

THE BREAKDOWN

1
00:00:03,350 --> 00:00:00,589

[Music]

2
00:00:05,510 --> 00:00:03,360

hey this is Bryant Arnold also known as

3
00:00:10,190 --> 00:00:05,520

dragon from Skinwalker Ranch and you're

4
00:00:14,810 --> 00:00:12,470

everyone and welcome back to that UFO

5
00:00:17,630 --> 00:00:14,820

podcast joining me for a breakdown on

6
00:00:19,730 --> 00:00:17,640

today's NASA UAP study and a few other

7
00:00:22,849 --> 00:00:19,740

bits and pieces all the way from Vermont

8
00:00:24,650 --> 00:00:22,859

USA is Daniel zeterson Dan welcome

9
00:00:26,269 --> 00:00:24,660

hey you sound really enthused then that

10
00:00:27,710 --> 00:00:26,279

was like tone of Kirkpatrick there you

11
00:00:29,570 --> 00:00:27,720

know yeah but it's good to be here what

12
00:00:31,070 --> 00:00:29,580

an exciting day peek behind the actors

13
00:00:32,990 --> 00:00:31,080

curtain as I was telling dad and I've

14

00:00:35,690 --> 00:00:33,000

got a bit of an even fixed on the go and

15

00:00:39,110 --> 00:00:35,700

I could use a thousand knives to stab my

16

00:00:41,090 --> 00:00:39,120

ear as I record this so um so yeah I

17

00:00:42,530 --> 00:00:41,100

said to that about keeping the the notes

18

00:00:44,330 --> 00:00:42,540

concise our dad mentioned it would try

19

00:00:48,410 --> 00:00:44,340

and keep it concise and I was like yeah

20

00:00:49,729 --> 00:00:48,420

I want to die so yeah but here we are if

21

00:00:51,290 --> 00:00:49,739

we wanted to get this out quickly

22

00:00:53,869 --> 00:00:51,300

because the NASA stuff happened today

23

00:00:55,430 --> 00:00:53,879

and uh it's worth talking through um

24

00:00:57,830 --> 00:00:55,440

just due to life and things I never got

25

00:00:59,569 --> 00:00:57,840

to see the full thing Dan's taking some

26

00:01:01,850 --> 00:00:59,579

notes I've seen the gist I watched the

27

00:01:03,950 --> 00:01:01,860

first couple of hours and made a few

28

00:01:05,750 --> 00:01:03,960

points and notes on that and I've looked

29

00:01:08,149 --> 00:01:05,760

up some of the online commentary as well

30

00:01:10,370 --> 00:01:08,159

and then got a few comments and

31

00:01:12,830 --> 00:01:10,380

discussion points on the Jenny mccarbell

32

00:01:14,690 --> 00:01:12,840

George Knapp Mojave Desert triangle

33

00:01:16,969 --> 00:01:14,700

slash flares

34

00:01:18,230 --> 00:01:16,979

um incident that has been taking up a

35

00:01:19,730 --> 00:01:18,240

lot of bandwidth the last week for

36

00:01:20,929 --> 00:01:19,740

people and we hadn't really commented

37

00:01:22,730 --> 00:01:20,939

properly

38

00:01:25,910 --> 00:01:22,740

um I think that's it a few times online

39

00:01:27,649 --> 00:01:25,920

length towards flares then but

40

00:01:30,289 --> 00:01:27,659

um yeah you did and what if it's a UFO

41

00:01:32,149 --> 00:01:30,299

dropping flows right well I've got a

42

00:01:34,190 --> 00:01:32,159

point on something similar Phoenix

43

00:01:36,170 --> 00:01:34,200

Lights but sure and but we'll get to

44

00:01:39,289 --> 00:01:36,180

that but listen the NASA study

45

00:01:42,170 --> 00:01:39,299

um was today that was live on the NASA

46

00:01:45,710 --> 00:01:42,180

Channel it was nice to see on the build

47

00:01:47,030 --> 00:01:45,720

up to it that it went from like 1.4 one

48

00:01:49,069 --> 00:01:47,040

and a half thousand people watching the

49

00:01:50,389 --> 00:01:49,079

channel like an hour before to over

50

00:01:52,010 --> 00:01:50,399

seven thousand people I don't know if

51
00:01:53,389 --> 00:01:52,020
that went up anymore

52
00:01:55,130 --> 00:01:53,399
um watching it during the live broadcast

53
00:01:56,210 --> 00:01:55,140
but that was that was quite a chunk of

54
00:01:58,370 --> 00:01:56,220
change

55
00:02:00,050 --> 00:01:58,380
um for the channel which was nice to see

56
00:02:02,270 --> 00:02:00,060
that interest

57
00:02:04,850 --> 00:02:02,280
