

CLIPS

CHRIS LEHTO
A PILOT'S PERSPECTIVE

1
00:00:05,210 --> 00:00:02,389
just last night overnight a story broke

2
00:00:07,490 --> 00:00:05,220
that there was a first a UFO sighting

3
00:00:08,690 --> 00:00:07,500
over Montana I don't know if you've seen

4
00:00:09,950 --> 00:00:08,700
this

5
00:00:11,450 --> 00:00:09,960
um basically there's a video of someone

6
00:00:13,310 --> 00:00:11,460
filming the moon and saying no there's

7
00:00:15,169 --> 00:00:13,320
the moon and they put the camera way

8
00:00:17,810 --> 00:00:15,179
over to the left and there's a very big

9
00:00:20,450 --> 00:00:17,820
bright light just sitting in the sky

10
00:00:23,330 --> 00:00:20,460
it turns out and the Pentagon is

11
00:00:25,550 --> 00:00:23,340
confirmed it was a Chinese spy balloon

12
00:00:27,050 --> 00:00:25,560
so this has basically came out in the

13
00:00:28,849 --> 00:00:27,060

last eight to ten hours during the night

14

00:00:30,470 --> 00:00:28,859

here in the UK you're based on Portugal

15

00:00:32,450 --> 00:00:30,480

so we're on the same time zone so it was

16

00:00:34,729 --> 00:00:32,460

like early early morning and I just

17

00:00:37,310 --> 00:00:34,739

wonder we've now got some very close

18

00:00:40,250 --> 00:00:37,320

images of it how common is it do you

19

00:00:42,470 --> 00:00:40,260

think that we have not just in the UK or

20

00:00:43,610 --> 00:00:42,480

Portugal or particularly I'm guessing

21

00:00:45,709 --> 00:00:43,620

the US

22

00:00:47,930 --> 00:00:45,719

Ford and Technology

23

00:00:49,430 --> 00:00:47,940

in the skies that people just

24

00:00:51,170 --> 00:00:49,440

potentially misidentify but how common

25

00:00:53,810 --> 00:00:51,180

is that that we've got these spy

26

00:00:56,150 --> 00:00:53,820

balloons and whatnot just there

27

00:00:58,250 --> 00:00:56,160

I mean over the mainland of U.S I

28

00:01:01,430 --> 00:00:58,260

haven't heard of anything

29

00:01:04,250 --> 00:01:01,440

honestly because there's satellites

30

00:01:07,429 --> 00:01:04,260

you know so you can't stop a satellite

31

00:01:08,750 --> 00:01:07,439

from overflying the U.S yep you know and

32

00:01:11,810 --> 00:01:08,760

it's legal

33

00:01:15,649 --> 00:01:11,820

so it seems much easier to do that

34

00:01:17,330 --> 00:01:15,659

rather than fly in a Chinese uh balloon

35

00:01:19,310 --> 00:01:17,340

space balloon that can be obviously

36

00:01:22,070 --> 00:01:19,320

picked up and identified you know so

37

00:01:23,570 --> 00:01:22,080

this I actually I do as I was walking in

38

00:01:25,130 --> 00:01:23,580

I saw a headline for that you know

39

00:01:28,670 --> 00:01:25,140

Chinese uh

40

00:01:30,289 --> 00:01:28,680

uh spibelin which makes sense right I'm

41

00:01:32,570 --> 00:01:30,299

sure we have

42

00:01:34,010 --> 00:01:32,580

systems you know nor again you have

43

00:01:35,990 --> 00:01:34,020

satellites so

44

00:01:37,249 --> 00:01:36,000

what would this by balloon do that you

45

00:01:38,990 --> 00:01:37,259

know a satellite could it's going to

46

00:01:40,010 --> 00:01:39,000

give you continuous coverage in that

47

00:01:41,870 --> 00:01:40,020

area

48

00:01:43,969 --> 00:01:41,880

you know sustained coverage rather than

49

00:01:45,350 --> 00:01:43,979

just just flying by so

50

00:01:47,569 --> 00:01:45,360

I've actually

51
00:01:49,130 --> 00:01:47,579
curious now look as we La we launched a

52
00:01:50,289 --> 00:01:49,140
space balloon you know for the UAP

53
00:01:54,230 --> 00:01:50,299
society

54
00:01:55,670 --> 00:01:54,240
