426
00:20:03,350 --> 00:20:01,360
himself was an engineer i think he was a

427
00:20:05,750 --> 00:20:03,360
chemical engineer probably

428
00:20:08,149 --> 00:20:05,760
he would not only he was very

429
00:20:11,590 --> 00:20:08,159
cooperative on the experiments he would

430
00:20:14,789 --> 00:20:11,600
also try to get his own idea of what was

431
00:20:17,350 --> 00:20:14,799
actually going on so there are about

432
00:20:19,590 --> 00:20:17,360
maybe about two pages of materials

433
00:20:22,070 --> 00:20:19,600
written by himself and then here are

434
00:20:24,789 --> 00:20:22,080
some very important stuff and i like to

435
00:20:26,470 --> 00:20:24,799
share with anyone who has interest but

436
00:20:28,230 --> 00:20:26,480
not yet

437
00:20:32,070 --> 00:20:28,240
having read this book

438
00:20:35,350 --> 00:20:32,080

so stephen mentioned that i start

439
00:20:38,310 --> 00:20:35,360
by inhibiting the reasoning process and

440
00:20:41,270 --> 00:20:38,320
concentrating on my inner forces and i

441
00:20:42,390 --> 00:20:41,280
threw myself into a world of spiritual

442
00:20:45,669 --> 00:20:42,400
feeling

443
00:20:49,029 --> 00:20:45,679
i am sure that this conditions is

444
00:20:52,310 --> 00:20:49,039
brought about by my unshakeable face in

445
00:20:53,510 --> 00:20:52,320
the spiritual unity of of humanity

446
00:20:57,350 --> 00:20:53,520
then

447
00:21:01,350 --> 00:20:57,360
and i find myself in a new special state

448
00:21:04,390 --> 00:21:01,360
where i see or i bear sins i hear things

449
00:21:07,830 --> 00:21:04,400
right outside the time in the space

450
00:21:11,110 --> 00:21:07,840
so whether i read or conceal the target

451
00:21:13,750 --> 00:21:11,120
or find a lost article or do psychometry

452
00:21:15,990 --> 00:21:13,760
my sensations are almost the same

453
00:21:18,470 --> 00:21:16,000
apparently i lose a certain amount of

454
00:21:21,430 --> 00:21:18,480
energy my temperature goes up and my

455
00:21:23,990 --> 00:21:21,440
heart a bit becomes irregular a feature

456
00:21:27,270 --> 00:21:24,000
that confirms this impression is that as

457
00:21:29,750 --> 00:21:27,280
soon as i stop sinking it feels as if a

458
00:21:32,710 --> 00:21:29,760
surge of electrical flows through my

459
00:21:36,070 --> 00:21:32,720
extremities for a few

460
00:21:38,390 --> 00:21:36,080
uh seconds something okay i mean this

461
00:21:41,510 --> 00:21:38,400
lasts a moment then the true state of

462
00:21:44,710 --> 00:21:41,520
immunity takes hold of me pictures rise

463
00:21:46,789 --> 00:21:44,720

up in front of me usually by of the past

464
00:21:50,950 --> 00:21:46,799
i see the man who wrote the letter and

465
00:21:52,230 --> 00:21:50,960
the know what so just continue to go

466
00:21:55,549 --> 00:21:52,240
and

467
00:21:57,990 --> 00:21:55,559
okay increa incredibility

468
00:22:00,710 --> 00:21:58,000
skepticism or even attention

469
00:22:03,669 --> 00:22:00,720
concentrated too closely on my person

470
00:22:04,470 --> 00:22:03,679
can block a quick and successful result

471
00:22:06,710 --> 00:22:04,480
or

472
00:22:09,830 --> 00:22:06,720
the perception

473
00:22:12,950 --> 00:22:09,840
so this part is highly related to sheep

474
00:22:15,110 --> 00:22:12,960
or gold all their their influences of

475
00:22:16,070 --> 00:22:15,120
their their basically their

476
00:22:17,909 --> 00:22:16,080
uh

477
00:22:20,230 --> 00:22:17,919
side to them

478
00:22:22,870 --> 00:22:20,240
the person around the human when he was

479
00:22:25,830 --> 00:22:22,880
performing that in the wasa

480
00:22:27,830 --> 00:22:25,840
psychiatrical the society and the other

481
00:22:30,630 --> 00:22:27,840
scientists over there were it was

482
00:22:33,270 --> 00:22:30,640
supporting and he had a great success so

483
00:22:34,470 --> 00:22:33,280
he was mentioning about that

484
00:22:38,149 --> 00:22:34,480
and

485
00:22:40,710 --> 00:22:38,159
in this the gsc paper so so

486
00:22:44,630 --> 00:22:40,720
also there this paper also mentioned

487
00:22:46,789 --> 00:22:44,640
some of their uh readings of men self

488
00:22:50,390 --> 00:22:46,799

mentioning of the process by their by

489
00:22:54,630 --> 00:22:50,400
the kid and that was uh uh

490
00:22:57,669 --> 00:22:54,640
accepted by their video clips of

491
00:22:59,029 --> 00:22:57,679
after conducting one of the one of the

492
00:23:02,390 --> 00:22:59,039
full match

493
00:23:05,110 --> 00:23:02,400
and the girl mentioned that she was able

494
