

KARL NELL

“The Schumer Amendment
& Controlled Disclosure”

1
00:00:04,059 --> 00:00:30,610

[Music]

2
00:00:34,389 --> 00:00:32,109

[Applause]

3
00:00:36,030 --> 00:00:34,399

thank you thank you very much it's

4
00:00:38,310 --> 00:00:36,040

really a pleasure and an honor to be

5
00:00:40,470 --> 00:00:38,320

here and uh just the sincerest thanks to

6
00:00:42,150 --> 00:00:40,480

Gary and Peter and Saul for for putting

7
00:00:44,709 --> 00:00:42,160

this together and it's really a

8
00:00:46,150 --> 00:00:44,719

combination of I think Decades of work

9
00:00:47,830 --> 00:00:46,160

of all the people in the audience and

10
00:00:50,350 --> 00:00:47,840

other folks that have brought us to this

11
00:00:52,709 --> 00:00:50,360

stage and and thanks also to Dan shean

12
00:00:55,869 --> 00:00:52,719

and his new paradigm Institute coming at

13
00:00:58,830 --> 00:00:55,879

this from the um philosophical ethical

14

00:01:01,189 --> 00:00:58,840

perspective as well I think uh Diana had

15

00:01:03,389 --> 00:01:01,199

a great point where she said said um you

16

00:01:04,750 --> 00:01:03,399

know there almost this emergent uh

17

00:01:07,350 --> 00:01:04,760

properties that come out of a

18

00:01:09,149 --> 00:01:07,360

collaboration and some sense Schumer is

19

00:01:10,910 --> 00:01:09,159

sort of an example of this you know some

20

00:01:13,590 --> 00:01:10,920

people ask like where does this Schumer

21

00:01:14,830 --> 00:01:13,600

thing come from and um maybe I can touch

22

00:01:17,870 --> 00:01:14,840

on that a little bit because I think

23

00:01:19,749 --> 00:01:17,880

it's really an example of uh what she

24

00:01:21,390 --> 00:01:19,759

was talking about this sort of emerging

25

00:01:24,350 --> 00:01:21,400

and sometimes this collaboration isn't

26
00:01:25,910 --> 00:01:24,360
necessarily even overt it's uh one group

27
00:01:28,510 --> 00:01:25,920
inspires another group to do certain

28
00:01:30,630 --> 00:01:28,520
things there's a dynamic there uh but

29
00:01:32,190 --> 00:01:30,640
first like what is the Schumer

30
00:01:34,789 --> 00:01:32,200
well 10 years ago probably the Schumer

31
00:01:37,670 --> 00:01:34,799
Amendment would have been viewed as UAP

32
00:01:40,670 --> 00:01:37,680
UFO disclosure and the amendment seeks

33
00:01:42,749 --> 00:01:40,680
to to very clearly uh clarify what the

34
00:01:46,429 --> 00:01:42,759
scope is of their problem set and what

35
00:01:49,429 --> 00:01:46,439
they're trying to do about it um but the

36
00:01:51,510 --> 00:01:49,439
the um probably the recognition really

37
00:01:53,789 --> 00:01:51,520
ought to go to some silent few on the

38
00:01:55,990 --> 00:01:53,799

hill in terms of the the full-time

39

00:01:58,270 --> 00:01:56,000

staffers that really were seeing this

40

00:02:00,429 --> 00:01:58,280

thing through but the thing that enabled

41

00:02:01,950 --> 00:02:00,439

that to happen was a lot of the work

42

00:02:04,550 --> 00:02:01,960

that's happened out here in the audience

43

00:02:07,389 --> 00:02:04,560

and out here in the community and uh

44

00:02:09,589 --> 00:02:07,399

that enabled and set the conditions for

45

00:02:11,710 --> 00:02:09,599

the staff to have the confidence to move

46

00:02:13,869 --> 00:02:11,720

forward uh to implement this type of

47

00:02:16,390 --> 00:02:13,879

legislation obviously uh with the

48

00:02:19,190 --> 00:02:16,400

majority leader and uh complete

49

00:02:20,949 --> 00:02:19,200

bipartisan uh Coalition doing this to to

50

00:02:22,990 --> 00:02:20,959

make that happen I'll talk a little bit

51
00:02:25,270 --> 00:02:23,000
about the amendment the reasons for it

52
00:02:26,949 --> 00:02:25,280
and then uh maybe a linkage into

53
00:02:29,070 --> 00:02:26,959
possible ways forward that might link

54
00:02:30,550 --> 00:02:29,080
into uh some opportunities for the

55
00:02:33,589 --> 00:02:30,560
foundation and the folks that are

56
00:02:35,869 --> 00:02:33,599
participating here uh so what are these

57
00:02:38,350 --> 00:02:35,879
sort of emerging factors that happen

58
00:02:41,110 --> 00:02:38,360
well I think Leslie kean's article as

59
00:02:43,910 --> 00:02:41,120
everyone is familiar was a key SE State

60
00:02:46,070 --> 00:02:43,920
change in U you know

61
00:02:48,670 --> 00:02:46,080
precipitating uh the removal a lot of

62
00:02:50,309 --> 00:02:48,680
the stigma that surrounded this topic

63
00:02:53,149 --> 00:02:50,319

and of course coincident with that the

64

00:02:55,509 --> 00:02:53,159

work of Chris melon and Lou alzado in

65

00:02:57,670 --> 00:02:55,519

getting those videos released and adding

66

00:02:59,910 --> 00:02:57,680

their uh names and reputations to the

67

00:03:02,750 --> 00:02:59,920

topic to move it forward so certainly

68

00:03:06,149 --> 00:03:02,760

that was a key incident the next piece

69

00:03:10,110 --> 00:03:06,159

uh was I would argue the David grush uh

70

00:03:12,229 --> 00:03:10,120

Ryan Graves David fraver um testimony

71

00:03:13,949 --> 00:03:12,239

before Congress again lowering the

72

00:03:16,710 --> 00:03:13,959

threshold of making this topic

73

00:03:18,390 --> 00:03:16,720

respectable and um and incentivizing

74

00:03:20,710 --> 00:03:18,400

some discussion about it so you'll

75

00:03:22,949 --> 00:03:20,720

notice if you look at the Timeline there

76

00:03:24,710 --> 00:03:22,959

uh on the left that uh the approval of

77

00:03:26,470 --> 00:03:24,720

the amendment was maybe a day after that

78

00:03:29,309 --> 00:03:26,480

hearing so I don't think those are

79

00:03:31,589 --> 00:03:29,319

necessarily synchronized uh the work for

80

00:03:34,190 --> 00:03:31,599

Schumer was going on in the background

81

00:03:36,390 --> 00:03:34,200

but all these contributive factors were

82

00:03:38,750 --> 00:03:36,400

lowering that threshold for uh for

83

00:03:39,949 --> 00:03:38,760

making this acceptable so if you look at

84

00:03:41,630 --> 00:03:39,959

uh the folks that are actually

85

00:03:44,070 --> 00:03:41,640

supporting this you got two folks on the

86

00:03:46,229 --> 00:03:44,080

Sask you got two folks on the

87

00:03:49,070 --> 00:03:46,239

you've got complete bipartisanship right

88

00:03:51,110 --> 00:03:49,080

you've got uh rounds and Schumer that

89

00:03:53,589 --> 00:03:51,120

are sponsors but of course you've got

90

00:03:55,270 --> 00:03:53,599

Senator Gilibran and Senator Rubio from

91

00:03:57,750 --> 00:03:55,280

the left and the right supporting it and

92

00:04:00,270 --> 00:03:57,760

you've got uh Senator Hinrich and and

93

00:04:02,589 --> 00:04:00,280

Young and the other interesting takeaway

94

00:04:04,110 --> 00:04:02,599

from this is there's two people that are

95

00:04:07,229 --> 00:04:04,120

sponsoring this bill that are on the

96

00:04:08,670 --> 00:04:07,239

gang of eight so the gang of eight uh

97

00:04:10,110 --> 00:04:08,680

was really a concept that got created

98

00:04:12,630 --> 00:04:10,120

out of the church commission when there

99

00:04:14,830 --> 00:04:12,640

was uh Intel oversight concerns back in

100

00:04:16,550 --> 00:04:14,840

the 60s and the 70s where there were

101
00:04:18,270 --> 00:04:16,560
activities going on that that Congress

102
00:04:20,229 --> 00:04:18,280
was not aware of and that were

103
