

U.S. Department of Defense

DOD Office Moving Ahead in Mission  
to Identify 'Anomalous Phenomena'

THE

BREAKDOWN

1  
00:00:06,210 --> 00:00:04,190  
this is David Marler UFO researcher and

2  
00:00:11,150 --> 00:00:06,220  
you're listening to that UFO podcast

3  
00:00:15,890 --> 00:00:13,910  
everyone and welcome back to that UFO

4  
00:00:17,450 --> 00:00:15,900  
podcast I almost forgot the name of it

5  
00:00:20,090 --> 00:00:17,460  
there for a second I shouldn't read and

6  
00:00:22,250 --> 00:00:20,100  
speak at the same time it's a bit of an

7  
00:00:24,170 --> 00:00:22,260  
end of year breakdown and joining me for

8  
00:00:26,450 --> 00:00:24,180  
it as always to provide his expert

9  
00:00:28,370 --> 00:00:26,460  
analysis that's his own words I've got

10  
00:00:30,290 --> 00:00:28,380  
Dan Dan welcome back

11  
00:00:31,910 --> 00:00:30,300  
hello hello that was my own words

12  
00:00:34,790 --> 00:00:31,920  
actually read in a review that you wrote

13  
00:00:37,130 --> 00:00:34,800

for me so you know Ted fields

14

00:00:38,630 --> 00:00:37,140

I never wrote it I I checked it for a

15

00:00:39,830 --> 00:00:38,640

copy didn't I just to check this film is

16

00:00:40,549 --> 00:00:39,840

okay but yeah I think I've done it all

17

00:00:42,290 --> 00:00:40,559

right

18

00:00:44,150 --> 00:00:42,300

um listen I'm as you said earlier before

19

00:00:45,770 --> 00:00:44,160

we hit record I'm glad we delayed this

20

00:00:48,110 --> 00:00:45,780

one a few days because a few things have

21

00:00:50,029 --> 00:00:48,120

actually happened regarding the what we

22

00:00:53,150 --> 00:00:50,039

were going to lead with was a very short

23

00:00:54,709 --> 00:00:53,160

recap on the ndaa passing which we

24

00:00:56,930 --> 00:00:54,719

talked about previously on our breaking

25

00:00:59,990 --> 00:00:56,940

news podcast it's been the kind of main

26  
00:01:02,090 --> 00:01:00,000  
story on on the UFO social medias that

27  
00:01:03,770 --> 00:01:02,100  
the National Defense authorization act

28  
00:01:05,750 --> 00:01:03,780  
bill which is largely you know

29  
00:01:08,030 --> 00:01:05,760  
warmongering and other stuff

30  
00:01:10,670 --> 00:01:08,040  
um did have a section for UFO UAP

31  
00:01:12,770 --> 00:01:10,680  
language that was going to pass it has

32  
00:01:14,690 --> 00:01:12,780  
now officially been passed and it will

33  
00:01:15,770 --> 00:01:14,700  
basically get put into law in the coming

34  
00:01:18,230 --> 00:01:15,780  
days

35  
00:01:21,410 --> 00:01:18,240  
um if if past actions and Acts or

36  
00:01:23,330 --> 00:01:21,420  
anything to go by however there was a a

37  
00:01:24,950 --> 00:01:23,340  
bit of a carfuffle to use a classic

38  
00:01:29,929 --> 00:01:24,960

British phrase in the last couple of

39

00:01:31,550 --> 00:01:29,939

days and um the dod had uh well I'll be

40

00:01:34,249 --> 00:01:31,560

calling it I've seen it called uh media

41

00:01:36,050 --> 00:01:34,259

Roundtable a conference call you know um

42

00:01:37,730 --> 00:01:36,060

I'm not too sure what to actually call

43

00:01:40,730 --> 00:01:37,740

it then but what would you say they had

44

00:01:42,710 --> 00:01:40,740

media q a I would say this was the one

45

00:01:45,710 --> 00:01:42,720

time where using the word briefing was

46

00:01:47,929 --> 00:01:45,720

was absolutely on point uh I would say a

47

00:01:51,109 --> 00:01:47,939

phone telephone briefing

48

00:01:52,490 --> 00:01:51,119

yeah and what they've done was invite a

49

00:01:54,950 --> 00:01:52,500

selection of journalists from different

50

00:01:56,870 --> 00:01:54,960

Outlets including uh Chris sharp from

51  
00:01:58,490 --> 00:01:56,880  
laboration times was there you had John

52  
00:02:00,710 --> 00:01:58,500  
Greenwald from The Black Vault was there

53  
00:02:02,929 --> 00:02:00,720  
and some others that people may or may

54  
00:02:06,530 --> 00:02:02,939  
not know their names so

55  
00:02:07,490 --> 00:02:06,540  
Ross kiltart commented on this and I'm

56  
00:02:08,870 --> 00:02:07,500  
just going to start with this actually

57  
00:02:10,370 --> 00:02:08,880  
then because we've kept this format

58  
00:02:11,809 --> 00:02:10,380  
pretty close haven't we for updates but

59  
00:02:13,729 --> 00:02:11,819  
yeah yeah I found this the most

60  
00:02:16,850 --> 00:02:13,739  
entertaining at least update of all of

61  
00:02:19,790 --> 00:02:16,860  
them that Ross kotart mentioned that um

62  
00:02:22,610 --> 00:02:19,800  
so off the back of stand for better.org

63  
00:02:24,229 --> 00:02:22,620

they had mentioned that the dod

64

00:02:25,970 --> 00:02:24,239

and I'll just quote actually our

65

00:02:27,710 --> 00:02:25,980

official sources on Capitol Hill just

66

00:02:29,869 --> 00:02:27,720

confirmed that as of the end of business

67

00:02:31,790 --> 00:02:29,879

today uh that was a couple of days ago

68

00:02:33,410 --> 00:02:31,800

now so middle of December none of the

69

00:02:35,690 --> 00:02:33,420

congressional committees have received

70

00:02:38,449 --> 00:02:35,700

the pentagon's classified report on uaps

71

00:02:40,610 --> 00:02:38,459

UFOs that was due October 31st so

72

00:02:42,589 --> 00:02:40,620

Capitol Hill have said yep so that

73

00:02:44,690 --> 00:02:42,599

report that is rumored to maybe have

74

00:02:46,490 --> 00:02:44,700

been put out but still not released to

75

00:02:48,410 --> 00:02:46,500

the public Etc still hasn't been

76

00:02:49,850 --> 00:02:48,420

received by anyone so it's not been

77

00:02:52,190 --> 00:02:49,860

submitted

78

00:02:54,589 --> 00:02:52,200

um off the back of that Ross kulthat

79

00:02:56,869 --> 00:02:54,599

commented and again I've quote strange

80

00:02:59,330 --> 00:02:56,879

that the dod Arrow finds the time to

81

00:03:01,790 --> 00:02:59,340

allow some tightly limited media queues

82

00:03:05,330 --> 00:03:01,800

questions or new APS but it still hasn't

83

00:03:07,369 --> 00:03:05,340

explained why a statutorily required UAP

84

00:03:09,890 --> 00:03:07,379

accountability report is now weeks

85

00:03:11,990 --> 00:03:09,900

overdue and why a congress demanded it

86

00:03:14,509 --> 00:03:12,000

now that that demanded it now appears

87

00:03:16,250 --> 00:03:14,519

unconcerned uh hashtag controlling the

88

00:03:18,050 --> 00:03:16,260

narrative and you know what I think a

89

00:03:20,330 --> 00:03:18,060

lot of people would maybe Echo Roscoe

90

00:03:22,910 --> 00:03:20,340

tax sentiments to kick off Dan that

91

00:03:24,770 --> 00:03:22,920

as Congress that for a while seemed

92

00:03:26,690 --> 00:03:24,780

really to have the bit between their

93

00:03:29,449 --> 00:03:26,700

teeth for this and really to be

94

00:03:31,550 --> 00:03:29,459

aggressively pursuing this especially

95

00:03:33,949 --> 00:03:31,560

you know the representatives like

96

00:03:36,589 --> 00:03:33,959

Gallagher and such who are really on the

97

00:03:38,690 --> 00:03:36,599

ball in the Congressional hearing where

98

00:03:41,149 --> 00:03:38,700

they almost attacked multi Embry at

99

00:03:43,490 --> 00:03:41,159

times it appears on the public face of

100

00:03:44,570 --> 00:03:43,500

things I've taken a step back and they

101  
00:03:47,149 --> 00:03:44,580  
just aren't pursuing this as

102  
00:03:49,550 --> 00:03:47,159  
aggressively as happened before what

103  
00:03:51,410 --> 00:03:49,560  
what's your interview on this

104  
00:03:53,750 --> 00:03:51,420  
yeah I don't think that's wrong at all

105  
00:03:55,729 --> 00:03:53,760  
the the thing to remember here is the

106  
00:03:58,670 --> 00:03:55,739  
legislation that we've got coming in is

107  
00:04:00,410 --> 00:03:58,680  
allows a lot more leverage in terms of

108  
00:04:02,149 --> 00:04:00,420  
demanding that report can be produced

109  
00:04:03,589 --> 00:04:02,159  
sooner rather than later

110  
00:04:06,170 --> 00:04:03,599  
and

111  
00:04:08,030 --> 00:04:06,180  
so I feel like these officials were kind

112  
00:04:09,949 --> 00:04:08,040  
of treading water until this legislation

113  
00:04:12,710 --> 00:04:09,959

passes which you know it's past the

114

00:04:14,089 --> 00:04:12,720

house it's past the Congress now it goes

115

00:04:16,129 --> 00:04:14,099

to the president's desk I think it'll be

116

00:04:18,770 --> 00:04:16,139

signed around the 31st of December like

117

00:04:21,110 --> 00:04:18,780

it was last year but until that had

118

00:04:21,890 --> 00:04:21,120

passed they don't really have any you

119

00:04:23,749 --> 00:04:21,900

know

120

00:04:25,730 --> 00:04:23,759

tactics and prop channels they can

121

00:04:27,350 --> 00:04:25,740

strong on through as soon as that passes

122

00:04:28,969 --> 00:04:27,360

I bet we'll see them coming back again

123

00:04:30,230 --> 00:04:28,979

and kind of asking questions more

124

00:04:34,010 --> 00:04:30,240

publicly

125

00:04:36,050 --> 00:04:34,020

a lot in the ndaa as well was changed by

126

00:04:39,710 --> 00:04:36,060

people like Gallagher and folks like

127

00:04:41,390 --> 00:04:39,720

that so whilst they have been quiet they

128

00:04:44,030 --> 00:04:41,400

have been working behind the scenes as

129

00:04:45,650 --> 00:04:44,040

well so it's kind of you know swing

130

00:04:47,330 --> 00:04:45,660

swings around about I wish they were

131

00:04:49,370 --> 00:04:47,340

more vocal about it so that the media

132

00:04:50,749 --> 00:04:49,380

would talk about it more but at the same

133

00:04:53,930 --> 00:04:50,759

time

134

00:04:56,150 --> 00:04:53,940

now once this ndaa passes they they have

135

00:04:59,870 --> 00:04:56,160

a bit more that they can strong arm the

136

00:05:01,249 --> 00:04:59,880

report out of the organizations with

137

00:05:03,110 --> 00:05:01,259

so

138

00:05:05,330 --> 00:05:03,120

roughing off the top of my head here

139

00:05:06,890 --> 00:05:05,340

like any good host would do

140

00:05:08,270 --> 00:05:06,900

and that this is me asking you that's

141

00:05:09,830 --> 00:05:08,280

genuinely I'm not written this down and

142

00:05:11,210 --> 00:05:09,840

folkestan hasn't prepared an answer for

143

00:05:13,670 --> 00:05:11,220

this so he might go uh but you'll

144

00:05:16,010 --> 00:05:13,680

probably know was it almost premature

145

00:05:18,409 --> 00:05:16,020

then to have that report have a deadline

146

00:05:20,210 --> 00:05:18,419

of the 31st of October was that almost

147

00:05:22,370 --> 00:05:20,220

an aesthetic thing that that deadline

148

00:05:24,170 --> 00:05:22,380

was there because it's not really meant

149

00:05:26,450 --> 00:05:24,180

anything has it I mean you yourself then

150

00:05:31,450 --> 00:05:26,460

you had a lovely graphic and countdown

151  
00:05:35,510 --> 00:05:34,249  
yeah but it wasn't just just you that I

152  
00:05:37,070 --> 00:05:35,520  
mean you've done that because you

153  
00:05:39,350 --> 00:05:37,080  
counted down to a date that we all

154  
00:05:41,330 --> 00:05:39,360  
expected to have this report by you then

155  
00:05:42,890 --> 00:05:41,340  
had other really real thought of

156  
00:05:44,990 --> 00:05:42,900  
