1
00:00:39,790 --> 00:00:37,229
since we're here to address the issue

2
00:00:42,350 --> 00:00:39,800
from the standpoint of government

3
00:00:46,029 --> 00:00:42,360
involvement I'd like to start with a

4
00:00:49,069 --> 00:00:46,039
kind of short rundown of where her

5
00:00:52,229 --> 00:00:49,079
government has been along the way with

6
00:00:56,110 --> 00:00:52,239
some elements that uh a lot of people

7
00:00:59,709 --> 00:00:56,120
may not may not be aware of of course we

8
00:01:02,990 --> 00:00:59,719
all know that we had the back in the 60s

9
00:01:06,190 --> 00:01:03,000
and and so on Project sign and Grudge

10
00:01:10,870 --> 00:01:06,200
and blue book and then in

11
00:01:14,429 --> 00:01:10,880
1969 uh the Blue Book uh was shut down

12
00:01:17,469 --> 00:01:14,439
based on recommendations from Condon and

13
00:01:20,630 --> 00:01:17,479

so on so at that point if you called the

14
00:01:23,510 --> 00:01:20,640
air force uh office and said well what's

15
00:01:25,469 --> 00:01:23,520
happening in in UFOs and so on they say

16
00:01:26,910 --> 00:01:25,479
oh no no we we gave all that stuff up

17
00:01:30,590 --> 00:01:26,920
back in in

18
00:01:34,710 --> 00:01:30,600
1969 the truth of the matter is that the

19
00:01:39,630 --> 00:01:34,720
bolander memo that actually shut down

20
00:01:43,590 --> 00:01:39,640
Blue Book had underlying in fine print

21
00:01:46,510 --> 00:01:43,600
but any UFO issues that might affect

22
00:01:49,429 --> 00:01:46,520
National Security we will continue to

23
00:01:53,190 --> 00:01:49,439
follow through them and so it didn't

24
00:01:57,910 --> 00:01:53,200
really die it just went out of

25
00:02:01,830 --> 00:01:57,920
sight now along the way uh uh something

26
00:02:05,630 --> 00:02:01,840
that that came across my path in in this

27
00:02:09,550 --> 00:02:05,640
was that I was contacted by a

28
00:02:12,470 --> 00:02:09,560
uh CEO of a think tank in Washington

29
00:02:15,309 --> 00:02:12,480
DC uh this is back a couple of decades

30
00:02:18,589 --> 00:02:15,319
ago he says I want you to come and

31
00:02:21,750 --> 00:02:18,599
participate at a conference here in in

32
00:02:24,630 --> 00:02:21,760
Washington I said well frankly I'm too

33
00:02:28,550 --> 00:02:24,640
busy what's it about he says I can't

34
00:02:31,910 --> 00:02:28,560
tell you what it's about but if you come

35
00:02:34,190 --> 00:02:31,920
and you participate you will consider it

36
00:02:36,030 --> 00:02:34,200
later to be one of the most important

37
00:02:39,350 --> 00:02:36,040
conferences you ever

38
00:02:42,509 --> 00:02:39,360

met well since I had respect for him and

39
00:02:45,630 --> 00:02:42,519
know his background and many things he's

40
00:02:48,990 --> 00:02:45,640
done I did finally decide to come to

41
00:02:50,949 --> 00:02:49,000
this conference and when I arrived uh

42
00:02:54,470 --> 00:02:50,959
there were about I don't know 15 20

43
00:02:56,630 --> 00:02:54,480
people I recognized some of them from

44
00:03:02,030 --> 00:02:56,640
the military from

45
00:03:03,470 --> 00:03:02,040
CIA Dia some business men and so on so I

46
00:03:04,990 --> 00:03:03,480
thought well this is this is quite an

47
00:03:08,190 --> 00:03:05,000
interesting group of

48
00:03:09,869 --> 00:03:08,200
people and so to start the conference

49
00:03:13,750 --> 00:03:09,879
off he

50
00:03:16,030 --> 00:03:13,760
said this conference is about disclosing