00:04:23,310 --> 00:04:20,239
essentially illegal and so there was a

104
00:04:26,310 --> 00:04:23,320
Structure put in place such that certain

105
00:04:28,629 --> 00:04:26,320
key members of Congress would be legally

106
00:04:30,830 --> 00:04:28,639
entitled to hear about all information

107
00:04:33,469 --> 00:04:30,840
that pertained to the equities of title

108
00:04:35,110 --> 00:04:33,479
10 and title 50 and so that created this

109
00:04:36,950 --> 00:04:35,120
concept of the gang of eight which is

110
00:04:39,830 --> 00:04:36,960
the majority leader and the minority

111
00:04:41,990 --> 00:04:39,840
leader in the Senate the speaker and the

112
00:04:45,029 --> 00:04:42,000
U minority major minority leader in the

113
00:04:47,310 --> 00:04:45,039

house and then uh the ranking and chairs

114

00:04:49,230 --> 00:04:47,320

of each of the Intel committees so

115

00:04:51,950 --> 00:04:49,240

that's eight folks so these folks are

116

00:04:54,189 --> 00:04:51,960

the people in Congress that are aware of

117

00:04:56,909 --> 00:04:54,199

all the

118

00:04:58,830 --> 00:04:56,919

information so that should sink in there

119

00:05:01,670 --> 00:04:58,840

are two people there sponsoring this in

120

00:05:03,590 --> 00:05:01,680

Congress that say we need this

121

00:05:05,950 --> 00:05:03,600

legislation um because things aren't

122

00:05:07,670 --> 00:05:05,960

working right and these are the people

123

00:05:10,870 --> 00:05:07,680

that are read into

124

00:05:13,990 --> 00:05:10,880

everything so uh a lot of times when you

125

00:05:16,469 --> 00:05:14,000

get legislation uh it's either uh driven

126

00:05:17,350 --> 00:05:16,479

by lobbyists frankly or you've got to

127

00:05:18,870 --> 00:05:17,360

read the whole thing and you're

128

00:05:20,870 --> 00:05:18,880

wondering you know what the heck were

129

00:05:23,189 --> 00:05:20,880

these people thinking when they wrote

130

00:05:25,870 --> 00:05:23,199

this like why did they do this well in

131

00:05:28,950 --> 00:05:25,880

this case uh the Senators put into the

132

00:05:30,350 --> 00:05:28,960

bill the exact reasons why they were

133

00:05:31,909 --> 00:05:30,360

doing the bill

134

00:05:33,550 --> 00:05:31,919

and this is like section two of the

135

00:05:35,469 --> 00:05:33,560

legislation you can see at the bottom

136

00:05:37,230 --> 00:05:35,479

like the references you can go online

137

00:05:39,270 --> 00:05:37,240

and look it up the actual verbiage so

138

00:05:40,950 --> 00:05:39,280

this is a summary but essentially what

139

00:05:43,469 --> 00:05:40,960

they're saying is we want to preserve

140

00:05:45,670 --> 00:05:43,479

and centralize all records related to

141

00:05:47,270 --> 00:05:45,680

this topic and we'll get into what how

142

00:05:49,590 --> 00:05:47,280

we're defining terms here in a minute

143

00:05:51,670 --> 00:05:49,600

but they feel that it's more important

144

00:05:55,029 --> 00:05:51,680

to pull these records out of the

145

00:05:57,189 --> 00:05:55,039

individual um uh uh controlling

146

00:05:58,870 --> 00:05:57,199

authorities uh possession and

147

00:06:01,749 --> 00:05:58,880

integrating them together in the

148

00:06:03,670 --> 00:06:01,759

National Arch arives is more important

149

00:06:05,309 --> 00:06:03,680

than um having a distributed

150

00:06:06,950 --> 00:06:05,319

decentralized control of the records

151
00:06:09,589 --> 00:06:06,960
that's the number one thing number two

152
00:06:11,830 --> 00:06:09,599
there's a presumption of

153
00:06:13,350 --> 00:06:11,840
disclosure so that doesn't mean that

154
00:06:15,150 --> 00:06:13,360
we're going to you know think about

155
00:06:17,309 --> 00:06:15,160
whether the stuff should be made uh

156
00:06:19,150 --> 00:06:17,319
available it means that there's the

157
00:06:21,350 --> 00:06:19,160
presumption and there's got to be an

158
00:06:24,150 --> 00:06:21,360
argument against if they're not going to

159
00:06:25,790 --> 00:06:24,160
be disclosed so it's very significant

160
00:06:27,189 --> 00:06:25,800
the third thing is that this

161
00:06:29,909 --> 00:06:27,199
legislation's need to create an

162
00:06:31,350 --> 00:06:29,919
enforceable accountable and determin IC

163
00:06:32,830 --> 00:06:31,360

process for this to happen in other

164

00:06:35,909 --> 00:06:32,840

words this isn't going to happen by

165

00:06:38,670 --> 00:06:35,919

itself it hasn't happened yet and so uh

166

00:06:41,270 --> 00:06:38,680

overt explicit measures need to be taken

167

00:06:43,430 --> 00:06:41,280

in law in order to cause this to happen

168

00:06:45,110 --> 00:06:43,440

and the amendment is very specific on on

169

00:06:47,790 --> 00:06:45,120

the mechanisms that are going to be used

170

00:06:48,909 --> 00:06:47,800

to do that the fourth piece is and a lot

171

00:06:50,150 --> 00:06:48,919

of people in the audience probably know

172

00:06:53,309 --> 00:06:50,160

Freedom of Information Act kind of

173

00:06:55,430 --> 00:06:53,319

doesn't work uh the government kind of

174

00:06:57,550 --> 00:06:55,440

knows it doesn't work and and in some

175

00:06:59,990 --> 00:06:57,560

cases that that that's kind of good from

176

00:07:01,589 --> 00:07:00,000

their perspective but but even given

177

00:07:04,350 --> 00:07:01,599

Noble intent you know Freedom of

178

00:07:07,469 --> 00:07:04,360

Information is is very bureaucratic uh

179

00:07:10,510 --> 00:07:07,479

and very um administratively onerous

180

00:07:13,270 --> 00:07:10,520

it's not really very effective but the

181

00:07:15,430 --> 00:07:13,280

fifth piece here uh is even more

182

00:07:18,869 --> 00:07:15,440

interesting uh and this is again in the

183

00:07:21,270 --> 00:07:18,879

amendment verbatim that uh and this is a

184

00:07:23,790 --> 00:07:21,280

declaration of Congress right so they've

185

00:07:27,110 --> 00:07:23,800

researched this and they've declared

186

00:07:29,950 --> 00:07:27,120

that some UAP records are exempt from

187

00:07:31,909 --> 00:07:29,960

mandatory declassification review under

188

00:07:35,629 --> 00:07:31,919

the atomic energy Act of

189

00:07:38,029 --> 00:07:35,639

1954 so unlike the UK some other

190

00:07:40,790 --> 00:07:38,039

countries the United States there is a

191

00:07:43,110 --> 00:07:40,800

mechanism to declassify um classify

192

00:07:45,510 --> 00:07:43,120

information and the records undergo a

193

00:07:47,469 --> 00:07:45,520

review every so often usually 25 years

194

00:07:50,070 --> 00:07:47,479

or so but depends on the specific

195

00:07:52,990 --> 00:07:50,080

information so there's some subset of

196

00:07:55,469 --> 00:07:53,000

records that the Congress has found

197

00:07:57,589 --> 00:07:55,479

evade this mandatory declassification

198

00:08:00,510 --> 00:07:57,599

review and they're stating that that's

199

00:08:02,350 --> 00:08:00,520

due to the atomic energy Act of 19 54 so

200

00:08:04,110 --> 00:08:02,360

you can imagine you know some of the

201
00:08:07,029 --> 00:08:04,120
sort of historical background that might

202
00:08:10,469 --> 00:08:07,039
have precipitated that postor War II

203
00:08:12,149 --> 00:08:10,479
Manhattan project uh sightings going on

204
00:08:14,670 --> 00:08:12,159
at that time and using that same

205
00:08:17,149 --> 00:08:14,680