um the NASA study just to quickly recap

58
00:02:06,649 --> 00:02:04,860
was announced last summer and they were

59
00:02:08,870 --> 00:02:06,659
given the tune of about two million

60
00:02:11,390 --> 00:02:08,880
dollars of a budget or was it 200 Grand

61
00:02:14,089 --> 00:02:11,400
I think it was 200 Grand 200 Grand that

62
00:02:16,369 --> 00:02:14,099
was it yeah so 200 Grand and which isn't

63
00:02:18,050 --> 00:02:16,379

really a lot of money but it seemed at

64

00:02:20,750 --> 00:02:18,060

the time when we discussed it it was a

65

00:02:24,490 --> 00:02:20,760

study to set up whether it was worth

66

00:02:29,930 --> 00:02:27,890

yeah it's actually like they decided

67

00:02:31,130 --> 00:02:29,940

that they might take the trip but they

68

00:02:32,390 --> 00:02:31,140

just wanted to plan out a couple of

69

00:02:34,190 --> 00:02:32,400

different routes and see how it was

70

00:02:37,670 --> 00:02:34,200

going to go you know getting the tiles

71

00:02:39,890 --> 00:02:37,680

in and stuff that was it um and do you

72

00:02:42,470 --> 00:02:39,900

know what spoiler pleasantly surprised

73

00:02:44,509 --> 00:02:42,480

from what we got expecting there was a

74

00:02:46,250 --> 00:02:44,519

lot of expectations with this online and

75

00:02:48,290 --> 00:02:46,260

it was never going to be okay it was

76

00:02:51,170 --> 00:02:48,300

delved into the NASA archives and here's

77

00:02:52,970 --> 00:02:51,180

the STS footage of the tether incident

78

00:02:55,309 --> 00:02:52,980

and we've worked out it was 12 alien

79

00:02:57,229 --> 00:02:55,319

spacecraft around the Space Shuttle that

80

00:02:59,449 --> 00:02:57,239

was never going to be what this was it

81

00:03:01,910 --> 00:02:59,459

was a preliminary look at the what

82

00:03:04,490 --> 00:03:01,920

availability they would have to study

83

00:03:05,630 --> 00:03:04,500

um the UAP or the UFO phenomenon

84

00:03:07,430 --> 00:03:05,640

essentially

85

00:03:10,670 --> 00:03:07,440

um but Dan

86

00:03:13,430 --> 00:03:10,680

um the intro from Dan Evans

87

00:03:15,410 --> 00:03:13,440

um he had which was disappointing and to

88

00:03:17,390 --> 00:03:15,420

start this on a disappointing note had

89

00:03:19,610 --> 00:03:17,400

to address the abuse that members of the

90

00:03:22,190 --> 00:03:19,620

panel had received as they had taken

91

00:03:25,850 --> 00:03:22,200

part in this study and I'm going to see

92

00:03:28,970 --> 00:03:25,860

say I am going to guess that's not your

93

00:03:30,649 --> 00:03:28,980

UFO Twitter members giving the abuse I

94

00:03:32,750 --> 00:03:30,659

reckon that's going to be scientific and

95

00:03:36,589 --> 00:03:32,760

academic folks who have been reaching

96

00:03:39,110 --> 00:03:36,599

out and slamming serious scientific

97

00:03:41,330 --> 00:03:39,120

scientists and academics taking part in

98

00:03:43,309 --> 00:03:41,340

what they see as us area of study that

99

00:03:45,589 --> 00:03:43,319

isn't worth studying which is

100

00:03:47,869 --> 00:03:45,599

disappointing isn't it yeah absolutely

101
00:03:49,250 --> 00:03:47,879
it you know we can't say we want

102
00:03:50,750 --> 00:03:49,260
scientists to apply themselves and when

103
00:03:52,550 --> 00:03:50,760
they do kind of start going no not like

104
00:03:54,830 --> 00:03:52,560
that and harassing them you know we we

105
00:03:58,430 --> 00:03:54,840
want them to be independent study kind

106
00:04:01,130 --> 00:03:58,440
of uh folk or uapists as they as they

107
00:04:02,390 --> 00:04:01,140
are now called on the NASA website

108
00:04:04,070 --> 00:04:02,400
um they brought that up a few times

109
00:04:05,570 --> 00:04:04,080
throughout the whole presentation and at

110
00:04:07,490 --> 00:04:05,580
one point they did mention about online

111
00:04:08,630 --> 00:04:07,500
abuse and things like that so I feel

112
00:04:10,429 --> 00:04:08,640
