

SOMEWHERE IN THE LIVESTREAM

FEATURING

VINNIE ADAMS

1
00:01:54,110 --> 00:01:55,110
foreign [Music]

2
00:02:00,110 --> 00:01:56,110
[Music]

3
00:02:00,110 --> 00:02:01,850
we did find some other things one of them
the most unusual was a wire that was warped

4
00:02:01,850 --> 00:02:13,230
curled and was made of uh manganese and the
uh Platinum which in a combination that is

5
00:02:13,230 --> 00:02:20,220
very rare for any commercial products on Earth
so that's very intriguing and if we find more

6
00:02:20,220 --> 00:02:27,060
of these wires and we don't find them that's
very important we don't find them in a control

7
00:02:27,060 --> 00:02:46,030
region then it could be a techno signature

8
00:02:46,030 --> 00:03:12,819
[Music] [Applause] [Music] [Applause]

9
00:03:26,220 --> 00:03:19,520
[Music]

10
00:03:26,220 --> 00:03:32,920
foreign

11
00:03:32,920 --> 00:03:38,970
what is up guys welcome to somewhere in the
live stream here at somewhere in the skies

12

00:03:38,970 --> 00:03:45,400

I am your host Ryan Sprague and Happy Father's Day first and foremost to all our dads out

13

00:03:45,400 --> 00:03:52,580

there I see my dad in the chat there so a special shout out to him wishing him and all

14

00:03:52,580 --> 00:03:59,300

the dads out there a very Happy Father's Day today including our guest co-host for tonight

15

00:03:59,300 --> 00:04:04,610

so let's not waste any more time let's bring him in we have so much to cover so much UFO

16

00:04:04,610 --> 00:04:11,270

and space news podcast highlights of the week it has been an insane few months here in the

17

00:04:11,270 --> 00:04:18,060

UFO world so we're gonna break all of it down with the one the only Vinnie Adams what is

18

00:04:18,060 --> 00:04:22,740

up brother what is up Ryan thank you so much for having me man yeah I'm really excited

19

00:04:22,740 --> 00:04:27,850

for this conversation we're going to cover all the news so yeah thank you man of course

20

00:04:27,850 --> 00:04:33,080

of course I knew it's been a while since we had you on actually the last time I had you

21

00:04:33,080 --> 00:04:38,740

on was literally the night all the objects started getting shot down around the uh North

22

00:04:38,740 --> 00:04:46,610

America so that was that was crazy and now
look at where we are less than like two and

23

00:04:46,610 --> 00:04:53,850

a half months later and now we have whistleblowers
coming forward it's just I I want to get your

24

00:04:53,850 --> 00:04:59,760

opinion on all of it and all of it all of
it all of it um but before we do that um I

25

00:04:59,760 --> 00:05:04,040

do want to say hello to everyone in the chat
thank you for joining us everyone's super

26

00:05:04,040 --> 00:05:10,020

excited you're here man um we have uh super
Chatters open guys if you want to help out

27

00:05:10,020 --> 00:05:15,360

the show great way to help out we'll put your
comments up your questions all that um thank

28

00:05:15,360 --> 00:05:20,830

you to all our patreon subscribers YouTube
members uh Apple premium subscribers all of

29

00:05:20,830 --> 00:05:25,420

that goes back into making someone disguise
bigger and better for you guys so um there's

30

00:05:25,420 --> 00:05:29,990

the Shameless plugs done for the night Vinnie
I promise I won't beg for any of the money

31

00:05:29,990 --> 00:05:33,910

from our audience um that's not what we're
about here we're about bringing you guys the

32

00:05:33,910 --> 00:05:40,880

latest UFO news um and space news so I mean
let's just let's start with that man we've

33

00:05:40,880 --> 00:05:47,410

got this amazing story and while we're while
I'm bringing up the story I forgot to upload

34

00:05:47,410 --> 00:05:52,550

my slideshow for tonight my famous slideshows
here at somewhere in the sky so what I'm gonna

35

00:05:52,550 --> 00:05:58,110

do is read a little bit of the story and um
get your thoughts on that and do a little

36

00:05:58,110 --> 00:06:02,710

backstage stuff with getting that going um
but this is our first story we're going to

37

00:06:02,710 --> 00:06:09,229

cover tonight this comes from the debrief
and um this is really exciting phosphates

38

00:06:09,229 --> 00:06:16,350

found in ocean of Saturn's and solidus moon
dramatically increasing the chances for life

39

00:06:16,350 --> 00:06:20,699

so I'm going to run through this as quick
as I can an analysis of the massive plume

40

00:06:20,699 --> 00:06:26,190

of seawater erupting into space from Saturn's
moon and silatus has revealed the presence

41

00:06:26,190 --> 00:06:33,090

of organic phosphates in the enormous subsurface
ocean residing beneath the moon's icy exterior

42

00:06:33,090 --> 00:06:38,699

along with previous findings of other organic compounds key to life on Earth this latest

43

00:06:38,699 --> 00:06:46,479

Discovery means that all six elements considered crucial for Life as we know it has been found

44

00:06:46,479 --> 00:06:54,039

in Enceladus's subsurface ocean it confirmed this finding dramatically increase it if confirmed

45

00:06:54,039 --> 00:06:59,479

excuse me this finding dramatically increases the chances that life including complex

46

00:06:59,479 --> 00:07:06,139

forms of life may be residing within our cosmic background and to make this determination

47

00:07:06,139 --> 00:07:11,620

the research team used data collected from Cassini's cosmic dust analyzer instrument

48

00:07:11,620 --> 00:07:17,610

that data was gathered by Cassini back in 2017 right before it plunged to its death

49

00:07:17,610 --> 00:07:25,090

in the atmosphere of Saturn so it went out with a bang man it got possibly the um the

50

00:07:25,090 --> 00:07:31,360

best data it could have to possibly prove that there could be some sort of Life on this

51

00:07:31,360 --> 00:07:37,100

Moon um to kind of wrap up here while further analysis is likely needed to confirm the finding

52

00:07:37,100 --> 00:07:42,889
of phosphates and the previous finding of
sulfur such confirmation would likely mean

53
00:07:42,889 --> 00:07:48,270
that it is time to send a probe to insulate
us to search for signs of extraterrestrial

54
00:07:48,270 --> 00:07:56,340
life I don't I can't think of a better way
to start the show Man story so what did you

55
00:07:56,340 --> 00:08:00,220
make of this when you first heard about it
do you know what I think it's really exciting

56
00:08:00,220 --> 00:08:04,090
when we hear about stuff that's going on in
the the kind of space side of things you know

57
00:08:04,090 --> 00:08:09,259
and the Cassini probe when it died in 2017
you know anytime you hear that these probes

58
00:08:09,259 --> 00:08:13,819
that are out in space they disappear they
stop working it's always kind of a sad thing

59
00:08:13,819 --> 00:08:19,190
but then the fact is that this data is still
kind of being analyzed and you know people

60
00:08:19,190 --> 00:08:24,550
are working hard with it and then with this
this particular case when we're looking at

61
00:08:24,550 --> 00:08:30,320
Enceladus we're looking for six elements and
there was five elements that were were kind

62

00:08:30,320 --> 00:08:35,589

of captured we knew they were there and we were always looking for this sixth phosphorus

63

00:08:35,589 --> 00:08:43,349

kind of element and now we have this confirmation of the that it exists and not only that it

64

00:08:43,349 --> 00:08:49,270

exists but it could be as much as a hundred times more than it is found on Earth and because

65

00:08:49,270 --> 00:08:53,840

it's a big plume that's been shown into space that was captured and so the fact that scientists

66

00:08:53,840 --> 00:08:57,890

are still working on it and still able to kind of progress the information gathered

67

00:08:57,890 --> 00:09:04,710

from the data I find just super exciting you're right and again this just is such an advocate

68

00:09:04,710 --> 00:09:11,149

to send something there you know I mean why not we we've sent things to Mars we've sent

69

00:09:11,149 --> 00:09:17,220

things uh we are going to be sending things to our moon um but it seems to me that this

70

00:09:17,220 --> 00:09:21,810

is Target number one at this point if we're gonna try to find complex life like you said

71

00:09:21,810 --> 00:09:28,459

a hundred times more yeah like that's that's I don't see how there cannot be some sort

72

00:09:28,459 --> 00:09:34,200
of life there I mean it's it's exciting to
think of Mike's microbiology life and small things

73
00:09:34,200 --> 00:09:38,580
but you know when we're talking about complex
life there is that big possibility now that

74
00:09:38,580 --> 00:09:44,160
enceladas could you know pertain to life as
far as fish or cephalopods and things like

75
00:09:44,160 --> 00:09:49,520
that you know we're talking about proper complex
creatures that are like you know we have on

76
00:09:49,520 --> 00:09:57,130
Earth and that is where the excitement for
me personally really kicks in so I'm thinking

77
00:09:57,130 --> 00:10:07,830
what happened is somehow a piece of this Moon
broke off and an octopus from Enceladus hitched

78
00:10:07,830 --> 00:10:13,970
a ride and came to Earth that's the only explanation
for octopus living on Earth I mean the most

79
00:10:13,970 --> 00:10:20,490
alien thing we have right I mean that it's
it makes perfect sense those theories have

80
00:10:20,490 --> 00:10:26,269
been flying around for so long that octopi
are the this this super strange entity that

81
00:10:26,269 --> 00:10:30,700
shouldn't be here they don't kind of fit in
right with everything else on this planet

82

00:10:30,700 --> 00:10:36,690
whether it be marine life or even life on
land and they're just this super high intelligence

83
00:10:36,690 --> 00:10:42,330
creature that kind of fit into that category
of genuine almost like aliens you know so

84
00:10:42,330 --> 00:10:46,820
right yeah I love that I love it it's almost
romantic that they kind of could come from

85
00:10:46,820 --> 00:10:53,990
outside of our planet I know man well and
I mean what's interesting about this is that

86
00:10:53,990 --> 00:10:59,820
you and I someone you know we live breathe
in sleep UFOs that we can have these two kind

87
00:10:59,820 --> 00:11:06,451
of Divergent conversations yeah possible biological
life on another planet while a lot of our

88
00:11:06,451 --> 00:11:13,500
other conversations we talk about life already
visiting intelligent life having already visited

89
00:11:13,500 --> 00:11:18,310
our planet but hey man this is where the true
conversation lays somewhere in the middle

90
00:11:18,310 --> 00:11:24,709
where these two things can kind of converge
and I I can't think of a better way to kind

91
00:11:24,709 --> 00:11:32,709
of transition to our next story and that's
um NASA NASA is now getting in the game of

92

00:11:32,709 --> 00:11:40,750

finally looking into UFOs and you know we saw the the NASA panel that took place recently

93

00:11:40,750 --> 00:11:46,540

um so I guess let's start there I haven't really spoken to you since that NASA panel

94

00:11:46,540 --> 00:11:51,390

uh stream what were your initial thoughts in watching that and what did you take away

95

00:11:51,390 --> 00:11:57,769

from the NASA panel I mean I'll take a step back because we knew that last year that NASA

96

00:11:57,769 --> 00:12:04,700

was putting together this 16 person panel to kind of look at the potentials of putting

97

00:12:04,700 --> 00:12:11,820

together a panel to do a a UAP research program or a UAP research study let's say so it wasn't

98

00:12:11,820 --> 00:12:17,000

put together to do this to do the study straight away this is why the hundred thousand dollars

99

00:12:17,000 --> 00:12:21,709

was like frowned upon and like that's not enough to do a study but it was really to

100

00:12:21,709 --> 00:12:26,890

kind of Garner an idea of how it would go forward to to do that and you know there's

101

00:12:26,890 --> 00:12:32,660

never been a lot of trust in the UFO Community when it comes to NASA it's automatically NASA

102

00:12:32,660 --> 00:12:37,020

have been portrayed as the the never a straight answer they're part of the cover-up and all

103

00:12:37,020 --> 00:12:40,500

that thing but I think it's the same as when we look at the government we have to break

104

00:12:40,500 --> 00:12:45,870

it down into these small components that the people in NASA now as far as this panel goes

105

00:12:45,870 --> 00:12:50,459

they're not the kind of people that would be read into the history anyway so it's good

106

00:12:50,459 --> 00:12:56,870

to see that we have a new some new eyes looking at this and especially from a scientific perspective

107

00:12:56,870 --> 00:13:00,940

that's what we've been crying out for a long time for for Science and Academia to get on

108

00:13:00,940 --> 00:13:05,560

board with this subject so you know it was good to to see the panel happen it was even

109

00:13:05,560 --> 00:13:11,220

better to see that it happened on a public platform the fact that we were able to see

110

00:13:11,220 --> 00:13:15,980

for four hours or whatever it was you know to listen to these people and it may not be

111

00:13:15,980 --> 00:13:19,490

the answers that we want where they're talking about alien life and all this but it's all

112

00:13:19,490 --> 00:13:24,220

these potentials and possibilities that I find quite exciting the fact that they're

113

00:13:24,220 --> 00:13:28,700

willing to entertain these things and not just brush them off and some of the panel

114

00:13:28,700 --> 00:13:34,880

members are probably more possibly accepting of theories than others and that's great but

115

00:13:34,880 --> 00:13:38,620

it's a beginning it's a real beginning to show that the public conversation is willing

116

00:13:38,620 --> 00:13:45,389

to be had by such a big entity such as NASA exactly and you mentioned kind of new and

117

00:13:45,389 --> 00:13:51,560

fresh perspectives and that is where our next story comes in um you're looking at Paula

118

00:13:51,560 --> 00:13:58,870

bontempi who is a oceanographer in earth science uh teacher and she actually works for NASA

119

00:13:58,870 --> 00:14:04,120

as well and she was one of the members on this panel um and this story actually came

120

00:14:04,120 --> 00:14:11,060

to us from inverse this past week which I thought was really cool um getting in oceanographers

121

00:14:11,060 --> 00:14:17,210

perspective on all of this and what role the ocean kind of plays in UAP investigation so

122

00:14:17,210 --> 00:14:22,579

I'm going to go ahead and read a little bit of this so we talked about the panel um Paula

123

00:14:22,579 --> 00:14:28,500

is an oceanographer at the University of Rhode Island in the U.S and a former acting deputy

124

00:14:28,500 --> 00:14:34,529

director of earth science at Nasa and she is one of the team members uh she was asked

125

00:14:34,529 --> 00:14:39,769

by inverse about the role the ocean plays in studying the cosmos and UAP and I'm going

126

00:14:39,769 --> 00:14:44,560

to quote her exactly from the article here um I found this really interesting they wanted

127

00:14:44,560 --> 00:14:49,500

me to participate as an oceanographer and as an earth scientist who had a career at

128

00:14:49,500 --> 00:14:55,850

Nasa so it seemed like a really exciting opportunity the really cool thing was I probably never

129

00:14:55,850 --> 00:15:02,600

would have interacted with this group of people and expertise prior to this in Optical oceanography

130

00:15:02,600 --> 00:15:08,880

in general we study the propagation of light electromagnetic radiation from the Sun through

131

00:15:08,880 --> 00:15:14,730

the atmosphere and then through the air sea interface interface think about it if you've

132

00:15:14,730 --> 00:15:20,459

ever been diving into a swimming pool or swimming underwater and you open your eyes the further

133

00:15:20,459 --> 00:15:25,240

down you go the darker it gets sometimes you can even see the interplay of the light with

134

00:15:25,240 --> 00:15:29,639

the stuff that's in the water it's almost like seeing the Rays of the sun penetrating

135

00:15:29,639 --> 00:15:35,760

the ocean so using satellites we can detect sunlight in the upper layer of the ocean we

136

00:15:35,760 --> 00:15:40,839

can also tell what's in the ocean from satellites which is kind of mind-blowing if you think

137

00:15:40,839 --> 00:15:46,650

about it we can tell what's living from what's dead sometimes we can tell what types of algae

138

00:15:46,650 --> 00:15:53,080

or other organisms are in the ocean NASA is continually developing new technologies and

139

00:15:53,080 --> 00:15:58,519

approaches to actually detail that information about our Earth system better NASA explores

140

00:15:58,519 --> 00:16:03,880

the furthest reaches of the universe and also the deepest depths of what's happening on

