1
00:00:02,550 --> 00:00:01,510

point is

2
00:00:05,590 --> 00:00:02,560

rarely

3
00:00:07,590 --> 00:00:05,600

are these programs top driven i mean

4
00:00:09,669 --> 00:00:07,600

there's something compelling and

5
00:00:10,790 --> 00:00:09,679

therefore it comes down to long high

6
00:00:13,030 --> 00:00:10,800

it's a

7
00:00:15,030 --> 00:00:13,040

much more likely it's individuals who

8
00:00:17,510 --> 00:00:15,040

have personal interest and

9
00:00:20,550 --> 00:00:17,520

experience and push the

10
00:00:23,509 --> 00:00:20,560

noodle back up the chain of command

11
00:00:24,950 --> 00:00:23,519

and get to the point and

12
00:00:27,830 --> 00:00:24,960

this patient

13
00:00:29,750 --> 00:00:27,840

will get into funding and all that but

14

00:00:33,590 --> 00:00:29,760

you have to understand how the funding

15

00:00:35,990 --> 00:00:33,600

process works it's terribly very complex

16

00:00:38,069 --> 00:00:36,000

and you can move certain amounts of

17

00:00:39,990 --> 00:00:38,079

money around there are some

18

00:00:42,069 --> 00:00:40,000

discretionary funds

19

00:00:44,389 --> 00:00:42,079

but then there's funding thresholds as

20

00:00:46,790 --> 00:00:44,399

you get to bigger and bigger amounts

21

00:00:48,790 --> 00:00:46,800

then you've got to go to higher and

22

00:00:52,069 --> 00:00:48,800

higher levels and with that comes

23

00:00:53,910 --> 00:00:52,079

oversight and just becomes more

24

00:00:57,590 --> 00:00:53,920

difficult and

25

00:00:59,510 --> 00:00:57,600

more administratively restrictive

26
00:01:01,510 --> 00:00:59,520
so that makes sense that the smaller you

27
00:01:04,070 --> 00:01:01,520
can keep a program with the less people

28
00:01:05,590 --> 00:01:04,080
involved and the less budget required

29
00:01:07,030 --> 00:01:05,600
the less oversight you're going to have

30
00:01:09,670 --> 00:01:07,040
and the less eyes and ears you're going

31
00:01:11,670 --> 00:01:09,680
to have on the program so you can almost

32
00:01:13,590 --> 00:01:11,680
get it started but like you say keeping

33
00:01:15,350 --> 00:01:13,600
that progression going and securing that

34
00:01:17,030 --> 00:01:15,360
higher funding is much more difficult

35
00:01:19,109 --> 00:01:17,040
yeah

36
00:01:21,429 --> 00:01:19,119
um

37
00:01:23,590 --> 00:01:21,439
probably sounds like a lot but you can

38
00:01:24,950 --> 00:01:23,600

probably look about under 20 million

39

00:01:26,550 --> 00:01:24,960

dollars

40

00:01:29,749 --> 00:01:26,560

most of the time

41

00:01:31,830 --> 00:01:29,759

and find covers of those individuals

42

00:01:34,069 --> 00:01:31,840

uh seniors who were

43

00:01:38,149 --> 00:01:34,079

willing to allow someone if you remember

44

00:01:39,510 --> 00:01:38,159

the offset or atep program came in at 22

45

00:01:41,030 --> 00:01:39,520

million

46

00:01:43,350 --> 00:01:41,040

if you look at the remote viewing

47

00:01:46,069 --> 00:01:43,360

program that was kind of around 20

48

00:01:47,670 --> 00:01:46,079

million but that again once a program of