journalists and others reporting that

157  
00:05:46,610 --> 00:05:45,000  
there may be October surprises hinting

158  
00:05:49,129 --> 00:05:46,620  
at something big coming

159  
00:05:50,570 --> 00:05:49,139  
which I never and you saw as well we

160  
00:05:52,790 --> 00:05:50,580  
never had any hint of anything because

161  
00:05:54,129 --> 00:05:52,800  
there wasn't anything either was it but

162  
00:05:56,749 --> 00:05:54,139  
no

163  
00:05:57,710 --> 00:05:56,759

really ultimately meant yeah I mean

164

00:05:58,909 --> 00:05:57,720

there may have been something and

165

00:06:00,770 --> 00:05:58,919

nothing happened

166

00:06:02,629 --> 00:06:00,780

etc etc but yeah there was never

167

00:06:04,370 --> 00:06:02,639

anything like you know Sinister in the

168

00:06:06,050 --> 00:06:04,380

background that we heard of and it just

169

00:06:08,450 --> 00:06:06,060

seemed to be that it came and went so

170

00:06:10,969 --> 00:06:08,460

the date really meant nothing and there

171

00:06:13,070 --> 00:06:10,979

isn't any accountability

172

00:06:14,390 --> 00:06:13,080

I just wondered is there anything you

173

00:06:16,010 --> 00:06:14,400

think would be happening in the

174

00:06:17,870 --> 00:06:16,020

background that would

175

00:06:19,550 --> 00:06:17,880

maybe make sure this doesn't happen

176  
00:06:22,490 --> 00:06:19,560  
again or is it really going to be the

177  
00:06:24,529 --> 00:06:22,500  
case at the language put into this ndaa

178  
00:06:26,809 --> 00:06:24,539  
is like you say is going to strengthen

179  
00:06:28,610 --> 00:06:26,819  
the in future those deadlines actually

180  
00:06:32,150 --> 00:06:28,620  
mean something

181  
00:06:34,490 --> 00:06:32,160  
the the deadline was in the NDA for last

182  
00:06:38,390 --> 00:06:34,500  
year and if I remember correctly it was

183  
00:06:41,090 --> 00:06:38,400  
directed at either the uaptf or aoi MSG

184  
00:06:42,710 --> 00:06:41,100  
so on a technicality they can say well

185  
00:06:45,170 --> 00:06:42,720  
you know that deadline wasn't for Arrow

186  
00:06:47,930 --> 00:06:45,180  
therefore we didn't miss anything

187  
00:06:50,270 --> 00:06:47,940  
um in the briefing they were emphasizing

188  
00:06:51,770 --> 00:06:50,280

that Arrow was a new organization and

189

00:06:54,350 --> 00:06:51,780

they were just kind of start starting to

190

00:06:56,210 --> 00:06:54,360

find their fees so I I think that

191

00:06:57,950 --> 00:06:56,220

they're kind of leaning on the side of

192

00:06:59,870 --> 00:06:57,960

well we just haven't had time to look at

193

00:07:01,309 --> 00:06:59,880

this properly there were a few startling

194

00:07:02,930 --> 00:07:01,319

things in the briefing as well but they

195

00:07:04,390 --> 00:07:02,940

were saying that go for it

196

00:07:07,129 --> 00:07:04,400

um Arrow

197

00:07:09,950 --> 00:07:07,139

were kind of look re-looking of the data

198

00:07:11,870 --> 00:07:09,960

that uaptf had and and standardized in

199

00:07:13,730 --> 00:07:11,880

it and I found that quite Trucking

200

00:07:16,670 --> 00:07:13,740

actually because you know what the hell

201  
00:07:18,590 --> 00:07:16,680  
quite frankly have uaptf in it and aim

202  
00:07:20,029 --> 00:07:18,600  
to have been doing if they haven't been

203  
00:07:21,650 --> 00:07:20,039  
kind of looking at the data or

204  
00:07:24,830 --> 00:07:21,660  
formatting it properly and making a

205  
00:07:26,749 --> 00:07:24,840  
decent database at UAP encounters

206  
00:07:28,850 --> 00:07:26,759  
um it was surprising I'm glad that it's

207  
00:07:30,110 --> 00:07:28,860  
happened don't get me wrong but you know

208  
00:07:32,210 --> 00:07:30,120  
what have they been doing for the past

209  
00:07:33,770 --> 00:07:32,220  
two years

210  
00:07:35,629 --> 00:07:33,780  
but I think this is the thing that we've

211  
00:07:37,730 --> 00:07:35,639  
not really known and I also do

212  
00:07:39,110 --> 00:07:37,740  
understand and not to sound like I'm you

213  
00:07:40,730 --> 00:07:39,120

know sticking up for them or making

214

00:07:43,129 --> 00:07:40,740

excuses but we've discussed before

215

00:07:45,890 --> 00:07:43,139

haven't we that has not been plain

216

00:07:47,870 --> 00:07:45,900

sailing it's not as if uh a large team

217

00:07:49,010 --> 00:07:47,880

of people have been set up they've had a

218

00:07:50,689 --> 00:07:49,020

lot of really

219

00:07:51,770 --> 00:07:50,699

a lot of funding they've had a lot of

220

00:07:53,330 --> 00:07:51,780

time

221

00:07:55,010 --> 00:07:53,340

and there's been a lot of coming and

222

00:07:55,670 --> 00:07:55,020

going hasn't there as well

223

00:07:58,249 --> 00:07:55,680

um

224

00:07:59,390 --> 00:07:58,259

even just politically there always seems

225

00:08:00,710 --> 00:07:59,400

to have been something else has come up

226

00:08:02,809 --> 00:08:00,720

and well that may have been their jobs

227

00:08:04,370 --> 00:08:02,819

we don't even know that most of the

228

00:08:07,070 --> 00:08:04,380

folks who have been aligned to this at

229

00:08:09,950 --> 00:08:07,080

any one time have been working solely on

230

00:08:12,050 --> 00:08:09,960

this either so you know for example Dr

231

00:08:13,610 --> 00:08:12,060

Sean Kirkpatrick does he have other

232

00:08:15,469 --> 00:08:13,620

duties outside of this role at the

233

00:08:17,450 --> 00:08:15,479

moment but even then he's going to other

234

00:08:19,450 --> 00:08:17,460

people for information that might be

235

00:08:22,550 --> 00:08:19,460

caught up in all sorts of other things

236

00:08:24,350 --> 00:08:22,560

and well we want the UFO subject to be

237

00:08:26,570 --> 00:08:24,360

Forefront of everyone's mind there's

238

00:08:28,490 --> 00:08:26,580

been the pandemic there's been the war

239

00:08:30,350 --> 00:08:28,500

in Ukraine there's been you know Chinese

240

00:08:33,230 --> 00:08:30,360

spying all that kind of stuff that goes

241

00:08:35,990 --> 00:08:33,240

on and it just no doubt takes a massive

242

00:08:38,149 --> 00:08:36,000

step onto the back burner frustratingly

243

00:08:40,670 --> 00:08:38,159

doesn't it and all of that combined with

244

00:08:43,130 --> 00:08:40,680

red tape bureaucracy and just

245

00:08:45,230 --> 00:08:43,140

obfuscation that we know goes on

246

00:08:47,030 --> 00:08:45,240

makes it really really hard to get these

247

00:08:48,949 --> 00:08:47,040

things going without there being a

248

00:08:50,810 --> 00:08:48,959

consistent time period a consistent

249

00:08:52,910 --> 00:08:50,820

Department can consistency of people

250

00:08:54,290 --> 00:08:52,920

working on that to make sure the work's

251

00:08:55,910 --> 00:08:54,300

actually getting done and even the

252

00:08:58,550 --> 00:08:55,920

consistency of a mandate to make sure

253

00:09:01,009 --> 00:08:58,560

it's being taken seriously

254

00:09:02,930 --> 00:09:01,019

yeah I I think that's absolutely right

255

00:09:06,889 --> 00:09:02,940

um a lot of this is kind of innocuous

256

00:09:09,050 --> 00:09:06,899

just red tape like you say but hopefully

257

00:09:11,810 --> 00:09:09,060

going forward now

258

00:09:13,970 --> 00:09:11,820

Dr Sean Kirkpatrick will start having

259

00:09:15,590 --> 00:09:13,980

those reports ready on the October dates

260

00:09:18,710 --> 00:09:15,600

and things like that because dates are

261

00:09:20,150 --> 00:09:18,720

specified in this new ndaa and that that

262

00:09:23,570 --> 00:09:20,160

brief into me you know they didn't do

263

00:09:25,250 --> 00:09:23,580

that briefing with uaptf or aim talk so

264

00:09:27,530 --> 00:09:25,260

it's kind of starting off on the right

265

00:09:30,230 --> 00:09:27,540

foot as much as there was some you know

266

00:09:32,690 --> 00:09:30,240

kind of Brotherly Nadine from Moultrie

267

00:09:35,150 --> 00:09:32,700

uh to to Sean when he was kind of saying

268

00:09:37,430 --> 00:09:35,160

certain things uh for example Chris

269

00:09:40,070 --> 00:09:37,440

sharp asked about anomalous movements

270

00:09:41,810 --> 00:09:40,080

being recorded and Sean Kirkpatrick just

271

00:09:43,850 --> 00:09:41,820

straight up said yes yes we have cases

272

00:09:45,829 --> 00:09:43,860

of that at which point Moultrie jumped

273

00:09:48,230 --> 00:09:45,839

in and said oh yeah but Sean you know

274

00:09:50,210 --> 00:09:48,240

let's emphasize that these are Center

275

00:09:51,889 --> 00:09:50,220

errors and some other things and blah

276

00:09:53,570 --> 00:09:51,899

blah blah and it just felt a bit to me

277

00:09:54,590 --> 00:09:53,580

like uh you know strong arm in the

278

00:09:55,910 --> 00:09:54,600

direction you know when you get in

279

00:09:58,370 --> 00:09:55,920

trouble with your parents and your big

280

00:09:59,870 --> 00:09:58,380

uh bigger the older sibling is like no

281

00:10:01,310 --> 00:09:59,880

stick to this story don't don't tell

282

00:10:02,930 --> 00:10:01,320

them the real thing

283

00:10:04,850 --> 00:10:02,940

um it felt a little bit you see on that

284

00:10:07,070 --> 00:10:04,860

that was one that stood out to me

285

00:10:10,009 --> 00:10:07,080

because I would also find it fascinating

286

00:10:11,930 --> 00:10:10,019

or troubling that the nation with the

287

00:10:14,509 --> 00:10:11,940

biggest defense Budget on the planet you

288

00:10:16,850 --> 00:10:14,519

know trillions of dollars has these

289

00:10:19,970 --> 00:10:16,860

fantastic sensor systems that they keep

290

00:10:22,730 --> 00:10:19,980

classified so tightly that they're

291

00:10:24,470 --> 00:10:22,740

getting pretty basic errors it sounds

292

00:10:26,930 --> 00:10:24,480

like showing really strange and

293

00:10:28,610 --> 00:10:26,940

wonderful things when are these things

294

00:10:30,829 --> 00:10:28,620

not tracking missiles coming into the

295

00:10:33,470 --> 00:10:30,839

country tracking devices spying on the

296

00:10:35,570 --> 00:10:33,480

country you know tracking space debris

297

00:10:37,310 --> 00:10:35,580

satellites you know surely we hear about

298

00:10:39,650 --> 00:10:37,320

how wonderful that they can track a

299

00:10:41,210 --> 00:10:39,660

baseball from space you don't take a

300

00:10:44,090 --> 00:10:41,220

picture of it in a two foot by two foot

301  
00:10:45,769 --> 00:10:44,100  
box yeah it seemed to almost throw it

302  
00:10:48,230 --> 00:10:45,779  
out there as if yeah but it was almost

303  
00:10:50,509 --> 00:10:48,240  
commenting how glitchy their own

304  
00:10:51,829 --> 00:10:50,519  
technology is which I just I just don't

305  
00:10:54,350 --> 00:10:51,839  
buy that at all

306  
00:10:56,030 --> 00:10:54,360  
yeah you can understand if it was under

307  
00:10:57,829 --> 00:10:56,040  
testing you know when we're talking

308  
00:10:59,690 --> 00:10:57,839  
about those early encounters where they

309  
00:11:01,670 --> 00:10:59,700  
were seeing things and and you know

310  
00:11:04,370 --> 00:11:01,680  
Kevin Day says actually you know I reset

311  
00:11:06,350 --> 00:11:04,380  
my system I troubleshooted the system to

312  
00:11:08,630 --> 00:11:06,360  
check that it wasn't there and these