141

00:16:03,880 --> 00:16:10,360

our planet that's very exciting the UAP team could actually use that information we're

142

00:16:10,360 --> 00:16:17,370

trying to figure out what is UAP and can NASA data and Technology be used to understand

143

00:16:17,370 --> 00:16:25,529

this I mean there we go I mean you look no further than the Tic Tac incident right exactly

144

00:16:25,529 --> 00:16:30,449

yeah we're gonna take a line here from the live chat Carolina Garcia says the ocean possibilities

145

00:16:30,449 --> 00:16:36,720

are endless and that's the thing when it comes to this subject and we hear about UFOs and

146

00:16:36,720 --> 00:16:41,060

the ocean and we hear about trans medium these buzzwords that have been thrown around for

147

00:16:41,060 --> 00:16:46,860

the last few years specifically you know you have all these theories are these objects

148

00:16:46,860 --> 00:16:52,100

coming from the ocean are they using the ocean as some kind of power source have they always

149

00:16:52,100 --> 00:16:57,519

been in the ocean you know and then you look really deep into the depths of these uh Realms

150

00:16:57,519 --> 00:17:02,220

that have not been explored and we go back to that same old cliché of we know more about

151

00:17:02,220 --> 00:17:07,370

the moon than we do the oceans then you look at things like hydrothermal vents you know

152

00:17:07,370 --> 00:17:11,930

what is below these things you know look at
all these possibilities of potentialities

153

00:17:11,930 --> 00:17:18,550

of the origins of what could live or or utilize
our oceans and for me I find that like just

154

00:17:18,550 --> 00:17:22,579

super exciting the way that that could go
and I think the more studies that are done

155

00:17:22,579 --> 00:17:28,630

by people like Paula Bond Tempe and and the
research people that she's involved with um

156

00:17:28,630 --> 00:17:34,610

it's just you know look at Noah Noah uh regularly
collecting data on this kind of thing and

157

00:17:34,610 --> 00:17:38,440

you know I wouldn't be surprised if they've
got some interesting tracks on there sonars

158

00:17:38,440 --> 00:17:43,059

and all that kind of interesting stuff and
their sensor system so yeah the oceans for

159

00:17:43,059 --> 00:17:50,980

me are still ill or have become just as exciting
as kind of space absolutely I'm so glad you

160

00:17:50,980 --> 00:17:56,480

brought up Noah because they're now involved
too and like you said it's just more sensor

161

00:17:56,480 --> 00:18:01,720

systems that we can now look at that was the
big issue with all these shutdowns of you

162

00:18:01,720 --> 00:18:07,870

know spy balloons this that and and um you
know what what's NORAD you know their sensors

163

00:18:07,870 --> 00:18:12,850

weren't where they needed to be and now that
they've opened the scope um we're going to

164

00:18:12,850 --> 00:18:20,570

find more things in our skies and possibly
now in our oceans which is good both for National

165

00:18:20,570 --> 00:18:25,260

defense purposes but also from a scientific
perspective yeah so I think that's awesome

166

00:18:25,260 --> 00:18:32,059

now that NASA is kind of um going to lead
the quote-unquote research and investigation

167

00:18:32,059 --> 00:18:37,830

and hand that data over to Arrow you know
who's looking at this from a National Defense

168

00:18:37,830 --> 00:18:42,620

sort of thing and NASA is looking at it from
a scientific perspective uh that's what we

169

00:18:42,620 --> 00:18:48,100

need we need both in my opinion at least absolutely
yeah no no for sure this is the thing you

170

00:18:48,100 --> 00:18:52,260

know we've been crying hang out for this kind
of research to be done both within the government

171

00:18:52,260 --> 00:18:57,710

within scientific community and Academia and
sometimes when it comes to us the way things

172

00:18:57,710 --> 00:19:02,309

have come to us recently we don't always seem to agree with it but look we weren't here

173

00:19:02,309 --> 00:19:08,780

five six years ago you know pre look at pre-2017 it was it was it was non-existent in the scientific

174

00:19:08,780 --> 00:19:14,549

community so you know we may all have our kind of expectations about the way that things

175

00:19:14,549 --> 00:19:19,559

should be progressing with the speed that things are are picking up but let's just take

176

00:19:19,559 --> 00:19:24,130

it for what it is like that we're here we've got the right mind starting to look at it

177

00:19:24,130 --> 00:19:32,640

let's see how that develops absolutely absolutely Um well hey we're going to stick with the

178

00:19:32,640 --> 00:19:37,390

ocean because this is probably one of my favorite stories from tonight from one of my favorite

179

00:19:37,390 --> 00:19:43,540

people and that's avilobe I have to shamelessly admit I am a super fan of everything this

180

00:19:43,540 --> 00:19:49,490

guy is doing um I remember the first time I interviewed him like a week after his first

181

00:19:49,490 --> 00:19:55,690

book came out and I was so nervous I had no idea what the hell I was doing our connection

182

00:19:55,690 --> 00:20:03,110

was terrible and he was just such a trooper
and he made the information about these Interstellar

183

00:20:03,110 --> 00:20:09,520

objects so accessible to people who've never
thought about this um and he's continuing

184

00:20:09,520 --> 00:20:16,190

to do that and continuing his work with the
Galileo project and how exciting is this they've

185

00:20:16,190 --> 00:20:22,770

gone on their first expedition to try to retrieve
elements of the first Interstellar object

186

00:20:22,770 --> 00:20:30,570

that landed in the Pacific Ocean um not only
is that exciting but they may have found their

187

00:20:30,570 --> 00:20:36,520

first object as it were yeah um so let me
go ahead and read this let's get the uh the

188

00:20:36,520 --> 00:20:44,140

old slideshow up here anomalous fragment found
by Avi lobes Expedition team in Pacific Ocean

189

00:20:44,140 --> 00:20:50,400

site of the first Interstellar object so you're
seeing you know the members in that top image

190

00:20:50,400 --> 00:20:55,400

here guys if you're watching this on YouTube
um if you're listening to this in the future

191

00:20:55,400 --> 00:20:59,549

in podcast form highly suggest coming over
to here to YouTube we got a bunch of visuals

192

00:20:59,549 --> 00:21:06,510

for you um below that you've got avilo actually
looking at this quote-unquote wire that they

193

00:21:06,510 --> 00:21:14,690

found um so to kind of I guess preface this
what they're doing is they created these huge

194

00:21:14,690 --> 00:21:20,400

huge magnets that they're dragging at the
bottom the floor of the Pacific Ocean out

195

00:21:20,400 --> 00:21:26,789

near uh Papua New Guinea and um just dragging
it and trying to pick up anything they can

196

00:21:26,789 --> 00:21:32,870

and you know we know that meteorites are often
magnetic uh they should be at least so they

197

00:21:32,870 --> 00:21:38,900

should be able to pick up fragments of this
thing if any of it did end up there um and

198

00:21:38,900 --> 00:21:44,870

also any possible signatures of technology
that may have been attached to these this

199

00:21:44,870 --> 00:21:50,460

object when it entered the Earth's atmosphere
um so yeah they're they're doing this very

200

00:21:50,460 --> 00:21:57,250

cool experiment where they're just going to
um locations where they believe this thing

201

00:21:57,250 --> 00:22:02,559

landed according to the research that they
have done for the past year or two um gosh

202

00:22:02,559 --> 00:22:10,020

longer than that I think um and lo and behold
like three days in they found something which

203

00:22:10,020 --> 00:22:15,000

is almost too good to be true um gonna be
completely honest on that but let me read

204

00:22:15,000 --> 00:22:20,370

a little bit of this here um a meteor from
Interstellar space was detected by the US

205

00:22:20,370 --> 00:22:26,820

government on January 8th of 2014. before
disintegrating in three flares 20 kilometers

206

00:22:26,820 --> 00:22:32,669

above the Pacific ocean surface this half
meter sized object would eventually sprinkle

207

00:22:32,669 --> 00:22:41,000

across the ocean floor um so like I said they
dragged this magnet they found this thing

208

00:22:41,000 --> 00:22:48,830

the wire is an eight millimeter long object
and curved twice with a rigid structure analyzation

209

00:22:48,830 --> 00:22:56,230

took place and they concluded that its composition
is anomalous compared to human-made Alloys

210

00:22:56,230 --> 00:23:03,280

for the composition analysis they used an
x-ray x-ray in x-ray Florence fluorescence

211

00:23:03,280 --> 00:23:13,049

analyzer the wire has two composition Peaks
at magnanese maganese excuse me and platinum

212

00:23:13,049 --> 00:23:20,159

so high high Trace elements of these in here
which makes it very uncommon for most other

213

00:23:20,159 --> 00:23:26,450

Alloys out there so what do you make of this
man um I've been following this story like

214

00:23:26,450 --> 00:23:31,950

crazy obvious posting diary entries almost
Moment by moment with all of this and being

215

00:23:31,950 --> 00:23:36,810

extremely transparent in everything they're
doing so yeah let's start there what do you

216

00:23:36,810 --> 00:23:41,880

make of this Expedition and what do you make
of this finding I mean I'll take it I'll take

217

00:23:41,880 --> 00:23:45,550

it back a little bit further just for a moment
just to get go back to kind of let's talk

218

00:23:45,550 --> 00:23:50,909

about and the excitement that AVI has always
had when it comes to that object you know

219

00:23:50,909 --> 00:23:55,299

when he's been talking about it on multiple
programs and podcasts and stuff we know about

220

00:23:55,299 --> 00:24:00,630

his passion about the the genuine quality
of his research and and the work that he does

221

00:24:00,630 --> 00:24:07,370

and so you know when it comes down to the
potential of finding an object pre-amuamua

222

00:24:07,370 --> 00:24:13,330

that's amazing you know and I was very very
blessed to have a conversation with Avi about

223

00:24:13,330 --> 00:24:19,000

three or four weeks ago prior to this to this
Mission and to see that excitement and the

224

00:24:19,000 --> 00:24:23,550

anxiety about potentially what they might
find and you know when they are going to these

225

00:24:23,550 --> 00:24:29,590

sites to find such small specific items in
the vastness of the ocean it's it's a big

226

00:24:29,590 --> 00:24:34,490

ask but you know looking at the articles that
we've seen him putting out in the last few

227

00:24:34,490 --> 00:24:39,529

days through the debrief and through his own
medium site it's really kept us up to date

228

00:24:39,529 --> 00:24:44,590

with the work that's been going on and we're
hearing about these codes for the names of

229

00:24:44,590 --> 00:24:50,059

the the site the I am one site and this object
has killed wire that they they found is1-2

230

00:24:50,059 --> 00:24:54,960

you know they're really keeping us really
up to scope with literally everything Moment

231

00:24:54,960 --> 00:24:59,440

by moment and the excitement that they're
seeing when they find these compositions are

232

00:24:59,440 --> 00:25:03,669

anomalous in the things they're finding really
really keeps us in touch with things and

233

00:25:03,669 --> 00:25:06,750

I'm I'm really excited for the work that they're
doing and I really hope that they come back

234

00:25:06,750 --> 00:25:11,590

with something conclusive I imagine that they're
going to have to come back and double check

235

00:25:11,590 --> 00:25:17,880

everything but for now like I'm just so so
hyped for everything Abby's doing and I can't

236

00:25:17,880 --> 00:25:23,450

wait that's the thing you can see the excitement
in this guy I always I always attribute it

237

00:25:23,450 --> 00:25:30,600

to what he coins his childlike wonder which
a lot of people in his field don't have anymore

238

00:25:30,600 --> 00:25:37,990

they've been you know stuck in this rigid
scientific method and ex in my opinion highly

239

00:25:37,990 --> 00:25:44,300

limited scientific method for a very long
time and someone like Avi who gets a lot of

240

00:25:44,300 --> 00:25:51,180

[h__h] man to be completely honest from
his peers um doesn't care he will suffer the

241

00:25:51,180 --> 00:25:58,740

slings and arrows to do what he thinks is
right and um use his resources his valuable

242

00:25:58,740 --> 00:26:06,260

resources uh to do that so and I mean I didn't even know this I tripped upon this today I

243

00:26:06,260 --> 00:26:10,870

don't know how the hell I missed this but this isn't the only Interstellar meteorite

244

00:26:10,870 --> 00:26:17,140

that has landed and that he's going to be looking at uh he also has another Expedition

245

00:26:17,140 --> 00:26:24,000

already set up to go to Portugal where a possible other Interstellar meteorite crash landed

246

00:26:24,000 --> 00:26:28,630

as well so I mean this dude's just going to be having these Expeditions going on all over

247

00:26:28,630 --> 00:26:34,790

the world looking at these things for possible techno signatures or not like he's not saying

248

00:26:34,790 --> 00:26:40,610

that this thing we're looking at right now is as he kind of joke alien hair you know

249

00:26:40,610 --> 00:26:46,789

um he's just saying it's anomalous it's not what you would expect to find and he's also

250

00:26:46,789 --> 00:26:52,490

been open and said we have found trash down here we found paint cans we you know we there

251

00:26:52,490 --> 00:26:57,510

was white paint found on our magnet because it actually hit like a paint can down there

252

00:26:57,510 --> 00:27:02,899

that some probably Navy vessel dropped over
um at some point uh they found other trash

253

00:27:02,899 --> 00:27:08,030

down there so I would imagine it's got to
be frustrating to also be dealing with that

254

00:27:08,030 --> 00:27:14,279

when you're also looking for these tiny tiny
almost microscopic fibers of a crashed media

255

00:27:14,279 --> 00:27:18,780

right it can't be easy no and this speaks
to the quality of the work that he does you

256

00:27:18,780 --> 00:27:23,090

know he said when they pulled this particular
wire that they found in in the oceans off

257

00:27:23,090 --> 00:27:27,390

Papua New Guinea when they pulled it up onto
the ship he feared about contamination about

258

00:27:27,390 --> 00:27:31,539

the ship's deck about could that have affected
the results that they've gotten these are

259

00:27:31,539 --> 00:27:37,000

the details and the the finest small things
that they go into when looking at this and

260

00:27:37,000 --> 00:27:40,590

that then that think about that when it reflects
to the work that he does when genuinely looking

261

00:27:40,590 --> 00:27:46,690

for UAP with the sensor systems he now has
with the Galileo project he's not just doing

262

00:27:46,690 --> 00:27:51,360

this like oh let's look what we can see he's
he's gonna dial down right into the details

263

00:27:51,360 --> 00:27:57,640

about this he's not doing this excuse my French
half-assed he's going he's doing it properly

264

00:27:57,640 --> 00:28:04,700

as a scientist should as a tenured professor
should and I think this is nothing but beneficial

265

00:28:04,700 --> 00:28:12,000

to us as the UFO community absolutely man
again he's doing his thing everyone else is

266

00:28:12,000 --> 00:28:16,690

doing their thing at some point all of this
is going to converge and we're gonna find

267

00:28:16,690 --> 00:28:24,150

some answers to UAP and these anomalous Interstellar
objects coming into our solar system it's

268

00:28:24,150 --> 00:28:30,440

just I can't believe we're living in this
these times it's crazy I love it I love it

269

00:28:30,440 --> 00:28:37,919

um and someone said in the chat I missed it
um Jess said I donated to obvious trip I encourage

270

00:28:37,919 --> 00:28:43,500

others to do the same if you're able totally
I'm all for that um I know AVI has a new book

271

00:28:43,500 --> 00:28:49,520

coming out this summer Interstellar so that
will definitely help support his further efforts

272

00:28:49,520 --> 00:28:55,430

as well um I have a copy of it somewhere back here um I know you'll probably be speaking

273

00:28:55,430 --> 00:29:01,750

to him uh around the same time I am when he does the interview circuit so um we can't

274

00:29:01,750 --> 00:29:07,030

wait we can't wait I've already dug into the book it's freaking it's awesome um I love

275

00:29:07,030 --> 00:29:10,600

it I love it I know some people in the chat aren't fans of avilobe and that's totally

276

00:29:10,600 --> 00:29:16,679

fine like to each their own but what he's doing can't hurt like let's be completely

277

00:29:16,679 --> 00:29:23,760

honest um I agree I'm really looking forward to to this Expedition um do you have any idea

278

00:29:23,760 --> 00:29:29,150

of any um how long the Expedition is going for do they have like a time limit or a resource