00:23:07,750 --> 00:23:05,120
to get enough focus on the reading the

495
00:23:09,830 --> 00:23:07,760
characters would appear on the so-called

496
00:23:12,630 --> 00:23:09,840
third eye region will be somewhere over

497
00:23:15,270 --> 00:23:12,640
here which is in the anterior domain or

498
00:23:17,029 --> 00:23:15,280
in the ceiling of the frontal lobe the

499
00:23:19,990 --> 00:23:17,039
characters would appear once but they

500
00:23:21,750 --> 00:23:20,000
were unstable and then so but it was

501
00:23:24,310 --> 00:23:21,760
unstable okay

502
00:23:27,430 --> 00:23:24,320
so over here so

503
00:23:29,870 --> 00:23:27,440
so with this and in the paper we put

504
00:23:32,630 --> 00:23:29,880
that we regarded this after sensory

505
00:23:35,350 --> 00:23:32,640
identification against a visual sensory

506
00:23:38,390 --> 00:23:35,360
barrier as a manifestation of

507
00:23:40,630 --> 00:23:38,400
information acquisition using channels

508
00:23:43,029 --> 00:23:40,640
that are not yet known

509
00:23:45,269 --> 00:23:43,039
basically via an alternative a channel

510
00:23:47,510 --> 00:23:45,279
of information transfer

511
00:23:49,350 --> 00:23:47,520
so i had this idea

512
00:23:51,350 --> 00:23:49,360
and so

513
00:23:54,390 --> 00:23:51,360

so there is something going on between

514
00:23:57,190 --> 00:23:54,400
the side between the live person between

515
00:24:00,549 --> 00:23:57,200
the person has to get into a certain

516
00:24:03,590 --> 00:24:00,559
certain way of accessing or entering the

517
00:24:06,549 --> 00:24:03,600
information so what actually is going on

518
00:24:09,190 --> 00:24:06,559
so i just decide them off this edward

519
00:24:10,549 --> 00:24:09,200
kelly's words this was not the true

520
00:24:11,430 --> 00:24:10,559
kelly okay

521
00:24:14,310 --> 00:24:11,440
but

522
00:24:15,350 --> 00:24:14,320
he mentioned something inherently larger

523
00:24:18,789 --> 00:24:15,360
than

524
00:24:21,350 --> 00:24:18,799
normally no would over overflow the

525
00:24:24,310 --> 00:24:21,360
organism in some sense okay and then

526
00:24:26,710 --> 00:24:24,320
come back to basically um

527
00:24:29,350 --> 00:24:26,720
kind of control the brain and the sense

528
00:24:33,190 --> 00:24:29,360
but here is also another important quote

529
00:24:35,990 --> 00:24:33,200
from robert jane in his 1994 interview

530
00:24:37,750 --> 00:24:36,000
he was projecting a resonance between

531
00:24:40,230 --> 00:24:37,760
the information

532
00:24:42,630 --> 00:24:40,240
processor that's in the device and the

533
00:24:46,149 --> 00:24:42,640
information process that we carry in our

534
00:24:49,110 --> 00:24:46,159
mind he certainly was regarding to the

535
00:24:50,470 --> 00:24:49,120
to the influence of consciousness under

536
00:24:53,350 --> 00:24:50,480
rug but

537
00:24:55,750 --> 00:24:53,360
how much is that different from because

538
00:24:58,870 --> 00:24:55,760

it's said eventually it's uh it's a

539
00:25:01,750 --> 00:24:58,880
connection or interaction between mind

540
00:25:02,630 --> 00:25:01,760
and a matter of physical matter

541
00:25:04,149 --> 00:25:02,640
so

542
00:25:05,269 --> 00:25:04,159
i to me

543
00:25:06,549 --> 00:25:05,279
i would

544
00:25:09,909 --> 00:25:06,559
like to

545
00:25:12,310 --> 00:25:09,919
and all project or hypothesize that

546
00:25:15,110 --> 00:25:12,320
there might have a so-called resonant

547
00:25:18,070 --> 00:25:15,120
state of consciousness which may be

548
00:25:20,710 --> 00:25:18,080
associated with associated or

549
00:25:22,870 --> 00:25:20,720
alternative state of consciousness but i

550
00:25:25,909 --> 00:25:22,880
consider that it might be a unique way

551
00:25:29,510 --> 00:25:25,919
of attuning a special

552
00:25:32,310 --> 00:25:29,520
numbers or groups of over some of our

553
00:25:35,510 --> 00:25:32,320
our brains where all just uh the world

554
00:25:38,710 --> 00:25:35,520
consciousness somehow it will appear and

555
00:25:41,269 --> 00:25:38,720
then that when we enter that state by

556
00:25:44,950 --> 00:25:41,279
some kind of feedback like meditation

557
00:25:47,190 --> 00:25:44,960
hypnosis whatsoever and then it could

558
00:25:50,230 --> 00:25:47,200
somehow come back to modulate our

559
00:25:52,710 --> 00:25:50,240
sensory response and then this sensory

560
00:25:55,590 --> 00:25:52,720
response modulation could potentially

561
00:25:57,990 --> 00:25:55,600
couple different centuries they're the

562
00:26:00,870 --> 00:25:58,000