313  
00:11:10,790 --> 00:11:08,640

these uh

314

00:11:13,790 --> 00:11:10,800

readings kept showing up

315

00:11:16,009 --> 00:11:13,800

I I don't buy the the the sensors are

316

00:11:17,690 --> 00:11:16,019

messing up now you know that we're in

317

00:11:19,550 --> 00:11:17,700

you know probably the 8th 9th 10th

318

00:11:21,170 --> 00:11:19,560

Generation of these sensors fair enough

319

00:11:22,670 --> 00:11:21,180

you know I always like to think of these

320

00:11:24,050 --> 00:11:22,680

things like the iPhone

321

00:11:26,150 --> 00:11:24,060

um if it was iPhone one you'd expect

322

00:11:27,949 --> 00:11:26,160

bugs or iPhone 10 there are a lot less

323

00:11:29,269 --> 00:11:27,959

bugs there so if they're still

324

00:11:30,590 --> 00:11:29,279

encountering these things and they're

325

00:11:32,329 --> 00:11:30,600

still seeing them up there in the sky

326

00:11:34,610 --> 00:11:32,339

with these sensors that I would say that

327

00:11:36,730 --> 00:11:34,620

it's likely not sensor error that they

328

00:11:39,710 --> 00:11:36,740

as we like to say there's a there there

329

00:11:41,389 --> 00:11:39,720

which would explain what why you know

330

00:11:44,150 --> 00:11:41,399

this ndaa is having why there's

331

00:11:46,370 --> 00:11:44,160

Congressional interest factors they've

332

00:11:48,949 --> 00:11:46,380

lost security of this guys and that

333

00:11:51,889 --> 00:11:48,959

that's a big issue

334

00:11:55,009 --> 00:11:51,899

what else did out for you

335

00:11:57,590 --> 00:11:55,019

so there were a few things uh at one

336

00:11:59,990 --> 00:11:57,600

point they were talking about bringing

337

00:12:02,690 --> 00:12:00,000

in outside expertise to help design and

338

00:12:05,030 --> 00:12:02,700

deploy detection track capabilities uh

339

00:12:07,850 --> 00:12:05,040

by which they meant that they were

340

00:12:10,069 --> 00:12:07,860

gonna kind of recalibrate sensors

341

00:12:12,290 --> 00:12:10,079

um to match and this was the word that

342

00:12:13,910 --> 00:12:12,300

the term that they use patterns of life

343

00:12:16,790 --> 00:12:13,920

and signature characterization

344

00:12:19,069 --> 00:12:16,800

development now that could just mean

345

00:12:20,870 --> 00:12:19,079

that you know a whale gives off an

346

00:12:22,730 --> 00:12:20,880

electromagnetic signal therefore they

347

00:12:25,009 --> 00:12:22,740

know to identify a whale the patterns of

348

00:12:26,750 --> 00:12:25,019

life is certainly a provocative phrase

349

00:12:29,210 --> 00:12:26,760

there I think you know they could have

350

00:12:31,310 --> 00:12:29,220

said anything else uh so yeah sensors

351  
00:12:34,550 --> 00:12:31,320  
are being made that will

352  
00:12:36,769 --> 00:12:34,560  
specifically track UAP signatures then

353  
00:12:39,110 --> 00:12:36,779  
they differentiated from drones when

354  
00:12:40,490 --> 00:12:39,120  
they said that so you know let's put the

355  
00:12:42,650 --> 00:12:40,500  
Drone conversation aside because there's

356  
00:12:44,750 --> 00:12:42,660  
clearly something else here they also

357  
00:12:46,730 --> 00:12:44,760  
have so just on that just regarding the

358  
00:12:47,930 --> 00:12:46,740  
detecting UAP signatures in a couple of

359  
00:12:50,449 --> 00:12:47,940  
minutes we're going to touch on an

360  
00:12:51,829 --> 00:12:50,459  
article by the debrief's Chris plane

361  
00:12:53,629 --> 00:12:51,839  
um which will be in the description for

362  
00:12:55,069 --> 00:12:53,639  
the show as well which touches on

363  
00:12:56,750 --> 00:12:55,079

something like that which are an

364

00:12:58,790 --> 00:12:56,760

independent Think Tank because it put a

365

00:13:00,769 --> 00:12:58,800

paper forward for so that will tie in

366

00:13:02,449 --> 00:13:00,779

quite nicely but yeah sorry go on yeah

367

00:13:04,610 --> 00:13:02,459

absolutely

368

00:13:06,829 --> 00:13:04,620

um so yeah they they emphasize the

369

00:13:08,750 --> 00:13:06,839

reports is coming soon that there will

370

00:13:11,389 --> 00:13:08,760

be hundreds and hundreds more sightings

371

00:13:13,670 --> 00:13:11,399

and and you know reports since that may

372

00:13:15,889 --> 00:13:13,680

hearing as well

373

00:13:18,290 --> 00:13:15,899

they emphasize that they're set in a

374

00:13:19,990 --> 00:13:18,300

pretty clear mechanisms to identify Blue

375

00:13:23,569 --> 00:13:20,000

on Blue which basically means friendly

376

00:13:26,449 --> 00:13:23,579

uh kind of planes flying around these

377

00:13:28,610 --> 00:13:26,459

systems exist so as soon as a pilot

378

00:13:30,350 --> 00:13:28,620

report something they can identify

379

00:13:33,110 --> 00:13:30,360

probably within an hour or so the

380

00:13:35,509 --> 00:13:33,120

whether it belongs to the US it is

381

00:13:38,269 --> 00:13:35,519

black technology or whether it's someone

382

00:13:39,769 --> 00:13:38,279

else or something else

383

00:13:41,569 --> 00:13:39,779

as well as that

384

00:13:43,129 --> 00:13:41,579

we had Julian Barnes mentioned in space

385

00:13:45,410 --> 00:13:43,139

aliens again which have unrolled their

386

00:13:47,210 --> 00:13:45,420

eyes at just because even if you see

387

00:13:49,490 --> 00:13:47,220

something in the sky that does a 90

388

00:13:51,230 --> 00:13:49,500

degree turn all we can say is that that

389

00:13:53,269 --> 00:13:51,240

was something in the sky that did a 90

390

00:13:54,650 --> 00:13:53,279

degree turn without seeing the occupants

391

00:13:57,050 --> 00:13:54,660

and where it comes from and where it's

392

00:13:58,670 --> 00:13:57,060

going we can't say that it's an ET it's

393

00:14:01,370 --> 00:13:58,680

really hard to do that I understand the

394

00:14:03,530 --> 00:14:01,380

argument that uh you know we can derive

395

00:14:05,930 --> 00:14:03,540

a lot of information from those kind of

396

00:14:07,550 --> 00:14:05,940

movements but fact is all it says is

397

00:14:09,410 --> 00:14:07,560

there's a craft that can do 90 degree

398

00:14:11,269 --> 00:14:09,420

turns so

399

00:14:13,190 --> 00:14:11,279

it was

400

00:14:14,930 --> 00:14:13,200

frustrating to hear Julian talk about

401  
00:14:17,030 --> 00:14:14,940  
space aliens because I think it's up to

402  
00:14:19,910 --> 00:14:17,040  
it's up to science to come up with the

403  
00:14:22,269 --> 00:14:19,920  
fingerprints that will say that's E.T or

404  
00:14:24,710 --> 00:14:22,279  
that's life from elsewhere

405  
00:14:27,050 --> 00:14:24,720  
interestingly do you think he's still

406  
00:14:28,970 --> 00:14:27,060  
being disparaging because on the show

407  
00:14:32,090 --> 00:14:28,980  
that there were listeners as well who

408  
00:14:34,790 --> 00:14:32,100  
mentioned that he specifies space aliens

409  
00:14:36,590 --> 00:14:34,800  
because in terms of immigration they

410  
00:14:38,569 --> 00:14:36,600  
would use the term alien to talk about

411  
00:14:40,310 --> 00:14:38,579  
someone from another country coming in

412  
00:14:42,410 --> 00:14:40,320  
crossing a border that they shouldn't

413  
00:14:44,210 --> 00:14:42,420

like illegally illegally alien illegal

414

00:14:46,009 --> 00:14:44,220

immigration that sort of thing and

415

00:14:49,069 --> 00:14:46,019

people have mentioned that that's why he

416

00:14:50,810 --> 00:14:49,079

specifies specially in so often I took

417

00:14:53,210 --> 00:14:50,820

it I think like yourself though that is

418

00:14:55,910 --> 00:14:53,220

being more derogatory towards you know

419

00:14:57,889 --> 00:14:55,920

haha space aliens you know how

420

00:14:58,910 --> 00:14:57,899

ridiculous is this term to even have to

421

00:15:01,430 --> 00:14:58,920

say it

422

00:15:02,750 --> 00:15:01,440

um but do you get a feeling in a

423

00:15:04,910 --> 00:15:02,760

disparaging way

424

00:15:06,889 --> 00:15:04,920

yeah I think it's being disparaging and

425

00:15:09,290 --> 00:15:06,899

even even if he meant alien in that way

426

00:15:11,509 --> 00:15:09,300

that's still kind of gross you know when

427

00:15:13,009 --> 00:15:11,519

we hear about those stories people come

428

00:15:14,449 --> 00:15:13,019

across the channel and kind of searching

429

00:15:16,189 --> 00:15:14,459

out for a better life because they're

430

00:15:18,290 --> 00:15:16,199

seeking Asylum because genuinely their

431

00:15:20,449 --> 00:15:18,300

lives are under threat back home

432

00:15:22,790 --> 00:15:20,459

so kind of keep calling those people

433

00:15:25,009 --> 00:15:22,800

aliens and kind of it paints them as

434

00:15:27,230 --> 00:15:25,019

something other and it also kind of

435

00:15:28,970 --> 00:15:27,240

moves the conversation on to

436

00:15:30,170 --> 00:15:28,980

you know if we are being visited by

437

00:15:33,050 --> 00:15:30,180

something else there's an immigration

438

00:15:34,750 --> 00:15:33,060

conversation to have and I I know at

439

00:15:37,030 --> 00:15:34,760

some point that comes very District name

440

00:15:39,650 --> 00:15:37,040

yes

441

00:15:41,569 --> 00:15:39,660

it does and and it just puts a kind of

442

00:15:43,189 --> 00:15:41,579

tone onto the conversation I don't think

443

00:15:44,990 --> 00:15:43,199

we need right now

444

00:15:46,970 --> 00:15:45,000

just on that if anyone over the

445

00:15:48,710 --> 00:15:46,980

Christmas period is looking for some

446

00:15:52,129 --> 00:15:48,720

watching for a movie and they haven't

447

00:15:55,490 --> 00:15:52,139

seen it District 9 is a UFO movie with

448

00:15:57,530 --> 00:15:55,500

imagine independence day but instead of

449

00:16:00,170 --> 00:15:57,540

an invasion it's an immigration issue

450

00:16:01,850 --> 00:16:00,180

and that is very very well done I'm a

451  
00:16:03,410 --> 00:16:01,860  
big fan of that film and I think we are

452  
00:16:05,870 --> 00:16:03,420  
going to see a sequel to it many many

453  
00:16:07,310 --> 00:16:05,880  
years later uh so they're still meant to

454  
00:16:09,769 --> 00:16:07,320  
be coming out with that I believe

455  
00:16:13,009 --> 00:16:09,779  
this is all good Sci-Fi kind of just

456  
00:16:14,629 --> 00:16:13,019  
hangs the alien stuff on you know a

457  
00:16:16,610 --> 00:16:14,639  
framework that we get to discuss today

458  
00:16:19,189 --> 00:16:16,620  
and kind of a trap layout and District 9

459  
00:16:22,189 --> 00:16:19,199  
does that really really well

460  
00:16:23,449 --> 00:16:22,199  
uh just one of the last things just to

461  
00:16:26,810 --> 00:16:23,459  
mention from The Briefing is they spoke

462  
00:16:29,269 --> 00:16:26,820  
about the threat kind of narrative

463  
00:16:31,490 --> 00:16:29,279

um as well as

464

00:16:33,410 --> 00:16:31,500

them going back through Holdings and by

465

00:16:34,970 --> 00:16:33,420

Holdings they mean documents essentially

466

00:16:36,050 --> 00:16:34,980

of interviews and things like that that

467

00:16:38,269 --> 00:16:36,060

they have

468

00:16:41,389 --> 00:16:38,279

um just to kind of see if there were any

469

00:16:43,370 --> 00:16:41,399

programs before the dod was the dod uh

470

00:16:44,509 --> 00:16:43,380