security apparatus for this topic so so

206
00:08:19,110 --> 00:08:17,159
that's a very significant finding that

207
00:08:21,469 --> 00:08:19,120
Congress is putting out there for folks

208
00:08:23,710 --> 00:08:21,479
that are paying attention the sixth

209
00:08:26,110 --> 00:08:23,720
piece and probably one of the most

210
00:08:29,430 --> 00:08:26,120
important from the perspective of a free

211
00:08:31,149 --> 00:08:29,440
Society is that Congress has determined

212
00:08:32,750 --> 00:08:31,159
that there's not proper oversight over

213
00:08:34,269 --> 00:08:32,760

this information and that's sort of

214

00:08:36,949 --> 00:08:34,279

implicit in the fact that the gang of

215

00:08:38,269 --> 00:08:36,959

eight uh have not been read into what's

216

00:08:40,350 --> 00:08:38,279

happening and they've only found that

217

00:08:42,469 --> 00:08:40,360

out through whistleblower and other

218

00:08:45,509 --> 00:08:42,479

testimonies and many of this is closed

219

00:08:47,870 --> 00:08:45,519

door nonpublic but the other point about

220

00:08:49,470 --> 00:08:47,880

this which is very mature and very

221

00:08:51,990 --> 00:08:49,480

gratifying and again I think links to

222

00:08:54,590 --> 00:08:52,000

what Diana was saying about this sort of

223

00:08:57,150 --> 00:08:54,600

collaboration and emergent way of

224

00:08:59,590 --> 00:08:57,160

working the legislative branch is not

225

00:09:02,030 --> 00:08:59,600

making themselves the antagonist of the

226

00:09:04,470 --> 00:09:02,040

Executive Branch the legislation

227

00:09:07,230 --> 00:09:04,480

explicitly states that hey legislative

228

00:09:08,710 --> 00:09:07,240

branch you're in the same boat we are

229

00:09:10,630 --> 00:09:08,720

neither the executive nor the

230

00:09:13,110 --> 00:09:10,640

legislative has proper oversight over

231

00:09:15,590 --> 00:09:13,120

this problem and that's explicit in the

232

00:09:18,870 --> 00:09:15,600

legislation and then the seventh piece

233

00:09:20,670 --> 00:09:18,880

is like why do we care uh well we care

234

00:09:23,150 --> 00:09:20,680

because we can't do open scientific

235

00:09:25,389 --> 00:09:23,160

research and we care because we're

236

00:09:27,470 --> 00:09:25,399

concerned about technological surprise

237

00:09:29,710 --> 00:09:27,480

and we're concerned about the the the

238

00:09:31,710 --> 00:09:29,720

public interest and the public good and

239

00:09:34,069 --> 00:09:31,720

so the legislation is explicit about all

240

00:09:36,030 --> 00:09:34,079

of that so it's very important uh and

241

00:09:37,710 --> 00:09:36,040

I'd encourage anybody to go look at

242

00:09:40,069 --> 00:09:37,720

section two of the legislation and read

243

00:09:42,470 --> 00:09:40,079

the Verbatim what they're saying

244

00:09:45,230 --> 00:09:42,480

here all right so like what's actually

245

00:09:47,750 --> 00:09:45,240

the scope and so this is um probably a

246

00:09:49,670 --> 00:09:47,760

good point to talk about terminology so

247

00:09:51,590 --> 00:09:49,680

a lot of the stigma has been removed by

248

00:09:54,630 --> 00:09:51,600

sort of changing terms of reference

249

00:09:59,590 --> 00:09:54,640

right so we went from UFO flying saucer

250

00:10:01,509 --> 00:09:59,600

you know uh ET to UAP and so uh UAP p is

251
00:10:04,230 --> 00:10:01,519
probably a more accurate term right it's

252
00:10:07,230 --> 00:10:04,240
a phenomena and that could be a range of

253
00:10:09,269 --> 00:10:07,240
things from metaphysical to psychosocial

254
00:10:11,150 --> 00:10:09,279
To Nuts and Bolts to religious to

255
00:10:13,630 --> 00:10:11,160
Consciousness there's a whole range of

256
00:10:17,030 --> 00:10:13,640
things so so this was actually very

257
00:10:20,230 --> 00:10:17,040
helpful in a uh in a sort of a

258
00:10:22,230 --> 00:10:20,240
intentional ambiguity to allow consensus

259
00:10:24,150 --> 00:10:22,240
to occur around the topic at the same

260
00:10:27,470 --> 00:10:24,160
time as it we're moving historical

261
00:10:29,550 --> 00:10:27,480
stigma and so uh you know in cander

262
00:10:31,670 --> 00:10:29,560
that's actually allowed leg player to

263
00:10:35,030 --> 00:10:31,680

come together in ndas

264

00:10:38,230 --> 00:10:35,040

2122 and in 23 to make progress on the

265

00:10:40,470 --> 00:10:38,240

topic but I think uh a lot of folks

266

00:10:42,470 --> 00:10:40,480

would agree that the problem comes in

267

00:10:44,910 --> 00:10:42,480

when you actually want to address what

268

00:10:47,470 --> 00:10:44,920

the underlying issue is and so if you

269

00:10:50,190 --> 00:10:47,480

look at what arrow is doing for instance

270

00:10:52,629 --> 00:10:50,200

what problem are they actually solving

271

00:10:54,230 --> 00:10:52,639

UAP is so broad even in an operational

272

00:10:56,190 --> 00:10:54,240

sense it could be probably four

273

00:10:58,750 --> 00:10:56,200

different problems right it could be the

274

00:11:01,269 --> 00:10:58,760

air trash range safety problem that Ryan

275

00:11:02,990 --> 00:11:01,279

Gra is highlighted so effectively it

276

00:11:05,230 --> 00:11:03,000

could be the Intel problem Intel

277

00:11:07,910 --> 00:11:05,240

surprise problem of the the China

278

00:11:10,190 --> 00:11:07,920

balloon if you will it could be uh you

279

00:11:12,110 --> 00:11:10,200

know foreign strategic reconnaissance or

280

00:11:13,350 --> 00:11:12,120

it could be unknown unknown or it could

281

00:11:15,550 --> 00:11:13,360

be technological

282

00:11:17,550 --> 00:11:15,560

surprise right so those are a range of

283

00:11:19,190 --> 00:11:17,560

problems that are all kind of uh

284

00:11:21,910 --> 00:11:19,200

different in how you would address them

285

00:11:23,509 --> 00:11:21,920

range safety and um airspace

286

00:11:25,509 --> 00:11:23,519

deconfliction is a joint all domain

287

00:11:29,069 --> 00:11:25,519

command control problem it's a real time

288

00:11:30,790 --> 00:11:29,079

safety issue the uh Intel surprise issue

289

00:11:32,829 --> 00:11:30,800

is a is a national security defense

290

00:11:35,310 --> 00:11:32,839

issue the technological surprise issue

291

00:11:36,430 --> 00:11:35,320

is an R&D issue so you've got this range

292

00:11:38,110 --> 00:11:36,440

and we're not even getting to the

293

00:11:41,190 --> 00:11:38,120

potential metaphysical Consciousness

294

00:11:43,150 --> 00:11:41,200

other other aspects of the problem so

295

00:11:45,430 --> 00:11:43,160

what the Schumer Amendment does is they

296

00:11:48,829 --> 00:11:45,440

they try to basically uh reverse the

297

00:11:50,990 --> 00:11:48,839

trend of expanding the scope of the term

298

00:11:54,710 --> 00:11:51,000

to narrow it down to a hardcore where

299

00:11:57,110 --> 00:11:54,720

progress can now be made in this next

300

00:11:59,190 --> 00:11:57,120

phase and then perhaps as we make

301
00:12:01,190 --> 00:11:59,200
further progress we can identify other

302
00:12:03,350 --> 00:12:01,200
avenues of approach that might actually

303
00:12:05,949 --> 00:12:03,360
then be more efficacious to expand the

304
00:12:07,710 --> 00:12:05,959
definition so let me read here what the

305
00:12:09,750 --> 00:12:07,720
actual legislation says so we know

306
00:12:13,710 --> 00:12:09,760
