

MATERIALS

1
00:00:36,500 --> 00:00:33,770
okay let's go back to the moon I

2
00:00:38,990 --> 00:00:36,510
mentioned any wrong possibility that

3
00:00:41,389 --> 00:00:39,000
this was totally in a musician 50,000

4
00:00:43,450 --> 00:00:41,399
years ago I understand but we have a

5
00:00:46,460 --> 00:00:43,460
look at some the evidence to show them

6
00:00:50,509 --> 00:00:46,470
you're familiar probably with Leah jet

7
00:00:54,280 --> 00:00:50,519
i'm john lyon for jaan liya we were very

8
00:00:57,619 --> 00:00:54,290
friendly with John back in the 99

9
00:01:02,390 --> 00:00:57,629
2001-2002 one of these George in doing

10
00:01:05,840 --> 00:01:02,400
quite well one of his jobs was to fly

11
00:01:08,780 --> 00:01:05,850
his father's his father something like

12
00:01:11,270 --> 00:01:08,790
that the Learjet and CIA used quality

13
00:01:14,990 --> 00:01:11,280

ratings jets quite regular and John was

14

00:01:17,810 --> 00:01:15,000

a pilot's arista pilot dcin guides

15

00:01:20,810 --> 00:01:17,820

everywhere and he was taller than one of

16

00:01:22,789 --> 00:01:20,820

the missions that the moon was told in

17

00:01:27,200 --> 00:01:22,799

position and that's where is interested

18

00:01:29,539 --> 00:01:27,210

you goes and how did he just prior to

19

00:01:32,179 --> 00:01:29,549

that we really got down to it and what

20

00:01:34,430 --> 00:01:32,189

we find out more so he was told that

21

00:01:37,160 --> 00:01:34,440

50,000 years ago is what he told us

22

00:01:39,140 --> 00:01:37,170

anyway they thought it was totally the

23

00:01:42,380 --> 00:01:39,150

position and they were involved with

24

00:01:45,580 --> 00:01:42,390

people remnants and people from those

25

00:01:49,760 --> 00:01:45,590

days they were involved in talks back in

26

00:01:53,030 --> 00:01:49,770

96 vomits this is sort of jackie was

27

00:01:59,210 --> 00:01:53,040

flying at a time they've improved now is

28

00:02:01,490 --> 00:01:59,220

about new ones the idea was and from

29

00:02:04,750 --> 00:02:01,500

what our work that the idea of the

30

00:02:09,740 --> 00:02:04,760

towing the moon in the position was that

31

00:02:13,550 --> 00:02:09,750

originally long before about 15-45

32

00:02:15,350 --> 00:02:13,560

15,000 years we were on planning ours

33

00:02:17,899 --> 00:02:15,360

that did this is a story that was told

34

00:02:22,270 --> 00:02:17,909

and we had because of an incoming

35

00:02:25,720 --> 00:02:22,280

asteroid the planet they assumed was go

36

00:02:28,630 --> 00:02:25,730

in the field wallet so the nearest

37

00:02:32,350 --> 00:02:28,640

planet removed to was Tara planet Earth

38

00:02:34,949 --> 00:02:32,360

and so steps were involved to bring us

39

00:02:39,340 --> 00:02:34,959

forward and that meant bringing in

40

00:02:42,190 --> 00:02:39,350

another stability shock of your life

41

00:02:43,690 --> 00:02:42,200

from they brought in welcomes the idea

42

00:02:45,940 --> 00:02:43,700

behind that it's a bit a very

43

00:02:48,250 --> 00:02:45,950

complicated story but I've got a lot of

44

00:02:52,030 --> 00:02:48,260

information on it together I can even a

45

00:02:53,830 --> 00:02:52,040

new so many future bike so just a little

46

00:02:56,560 --> 00:02:53,840

bit about John there so he give their

47

00:02:59,410 --> 00:02:56,570

backgrounds he flew 10 secret mission

48

00:03:04,360 --> 00:02:59,420

the CIA central South East Asia and

49

00:03:06,880 --> 00:03:04,370

South America 2066 83 he has MP world

50

00:03:10,690 --> 00:03:06,890

records including speed on the way the

51
00:03:13,000 --> 00:03:10,700
object 766 and he presented with this

52
00:03:16,600 --> 00:03:13,010
award for outstanding amateur from 68

53
00:03:19,630 --> 00:03:16,610
and Simmons walk wave memorial and he's

54
00:03:21,160 --> 00:03:19,640
the youngest another thing on his list

55
00:03:23,229 --> 00:03:21,170
was a young Muslim ranking playing the

56
00:03:26,319 --> 00:03:23,239
mac mall in Switzerland it's something I

57
00:03:28,810 --> 00:03:26,329
was wanted to do and the 1970s only

58
00:03:32,050 --> 00:03:28,820
stupidly light is come forward so he's

59
00:03:36,850 --> 00:03:32,060