that's very encouraging to hear it

471

00:16:46,069 --> 00:16:44,519

sounds like there's a lot to look

472

00:16:48,050 --> 00:16:46,079

through and it sounds like they've got

473

00:16:50,030 --> 00:16:48,060

their work cut out for them uh just

474

00:16:51,290 --> 00:16:50,040

looking through that without kind of

475

00:16:52,610 --> 00:16:51,300

saying oh this person said something

476

00:16:55,430 --> 00:16:52,620

interesting maybe we should get them in

477

00:16:57,170 --> 00:16:55,440

for a new interview so they've got the

478

00:16:59,870 --> 00:16:57,180

workout for them

479

00:17:02,329 --> 00:16:59,880

I'm feeling good after that briefing

480

00:17:04,789 --> 00:17:02,339

about it but I can't help but feeling

481

00:17:06,949 --> 00:17:04,799

that that briefing was to kind of calm

482

00:17:10,549 --> 00:17:06,959

the crowds that uh that are being for

483

00:17:14,630 --> 00:17:12,650

on that when we see some of these things

484

00:17:16,429 --> 00:17:14,640

talk about you know looking back looking

485

00:17:18,470 --> 00:17:16,439

at reports going back to the 40s

486

00:17:20,809 --> 00:17:18,480

incidents Casey's events potential

487

00:17:23,510 --> 00:17:20,819

evidence how much progress are we going

488

00:17:25,610 --> 00:17:23,520

to get to move this forward looking back

489

00:17:27,470 --> 00:17:25,620

and I don't mean weeks and months but

490

00:17:29,210 --> 00:17:27,480

going back years and years do you think

491

00:17:31,130 --> 00:17:29,220

a lot of this because that also includes

492

00:17:33,409 --> 00:17:31,140

looking back to see you know

493

00:17:35,630 --> 00:17:33,419

organizations or small departments that

494

00:17:38,690 --> 00:17:35,640

may have been active in the 60s 70s 80s

495

00:17:41,210 --> 00:17:38,700

90s you know for all we know there was

496

00:17:42,710 --> 00:17:41,220

something else during a tips time in a

497

00:17:44,690 --> 00:17:42,720

completely different part you know maybe

498

00:17:46,190 --> 00:17:44,700

in the Air Force or something that no

499

00:17:47,510 --> 00:17:46,200

one knew about that was never talked

500

00:17:49,130 --> 00:17:47,520

about that we still haven't heard of

501  
00:17:50,990 --> 00:17:49,140  
because that that could happen you know

502  
00:17:53,210 --> 00:17:51,000  
in 20 years time we find that out or

503  
00:17:56,450 --> 00:17:53,220  
something and I just wonder

504  
00:17:58,909 --> 00:17:56,460  
as the progress here going to be made by

505  
00:18:01,610 --> 00:17:58,919  
pushing forward and investigating

506  
00:18:06,770 --> 00:18:01,620  
or do you think they're still

507  
00:18:10,730 --> 00:18:08,450  
I I think there's a benefit in Merit

508  
00:18:12,590 --> 00:18:10,740  
going back and clearing up as much as we

509  
00:18:14,450 --> 00:18:12,600  
can to be honest that we I was having a

510  
00:18:16,310 --> 00:18:14,460  
conversation about Roswell uh with

511  
00:18:18,350 --> 00:18:16,320  
someone the other day we were saying

512  
00:18:20,570 --> 00:18:18,360  
it's really hard to prove it was because

513  
00:18:22,730 --> 00:18:20,580

Abby loab kind of disparaged the idea of

514

00:18:24,770 --> 00:18:22,740

Roswell and what happened and there was

515

00:18:25,850 --> 00:18:24,780

a discussion around that and we were

516

00:18:27,289 --> 00:18:25,860

just saying it's really difficult to

517

00:18:29,390 --> 00:18:27,299

prove what happened so much time has

518

00:18:31,130 --> 00:18:29,400

passed so much records have kind of gone

519

00:18:33,909 --> 00:18:31,140

awry you know we didn't have digital

520

00:18:37,190 --> 00:18:33,919

databases like we did now uh back then

521

00:18:38,210 --> 00:18:37,200

so going back and definitively being

522

00:18:41,390 --> 00:18:38,220

able to say okay there was something

523

00:18:44,810 --> 00:18:41,400

weird about Roswell internally uh will

524

00:18:46,850 --> 00:18:44,820

be beneficial however

525

00:18:48,650 --> 00:18:46,860

like you said you can't help but wonder

526

00:18:50,750 --> 00:18:48,660

if there's something else going on in

527

00:18:52,250 --> 00:18:50,760

the background and John Greenwald uh of

528

00:18:54,830 --> 00:18:52,260

The Black Vault actually got some

529

00:18:58,789 --> 00:18:54,840

reports via foia Dimension the shrekom

530

00:19:00,950 --> 00:18:58,799

organization uh known as so basically

531

00:19:02,870 --> 00:19:00,960

all along Lulu has always said there was

532

00:19:05,029 --> 00:19:02,880

something else going on before usap and

533

00:19:07,190 --> 00:19:05,039

besides atip and that something happened

534

00:19:08,330 --> 00:19:07,200

between Atif and the uapf there were a

535

00:19:11,270 --> 00:19:08,340

number of years there where it looked

536

00:19:13,010 --> 00:19:11,280

like it was blank but actually it

537

00:19:15,830 --> 00:19:13,020

appears mentioned by high-ranking

538

00:19:18,350 --> 00:19:15,840

officials in several documents that

539

00:19:22,789 --> 00:19:18,360

something called The Joint in Joint

540

00:19:23,630 --> 00:19:22,799

interagency Task Force j-i-a-t-f

541

00:19:25,810 --> 00:19:23,640

um

542

00:19:29,090 --> 00:19:25,820

was actually looking at UAP

543

00:19:30,710 --> 00:19:29,100

whilst uh all this was going on we don't

544

00:19:31,909 --> 00:19:30,720

know much about them the Pentagon said

545

00:19:34,549 --> 00:19:31,919

that it was

546

00:19:35,390 --> 00:19:34,559

an error that that wording was put on

547

00:19:37,850 --> 00:19:35,400

paper

548

00:19:39,529 --> 00:19:37,860

I don't believe them we were told

549

00:19:42,110 --> 00:19:39,539

something else existed we've now seen

550

00:19:44,870 --> 00:19:42,120

something else existed so I feel like

551  
00:19:46,850 --> 00:19:44,880  
arrow is almost a public face kind kind

552  
00:19:49,010 --> 00:19:46,860  
of like a blue book to a condom report

553  
00:19:51,350 --> 00:19:49,020  
you know uh the the real meat is being

554  
00:19:52,850 --> 00:19:51,360  
looked at elsewhere and I hope that as

555  
00:19:54,230 --> 00:19:52,860  
we go down the line they can be a bit

556  
00:19:55,909 --> 00:19:54,240  
more transparent about that because they

557  
00:19:58,070 --> 00:19:55,919  
said the word transparency a lot during

558  
00:20:00,830 --> 00:19:58,080  
that briefing and quite frankly there's

559  
00:20:02,810 --> 00:20:00,840  
work to do there for them

560  
00:20:04,909 --> 00:20:02,820  
and I think even if nothing else looking

561  
00:20:08,029 --> 00:20:04,919  
back on some of these organizations that

562  
00:20:10,669 --> 00:20:08,039  
pop up just gives more Credence to the

563  
00:20:12,529 --> 00:20:10,679

idea of the fact that there is something

564

00:20:14,630 --> 00:20:12,539

here worth investigating there is a

565

00:20:16,310 --> 00:20:14,640

there there as the common phrase is at

566

00:20:17,690 --> 00:20:16,320

the minute and it is very much worth

567

00:20:20,750 --> 00:20:17,700

kind of plugging forward with any

568

00:20:22,669 --> 00:20:20,760

efforts isn't it so yeah so the the ndaa

569

00:20:25,549 --> 00:20:22,679

has passed it's going to be signed into

570

00:20:27,950 --> 00:20:25,559

law and the UAP language is I think

571

00:20:30,350 --> 00:20:27,960

going to take up a a large part of what

572

00:20:32,450 --> 00:20:30,360

gets talked about in 2020 C and going

573

00:20:34,490 --> 00:20:32,460

forward hopefully as well and show some

574

00:20:37,010 --> 00:20:34,500

real progress within the UFO Topic at a

575

00:20:39,470 --> 00:20:37,020

political level fair to say

576  
00:20:40,730 --> 00:20:39,480  
yeah absolutely and just before we move

577  
00:20:42,710 --> 00:20:40,740  
on I'll just I've got a few bullet

578  
00:20:44,390 --> 00:20:42,720  
points to just recap the ndaa for people

579  
00:20:46,130 --> 00:20:44,400  
that might not know

580  
00:20:48,830 --> 00:20:46,140  
uh basically the language elevates the

581  
00:20:50,690 --> 00:20:48,840  
UFO office Arrow um saying that its

582  
00:20:52,730 --> 00:20:50,700  
leaders will report directly to the

583  
00:20:54,529 --> 00:20:52,740  
deputy secretary of defense and the

584  
00:20:56,630 --> 00:20:54,539  
principal deputy director of National

585  
00:20:58,789 --> 00:20:56,640  
Intelligence so they kind of LeapFrog in

586  
00:21:00,529 --> 00:20:58,799  
the dod but still including them

587  
00:21:02,810 --> 00:21:00,539  
a secure system will be set up for

588  
00:21:05,090 --> 00:21:02,820

anyone who used to work for or now works

589

00:21:07,549 --> 00:21:05,100

in a UAP related secure or special

590

00:21:10,250 --> 00:21:07,559

Access program that includes contractors

591

00:21:11,990 --> 00:21:10,260

so people like Bob Lazar this is their

592

00:21:13,010 --> 00:21:12,000

moment to come forward and start using

593

00:21:15,169 --> 00:21:13,020

this system

594

00:21:17,990 --> 00:21:15,179

that once the information is received

595

00:21:19,909 --> 00:21:18,000

into that system Arrow has 72 hours to

596

00:21:21,770 --> 00:21:19,919

notify Congress and all the Committees

597

00:21:24,049 --> 00:21:21,780

who are interested so there's a tick in

598

00:21:25,789 --> 00:21:24,059

Time Bomb on this as well now those

599

00:21:27,529 --> 00:21:25,799

submitting information will be protected

600

00:21:29,330 --> 00:21:27,539

from recourse and can even take legal

601  
00:21:30,590 --> 00:21:29,340  
action against anyone who takes action

602  
00:21:33,409 --> 00:21:30,600  
against them for submitting the

603  
00:21:35,870 --> 00:21:33,419  
information the scope of Arrow arose and

604  
00:21:37,370 --> 00:21:35,880  
it includes setting up a UAP response

605  
00:21:39,230 --> 00:21:37,380  
team and a science team which will work

606  
00:21:41,149 --> 00:21:39,240  
to exploit UFO materials and

607  
00:21:42,350 --> 00:21:41,159  
capabilities whether they just reports

608  
00:21:43,850 --> 00:21:42,360  
or crash retrievals they're going to be

609  
00:21:46,490 --> 00:21:43,860  
working on Technologies to replicate

610  
00:21:48,350 --> 00:21:46,500  
stuff we also have Arrow will be

611  
00:21:50,330 --> 00:21:48,360  
conducting a review

612  
00:21:52,010 --> 00:21:50,340  
of all the U.S governments and

613  
00:21:55,490 --> 00:21:52,020

intelligent communities involvement with

614

00:21:57,890 --> 00:21:55,500

UAP since 1945. that historical record

615

00:21:58,789 --> 00:21:57,900

we should see around September 2023 but

616

00:22:01,330 --> 00:21:58,799

you know what they're like with

617

00:22:05,690 --> 00:22:01,340

deadlines the UAP office will run until

618

00:22:07,549 --> 00:22:05,700

2026 2027 and the acronym of UAP has

619

00:22:10,010 --> 00:22:07,559

changed from unidentified aerial

620

00:22:12,649 --> 00:22:10,020

phenomena to an identified anomalous

621

00:22:14,870 --> 00:22:12,659

phenomena the definition of it Remains

622

00:22:17,210 --> 00:22:14,880

the Same but Moultrie did say that it

623

00:22:18,590 --> 00:22:17,220

kind of widens the net a bit so that

624

00:22:20,230 --> 00:22:18,600

instead of talking about just aerial

625