51
00:03:20,670 --> 00:03:16,040
something to the American

52
00:03:24,309 --> 00:03:20,680
public as a startup position let's

53
00:03:28,429 --> 00:03:24,319
assume that there have been crash revals

54
00:03:31,869 --> 00:03:28,439
by Russia China and the United

55
00:03:33,350 --> 00:03:31,879
States and the question is can we bring

56
00:03:36,350 --> 00:03:33,360
this out to the

57
00:03:39,390 --> 00:03:36,360
public and so I think I and most of the

58
00:03:43,229 --> 00:03:39,400
people I knew you talk to later but oh

59
00:03:44,789 --> 00:03:43,239
this is really cool I mean this this

60
00:03:47,190 --> 00:03:44,799
this could really go some

61
00:03:49,390 --> 00:03:47,200
place so he said okay the strategy we're

62
00:03:51,429 --> 00:03:49,400
going to use is we're going to make a

63
00:03:53,789 --> 00:03:51,439

list of all the areas that you think

64
00:03:57,429 --> 00:03:53,799
would be affected by

65
00:03:59,149 --> 00:03:57,439
this and then on each one you're going

66
00:04:02,789 --> 00:03:59,159
to have to grade them on the scale from

67
00:04:04,550 --> 00:04:02,799
plus 9 to minus 9 as to the level of

68
00:04:07,190 --> 00:04:04,560
impact and whether it's positive or

69
00:04:09,710 --> 00:04:07,200
negative okay so we started out by

70
00:04:12,670 --> 00:04:09,720
making list so we start out with the

71
00:04:17,390 --> 00:04:12,680
obvious things well I mean the stock

72
00:04:19,870 --> 00:04:17,400
market uh maybe uh religions well

73
00:04:22,069 --> 00:04:19,880
certainly politics would be effective so

74
00:04:25,110 --> 00:04:22,079
we made a long list and it was really a

75
00:04:27,070 --> 00:04:25,120
long list and time we got down to the

76
00:04:32,990 --> 00:04:27,080
bottom of the list we're really in the

77
00:04:35,909 --> 00:04:33,000
weeds like okay if Corporation a has

78
00:04:39,469 --> 00:04:35,919
access to retrieve

79
00:04:41,790 --> 00:04:39,479
materials then Corporation B doesn't

80
00:04:44,990 --> 00:04:41,800
then when this comes out Corporation B

81
00:04:47,670 --> 00:04:45,000
is going to sue Corporation a sue the

82
00:04:50,790 --> 00:04:47,680
government this is really going to be a

83
00:04:52,790 --> 00:04:50,800
tough thing to kind of handle okay okay

84
00:04:54,909 --> 00:04:52,800
so anyway we broke up into groups he's

85
00:04:58,550 --> 00:04:54,919
taking a certain number of the things

86
00:05:01,909 --> 00:04:58,560
that were in our list

87
00:05:07,070 --> 00:05:04,070
and in my

88
00:05:08,070 --> 00:05:07,080

group we added up the numbers plus 9 to

89
00:05:11,510 --> 00:05:08,080
minus

90
00:05:13,710 --> 00:05:11,520
9 and we ended up in the negative

91
00:05:16,430 --> 00:05:13,720
category even though we were kind of

92
00:05:17,830 --> 00:05:16,440
positively disposed to the idea so I

93
00:05:20,950 --> 00:05:17,840
thought well maybe that just has to do

94
00:05:24,070 --> 00:05:20,960
with particular list that we got so then

95
00:05:28,070 --> 00:05:24,080
I talked to other people that R other

96
00:05:31,469 --> 00:05:28,080
list and said you know we came to a

97
00:05:34,150 --> 00:05:31,479
negative number also well make a long

98
00:05:36,670 --> 00:05:34,160
story short it turned out that everybody

99
00:05:39,909 --> 00:05:36,680
going through these lists it was a very

100
00:05:42,350 --> 00:05:39,919
sophisticated situation with complex

101
00:05:45,189 --> 00:05:42,360