going a checkered history and what a

60
00:03:41,069 --> 00:03:36,860
very dense character ready so that was

61
00:03:45,400 --> 00:03:41,079
his information from the CIA and the NSA

62
00:03:48,360 --> 00:03:45,410
hmm so looking at it that's going back

63
00:03:51,210 --> 00:03:48,370

much further now are not white

64

00:03:56,610 --> 00:03:51,220

we think this may be the case the other

65

00:03:58,199 --> 00:03:56,620

costs be a famous writer didn't talk the

66

00:04:01,860 --> 00:03:58,209

moon was better part of many other

67

00:04:06,720 --> 00:04:01,870

things and he got his information from

68

00:04:09,149 --> 00:04:06,730

various photonic sources play 500 BC and

69

00:04:11,660 --> 00:04:09,159

he taught him brought in one of his

70

00:04:14,309 --> 00:04:11,670

chapters in the book about this and

71

00:04:17,129 --> 00:04:14,319

Aristotle wrote that in a place in

72

00:04:20,699 --> 00:04:17,139

greased before in happy but how the

73

00:04:22,860 --> 00:04:20,709

insulin talking thousand 1200 BC had

74

00:04:26,120 --> 00:04:22,870

population leave people called my

75

00:04:28,860 --> 00:04:26,130

sergeants and the Aborigines who

76

00:04:31,080 --> 00:04:28,870

occupied this land before that there was

77

00:04:34,379 --> 00:04:31,090

a moon and that was recorded in their

78

00:04:37,230 --> 00:04:34,389

ancient texts they were living when I

79

00:04:39,930 --> 00:04:37,240

was a moon in the sky above the earth I

80

00:04:45,689 --> 00:04:39,940

think that was run about 10,000 years

81

00:04:48,300 --> 00:04:45,699

ago there's another famous person Greek

82

00:04:51,900 --> 00:04:48,310

paulius of roads he mentioned the time

83

00:04:55,969 --> 00:04:51,910

were not all the Australian have an

84

00:04:58,440 --> 00:04:55,979

amateur astronomer and then we have

85

00:05:03,750 --> 00:04:58,450

recorded information from these various

86

00:05:05,879 --> 00:05:03,760

racist Deucalion and then I and the

87

00:05:08,339 --> 00:05:05,889

Arcadians they said they dwelt on

88

00:05:11,279 --> 00:05:08,349

mountains and federal Macon's acorns

89

00:05:13,440 --> 00:05:11,289

before there was a woman so this you

90

00:05:16,890 --> 00:05:13,450

know what a variety of information that

91

00:05:19,469 --> 00:05:16,900

when she start the into it Opeth the

92

00:05:21,300 --> 00:05:19,479

things poet mentions the Arcadians that

93

00:05:24,020 --> 00:05:21,310

possess their land before the birth of

94

00:05:25,730 --> 00:05:24,030

job and the folk in all of them

95

00:05:31,219 --> 00:05:25,740

threatening for

96

00:05:33,080 --> 00:05:31,229

market so you know and in the Old

97

00:05:34,820 --> 00:05:33,090

Testament joke the ground near the water

98

00:05:37,550 --> 00:05:34,830

makes peace in the heights is praised

99

00:05:40,820 --> 00:05:37,560

and the Tigers mentioned before there

100

00:05:42,140 --> 00:05:40,830

was a movement he did not shine is this

101
00:05:44,029 --> 00:05:42,150
a number of incidents in the Old

102
00:05:46,909 --> 00:05:44,039
Testament labs mentioned there's also in

103
00:05:48,920 --> 00:05:46,919
some they always feared since a tiny

104
00:05:51,740 --> 00:05:48,930
sounded before the time the mood of

105
00:05:54,980 --> 00:05:51,750
generation of generation is so we're

106
00:05:58,490 --> 00:05:54,990
talking I think when I gathered from our

107
00:06:00,939 --> 00:05:58,500
from some years ago I be activists a few

108
00:06:07,820 --> 00:06:00,949
years you talking about 50,000 years ago

109
00:06:12,080 --> 00:06:07,830
when this was told in Indians of high

110
00:06:15,290 --> 00:06:12,090
ends in eastern columbia they also in

111
00:06:19,249 --> 00:06:15,300
their ancient text related tribals

112
00:06:21,790 --> 00:06:19,259
target organs ago altering the earliest

113
00:06:25,279 --> 00:06:21,800

times when moon is not yet in heaven

114

00:06:29,360 --> 00:06:25,289

once they recalled in their ancient war

115

00:06:31,640 --> 00:06:29,370

powers interesting and then he comes in

116

00:06:34,430 --> 00:06:31,650

all modern you probably heard dr. wolf

117

00:06:36,560 --> 00:06:34,440

and dr. Boylan yeah they're all dr.