systems and they may also make it more

563
00:26:03,269 --> 00:26:00,880

sensitized and when this happens those

564
00:26:04,950 --> 00:26:03,279
can all be at the physical levels but

565
00:26:08,310 --> 00:26:04,960
when that happens

566
00:26:12,310 --> 00:26:08,320
maybe in a very unique way there they

567
00:26:13,590 --> 00:26:12,320
could be able to access some alternative

568
00:26:15,269 --> 00:26:13,600
information

569
00:26:17,909 --> 00:26:15,279
so that's

570
00:26:21,350 --> 00:26:17,919
it's uh something that i would like to

571
00:26:22,390 --> 00:26:21,360
see if it's any way possible okay

572
00:26:25,029 --> 00:26:22,400
so

573
00:26:28,470 --> 00:26:25,039
that is my brief

574
00:26:31,110 --> 00:26:28,480
basically the review of the things i i

575
00:26:34,390 --> 00:26:31,120
have been just fascinating me and then i

576
00:26:36,789 --> 00:26:34,400
hope that this can elicit the other

577
00:26:39,909 --> 00:26:36,799
thoughts and then let's all work

578
00:26:41,590 --> 00:26:39,919
together try to just

579
00:26:45,669 --> 00:26:41,600
just know a little bit more of what's

580
00:26:47,750 --> 00:26:45,679
actually going on inside okay so when i

581
00:26:49,110 --> 00:26:47,760
when you were talking about the the

582
00:26:51,110 --> 00:26:49,120
polish

583
00:26:53,909 --> 00:26:51,120
uh practitioner

584
00:26:56,549 --> 00:26:53,919
i was kind of taken by the description

585
00:26:58,630 --> 00:26:56,559
of the how the process worked for him

586
00:27:01,350 --> 00:26:58,640
particularly particularly this

587
00:27:04,230 --> 00:27:01,360
discussion about heat

588
00:27:07,590 --> 00:27:04,240

and about vibration

589
00:27:09,590 --> 00:27:07,600
and i found that similar to

590
00:27:10,789 --> 00:27:09,600
discussions that i have seen

591
00:27:12,390 --> 00:27:10,799
um

592
00:27:15,110 --> 00:27:12,400
about uh

593
00:27:16,789 --> 00:27:15,120
out-of-body experiences

594
00:27:19,590 --> 00:27:16,799
or also

595
00:27:22,789 --> 00:27:19,600
some of the subjective experiences of

596
00:27:24,389 --> 00:27:22,799
people who have done for instance monroe

597
00:27:27,669 --> 00:27:24,399
institute

598
00:27:30,789 --> 00:27:27,679
um that that there's kind of a similar

599
00:27:33,590 --> 00:27:30,799
sensation in the body and also sometimes

600
00:27:36,070 --> 00:27:33,600
we get this in in subtle medicine

601
00:27:37,909 --> 00:27:36,080
um i was wondering

602
00:27:40,310 --> 00:27:37,919
if you have anything

603
00:27:42,710 --> 00:27:40,320
to say about

604
00:27:45,750 --> 00:27:42,720
subtle bodies or energy and if maybe

605
00:27:46,830 --> 00:27:45,760
that might be something that plays into

606
00:27:48,630 --> 00:27:46,840
this kind of

607
00:27:51,590 --> 00:27:48,640
experience

608
00:27:54,710 --> 00:27:51,600
well i always say i can only

609
00:27:57,750 --> 00:27:54,720
um project uh

610
00:27:59,909 --> 00:27:57,760
my what might happen and to my view they

611
00:28:03,190 --> 00:27:59,919
are all connected but in which way they

612
00:28:06,470 --> 00:28:03,200
are connected would be very different or

613
00:28:09,510 --> 00:28:06,480

difficult to understand and in terms of

614
00:28:12,789 --> 00:28:09,520
the heat or heating that the stephen

615
00:28:15,110 --> 00:28:12,799
mentioned i believe that was his own

616
00:28:17,110 --> 00:28:15,120
uh their perception by the weather his

617
00:28:19,350 --> 00:28:17,120
body was heated up body temperature

618
00:28:21,990 --> 00:28:19,360
there is a change or not that was really

619
00:28:25,190 --> 00:28:22,000
really really we don't know but

620
00:28:28,389 --> 00:28:25,200
uh coming back to this um

621
00:28:32,070 --> 00:28:28,399
this is the century of perceptive there

622
00:28:35,590 --> 00:28:32,080
changes over the course of this

623
00:28:41,350 --> 00:28:35,600
side demonstration if we could somehow

624
00:28:45,110 --> 00:28:43,590
sympathetic or neuron or whatever

625
00:28:47,830 --> 00:28:45,120
control there might be that will

626
00:28:50,870 --> 00:28:47,840
definitely come back to modulate to

627
00:28:53,350 --> 00:28:50,880
change our physiology so i would be

628
00:28:56,710 --> 00:28:53,360
there it would not be surprising at all

629
00:28:57,590 --> 00:28:56,720
that during that period that time our

630
00:28:59,909 --> 00:28:57,600
body

631
00:29:02,789 --> 00:28:59,919
not only feels different but also if

632
00:29:05,510 --> 00:29:02,799
there is any kind of bio energy that is