specifically what they intended with

307
00:12:15,710 --> 00:12:13,720
Schumer UAP is any object operating or

308
00:12:18,189 --> 00:12:15,720
judge capable of operating in outer

309
00:12:21,550 --> 00:12:18,199
space the atmosphere ocean surface or

310
00:12:24,110 --> 00:12:21,560
under sea lacking prosaic

311
00:12:26,829 --> 00:12:24,120
attribution due to Performance

312
00:12:29,150 --> 00:12:26,839
characteristics and properties not

313
00:12:31,230 --> 00:12:29,160

previously known to be achievable based

314

00:12:33,829 --> 00:12:31,240

upon commonly understood principles of

315

00:12:35,949 --> 00:12:33,839

physics and you can see the six

316

00:12:40,030 --> 00:12:35,959

observables there that have made so

317

00:12:41,629 --> 00:12:40,040

popular by L Alando so the term prosaic

318

00:12:44,310 --> 00:12:41,639

attribution is going to be defined here

319

00:12:46,310 --> 00:12:44,320

in a minute but what we're basically

320

00:12:48,870 --> 00:12:46,320

saying is this stuff is the unknown

321

00:12:50,110 --> 00:12:48,880

unknown category and that's what uh

322

00:12:52,230 --> 00:12:50,120

we're talking about when we're talking

323

00:12:54,350 --> 00:12:52,240

about disclosure so the other term of

324

00:12:55,790 --> 00:12:54,360

reference that's important to understand

325

00:12:59,269 --> 00:12:55,800

is uh

326

00:13:01,069 --> 00:12:59,279

tno temporarily non-attributed object

327

00:13:04,550 --> 00:13:01,079

and there's a huge distinction between

328

00:13:06,550 --> 00:13:04,560

these and Schumer makes this explicit so

329

00:13:09,829 --> 00:13:06,560

TN is a class of objects that

330

00:13:11,949 --> 00:13:09,839

temporarily resist prosaic attribution

331

00:13:14,870 --> 00:13:11,959

by the initial Observer due to

332

00:13:16,829 --> 00:13:14,880

Performance uh or due to environmental

333

00:13:19,350 --> 00:13:16,839

or system limitations associated with

334

00:13:22,990 --> 00:13:19,360

the observation process but that

335

00:13:25,550 --> 00:13:23,000

nevertheless have a known accepted human

336

00:13:27,590 --> 00:13:25,560

origin so TN is the stuff that you

337

00:13:29,829 --> 00:13:27,600

mistake at the time of observation but

338

00:13:31,509 --> 00:13:29,839

you later figure out like what it is so

339

00:13:32,949 --> 00:13:31,519

if you look at Blue Book you know

340

00:13:35,790 --> 00:13:32,959

depending on the statistics you want to

341

00:13:38,030 --> 00:13:35,800

use the the 94% or the 80% of what they

342

00:13:40,910 --> 00:13:38,040

spent their time on was TN was all

343

00:13:42,750 --> 00:13:40,920

explainable the res the residual 6% or

344

00:13:46,030 --> 00:13:42,760

20% depending on which statistics you're

345

00:13:49,389 --> 00:13:46,040

using that's the UAP so the legislation

346

00:13:52,470 --> 00:13:49,399

is focused on on UAP that's the main

347

00:13:54,189 --> 00:13:52,480

takeaway here all right so uh I've got a

348

00:13:55,990 --> 00:13:54,199

couple slides on the executive summary

349

00:13:58,269 --> 00:13:56,000

so what's the mechanics of this

350

00:14:00,870 --> 00:13:58,279

legislation so we already said that we

351
00:14:02,509 --> 00:14:00,880
want to caliz the records so where we

352
00:14:04,710 --> 00:14:02,519
centralize the records is the National

353
00:14:07,590 --> 00:14:04,720
Archives so the archist has got a role

354
00:14:09,509 --> 00:14:07,600
in this process but they're also owners

355
00:14:11,590 --> 00:14:09,519
of the of the records they're people

356
00:14:13,350 --> 00:14:11,600
that generated the records organizations

357
00:14:15,110 --> 00:14:13,360
in government and they're people that

358
00:14:16,990 --> 00:14:15,120
happen to have records that may they may

359
00:14:19,030 --> 00:14:17,000
not have generated so these are called

360
00:14:21,509 --> 00:14:19,040
government offices these government

361
00:14:24,470 --> 00:14:21,519
offices are obligated to identify and

362
00:14:25,829 --> 00:14:24,480
transmit these records to the archivist

363
00:14:29,230 --> 00:14:25,839

they've got to identify which records

364

00:14:31,590 --> 00:14:29,240

are UAP records based on uh how the

365

00:14:33,550 --> 00:14:31,600

legislation's written and they've got to

366

00:14:36,430 --> 00:14:33,560

transmit those to the archivist and the

367

00:14:39,470 --> 00:14:36,440

legislation gives them 300 days to do

368

00:14:41,829 --> 00:14:39,480

this so nobody necessarily trusts that

369

00:14:44,230 --> 00:14:41,839

that's going to happen and I think Tim

370

00:14:45,949 --> 00:14:44,240

uh Tim's talk I think outlined and

371

00:14:47,509 --> 00:14:45,959

highlighted perhaps the fact that the

372

00:14:49,310 --> 00:14:47,519

government isn't a monolith right you've

373

00:14:51,509 --> 00:14:49,320

got a lot of different opinions going on

374

00:14:54,269 --> 00:14:51,519

a lot of different organizational uh

375

00:14:57,949 --> 00:14:54,279

dialectic and Dynamics going on and a

376

00:14:59,509 --> 00:14:57,959

lot of different agendas and so as uh we

377

00:15:02,470 --> 00:14:59,519

said earlier there's got to be an

378

00:15:04,069 --> 00:15:02,480

enforceable accountable process so the

379

00:15:06,030 --> 00:15:04,079

the central tenant of the Schumer

380

00:15:07,150 --> 00:15:06,040

amendment is to create this UAP record

381

00:15:09,590 --> 00:15:07,160

review

382

00:15:11,389 --> 00:15:09,600

board and so this is very much analogous

383

00:15:14,030 --> 00:15:11,399

to what was done in the JFK

384

00:15:17,430 --> 00:15:14,040

assassination records Act of

385

00:15:20,550 --> 00:15:17,440

1992 where a an independent board was

386

00:15:22,990 --> 00:15:20,560

set up to review those records but this

387

00:15:25,310 --> 00:15:23,000

legislation differs from that in in

388

00:15:26,870 --> 00:15:25,320

several significant ways number one

389

00:15:29,470 --> 00:15:26,880

obviously the problems are different

390

00:15:31,590 --> 00:15:29,480

right so uh in that case was more of a

391

00:15:33,269 --> 00:15:31,600

retrospective and historical

392

00:15:36,150 --> 00:15:33,279

understanding and there's a finite set

393

00:15:37,910 --> 00:15:36,160

of Records our problem here it's an

394

00:15:40,430 --> 00:15:37,920

ongoing problem records are contining to

395

00:15:41,870 --> 00:15:40,440

be generated into the future and uh

396

00:15:44,710 --> 00:15:41,880

there's this obvious technological

397

00:15:47,590 --> 00:15:44,720

surprise concern there's a an immediacy

398

00:15:50,189 --> 00:15:47,600

to this so This records review board

399

00:15:51,790 --> 00:15:50,199

that's created is to consist of nine

400

00:15:53,990 --> 00:15:51,800

folks and we'll get into the composition

401
00:15:57,309 --> 00:15:54,000
of that uh but that board's going to

402
00:15:59,710 --> 00:15:57,319
have certain authorities to review what

403
00:16:01,710 --> 00:15:59,720
these offices submit so the going in

404
00:16:03,470 --> 00:16:01,720
position is if it's UAP records got to

405
00:16:05,150 --> 00:16:03,480
get disclosed if the office doesn't want

406
00:16:06,949 --> 00:16:05,160
it disclosed they got to make a case and

407
00:16:09,550 --> 00:16:06,959
why they don't want it disclosed that

408
00:16:12,069 --> 00:16:09,560