and as a it was a weather balloon and

55
00:01:57,770 --> 00:01:55,680
basically

56
00:02:00,469 --> 00:01:57,780
from what I understand every kind of

57
00:02:02,749 --> 00:02:00,479
medium-sized weather facility in the

58
00:02:05,929 --> 00:02:02,759
world I'm guessing releases weather

59
00:02:07,069 --> 00:02:05,939
balloons almost every day yep so so

60
00:02:09,050 --> 00:02:07,079
you're going to have a lot of these

61
00:02:10,969 --> 00:02:09,060
weather balloons out there flying around

62
00:02:13,070 --> 00:02:10,979
thousands of them

63
00:02:16,010 --> 00:02:13,080

which is surprising I didn't see more as

64

00:02:17,809 --> 00:02:16,020

a pilot you know I did yeah I did see a

65

00:02:19,850 --> 00:02:17,819

couple but but that's it

66

00:02:21,770 --> 00:02:19,860

so there are thousands of thousands of

67

00:02:23,210 --> 00:02:21,780

these flying around so it would make

68

00:02:26,390 --> 00:02:23,220

sense if you're you know foreign

69

00:02:28,790 --> 00:02:26,400

adversary to make a a weather balloon

70

00:02:30,410 --> 00:02:28,800

but it has other sensors on it and and

71

00:02:32,030 --> 00:02:30,420

then just disguise it as a weather

72

00:02:34,130 --> 00:02:32,040

balloon you know I'm sure that's been

73

00:02:36,350 --> 00:02:34,140

done

74

00:02:38,210 --> 00:02:36,360

um so yeah I don't know off the borders

75

00:02:39,650 --> 00:02:38,220

for sure I think off the borders you you

76
00:02:41,270 --> 00:02:39,660
know there's always but we always we're

77
00:02:43,610 --> 00:02:41,280
told that there's you know Chinese

78
00:02:45,589 --> 00:02:43,620
fishing vessels Etc anything could be

79
00:02:47,630 --> 00:02:45,599
over the oceans so in international

80
00:02:49,550 --> 00:02:47,640
waters but that's the first time I've

81
00:02:50,390 --> 00:02:49,560
heard Overland some sort of foreign

82
00:02:52,550 --> 00:02:50,400
system

83
00:02:54,229 --> 00:02:52,560
and it seems like a old-school

84
00:02:56,509 --> 00:02:54,239
technology is available in but like you

85
00:02:58,490 --> 00:02:56,519
say it does have its advantages

86
00:03:01,550 --> 00:02:58,500
um over a satellite but you'd think in

87
00:03:03,470 --> 00:03:01,560
2023 we keep hearing what our technology

88
00:03:05,210 --> 00:03:03,480

that we see is 30 years behind what

89

00:03:06,890 --> 00:03:05,220

they've actually got so to thank the

90

00:03:08,150 --> 00:03:06,900

Chinese are still putting balloons above

91

00:03:10,190 --> 00:03:08,160

the US

92

00:03:12,470 --> 00:03:10,200

but you see that doesn't surprise you

93

00:03:14,630 --> 00:03:12,480

that that technology is deployed because

94

00:03:16,910 --> 00:03:14,640

it's pretty useful

95

00:03:19,130 --> 00:03:16,920

yeah that's what I found is it's quite

96

00:03:19,729 --> 00:03:19,140

cheap

97

00:03:22,430 --> 00:03:19,739

um

98

00:03:23,869 --> 00:03:22,440

and you can put it up to a very high if

99

00:03:25,750 --> 00:03:23,879

you can get it to a high altitude it's

100

00:03:28,550 --> 00:03:25,760

very difficult to detect

101
00:03:30,589 --> 00:03:28,560
especially with radar because it's not

102
00:03:32,809 --> 00:03:30,599
moving and that's what we've seen a lot

103
00:03:35,030 --> 00:03:32,819
is off the east coast uh you have the

104
00:03:38,089 --> 00:03:35,040
range follow reports and basically they

105
00:03:39,890 --> 00:03:38,099
they have uh these box orbs and everyone

106
00:03:42,050 --> 00:03:39,900
you know they say oh it's obviously a

107
00:03:43,009 --> 00:03:42,060
balloon Etc well unless there's high

108