633
00:29:07,669 --> 00:29:05,520
being produced or changed then it will

634
00:29:11,750 --> 00:29:07,679
also have a correlative

635
00:29:14,230 --> 00:29:11,760
presentation and i myself had an extreme

636
00:29:17,029 --> 00:29:14,240
uh their their stress conditions when i

637
00:29:19,909 --> 00:29:17,039
was asking a question to

638
00:29:22,149 --> 00:29:19,919

uh the former korean ambassador to u.s

639
00:29:25,430 --> 00:29:22,159
when he was presenting in their into in

640
00:29:28,870 --> 00:29:25,440
myanmar martin and i had an extremely

641
00:29:31,190 --> 00:29:28,880
crucifying pain at my back and the man

642
00:29:33,590 --> 00:29:31,200
lower lower the

643
00:29:36,950 --> 00:29:33,600
the back part just because i was so

644
00:29:39,110 --> 00:29:36,960
stressful and then so that just it was

645
00:29:41,269 --> 00:29:39,120
extremely painful i couldn't move and

646
00:29:43,830 --> 00:29:41,279
then it was gone when when the stress

647
00:29:46,310 --> 00:29:43,840
was gone so that gives me just

648
00:29:48,789 --> 00:29:46,320
understanding that our body and our

649
00:29:51,909 --> 00:29:48,799
consciousness or whatever it is how much

650
00:29:54,470 --> 00:29:51,919
modulation can either do for our body

651
00:29:57,510 --> 00:29:54,480
itself and then that would involve a

652
00:30:01,669 --> 00:29:57,520
significant amount of energy

653
00:30:03,990 --> 00:30:01,679
vitality and then that will if that can

654
00:30:06,470 --> 00:30:04,000
produce any bio energy i'm not saying

655
00:30:09,269 --> 00:30:06,480
that it will produce bioenergy by

656
00:30:12,470 --> 00:30:09,279
producing any type of something we could

657
00:30:16,549 --> 00:30:12,480
emit or generate a change of that it

658
00:30:20,230 --> 00:30:18,470
thank you

659
00:30:21,669 --> 00:30:20,240
so

660
00:30:23,110 --> 00:30:21,679
we're starting to get a few questions in

661
00:30:24,310 --> 00:30:23,120
but i i was wondering because you know

662
00:30:26,230 --> 00:30:24,320
we've

663
00:30:29,510 --> 00:30:26,240

you and i have discussed before in other

664
00:30:31,269 --> 00:30:29,520
venues uh about finger reading

665
00:30:34,710 --> 00:30:31,279
and i wonder if you could say a little

666
00:30:37,269 --> 00:30:34,720
bit more about the the the participant

667
00:30:38,789 --> 00:30:37,279
and the study that we see in the jfc or

668
00:30:40,870 --> 00:30:38,799
even more about how

669
00:30:43,590 --> 00:30:40,880
subjects are recruited

670
00:30:46,470 --> 00:30:43,600
uh for these kinds of studies

671
00:30:49,590 --> 00:30:46,480
okay so i talked with the lead officer

672
00:30:52,389 --> 00:30:49,600
and then i asked him how many um

673
00:30:56,149 --> 00:30:52,399
basically so how many this kind of would

674
00:30:59,430 --> 00:30:56,159
give to the the person he was able to

675
00:31:01,509 --> 00:30:59,440
confirm and he mentioned that so i the

676
00:31:04,549 --> 00:31:01,519
leader also actually published a paper

677
00:31:07,029 --> 00:31:04,559
in jsc around 2010 i believe a short

678
00:31:08,070 --> 00:31:07,039
paper and over there

679
00:31:22,070 --> 00:31:08,080
he

680
00:31:23,110 --> 00:31:22,080
years

681
00:31:25,509 --> 00:31:23,120
and

682
00:31:29,269 --> 00:31:25,519
according to him he knows

683
00:31:32,149 --> 00:31:29,279
one more which had even greater ability

684
00:31:33,909 --> 00:31:32,159
better just for the shake and then

685
00:31:36,549 --> 00:31:33,919
cannot be

686
00:31:38,070 --> 00:31:36,559
um publicized as it is

687
00:31:41,430 --> 00:31:38,080
and so

688
00:31:45,190 --> 00:31:41,440

there was so so it's very difficult to

689
00:31:48,389 --> 00:31:45,200
identify because there were so there

690
00:31:52,310 --> 00:31:48,399
the society field in china in there it's

691
00:31:54,630 --> 00:31:52,320
kind of it's so much contaminated by the

692
00:31:58,389 --> 00:31:54,640
fraudulent practices

693
00:32:01,590 --> 00:31:58,399
so it was very difficult to identify and

694
00:32:04,789 --> 00:32:01,600
confirm and also do experimental studies

695
00:32:07,430 --> 00:32:04,799
like this so etc this was the only one

696
00:32:10,310 --> 00:32:07,440
he was able to identify over the last 10

697
00:32:12,950 --> 00:32:10,320
years that was also why i after i saw

698
00:32:16,549 --> 00:32:12,960
this material i felt that i if i could

699
00:32:17,669 --> 00:32:16,559
help i needed to to help so

700
00:32:18,630 --> 00:32:17,679
yeah

701
00:32:20,310 --> 00:32:18,640