case comes to the board and the board uh

409
00:16:15,069 --> 00:16:12,079
adjudicates that and recommends to the

410
00:16:18,230 --> 00:16:15,079
president the oversight for this board

411
00:16:20,790 --> 00:16:18,240
is held in the Senate Homeland Security

412
00:16:23,350 --> 00:16:20,800
and government accountability committee

413
00:16:25,389 --> 00:16:23,360

and in the house uh oversight committee

414

00:16:28,069 --> 00:16:25,399

uh committee on oversight and government

415

00:16:32,030 --> 00:16:28,079

Affairs uh let's see what else okay so

416

00:16:35,069 --> 00:16:32,040

the the part of this is unlike JFK

417

00:16:36,790 --> 00:16:35,079

there's the issue of um materials and so

418

00:16:39,910 --> 00:16:36,800

there's a couple other terms of Art in

419

00:16:41,309 --> 00:16:39,920

here too and nhi people are somewhat

420

00:16:43,430 --> 00:16:41,319

familiar with those perhaps non-human

421

00:16:44,829 --> 00:16:43,440

intelligence so biological evidence of

422

00:16:47,350 --> 00:16:44,839

non-human intelligence that's been

423

00:16:50,829 --> 00:16:47,360

talked about in open hearings and

424

00:16:52,870 --> 00:16:50,839

Technology of Unknown Origin so the

425

00:16:55,030 --> 00:16:52,880

Schumer Amendment directs the federal

426

00:16:58,749 --> 00:16:55,040

government to exercise eminent

427

00:17:01,189 --> 00:16:58,759

domain over those and then this board is

428

00:17:03,790 --> 00:17:01,199

to adjudicate whether the stuff actually

429

00:17:05,829 --> 00:17:03,800

is too on nhi and whether it should be

430

00:17:07,750 --> 00:17:05,839

postponed or disclosed and we'll get

431

00:17:10,829 --> 00:17:07,760

into some of the ramifications of that

432

00:17:13,710 --> 00:17:10,839

in a minute so how's this board going to

433

00:17:16,309 --> 00:17:13,720

do this uh they're going to develop a

434

00:17:19,909 --> 00:17:16,319

plan and this is a big difference from

435

00:17:22,069 --> 00:17:19,919

the JFK legislation so this plan for all

436

00:17:24,990 --> 00:17:22,079

records that they deem need to be

437

00:17:27,870 --> 00:17:25,000

postponed for whatever reason has got to

438

00:17:30,630 --> 00:17:27,880

indicate a benchmark driven process with

439

00:17:33,150 --> 00:17:30,640

specified occurrences and time frames

440

00:17:35,270 --> 00:17:33,160

for downgrading uh review and

441

00:17:38,710 --> 00:17:35,280

declassification for everything that's

442

00:17:41,549 --> 00:17:38,720

postponed and then this plan

443

00:17:43,070 --> 00:17:41,559

supersedes all previous declassification

444

00:17:45,990 --> 00:17:43,080

guidance that may have been applicable

445

00:17:48,430 --> 00:17:46,000

to this material that's extremely

446

00:17:50,270 --> 00:17:48,440

important that's different than the JFK

447

00:17:52,710 --> 00:17:50,280

the JFK was basically like should we

448

00:17:54,149 --> 00:17:52,720

postpone or not okay and then it gets

449

00:17:56,590 --> 00:17:54,159

kicked down the road if they say

450

00:17:58,430 --> 00:17:56,600

postpone Schumer basically says if

451

00:18:00,830 --> 00:17:58,440

you're postponing you got to tell me

452

00:18:03,390 --> 00:18:00,840

exactly what you got to do to release it

453

00:18:06,909 --> 00:18:03,400

in a benchmark driven plan and then this

454

00:18:09,750 --> 00:18:06,919

plan uh basically becomes the

455

00:18:11,470 --> 00:18:09,760

declassification guidance going forward

456

00:18:13,270 --> 00:18:11,480

now the point is that the president

457

00:18:15,590 --> 00:18:13,280

ultimately has the sole non-delegable

458

00:18:17,029 --> 00:18:15,600

Authority so Congress can't impinge upon

459

00:18:19,110 --> 00:18:17,039

you know presidential executive

460

00:18:21,110 --> 00:18:19,120

Authority so the president makes the

461

00:18:24,230 --> 00:18:21,120

ultimate decision based on these

462

00:18:26,149 --> 00:18:24,240

recommendations but um once the

463

00:18:29,990 --> 00:18:26,159

recommendation made they're either

464

00:18:32,990 --> 00:18:30,000

immediately disclosed uh or um it's

465

00:18:34,510 --> 00:18:33,000

postponed as we said or put into uh and

466

00:18:38,029 --> 00:18:34,520

the decisions put into the Federal

467

00:18:40,430 --> 00:18:38,039

Register within 14 days so the president

468

00:18:42,710 --> 00:18:40,440

has to provide a reason to the board on

469

00:18:44,909 --> 00:18:42,720

what his decision is both classified and

470

00:18:48,510 --> 00:18:44,919

unclassified the unclassified reason

471

00:18:50,510 --> 00:18:48,520

gets published publicly within 14 days

472

00:18:53,750 --> 00:18:50,520

the other point here is that all the

473

00:18:57,310 --> 00:18:53,760

records are to be disclosed within 25

474

00:19:01,590 --> 00:18:59,230

creation

475

00:19:04,230 --> 00:19:01,600

unless the president deems

476
00:19:06,029 --> 00:19:04,240
otherwise and Congress has appropriated

477
00:19:08,070 --> 00:19:06,039
uh or authorized the appropriation of 20

478
00:19:09,350 --> 00:19:08,080
20 million to do this all right so I've

479
00:19:10,830 --> 00:19:09,360
got to kind of move a little faster here

480
00:19:13,029 --> 00:19:10,840
so these are terms of reference in the

481
00:19:15,830 --> 00:19:13,039
legislation so non-human intelligence at

482
00:19:17,630 --> 00:19:15,840
least 18 times cited in there any Senti

483
00:19:20,350 --> 00:19:17,640
intelligent non-human life form

484
00:19:22,750 --> 00:19:20,360
regardless of nature or ultimate origin

485
00:19:25,390 --> 00:19:22,760
that may be presumed responsible for UAP

486
00:19:27,230 --> 00:19:25,400
based on the earlier definition or of

487
00:19:29,190 --> 00:19:27,240
which the federal government has become

488
00:19:31,710 --> 00:19:29,200

aware

489

00:19:33,270 --> 00:19:31,720

Legacy program all federal state local

490

00:19:34,710 --> 00:19:33,280

government commercial industry academic

491

00:19:37,430 --> 00:19:34,720

private sector Endeavors to collect

492

00:19:40,270 --> 00:19:37,440

exploit verse engineer too or biological

493

00:19:42,029 --> 00:19:40,280

evidence of nhi prosaic attribution you

494

00:19:45,230 --> 00:19:42,039

remember this was in both of those terms

495

00:19:47,430 --> 00:19:45,240

UAP and tno prosaic attribution having a

496

00:19:52,350 --> 00:19:47,440

human either foreign or domestic

497

00:19:54,510 --> 00:19:52,360

origin so UAP is nonhuman tno human

498

00:19:56,310 --> 00:19:54,520

technology of Unknown Origin this is

499

00:19:59,310 --> 00:19:56,320

very important for the eminent domain

500

00:20:01,310 --> 00:19:59,320

Clause any material or material ejected

501
00:20:03,350 --> 00:20:01,320
crash debris mechanisms Machinery

502
00:20:05,190 --> 00:20:03,360
equipment assemblies or subassemblies

503
00:20:07,950 --> 00:20:05,200
engineering models or processes damage

504
00:20:09,870 --> 00:20:07,960
or intact Aerospace vehicles or damage

505
00:20:13,549 --> 00:20:09,880
or intact ocean surface or undersea

506
00:20:15,310 --> 00:20:13,559
craft associated with UAP or

507
00:20:18,070 --> 00:20:15,320
incorporating Science and Technology

508
00:20:19,789 --> 00:20:18,080
lacking prosaic attribution or known

509
00:20:21,710 --> 00:20:19,799
means of human

510
00:20:23,430 --> 00:20:21,720