279

00:29:29,150 --> 00:29:34,750

limit have you looked into that at all I have um that's a good question I know when I spoke

280

00:29:34,750 --> 00:29:40,100

to Avi I think I think a few weeks were mentioned but uh again I didn't I didn't dig down I

281

00:29:40,100 --> 00:29:45,429

think it was a case of let's see what they can kind of do um I'm sure there's a financial

282

00:29:45,429 --> 00:29:50,830
cut off as well because these things these
Expeditions and chartering these kind of scientific

283
00:29:50,830 --> 00:29:56,160
vessels must cost a lot and I'm sure he's
not gonna you know push it too far but I'm

284
00:29:56,160 --> 00:30:00,690
thinking a few weeks um yeah so Avi if you're
out there come home

285
00:30:00,690 --> 00:30:08,669
exactly exactly right yeah they got a big
team too man they got a big team out there

286
00:30:08,669 --> 00:30:14,110
and they're out there they're out in the literally
in the middle of nowhere you know they really

287
00:30:14,110 --> 00:30:22,929
are dialing down on these very very small
precise kind of uh coordinates you know to

288
00:30:22,929 --> 00:30:27,370
find to find what they're actually looking
for is is a huge Mission but they've done

289
00:30:27,370 --> 00:30:32,429
I know they've done the right amount of preparation
for it when I spoke to Avi you know he kind

290
00:30:32,429 --> 00:30:36,370
of gave me a brief explanation of that and
you know if they're going to find something

291
00:30:36,370 --> 00:30:42,180
if it's there they will find it whatever it
turns out to be it will be you know and the

292

00:30:42,180 --> 00:30:47,010

fact that they're starting to find something with anomalous compositions is exciting but

293

00:30:47,010 --> 00:30:51,200

you know let's let's give them a chance to get it back and do that with like full analysis

294

00:30:51,200 --> 00:30:57,341

that that needs to happen give them a chance give them a chance exactly like you know they

295

00:30:57,341 --> 00:31:04,440

can do some raw you know gorilla tests on the vessel but exactly until they get it back

296

00:31:04,440 --> 00:31:09,970

in a lab and like you said get a peer reviewed it means nothing um tonight actually I have

297

00:31:09,970 --> 00:31:15,400

an episode releasing with a geologist who has had metal fragments from the possible

298

00:31:15,400 --> 00:31:20,980

UFO uh Roswell UFO crash site tested and I asked him I'm like so what will it take you

299

00:31:20,980 --> 00:31:25,490

know if you find something highly anomalous what will it take for the public to accept

300

00:31:25,490 --> 00:31:31,840

that this crashed this came from like a UFO he said well it'll at least take three labs

301

00:31:31,840 --> 00:31:38,059

to come up with the same exact conclusion different Labs accredited peer-reviewed papers

302

00:31:38,059 --> 00:31:44,290

like it's not just as simple as um as I thought
in my very naive days of oh let me bring this

303

00:31:44,290 --> 00:31:49,549

to to one lab and if they tell me it's alien
it's definitely alien that's not how this

304

00:31:49,549 --> 00:31:53,880

stuff works let me ask you a question on this
Ryan if you don't mind because weren't you

305

00:31:53,880 --> 00:32:00,500

out there when these these materials were
acquired as well oh there weren't you I was

306

00:32:00,500 --> 00:32:06,679

at the site where they were found um I do
like to make it clear I was not there when

307

00:32:06,679 --> 00:32:12,620

the actual pieces were found okay um yeah
so I do like to make that clear I did not

308

00:32:12,620 --> 00:32:18,429

witness these things being found however however
uh Frank kimble the gentleman I I worked

309

00:32:18,429 --> 00:32:24,620

with on this Roswell investigation I did a
couple years ago um he went out last week

310

00:32:24,620 --> 00:32:31,799

and on camera mind you found more fragments
out at the site um and this is all documented

311

00:32:31,799 --> 00:32:36,230

and proven so you know a lot of people are
like oh he just found these things and threw

312

00:32:36,230 --> 00:32:40,940

them out there or or said they were from there
not the case I know for a fact that did not

313

00:32:40,940 --> 00:32:47,750

happen I've seen the work this guy's done
um however I was not there so I can't 100

314

00:32:47,750 --> 00:32:53,789

definitively say that um but I trust him that
these things were found out there um especially

315

00:32:53,789 --> 00:33:00,320

after having gone out there and you know there
there's there are signs that there are stuff

316

00:33:00,320 --> 00:33:04,559

out there let's let's be I mean that that's
all I could really say at this point no I

317

00:33:04,559 --> 00:33:08,850

appreciate it there were stuff that the military
probably did not retrieve I appreciate you

318

00:33:08,850 --> 00:33:13,210

saying that I really do but I think that's
still really exciting the fact that you have

319

00:33:13,210 --> 00:33:19,639

been boots on the ground with Frank Kimber
as well and you know it's not surprising that

320

00:33:19,639 --> 00:33:24,230

maybe one day potentially these things we
might get small fragments that were missed

321

00:33:24,230 --> 00:33:29,039

by the government and it's nice to know these
things are being tested so we're still looking

322

00:33:29,039 --> 00:33:34,289

at these potentials of you know exciting results
from things that that lead back to pla you

323

00:33:34,289 --> 00:33:39,360

know big cases like Roswell that you might
think are done and dusted there's no way we'll

324

00:33:39,360 --> 00:33:43,559

ever know the truth but there are still little
potentials out there and I find that really

325

00:33:43,559 --> 00:33:47,399

exciting and you know it's nice to know that
you know these researchers you've been there

326

00:33:47,399 --> 00:33:52,630

and you understand the work that goes into
these kind of retrievals of potential pieces

327

00:33:52,630 --> 00:34:00,700

yeah man it's not easy and it's all a lot
of hard work and sometimes sometimes just

328

00:34:00,700 --> 00:34:04,710

pure happenstance and sure you know Frank
will be the first to admit some of the stuff

329

00:34:04,710 --> 00:34:10,800

he found out there easily just trash easily
just something explainable and avilobe is

330

00:34:10,800 --> 00:34:15,500

being very open about that too yeah we're
fighting trash even at the bottom of the the

331

00:34:15,500 --> 00:34:20,369

Pacific Ocean um they're not saying this stuff
is alien Frank's not saying that either so

332

00:34:20,369 --> 00:34:25,440

that's when I know I can trust these people
that they're doing the good work so um we

333

00:34:25,440 --> 00:34:29,919

do have some updates on some of the tests
that were done on the Roswell fragments um

334

00:34:29,919 --> 00:34:34,510

that you will hear in the episode premiering
tonight uh so I hope people will tune in for

335

00:34:34,510 --> 00:34:40,679

that um and their starting tests on these
new fragments they found this past week so

336

00:34:40,679 --> 00:34:48,339

dude again fragments from possible UFOs whistleblowers
coming forward saying we have partially intact

337

00:34:48,339 --> 00:34:54,619

craft it's all coming together I love it I
love it um I do want to uh quickly shout out

338

00:34:54,619 --> 00:35:01,180

both Michelle and uh cam fuzzy for the super
chats guys thank you um cam says 10 years

339

00:35:01,180 --> 00:35:06,079

ago Harvard scientists on site live streaming
while attempting to recover Interstellar extraterrestrial

340

00:35:06,079 --> 00:35:14,010

artifacts haha fake

341

00:35:14,010 --> 00:35:21,810

I know man it's crazy 2023. um Ryan Baker
actually one of our regulars here has a interesting

342

00:35:21,810 --> 00:35:26,530

question which we will get to later in the show because I know you worked on this a little

343

00:35:26,530 --> 00:35:31,550

bit Vinnie any truth that allegedly to the 1933 Italy crash Ryan stay tuned we'll get

344

00:35:31,550 --> 00:35:36,430

there man we will definitely get there um and Jazz Shaw with a super chat stay on this

345

00:35:36,430 --> 00:35:43,750

Ryan the Avi lope story is going Untold in the mainstream media thus far I know um so

346

00:35:43,750 --> 00:35:49,180

honestly kind of the David grush story did too um it kind of broke into the mainstream

347

00:35:49,180 --> 00:35:53,540

media and we'll talk about that we'll talk about that a lot actually later in the show

348

00:35:53,540 --> 00:36:01,200

um but Vinnie let's get to our next story um be until Avi finds some more alien hair

349

00:36:01,200 --> 00:36:07,670

we'll leave it at that guys with that one uh this I don't know what to make of this

350

00:36:07,670 --> 00:36:14,880

story Vinnie so um but either way Excuse me while I go through puberty um this Sunday

351

00:36:14,880 --> 00:36:23,869

evening June 18th multiple Witnesses claim they saw fighter jets engage with a UFO over

352

00:36:23,869 --> 00:36:30,210

Michigan so uh let me read this several witnesses reported seeing a pair of F-16 fighter jets

353

00:36:30,210 --> 00:36:37,930

engaged in a quote unquote dogfight with a UFO last week over bad acts in Michigan and

354

00:36:37,930 --> 00:36:43,829

I bring up bad acts for a reason uh in just a moment here Vinnie following their UFO setting

355

00:36:43,829 --> 00:36:49,880

they reported what they had seen to the National UFO Reporting Center or new Fork the primary

356

00:36:49,880 --> 00:36:56,000

witness Christopher Christopher bilbrey a military veteran reported that quote myself

357

00:36:56,000 --> 00:37:01,089

my wife and two co-workers were helping move my camper when we heard an ear-shattering

358

00:37:01,089 --> 00:37:08,440

afterburner onto what I think or F-16 or F-22 fighter jets flying together while dog fighting

359

00:37:08,440 --> 00:37:14,210

something they would Circle fast as they could looking intently for something circling the

360

00:37:14,210 --> 00:37:21,210

sun around about two or three times and suddenly there was this white metallic disc hard to

361

00:37:21,210 --> 00:37:26,510

see because it was shining with the sun it seemed to hide in the Sun from the fighters

362

00:37:26,510 --> 00:37:32,099

who obviously couldn't see it the UAP was extremely fast it was capable of overtaking

363

00:37:32,099 --> 00:37:37,420

and outmaneuvering the fighter jets with ease it would overtake a jet stop suddenly and

364

00:37:37,420 --> 00:37:46,210

seem to turn toward the incoming jet without moving the jet shot anti-missile flares the

365

00:37:46,210 --> 00:37:50,380

fighters took off together repeating this attack approximately three times before taking

366

00:37:50,380 --> 00:37:56,540

off in an ear-shattering retreat the UAP sat in the Sun a moment longer and seemed to circle

367

00:37:56,540 --> 00:38:03,780

the area almost as if in a Victory lap it then departed with absolutely no sound in

368

00:38:03,780 --> 00:38:09,930

complete opposite direction of the fighter jets that had flown so four days after the

369

00:38:09,930 --> 00:38:15,800

initial UFO sighting bilbrey says the fighter jets returned to the same spot as the same

370

00:38:15,800 --> 00:38:25,030

day as the same time of day firing flares again that's interesting um remnants of other

371

00:38:25,030 --> 00:38:31,450

UFO sightings we'll talk about in a sec um Huron County Sheriff Kelly Hansen said his

372

00:38:31,450 --> 00:38:38,510

office received no reports of the incident
but if the fighter jets were f-16s they would

373

00:38:38,510 --> 00:38:48,490

have been scrambled from the 180th Fighter
Wing in Toledo Ohio okay um I have my personal

374

00:38:48,490 --> 00:38:52,070

opinions on this Vinnie let's get your thoughts
first what do you make of this story out of

375

00:38:52,070 --> 00:38:57,780

badax Miss Michigan the first things I noted
from this case when I first saw it were some

376

00:38:57,780 --> 00:39:02,690

of the points that you really just did raise
there the fact that this UAP or whatever it

377

00:39:02,690 --> 00:39:08,160

was was capable of overtaking it out maneuvering
these fighter jets stopping on a dime and

378

00:39:08,160 --> 00:39:14,050

just basically toying with these Jets now
that is like the story that we hear almost

379

00:39:14,050 --> 00:39:20,990

in fantasy of the way that these UAB uh excuse
me I shouldn't say fantasy reports of UAP

380

00:39:20,990 --> 00:39:26,690

being able to outmaneuver our current capabilities
when it comes to fighter jets but and it's

381

00:39:26,690 --> 00:39:31,750

a great story and it's exciting but you know
since then as well we've had three local military

382

00:39:31,750 --> 00:39:37,190

bases state that they had no fighter jets
in the area at this time you know and this

383

00:39:37,190 --> 00:39:42,099

is kind of the kind of statements that that
we expect but we've had multiple Witnesses

384

00:39:42,099 --> 00:39:47,520

saying they didn't even just hear the fighter
jets they saw them they saw you know these

385

00:39:47,520 --> 00:39:52,660

these planes flying around and and some of
them have been honest and said that the distance

386

00:39:52,660 --> 00:39:57,690

and that the height of these Jets it was very
difficult to kind of see any kind of detail

387

00:39:57,690 --> 00:40:04,619

so could this be misinterpretation absolutely
could it be a mylar balloon absolutely but

388

00:40:04,619 --> 00:40:11,380

it all just fits into kind of a very exciting
story potentially showing a dogfight I don't

389

00:40:11,380 --> 00:40:20,300

know man it's it's crazy a story a story yeah
exactly yeah well I mean in Michigan has such

390

00:40:20,300 --> 00:40:26,010

a sordid history with UFOs I mean the the
term you know swamp gas is coined from a case

391

00:40:26,010 --> 00:40:33,180

in Michigan and dating back to the Project
Blue Book days um what else we haven't there

392

00:40:33,180 --> 00:40:41,329

was uh Jazz Sean I actually did a whole episode
on a wave of UFOs that were seen um over Michigan

393

00:40:41,329 --> 00:40:48,940

uh you've got the objects shot down over Lake
Huron recently um crazy uh and the last one

394

00:40:48,940 --> 00:40:54,390

the last one video on a bra this actually
came to my attention by uh UFO researcher

395

00:40:54,390 --> 00:41:02,099

Erica Lukes who tweeted this today actually
a really fun story um about a alien hoax that

396

00:41:02,099 --> 00:41:08,680

took place in bad ax Michigan the same exact
place um where this quote unquote story was

397

00:41:08,680 --> 00:41:14,440

talking about right now took place and I wanted
to read this for an obvious reason motorists

398

00:41:14,440 --> 00:41:18,780

around bad ax Michigan suffered unearthly
scares when a figure in a space helmet long

399

00:41:18,780 --> 00:41:24,720

cape skin tight uniform and Boots loomed before
their headlights then disappeared police arrested

400

00:41:24,720 --> 00:41:34,500

Jerry Sprague 22 who confessed to pulling
the prank in a suit of underwear spreg I've

401

00:41:34,500 --> 00:41:40,620

created a UFO hoax in bad acts Michigan I
just I had to point this out it was way too

402

00:41:40,620 --> 00:41:47,260

synchronistic with what we're talking about
tonight dude that's amazing I mean I I see

403

00:41:47,260 --> 00:41:55,000

like the sand people from Star Wars combined
with you know it's amazing pulling a prank

404

00:41:55,000 --> 00:42:02,010

in a suit of underwear so that is a whole
Institute of the dude's dirty dirty whites

405

00:42:02,010 --> 00:42:08,080

I guess I don't know I don't know but crazy
crazy terrifying if I were to see that thing

406

00:42:08,080 --> 00:42:13,700

I'm not gonna lie I think badax is just the
coolest name for anything to be cited in though

407

00:42:13,700 --> 00:42:15,320

to be honest yeah absolutely

408

00:42:15,320 --> 00:42:24,751

they gotta get that on a t-shirt yesterday
in my personal opinion Robert says is that

409

00:42:24,751 --> 00:42:30,830

a uh is that an uncle of yours yeah yeah I
think it is definitely definitely keeping

410

00:42:30,830 --> 00:42:37,780

the UFO hoaxes in the family for sure um awesome
dude we are breezing through these UFO stories

411

00:42:37,780 --> 00:42:42,560

because they got some awesome podcast highlights
that I want to cover with you as well Vinnie