computers and big screens and all that

102
00:05:48,230 --> 00:05:45,199
kind of stuff it finally came down to

103
00:05:51,350 --> 00:05:48,240
the fact that the problem

104
00:05:53,990 --> 00:05:51,360
was there's so many areas to

105
00:05:56,710 --> 00:05:54,000
handle and there was no way to handle

106
00:06:01,710 --> 00:05:56,720
them all at the same

107
00:06:04,029 --> 00:06:01,720
time and so the final result was

108
00:06:06,270 --> 00:06:04,039
therefore believe said we're going to

109
00:06:09,189 --> 00:06:06,280
recommend that we don't go forward with

110
00:06:11,110 --> 00:06:09,199
this and so those of us who were

111
00:06:13,430 --> 00:06:11,120
participating in this were pretty

112
00:06:14,790 --> 00:06:13,440
disappointed thinking you know we

113
00:06:16,230 --> 00:06:14,800

started thinking that you know this

114
00:06:17,990 --> 00:06:16,240
would be a good thing to

115
00:06:23,510 --> 00:06:18,000
do so

116
00:06:26,469 --> 00:06:23,520
anyway let's go forward up to let's say

117
00:06:30,309 --> 00:06:26,479
uh

118
00:06:33,550 --> 00:06:30,319
2008 now you suddenly have as

119
00:06:36,550 --> 00:06:33,560
Lesley proclaimed so well in her

120
00:06:40,390 --> 00:06:36,560
December 2017 article in the New York

121
00:06:44,189 --> 00:06:40,400
Times U Senators

122
00:06:53,550 --> 00:06:49,830
uh uh let's see Senators Reed Inu and

123
00:06:56,990 --> 00:06:53,560
Stevens decided that there should be a

124
00:06:58,029 --> 00:06:57,000
new study started from scratch with new

125
00:07:01,830 --> 00:06:58,039
people

126
00:07:04,869 --> 00:07:01,840
involved to to investigate the

127
00:07:06,909 --> 00:07:04,879
area so I would like to remind you that

128
00:07:09,629 --> 00:07:06,919
those three senators were all part of

129
00:07:12,230 --> 00:07:09,639
the gang of eight which means they

130
00:07:13,790 --> 00:07:12,240
probably had some background as to you

131
00:07:18,629 --> 00:07:13,800
know why this was a good

132
00:07:22,390 --> 00:07:18,639
idea and so they uh told the defense

133
00:07:24,309 --> 00:07:22,400
intelligence agency to start a program

134
00:07:27,749 --> 00:07:24,319
now this was the oap

135
00:07:30,950 --> 00:07:27,759
program uh which you you're probably all

136
00:07:33,150 --> 00:07:30,960
familiar with uh Advanced Aerospace

137
00:07:36,110 --> 00:07:33,160
Weapons Systems application program

138
00:07:39,070 --> 00:07:36,120

which eventually morphed into HP

139
00:07:41,710 --> 00:07:39,080
Advanced Aerospace thread identification

140
00:07:42,749 --> 00:07:41,720
program and the requirements of the DIA

141
00:07:46,110 --> 00:07:42,759
were

142
00:07:49,270 --> 00:07:46,120
two one the most obvious one of course

143
00:07:50,589 --> 00:07:49,280
is where are these things coming from

144
00:07:53,550 --> 00:07:50,599
what's their

145
00:07:56,589 --> 00:07:53,560
intent uh what do we have to deal with

146
00:07:59,589 --> 00:07:56,599
here it turns out that that was not a

147
00:08:03,309 --> 00:07:59,599
particular interest it was really item

148
00:08:06,710 --> 00:08:03,319
number two and that is since we know

149
00:08:11,029 --> 00:08:06,720
other countries are researching this

150
00:08:13,550 --> 00:08:11,039
getting access to materials and so on

151
00:08:16,950 --> 00:08:13,560
what happens if they

152
00:08:20,270 --> 00:08:16,960
develop Advanced Technologies in our

153