manufacturing so that's what eminent

511
00:20:29,190 --> 00:20:23,440
domain applies

512
00:20:32,590 --> 00:20:29,200
to it's reasonably specific I would say

513
00:20:35,070 --> 00:20:32,600

so so this is the board so there are

514

00:20:37,590 --> 00:20:35,080

nine members of the board um seven of

515

00:20:39,070 --> 00:20:37,600

those positions are specified explicitly

516

00:20:40,350 --> 00:20:39,080

executive director National Security

517

00:20:42,230 --> 00:20:40,360

official Foreign Service official

518

00:20:44,149 --> 00:20:42,240

scientists economists professional

519

00:20:46,190 --> 00:20:44,159

historians sociologist how are these

520

00:20:47,710 --> 00:20:46,200

come up you know determined they were

521

00:20:50,830 --> 00:20:47,720

determined to align with the instruments

522

00:20:52,190 --> 00:20:50,840

of National Power so historically

523

00:20:54,149 --> 00:20:52,200

instruments of National Power are

524

00:20:56,029 --> 00:20:54,159

diplomatic military and economic there

525

00:20:58,149 --> 00:20:56,039

was a revision of that over time that

526
00:21:00,230 --> 00:20:58,159
added information into that they created

527
00:21:02,390 --> 00:21:00,240
had this concept called dime

528
00:21:04,190 --> 00:21:02,400
counterinsurgency coin came around and

529
00:21:05,710 --> 00:21:04,200
we realized okay there's external

530
00:21:07,230 --> 00:21:05,720
elements of power and there internal

531
00:21:09,270 --> 00:21:07,240
elements of power that sort of align

532
00:21:10,710 --> 00:21:09,280
with the nature of sovereignty so they

533
00:21:14,669 --> 00:21:10,720
expand the definition to come up with

534
00:21:16,750 --> 00:21:14,679
dime Phil which adds law enforcement and

535
00:21:18,230 --> 00:21:16,760
and intelligence and financial and

536
00:21:20,549 --> 00:21:18,240
there's also the political element so

537
00:21:22,669 --> 00:21:20,559
you've got eight elements of power plus

538
00:21:24,430 --> 00:21:22,679

an executive director and the premise

539

00:21:26,470 --> 00:21:24,440

for this is that disclosure is going to

540

00:21:28,350 --> 00:21:26,480

happen using the instruments of national

541

00:21:30,190 --> 00:21:28,360

power but disclosure also impact the

542

00:21:31,950 --> 00:21:30,200

instruments of National Power and so you

543

00:21:34,470 --> 00:21:31,960

need practitioners of the instruments of

544

00:21:36,590 --> 00:21:34,480

National Power for the president to have

545

00:21:39,510 --> 00:21:36,600

confidence in the recommendations he or

546

00:21:41,669 --> 00:21:39,520

she is getting from this panel such that

547

00:21:43,669 --> 00:21:41,679

uh when he implements that decision it's

548

00:21:45,149 --> 00:21:43,679

going to have a ramification that's

549

00:21:47,750 --> 00:21:45,159

that's understandable by people that are

550

00:21:49,190 --> 00:21:47,760

experienced in the field so impartial

551
00:21:51,310 --> 00:21:49,200
citizens are to be appointed to the

552
00:21:53,630 --> 00:21:51,320
panel that aren't affiliated with any

553
00:21:56,510 --> 00:21:53,640
Legacy program we we Define what Legacy

554
00:21:59,029 --> 00:21:56,520
program was earlier that's a major

555
00:22:01,750 --> 00:21:59,039
exclusion they are going to be of high

556
00:22:03,510 --> 00:22:01,760
National reputation so unlike the JFK

557
00:22:05,149 --> 00:22:03,520
we're talking about cabinet level

558
00:22:07,190 --> 00:22:05,159
deputies we're talking about Noble

559
00:22:09,990 --> 00:22:07,200
laurates we're talking about people of

560
00:22:15,029 --> 00:22:10,000
the caliber of a ABY lobe or Gary Nolan

561
00:22:17,669 --> 00:22:15,039
maybe so and that's that's uh uh uh you

562
00:22:19,669 --> 00:22:17,679
know unsolicited but frankly we're

563
00:22:21,710 --> 00:22:19,679

talking about that caliber of

564

00:22:24,070 --> 00:22:21,720

person and these people are going to be

565

00:22:26,710 --> 00:22:24,080

granted security clearances appropriate

566

00:22:29,110 --> 00:22:26,720

for the task through expedited means so

567

00:22:30,230 --> 00:22:29,120

it's very important all right presence

568

00:22:31,990 --> 00:22:30,240

of work I'm not going to dwell on this

569

00:22:33,510 --> 00:22:32,000

too long this is different than the JFK

570

00:22:36,310 --> 00:22:33,520

but basically we're saying anything

571

00:22:38,630 --> 00:22:36,320

that's not already already public is a

572

00:22:40,990 --> 00:22:38,640

high priority the number one priority

573

00:22:43,430 --> 00:22:41,000

anything that most unambiguously relates

574

00:22:46,149 --> 00:22:43,440

to the topic right unambiguously most

575

00:22:48,630 --> 00:22:46,159

unambiguously non-human anything subject

576

00:22:50,710 --> 00:22:48,640

to litigation anything of the earliest

577

00:22:52,710 --> 00:22:50,720

Providence so that's the Precedence of

578

00:22:55,789 --> 00:22:52,720

work stuff we don't know already and

579

00:23:00,390 --> 00:22:58,789

nonhuman uh eminent domain uh so maybe

580

00:23:02,149 --> 00:23:00,400

we'll have some discussion after this I

581

00:23:04,510 --> 00:23:02,159

want to kind of keep going through here

582

00:23:06,149 --> 00:23:04,520

but there are legal pros and cons uh

583

00:23:07,350 --> 00:23:06,159

obviously uh if you got an inversion

584

00:23:10,149 --> 00:23:07,360

imminent domain you probably add an

585

00:23:12,149 --> 00:23:10,159

aversion to this part of the statute but

586

00:23:14,990 --> 00:23:12,159

the point here is the government wants

587

00:23:17,070 --> 00:23:15,000

to uh restore oversight and control of

588

00:23:20,789 --> 00:23:17,080

the material so it can make better

589

00:23:22,590 --> 00:23:20,799

progress scientifically on this and so

590

00:23:24,230 --> 00:23:22,600

the challenge is you know does that

591

00:23:25,950 --> 00:23:24,240

affect intellectual property rights and

592

00:23:28,789 --> 00:23:25,960

the way the legislation written is it

593

00:23:32,190 --> 00:23:28,799

does not because any uh created out of

594

00:23:35,029 --> 00:23:32,200

the material uh is retained by the

595

00:23:37,070 --> 00:23:35,039

owner all right uh terms of reference

596

00:23:38,390 --> 00:23:37,080

disclosure so the the point here is

597

00:23:40,430 --> 00:23:38,400

there's a difference between control

598

00:23:42,350 --> 00:23:40,440

disclosure and catastrophic disclosure

599

00:23:44,669 --> 00:23:42,360

control disclosure is using the campaign

600

00:23:47,110 --> 00:23:44,679

plan catastrophic disclosure I think was

601
00:23:49,110 --> 00:23:47,120
which was alluded to in the in the prior

602
00:23:51,630 --> 00:23:49,120
discussion where all the information is

603
00:23:53,830 --> 00:23:51,640
just dumped out there by an adversary or

604
00:23:55,149 --> 00:23:53,840
uh non-human intelligence to create

605
00:23:57,590 --> 00:23:55,159
societal

606
00:23:59,630 --> 00:23:57,600
disruption all right so this is an

607
00:24:01,789 --> 00:23:59,640
important important slide because if we

608
00:24:04,590 --> 00:24:01,799
want uh to facilitate this board doing

609
00:24:06,870 --> 00:24:04,600
its work then uh the barriers that

610
00:24:08,590 --> 00:24:06,880
impede that need to be lower and so you

611
00:24:10,390 --> 00:24:08,600