all right

702
00:32:22,789 --> 00:32:20,320
um so i don't know if you know this but

703
00:32:24,230 --> 00:32:22,799
sofia weaver one of the co-authors in

704
00:32:26,630 --> 00:32:24,240
the book that you've been discussing is

705
00:32:28,389 --> 00:32:26,640
actually in the audience

706
00:32:31,269 --> 00:32:28,399
and she said it's delighted to know that

707
00:32:33,590 --> 00:32:31,279
the book is still regarded as relevant

708
00:32:36,950 --> 00:32:33,600
uh and in the key way the q and a

709
00:32:39,269 --> 00:32:36,960
there's also question um for sophia so

710
00:32:41,509 --> 00:32:39,279
uh sophia if if you are inclined uh

711
00:32:44,470 --> 00:32:41,519
please we i welcome you to raise your

712
00:32:45,830 --> 00:32:44,480
hand and we can bring you on stage uh in

713
00:32:47,830 --> 00:32:45,840

the meantime there's a question in the

714
00:32:50,310 --> 00:32:47,840
chat which i'm going to go ahead and

715
00:32:52,630 --> 00:32:50,320
show on stage

716
00:32:55,350 --> 00:32:52,640
it says uh dr pian my question is

717
00:32:57,029 --> 00:32:55,360
whether slight changes in the set and

718
00:32:59,830 --> 00:32:57,039
setting or habit

719
00:33:02,230 --> 00:32:59,840
may help or impair participants ability

720
00:33:05,430 --> 00:33:02,240
to read the character strings for

721
00:33:08,310 --> 00:33:05,440
example where it is positioned whether

722
00:33:11,350 --> 00:33:08,320
the material is written on paper versus

723
00:33:13,269 --> 00:33:11,360
digital form

724
00:33:15,190 --> 00:33:13,279
okay so uh

725
00:33:16,789 --> 00:33:15,200
i only had

726
00:33:19,669 --> 00:33:16,799
so first i was

727
00:33:21,990 --> 00:33:19,679
not involved in any part of experiments

728
00:33:24,950 --> 00:33:22,000
i was only involved in revising the

729
00:33:26,149 --> 00:33:24,960
paper and doing the re-analysis

730
00:33:29,350 --> 00:33:26,159
and i was

731
00:33:32,149 --> 00:33:29,360
given access to only one video of the

732
00:33:35,110 --> 00:33:32,159
interview after one success for four

733
00:33:36,389 --> 00:33:35,120
match so i can only project information

734
00:33:40,149 --> 00:33:36,399
from there

735
00:33:43,509 --> 00:33:40,159
and that video was about 25 minutes long

736
00:33:46,870 --> 00:33:43,519
it contained that entire process from

737
00:33:49,909 --> 00:33:46,880
begin basically ending of one previous

738
00:33:53,830 --> 00:33:49,919

and step basically an entire process of

739
00:33:56,149 --> 00:33:53,840
one reading and so it's it's lengthy and

740
00:33:57,029 --> 00:33:56,159
there are a lot of interactions over

741
00:33:57,990 --> 00:33:57,039
there

742
00:34:00,870 --> 00:33:58,000
and

743
00:34:02,870 --> 00:34:00,880
i think the setting

744
00:34:06,070 --> 00:34:02,880
it really depends upon what we are so

745
00:34:09,750 --> 00:34:06,080
from that video those all those samples

746
00:34:12,710 --> 00:34:09,760
uh it's put so they are all basically

747
00:34:15,750 --> 00:34:12,720
they were all staples into a small flash

748
00:34:17,510 --> 00:34:15,760
drive as sides all those samples and

749
00:34:20,470 --> 00:34:17,520
then basically

750
00:34:23,270 --> 00:34:20,480
several maybe 2030 they were in a small

751
00:34:25,829 --> 00:34:23,280
bowl and put over there on the table and

752
00:34:28,550 --> 00:34:25,839
the dance or the kid we were just

753
00:34:30,710 --> 00:34:28,560
sometimes it's their their assistant he

754
00:34:32,069 --> 00:34:30,720
pick up one or sometimes there's a kid

755
00:34:34,950 --> 00:34:32,079
just just

756
00:34:38,470 --> 00:34:34,960
try to suffer through and pick one out

757
00:34:41,030 --> 00:34:38,480
and uh this is this is later on but at

758
00:34:44,389 --> 00:34:41,040
the early yeah this something like this

759
00:34:45,510 --> 00:34:44,399
okay and then here whether she would

760
00:34:48,470 --> 00:34:45,520
just um

761
00:34:51,909 --> 00:34:48,480
like this just use her finger to do this

762
00:34:53,909 --> 00:34:51,919
a little bit and then so sometimes

763
00:34:56,069 --> 00:34:53,919

they're wandering around something like

764
00:34:58,470 --> 00:34:56,079
that but apparent so basically she

765
00:34:59,430 --> 00:34:58,480
needed some kind of

766
00:35:01,589 --> 00:34:59,440
um

767
00:35:03,510 --> 00:35:01,599
access but there was one thing that's

768
00:35:05,829 --> 00:35:03,520
very interesting because

769
00:35:08,150 --> 00:35:05,839
um

770
00:35:10,230 --> 00:35:08,160