412

00:42:42,560 --> 00:42:47,720

um guys if you haven't already please like

the video I see a lot of people at chat saying

413

00:42:47,720 --> 00:42:54,210

yo 200 watching come on come on let's get those likes up if you don't mind I would be

414

00:42:54,210 --> 00:43:02,240

very appreciative moving on to our next story our hero our you know person really pushing

415

00:43:02,240 --> 00:43:08,380

a lot of this Senator Kirsten Gillibrand she made some comments on the recent whistleblower

416

00:43:08,380 --> 00:43:14,280

claims of UFO final really exactly the UFO crash retrieval program so let's go ahead

417

00:43:14,280 --> 00:43:19,590

and read these finally someone in Congress is commenting other than you know the the

418

00:43:19,590 --> 00:43:25,650

usual people out there doing it um quote we need to just look into whether there are rogue

419

00:43:25,650 --> 00:43:31,670

sap programs that no one is providing oversight for the goal for me will be to have a hearing

420

00:43:31,670 --> 00:43:39,110

on that and and at some point so that we can assess if these saps actually exist and Sap's

421

00:43:39,110 --> 00:43:44,220

guys are special access programs I'm sure most of you know that but some may not um

422

00:43:44,220 --> 00:43:49,780

so if there are saps out there that are somehow

outside of the normal chain of command and

423

00:43:49,780 --> 00:43:56,370

outside the normal Appropriations process
they have to divulge that to Congress she

424

00:43:56,370 --> 00:44:01,640

says um and this is in reference to David
grush The Whistleblower who came forward whether

425

00:44:01,640 --> 00:44:07,030

or not she believes it or if there's any truth
to it she says quote I have no idea so I'm

426

00:44:07,030 --> 00:44:12,981

going to do the work and analyze it and figure
it out what do you think what do you think

427

00:44:12,981 --> 00:44:18,760

Vinnie um finally someone's commenting on
this other than like you know a few Rogue

428

00:44:18,760 --> 00:44:23,890

news stations and whatnot we finally have
jailbrand on the record saying if these special

429

00:44:23,890 --> 00:44:27,800

access programs exist we need to go find them
and we need to figure out what's going on

430

00:44:27,800 --> 00:44:32,070

yeah what do you think it was nice it's nice
to hear her voice obviously after you know

431

00:44:32,070 --> 00:44:39,730

her being such a a proponent for this subject
I think the only maybe slight negative side

432

00:44:39,730 --> 00:44:45,070

that I would get from that is that she's been

very much a supporter of this subject where

433

00:44:45,070 --> 00:44:50,150

she says I'm gonna do this I'm gonna make sure of this I'm gonna get to the bottom of

434

00:44:50,150 --> 00:44:55,270

it and in that statement she made it it there wasn't that language that we've heard before

435

00:44:55,270 --> 00:45:00,369

from her and that that might be me just being slightly paranoid it doesn't seem like she

436

00:45:00,369 --> 00:45:05,430

is as forthcoming as she has been in the past like I need to know this I need to you know

437

00:45:05,430 --> 00:45:10,339

there's not so much so many eyes in this because we know she has the power to do this so I

438

00:45:10,339 --> 00:45:15,690

just hope that I'm kind of reading into that too much because you know we heard other sentences

439

00:45:15,690 --> 00:45:20,930

and Congress people come out before her uh when David grush came out uh who were making

440

00:45:20,930 --> 00:45:25,351

statements and we were waiting for her we're waiting for her to say something as such a

441

00:45:25,351 --> 00:45:32,099

big supporter of the UAP subject and so you know a little bit of a red flag maybe but

442

00:45:32,099 --> 00:45:37,960

I'm not gonna kind of uh put my hat on it

too much yeah absolutely yeah I mean these

443

00:45:37,960 --> 00:45:44,359

are initial comments now that the word is
out there on these special access programs

444

00:45:44,359 --> 00:45:50,720

hopefully more of these Congress members will
be like there's nothing a congress member

445

00:45:50,720 --> 00:45:56,900

likes more than being in the know in like
having something over other Congress members

446

00:45:56,900 --> 00:46:03,160

so like if you could be the one to kind of
be like hey I know about these saps I know

447

00:46:03,160 --> 00:46:09,030

about these crash retrieval programs I know
the names of them I know this um they're gonna

448

00:46:09,030 --> 00:46:13,559

they're gonna inquire they're gonna look into
it and they wanna be the one to like bring

449

00:46:13,559 --> 00:46:19,619

this to the public who they essentially work
for exactly yeah so I don't know if that puts

450

00:46:19,619 --> 00:46:25,030

a little bit of like trepidation in in the
way things are going I don't I'm not ready

451

00:46:25,030 --> 00:46:30,569

to kind of go down that disappointment route
yet I think the process is gonna be so long

452

00:46:30,569 --> 00:46:35,280

and drawn out with everything that we know

these senators and Congress people are dealing

453

00:46:35,280 --> 00:46:41,390

with on a daily basis outside of the UFO UAB
conversation I'll put it down to that for

454

00:46:41,390 --> 00:46:46,180

now but let's talk six months down the line
if we're still not getting big statements

455

00:46:46,180 --> 00:46:52,520

and and uh affirmations from them then maybe
it's just time to start worrying and putting

456

00:46:52,520 --> 00:46:57,839

a bit a bit more pressure on I mean I don't
know I'm just I'm not ready to kind of be

457

00:46:57,839 --> 00:47:03,230

deflated by it but let's keep an eye on the
way that they're saying things absolutely

458

00:47:03,230 --> 00:47:10,500

it's all in the wording if we've learned anything
in the past couple years if not weeks um so

459

00:47:10,500 --> 00:47:16,160

yeah I look forward I hope she does look into
this and I hope she does it um for the public

460

00:47:16,160 --> 00:47:20,319

and I hope this goes somewhere and doesn't
sort of fizzle for sure you're right let's

461

00:47:20,319 --> 00:47:26,480

keep the pressure keep the pressure on them
well let's kind of talk about this story that

462

00:47:26,480 --> 00:47:32,470

has something tangentially to do with UAP

and that's the new bill a new bill that directs

463

00:47:32,470 --> 00:47:39,910

FAA to track Airborne objects that may pose
Collision threat to aviators um let's see

464

00:47:39,910 --> 00:47:45,300

here a new bill introduced by the house transportation
and infrastructure community in the United

465

00:47:45,300 --> 00:47:50,380

States includes language that will task the
Federal Aviation Administration with tracking

466

00:47:50,380 --> 00:47:58,119

objects deemed to be a risk resulting from
Airborne debris the bipartisan FAA reauthorization

467

00:47:58,119 --> 00:48:04,020

Bill introduced June 9th is intended to amend
title 49 in the current U.S code and will

468

00:48:04,020 --> 00:48:11,309

reauthorize and approve the FAA and other
civil aviation programs IT addresses Airborne

469

00:48:11,309 --> 00:48:16,800

debris collision avoidance and it directs
the FAA in coordination with the U.S Secretary

470

00:48:16,800 --> 00:48:22,960

of Transportation Pete butterjudge to establish
a program to track objects that are potential

471

00:48:22,960 --> 00:48:28,930

sources of of Airborne debris and to establish
a database continuing data and information

472

00:48:28,930 --> 00:48:35,430

of such objects significantly the bill once

it passes will expand the faa's priorities

473

00:48:35,430 --> 00:48:42,569

to include Space Traffic management with the institution of its own space situational awareness

474

00:48:42,569 --> 00:48:48,270

facilities potentially resulting in overlap with the U.S agencies that track objects that

475

00:48:48,270 --> 00:48:55,579

are presently orbiting Earth so I know I have an image up on the screen here of a UFO but

476

00:48:55,579 --> 00:49:02,030

a lot of this has to do with debris whether it's balloons whether it's drones whether

477

00:49:02,030 --> 00:49:07,490

it's now we're seeing they're going you know even to the upper atmosphere um possibly space

478

00:49:07,490 --> 00:49:12,370

debris as well so yeah what do you think of this new bill and um is this something the

479

00:49:12,370 --> 00:49:16,770

UFO Community should be keeping an eye on I think it's definitely interesting this is

480

00:49:16,770 --> 00:49:21,809

the house transportation and infrastructure committee now they're introducing languages

481

00:49:21,809 --> 00:49:29,339

through the FAA through the FAA sorry of tracking objects deemed to be resulting from debris

482

00:49:29,339 --> 00:49:34,119

now we understand there are there is Airborne

debris there is space debris whether it be

483

00:49:34,119 --> 00:49:42,680

in low earth or low earth orbit or elsewhere
but they're talking about potentials of stuff

484

00:49:42,680 --> 00:49:48,970

it that is in lower foot orbit interacting
with airline pilots and stuff like that and

485

00:49:48,970 --> 00:49:53,630

so that's that's I find that interesting in
itself but then they're talking about there

486

00:49:53,630 --> 00:49:59,660

is certain things that are that is classified
and it's very easy for People Like Us in the

487

00:49:59,660 --> 00:50:06,800

UFO Community to read into well objects moving
between mediums of low earth orbit and into

488

00:50:06,800 --> 00:50:11,890

kind of Aerospace where you know we're talking
about civilian aircraft and you know I have

489

00:50:11,890 --> 00:50:18,800

a lot of private conversations with current
serving Pilots all the time and I know that

490

00:50:18,800 --> 00:50:23,470

this is the the kind of thing they're talking
when it comes to civil aviation and the potentials

491

00:50:23,470 --> 00:50:29,340

of flight safety hazards and things like that
so the FAA we've had whistleblowers from the

492

00:50:29,340 --> 00:50:34,220

FAA speak before you know you look back at

2001 with the disclosure project with Stephen

493

00:50:34,220 --> 00:50:39,060

Greer we had some major figures from the FAA
it seemed they've been quite quiet on the

494

00:50:39,060 --> 00:50:45,530

subject in the last few years I think this
is all kind of painting a picture to me and

495

00:50:45,530 --> 00:50:50,500

I'm maybe using some biases there as well
but you know these are the kind of administrations

496

00:50:50,500 --> 00:50:56,790

that we need to starve listen to and and hope
that they start talking about anomalous objects

497

00:50:56,790 --> 00:51:04,270

as well as the US government right exactly
um well I guess to kind of play off of that

498

00:51:04,270 --> 00:51:09,030

do you think Ryan Graves organization has
anything to do with this I know they're more

499

00:51:09,030 --> 00:51:14,570

civilian run and this is an actual you know
government-funded thing but do you think they'll

500

00:51:14,570 --> 00:51:20,700

be coordinating at all I'd like to think so
um I wouldn't like to say either way whether

501

00:51:20,700 --> 00:51:24,420

they've influenced this kind of thing I like
to think that the government can can do this

502

00:51:24,420 --> 00:51:28,780

kind of thing off their own back you know

that they don't need civilian organizations

503

00:51:28,780 --> 00:51:33,280

to kick kick them up the butt and say come on you need to to start doing something about

504

00:51:33,280 --> 00:51:38,930

this but uh you never know do you I mean I think a lot of this may be to do with the

505

00:51:38,930 --> 00:51:44,400

debacle that we saw earlier in the year with these uh well with the one with the one Chinese

506

00:51:44,400 --> 00:51:50,250

balloon that we know about the other three objects that are yet to be kind of confirmed

507

00:51:50,250 --> 00:51:55,210

I think that whole mess I think we're seeing something coming out of that maybe because

508

00:51:55,210 --> 00:52:00,890

we know the FAA was involved we know NORAD was involved and it was a mess it was an absolute

509

00:52:00,890 --> 00:52:05,950

mess and that we never got any clarification even when we got to the level of White House

510

00:52:05,950 --> 00:52:11,140

briefings we never got any clarification we saw senators and Congress people coming out

511

00:52:11,140 --> 00:52:16,400

of meetings saying we haven't learned anything further from those meetings the frustration

512

00:52:16,400 --> 00:52:20,880

was evident so maybe we're seeing some kind

of progression from that to kind of lay out

513

00:52:20,880 --> 00:52:25,800

some groundwork going forward I'm not necessarily convinced but maybe they're just saying the

514

00:52:25,800 --> 00:52:35,010

buzzwords to kind of put that at ease I don't know exactly man yeah these objects man the

515

00:52:35,010 --> 00:52:44,880

the okay the Dead Horse Alaska object uh intrigues me the most it seemed to be the most uh anomalous

516

00:52:44,880 --> 00:52:51,089

it seems to be the one that they're really really keeping oh late on and um I'm just

517

00:52:51,089 --> 00:52:57,590

gonna say it one of the two people you see on your screen right now guys is gonna be

518

00:52:57,590 --> 00:53:03,410

going to Dead Horse and is going to try to get to the bottom of what the hell happened

519

00:53:03,410 --> 00:53:10,309

there if something was retrieved or not and speak to people who say they saw the retrieval

520

00:53:10,309 --> 00:53:16,910

happening so I'm just saying it I'm not going to say which one of us is doing that but yeah

521

00:53:16,910 --> 00:53:24,310

yeah you can uh you can put your your bets in the chat right now I guess we continue

522

00:53:24,310 --> 00:53:30,559

to be continued um oh I want to touch on this

because you brought up his name this is kind

523

00:53:30,559 --> 00:53:37,060

of off the cuff any so sorry about putting
you on the spot the Greer event was this something

524

00:53:37,060 --> 00:53:41,930

you watched did you take anything away from
it did you find it Well yeah what'd you think

525

00:53:41,930 --> 00:53:45,880

of it I don't want to put words in your mouth
what do you think of the Greer event I'm not

526

00:53:45,880 --> 00:53:53,579

gonna lie you know I have um issues with the
way that Dr Greer has been dealing with this

527

00:53:53,579 --> 00:53:59,660

subject in the last few years as I know a
lot of people have you know I'm not I'm not

528

00:53:59,660 --> 00:54:05,190

gonna dismiss it at all necessarily straight
off he came forward with military whistleblowers

529

00:54:05,190 --> 00:54:11,900

this time round and these guys are genuine
veterans the one the one thing I'm not going

530

00:54:11,900 --> 00:54:16,930

to do is just completely dismiss and poo poo
veterans I think I'll be disrespectful uh

531

00:54:16,930 --> 00:54:23,490

listen to what they say take it on board and
you know yeah think about it but then what

532

00:54:23,490 --> 00:54:28,619

I noticed afterwards following the subject

following these conversations you look at

533

00:54:28,619 --> 00:54:34,480

other veterans and other people that have been in similar positions to them in the military

534

00:54:34,480 --> 00:54:39,059

questions start getting asked things start cropping up that don't make sense and I kind

535

00:54:39,059 --> 00:54:46,049

of pick up on that so it throws up a lot of questions and so for me it's you know and

536

00:54:46,049 --> 00:54:51,240

what I will do is I will always take people like Dr Gray out of the equation because it's

537

00:54:51,240 --> 00:54:55,440

not about him and I've learned this the hard way I had a conversation with a good friend

538

00:54:55,440 --> 00:55:01,200

the other day and I admitted to him after a conversation that my biases were playing

539

00:55:01,200 --> 00:55:07,290

a parting not wanting to listen to Dr Greer's conference even though I did but I looked

540

00:55:07,290 --> 00:55:12,810

at it as straight away as a negative thing no matter who he was bringing forward and

541

00:55:12,810 --> 00:55:17,549

maybe I shouldn't have done that so I went I went back and listened to it all again and

542

00:55:17,549 --> 00:55:24,549

what I can say is that Dr Greer purports to

have presented a lot of information to Congress

543

00:55:24,549 --> 00:55:31,750

just as we've seen David Grush present a lot of testimony to committees and inspect

544

00:55:31,750 --> 00:55:37,040

the Inspector General if everything Dr Greer is saying is true then that adds to what we're

545

00:55:37,040 --> 00:55:45,680

trying to achieve here but I'm dubious yeah and I think it's a case of let's just see

546

00:55:45,680 --> 00:55:51,099

where this thing goes you know absolutely I'm so glad you brought that up because I

547

00:55:51,099 --> 00:55:58,940

feel like there have been times even very recently in my UFO research and kind of how

548

00:55:58,940 --> 00:56:08,119

I present myself to the public uh that I have biases as well and that I have very

549

00:56:08,119 --> 00:56:15,560

very um specific feelings about Stephen Greer the person um but like you said hearing some