need to understand what the impediments

612
00:24:12,669 --> 00:24:10,400
are to disclosure and so there's six

613
00:24:15,230 --> 00:24:12,679

reasons for non-disclosure National

614

00:24:18,029 --> 00:24:15,240

Security lack of a plan societal

615

00:24:19,669 --> 00:24:18,039

disruption covert agreement covert cover

616

00:24:21,470 --> 00:24:19,679

for misdeeds and organizational

617

00:24:23,669 --> 00:24:21,480

intransigence and you could just derive

618

00:24:25,070 --> 00:24:23,679

this from first principles and so a lot

619

00:24:27,029 --> 00:24:25,080

of this has been talked about already

620

00:24:29,990 --> 00:24:27,039

but let's look at societal disruption

621

00:24:32,870 --> 00:24:30,000

challenge to exist Authority structures

622

00:24:34,590 --> 00:24:32,880

ontological shock market crash false

623

00:24:36,870 --> 00:24:34,600

Authority syndrome stagnation of

624

00:24:38,510 --> 00:24:36,880

initiative all of these are issues that

625

00:24:40,590 --> 00:24:38,520

are preventing disclosure they're going

626
00:24:44,149 --> 00:24:40,600
to they're going to impact the plan that

627
00:24:45,669 --> 00:24:44,159
the board develops if you actually shred

628
00:24:48,230 --> 00:24:45,679
through these issues you realize these

629
00:24:50,630 --> 00:24:48,240
are really not government issues these

630
00:24:52,269 --> 00:24:50,640
issues are are more effectively solved

631
00:24:56,470 --> 00:24:52,279
in the private sector in then academic

632
00:24:58,789 --> 00:24:56,480
sector in uh in uh legal uh reviews and

633
00:25:01,909 --> 00:24:58,799
policy discussions in the Natural

634
00:25:04,350 --> 00:25:01,919
Sciences so this tees up the opportunity

635
00:25:06,070 --> 00:25:04,360
for Saul foundation and the members here

636
00:25:08,430 --> 00:25:06,080
to contribute to the solution of this

637
00:25:10,990 --> 00:25:08,440
plan because there's a linkage

638
00:25:12,549 --> 00:25:11,000

here so there's needs to be a campaign

639

00:25:14,269 --> 00:25:12,559

plan to synchronize all this I would

640

00:25:16,310 --> 00:25:14,279

argue you know DOD is big into plan so a

641

00:25:19,750 --> 00:25:16,320

campaign plan is like a plan about a

642

00:25:21,350 --> 00:25:19,760

plan it's a meta plan right so that

643

00:25:23,230 --> 00:25:21,360

means you like cost schedule performance

644

00:25:24,310 --> 00:25:23,240

is really not part of your campaign plan

645

00:25:25,750 --> 00:25:24,320

it's just sort of like this is the

646

00:25:28,029 --> 00:25:25,760

direction we want to go these are the

647

00:25:29,630 --> 00:25:28,039

ends ways and means that we want to use

648

00:25:31,789 --> 00:25:29,640

and this is like the kind of shared

649

00:25:34,029 --> 00:25:31,799

consensus of what we're trying to do and

650

00:25:35,909 --> 00:25:34,039

the shared consensus I would submit is

651
00:25:38,149 --> 00:25:35,919
we want proper oversight because we've

652
00:25:39,710 --> 00:25:38,159
got a government that's run by elected

653
00:25:41,510 --> 00:25:39,720
officials and ultimately they're

654
00:25:42,789 --> 00:25:41,520
accountable to the public and they've

655
00:25:44,350 --> 00:25:42,799
already recognized that they don't have

656
00:25:46,149 --> 00:25:44,360
the appropriate oversight so we want to

657
00:25:47,510 --> 00:25:46,159
get oversight and we want to get

658
00:25:50,590 --> 00:25:47,520
disclosure but we want to get it through

659
00:25:51,950 --> 00:25:50,600
a controlled process we want to get it

660
00:25:53,750 --> 00:25:51,960
in a way that doesn't create the

661
00:25:56,710 --> 00:25:53,760
societal collapse like Eric Klein talked

662
00:25:59,110 --> 00:25:56,720
about in 1177 BC the the system collapse

663
00:26:01,230 --> 00:25:59,120

of all the ancient societies this is the

664

00:26:02,909 --> 00:26:01,240

order of the potential concern that

665

00:26:04,750 --> 00:26:02,919

might be happening here and then the

666

00:26:06,029 --> 00:26:04,760

third piece is what do we want to do

667

00:26:07,430 --> 00:26:06,039

about this problem well we've got to

668

00:26:10,590 --> 00:26:07,440

actually address the scientific

669

00:26:12,590 --> 00:26:10,600

technical ethical uh legal religious

670

00:26:14,590 --> 00:26:12,600

aspects of this and more people need to

671

00:26:19,110 --> 00:26:14,600

be involved if we're going to make that

672

00:26:22,070 --> 00:26:19,120

progress so this is the obligatory DOD

673

00:26:25,669 --> 00:26:22,080

type of campaign plan

674

00:26:27,310 --> 00:26:25,679

chart so you know we've had phase one we

675

00:26:28,310 --> 00:26:27,320

we've completed phase one I would argue

676
00:26:33,630 --> 00:26:28,320
phase

677
00:26:35,669 --> 00:26:33,640
so it says you know demonstrate UAP

678
00:26:37,029 --> 00:26:35,679
existence by you know January of 24 and

679
00:26:37,870 --> 00:26:37,039
you're like well that's crazy it's never

680
00:26:40,070 --> 00:26:37,880
going to happen it's probably won't

681
00:26:42,590 --> 00:26:40,080
happen my lifetime I'm saying that that

682
00:26:45,510 --> 00:26:42,600
already happened the the gang of eight

683
00:26:48,230 --> 00:26:45,520
just said that we need this legislation

684
00:26:49,990 --> 00:26:48,240
and they don't have proper oversight so

685
00:26:51,350 --> 00:26:50,000
disclosure is a process it's not an

686
00:26:54,029 --> 00:26:51,360
event and it's going to stair step

687
00:26:56,430 --> 00:26:54,039
across these phases so phase two is

688
00:26:58,470 --> 00:26:56,440

where Academia I think comes in and and

689

00:27:01,830 --> 00:26:58,480

then ultimately get to the The Wider

690

00:27:04,750 --> 00:27:01,840

public and and so we see like October

691

00:27:08,350 --> 00:27:04,760

2030 is maybe the you know the pivot

692

00:27:10,669 --> 00:27:08,360

point when uh this board sunsets seven

693

00:27:12,470 --> 00:27:10,679

years for the board to do its job but in

694

00:27:15,269 --> 00:27:12,480

order to facilitate the board doing its

695

00:27:17,070 --> 00:27:15,279

job this Philosophical Investigation

696

00:27:18,990 --> 00:27:17,080

line of effort B scientific

697

00:27:21,230 --> 00:27:19,000

investigation line of effort C and

698

00:27:24,029 --> 00:27:21,240

private sector investigation line of

699

00:27:25,710 --> 00:27:24,039

effort D is where we can all contribute

700

00:27:27,950 --> 00:27:25,720

to facilitating and lowering that

701

00:27:29,870 --> 00:27:27,960

potential barrier and uh so I've got

702

00:27:32,389 --> 00:27:29,880

maybe a minute or two I'm going to just

703

00:27:33,990 --> 00:27:32,399

jump through a couple ideas that I've

704

00:27:36,669 --> 00:27:34,000

got for each of these lines of effort if

705

00:27:38,350 --> 00:27:36,679

we might do that so these this is the

706

00:27:40,669 --> 00:27:38,360

government line of effort P Schumer

707

00:27:42,389 --> 00:27:40,679

Grant legal amnesty centralize the data

708

00:27:44,630 --> 00:27:42,399

create a Manhattan Project to address

709

00:27:47,190 --> 00:27:44,640

this area sponsor National Science

710

00:27:49,350 --> 00:27:47,200

Foundation grants Charter and ni

711

00:27:50,909 --> 00:27:49,360

National Intel estimate to assess the

712

00:27:52,750 --> 00:27:50,919

public private positions of every

713

00:27:55,789 --> 00:27:52,760