00:08:22,710 --> 00:08:20,280
adversarial uh competitors that leaped

154
00:08:26,309 --> 00:08:22,720
ahead of us that's what they were most

155
00:08:28,749 --> 00:08:26,319
worried about so we had to take on that

156
00:08:31,949 --> 00:08:28,759
as as our challenge to figure out you

157
00:08:36,230 --> 00:08:31,959
know you what could it be

158
00:08:38,110 --> 00:08:36,240
now the list of things they wanted us to

159
00:08:39,990 --> 00:08:38,120
uh

160
00:08:42,750 --> 00:08:40,000
investigate and I want you to think

161
00:08:45,710 --> 00:08:42,760
about the fact that they must have known

162
00:08:48,150 --> 00:08:45,720
something to make a list like

163
00:08:50,310 --> 00:08:48,160

this they were interested in 12

164
00:08:56,110 --> 00:08:50,320
Potential Threat areas with regard to

165
00:08:59,790 --> 00:08:56,120
UAP lift propulsion control Power

166
00:09:03,110 --> 00:08:59,800
Generation SpaceTime translation

167
00:09:04,350 --> 00:09:03,120
materials configuration structure

168
00:09:08,870 --> 00:09:04,360
signature

169
00:09:12,790 --> 00:09:08,880
reduction human effects human interface

170
00:09:15,710 --> 00:09:12,800
Armament and peripheral support issues

171
00:09:17,750 --> 00:09:15,720
well that's a pretty intelligent list so

172
00:09:21,230 --> 00:09:17,760
chances are you've got some knowledge

173
00:09:23,990 --> 00:09:21,240
that's driving this list so our ingoing

174
00:09:27,110 --> 00:09:24,000
assumption was okay and maybe what we

175
00:09:31,470 --> 00:09:27,120
have heard way back in 2004 was true and

176
00:09:35,030 --> 00:09:31,480
that is country do have access to crash

177
00:09:37,710 --> 00:09:35,040
PR materials okay so well let's just go

178
00:09:40,190 --> 00:09:37,720
get their materials and get them men the

179
00:09:42,750 --> 00:09:40,200
scientific

180
00:09:46,269 --> 00:09:42,760
Community part of my job was to try to

181
00:09:47,630 --> 00:09:46,279
negotiate that and the answer was this

182
00:09:50,230 --> 00:09:47,640
is so

183
00:09:53,350 --> 00:09:50,240
compartmentalized it just isn't going to

184
00:09:56,670 --> 00:09:53,360
happen when I say compartmentalized I

185
00:09:58,550 --> 00:09:56,680
mean people had stuff in their basements

186
00:10:00,750 --> 00:09:58,560
that they would love to have brought up

187
00:10:03,990 --> 00:10:00,760
to their scientists and Engineers of the

188
00:10:08,350 --> 00:10:04,000

top four it was so compartmentalized and

189
00:10:11,190 --> 00:10:08,360
so secure they couldn't do that so that

190
00:10:13,590 --> 00:10:11,200
turned out to be a nonstarter said okay

191
00:10:18,190 --> 00:10:13,600
well let's try Plan

192
00:10:20,829 --> 00:10:18,200
B pass all the materials to us we'll set

193
00:10:23,430 --> 00:10:20,839
up a kind of a buffer organization and

194
00:10:26,470 --> 00:10:23,440
then we'll come in the front door for

195
00:10:29,790 --> 00:10:26,480
your people to work on it and we won't

196
00:10:31,550 --> 00:10:29,800
reveal where this stuff uh came from so

197
00:10:33,030 --> 00:10:31,560
that that'll give you you know what what

198
00:10:37,350 --> 00:10:33,040
you need to separate

199
00:10:38,670 --> 00:10:37,360
it that got shot down big time so we

200
00:10:41,790 --> 00:10:38,680
went to plan

201
00:10:44,509 --> 00:10:41,800
C plan C was

202
00:10:46,590 --> 00:10:44,519
okay we can't do this the obvious

203
00:10:50,710 --> 00:10:46,600