550

00:56:15,560 --> 00:56:21,270

of these military whistleblowers that came forward in his event um something traumatic

551

00:56:21,270 --> 00:56:26,960

happened to each of these individuals yeah um that's very clear that goes for any any

552

00:56:26,960 --> 00:56:34,400

individual who's seen a UFO or or um you know

quote unquote had an experience of any kind

553

00:56:34,400 --> 00:56:41,619

um and I did the same thing I kind of stepped back I looked at it rationally I heard I listened

554

00:56:41,619 --> 00:56:46,799

to the testimony of these individuals and now the real work begins look at all the vetting

555

00:56:46,799 --> 00:56:52,540

going on with David Crush right now from the skeptical Community um let's do that with

556

00:56:52,540 --> 00:56:58,230

these other guys but let's also you know just hear them out you know I am I am a person

557

00:56:58,230 --> 00:57:03,880

of stories I love listening that's what I do I preserve witness testimony so I kind

558

00:57:03,880 --> 00:57:09,510

of had to step back and remember what and who I am in this field and what I contribute

559

00:57:09,510 --> 00:57:14,230

so I just looked at it from a very empathetic perspective watching it again and hearing

560

00:57:14,230 --> 00:57:19,880

these people tell their stories and right now they're just stories yeah no documents

561

00:57:19,880 --> 00:57:26,230

were presented um you know nothing like that but hey welcome to ufology that goes for almost

562

00:57:26,230 --> 00:57:30,250

all of it I mean this might be a good chance

for me and I hope you don't mind Ryan it might

563

00:57:30,250 --> 00:57:36,940

be a good for me good time for me to clarify something Dr Greer had an email sent out whether

564

00:57:36,940 --> 00:57:43,250

it by him direct or his team or whoever to a lot of influential people to say I hope

565

00:57:43,250 --> 00:57:49,069

you will join me for this thing that I'm putting on this this conference and it it stated in

566

00:57:49,069 --> 00:57:53,630

that email that he had had Communications with David Gresham that he had helped David

567

00:57:53,630 --> 00:58:01,370

gresh by helping provide information and things like that and very quickly after that a communication

568

00:58:01,370 --> 00:58:08,470

from David gresh was put out and shared with myself and a couple of my colleagues which

569

00:58:08,470 --> 00:58:15,839

we put out very quickly and Swifty on UFO Twitter to say that David grush was not happy

570

00:58:15,839 --> 00:58:20,839

with the representation that that Stephen gray was giving as far as the meeting that

571

00:58:20,839 --> 00:58:27,010

they had had or they the way that it was being portrayed and it caused a lot of issues and

572

00:58:27,010 --> 00:58:33,710

I'll you know I admit that in hindsight I

should have known that was going to happen

573

00:58:33,710 --> 00:58:38,640

I would have still put the the statement out
I wasn't able to provide the names of the

574

00:58:38,640 --> 00:58:43,330

people that it came from because it came from
David grush to a friend of mine and then a

575

00:58:43,330 --> 00:58:48,010

friend of mine and everyone assumes it's Luella
zondo and I can tell you categorically now

576

00:58:48,010 --> 00:58:56,150

it wasn't I can say that much it caused a
lot of uh uproar but um you know it made it

577

00:58:56,150 --> 00:59:00,589

into the Daily Mail like my my name and tweet
was in there I'm like oh what do I what have

578

00:59:00,589 --> 00:59:07,460

I got myself into like what did I do in the
daily mail again you know these are the little

579

00:59:07,460 --> 00:59:13,289

little things that I think are are important
that Dr Greer throws things out there that

580

00:59:13,289 --> 00:59:21,670

aren't necessarily kind of following the truth
and they are obviously red flags in this community

581

00:59:21,670 --> 00:59:26,000

and you know I've had the opportunity to speak
to people like Gary Nolan and we know about

582

00:59:26,000 --> 00:59:30,270

the Atacama thing and so all these little

things add up when it comes to Dr Greer and

583

00:59:30,270 --> 00:59:35,770

you know it just paints a picture for me and
so I have this kind of step back and reservations

584

00:59:35,770 --> 00:59:41,560

when it comes to him not necessarily who he
brings forward but it throws up all these

585

00:59:41,560 --> 00:59:47,020

extra things that you have to take into account
and Crossovers and everything everything's

586

00:59:47,020 --> 00:59:56,119

complicated and ah indeed

587

00:59:56,119 --> 01:00:08,150

and I'm with you 100 um I I I believe the
whistleblowers um but I am very hesitant as

588

01:00:08,150 --> 01:00:13,100

to the motivations behind the work career
is doing and I'll leave it at that um if he

589

01:00:13,100 --> 01:00:18,680

can prove us wrong uh great I would love that
I would love to be proven wrong that there

590

01:00:18,680 --> 01:00:25,610

isn't Shady stuff going on but um it is what
it is we will move on to our I just I wanted

591

01:00:25,610 --> 01:00:30,200

to know what you thought of that because it
did happen I didn't want to just ignore it

592

01:00:30,200 --> 01:00:36,299

um I will guys I will be ignoring the Las
Vegas story of the island in the backyard

593

01:00:36,299 --> 01:00:41,819

I will 100 be ignoring that it will not come up tonight I've gotten so many requests to

594

01:00:41,819 --> 01:00:46,589

cover it um and I do appreciate people who've reached out and said dude have you seen this

595

01:00:46,589 --> 01:00:51,069

or have you seen the updates on it um I will not be covering it and that should tell you

596

01:00:51,069 --> 01:00:57,079

right there my thoughts on it um Call Me Irresponsible maybe but I just it's not something I want

597

01:00:57,079 --> 01:01:02,079

to waste my time with because I don't believe there is anything to uh to really make of

598

01:01:02,079 --> 01:01:07,620

it um so let's move on to a story that I think we should make something of this is pretty

599

01:01:07,620 --> 01:01:15,700

cool Canada attends first of its kind UFO briefing at the Pentagon finally dude the

600

01:01:15,700 --> 01:01:20,369

five eyes have made it into the mainstream media we've been waiting for this moment where

601

01:01:20,369 --> 01:01:27,280

our country's Vinnie um are all coming together so the Canadian government has confirmed its

602

01:01:27,280 --> 01:01:33,260

participation in a first of its kind international meeting on UAP hosted at the United States

603

01:01:33,260 --> 01:01:38,059

military headquarters known as the Pentagon
I love how they put that in the article like

604

01:01:38,059 --> 01:01:43,559

we wouldn't know that the Pentagon was a um
it featured a U.S led briefing to visitors

605

01:01:43,559 --> 01:01:48,589

from nations of the five eye intelligence
sharing Alliance which includes Canada the

606

01:01:48,589 --> 01:01:54,789

UK Australia and New Zealand uh the Canadian
Department of National Defense said the Canada

607

01:01:54,789 --> 01:02:00,880

attended the meeting led by a Royal Canadian
Air Force representative DND said quote the

608

01:02:00,880 --> 01:02:07,130

details of the meeting remain classified it
can be characterized as the sharing of info

609

01:02:07,130 --> 01:02:14,970

on the subject of UAP and no further details
can be shared at this time um and we actually

610

01:02:14,970 --> 01:02:21,420

Vinnie we learned about this uh at the NASA
panel where Sean Kirkpatrick the the head

611

01:02:21,420 --> 01:02:26,940

of Arrow actually divulged I just had a meeting
with the five eyes to talk about this and

612

01:02:26,940 --> 01:02:31,049

that was the one moment in those four hours
where I was like what wait what what the hell

613

01:02:31,049 --> 01:02:36,470

is this like that was the biggest thing I
took away from that NASA panel um it's crazy

614

01:02:36,470 --> 01:02:41,940

um finally finally the five eyes are being
acknowledged um information and Intelligence

615

01:02:41,940 --> 01:02:48,230

on UAP is being shared between these countries
and um unfortunately as mentioned at least

616

01:02:48,230 --> 01:02:54,839

to Canada um it's all classified which we're
used to we're definitely used to that um but

617

01:02:54,839 --> 01:02:59,510

I did want to read this last part before I
get your thoughts Vinnie because uh another

618

01:02:59,510 --> 01:03:06,060

story came out by Daniel Otis uh a really
really good Canadian journalist out there

619

01:03:06,060 --> 01:03:13,119

covering the UAP topic um he talked about
the sky Canada project which is approaching

620

01:03:13,119 --> 01:03:19,240

the study of UFO's scientifically in contrast
to American efforts that have tended to view

621

01:03:19,240 --> 01:03:24,799

them as National Security threats while military
organizations inherently do not have open

622

01:03:24,799 --> 01:03:30,339

data in public-facing science as part of their
core mandate Canada's first steps into the

623

01:03:30,339 --> 01:03:37,270

subject in a long time are being done from that scientific perspective first and foremost

624

01:03:37,270 --> 01:03:43,530

so again while we may not get a lot of the information from the five eyes meeting um

625

01:03:43,530 --> 01:03:49,790

we are hopefully going to get some information from this Sky Canada project so yeah what

626

01:03:49,790 --> 01:03:55,280

do you make of this entire Story coming out of Canada I think it's absolutely amazing

627

01:03:55,280 --> 01:04:02,180

the Canada continued to talk about this subject they have done for the past year Daniel Otis

628

01:04:02,180 --> 01:04:07,140

has been at the Forefront of reporting this but the transport Department I think it is

629

01:04:07,140 --> 01:04:11,610

the transport Departments of the Canadian government have been really not afraid to

630

01:04:11,610 --> 01:04:16,049

talk about UAP for about a year maybe even a year and a half they've not been afraid

631

01:04:16,049 --> 01:04:20,440

to acknowledge that there is something happening there are conversations happening there are

632

01:04:20,440 --> 01:04:25,280

meetings happening that's not been an issue but when it comes to the five eyes when you

633

01:04:25,280 --> 01:04:30,810

talk about Australia New Zealand and the UK
nothing you know I've been lucky enough to

634

01:04:30,810 --> 01:04:35,970

have conversations with Ross Coulter who's
had conversations with their the military

635

01:04:35,970 --> 01:04:41,270

of Australia and we know know these conversations
are happening but when it comes to the public

636

01:04:41,270 --> 01:04:49,230

conversation absolutely nothing and let's
get to the UK I mean wow please I mean come

637

01:04:49,230 --> 01:04:59,299

on dude I mean hey who who am I to talk I'm
just I'm renting your country for a little

638

01:04:59,299 --> 01:05:06,750

while but um that's why groups like UAP media
UK were started is to get them to acknowledge

639

01:05:06,750 --> 01:05:11,789

this topic and I get asked that all the time
like every day I'm asked like what is it like

640

01:05:11,789 --> 01:05:17,960

living in the UK now and um are they getting
any better at covering this topic and honestly

641

01:05:17,960 --> 01:05:24,619

it's been it's been pretty they've been pretty
silent which is unfortunate yeah the answer

642

01:05:24,619 --> 01:05:27,970

to your question is no they're not getting
any better at all in fact they're getting

643

01:05:27,970 --> 01:05:33,119

worse because they you know for the last few years when we've been contacting Representatives

644

01:05:33,119 --> 01:05:39,210

within the ministry of Defense the the response has been you know we take incursion to our

645

01:05:39,210 --> 01:05:45,710

airspace seriously and kind of that's it now we're getting the no comment kind of response

646

01:05:45,710 --> 01:05:53,000

um you know and that's been kind of you know a real disappointment because at the same

647

01:05:53,000 --> 01:06:01,940

time and I'll say this cautiously and publicly I have sources and I know people hate sources

648

01:06:01,940 --> 01:06:08,320

Anonymous sources within intelligence and and stuff who do talk about this to me and

649

01:06:08,320 --> 01:06:15,390

it is a conversation that's being had Within the UK so then you get this public yeah nothing's

650

01:06:15,390 --> 01:06:19,349

happening and then privately it's like you know the conversations are like where do we

651

01:06:19,349 --> 01:06:25,299

go from here like what is it going to take is it going to take us being the same stereotypical

652

01:06:25,299 --> 01:06:31,049

UK government who basically just rides on the coattails of the United States yes that's

653

01:06:31,049 --> 01:06:35,390

probably the case now that we've got people like David Rush coming forward and the story

654

01:06:35,390 --> 01:06:40,170

is really kind of ramping up I'll be it's gonna is it going to be the fact that when

655

01:06:40,170 --> 01:06:47,190

David grush's claims if they're true are made public that yeah this is definitely 100 True

656

01:06:47,190 --> 01:06:53,500

is that when the UK are gonna kind of jump in on this and New Zealand and Australia like

657

01:06:53,500 --> 01:06:59,320

like what is it going to take like it's frustrating man like it's it's nonsense we we've we've

658

01:06:59,320 --> 01:07:03,870

spent years trying to speak to these people and then we get the private people the the

659

01:07:03,870 --> 01:07:09,890

anonymous sources that we all love and hate saying yeah it's happening like yeah what

660

01:07:09,890 --> 01:07:16,079

is it gonna take hey it's gonna take people like uh Dave gresh coming forward which uh

661

01:07:16,079 --> 01:07:22,150

all right get ready guys get ready for brush hour um we've got some podcast highlights

662

01:07:22,150 --> 01:07:26,750

I want to cover with Vinnie um now I did send all the news stories to Vinnie that we'd be

663

01:07:26,750 --> 01:07:31,220

covering tonight um but I did not send him
the podcast highlights who'd be covered so

664

01:07:31,220 --> 01:07:36,020

I do want to get his kind of you know on the
spot reactions to some of these I'm sure he'll

665

01:07:36,020 --> 01:07:40,440

have some interesting stuff to say and I have
some some like hypothetical questions I want

666

01:07:40,440 --> 01:07:45,089

to ask you on these two mini um before we
do that I do want to say cam thank you so

667

01:07:45,089 --> 01:07:48,980

much again for another Super Chat Ryan Vinnie
you both are such an important addition to

668

01:07:48,980 --> 01:07:54,440

the UFO world the revolution of this topic
has garnered us a new wave of future Dolan

669

01:07:54,440 --> 01:07:59,520

popes that is that's some High Praise man
um again say what you will about Dolan and

670

01:07:59,520 --> 01:08:06,380

Pope but uh hey hey if we're being compared
to Heavy Hitters like that thank you that's

671

01:08:06,380 --> 01:08:10,980

extremely nice so thank you thanks Ken appreciate
that and paranormal pixie with a five dollar

672

01:08:10,980 --> 01:08:14,900

ship which I thank you so much paranormal
always appreciate you being here love to all

673

01:08:14,900 --> 01:08:19,839

of you love to all of you and again Happy
Father's Day to all the fathers out there

674

01:08:19,839 --> 01:08:24,670

if you're watching this including Vinnie as
well Happy Father's day buddy thank you ma'am

675

01:08:24,670 --> 01:08:30,080

cheers to you cheers to you I'm halfway through
this Guinness I've got another one coming

676

01:08:30,080 --> 01:08:39,440

um all right let's do it let's move to podcast
highlights of the week and um you probably

677

01:08:39,440 --> 01:08:44,890

guessed it guys the first show we're going
to be covering is uh weaponized with Jeremy

678

01:08:44,890 --> 01:08:53,339

Corbell and George Knapp and uh the clip I
have here is from their most recent episode

679

01:08:53,339 --> 01:08:59,230

where uh they explain why David grush's attorneys
compass rose Legal Group announced they were

680

01:08:59,230 --> 01:09:05,319

ending their association with David crush
and why it's not what some Skeptics claim

681

01:09:05,319 --> 01:09:12,179

so yeah this story broke a day after the huge
debrief article came out um or a couple days

682

01:09:12,179 --> 01:09:17,069

after maybe if I if I'm getting my timetable
straight um that the group that was representing

683

01:09:17,069 --> 01:09:21,540

this whistleblower uh who came forward and
said he knows about Crash retrieval programs

684

01:09:21,540 --> 01:09:28,190

of UFOs uh that they were like yo later dude
we're we're out of here um and a lot of people

685

01:09:28,190 --> 01:09:33,440

took that as oh they don't believe him or
they don't want to be involved with them anymore

686

01:09:33,440 --> 01:09:41,900

um but nap and Corbell who we should say were
approached by grush first before anybody even