00:22:22,390 --> 00:22:20,240

phenomena they can now talk about

626

00:22:25,730 --> 00:22:22,400

submerged and

627

00:22:27,770 --> 00:22:25,740

space-bound objects I guess so it opens

628

00:22:28,730 --> 00:22:27,780

up a little bit so a really good step

629

00:22:31,310 --> 00:22:28,740

forward

630

00:22:32,690 --> 00:22:31,320

we won't really hear about those

631

00:22:37,190 --> 00:22:32,700

whistleblowers and I'm kind of doing

632

00:22:41,630 --> 00:22:39,230

but publicly and last

633

00:22:43,789 --> 00:22:41,640

Congressional officials deem it so but

634

00:22:45,590 --> 00:22:43,799

would you public reports every single

635

00:22:48,409 --> 00:22:45,600

year so hopefully the momentum just

636

00:22:53,090 --> 00:22:49,850

I would ask you one more thing then

637

00:22:55,610 --> 00:22:53,100

based on that if you could get one

638

00:22:57,529 --> 00:22:55,620

reasonably sensitive but not pushing a

639

00:22:59,570 --> 00:22:57,539

question answered at one of these things

640

00:23:01,370 --> 00:22:59,580

because you see a lot of debate on how

641

00:23:04,070 --> 00:23:01,380

good the quality of questions that were

642

00:23:05,390 --> 00:23:04,080

actually asked were and it's debatable

643

00:23:09,409 --> 00:23:05,400

um each is going to have their own

644

00:23:13,310 --> 00:23:11,810

I I would probably want to drill down on

645

00:23:14,630 --> 00:23:13,320

something because they keep saying we

646

00:23:16,130 --> 00:23:14,640

don't have anything off planet we don't

647

00:23:18,470 --> 00:23:16,140

have anything external we don't blah

648

00:23:21,049 --> 00:23:18,480

blah we know Congress has been briefed

649

00:23:23,750 --> 00:23:21,059

by certain people who have alluded to

650

00:23:26,210 --> 00:23:23,760

craft not made by human hands I think I

651  
00:23:27,950 --> 00:23:26,220  
would ask something around there just to

652  
00:23:29,210 --> 00:23:27,960  
kind of drill down on the detail there

653  
00:23:31,430 --> 00:23:29,220  
instead of letting them get away with

654  
00:23:33,169 --> 00:23:31,440  
saying no it's not ET uh you know

655  
00:23:34,370 --> 00:23:33,179  
emphasize well I'm not saying it's etm

656  
00:23:37,190 --> 00:23:34,380  
saying that there's something there

657  
00:23:39,950 --> 00:23:37,200  
let's open up so for example like they

658  
00:23:42,649 --> 00:23:39,960  
said uh we don't have any material

659  
00:23:44,390 --> 00:23:42,659  
that's from an unknown source

660  
00:23:46,010 --> 00:23:44,400  
I would want to ask okay so what

661  
00:23:48,350 --> 00:23:46,020  
material do you have from a known source

662  
00:23:50,570 --> 00:23:48,360  
and what was the source

663  
00:23:53,210 --> 00:23:50,580

it like all the kind of language games

664

00:23:56,149 --> 00:23:53,220

play with things if that makes sense

665

00:23:58,730 --> 00:23:56,159

yeah I think I would be asking because I

666

00:24:01,090 --> 00:23:58,740

think this would really narrow down on

667

00:24:04,250 --> 00:24:01,100

the idea of it being Chinese Russian us

668

00:24:06,529 --> 00:24:04,260

regarding the space-bound objects

669

00:24:08,029 --> 00:24:06,539

um can I two apart or one how far out

670

00:24:10,250 --> 00:24:08,039

are you tracking these objects coming

671

00:24:12,649 --> 00:24:10,260

from and also when you're tracking them

672

00:24:14,390 --> 00:24:12,659

leaving how far out can you track them

673

00:24:16,730 --> 00:24:14,400

and I just wonder you know because if

674

00:24:18,409 --> 00:24:16,740

it's China and Russia I get these things

675

00:24:20,630 --> 00:24:18,419

might be in orbit still you know their

676

00:24:22,070 --> 00:24:20,640

own drones and satellites but if these

677

00:24:24,470 --> 00:24:22,080

things are then flying off into the

678

00:24:26,210 --> 00:24:24,480

vastness of space you know

679

00:24:28,070 --> 00:24:26,220

that starts to eliminate possibilities

680

00:24:29,810 --> 00:24:28,080

so I would like to know that you know

681

00:24:31,669 --> 00:24:29,820

the actual tracking of it how far these

682

00:24:33,409 --> 00:24:31,679

things are found coming in from and how

683

00:24:35,210 --> 00:24:33,419

far they go out do they get to a point

684

00:24:37,370 --> 00:24:35,220

where I think I asked Lou a similar

685

00:24:40,010 --> 00:24:37,380

question on one of the low interviews

686

00:24:42,049 --> 00:24:40,020

Lou Elizondo and uh he couldn't really

687

00:24:43,070 --> 00:24:42,059

answer and I think that's something I

688

00:24:45,289 --> 00:24:43,080

would love to know like if you're

689

00:24:46,909 --> 00:24:45,299

tracking these things going out do you

690

00:24:48,169 --> 00:24:46,919

have a limitation as to how far you can

691

00:24:50,390 --> 00:24:48,179

track them we know they get tracked

692

00:24:52,310 --> 00:24:50,400

underwater and people say well at the

693

00:24:54,350 --> 00:24:52,320

speed of sound are faster that's because

694

00:24:56,090 --> 00:24:54,360

of the limitations of the equipment we

695

00:24:57,890 --> 00:24:56,100

use can only track things at a certain

696

00:25:00,230 --> 00:24:57,900

speed something could be going 50 000

697

00:25:02,090 --> 00:25:00,240

males an hour under water but the the

698

00:25:04,669 --> 00:25:02,100

radar or sonar used to track it only

699

00:25:05,930 --> 00:25:04,679

tracked up to 2 000 miles an hour so you

700

00:25:08,330 --> 00:25:05,940

know you wouldn't actually know the true

701  
00:25:09,649 --> 00:25:08,340  
speed of it potentially so yeah I would

702  
00:25:12,230 --> 00:25:09,659  
love to know something around the space

703  
00:25:13,789 --> 00:25:12,240  
Space Bound stuff that interests me you

704  
00:25:15,590 --> 00:25:13,799  
you could push that as well if you got

705  
00:25:17,570 --> 00:25:15,600  
foot some follow-ups because like we

706  
00:25:19,789 --> 00:25:17,580  
know for example to go back to Kevin day

707  
00:25:21,470 --> 00:25:19,799  
he said I think it was 80 000 feet that

708  
00:25:23,330 --> 00:25:21,480  
that radar went up to when they saw them

709  
00:25:25,789 --> 00:25:23,340  
coming from that ceiling 80 yeah yeah

710  
00:25:28,370 --> 00:25:25,799  
eight thousand yeah I wonder how far

711  
00:25:30,529 --> 00:25:28,380  
someone like Lou could go in terms of

712  
00:25:32,690 --> 00:25:30,539  
you know the the hype that they attract

713  
00:25:34,190 --> 00:25:32,700

at uh before it becomes a conversation

714

00:25:35,870 --> 00:25:34,200

about space and he goes nope we can't

715

00:25:37,610 --> 00:25:35,880

talk about space that's classified you

716

00:25:39,590 --> 00:25:37,620

know we can kind of really push up to

717

00:25:42,169 --> 00:25:39,600

that line to kind of go are they

718

00:25:43,909 --> 00:25:42,179

pretending they're from space or is it

719

00:25:45,590 --> 00:25:43,919

coming from high enough that you're

720

00:25:46,190 --> 00:25:45,600

convinced that it's from deep space you

721

00:25:47,990 --> 00:25:46,200

know

722

00:25:50,090 --> 00:25:48,000

absolutely because no doubt you'll get

723

00:25:51,830 --> 00:25:50,100

proper I mean I don't know do you get

724

00:25:54,529 --> 00:25:51,840

hyped Geeks you know where you get the

725

00:25:55,909 --> 00:25:54,539

ionosphere atmosphere that as a

726

00:25:57,409 --> 00:25:55,919

aerosphere and there's all those

727

00:25:59,330 --> 00:25:57,419

different layers of the sphere yes

728

00:26:00,890 --> 00:25:59,340

before you go into orbit and space and

729

00:26:02,450 --> 00:26:00,900

I'm sure there would be well we've got

730

00:26:04,190 --> 00:26:02,460

technology for this level but then we've

731

00:26:06,529 --> 00:26:04,200

got technology for this level but then

732

00:26:08,029 --> 00:26:06,539

we have technology first orbit and then

733

00:26:09,590 --> 00:26:08,039

yeah but that's orbit what about further

734

00:26:11,630 --> 00:26:09,600

afield can you get to the moon can you

735

00:26:13,310 --> 00:26:11,640

go past them and do you have to so that

736

00:26:15,350 --> 00:26:13,320

I think for me would eliminate a lot of

737

00:26:16,970 --> 00:26:15,360

questions if you could find out that I

738

00:26:18,830 --> 00:26:16,980

mean if you want to get really weird

739

00:26:20,630 --> 00:26:18,840

with it but you know well we get these

740

00:26:22,490 --> 00:26:20,640

things coming from but as far as Mars

741

00:26:24,649 --> 00:26:22,500

for example not to say they're coming

742

00:26:26,269 --> 00:26:24,659

from there but that that eliminates you

743

00:26:29,149 --> 00:26:26,279

know we've got Russian drones coming

744

00:26:33,169 --> 00:26:29,159

from Mars because yeah

745

00:26:37,669 --> 00:26:35,990

um but listen let's go into uh yeah the

746

00:26:38,810 --> 00:26:37,679

red planet very good I like that yeah

747

00:26:40,730 --> 00:26:38,820

very good

748

00:26:42,830 --> 00:26:40,740

um a couple of debrief articles are

749

00:26:44,450 --> 00:26:42,840

definitely worth uh touching on um I'll

750

00:26:47,210 --> 00:26:44,460

put the links for all of them in the

751  
00:26:49,549 --> 00:26:47,220  
description but we mentioned earlier the

752  
00:26:52,070 --> 00:26:49,559  
ways to detect spacecraft being looked

753  
00:26:54,950 --> 00:26:52,080  
at or wasted a track detect UAP was the

754  
00:26:57,169 --> 00:26:54,960  
language in the ndaa and Motrin and

755  
00:26:59,029 --> 00:26:57,179  
Cobra talking about and the Christopher

756  
00:27:00,289 --> 00:26:59,039  
plane over at the debrief who's been on

757  
00:27:02,570 --> 00:27:00,299  
the podcast before always worth

758  
00:27:04,430 --> 00:27:02,580  
listening to and reading his stuff talks

759  
00:27:05,930 --> 00:27:04,440  
about recently the I've got the wrong

760  
00:27:07,310 --> 00:27:05,940  
article up there I've got the wrong

761  
00:27:09,230 --> 00:27:07,320  
article up there there we go there's

762  
00:27:10,730 --> 00:27:09,240  
three I just want to touch on one of

763  
00:27:12,649 --> 00:27:10,740

them from Chris playing is headlined

764

00:27:14,510 --> 00:27:12,659

physics Think Tank proposes method for

765

00:27:17,090 --> 00:27:14,520

detecting extraterrestrial spacecraft

766

00:27:18,470 --> 00:27:17,100

using gravitational waves

767

00:27:19,850 --> 00:27:18,480

um and the first part is basically an

768

00:27:22,250 --> 00:27:19,860

international team of scientists has

769

00:27:24,350 --> 00:27:22,260

written a paper outlining how Humanity

770

00:27:26,510 --> 00:27:24,360

could detect ET spacecraft using

771

00:27:28,789 --> 00:27:26,520

gravitational waves it was a think tank

772

00:27:30,649 --> 00:27:28,799

called Applied Physics which has over 30

773

00:27:32,810 --> 00:27:30,659

member scientists from around the globe

774

00:27:35,090 --> 00:27:32,820

basically talking about how look looking

775

00:27:37,490 --> 00:27:35,100

at gravitational waves within the Milky

776

00:27:39,590 --> 00:27:37,500

Way galaxy we could find that these

777

00:27:41,690 --> 00:27:39,600

Ripples and work out whether they were

778

00:27:43,370 --> 00:27:41,700

caused by some kind of craft moving

779

00:27:44,450 --> 00:27:43,380

