

CLIPS

JOHN RAMIREZ  
2023 UPDATE

1  
00:00:07,930 --> 00:00:03,550  
I was at CIA I did have access

2  
00:00:10,850 --> 00:00:07,940  
to some original uncompressed files

3  
00:00:14,270 --> 00:00:10,860  
that I was able to access through my CIA

4  
00:00:16,430 --> 00:00:14,280  
workstation it was processed by Mallon

5  
00:00:18,529 --> 00:00:16,440  
Space Systems like I believe which had a

6  
00:00:20,990 --> 00:00:18,539  
contract with NASA I looked at one of

7  
00:00:23,450 --> 00:00:21,000  
the moons of Mars and that's where I saw

8  
00:00:26,269 --> 00:00:23,460  
the uh what we would call them in

9  
00:00:30,290 --> 00:00:26,279  
obelisk it's very much like an Egyptian

10  
00:00:33,470 --> 00:00:30,300  
structure now what I see now seems a

11  
00:00:35,930 --> 00:00:33,480  
very low resolution than what I saw what

12  
00:00:37,190 --> 00:00:35,940  
I saw was a structure I said my gosh

13  
00:00:38,810 --> 00:00:37,200

look at this and I had some of my

14

00:00:41,150 --> 00:00:38,820

colleagues look over it it looks like

15

00:00:44,209 --> 00:00:41,160

the Washington Monument

16

00:00:45,410 --> 00:00:44,219

and here it is on on this I think it was

17

00:00:48,229 --> 00:00:45,420

Phobos

18

00:00:49,970 --> 00:00:48,239

here it is you know and then later all

19

00:00:51,950 --> 00:00:49,980

that data disappeared

20

00:00:53,869 --> 00:00:51,960

you don't get those swaths anymore where

21

00:00:55,069 --> 00:00:53,879

you can actually look at high resolution

22

00:00:59,869 --> 00:00:55,079

data

23

00:01:01,490 --> 00:00:59,879

extremely high what I saw what you see

24

00:01:03,590 --> 00:01:01,500

now is like