687

01:09:41,900 --> 01:09:49,339

before you know Leslie Kane and Ralph Blumenthal
or Ross culthart um that uh yeah yeah that

688

01:09:49,339 --> 01:09:52,290

they had a lot to say about it so I'm gonna
go ahead and play the clip Vinnie and we will

689

01:09:52,290 --> 01:09:58,090

talk about it on the other side sound good
perfect awesome there's been this huge thing

690

01:09:58,090 --> 01:10:02,739

online that the inspector general of intelligence
the former Inspector General of intelligence

691

01:10:02,739 --> 01:10:07,570

who is Dave's lawyer by the way great lawyer
to have when you're doing this kind of thing

692

01:10:07,570 --> 01:10:13,380

did that firm dropped him and it to try to
discredit him even in the publication that

693

01:10:13,380 --> 01:10:18,150

told his story it's like they've got a weird sub-agenda so they tried to make that seem

694

01:10:18,150 --> 01:10:26,750

mysterious is it what just happened that call what just happened according to to Dave um

695

01:10:26,750 --> 01:10:33,390

that law firm represents whistleblowers and active duty government employees Dave is no

696

01:10:33,390 --> 01:10:39,110

longer a government employee he left and so the firm that would normally represent him

697

01:10:39,110 --> 01:10:44,810

has been peeled off however to suggest that if somehow this big split that they don't

698

01:10:44,810 --> 01:10:50,409

believe him is completely wrong because the lawyer who represented him all the way through

699

01:10:50,409 --> 01:10:56,850

this the guy who used to be with the ig's office is still representing him is he's peeled

700

01:10:56,850 --> 01:11:02,230

off from the firm and is still sticking with Dave we're talking about the former Inspector

701

01:11:02,230 --> 01:11:07,590

General of intelligence so what you're telling me and what I'm telling you and what we know

702

01:11:07,590 --> 01:11:14,390

to be fact is that this individual is leaving their Law Firm to privately because of uh

703

01:11:14,390 --> 01:11:20,470

faith and belief and trust and righteousness
to to be right there next today I can imagine

704

01:11:20,470 --> 01:11:25,940

what it's been like the last week for that
law firm to be pounded and hounded by media

705

01:11:25,940 --> 01:11:32,790

from all over the world not only reporters
and producers and demands for interviews but

706

01:11:32,790 --> 01:11:37,950

also all the UFO crazies who have been pounding
them with criticisms and questions and things

707

01:11:37,950 --> 01:11:42,280

of that sort so I'm sure that representing
somebody who is now as high profile as Dave

708

01:11:42,280 --> 01:11:47,210

is is a headache for him so they might use
the excuse well he doesn't work for the government

709

01:11:47,210 --> 01:11:53,570

anymore we're leaving him but the lawyer who's
known him the best who's worked with him through

710

01:11:53,570 --> 01:11:58,770

this whole process is sticking with him because
he knows Dave is a legitimate guy and he's

711

01:11:58,770 --> 01:12:06,960

going to have his back as we will hmm

712

01:12:06,960 --> 01:12:15,110

okay so when I first heard nap say that that
the actual like attorney left the firm to

713

01:12:15,110 --> 01:12:21,440

continue representing this guy I was like
hold up okay that that says something that's

714

01:12:21,440 --> 01:12:28,310

not they're they're completely disassociating
from this um you know the big thing was uh

715

01:12:28,310 --> 01:12:34,159

you know we successfully represented him during
his whistleblower complaint that was our job

716

01:12:34,159 --> 01:12:40,280

work done like job done most other people
took it as they wanted to get a far away from

717

01:12:40,280 --> 01:12:46,250

this as possible um they even said in like
a a uh you know a statement they put out we

718

01:12:46,250 --> 01:12:53,170

do not necessarily believe or or you know
we we are not represented by the information

719

01:12:53,170 --> 01:12:58,909

he's bringing forward we're only you know
working with him on the complaint I'm jumbling

720

01:12:58,909 --> 01:13:04,220

all of that um what I'm trying to say is they
they're done with their job yet now we're

721

01:13:04,220 --> 01:13:09,600

learning that the actual attorney who kind
of headed this spearheaded this whole thing

722

01:13:09,600 --> 01:13:14,730

is still representing Crush um we got some
interesting comments in the chapel video I

723

01:13:14,730 --> 01:13:21,000

want to hear what you think first about this whole it's been a whirlwind when it comes

724

01:13:21,000 --> 01:13:26,260

to that specific point you know we have the debrief State a story that broke you know

725

01:13:26,260 --> 01:13:33,400

the grush thing and it was all amazing for a few days and for the conversation was progressing

726

01:13:33,400 --> 01:13:40,640

and then we had this Revelation again from the debrief the grush was no longer represented

727

01:13:40,640 --> 01:13:45,360

by these lawyers and everything thought this is completely destroying his story and everything

728

01:13:45,360 --> 01:13:50,830

like that and you know it wasn't it wasn't so many conversations were happening behind

729

01:13:50,830 --> 01:13:56,770

the scenes when it came to that with everybody involved everyone involved it was panic mode

730

01:13:56,770 --> 01:14:05,219

for a couple of days yet on UFO Twitter in in the Twitter sphere and the UFO sphere everyone

731

01:14:05,219 --> 01:14:11,210

was panicking like this is just falling apart it wasn't it wasn't just people were jumping

732

01:14:11,210 --> 01:14:17,929

to conclusions and it was good to see finally Jeremy and George we're actually clarifying

733

01:14:17,929 --> 01:14:23,429

some points that you know the way it works
with the lawyers and the complaints through

734

01:14:23,429 --> 01:14:31,230

the IG and stuff I mean it's very easy for
certain individuals in the community and man

735

01:14:31,230 --> 01:14:37,771

I hate these are the kind of conversations
I don't like having that you you hear certain

736

01:14:37,771 --> 01:14:43,790

things and have certain conversations that
it it's understandable it makes sense but

737

01:14:43,790 --> 01:14:49,580

to the everyday Joe it isn't and you know
and I knew it was going to be clarified and

738

01:14:49,580 --> 01:14:55,719

I think you know I've had conversations with
people separately from all this who who have

739

01:14:55,719 --> 01:15:01,639

spent time with David gresh in Intel school
and things like that and I've done my digging

740

01:15:01,639 --> 01:15:09,610

myself away from this about David grush's
credibility one thing I can't do and this

741

01:15:09,610 --> 01:15:14,580

may be kind of sidestepping everything Ryan
so I apologize the one thing I can't do is

742

01:15:14,580 --> 01:15:20,420

uh provide any Clarity on the claims that
he's made about the genuine acceptance of

743

01:15:20,420 --> 01:15:25,630

nhi as he says but the one thing I have been able to do in the last couple of weeks since

744

01:15:25,630 --> 01:15:31,450

he came clear is speak to people that know him very very much first hand it was spent

745

01:15:31,450 --> 01:15:37,231

years with him so I apologize for slightly going off topic there Ryan but I think it

746

01:15:37,231 --> 01:15:43,420

Paints the picture of we're still in early days when it comes to knowing what he's talking

747

01:15:43,420 --> 01:15:48,530

about whether it's true or not I think we we when it gets to that proof that truth that

748

01:15:48,530 --> 01:15:49,550

he's talked about

749

01:15:49,550 --> 01:15:57,740

I don't know where we go from here yeah nobody does I mean this and that's the thing this

750

01:15:57,740 --> 01:16:03,070

story just came out of I know it's been work they've been working on it for a very long

751

01:16:03,070 --> 01:16:09,810

time but absolutely for many in the UFO community and outside of it um this is brand new and

752

01:16:09,810 --> 01:16:15,000

you know we've been digging brother we've been digging I've been digging man I'm sure

753

01:16:15,000 --> 01:16:20,470

you have I have absolutely no doubt um I'll
be the first to admit I knew nothing about

754

01:16:20,470 --> 01:16:27,380

any of this um so I've been completely blind
sighted by all of it and uh I kind of like

755

01:16:27,380 --> 01:16:32,330

it that way to be honest I didn't know all
the like drama that was going on that like

756

01:16:32,330 --> 01:16:37,630

the names were leaked of David grush and the
story was going here and this person knew

757

01:16:37,630 --> 01:16:44,300

that it was a nightmare it was a nightmare
yeah I'm sure I'm sure so I'm kind of ignorance

758

01:16:44,300 --> 01:16:51,199

is bliss on that one um but yeah this is an
interesting development um we have a lawyer

759

01:16:51,199 --> 01:16:58,090

in the chat um who says they don't necess
necessarily by what nap is saying in terms

760

01:16:58,090 --> 01:17:03,830

of the attorney but we'll see how it all plays
out like I don't know I don't know um it is

761

01:17:03,830 --> 01:17:11,370

what it is but uh another kind of I guess
criticism that uh people are having with the

762

01:17:11,370 --> 01:17:16,880

David grush whistleblower story is that a
lot of the stuff he said is stuff that's been

763

01:17:16,880 --> 01:17:24,580

said in the UFO Community for decades um like almost word for word beat for Beat of certain

764

01:17:24,580 --> 01:17:28,330

things we've heard in the past you know a lot of people are saying oh he just like literally

765

01:17:28,330 --> 01:17:35,449

is just pulling stuff from UFO history and presenting it to the public um and a lot of

766

01:17:35,449 --> 01:17:40,170

people say that that means he's faking it or he's making it up or he's just like you

767

01:17:40,170 --> 01:17:45,900

know kind of hijacking narratives that have been there for a while um but one person who

768

01:17:45,900 --> 01:17:53,540

kind of argues that well that makes sense if he is telling the truth is uh Richard Dolan

769

01:17:53,540 --> 01:17:59,000

um so I'm gonna go ahead and play this this clip because I actually you know I I found

770

01:17:59,000 --> 01:18:03,710

some some Credence in it so let me go ahead and play this um and we'll talk about it on

771

01:18:03,710 --> 01:18:09,550

the other side so the information is definitely has been out there for a while and so what

772

01:18:09,550 --> 01:18:17,650

we're seeing with these latest wave of claims is that frankly they are very much in line

773

01:18:17,650 --> 01:18:24,350

with what research has already come to you
know conclude uh I've I've seen arguments

774

01:18:24,350 --> 01:18:31,120

that have been used against these recent whistleblowers
for that reason against Grouch uh in other

775

01:18:31,120 --> 01:18:36,889

words saying oh you're just recycling these
old other stories I'm like is that your complaint

776

01:18:36,889 --> 01:18:42,090

that what he is saying is in line with what
research has already concluded I don't think

777

01:18:42,090 --> 01:18:46,210

that's a very good argument to make if you're
going to criticize it a better argument would

778

01:18:46,210 --> 01:18:52,270

simply be to say he doesn't have hard evidence
that we have seen and that is true so we can

779

01:18:52,270 --> 01:19:00,480

continue to want to see actual hard evidence
but I don't think it's a fair criticism at

780

01:19:00,480 --> 01:19:05,460

all to say well you're just repeating what
we've been hearing Ad nauseam for years uh

781

01:19:05,460 --> 01:19:11,750

no because what we have been hearing for years
is very likely true that there have been a

782

01:19:11,750 --> 01:19:20,440

long long history of acquisition of non-human
technology

783

01:19:20,440 --> 01:19:24,880

so I mean yeah he's kind of stating the obvious
but when I actually thought about it I'm like

784

01:19:24,880 --> 01:19:33,050

well yeah I mean if we're going to talk about
these crash retrieval programs this deep mythology

785

01:19:33,050 --> 01:19:37,320

that has been with the UFO Community ever
since Roswell and as we'll learn about later

786

01:19:37,320 --> 01:19:44,500

maybe a little further back from Roswell um
it would make perfect sense it only bolsters

787

01:19:44,500 --> 01:19:50,550

everything we've been talking about for the
past 75 plus years um doesn't really mean

788

01:19:50,550 --> 01:19:56,270

he's like someone in the chat said he's he's
ticking off every conspiracy theory bingo

789

01:19:56,270 --> 01:20:02,420

card you know box out there um I get that
I I understand what you're saying um but I

790

01:20:02,420 --> 01:20:07,730

I think Dolan did make some sense here again
I know we probably have people here who don't

791

01:20:07,730 --> 01:20:12,820

agree with a lot of things Richard Dolan says
but this is one thing that I do agree with

792

01:20:12,820 --> 01:20:18,650

them on it's what we've not only wanted to
hear I'm going to hate using that word wanted

793

01:20:18,650 --> 01:20:27,250

um because it does kind of conjure uh influence
um but it's been documented in many cases

794

01:20:27,250 --> 01:20:31,630

throughout the years as well by very credible
individuals so yeah Vinnie what do you make

795

01:20:31,630 --> 01:20:36,840

of this argument that Dolan brought forward
on the whole brush story it does read into

796

01:20:36,840 --> 01:20:42,810

our biases sometimes doesn't it you know but
at the same time it's like well we have to

797

01:20:42,810 --> 01:20:48,040

wait for proof we've not we've not kind of
been you know let's look at the way that the

798

01:20:48,040 --> 01:20:53,850

subject has gone in the last six years it's
it's grown from 2017 to where we are now with

799

01:20:53,850 --> 01:21:00,310

everything that's happened we've now got this
big Revelation from a whistleblower who is

800

01:21:00,310 --> 01:21:08,460

purportedly telling us the absolute truth
that we all thought we knew all along so it's

801

01:21:08,460 --> 01:21:12,860

very easy for our biases to say oh yeah we
knew that anyway and now he's just confirming

802

01:21:12,860 --> 01:21:18,380

it to us by you know come on man like this
is the biggest thing we've kind of been in

803

01:21:18,380 --> 01:21:25,810

since 2017 so let's take it seriously let's
take it step by step let's not kind of just

804

01:21:25,810 --> 01:21:32,670

push our biases too much you know I've been
a victim of my biases a lot recently I've

805

01:21:32,670 --> 01:21:38,290

had to put myself in check a lot and I think
a lot of people in the community have as well

806

01:21:38,290 --> 01:21:42,860

because it's so easy to think that here we
go this is it he's here he's telling us the

807

01:21:42,860 --> 01:21:51,239

truth but wait a minute what's he given us
nothing you know so let's see how things progress

808

01:21:51,239 --> 01:21:57,409

we hear these rumors of more whistleblowers
coming out to corroborate what he says I'm

809

01:21:57,409 --> 01:22:00,820

not sure if I'm kind of going off on the tangent
of what you actually asked oh Ryan but you

810

01:22:00,820 --> 01:22:05,460

know what I mean it's like like where do we
go from here like do we just go yep here we

811

01:22:05,460 --> 01:22:10,679

go this is what we all knew blah blah blah
come on we knew it but let's dig up ourselves

812

01:22:10,679 --> 01:22:15,909

yeah I'm not so convinced I'm taking a really
cautious step with this you know having spoken

813

01:22:15,909 --> 01:22:26,080

to people behind the scenes as well his his
career his personality his genuine being a

814

01:22:26,080 --> 01:22:33,730

a decent human being David grush is the real
deal has he been manipulated is this information

815

01:22:33,730 --> 01:22:40,150

for Real where do we go from here is bringing
this where's the corroboration going to come

816

01:22:40,150 --> 01:22:48,130

from for us the everyday man the Layman you
know the man and woman on on the streets like

817

01:22:48,130 --> 01:22:54,520

it's a mess it's a mess absolutely no and
thank you for being honest and that actually

818

01:22:54,520 --> 01:23:02,360

transitions perfectly into our next clip um
from you guessed it none other than Ross culthart

819

01:23:02,360 --> 01:23:10,190

over at the need to know podcast um yeah Roscoe
um Roscoe who originally interviewed grush

820

01:23:10,190 --> 01:23:15,070

on news Nation he gives some updates on what
has happened since the interview aired on

821

01:23:15,070 --> 01:23:23,050

news nation and some surprises that we should
um I guess look forward to um so yeah let

822

01:23:23,050 --> 01:23:29,660

me go ahead and play this and yeah talks more
grush it's Crush hour is Dave grosh safe you

823

01:23:29,660 --> 01:23:33,810

think he's safe I think he used now I think
he's a lot safer now that he's taken a public

824

01:23:33,810 --> 01:23:37,940

position um there are things that have happened
to Dave that aren't very nice as home's been