through and I just wondered do you think

780

00:27:46,070 --> 00:27:44,460

that would be useful for even

781

00:27:48,710 --> 00:27:46,080

potentially searching a bit closer to

782

00:27:51,529 --> 00:27:48,720

home thinking of whenever people myself

783

00:27:52,909 --> 00:27:51,539

or others speak to Avi loib he he talks

784

00:27:54,590 --> 00:27:52,919

about using telescopes and different

785

00:27:55,310 --> 00:27:54,600

equipment the potential look at these

786

00:27:57,350 --> 00:27:55,320

things

787

00:27:59,870 --> 00:27:57,360

our gravitational wave something that we

788

00:28:02,330 --> 00:27:59,880

could use in our own orbit and our own

789

00:28:03,890 --> 00:28:02,340

atmosphere to detect if a craft has been

790

00:28:05,690 --> 00:28:03,900

there thinking of the Tic Tac for

791

00:28:07,430 --> 00:28:05,700

example

792

00:28:10,250 --> 00:28:07,440

yeah absolutely

793

00:28:12,110 --> 00:28:10,260

um the the stuff that we have now it's

794

00:28:13,549 --> 00:28:12,120

very kind of specific band of

795

00:28:14,930 --> 00:28:13,559

gravitational waves you know these

796

00:28:17,570 --> 00:28:14,940

things are very

797

00:28:19,130 --> 00:28:17,580

very hard to detect uh which is why you

798

00:28:20,810 --> 00:28:19,140

know turn the clock back 50 news it was

799

00:28:23,630 --> 00:28:20,820

a Sci-Fi concept that no one believed in

800

00:28:25,730 --> 00:28:23,640

then we detected the first one

801  
00:28:28,730 --> 00:28:25,740  
it would be a really clever way I think

802  
00:28:32,930 --> 00:28:28,740  
to to track things using gravitational

803  
00:28:34,310 --> 00:28:32,940  
based propulsion but also uh I I read uh

804  
00:28:36,590 --> 00:28:34,320  
I finished the second book in the

805  
00:28:38,810 --> 00:28:36,600  
three-party problem series

806  
00:28:40,430 --> 00:28:38,820  
um or it's called the remembrance of

807  
00:28:41,510 --> 00:28:40,440  
Earth's past series but I wish they

808  
00:28:42,649 --> 00:28:41,520  
would just change the name because we

809  
00:28:44,090 --> 00:28:42,659  
all call it

810  
00:28:45,830 --> 00:28:44,100  
anyway

811  
00:28:48,049 --> 00:28:45,840  
um but yeah in the second book they

812  
00:28:51,049 --> 00:28:48,059  
actually they they build a gravitational

813  
00:28:53,750 --> 00:28:51,059

uh wave transmitter then the whole idea

814

00:28:56,390 --> 00:28:53,760

being that it takes such a level of

815

00:28:57,470 --> 00:28:56,400

advancement to do that that anyone that

816

00:28:59,510 --> 00:28:57,480

you could potentially find to

817

00:29:02,029 --> 00:28:59,520

communicate that could read it would be

818

00:29:03,830 --> 00:29:02,039

a specific level of advancement as well

819

00:29:05,450 --> 00:29:03,840

therefore you could expect to have a

820

00:29:06,890 --> 00:29:05,460

decent conversation with another form of

821

00:29:09,409 --> 00:29:06,900

life out there if you could do so

822

00:29:11,450 --> 00:29:09,419

through gravitational wave

823

00:29:14,630 --> 00:29:11,460

it would be really interesting if that's

824

00:29:17,090 --> 00:29:14,640

what we found and we've got ahead of us

825

00:29:19,490 --> 00:29:17,100

something called Lisa as well which is

826  
00:29:22,310 --> 00:29:19,500  
at the moment the the detector we have

827  
00:29:24,769 --> 00:29:22,320  
ligo is is fairly big and it's just

828  
00:29:26,570 --> 00:29:24,779  
based uh so it can only pick up things a

829  
00:29:28,250 --> 00:29:26,580  
bit of a certain frequency however we're

830  
00:29:30,590 --> 00:29:28,260  
building one that is a constellation of

831  
00:29:32,810 --> 00:29:30,600  
satellites in space around Earth

832  
00:29:34,850 --> 00:29:32,820  
that will orbit Earth and they will be

833  
00:29:36,889 --> 00:29:34,860  
able to pick up even more subtle kind of

834  
00:29:38,630 --> 00:29:36,899  
gravitational wave signals so like you

835  
00:29:40,250 --> 00:29:38,640  
say we might set that up and go hold on

836  
00:29:43,190 --> 00:29:40,260  
something's making a gravitational wave

837  
00:29:44,990 --> 00:29:43,200  
signal on Earth that's weird let's see

838  
00:29:47,090 --> 00:29:45,000

what that is and we might find that it's

839

00:29:49,010 --> 00:29:47,100

you know a UAP a UFO or something like

840

00:29:51,590 --> 00:29:49,020

that it would have been awesome to have

841

00:29:54,169 --> 00:29:51,600

a gravitational wave detector just near

842

00:29:56,510 --> 00:29:54,179

the Nimitz just to see if that's what it

843

00:29:59,510 --> 00:29:56,520

was given off because you would expect

844

00:30:01,269 --> 00:29:59,520

you know a black hole going Supernova or

845

00:30:04,909 --> 00:30:01,279

sorry something going Supernova way way

846

00:30:06,350 --> 00:30:04,919

and producing a gravitational wave the

847

00:30:07,430 --> 00:30:06,360

reason we can detect it is because it's

848

00:30:09,350 --> 00:30:07,440

so powerful

849

00:30:11,810 --> 00:30:09,360

but everything creates gravitational

850

00:30:14,029 --> 00:30:11,820

waves you know we do is we move it's

851

00:30:15,409 --> 00:30:14,039

just that there's so much less uh

852

00:30:17,090 --> 00:30:15,419

intense than the ones we've been

853

00:30:19,909 --> 00:30:17,100

detected So eventually we'll be able to

854

00:30:23,269 --> 00:30:19,919

detect things that are real subtle uh

855

00:30:25,549 --> 00:30:23,279

and yeah I think once we get there if

856

00:30:28,190 --> 00:30:25,559

anything is using propulsion it will be

857

00:30:30,370 --> 00:30:28,200

a real kind of nice simple sensor to

858

00:30:33,470 --> 00:30:30,380

pick something like that up

859

00:30:35,990 --> 00:30:33,480

Crest plane has another article uh that

860

00:30:38,450 --> 00:30:36,000

was um December 16th we record this on

861

00:30:40,430 --> 00:30:38,460

Sunday the 18th and it was the case for

862

00:30:42,950 --> 00:30:40,440

alien life elevated by the exciting

863

00:30:44,510 --> 00:30:42,960

first ever confirmation of two exoplanet

864

00:30:46,970 --> 00:30:44,520

water worlds and this was the University

865

00:30:50,149 --> 00:30:46,980

of Montreal researchers have confirmed

866

00:30:52,250 --> 00:30:50,159

two exoplanets uh twins about 1.9 times

867

00:30:54,889 --> 00:30:52,260

the size of Earth potentially and

868

00:30:56,510 --> 00:30:54,899

they've been categorized as water worlds

869

00:30:58,549 --> 00:30:56,520

um but the James Webb Telescope will be

870

00:31:01,490 --> 00:30:58,559

focused on these and that won't be

871

00:31:03,049 --> 00:31:01,500

confirmed until sometime next year and

872

00:31:04,490 --> 00:31:03,059

again that link will be in there for

873

00:31:06,830 --> 00:31:04,500

folks to go and have a look at I always

874

00:31:09,669 --> 00:31:06,840

find this stuff really interesting for

875

00:31:12,049 --> 00:31:09,679

you Dan when you see us looking at

876

00:31:15,289 --> 00:31:12,059

U.S Congress and government talking

877

00:31:16,549 --> 00:31:15,299

about trying to detect UAP even though

878

00:31:18,169 --> 00:31:16,559

they're not necessarily looking for

879

00:31:20,750 --> 00:31:18,179

alien craft they're just trying to find

880

00:31:23,570 --> 00:31:20,760

work out what these are and that does

881

00:31:25,850 --> 00:31:23,580

include foreign adversarial technology I

882

00:31:28,070 --> 00:31:25,860

wonder when you see

883

00:31:30,049 --> 00:31:28,080

articles like that on the debrief do you

884

00:31:32,389 --> 00:31:30,059

think we're going to get

885

00:31:34,669 --> 00:31:32,399

that looking further afield to other

886

00:31:37,190 --> 00:31:34,679

planets being our first confirmation of

887

00:31:38,870 --> 00:31:37,200

other life or do you think we're going

888

00:31:40,510 --> 00:31:38,880

to still potentially get it closer to

889

00:31:43,970 --> 00:31:40,520

home

890

00:31:45,590 --> 00:31:43,980

I I kind of see that it comes at the

891

00:31:49,130 --> 00:31:45,600

same time all these things are feeding

892

00:31:50,630 --> 00:31:49,140

each other uh you know I think it was I

893

00:31:52,610 --> 00:31:50,640

want to say like five to ten years ago

894

00:31:53,690 --> 00:31:52,620

we thought there were no exoplanets uh

895

00:31:55,010 --> 00:31:53,700

there was even a point where we thought

896

00:31:57,350 --> 00:31:55,020

they weren't even meteors but

897

00:31:58,490 --> 00:31:57,360

everything's kind of caught up now and I

898

00:32:01,750 --> 00:31:58,500

think the most recent counts of

899

00:32:04,970 --> 00:32:01,760

exoplanets were

900

00:32:07,130 --> 00:32:04,980

5227. uh with 9 000 more candidates to

901  
00:32:08,690 --> 00:32:07,140  
look at so the more we look the more

902  
00:32:11,330 --> 00:32:08,700  
planets we're finding that could support

903  
00:32:13,370 --> 00:32:11,340  
life whilst we're kind of come into

904  
00:32:15,769 --> 00:32:13,380  
terms with the idea that something else

905  
00:32:17,510 --> 00:32:15,779  
may be here visiting us

906  
00:32:19,490 --> 00:32:17,520  
all these things are going to just build

907  
00:32:21,710 --> 00:32:19,500  
this bigger puzzle picture oh this

908  
00:32:23,750 --> 00:32:21,720  
bigger picture I guess

909  
00:32:26,750 --> 00:32:23,760  
um of just us not being alone and it

910  
00:32:28,730 --> 00:32:26,760  
being a foregone conclusion I think

911  
00:32:31,190 --> 00:32:28,740  
and again just to top that one off uh

912  
00:32:33,350 --> 00:32:31,200  
Micah Hanks uh again from the debrief

913  
00:32:35,690 --> 00:32:33,360

wonderful article titled signals of

914

00:32:37,610 --> 00:32:35,700

Interest turn up and seti search aided

915

00:32:39,289 --> 00:32:37,620

by citizen scientists

916

00:32:41,269 --> 00:32:39,299

um and it's very they're very quick to

917

00:32:43,850 --> 00:32:41,279

mention within the article uh the quotes

918

00:32:46,430 --> 00:32:43,860

that that are again looking out into the

919

00:32:48,169 --> 00:32:46,440

universe for et signatures from other

920

00:32:51,350 --> 00:32:48,179

planets other civilizations that may

921

00:32:53,510 --> 00:32:51,360

have been broadcast that two uh signals

922

00:32:55,730 --> 00:32:53,520

picked up are signals of interest and

923

00:32:58,490 --> 00:32:55,740

while they're very quick to dismiss they

924

00:33:01,850 --> 00:32:58,500

are not saying these are alien and their

925

00:33:04,130 --> 00:33:01,860

origin being able to identify quickly

926  
00:33:06,470 --> 00:33:04,140  
what these signals may be can help them

927  
00:33:09,529 --> 00:33:06,480  
in future identify other signals that

928  
00:33:11,690 --> 00:33:09,539  
could be 80 in origin so again seti is

929  
00:33:13,549 --> 00:33:11,700  
still having a role to play I know some

930  
00:33:16,090 --> 00:33:13,559  
folks are maybe frustrated especially at

931  
00:33:19,610 --> 00:33:16,100  
people like Seth shostak and his

932  
00:33:21,529 --> 00:33:19,620  
flip-flopping on the alien UFO and why

933  
00:33:23,450 --> 00:33:21,539  
he may have an agenda as to why we

934  
00:33:25,130 --> 00:33:23,460  
should keep looking for their field I

935  