so this was boring okay you can see it

771
00:35:13,589 --> 00:35:10,240
was a very boring task

772
00:35:15,349 --> 00:35:13,599
and the kid was only 14 15 years old so

773
00:35:18,790 --> 00:35:15,359
at the very beginning at the very

774
00:35:22,390 --> 00:35:18,800
beginning she would basically try to try

775
00:35:25,349 --> 00:35:22,400
to because when the sample was taken out

776
00:35:27,349 --> 00:35:25,359
and then she was not allowed to touch it

777
00:35:29,589 --> 00:35:27,359
at the very beginning the beginning the

778
00:35:31,670 --> 00:35:29,599
earlier measurement the test

779
00:35:35,109 --> 00:35:31,680
but later on

780
00:35:38,230 --> 00:35:35,119
after the trust was established results

781
00:35:39,589 --> 00:35:38,240
came out and then later on she would try

782
00:35:49,109 --> 00:35:39,599
to

783
00:35:52,069 --> 00:35:49,119
and then so that just gave her fast

784
00:35:54,069 --> 00:35:52,079
access and then the examiner would ask

785
00:35:56,069 --> 00:35:54,079
her why you wanted to touch she said i

786
00:35:58,470 --> 00:35:56,079
just want to get this time to go out to

787
00:35:59,430 --> 00:35:58,480
play

788
00:36:05,510 --> 00:35:59,440

so

789
00:36:07,589 --> 00:36:05,520
talking about the how she was accessed

790
00:36:10,870 --> 00:36:07,599
to the sample and this was the only

791
00:36:14,470 --> 00:36:10,880
information i had but in terms of

792
00:36:17,270 --> 00:36:14,480
how their calls or which kind of objects

793
00:36:19,910 --> 00:36:17,280
were sealed what's the series

794
00:36:23,349 --> 00:36:19,920
what's the process of a ceiling

795
00:36:28,550 --> 00:36:23,359
i don't think that matters

796
00:36:33,030 --> 00:36:28,560
if such kind of the phenomena or ability

797
00:36:34,790 --> 00:36:33,040
is a true phenomenon because if the dots

798
00:36:38,550 --> 00:36:34,800
access their

799
00:36:41,190 --> 00:36:38,560
information or by overcoming the barrier

800
00:36:43,750 --> 00:36:41,200
as we normally know and then

801
00:36:46,710 --> 00:36:43,760
none of the physical barriers will be

802
00:36:48,069 --> 00:36:46,720
able to block that information so that's

803
00:36:51,910 --> 00:36:48,079
my owen

804
00:36:53,589 --> 00:36:51,920
owen perspective and thank you

805
00:36:55,270 --> 00:36:53,599
i find it interesting though that the

806
00:36:57,349 --> 00:36:55,280
subject said that she

807
00:37:00,150 --> 00:36:57,359
really wanted to touch

808
00:37:03,109 --> 00:37:00,160
the the target what kind of

809
00:37:05,750 --> 00:37:03,119
uh you know sensory barriers or what

810
00:37:08,550 --> 00:37:05,760
kind of controls did were in place

811
00:37:11,349 --> 00:37:08,560
uh to prevent cheating in that case

812
00:37:13,990 --> 00:37:11,359
well that one i don't know but uh but i

813
00:37:17,030 --> 00:37:14,000

believe in this field we all know about

814
00:37:20,829 --> 00:37:17,040
the what the thermal vision kind of

815
00:37:25,270 --> 00:37:20,839
experiments did earlier on so if a

816
00:37:27,910 --> 00:37:25,280
touching can provide an access to that

817
00:37:30,710 --> 00:37:27,920
information by whichever means that part

818
00:37:31,750 --> 00:37:30,720
i think is in agreement with this

819
00:37:34,150 --> 00:37:31,760
thermal

820
00:37:37,990 --> 00:37:34,160
vision experiments that have been done

821
00:37:43,910 --> 00:37:38,000
by so many people over so many years

822
00:37:47,589 --> 00:37:45,270
can you hear me

823
00:37:51,750 --> 00:37:47,599
yes i can hear you also okay no i was

824
00:37:54,870 --> 00:37:51,760
just going to say i i agree um

825
00:37:57,990 --> 00:37:54,880
i think it's very much to do with

826
00:38:00,390 --> 00:37:58,000
the mindset of the person of the

827
00:38:03,030 --> 00:38:00,400
clairvoyant um

828
00:38:05,910 --> 00:38:03,040
what they are comfortable with i mean

829
00:38:08,950 --> 00:38:05,920
osovietsky firmly believed for a long

830
00:38:11,829 --> 00:38:08,960
time that he couldn't read print

831
00:38:14,310 --> 00:38:11,839
turned out that he could but it was a

832
00:38:17,270 --> 00:38:14,320
barrier that he had to overcome in his

833
00:38:19,510 --> 00:38:17,280
own mind rather than

834
00:38:22,390 --> 00:38:19,520
existing barriers so i think that

835
00:38:25,589 --> 00:38:22,400
applies to to most clairvoyants that i

836
00:38:28,710 --> 00:38:25,599
have studied uh it's it's the mindset

837
00:38:31,910 --> 00:38:28,720
that they bring with them and that's the

838
00:38:34,069 --> 00:38:31,920

