

CLIPS

THE

BREAKDOWN

1
00:00:05,030 --> 00:00:02,450
somebody else uh you know Sid attributed

2
00:00:07,970 --> 00:00:05,040
that Biden had said these three objects

3
00:00:10,790 --> 00:00:07,980
were balloons but uh you know the

4
00:00:12,770 --> 00:00:10,800
Pentagon rather forcefully pushed back

5
00:00:15,950 --> 00:00:12,780
on that with their most recent press

6
00:00:18,290 --> 00:00:15,960
conference uh you know explicitly saying

7
00:00:21,310 --> 00:00:18,300
I would not categorize these as balloons

8
00:00:23,109 --> 00:00:21,320
right now and so that's that to me

9
00:00:25,730 --> 00:00:23,119
suggests there were definitely

10
00:00:27,950 --> 00:00:25,740
characteristics or aspects about them

11
00:00:30,170 --> 00:00:27,960
whenever these objects were interrogated

12
00:00:32,089 --> 00:00:30,180
by the pilots which which what I mean by

13
00:00:35,090 --> 00:00:32,099

that is you sent other fighter aircraft

14

00:00:38,150 --> 00:00:35,100

up there to get close look at it see

15

00:00:40,209 --> 00:00:38,160

what it is there were aspects about them

16

00:00:42,889 --> 00:00:40,219

that um

17

00:00:44,690 --> 00:00:42,899

went against what you would expect to

18

00:00:47,209 --> 00:00:44,700

see with a balloon I thought another

19

00:00:49,610 --> 00:00:47,219

really intriguing comment from uh

20

00:00:51,590 --> 00:00:49,620

norad's Commander was when he he did

21

00:00:53,750 --> 00:00:51,600

push back on that and say you know I'm

22

00:00:56,330 --> 00:00:53,760

calling the these things objects for a

23

00:00:59,090 --> 00:00:56,340

reason I would not categorize them as

24

00:01:01,850 --> 00:00:59,100

balloons they may be they may be some

25

00:01:04,189 --> 00:01:01,860

type of objects that uh you know have

26

00:01:05,810 --> 00:01:04,199

some gaseous substance so helium

27

00:01:08,210 --> 00:01:05,820

something you know lighter than air that

28

00:01:09,350 --> 00:01:08,220

lips like a balloon uh inside a

29

00:01:11,330 --> 00:01:09,360

structure

30

00:01:14,030 --> 00:01:11,340

and so when he you know that comment

31

00:01:17,390 --> 00:01:14,040

alone suggests that there's something on

32

00:01:19,730 --> 00:01:17,400

the exterior of these that is acting

33

00:01:21,830 --> 00:01:19,740

unlike what you would see with just a

34

00:01:23,929 --> 00:01:21,840

normal balloon and so when you start

35

00:01:24,950 --> 00:01:23,939

considering what does that mean

36

00:01:27,770 --> 00:01:24,960

um you know there's a couple of things

37

00:01:29,690 --> 00:01:27,780

for for example your normal balloon is

38

00:01:32,330 --> 00:01:29,700

not going to show up on infrared sensors

39

00:01:35,450 --> 00:01:32,340

so IR sensors that type of stuff is not

40

00:01:37,310 --> 00:01:35,460

going to produce a return uh normal

41

00:01:39,590 --> 00:01:37,320

balloons are not going to be very radio

42

00:01:41,210 --> 00:01:39,600

or excuse me radar reflected so you're

43

00:01:43,429 --> 00:01:41,220

not going to get good radar Returns on

44

00:01:45,230 --> 00:01:43,439

them that type of thing so when they've

45

00:01:48,429 --> 00:01:45,240

gone to interrogate these objects

46

00:01:50,749 --> 00:01:48,439

potentially they have displayed IR

47

00:01:53,149 --> 00:01:50,759

characteristics or

48

00:01:56,330 --> 00:01:53,159

radar characteristics that are more

49

00:01:57,649 --> 00:01:56,340

consistent with a solid craft rather

50

00:02:01,310 --> 00:01:57,659

than some type of lighter than air

51
00:02:02,929 --> 00:02:01,320
helium balloon Propel I don't know you

52
00:02:05,990 --> 00:02:02,939
know but that's we're having to kind of

53
00:02:09,949 --> 00:02:06,000
interpret through uh what we're hearing

54
00:02:11,869 --> 00:02:09,959
here and the fact that um I genuinely at

55
00:02:14,030 --> 00:02:11,879
this point think that there is some

56
00:02:16,729 --> 00:02:14,040
mystery surrounding all of it even for

57
00:02:19,190 --> 00:02:16,739
the Pentagon and everybody involved I

58
00:02:21,949 --> 00:02:19,200
don't really think that anybody

59
00:02:23,630 --> 00:02:21,959
conclusively knows what it is and I

60
00:02:27,050 --> 00:02:23,640
think if it was a

61
00:02:28,610 --> 00:02:27,060
you know if it was a rogue car lot

62
00:02:30,530 --> 00:02:28,620
balloons or something you know some

63
00:02:32,930 --> 00:02:30,540

giant Car Lot balloon that somebody let

64

00:02:34,430 --> 00:02:32,940

go and went in the air these that would

65

00:02:36,110 --> 00:02:34,440

it would possess characteristics that

66

00:02:38,809 --> 00:02:36,120

when they went to interrogate it would

67

00:02:41,809 --> 00:02:38,819

be pretty obvious that it's a balloon

68

00:02:43,729 --> 00:02:41,819

and so for some reason there's aspects

69

00:02:45,350 --> 00:02:43,739

about you know the objects that we've

70

00:02:48,410 --> 00:02:45,360

heard about in recent days that don't

71

00:02:49,790 --> 00:02:48,420

seem to fit that now I I even it was

72

00:02:51,890 --> 00:02:49,800

reported in the New York Times and then

73

00:02:54,110 --> 00:02:51,900

another person uh out of the Pentagon

74

00:02:55,670 --> 00:02:54,120

told me confirmed with had the New York

75

00:02:58,869 --> 00:02:55,680

Times was told that at least with the

76

00:03:02,210 --> 00:02:58,879

Alaskan object it broke apart

77

00:03:05,270 --> 00:03:02,220

so when it land it broke apart like you

78

00:03:06,530 --> 00:03:05,280

would expect the example I got uh I

79

00:03:08,690 --> 00:03:06,540

think the New York Times said broke into

80

00:03:10,369 --> 00:03:08,700

pieces I was told it broke like glass so

81

00:03:12,890 --> 00:03:10,379

like if you drop the glass cup and

82

00:03:14,930 --> 00:03:12,900

that's obviously not something you would

83

00:03:16,610 --> 00:03:14,940

expect with a rubberized balloon or