straightforward way all this technical

204
00:10:54,230 --> 00:10:50,720
stuff so how about

205
00:10:56,110 --> 00:10:54,240
this let's go to all the experts in the

206
00:10:57,829 --> 00:10:56,120
world that we wish we could have passed

207
00:11:01,069 --> 00:10:57,839
this information

208
00:11:04,110 --> 00:11:01,079
unto and and tell them that we're just

209
00:11:06,590 --> 00:11:04,120
doing a survey for bigo

210
00:11:09,790 --> 00:11:06,600
Aerospace we'd like to know where your

211
00:11:11,670 --> 00:11:09,800
field will be in the year

212
00:11:14,430 --> 00:11:11,680
2050

213
00:11:19,190 --> 00:11:14,440

unclassified could go to people in other

214
00:11:24,190 --> 00:11:21,990
uh the kinds of programs that they that

215
00:11:26,629 --> 00:11:24,200
they set up for us I'll just read a few

216
00:11:30,230 --> 00:11:26,639
of them there were 38 all together

217
00:11:34,030 --> 00:11:30,240
actually just to give you an idea of how

218
00:11:36,990 --> 00:11:34,040
technical we consider this program to be

219
00:11:39,069 --> 00:11:37,000
a neutronic fusion propulsion

220
00:11:42,910 --> 00:11:39,079
superconductors and Gravity

221
00:11:46,389 --> 00:11:42,920
Research positron Aerospace propulsor

222
00:11:48,430 --> 00:11:46,399
warp drive Dark Energy extra Dimensions

223
00:11:49,629 --> 00:11:48,440
Advanced nuclear propulsion brain

224
00:11:52,750 --> 00:11:49,639
machine

225
00:11:53,829 --> 00:11:52,760
interfaces IEC Fusion as a compact

226
00:11:59,670 --> 00:11:53,839
energy

227
00:12:03,310 --> 00:11:59,680
SpaceTime metric engineering traversable

228
00:12:06,350 --> 00:12:03,320
wormholes Stargates Advanced Aerospace

229
00:12:11,269 --> 00:12:06,360
materials metallic glasses for Aerospace

230
00:12:15,310 --> 00:12:11,279
use mbased bio sensors and on and on and

231
00:12:19,470 --> 00:12:15,320
on so we had uh got 38 of

232
00:12:22,110 --> 00:12:19,480
those uh none of the individuals that we

233
00:12:24,150 --> 00:12:22,120
approach had any idea had anything to do

234
00:12:25,750 --> 00:12:24,160
with trying to figure out anything about

235
00:12:27,910 --> 00:12:25,760
ET

236
00:12:29,470 --> 00:12:27,920
Technologies and so we told you you

237
00:12:32,430 --> 00:12:29,480
could even publish in the open

238
00:12:36,629 --> 00:12:32,440

literature and and many of them did when

239
00:12:39,590 --> 00:12:36,639
I gathered them all up we posted them on

240
00:12:40,430 --> 00:12:39,600
What's called the jaywick website for uh

241
00:12:43,990 --> 00:12:40,440
the

242
00:12:47,430 --> 00:12:44,000
Pentagon uh as dirs

243
00:12:49,470 --> 00:12:47,440
dirds defense intelligence reference

244
00:12:51,949 --> 00:12:49,480
documents and usually when you publish

245
00:12:54,069 --> 00:12:51,959
technical papers like that this is just

246
00:12:56,310 --> 00:12:54,079
for contractors in the intelligence

247
00:12:58,590 --> 00:12:56,320
Community uh they go up there and

248
00:13:01,870 --> 00:12:58,600
they're of interest to people for about

249
00:13:06,790 --> 00:13:01,880
uh a month or so we were told that this

250
00:13:09,949 --> 00:13:06,800
series of dirs was the most high quality

251
00:13:12,230 --> 00:13:09,959
longlasting set they ever put up they

252
00:13:14,990 --> 00:13:12,240
just couldn't take them down because

253
00:13:17,150 --> 00:13:15,000
everybody was you know really into uh

254