825

01:23:37,940 --> 01:23:44,820

broken into and he's been targeted with surveillance
and I think he's been harassed and um I've

826

01:23:44,820 --> 01:23:48,690

got a pretty good idea who the people are
that have been doing harassing it's quite

827

01:23:48,690 --> 01:23:54,250

extraordinary it's probably not a government
agency it's probably a private contractor

828

01:23:54,250 --> 01:23:58,810

more on that later wow so all right well there's
okay I was just going to say are you going

829

01:23:58,810 --> 01:24:02,350

to be looking into that I guess the answer
is yes here's another are you going to be

830

01:24:02,350 --> 01:24:08,360

looking into it question uh you raised in
that special that the Vatican has known about

831

01:24:08,360 --> 01:24:14,100

this for a while uh what should happen about
that should the Vatican how did how do you

832

01:24:14,100 --> 01:24:20,900

get the Vatican legitimately on the record
about what they know about the UFO situation

833

01:24:20,900 --> 01:24:24,230

well one of the things that I think is the red flag with the Vatican is that a few years

834

01:24:24,230 --> 01:24:29,659

ago the Vatican astronomer made a very public statement yes that we are all God's children

835

01:24:29,659 --> 01:24:34,120

whatever we are if we're another species we're still God's children and that the Christian

836

01:24:34,120 --> 01:24:38,929

faith they emphasized is not incompatible with the belief in Aliens and I think the

837

01:24:38,929 --> 01:24:43,560

vatican's been aware of this issue since at least the second world war when the magenta

838

01:24:43,560 --> 01:24:48,650

craft was recovered and I think that the Vatican apparently are my good friend Diana Walsh

839

01:24:48,650 --> 01:24:54,480

kasalka the Theologian Professor has apparently gone to the Vatican library in the past and

840

01:24:54,480 --> 01:24:58,870

she's told me that there are enormous archives in the Vatican still to be released where

841

01:24:58,870 --> 01:25:05,600

they've been studying the phenomena through millennia it is that is pretty amazing but

842

01:25:05,600 --> 01:25:10,440

on the other hand it makes good sense particularly if that first crash was in uh Italy as as

843

01:25:10,440 --> 01:25:19,690

he said all right um uh will there be interviews to follow with people who literally have first

844

01:25:19,690 --> 01:25:25,440

person knowledge the people who say yes I worked on this program I touched that craft

845

01:25:25,440 --> 01:25:36,310

I saw this body are are we going to get that kind of thing coming anytime soon

846

01:25:44,280 --> 01:25:37,310

yes

847

01:25:44,280 --> 01:25:54,810

story um I I looked at the news Nation interview and the way Ross clothing handled himself

848

01:25:54,810 --> 01:26:03,210

in asking those questions and it was just perfect it was perfect right in terms of how

849

01:26:03,210 --> 01:26:08,510

we asked the questions um how he responded to them and again will we be getting more

850

01:26:08,510 --> 01:26:17,580

whistleblowers yes yes it's that's yeah um you know will we in the public see or know

851

01:26:17,580 --> 01:26:23,130

anything of that I hope um the Vatican thing I don't really want to get into because I

852

01:26:23,130 --> 01:26:29,060

have a clip that kind of touches on that aspect of it but my question for you Ross said that

853

01:26:29,060 --> 01:26:34,830

since David grush has come forward since the interviews uh his home was broken into again

854

01:26:34,830 --> 01:26:42,260

we're going strictly on Ross cohart's word on that um but I want to ask you very who

855

01:26:42,260 --> 01:26:47,420

broke into David grush's house who's looking oh my goodness man I have a lot of questions

856

01:26:47,420 --> 01:26:56,600

I was not expecting that man I know you weren't um I mean that's that's sketchy come on like

857

01:26:56,600 --> 01:27:01,580

we know like let's just look at it from we know David grush's initial complaint went

858

01:27:01,580 --> 01:27:08,080

to the uh Department of Defense Inspector General back in 2019 look how far back that

859

01:27:08,080 --> 01:27:13,370

is you know this guy was working with the UAP Task Force at that time realized that

860

01:27:13,370 --> 01:27:17,970

the program was not read into something that they should have been read into I think they

861

01:27:17,970 --> 01:27:25,639

knew then there was something going on these are the programs you know he knew something

862

01:27:25,639 --> 01:27:33,120

yeah let's bring it forward to a year ago uh when he made his complaint to the intelligence

863

01:27:33,120 --> 01:27:39,219

Community Inspector General you know this
is the second time he's he's brought something

864

01:27:39,219 --> 01:27:45,000

forward and then now things are really ramping
up he's getting broken into his house you

865

01:27:45,000 --> 01:27:49,699

know he's getting this these reprisals these
pushbacks I mean there's got to be something

866

01:27:49,699 --> 01:27:56,140

there right it points to to that I mean you
know I got to be careful here because I put

867

01:27:56,140 --> 01:28:00,460

myself out on the internet and say I believe
everything I don't I'm looking at I'm looking

868

01:28:00,460 --> 01:28:04,090

at facts I know people are going to pull this
apart they already have for the last few weeks

869

01:28:04,090 --> 01:28:09,699

I mean come on but uh you know I'm I'm lucky
enough to have conversations privately about

870

01:28:09,699 --> 01:28:15,390

people that are involved with this so where
do we go from here when it becomes to believing

871

01:28:15,390 --> 01:28:18,199

David rush you know

872

01:28:18,199 --> 01:28:25,670

I don't know what you want me to say right
no I just I had to ask I was like I'm gonna

873

01:28:25,670 --> 01:28:30,710

put him on this spot with that I want to know

who he thinks broken I don't know but like

874

01:28:30,710 --> 01:28:37,330

look this is like isn't this stereotypical
like this is what happens isn't this like

875

01:28:37,330 --> 01:28:44,720

we've seen this before in sensitive programs
and retaliations and reprisals it's very easy

876

01:28:44,720 --> 01:28:49,070

for me to say that that like when you get
close to the truth you get pushed back but

877

01:28:49,070 --> 01:28:56,050

like I don't I don't this is the thing I don't
know I think a lot of people don't know and

878

01:28:56,050 --> 01:29:04,470

I think it's just worrisome at this point
yep exactly exactly stay on guard guys if

879

01:29:04,470 --> 01:29:12,810

there's there's a book behind me right now
um called mirageman there you go I highly

880

01:29:12,810 --> 01:29:18,770

suggest everyone go buy that book and Mark
pinkle did the author is gonna um probably

881

01:29:18,770 --> 01:29:25,540

reach out and be like thank you Ryan um go
buy that book right now um because this is

882

01:29:25,540 --> 01:29:31,000

exactly the type of situation this entire
David Gross story um and I'm not casting this

883

01:29:31,000 --> 01:29:38,270

versions on people like Ross colthard or any

of these individuals covering the story um

884

01:29:38,270 --> 01:29:44,550

that there are reasons and motivations for these things to happen and to happen when

885

01:29:44,550 --> 01:29:49,750

they're happening and to and why they are happening um I'm just gonna leave it at that

886

01:29:49,750 --> 01:29:55,989

read the book I'm rereading it for like the fourth time right now and uh it's very eye-opening

887

01:29:55,989 --> 01:29:59,750

and it has a lot to do with stuff going on if you don't mind I'll go a little I'll go

888

01:29:59,750 --> 01:30:06,210

a little bit further than that and I'll stick my neck out for people like Roscoe thought

889

01:30:06,210 --> 01:30:13,440

these people are privy to information that we're not they are trusted with information

890

01:30:13,440 --> 01:30:22,030

that may be sensitive and I've had these conversations with people like Ross before that you cannot

891

01:30:22,030 --> 01:30:29,100

burn your sources right so just just just put this information out there to the world

892

01:30:29,100 --> 01:30:34,520

because it's the best thing to do no it doesn't work like that unfortunately as much as we

893

01:30:34,520 --> 01:30:43,199

all have this excuse the pun need to know

Ross's show you know Ross is doing the best

894

01:30:43,199 --> 01:30:49,750

he can he always has he he never came into
this to be that kind of the the man who broke

895

01:30:49,750 --> 01:30:55,710

the story but he has trusted and he's done
a hell of a lot of good work and I'm blessed

896

01:30:55,710 --> 01:31:02,010

to know him I'm sure Ryan is feels the same
way and I think we're still playing let's

897

01:31:02,010 --> 01:31:07,310

say the game the long game is where you know
more information will come out in the future

898

01:31:07,310 --> 01:31:13,090

if we just take a step back and wait for it
and I know we can all say like we've been

899

01:31:13,090 --> 01:31:18,690

waiting 80 years and all that but like come
on guys let's give the people a little bit

900

01:31:18,690 --> 01:31:26,400

of credit right and we can wait a little bit
longer to get it right to get exactly a little

901

01:31:26,400 --> 01:31:32,040

bit longer yeah if we've waited this [h__\h]
long like we can wait a little bit longer

902

01:31:32,040 --> 01:31:39,750

to make sure everything rush is saying is
true is accurate um or future whistleblowers

903

01:31:39,750 --> 01:31:46,880

um yeah as well so yeah yeah um it's exciting

if any of this is true however like you said

904

01:31:46,880 --> 01:31:53,020

a million times tonight and we have to continue stressing this we have no proof and the proof

905

01:31:53,020 --> 01:31:57,880

is in the pudding so many people have said that um you can say look at his credentials

906

01:31:57,880 --> 01:32:04,250

look at what he did he he filed this complaint okay that's fine yes there can be ramifications

907

01:32:04,250 --> 01:32:09,670

if he's found to be lying about any of this um however like that doesn't change the fact

908

01:32:09,670 --> 01:32:15,100

that we still do not have proof um and that kind of that bleeds into this last clip about

909

01:32:15,100 --> 01:32:22,750

the gruff story I promise Vinnie um during rush hour um Bryce Abel was on podcast UFO

910

01:32:22,750 --> 01:32:30,139

with Martin Willis recently and he basically what I quote say he initiated storm crash

911

01:32:30,139 --> 01:32:37,500

retrieval locations um so yeah I'm gonna go ahead and play this clip and uh yeah but you

912

01:32:37,500 --> 01:32:41,139

know what there's one other thing Martin I see someone else saying hey it's pretty simple

913

01:32:41,139 --> 01:32:46,949

go and look I agree with that let's remember

one thing Dave grush has gone to the House

914

01:32:46,949 --> 01:32:51,700

and Senate intelligence committees and the
the Inspector General and to the best of my

915

01:32:51,700 --> 01:33:00,880

knowledge he has provided names dates programs
and locations all right so what is the solution

916

01:33:00,880 --> 01:33:06,760

here well it is pretty darn simple go and
look yeah these committees have investigators

917

01:33:06,760 --> 01:33:13,400

they know how to subpoena material they've
done this before you know the uh they should

918

01:33:13,400 --> 01:33:21,060

go look they if they have to rate It Go rate
it uh they have to if they can uh file the

919

01:33:21,060 --> 01:33:28,900

right paperwork to get in do that but you
know uh the ball is is well look this this

920

01:33:28,900 --> 01:33:35,130

Secret's coming out no matter what anyway
but it was certainly urge it along to see

921

01:33:35,130 --> 01:33:40,610

Congress get deeply involved in taking the
information that Dave grush has provided plus

922

01:33:40,610 --> 01:33:46,230

these other whistleblowers that are behind
him and say okay well we've heard a lot of

923

01:33:46,230 --> 01:33:52,500

specifics here we have investigators let's

go look that's my policy and I that should

924

01:33:52,500 --> 01:33:56,960

be their policy

925

01:33:56,960 --> 01:34:05,750

raid them oh man bro I hey I had him on last week it was awesome I love Bryce I write for

926

01:34:05,750 --> 01:34:11,040

him oh thanks man um very last minute so I have to thank him for even giving me any of

927

01:34:11,040 --> 01:34:17,750

his precious time um but uh first of all his background is just on fire in his interviews

928

01:34:17,750 --> 01:34:23,750

he's got the Wilson ball he's got the the like the orb he's got a believe sign from

929

01:34:23,750 --> 01:34:28,880

Ted lasso I just I love seeing his background it's like little Easter eggs every time he's

930

01:34:28,880 --> 01:34:37,510

on an interview um but okay so Vinnie my question for you uh Bryce says you know if this is

931

01:34:37,510 --> 01:34:45,750

true and he's given names of programs in places where these things are um go to them like

932

01:34:45,750 --> 01:34:52,230

this is our chance like go question them start prodding start doing stuff which is hopefully

933

01:34:52,230 --> 01:34:58,480

what people like Senator gillibrand are going to eventually do fingers crossed um so my

934

01:34:58,480 --> 01:35:05,760

question for you Vinnie should Congress and the IG um should they rate these locations

935

01:35:05,760 --> 01:35:11,650

where saps are taking place do you think this is something that should happen absolutely

936

01:35:11,650 --> 01:35:17,360

I can tell you right now for a fact that these Congress people and Senators they know the

937

01:35:17,360 --> 01:35:25,889

names of these programs I've heard on the Grapevine the names of these programs it's

938

01:35:25,889 --> 01:35:32,389

not a secret the question or the point that needs to be made going forward now is who

939

01:35:32,389 --> 01:35:41,139

has the power to go and investigate these programs who is able to dig deep and go through

940

01:35:41,139 --> 01:35:47,430

you know congressional powers to actually access special access programs that sit way

941

01:35:47,430 --> 01:35:54,310

outside the black programs way outside the white programs these programs sit within gray

942

01:35:54,310 --> 01:36:00,699

areas that are unacknowledged and we've all heard it before but I can tell you now they're

943

01:36:00,699 --> 01:36:07,180

there and they're sat within a very small need to know basis of individuals Congress

944

01:36:07,180 --> 01:36:12,720

has this power and we're this close we are
this close to Congress people knowing what

945

01:36:12,720 --> 01:36:20,380

these programs are so let's let's play and
see but I mean I'm you know I'm like this

946

01:36:20,380 --> 01:36:28,770

close to being excited you know what I mean
that's all we can ask for man wow you gave

947

01:36:28,770 --> 01:36:34,940

me chills with that man oh we're so close
we are so close and hey look acknowledging

948

01:36:34,940 --> 01:36:41,869

them it's like who who said it recently um
about you know it's like alcoholism the first

949

01:36:41,869 --> 01:36:49,050

step is acknowledgment um and not to cast
any light on alcoholism in any way I I know

950

01:36:49,050 --> 01:36:53,510

individuals who have suffered from that but
it's true like the first step is acknowledging

951

01:36:53,510 --> 01:37:00,639

it the the second step is now dealing with
it so yeah if okay like if anything grush

952

01:37:00,639 --> 01:37:05,920

coming forward if he is giving specific names
of programs and people and and things like

953

01:37:05,920 --> 01:37:12,780

that um that is something that Inspector General
and Congress can work off of and now we go

954

01:37:12,780 --> 01:37:19,310

see if he is actually telling the truth and
the other big thing we have to keep in mind

955

01:37:19,310 --> 01:37:30,000

with all of this I think is retrieval programs
of things no [h__\h] like that's a thing

956

01:37:30,000 --> 01:37:36,360

um I brought up with my Bryce Abel interview
uh you know things like project Moon dust

957

01:37:36,360 --> 01:37:42,250

this is an actual documented unclassified
program that looked at things that have crashed

958

01:37:42,250 --> 01:37:48,630

that were unknown that either came from space
or came from a rival Nation um retrieve it

959

01:37:48,630 --> 01:37:53,650

collect Intelligence on it possibly reverse
engineer the technology you find um that is

960

01:37:53,650 --> 01:37:59,630

a prime example of a crash retrieval program
of things we don't know necessarily what they

961

01:37:59,630 --> 01:38:05,980

are so we do have to keep that in mind too
and even grush said it I'm not saying that

962

01:38:05,980 --> 01:38:12,190

this is piloted by aliens by any stretch of
the imagination I'm just saying these are

963

01:38:12,190 --> 01:38:19,060

things we don't know what they are where they
come from what time they come from even uh

964

01:38:19,060 --> 01:38:24,940

and stuff like that so yeah again so messy
so muddy but I think you're right we're this