00:03:45,110 --> 00:03:43,019
winds

109
00:03:49,490 --> 00:03:45,120
you know that that is a huge negative of

110
00:03:52,210 --> 00:03:49,500
your balloons is you know at least I

111
00:03:55,729 --> 00:03:52,220
don't know how to keep a large balloon

112
00:03:57,229 --> 00:03:55,739
stable in high winds yeah so that that's

113
00:03:59,869 --> 00:03:57,239

probably your biggest negative is how do

114

00:04:02,089 --> 00:03:59,879

you control these systems but I have no

115

00:04:05,030 --> 00:04:02,099

doubt that the US has some you know

116

00:04:07,490 --> 00:04:05,040

classified space balloon observation

117

00:04:09,110 --> 00:04:07,500

program it just seems like you know we

118

00:04:11,149 --> 00:04:09,120

have low earth orbit

119

00:04:13,550 --> 00:04:11,159

and then we have aircraft

120

00:04:15,649 --> 00:04:13,560

you know with your with your spy planes

121

00:04:17,930 --> 00:04:15,659

Etc like your Predators your MC12 that

122

00:04:19,610 --> 00:04:17,940

you saw at the mosul orb those are low

123

00:04:22,430 --> 00:04:19,620

altitude though you know air breathers

124

00:04:24,290 --> 00:04:22,440

in between that low earth orbit and down

125

00:04:25,730 --> 00:04:24,300

at the ground is you know hundreds of

126
00:04:28,010 --> 00:04:25,740
miles

127
00:04:30,770 --> 00:04:28,020
so that whole area

128
00:04:32,450 --> 00:04:30,780
you could put in vehicles some sort of

129
00:04:34,430 --> 00:04:32,460
vehicles in that case I would see it as

130
00:04:36,170 --> 00:04:34,440
some sort of dirigible so

131
00:04:39,290 --> 00:04:36,180
I don't know it's definitely possible

132
00:04:41,510 --> 00:04:39,300
but my big thing against that is if you

133
00:04:43,430 --> 00:04:41,520
have high winds then your whole balloon

134
00:04:44,870 --> 00:04:43,440
idea this whole idea that all these

135
00:04:46,670 --> 00:04:44,880
things are just balloons you can make

136
00:04:48,530 --> 00:04:46,680
anything in the shape of you can make a

137
00:04:50,210 --> 00:04:48,540
balloon into any shape by the way you

138
00:04:53,330 --> 00:04:50,220

know balloon animals exist for a reason

139

00:04:56,090 --> 00:04:53,340

Batman yeah yeah anything you can make

140

00:04:57,290 --> 00:04:56,100

it again there's balloon animals okay if

141

00:04:58,909 --> 00:04:57,300

you're curious if you can make a balloon

142

00:05:01,430 --> 00:04:58,919

in anything just YouTube you know

143

00:05:02,749 --> 00:05:01,440

interesting balloon animals

144

00:05:04,850 --> 00:05:02,759

um so you can make a balloon into any

145

00:05:06,230 --> 00:05:04,860

shape right so they obviously even a

146

00:05:07,670 --> 00:05:06,240

flying saucer that's going to be a

147

00:05:09,830 --> 00:05:07,680

balloon right everything can be a

148

00:05:11,629 --> 00:05:09,840

balloon unless it's in high winds

149

00:05:14,629 --> 00:05:11,639

and then the question is how do you

150

00:05:16,430 --> 00:05:14,639

maneuver a balloon right in in high

151

00:05:18,409 --> 00:05:16,440

winds I don't know how

152

00:05:19,670 --> 00:05:18,419

remember George Knapp had released those

153

00:05:21,170 --> 00:05:19,680

pictures now

154

00:05:23,810 --> 00:05:21,180

the last couple of years have been a

155

00:05:26,510 --> 00:05:23,820

blush so last year or the year before

156

00:05:28,610 --> 00:05:26,520

um the three snaps from the the pilot

157

00:05:30,230 --> 00:05:28,620

yeah and one of them did look well we

158

00:05:32,510 --> 00:05:30,240

had the famous Batman villain didn't we

159

00:05:34,010 --> 00:05:32,520