00:33:27,049 --> 00:33:25,140  
like to use a flip-flopping I always

936  
00:33:31,310 --> 00:33:27,059  
imagine him doing that kind of Magikarp

937  
00:33:35,330 --> 00:33:33,590  
yeah Magikarp being in the news

938  
00:33:36,950 --> 00:33:35,340

obviously with Pokemon's 25th

939

00:33:39,049 --> 00:33:36,960

anniversary congratulations to Ash

940

00:33:42,190 --> 00:33:39,059

Ketchum finally becoming a grand master

941

00:33:44,210 --> 00:33:42,200

for any Pokemon fans out there yeah

942

00:33:46,789 --> 00:33:44,220

well done

943

00:33:48,409 --> 00:33:46,799

um so yeah that again I think ties in

944

00:33:50,870 --> 00:33:48,419

nicely with those three articles in

945

00:33:53,029 --> 00:33:50,880

general from the debrief uh if you look

946

00:33:54,529 --> 00:33:53,039

at this this topic from a slightly you

947

00:33:56,210 --> 00:33:54,539

know standing back a little bit from a

948

00:33:58,250 --> 00:33:56,220

scientific point of view there's a lot

949

00:34:00,529 --> 00:33:58,260

going on a very interesting time period

950

00:34:02,870 --> 00:34:00,539

our technology is getting better and I

951  
00:34:04,970 --> 00:34:02,880  
think there's a lot to to maybe get the

952  
00:34:07,070 --> 00:34:04,980  
scientific Community again more and more

953  
00:34:09,109 --> 00:34:07,080  
involved to look and go actually there's

954  
00:34:10,970 --> 00:34:09,119  
a lot happening here and that that might

955  
00:34:12,589 --> 00:34:10,980  
actually move as nicely into another

956  
00:34:14,389 --> 00:34:12,599  
article that's featured on the debrief

957  
00:34:16,730 --> 00:34:14,399  
but was a larger story that the debrief

958  
00:34:19,609 --> 00:34:16,740  
just happened to cover and that was the

959  
00:34:21,349 --> 00:34:19,619  
fusion breakthrough then and so there

960  
00:34:23,750 --> 00:34:21,359  
was an energy announcement from the

961  
00:34:25,070 --> 00:34:23,760  
Department of energy and essentially I'm

962  
00:34:28,790 --> 00:34:25,080  
going to break this down in layman's

963  
00:34:32,389 --> 00:34:28,800

terms they used lots of lasers 192 to

964

00:34:35,149 --> 00:34:32,399

make more energy than most 10 in the

965

00:34:36,770 --> 00:34:35,159

first place so the idea being that you

966

00:34:39,829 --> 00:34:36,780

can use a tiny bit of energy and make

967

00:34:42,169 --> 00:34:39,839

lots of energy so could you in theory

968

00:34:43,849 --> 00:34:42,179

power things without needing batteries

969

00:34:45,589 --> 00:34:43,859

coal because a lot of other stuff like

970

00:34:47,810 --> 00:34:45,599

launching rockets for example is an easy

971

00:34:49,909 --> 00:34:47,820

way to explain to an idiot like me well

972

00:34:52,010 --> 00:34:49,919

we can put this rocket into space but we

973

00:34:54,409 --> 00:34:52,020

need a massive explosion underneath it

974

00:34:56,629 --> 00:34:54,419

first to even start to push it into the

975

00:34:58,550 --> 00:34:56,639

air and then we have to burn tons and

976

00:35:01,190 --> 00:34:58,560

millions of tons of fuel to keep it

977

00:35:03,470 --> 00:35:01,200

going and to get it into space whereas

978

00:35:06,230 --> 00:35:03,480

that involves a lot of fuel fossil fuel

979

00:35:07,970 --> 00:35:06,240

burning things and it's pretty pretty

980

00:35:10,609 --> 00:35:07,980

old school in terms of energy creation

981

00:35:12,890 --> 00:35:10,619

and as with an interest in the UFO topic

982

00:35:14,089 --> 00:35:12,900

we hear about these fantastic craft and

983

00:35:16,430 --> 00:35:14,099

how they can literally make energy

984

00:35:19,430 --> 00:35:16,440

almost out of nothing or in a much

985

00:35:21,770 --> 00:35:19,440

cleaner and safer way than we can so I

986

00:35:24,430 --> 00:35:21,780

know you though dad had a slightly not

987

00:35:27,829 --> 00:35:24,440

negative but more

988

00:35:30,170 --> 00:35:27,839

pessimistic take on this announcement

989

00:35:31,790 --> 00:35:30,180

but also that you're put more positive

990

00:35:33,109 --> 00:35:31,800

for the future does that make sense and

991

00:35:36,230 --> 00:35:33,119

I'll let you explain it yeah yeah

992

00:35:38,750 --> 00:35:36,240

absolutely so the the idea was that

993

00:35:42,710 --> 00:35:38,760

people were complaining that the amount

994

00:35:45,890 --> 00:35:42,720

of energy that went into uh the it's the

995

00:35:47,870 --> 00:35:45,900

national ignition facility uh to conduct

996

00:35:49,490 --> 00:35:47,880

this experiment was a lot more than they

997

00:35:52,550 --> 00:35:49,500

got out there for they didn't get out

998

00:35:53,990 --> 00:35:52,560

more than they put it but since kind of

999

00:35:55,550 --> 00:35:54,000

reading all that stuff you know I've

1000

00:35:57,349 --> 00:35:55,560

done a bunch of research and kind of

1001  
00:35:58,609 --> 00:35:57,359  
looked around and actually we have to

1002  
00:36:00,290 --> 00:35:58,619  
separate the facility from the

1003  
00:36:02,270 --> 00:36:00,300  
experiment the amount of energy put into

1004  
00:36:04,250 --> 00:36:02,280  
the experiment with lasers that were

1005  
00:36:06,530 --> 00:36:04,260  
less than one percent efficient still

1006  
00:36:08,270 --> 00:36:06,540  
produced more energy than they put into

1007  
00:36:12,170 --> 00:36:08,280  
it now

1008  
00:36:14,270 --> 00:36:12,180  
the the national ignition facility was

1009  
00:36:17,510 --> 00:36:14,280  
actually using lasers that were like 20

1010  
00:36:19,730 --> 00:36:17,520  
to 30 years old so the efficiency sucks

1011  
00:36:21,829 --> 00:36:19,740  
so if we were to do this very same

1012  
00:36:23,210 --> 00:36:21,839  
experiment with modern lasers that were

1013  
00:36:24,710 --> 00:36:23,220

you know we can get up to like 10 20

1014

00:36:26,750 --> 00:36:24,720

efficient now

1015

00:36:29,150 --> 00:36:26,760

we would have exponentially more energy

1016

00:36:31,010 --> 00:36:29,160

coming out of it so it's still a proof

1017

00:36:32,569 --> 00:36:31,020

of concept I think I said to you it's

1018

00:36:34,430 --> 00:36:32,579

kind of like we we figured out how to

1019

00:36:35,930 --> 00:36:34,440

build the iPhone battery but we haven't

1020

00:36:38,089 --> 00:36:35,940

figured out the rest of the iPhone yet

1021

00:36:40,370 --> 00:36:38,099

obviously the battery for the iPhone is

1022

00:36:43,190 --> 00:36:40,380

a really really important part of that

1023

00:36:45,770 --> 00:36:43,200

kind of device so it's incredible that

1024

00:36:48,170 --> 00:36:45,780

we've been to make that what I find

1025

00:36:49,430 --> 00:36:48,180

interesting is so there are two types of

1026  
00:36:52,130 --> 00:36:49,440  
fusion

1027  
00:36:54,170 --> 00:36:52,140  
one is the one we saw this week so go on

1028  
00:36:55,670 --> 00:36:54,180  
and that's is that nuclear fission and

1029  
00:36:58,490 --> 00:36:55,680  
nuclear fusion

1030  
00:37:02,630 --> 00:36:58,500  
uh so basically two techniques of get

1031  
00:37:04,250 --> 00:37:02,640  
infusion okay so one one of them uh is

1032  
00:37:05,930 --> 00:37:04,260  
what we've seen this week where you drop

1033  
00:37:07,970 --> 00:37:05,940  
a little palette into a bunch of lasers

1034  
00:37:11,329 --> 00:37:07,980  
and they fire it

1035  
00:37:12,950 --> 00:37:11,339  
um and the reaction creates plasma the

1036  
00:37:16,250 --> 00:37:12,960  
energy that we get comes from that

1037  
00:37:18,530 --> 00:37:16,260  
plasma the other one is that again you

1038  
00:37:21,230 --> 00:37:18,540

kind of have a stream of hydrogen under

1039

00:37:24,470 --> 00:37:21,240

compression in a magnetic chamber that's

1040

00:37:26,329 --> 00:37:24,480

a kind of a donut shape and that

1041

00:37:28,670 --> 00:37:26,339

actually you don't need to to shoot

1042

00:37:30,349 --> 00:37:28,680

pallets once you start that process

1043

00:37:32,569 --> 00:37:30,359

that's a process that keeps giving

1044

00:37:34,069 --> 00:37:32,579

energy so people think that that

1045

00:37:38,990 --> 00:37:34,079

magnetic

1046

00:37:40,190 --> 00:37:39,000

that's where it's called Uh is a lot

1047

00:37:43,190 --> 00:37:40,200

more promising

1048

00:37:45,109 --> 00:37:43,200

but it actually all of these things feed

1049

00:37:47,390 --> 00:37:45,119

into one of

1050

00:37:49,970 --> 00:37:47,400

these techniques actually becoming an

1051  
00:37:51,710 --> 00:37:49,980  
industry within a couple of decades so

1052  
00:37:54,290 --> 00:37:51,720  
no matter what we're looking at we're

1053  
00:37:56,930 --> 00:37:54,300  
looking at plasma giving us a lot more

1054  
00:37:58,609 --> 00:37:56,940  
energy than we've previously had and

1055  
00:38:00,109 --> 00:37:58,619  
we're talking exponentially more as well

1056  
00:38:01,250 --> 00:38:00,119  
so like you say we could start powering

1057  
00:38:02,930 --> 00:38:01,260  
spaceships with them because without

1058  
00:38:05,150 --> 00:38:02,940  
power and all sorts of things with them

1059  
00:38:06,950 --> 00:38:05,160  
there's so much science out there that

1060  
00:38:09,349 --> 00:38:06,960  
we don't do because we don't have the

1061  
00:38:12,890 --> 00:38:09,359  
energy requirements for it this kind of

1062  
00:38:14,690 --> 00:38:12,900  
stuff would help us get there so whilst

1063  
00:38:17,450 --> 00:38:14,700

you know we're not going to be able to

1064

00:38:19,730 --> 00:38:17,460

take what they did this week and kind of

1065

00:38:21,710 --> 00:38:19,740

go oh yeah we can within a few years

1066

00:38:23,150 --> 00:38:21,720

build the power plant out of it there

1067

00:38:24,770 --> 00:38:23,160

are a number of problems with that they

1068

00:38:27,230 --> 00:38:24,780

need to scale it

1069

00:38:28,609 --> 00:38:27,240

um drop in that that palette into the

1070

00:38:30,829 --> 00:38:28,619

lasers as well they need to be able to

1071

00:38:32,210 --> 00:38:30,839

do that multiple times per second uh at

1072

00:38:34,490 --> 00:38:32,220

the moment they're doing it once a week

1073

00:38:37,970 --> 00:38:34,500

so it's rather slow compared to where we

1074

00:38:40,849 --> 00:38:37,980

need to be but I would say that

1075

00:38:42,950 --> 00:38:40,859

this week they achieved ignition it's a

1076  
00:38:45,650 --> 00:38:42,960  
big big deal they got more energy than

1077  
00:38:47,150 --> 00:38:45,660  
they put in therefore I would say 40 50

1078  
00:38:49,490 --> 00:38:47,160  
years and we'll probably see an industry

1079  
00:38:51,770 --> 00:38:49,500  
built around this technology

1080  
00:38:53,270 --> 00:38:51,780  
something I looked at was again I was

1081  
00:38:55,790 --> 00:38:53,280  
like oh nuclear fusion but we've got

1082  
00:38:58,010 --> 00:38:55,800  
nuclear fission so nuclear fission is if

1083  
00:38:59,750 --> 00:38:58,020  
I'm correct us breaking down atoms to

1084  
00:39:01,609 --> 00:38:59,760  
create electricity so we destroyed to

1085  
00:39:03,950 --> 00:39:01,619  
create and then you've got nuclear

1086  
00:39:06,589 --> 00:39:03,960  
fusion which is combining to create

1087  
00:39:08,810 --> 00:39:06,599  
energy which seems I think was a nice

1088  