965

01:38:24,940 --> 01:38:32,210

close um the fact that he's giving names and
program names and places uh is huge um if

966

01:38:32,210 --> 01:38:42,290

true and like we said if not true um this
guy's life is over yeah in my opinion all

967

01:38:42,290 --> 01:38:49,880

our lives are over if we're if we've all fallen
for this then we've fallen for it you know

968

01:38:49,880 --> 01:38:56,980

like come on like I'm not gonna kid myself
I I believe to a certain degree I hate the

969

01:38:56,980 --> 01:39:03,730

word belief but like you know I'm in this
for the long run I always have been and I

970

01:39:03,730 --> 01:39:08,730

I respect the fact that I'm in a beautiful
Community with a lot of good people that do

971

01:39:08,730 --> 01:39:15,000

a lot of good research and that's where I'm
at right now you know like Rush the stories

972

01:39:15,000 --> 01:39:21,660

that come out it all adds to this this thing
but one thing I will say is I think no matter

973

01:39:21,660 --> 01:39:26,790

what you think about UFO Twitter and all that
we're in a good community and I will always

974

01:39:26,790 --> 01:39:31,570

see the positives in that so just want to
give a shout out to all the good folk in there

975

01:39:31,570 --> 01:39:35,869

so yeah totally Man Without You for Twitter
I never would have met you I never would have

976

01:39:35,869 --> 01:39:42,469

met some of the beautiful brilliant people
I've come across and continue to um say what

977

01:39:42,469 --> 01:39:48,240

you will about UFO Twitter they're saying
there's a there's a toxic and uh corner of

978

01:39:48,240 --> 01:39:55,600

every Community um but we have found uh Common
Ground a lot of us have and um look if all

979

01:39:55,600 --> 01:40:01,480

of this turns out to be complete [h__\h]
or a disinformation campaign you know what

980

01:40:01,480 --> 01:40:08,280

we pick ourselves up and we continue on we
have exactly many times before I made some

981

01:40:08,280 --> 01:40:12,460

good friends along the way man that's all
the bads you know I got my brothers thank

982

01:40:12,460 --> 01:40:17,969

you and my sisters so Charlotte to all of
you guys shout out to all of you guys this

983

01:40:17,969 --> 01:40:24,610

is Vinnie and I signing your Collective yearbooks
upon graduation from the University we've

984

01:40:24,610 --> 01:40:32,380

made some friends along the way exactly sure
man um well here's a good friend of ours that

985

01:40:32,380 --> 01:40:39,080

we're gonna end our podcast highlights of
the week and that's Dr Diana Walsh

986

01:40:39,080 --> 01:40:42,860

amazing she wrote the forward to my new book
um she's coming out with a new book in the

987

01:40:42,860 --> 01:40:50,980

coming months I highly suggest everyone check
it out um but she was recently on the um Project

988

01:40:50,980 --> 01:40:57,960

Unity podcast and um she talked about the
different types of disclosures that were kind

989

01:40:57,960 --> 01:41:03,460

of seen play out now which I thought was interesting
um you know there's not just governmental

990

01:41:03,460 --> 01:41:07,719

disclosure and this ties into a lot of her
work with UFOs in religion so I'm gonna go

991

01:41:07,719 --> 01:41:11,630

ahead and play this clip and we're gonna we're
gonna start wrapping things up Vinnie sound

992

01:41:11,630 --> 01:41:19,290

good sounds perfect dude awesome there there
will be and there are ongoing different types

993

01:41:19,290 --> 01:41:26,489

of disclosures so when we see this um what's
happening right now I've also discussed it

994

01:41:26,489 --> 01:41:32,420

as a military type of disclosure but you know
there are also there there is a Vatican disclosure

995

01:41:32,420 --> 01:41:39,630

um but they're not gonna do press releases
you know it's not it's going to be this is

996

01:41:39,630 --> 01:41:45,880

this is not how the disclosure of you know
maybe other countries and other institutions

997

01:41:45,880 --> 01:41:51,860

like religious institutions it's you know
people who are interested need to be aware

998

01:41:51,860 --> 01:41:58,679

of that that the disclosure that they're expecting
it's going to take a different form for different

999

01:41:58,679 --> 01:42:06,040

institutions and everybody's excited about
this type of military disclosure or what you

1000

01:42:06,040 --> 01:42:13,320

know whatever they call it um you know because
it's it's a site of absolute contention right

1001

01:42:13,320 --> 01:42:20,280

now and um and I think that you know the things
that are going on quietly this isn't something

1002

01:42:20,280 --> 01:42:25,849

that I learned with working with Tyler D over
the years that I worked with them uh is this

1003

01:42:25,849 --> 01:42:32,610

idea that what's really happening is all the
the very important things that are happening

1004

01:42:32,610 --> 01:42:36,310

the changes that are that are being done they're going to be behind the scenes they're going

1005

01:42:36,310 --> 01:42:43,170

to be invisible almost you know except for those who can kind of see how to identify

1006

01:42:43,170 --> 01:42:46,219

and and I think that that's that's really important

1007

01:42:46,219 --> 01:43:00,070

well I like show over mic drop thanks everybody please subscribe um thank you Diana pasoka

1008

01:43:00,070 --> 01:43:06,710

just laying it down um the true disclosure happens behind the scenes um I will forever

1009

01:43:06,710 --> 01:43:13,820

now connect the word invisible with Diana paselka she uses it so eloquently and it just

1010

01:43:13,820 --> 01:43:21,320

it just conjures so many images in my my weird writer head but um yes military disclosure

1011

01:43:21,320 --> 01:43:28,770

uh versus true disclosure I guess um we've been saying it all night you've been saying

1012

01:43:28,770 --> 01:43:35,110

it I should say uh you know so much is going on in the background that we don't know about

1013

01:43:35,110 --> 01:43:41,510

um and we're probably going to get the very filtered version of that in the public eventually

1014

01:43:41,510 --> 01:43:47,170

um but yeah man I guess to kind of wrap things up what do you make of that that last clip

1015

01:43:47,170 --> 01:43:56,061

there from Project Unity and um what is disclosure to you I guess it's a very good question and

1016

01:43:56,061 --> 01:44:02,170

I think it evolves every time I get asked him you know yeah I I take an observation

1017

01:44:02,170 --> 01:44:07,369

of a clip like what we just saw from Diana is makes you think along hard and deep you

1018

01:44:07,369 --> 01:44:16,290

know we look we we always talk about you know disclosure is it a president or a prominent

1019

01:44:16,290 --> 01:44:22,219

figure standing up and talking to the population saying that we're being visited by a non-human

1020

01:44:22,219 --> 01:44:28,640

intelligence and you know we hear that buzzword nhi recently with David rush but then you

1021

01:44:28,640 --> 01:44:34,580

take you spend some time people looking at the conversations that Diana's had recently

1022

01:44:34,580 --> 01:44:43,020

and it throws up all so many big questions and so I don't have one answer I don't have

1023

01:44:43,020 --> 01:44:48,440

it I have some biases here and there but like oh my goodness like you know I've been lucky

1024

01:44:48,440 --> 01:44:55,690

enough to have a an interview with Diana and she Paints the picture that makes you think

1025

01:44:55,690 --> 01:45:02,801

long and hard about history and and maybe your own thoughts and biases about life in

1026

01:45:02,801 --> 01:45:09,199

general not just non-human intelligence but yeah we're ending on a big one there Ryan

1027

01:45:09,199 --> 01:45:17,880

man you really put me on the spot I know brother well hey um I had I had the pleasure of reading

1028

01:45:17,880 --> 01:45:27,110

her her upcoming book and um oof I haven't cried at a book I think since uh I read Cormac

1029

01:45:27,110 --> 01:45:33,980

McCarthy's the road um recipes for Mike McCarthy by the way okay that was the last time I cried

1030

01:45:33,980 --> 01:45:39,960

reading a book but I cried reading Diana's new book so wow I don't know if that's a a

1031

01:45:39,960 --> 01:45:47,219

testimonial or not but holy crap man she really she puts things into a profound perspective

1032

01:45:47,219 --> 01:45:53,360

in such an accessible way um so we're moving from rush hour to Diana pasoka our year it's

1033

01:45:53,360 --> 01:46:00,900

somewhere in the live stream um yes I I think a lot of what she said really keeps things

1034

01:46:00,900 --> 01:46:05,469

in perspective so I couldn't think of a better way to kind of uh to wrap things up here with

1035

01:46:05,469 --> 01:46:11,190

everything going on in the UFO Community amazing um yeah yeah amazing amazing work all around

1036

01:46:11,190 --> 01:46:15,770

thank you to all the podcasts who uh we pulled some clips from tonight thank you to Mike

1037

01:46:15,770 --> 01:46:21,219

over on Twitter um who puts a lot of these clips together um Vinnie and I were talking

1038

01:46:21,219 --> 01:46:28,380

off air about how awesome and essential his work is over there um making it easy for us

1039

01:46:28,380 --> 01:46:32,370

podcasters to kind of see what the highlights were from a lot of these interviews and there's

1040

01:46:32,370 --> 01:46:38,070

so many good podcasts and YouTube channels out there um and just not enough time for

1041

01:46:38,070 --> 01:46:42,920

everyone so that's kind of why I started doing this um it's it's awesome that Mike's doing

1042

01:46:42,920 --> 01:46:49,150

that so special shout out to him over on Twitter Mike colorgiano am I getting that correct

1043

01:46:49,150 --> 01:46:54,340

I think so I think Mike Holland jealous yeah okay awesome Mike thank you for all the hard

1044

01:46:54,340 --> 01:46:59,909

work you do brother we truly do appreciate
it but Vinnie you are just as comparatively

1045

01:46:59,909 --> 01:47:07,540

hard-working my friend and you have some amazing
events coming up so as we wrap things up here

1046

01:47:07,540 --> 01:47:12,520

tell us please a little about um these conferences
that you're going to be speaking at in the

1047

01:47:12,520 --> 01:47:19,480

coming months here in 2023 I think I'm missing
one too uh no I think you're good okay yeah

1048

01:47:19,480 --> 01:47:24,750

no it's good yeah yeah so in about two weeks
time I'm gonna be flying out to Roswell New

1049

01:47:24,750 --> 01:47:31,330

Mexico to talk at the Roswell incident so
myself and my good friend and colleague Dan

1050

01:47:31,330 --> 01:47:35,210

zetterstrom are going to be speaking about
the work that we've been doing in Colombia

1051

01:47:35,210 --> 01:47:40,210

for the last couple of years uh it's gonna
be an amazing presentation we're just about

1052

01:47:40,210 --> 01:47:46,639

to launch season three on the 29th of June
so we're gonna be uh you know doing a talk

1053

01:47:46,639 --> 01:47:54,070

and all that I then have like let's go from
July to October I have the the run of the

1054

01:47:54,070 --> 01:48:00,830

UK conference scene which is you know new to some degree post covid it's really picked

1055

01:48:00,830 --> 01:48:05,530

up back in here in the UK so that's really impressive I'm so glad that the conversation

1056

01:48:05,530 --> 01:48:10,520

is happening again back here in England uh but the big thing for me as well then to the

1057

01:48:10,520 --> 01:48:16,830

end of the year is the echo conference I am the uh honored to be the host of The Echo

1058

01:48:16,830 --> 01:48:24,409

Consortium for UAP studies and research in Paris France with Jacque Valley Christopher

1059

01:48:24,409 --> 01:48:30,480

melon avilobe for two days talk about kind of the science behind UAP it's going to be

1060

01:48:30,480 --> 01:48:36,270

a huge event so I'm going to be kind of on stage presenting all the guests in you know

1061

01:48:36,270 --> 01:48:41,179

introducing everyone and yeah so I guess that's it with everything I've got going on as well

1062

01:48:41,179 --> 01:48:48,190

with my own stuff with disclosure team and UAP media UK it's a busy end to 2023 I hope

1063

01:48:48,190 --> 01:48:53,440

you will all join us for the ride but Ryan thank you so much brother my pleasure man

1064

01:48:53,440 --> 01:49:01,230

and I do want to add um Vinnie just had an awesome interview uh with Kevin Day actually

1065

01:49:01,230 --> 01:49:06,610

who gave his thoughts on the grush thing and so much more so please go check out that interview

1066

01:49:06,610 --> 01:49:14,280

as well um love me some Kevin day uh he's just an awesome awesome dude um fighting the

1067

01:49:14,280 --> 01:49:17,870

good fight out there but Vinnie I'm Gonna Let You Go brother I'm gonna debrief with

1068

01:49:17,870 --> 01:49:23,610

the audience thank you so much for your time your insights tonight um and as always thank

1069

01:49:23,610 --> 01:49:29,360

you so so much for joining me on somewhere in the sky slash somewhere in the live stream

1070

01:49:29,360 --> 01:49:34,280

pleasure thank you guys so much it's been great all right my man have a great night

1071

01:49:34,280 --> 01:49:44,110

cheers all right guys again be sure to check out Vinnie at these events on your screen

1072

01:49:44,110 --> 01:49:50,640

right now um go over to his Twitter account and we will be sure to uh to link to everything

1073

01:49:50,640 --> 01:49:58,510

as well um so to debrief with you guys before we go here I have a episode of somewhere in

1074

01:49:58,510 --> 01:50:05,760

the skies podcast dropping in just a few hours
for you results of Roswell UFO crash site

1075

01:50:05,760 --> 01:50:11,139

materials with guests Frank Kimler he is a
geologist and Earth Science professor at the

1076

01:50:11,139 --> 01:50:18,320

uh the New Mexico Military Institute in Roswell
and he's found some very very interesting

1077

01:50:18,320 --> 01:50:24,250

fragments and medals out there in the Roswell
desert crash site um which I had the immense

1078

01:50:24,250 --> 01:50:31,020

pleasure of joining him with um joining with
him excuse me I'm two guinnesses in um and

1079

01:50:31,020 --> 01:50:35,980

uh yeah it was an awesome awesome conversation
I really hope you enjoy it and what better

1080

01:50:35,980 --> 01:50:41,800

time to talk about Crash retrieval fragments
then with what Avi lobe is doing with his

1081

01:50:41,800 --> 01:50:49,200

inter Interstellar Expedition and also with
this huge story of intact and partially intact

1082

01:50:49,200 --> 01:50:54,639

Allah fragments of possible UFO Craft um so
yeah check that out in just a couple hours

1083

01:50:54,639 --> 01:51:01,820

on your podcast feeds and premiering tomorrow
night on YouTube as well and um other than

1084

01:51:01,820 --> 01:51:06,020

that I want to make sure I'm not missing anything
oh please like subscribe all that good stuff

1085

01:51:06,020 --> 01:51:12,570

please do that um always appreciate that boosts
us up in the algorithms possibly gets us featured

1086

01:51:12,570 --> 01:51:18,889

on whatever podcast platforms or right here
on YouTube greatly greatly appreciate that

1087

01:51:18,889 --> 01:51:27,191

guys as well and um last and not least write
in review stories from somewhere in the sky

1088

01:51:27,191 --> 01:51:32,310

is my brand new book that just released um
if you can please head on over to Amazon and

1089

01:51:32,310 --> 01:51:37,260

write and review the book it truly does help
um the feedback I've had on the book has been

1090

01:51:37,260 --> 01:51:43,200

incredible um but again it wasn't a book written
by me it was written by the 50 people uh that

1091

01:51:43,200 --> 01:51:49,570

I chose to include their stories in the book
and I thank them uh immensely for that so

1092

01:51:49,570 --> 01:51:53,929

yeah check out stories from somewhere in the
skies available on Amazon right now in paperback

1093

01:51:53,929 --> 01:52:00,420

in ebook and soon hopefully audiobook as well
so that's all I got guys stay tuned for that

1094

01:52:00,420 --> 01:52:04,940

episode dropping in just a couple hours of
summer in the skies be sure to check out Vinnie

1095

01:52:04,940 --> 01:52:10,380

and disclosure team and everything he's got
going on over there and as always keep your

1096

01:52:10,380 --> 01:52:26,409

feet on the ground but never stop searching
somewhere in this guys have a good day [Music]

1097

01:52:26,409 --> 01:52:38,280

[Applause] [Music] [Applause]

1098

01:52:46,190 --> 01:52:42,230

[Music]