00:13:19,629 --> 00:13:17,160
you know wanting to see these So

255
00:13:20,750 --> 00:13:19,639
eventually as time goes forward and

256
00:13:24,110 --> 00:13:20,760
people do

257
00:13:26,470 --> 00:13:24,120
FAS at this point all of the these

258
00:13:29,509 --> 00:13:26,480
papers have basically been made

259
00:13:30,949 --> 00:13:29,519
available and you and you can get them

260
00:13:33,509 --> 00:13:30,959
and of course I thought all these people

261
00:13:35,110 --> 00:13:33,519
were going to troun all over me and say

262
00:13:38,750 --> 00:13:35,120
oh my God you didn't tell me to say

263
00:13:41,710 --> 00:13:38,760

anything to do with ET or UFOs or

264
00:13:43,990 --> 00:13:41,720
whatever but the quality papers we got

265
00:13:46,790 --> 00:13:44,000
uh I think are probably almost as good

266
00:13:49,910 --> 00:13:46,800
as if we had been able to share

267
00:13:53,150 --> 00:13:49,920
materials and so on so anyway that's

268
00:13:56,790 --> 00:13:53,160
that's where we uh have come up to at

269
00:13:59,710 --> 00:13:56,800
the present time and of course now uh

270
00:14:04,790 --> 00:13:59,720
after her article appeared and all the

271
00:14:09,629 --> 00:14:04,800
interest came up and as you know we have

272
00:14:12,470 --> 00:14:09,639
uh people like Dave brush coming forward

273
00:14:15,509 --> 00:14:12,480
and saying straight out we've got

274
00:14:17,269 --> 00:14:15,519
materials craft

275
00:14:21,150 --> 00:14:17,279
and

276
00:14:24,189 --> 00:14:21,160
bodies he's not the only one as it turns

277
00:14:29,629 --> 00:14:24,199
out the person who ran the program at

278
00:14:37,710 --> 00:14:29,639
DIA for us was uh Jim laty

279
00:14:43,110 --> 00:14:40,910
name and they just published a

280
00:14:46,189 --> 00:14:43,120
book

281
00:14:49,749 --> 00:14:46,199
lasi who ran the program from

282
00:14:51,990 --> 00:14:49,759
DIA col kellerer who was the project

283
00:14:53,790 --> 00:14:52,000
manager at bigo Advanced Aerospace

284
00:14:57,430 --> 00:14:53,800
studies who was the prim

285
00:15:00,749 --> 00:14:57,440
contractor and George na called inside

286
00:15:03,150 --> 00:15:00,759
the US government overt UFO programs

287
00:15:06,030 --> 00:15:03,160
initial

288
00:15:07,790 --> 00:15:06,040

Revelations and uh one of the key

289
00:15:11,670 --> 00:15:07,800
phrases in there that certainly caught

290
00:15:14,910 --> 00:15:11,680
my attention when I saw it was that Jim

291
00:15:17,310 --> 00:15:14,920
laty who is also a very

292
00:15:21,790 --> 00:15:17,320
high intelligence

293
00:15:25,470 --> 00:15:21,800
Community uh responsible

294
00:15:29,389 --> 00:15:25,480
individual reveals in the book that we

295
00:15:33,110 --> 00:15:29,399
have craft of Unknown Origin and we've

296
00:15:35,710 --> 00:15:33,120
gotten inside it so it isn't just Dave

297
00:15:38,389 --> 00:15:35,720
Rush as a high level intelligence person

298
00:15:41,829 --> 00:15:38,399
bringing us out to the world we now have

299
00:15:44,430 --> 00:15:41,839
the person who ran this program which is

300
00:15:47,990 --> 00:15:44,440
a very significant program so anyway

301
00:15:49,949 --> 00:15:48,000
that's that's where we come to so uh I

302
00:15:51,990 --> 00:15:49,959
think Now's the Time that you know we

303
00:15:56,189 --> 00:15:52,000
have all these reasons to take this

304
00:15:58,990 --> 00:15:56,199
really seriously and to to uh expect

305