118

00:06:39,050 --> 00:06:36,570

Klein is a very keen with you for

119

00:06:42,170 --> 00:06:39,060

follower I lost touch me for a few years

120

00:06:44,870 --> 00:06:42,180

now dr. wolf was an ass advising he died

121

00:06:48,800 --> 00:06:44,880

of cancer about six six seven years ago

122

00:06:50,420 --> 00:06:48,810

on he mentioned an extraterrestrial

123

00:06:55,100 --> 00:06:50,430

space speakin they

124

00:06:57,200 --> 00:06:55,110

more or less was retrieved from a US

125

00:07:01,190 --> 00:06:57,210

military spacecraft were brought back to

126

00:07:04,430 --> 00:07:01,200

earth in 1972 don't know if you know

127

00:07:07,370 --> 00:07:04,440

about that but he wolf declared that the

128

00:07:09,560 --> 00:07:07,380

movies artificial long ago decisions

129

00:07:11,420 --> 00:07:09,570

orbit by extraterrestrials and

130

00:07:14,120 --> 00:07:11,430

furthermore you confirmed to dr. world

131

00:07:16,970 --> 00:07:14,130

that there is an actor oscar all based

132

00:07:19,190 --> 00:07:16,980

on going and when wolf suggested it was

133

00:07:23,510 --> 00:07:19,200

on the dark side did not challenge that

134

00:07:25,130 --> 00:07:23,520

assumption the young the monolith is

135

00:07:27,470 --> 00:07:25,140

quite interesting we could it said that

136

00:07:30,320 --> 00:07:27,480

apparently according to dr. wolf the

137

00:07:33,350 --> 00:07:30,330

seven scientists work on and one of them

138

00:07:35,600 --> 00:07:33,360

was carl sagan cup of carlson was very

139

00:07:38,090 --> 00:07:35,610

quiet about it that Oh incidentally up

140

00:07:42,350 --> 00:07:38,100

all seven sizes died of cancer working

141

00:07:44,210 --> 00:07:42,360

on it's more the young thing it was so

142

00:07:48,280 --> 00:07:44,220

radiated they had to work underwater

143

00:07:51,170 --> 00:07:48,290

eventually but because in those days

144

00:07:55,640 --> 00:07:51,180

they weren't to health and safety wasn't

145

00:07:58,570 --> 00:07:55,650

that really inflated a but can never

146

00:08:01,730 --> 00:07:58,580

really mentioned too much he made a few

147

00:08:05,270 --> 00:08:01,740

snippets to it but I think he was trying

148

00:08:08,330 --> 00:08:05,280

to get his paws more series into being

149

00:08:10,940 --> 00:08:08,340

and he kept that very quiet the

150

00:08:13,820 --> 00:08:10,950

information we got this from dr. Wong so

151
00:08:17,000 --> 00:08:13,830
another interesting confirmation anyway

152
00:08:21,220 --> 00:08:17,010
if you like independent information and

153
00:08:26,510 --> 00:08:21,230
this is not one of it but this is one a

154
00:08:29,810 --> 00:08:26,520
radar telescopic images from one of the

155
00:08:32,649 --> 00:08:29,820
spacecraft drawn from look in the moon

156
00:08:35,949 --> 00:08:32,659
from about 19 390

157
00:08:40,029 --> 00:08:35,959
pretty of one of our books and this was

158
00:08:42,670 --> 00:08:40,039
seen if probably several hundred need to

159
00:08:45,670 --> 00:08:42,680
turn for what I gather but no one knows

160
00:08:49,059 --> 00:08:45,680
what it is no one has actually looked

161
00:08:51,309 --> 00:08:49,069
into it it's just a terrestrial image of

162
00:08:53,949 --> 00:08:51,319
the Moon taken from one of the massive

163
00:08:56,829 --> 00:08:53,959

speaker we did our right to them ask

164

00:08:58,780 --> 00:08:56,839

them for sleeping with NASA a base