main thing that inhibits any any

839
00:38:35,030 --> 00:38:34,079
developments

840
00:38:40,630 --> 00:38:35,040
thank you

841
00:38:44,470 --> 00:38:42,550
sophia i wonder if i might keep you on

842
00:38:47,030 --> 00:38:44,480
stage for another moment for our very

843
00:38:48,950 --> 00:38:47,040
last question thank you okay the

844
00:38:51,030 --> 00:38:48,960
question is what types of probabilities

845
00:38:54,550 --> 00:38:51,040
against chance did the young chinese

846
00:38:55,589 --> 00:38:54,560
woman versus the polish engineer achieve

847
00:38:57,829 --> 00:38:55,599
well

848
00:39:01,190 --> 00:38:57,839
i think chances

849
00:39:04,310 --> 00:39:01,200
are something that can be worked out

850
00:39:06,470 --> 00:39:04,320
if you have a framework uh like they do

851
00:39:10,150 --> 00:39:06,480
with remote viewing

852
00:39:11,750 --> 00:39:10,160
uh where they have um

853
00:39:15,990 --> 00:39:11,760
set of targets

854
00:39:19,589 --> 00:39:16,000
and then they can judge the hits against

855
00:39:22,230 --> 00:39:19,599
misses and work out um

856
00:39:25,030 --> 00:39:22,240
the the result that way i think it's

857
00:39:26,150 --> 00:39:25,040
much easier to do with

858
00:39:28,069 --> 00:39:26,160
numbers

859
00:39:29,910 --> 00:39:28,079
than with uh

860
00:39:32,790 --> 00:39:29,920
basically what was

861
00:39:33,510 --> 00:39:32,800
a life situation in

862
00:39:35,270 --> 00:39:33,520
in

863
00:39:39,589 --> 00:39:35,280

the case of the polish

864
00:39:41,990 --> 00:39:39,599
of polish engineer and risha did try to

865
00:39:45,349 --> 00:39:42,000
work out the probability

866
00:39:46,630 --> 00:39:45,359
of uh oswitsky getting hits the way he

867
00:39:48,870 --> 00:39:46,640
did

868
00:39:52,470 --> 00:39:48,880
and of course he ended up with

869
00:39:56,550 --> 00:39:52,480
basically infinity um but

870
00:40:01,109 --> 00:39:56,560
it wasn't really the kind of probability

871
00:40:03,109 --> 00:40:01,119
working out that that we are used to now

872
00:40:04,710 --> 00:40:03,119
i hope that helped no that's very

873
00:40:06,390 --> 00:40:04,720
helpful thank you duchene what's your

874
00:40:07,349 --> 00:40:06,400
take on the question

875
00:40:10,790 --> 00:40:07,359
uh

876
00:40:13,349 --> 00:40:10,800
well so this probability i think if

877
00:40:16,309 --> 00:40:13,359
there is a definitive probability just

878
00:40:19,430 --> 00:40:16,319
like these numbers and the characters

879
00:40:21,270 --> 00:40:19,440
which there is a known and their total

880
00:40:23,430 --> 00:40:21,280
amount of permutations and this

881
00:40:25,829 --> 00:40:23,440
probability can be

882
00:40:26,870 --> 00:40:25,839
assessed objectively as we have over

883
00:40:28,710 --> 00:40:26,880
here

884
00:40:31,829 --> 00:40:28,720
and but uh

885
00:40:34,309 --> 00:40:31,839
so there is so the probability of the

886
00:40:36,470 --> 00:40:34,319
polish engineer it's a little bit

887
00:40:39,910 --> 00:40:36,480
difficult to assess because that's

888
00:40:42,470 --> 00:40:39,920

mainly kind of a video their

889
00:40:45,270 --> 00:40:42,480
information of a shape or that type of

890
00:40:48,150 --> 00:40:45,280
stuff but that type of probability

891
00:40:50,870 --> 00:40:48,160
actually the it's a in terms of

892
00:40:53,670 --> 00:40:50,880
information transfer there is no one way

893
00:40:56,630 --> 00:40:53,680
to assess that and actually that part

894
00:40:59,750 --> 00:40:56,640
has actually been done in china in about

895
00:41:01,910 --> 00:40:59,760
40 years ago there were people uh there

896
00:41:05,670 --> 00:41:01,920
is studying that

897
00:41:08,470 --> 00:41:05,680
what's the reliability of information at

898
00:41:11,430 --> 00:41:08,480
that base particularly a spatial pattern

899
00:41:14,230 --> 00:41:11,440
that can be picked up by their client

900
00:41:16,470 --> 00:41:14,240
variant or people that who can access

901
00:41:18,150 --> 00:41:16,480
that information by something like this

902
00:41:21,670 --> 00:41:18,160
finger reading whatsoever we want to

903
00:41:23,349 --> 00:41:21,680
call that and then surprisingly so that

904
00:41:26,150 --> 00:41:23,359
and that part of

905
00:41:27,670 --> 00:41:26,160
the the assessment is there is a name

906
00:41:30,069 --> 00:41:27,680
called standard name called the

907
00:41:32,630 --> 00:41:30,079
modulation transfer function which is

908
00:41:34,390 --> 00:41:32,640
used to identify how good this camera

909