00:16:00,670 --> 00:15:59,000
that something is going to come out into

306
00:16:04,230 --> 00:16:00,680
the public and of course many of you

307
00:16:06,670 --> 00:16:04,240
know about the Schumer Amendment uh

308
00:16:08,389 --> 00:16:06,680
where can't believe it in a

309
00:16:11,430 --> 00:16:08,399
congressional

310
00:16:13,870 --> 00:16:11,440
Amendment the word nhi non-human

311
00:16:18,710 --> 00:16:13,880
intelligence appears over 20

312
00:16:22,030 --> 00:16:18,720
times and uh if that

313
00:16:24,350 --> 00:16:22,040

passes things will move forward at some

314
00:16:25,990 --> 00:16:24,360
relatively rapid clip but there are

315
00:16:29,430 --> 00:16:26,000
going to be problems because some of the

316
00:16:32,790 --> 00:16:29,440
problems are going to go back to what we

317
00:16:35,189 --> 00:16:32,800
looked at Even in our disclosure

318
00:16:38,790 --> 00:16:35,199
conference and that

319
00:16:41,230 --> 00:16:38,800
is people get

320
00:16:44,189 --> 00:16:41,240
materials ordinarily you say okay it's

321
00:16:46,189 --> 00:16:44,199
on a contract the government has you

322
00:16:49,670 --> 00:16:46,199
know access to it and so

323
00:16:52,189 --> 00:16:49,680
on but originally when they went to

324
00:16:53,629 --> 00:16:52,199
Aerospace corporations and elsewhere and

325
00:16:56,309 --> 00:16:53,639
said you know you got to help us with

326
00:16:57,470 --> 00:16:56,319
this problem their answer was we're not

327
00:16:59,350 --> 00:16:57,480
going to do

328
00:17:00,629 --> 00:16:59,360
that well what do you mean you're not

329
00:17:03,430 --> 00:17:00,639
going to do that I mean we're going to

330
00:17:05,669 --> 00:17:03,440
give you money yeah but then you'll own

331
00:17:08,870 --> 00:17:05,679
it all and you know we'll work on it

332
00:17:14,309 --> 00:17:08,880
you'll take advantage of it so they

333
00:17:17,669 --> 00:17:14,319
basically said uh okay if we have

334
00:17:19,470 --> 00:17:17,679
control then we'll consider doing it and

335
00:17:22,949 --> 00:17:19,480
there are technical ways of getting

336
00:17:26,429 --> 00:17:22,959
control for example if you're on a

337
00:17:28,830 --> 00:17:26,439
contract and uh you sign an NDA or

338
00:17:32,070 --> 00:17:28,840

whatever well I mean the government is

339
00:17:37,430 --> 00:17:32,080
involved on the other hand there are

340
00:17:39,710 --> 00:17:37,440
things called irad internal R&B that all

341
00:17:42,110 --> 00:17:39,720
major corporations have where they get

342
00:17:44,390 --> 00:17:42,120
money from the government but it's for

343
00:17:46,590 --> 00:17:44,400
them to do whatever they want to do and

344
00:17:50,470 --> 00:17:46,600
whatever they do they

345
00:17:55,789 --> 00:17:50,480
own and so that's an issue that's going

346
00:17:59,430 --> 00:17:55,799
to put a damper on complete disclosure

347
00:18:02,390 --> 00:17:59,440
to the public I'm sure so

348
00:18:03,830 --> 00:18:02,400
these aspects of the Schumer memorandum

349
00:18:07,630 --> 00:18:03,840
they really going to have to work on

350
00:18:09,750 --> 00:18:07,640
that to to to make it work to where uh

351
00:18:12,870 --> 00:18:09,760
you know the public in general has going

352
00:18:15,110 --> 00:18:12,880
to learn a lot but I think I think we're

353
00:18:16,950 --> 00:18:15,120
on the right track so that's that's

354
00:18:27,310 --> 00:18:16,960
that's where we are on the development