00:39:10,849 --> 00:39:08,820

little look at I mean as a species where

1089

00:39:12,650 --> 00:39:10,859

we seek to destroy to progress rather

1090

00:39:15,609 --> 00:39:12,660

than combine to grow and I thought you

1091

00:39:17,870 --> 00:39:15,619

would appreciate that one yeah um

1092

00:39:19,609 --> 00:39:17,880

yeah thinking more advanced

1093

00:39:21,770 --> 00:39:19,619

civilizations tend to harness what

1094

00:39:23,870 --> 00:39:21,780

they've got a lot better than we do and

1095

00:39:27,650 --> 00:39:23,880

it gives them a bigger yield an outcome

1096

00:39:29,450 --> 00:39:27,660

an output and as a society we destroy

1097

00:39:30,770 --> 00:39:29,460

lots of stuff and that helps us progress

1098

00:39:32,630 --> 00:39:30,780

whether you look at you know energy

1099

00:39:33,890 --> 00:39:32,640

creation whether you look at War what

1100

00:39:35,390 --> 00:39:33,900

Russia is trying to do at the minute you

1101

00:39:38,270 --> 00:39:35,400

know let's destroy lots of stuff so we

1102

00:39:39,530 --> 00:39:38,280

can progress or they you know so yeah I

1103

00:39:40,370 --> 00:39:39,540

thought that was interesting just

1104

00:39:43,250 --> 00:39:40,380

looking at the difference between

1105

00:39:44,750 --> 00:39:43,260

fission and fusion and like you say I'm

1106

00:39:46,250 --> 00:39:44,760

sure there will be many given the

1107

00:39:49,430 --> 00:39:46,260

interest in the UFO topic looking

1108

00:39:51,530 --> 00:39:49,440

thinking well they or the governments

1109

00:39:54,170 --> 00:39:51,540

are some departments within especially

1110

00:39:56,150 --> 00:39:54,180

doe have the knowledge of how we can

1111

00:39:58,790 --> 00:39:56,160

create this energy anyway without having

1112

00:40:01,250 --> 00:39:58,800

to go through all this but

1113

00:40:02,930 --> 00:40:01,260

without that kind of big reveal then

1114

00:40:04,550 --> 00:40:02,940

it's going to be that slow drip feed I

1115

00:40:06,530 --> 00:40:04,560

think in terms of new energies as well

1116

00:40:08,990 --> 00:40:06,540

interesting this comes at a time when

1117

00:40:11,030 --> 00:40:09,000

Russia have a monopoly on gas and and

1118

00:40:11,750 --> 00:40:11,040

everything and that type of fuel that

1119

00:40:13,370 --> 00:40:11,760

yeah

1120

00:40:14,810 --> 00:40:13,380

you know the US and maybe other

1121

00:40:16,430 --> 00:40:14,820

countries start to come out and say oh

1122

00:40:18,950 --> 00:40:16,440

look we can maybe start to create some

1123

00:40:20,569 --> 00:40:18,960

of our own unique types of energy and it

1124

00:40:23,569 --> 00:40:20,579

probably looks at that scenario down the

1125

00:40:26,329 --> 00:40:23,579

line where you have supernations holding

1126

00:40:28,849 --> 00:40:26,339

back their facilities and utilities to

1127

00:40:30,950 --> 00:40:28,859

thicken other nations as well so sad

1128

00:40:32,390 --> 00:40:30,960

that's where things are done but from a

1129

00:40:33,829 --> 00:40:32,400

scientific point of view quite an

1130

00:40:36,050 --> 00:40:33,839

exciting development

1131

00:40:38,030 --> 00:40:36,060

it's interesting as well that once again

1132

00:40:40,430 --> 00:40:38,040

it's nature you know these are processes

1133

00:40:43,310 --> 00:40:40,440

that take place in Stars so once again

1134

00:40:45,410 --> 00:40:43,320

it's us copying nature us being shown by

1135

00:40:46,670 --> 00:40:45,420

Nature what to do and then figuring it

1136

00:40:48,170 --> 00:40:46,680

out which is essentially you know when

1137

00:40:49,670 --> 00:40:48,180

you look at stuff like fiber optics

1138

00:40:51,050 --> 00:40:49,680

there are things at the bottom of the

1139

00:40:52,790 --> 00:40:51,060

sea that have massively more efficient

1140

00:40:54,650 --> 00:40:52,800

fiber optics than we do and they just

1141

00:40:57,109 --> 00:40:54,660

use it to show colors to warn up enemies

1142

00:41:00,170 --> 00:40:57,119

and things like that so nature inspires

1143

00:41:01,970 --> 00:41:00,180

and inspires us in a lot of ways and it

1144

00:41:03,650 --> 00:41:01,980

it's not lost on me that this is you

1145

00:41:05,210 --> 00:41:03,660

know I talk about plasma a lot and the

1146

00:41:07,250 --> 00:41:05,220

possibility of intelligent plasma and

1147

00:41:09,710 --> 00:41:07,260

plasma being kind of a key to the UFO

1148

00:41:12,050 --> 00:41:09,720

Technologies and here we are looking at

1149

00:41:13,910 --> 00:41:12,060

plasma uh you know there's there's

1150

00:41:15,770 --> 00:41:13,920

something in this man I can feel it in

1151  
00:41:17,750 --> 00:41:15,780  
my bones

1152  
00:41:19,010 --> 00:41:17,760  
well on that note if you've got anything

1153  
00:41:21,290 --> 00:41:19,020  
else to add then because I'm going to

1154  
00:41:23,930 --> 00:41:21,300  
finish with a quote for this one

1155  
00:41:25,970 --> 00:41:23,940  
oh sure just I wanted to touch on the

1156  
00:41:28,730 --> 00:41:25,980  
fact that um Obama's production company

1157  
00:41:30,230 --> 00:41:28,740  
are adapting the story of Betty and

1158  
00:41:31,310 --> 00:41:30,240  
Barney Hill

1159  
00:41:33,170 --> 00:41:31,320  
um a lot of people have been talking

1160  
00:41:35,030 --> 00:41:33,180  
about this because Obama you know he

1161  
00:41:36,410 --> 00:41:35,040  
came out on the James Corden show and in

1162  
00:41:39,170 --> 00:41:36,420  
a few other places and he's spoken about

1163  
00:41:40,730 --> 00:41:39,180

UFOs very seriously very frankly you

1164

00:41:43,370 --> 00:41:40,740

know that that takes her has a lot of

1165

00:41:45,589 --> 00:41:43,380

weight for people and yeah so they're

1166

00:41:47,030 --> 00:41:45,599

going to be adapting uh Higher Ground

1167

00:41:49,370 --> 00:41:47,040

production it's called they can be adapt

1168

00:41:52,130 --> 00:41:49,380

in the Betty and Barney Hill story

1169

00:41:53,569 --> 00:41:52,140

um which was just in the 1960s basically

1170

00:41:56,810 --> 00:41:53,579

one of the first kind of most famous

1171

00:41:58,550 --> 00:41:56,820

abduction cases we a lot of speculation

1172

00:42:01,490 --> 00:41:58,560

has been happening as to why Obama is

1173

00:42:02,630 --> 00:42:01,500

doing it and you know what kind of

1174

00:42:04,250 --> 00:42:02,640

saying well you know the briefing

1175

00:42:05,690 --> 00:42:04,260

happened and it's getting reported the

1176  
00:42:07,609 --> 00:42:05,700  
day after that they're making this thing

1177  
00:42:09,170 --> 00:42:07,619  
we actually had someone on our Discord

1178  
00:42:10,910 --> 00:42:09,180  
kind of say that they've read the script

1179  
00:42:13,130 --> 00:42:10,920  
and they were saying it means less

1180  
00:42:14,630 --> 00:42:13,140  
against their abduction story and more

1181  
00:42:16,190 --> 00:42:14,640  
on the kitchen sink elements of the

1182  
00:42:17,450 --> 00:42:16,200  
drama given Betty and Barney were a

1183  
00:42:19,430 --> 00:42:17,460  
mixed race marriage at the time when

1184  
00:42:20,930 --> 00:42:19,440  
that was very dangerous the script is

1185  
00:42:23,990 --> 00:42:20,940  
ultimately a speculation on the

1186  
00:42:26,690 --> 00:42:24,000  
isolating impacts of both ordinary and

1187  
00:42:28,310 --> 00:42:26,700  
extraordinary but as such that person

1188  
00:42:29,990 --> 00:42:28,320

wouldn't place too much emphasis on

1189

00:42:32,930 --> 00:42:30,000

Obama's involvement I thought that was a

1190

00:42:35,569 --> 00:42:32,940

really cool statement to be able to add

1191

00:42:38,630 --> 00:42:35,579

I like it well Dan thank you for your

1192

00:42:40,069 --> 00:42:38,640

time and we may have another pod before

1193

00:42:42,170 --> 00:42:40,079

the end of the year with a bit of a

1194

00:42:43,910 --> 00:42:42,180

recap not too sure timing wise how about

1195

00:42:46,370 --> 00:42:43,920

a workout yet if not it'll be very early

1196

00:42:49,010 --> 00:42:46,380

in the new year uh however I'd like to

1197

00:42:50,810 --> 00:42:49,020

finish off with a quote from the late

1198

00:42:53,510 --> 00:42:50,820

comedian Bill Hicks it would have been

1199

00:42:56,450 --> 00:42:53,520

his 55th birthday a few days ago and I

1200

00:42:59,150 --> 00:42:56,460

thought this one was apt today on acid

1201  
00:43:01,490 --> 00:42:59,160  
yeah yeah bill was good way ahead of his

1202  
00:43:02,930 --> 00:43:01,500  
time uh today a young man on acid

1203  
00:43:04,609 --> 00:43:02,940  
realized that all matter is merely

1204  
00:43:05,990 --> 00:43:04,619  
energy condensed to a slow vibration

1205  
00:43:07,849 --> 00:43:06,000  
that we are all one Consciousness

1206  
00:43:09,829 --> 00:43:07,859  
experiencing itself subjectively there's

1207  
00:43:11,870 --> 00:43:09,839  
no such thing as death life is only a

1208  
00:43:14,950 --> 00:43:11,880  
dream and we are we are the imagination

1209  
00:43:17,990 --> 00:43:14,960  
of ourselves here's Tom with the weather

1210  
00:43:20,089 --> 00:43:18,000  
that uf4 podcast is powered by Zen

1211  
00:43:21,770 --> 00:43:20,099  
Caster Zen Caster is one of the world's

1212  
00:43:24,349 --> 00:43:21,780  
leading platforms for recording and

1213  
00:43:25,970 --> 00:43:24,359

hosting podcasts the open Beta strives

1214

00:43:28,069 --> 00:43:25,980

to put the power of studio quality

1215

00:43:30,470 --> 00:43:28,079

remote video production into the hands

1216

00:43:32,750 --> 00:43:30,480

of anyone with a story to tell features

1217

00:43:35,870 --> 00:43:32,760

include HD video recording studio

1218

00:43:37,550 --> 00:43:35,880

quality sound chat and footnotes all

1219

00:43:39,470 --> 00:43:37,560

running right from your browser so you

1220

00:43:41,690 --> 00:43:39,480

can record from anywhere without ever

1221

00:43:44,569 --> 00:43:41,700

installing anything check out the links

1222

00:43:47,150 --> 00:43:44,579

in the show description to find out more

1223

00:43:49,010 --> 00:43:47,160

that is all for this week's show thank

1224

00:43:50,809 --> 00:43:49,020

you very much for listening please

1225

00:43:53,510 --> 00:43:50,819

remember to leave the podcast a review

1226

00:43:55,970 --> 00:43:53,520

on your chosen platform you can like

1227

00:43:57,890 --> 00:43:55,980

retweet And subscribe that would all be

1228

00:43:59,930 --> 00:43:57,900

very much appreciated the shows are

1229

00:44:01,609 --> 00:43:59,940

being uploaded onto YouTube as we speak

1230

00:44:04,069 --> 00:44:01,619

more and more you can sign up at

1231

00:44:06,349 --> 00:44:04,079

patreon.com forward slash that UFO

1232

00:44:08,750 --> 00:44:06,359

podcast access shows ad free as well

1233

00:44:11,809 --> 00:44:08,760

please get in touch on Twitter Facebook

1234

00:44:15,349 --> 00:44:11,819

Instagram that UFO podcast of course on

1235

00:44:17,450 --> 00:44:15,359

Twitter it's at UFO UAP am and again

1236

00:44:23,510 --> 00:44:17,460

folks as always keep looking up you

1237

00:44:23,520 --> 00:44:48,240

champagne

1238

00:46:17,349 --> 00:44:54,290

[Music]

1239

00:46:38,530 --> 00:46:20,320

what's that is saucer

1240

00:47:13,309 --> 00:46:46,020

[Music]