00:41:37,190 --> 00:41:34,400
system is identical

910
00:41:40,230 --> 00:41:37,200
over there it was found that this kind

911
00:41:42,069 --> 00:41:40,240
of psi ability is good at picking up

912
00:41:46,790 --> 00:41:42,079
information that is not

913
00:41:50,710 --> 00:41:46,800

not very highly detailed but also not

914
00:41:54,390 --> 00:41:50,720
very plain so which means uh for example

915
00:41:57,670 --> 00:41:54,400
i have a paper over here which has very

916
00:42:00,230 --> 00:41:57,680
detailed sketches and the very fine

917
00:42:02,950 --> 00:42:00,240
lines they cannot pick up but if i have

918
00:42:05,589 --> 00:42:02,960
a plain paper like this they couldn't

919
00:42:06,550 --> 00:42:05,599
find other either which give me an idea

920
00:42:08,870 --> 00:42:06,560
that

921
00:42:10,870 --> 00:42:08,880
it's a plain paper there was no

922
00:42:14,870 --> 00:42:10,880
interesting information there so they

923
00:42:17,910 --> 00:42:14,880
couldn't pick it up but if just like

924
00:42:19,109 --> 00:42:17,920
our camera if the line is too

925
00:42:24,870 --> 00:42:19,119
too

926
00:42:29,190 --> 00:42:24,880
there is the resolution issue so there's

927
00:42:31,750 --> 00:42:29,200
that study so given a curve like this

928
00:42:32,710 --> 00:42:31,760
somewhere in the middle not

929
00:42:39,109 --> 00:42:32,720
very

930
00:42:40,950 --> 00:42:39,119
that would agree with that there is some

931
00:42:42,870 --> 00:42:40,960
kind of information

932
00:42:45,990 --> 00:42:42,880
transfer there

933
00:42:46,870 --> 00:42:46,000
that does break the physical barrier but

934
00:42:51,870 --> 00:42:46,880
that

935
00:42:54,950 --> 00:42:51,880
transferred does not

936
00:42:57,829 --> 00:42:54,960
disagree with our known physics it's

937
00:43:00,630 --> 00:42:57,839
just a matter of how it's transferred

938
00:43:03,910 --> 00:43:00,640

and then which kind of information that

939
00:43:05,270 --> 00:43:03,920
is being accessed so i would say there's

940
00:43:08,069 --> 00:43:05,280
defense

941
00:43:10,550 --> 00:43:08,079
that are informed that the chance

942
00:43:12,390 --> 00:43:10,560
capabilities um

943
00:43:16,470 --> 00:43:12,400
is not as

944
00:43:18,630 --> 00:43:16,480
direct as this 15-year kid he her

945
00:43:21,349 --> 00:43:18,640
information the chance probability we

946
00:43:24,790 --> 00:43:21,359
could project over there

947
00:43:28,150 --> 00:43:24,800
that probability needs to be assessed

948
00:43:30,950 --> 00:43:28,160
according to this standard if we could

949
00:43:33,589 --> 00:43:30,960
bring him back alive to redo the test

950
00:43:37,109 --> 00:43:33,599
and then can be assessed by this type of

951
00:43:39,910 --> 00:43:37,119
standard approach which is used also to

952
00:43:43,349 --> 00:43:39,920
compare modality by modality in medical

953
00:43:45,270 --> 00:43:43,359
imaging ultrasound mri ct it was done in

954
00:43:46,870 --> 00:43:45,280
this way standard away

955
00:43:49,750 --> 00:43:46,880
so there are something over there we

956
00:43:52,309 --> 00:43:49,760
just needed to implement to this field

957
00:43:54,790 --> 00:43:52,319
to make it stronger scientifically more

958
00:43:57,190 --> 00:43:54,800
sound so thank you very much thank you

959
00:43:59,829 --> 00:43:57,200
sophia do you have anything else to add

960
00:44:02,230 --> 00:43:59,839
um no i don't think that i have found

961
00:44:04,710 --> 00:44:02,240
that very interesting and i'm really i'm

962
00:44:06,950 --> 00:44:04,720
really glad somebody noticed osovietsky

963
00:44:09,670 --> 00:44:06,960

again because

964
00:44:12,150 --> 00:44:09,680
we tend in parapsychology we tend to

965
00:44:14,950 --> 00:44:12,160
start all over again and forget

966
00:44:17,349 --> 00:44:14,960
everything that went before and i really

967
00:44:19,510 --> 00:44:17,359
like historical things

968
00:44:22,710 --> 00:44:19,520
thank you that was very interesting and

969
00:44:25,109 --> 00:44:22,720
margaret has sent me a message and

970
00:44:28,710 --> 00:44:25,119
i will read i've got the message and i

971
00:44:29,670 --> 00:44:28,720
will reply with the information so but i

972
00:44:35,030 --> 00:44:29,680
i

973
00:44:38,550 --> 00:44:36,790
yeah okay

974
00:44:40,790 --> 00:44:38,560
thank you for joining us

975
00:44:44,550 --> 00:44:40,800
pleasure

976
00:44:47,030 --> 00:44:44,560
okay well that is it for our q a and for

977
00:44:49,030 --> 00:44:47,040
our questions so uh thank you again for