which was everyone said it was and you

160

00:05:35,150 --> 00:05:34,020

know that's still up in there for debate

161

00:05:37,670 --> 00:05:35,160

literally

162

00:05:41,150 --> 00:05:37,680

um but one of them did look like a big

163

00:05:43,730 --> 00:05:41,160

kind of blimp balloon and I wonder does

164

00:05:46,310 --> 00:05:43,740

this sort of Discovery overnight of this

165

00:05:48,469 --> 00:05:46,320

Chinese Bible and above the us maybe

166

00:05:50,749 --> 00:05:48,479

help point to that previous one more

167

00:05:53,090 --> 00:05:50,759

than likely being some kind of foreign

168

00:05:56,270 --> 00:05:53,100

Tech balloon that was placed there or is

169

00:05:58,550 --> 00:05:56,280

that still unlikely do you think

170

00:06:00,230 --> 00:05:58,560

yeah it's definitely likely I mean

171

00:06:02,029 --> 00:06:00,240

they've been that's been the main

172

00:06:04,610 --> 00:06:02,039

argument right is that this is some sort

173

00:06:08,210 --> 00:06:04,620

of balloon and if you look at that

174

00:06:09,950 --> 00:06:08,220

that's the acorn uh sphere blimp uh

175

00:06:13,129 --> 00:06:09,960

video that actually my most popular

176

00:06:15,050 --> 00:06:13,139

short by far is is on that okay

177

00:06:17,090 --> 00:06:15,060

if you look at it too that blimp looking

178

00:06:19,430 --> 00:06:17,100

thing at the end it actually does look

179

00:06:22,850 --> 00:06:19,440

like a Tic Tac actually if you consider

180

00:06:24,469 --> 00:06:22,860

what a Tic Tac uh if you consider the

181

00:06:26,150 --> 00:06:24,479

shape to me it all it looks like a Tic

182

00:06:28,909 --> 00:06:26,160

Tac

183

00:06:30,469 --> 00:06:28,919

so I would say that is the best mundane

184

00:06:32,570 --> 00:06:30,479

argument that's literally the only

185

00:06:35,029 --> 00:06:32,580

mundane kind of argument I can consider

186

00:06:36,590 --> 00:06:35,039

is that it's some sort of advanced

187

00:06:38,809 --> 00:06:36,600

dirigible

188

00:06:39,950 --> 00:06:38,819

the the biggest question is again in all

189

00:06:43,189 --> 00:06:39,960

those in a lot of those East Coast

190

00:06:45,170 --> 00:06:43,199

sightings is they would say high winds

191

00:06:47,570 --> 00:06:45,180

um but the problem is I've never been

192

00:06:49,909 --> 00:06:47,580

able to correlate okay those pictures

193

00:06:52,309 --> 00:06:49,919

with them also saying high winds they

194

00:06:54,230 --> 00:06:52,319

haven't said the date of the pictures uh

195

00:06:56,090 --> 00:06:54,240

we don't know yeah so I can't get any

196

00:06:57,710 --> 00:06:56,100

more data all I have is those three kind

197

00:07:00,110 --> 00:06:57,720

of crappy pictures four four kind of

198

00:07:01,670 --> 00:07:00,120

crappy pictures with no correlating data

199

00:07:05,029 --> 00:07:01,680

but if we can correlate it to the same

200

00:07:07,430 --> 00:07:05,039

day and that day has high winds

201
00:07:09,409 --> 00:07:07,440
uh and you have those Pilots saying that

202
00:07:12,230 --> 00:07:09,419
yeah it was like 150 knot winds out

203
00:07:15,050 --> 00:07:12,240
there at 27 000 feet then there's no way

204
00:07:17,090 --> 00:07:15,060
this like you know this Chinese space

205
00:07:19,010 --> 00:07:17,100
blimper or whatever balloon they're

206
00:07:21,110 --> 00:07:19,020
talking about unless it has

207
00:07:23,150 --> 00:07:21,120
engines on it there's no way it's going

208
00:07:25,370 --> 00:07:23,160
to stay in the same position in 150 knot

209
00:07:26,809 --> 00:07:25,380
winds it's just that would be