country with this topic and where they

714

00:27:57,470 --> 00:27:55,799

are with it and use that to tee up a

715

00:28:00,549 --> 00:27:57,480

United Nations Summit or World Congress

716

00:28:03,149 --> 00:28:00,559

Congress on developing uh new Norms of

717

00:28:05,070 --> 00:28:03,159

behavior in this context right so that

718

00:28:07,230 --> 00:28:05,080

would be line of effort a what about

719

00:28:09,430 --> 00:28:07,240

line of effort B the humanities I think

720

00:28:11,029 --> 00:28:09,440

we need a sociological model for

721

00:28:12,669 --> 00:28:11,039

analyzing the societal impact for

722

00:28:15,430 --> 00:28:12,679

disclosure and then developing

723

00:28:17,190 --> 00:28:15,440

mitigation strategies a priori to

724

00:28:18,710 --> 00:28:17,200

address that now some people think that

725

00:28:20,310 --> 00:28:18,720

may be less of a concern or more of a

726

00:28:22,350 --> 00:28:20,320

concern it's kind of irrelevant like

727

00:28:24,549 --> 00:28:22,360

it's an unknown right now when we need a

728

00:28:27,269 --> 00:28:24,559

plan to address it to lower that that

729

00:28:28,909 --> 00:28:27,279

that concern codify the laws of Ethics

730

00:28:31,350 --> 00:28:28,919

uh in an environment where we might have

731

00:28:33,110 --> 00:28:31,360

a hierarchy of being where everyone

732

00:28:35,350 --> 00:28:33,120

isn't necessarily having equal

733

00:28:37,350 --> 00:28:35,360

competitive potential how do you is

734

00:28:39,549 --> 00:28:37,360

essentially translating our special

735

00:28:41,590 --> 00:28:39,559

relativity version of Ethics to a

736

00:28:44,350 --> 00:28:41,600

general relativity version of Ethics

737

00:28:46,950 --> 00:28:44,360

where you've got um the problem of a

738

00:28:48,310 --> 00:28:46,960

more advanced civilization coming in and

739

00:28:50,830 --> 00:28:48,320

um disrupting a less Advanced

740

00:28:53,909 --> 00:28:50,840

civilization it's the same issue with AI

741

00:28:55,750 --> 00:28:53,919

or colonialism or non-human

742

00:28:57,909 --> 00:28:55,760

intelligence all right I don't have much

743

00:28:59,909 --> 00:28:57,919

time here so we'll just go quick

744

00:29:02,630 --> 00:28:59,919

Natural Sciences this was talked about

745

00:29:04,350 --> 00:29:02,640

extensively we need one of the immediate

746

00:29:06,190 --> 00:29:04,360

areas that we can make progress is the

747

00:29:08,990 --> 00:29:06,200

material science Arena Gary talked about

748

00:29:10,870 --> 00:29:09,000

it he recommended this area and and it's

749

00:29:13,110 --> 00:29:10,880

definitely the case developing

750

00:29:15,190 --> 00:29:13,120

theoretical as well as practical methods

751
00:29:16,509 --> 00:29:15,200
to analyze metam materials and let's get

752
00:29:19,269 --> 00:29:16,519
to the point where we can actually talk

753
00:29:21,630 --> 00:29:19,279
about utilizing the what is it 339

754
00:29:24,350 --> 00:29:21,640
Isotopes and Engineering materials out

755
00:29:26,149 --> 00:29:24,360
of that instead of the uh 118 elements

756
00:29:28,710 --> 00:29:26,159
that were been sort of limited

757
00:29:31,630 --> 00:29:28,720
to uh let's

758
00:29:34,389 --> 00:29:31,640
see the other part here that might be

759
00:29:35,750 --> 00:29:34,399
relevant is why don't we actually get a

760
00:29:37,230 --> 00:29:35,760
canonical data set I think Whitley

761
00:29:40,389 --> 00:29:37,240
actually asked this question like what's

762
00:29:44,029 --> 00:29:40,399
it take to make this data respectable to

763
00:29:47,190 --> 00:29:44,039

science and use this data set of cases

764

00:29:50,350 --> 00:29:47,200

and develop the canonical temporal

765

00:29:52,909 --> 00:29:50,360

geospatial and um ontological range of

766

00:29:54,909 --> 00:29:52,919

distributions on what we're seeing here

767

00:29:57,470 --> 00:29:54,919

and then do that in a way that actually

768

00:29:59,190 --> 00:29:57,480

is citable scientifically in papers so

769

00:30:00,830 --> 00:29:59,200

that we can build on work that's

770

00:30:03,750 --> 00:30:00,840

previously been done there's huge amount

771

00:30:06,029 --> 00:30:03,760

of work that jacqu and others have done

772

00:30:09,590 --> 00:30:06,039

uh but it doesn't seem to be cited in

773

00:30:12,549 --> 00:30:09,600

the literature and perhaps because that

774

00:30:14,669 --> 00:30:12,559

we haven't constructed um the uh the

775

00:30:17,549 --> 00:30:14,679

data set sufficient for it to be

776

00:30:18,870 --> 00:30:17,559

amendable for citation so and then we

777

00:30:21,070 --> 00:30:18,880

got to develop typic in queing

778

00:30:23,190 --> 00:30:21,080

methodologies for that and then uh the

779

00:30:24,990 --> 00:30:23,200

private sector we need to wargame the

780

00:30:26,830 --> 00:30:25,000

business utility of forming consortiums

781

00:30:27,789 --> 00:30:26,840

to actually uh look at this material if

782

00:30:30,350 --> 00:30:27,799

the government was actually going to

783

00:30:33,029 --> 00:30:30,360

make it available codify precence and

784

00:30:34,870 --> 00:30:33,039

legal standards for determining uh

785

00:30:37,509 --> 00:30:34,880

intellectual property rights over the

786

00:30:40,230 --> 00:30:37,519

material analyzing uh economic

787

00:30:42,070 --> 00:30:40,240

incentives and uh the impact to the

788

00:30:45,269 --> 00:30:42,080

economy if new energy sources were

789

00:30:47,830 --> 00:30:45,279

developed and uh advocating as as Gary

790

00:30:50,269 --> 00:30:47,840

has just talked about uh uh

791

00:30:52,789 --> 00:30:50,279

collaboration amongst these nonprofit

792

00:30:54,950 --> 00:30:52,799

and and private sector and so just in

793

00:30:56,789 --> 00:30:54,960

summary I'd like to say you disclosure

794

00:30:58,950 --> 00:30:56,799

is not a process but the way to make

795

00:31:00,669 --> 00:30:58,960

progress is probably the way Diana

796

00:31:03,149 --> 00:31:00,679

outlined which is this collaborative

797

00:31:04,909 --> 00:31:03,159

emergent uh interaction that creates

798

00:31:06,350 --> 00:31:04,919

more than the sum of the individual

799

00:31:08,950 --> 00:31:06,360

Parts which I think is what actually

800

00:31:10,590 --> 00:31:08,960

created and allowed Schumer to happen

801
00:31:12,509 --> 00:31:10,600
it's a government first problem in the

802
00:31:14,669 --> 00:31:12,519
sense that the government has more and

803
00:31:15,750 --> 00:31:14,679
better information than everybody else

804
00:31:18,269 --> 00:31:15,760
but that doesn't mean that everybody

805
00:31:20,470 --> 00:31:18,279
else has got to sit on the sidelines uh

806
00:31:21,909 --> 00:31:20,480
the impediments to disclosure really

807
00:31:24,430 --> 00:31:21,919
things that can be solved in the private

808
00:31:26,070 --> 00:31:24,440
sector and it's a whole society problem

809
00:31:28,470 --> 00:31:26,080
and I think it involves the humanities

810
00:31:30,190 --> 00:31:28,480
the Natural Sciences and and everything

811
00:31:32,870 --> 00:31:30,200
that the foundation appears to be

812
00:31:34,350 --> 00:31:32,880
focusing on so uh hopefully I didn't run

813
00:31:36,990 --> 00:31:34,360

over too long I appreciate the

814

00:31:38,990 --> 00:31:37,000

opportunity to chat and welcome any