like it's all coming from a number of

113
00:04:12,890 --> 00:04:10,439

angles and especially when we're

114

00:04:15,050 --> 00:04:12,900

watching uh Dr Sean Kirkpatrick talk

115

00:04:17,990 --> 00:04:15,060

there was a moment where I almost felt

116

00:04:19,550 --> 00:04:18,000

like I saw the genuine hymn through the

117

00:04:21,349 --> 00:04:19,560

the kind of facade that he puts up that

118

00:04:22,850 --> 00:04:21,359

Stoke facade where you know it seemed

119

00:04:24,110 --> 00:04:22,860

like it kind of gone under his skin you

120

00:04:26,390 --> 00:04:24,120

know this is a career professional

121

00:04:28,490 --> 00:04:26,400

really trying to do the work and well

122

00:04:30,050 --> 00:04:28,500

all of them are and they're being you

123

00:04:32,030 --> 00:04:30,060

know an ambassador for it it's it's not

124

00:04:33,170 --> 00:04:32,040

fair and you know people should just

125

00:04:35,030 --> 00:04:33,180

give the benefit of the doubt until

126

00:04:37,129 --> 00:04:35,040

proven otherwise you know and even then

127

00:04:39,590 --> 00:04:37,139

abuse just isn't worth it it's just not

128

00:04:42,290 --> 00:04:39,600

worth it no not everyone's got as thick

129

00:04:44,090 --> 00:04:42,300

as Skin as Gary Nolan either who seems

130

00:04:45,170 --> 00:04:44,100

to to take it and dish it out just as

131

00:04:47,150 --> 00:04:45,180

readily

132

00:04:48,290 --> 00:04:47,160

um but yeah that's that's a point but

133

00:04:50,570 --> 00:04:48,300

hereho

134

00:04:52,249 --> 00:04:50,580

um it's it's been done and they've

135

00:04:54,050 --> 00:04:52,259

addressed it and hopefully but let's be

136

00:04:55,969 --> 00:04:54,060

honest it's not going to stop

137

00:04:57,710 --> 00:04:55,979

um I doubt anyone listening to this is

138

00:04:59,629 --> 00:04:57,720

the type of person that dishes out that

139

00:05:01,370 --> 00:04:59,639

type of abuse either so

140

00:05:04,370 --> 00:05:01,380

um pretty disappointing here but that's

141

00:05:06,110 --> 00:05:04,380

2023 social media it's it kind of comes

142

00:05:08,810 --> 00:05:06,120

as part of the territory

143

00:05:10,790 --> 00:05:08,820

um common theme I took from the early

144

00:05:13,490 --> 00:05:10,800

part so that's done from various

145

00:05:16,129 --> 00:05:13,500

different speakers where some keywords

146

00:05:18,469 --> 00:05:16,139

like the data set being incomplete that

147

00:05:20,930 --> 00:05:18,479

what they have is purely catalog that

148

00:05:22,550 --> 00:05:20,940

things are fragmented

149

00:05:25,430 --> 00:05:22,560

um is that what you were taking from it

150

00:05:28,189 --> 00:05:25,440

as well early on yeah 100 you know like

151

00:05:30,170 --> 00:05:28,199

you said it was it was surprising it we

152

00:05:31,490 --> 00:05:30,180

we always complain about um and I say we

153

00:05:33,110 --> 00:05:31,500

kind of I'm talking the community you

154

00:05:34,249 --> 00:05:33,120

know you offer Twitter and the like we

155

00:05:36,950 --> 00:05:34,259

always complain that they kind of

156

00:05:39,830 --> 00:05:36,960

whether it's NASA or Arrow ignoring the

157

00:05:41,930 --> 00:05:39,840

historical stuff and they made it very

158

00:05:43,790 --> 00:05:41,940

clear today that the historical stuff is

159

00:05:45,710 --> 00:05:43,800

all well and good but we didn't have the

160

00:05:48,110 --> 00:05:45,720

senses then that we have these days and

161

00:05:49,550 --> 00:05:48,120

a lot of it is classified and when it

162

00:05:51,469 --> 00:05:49,560

comes to taking witness statements which

163

00:05:52,370 --> 00:05:51,479

I thought this was a standout for me

164

00:05:53,330 --> 00:05:52,380

when they were talking about witness

165

00:05:54,830 --> 00:05:53,340

statements and they said they're all

166

00:05:56,629 --> 00:05:54,840

well and good but you know there are

167

00:05:58,189 --> 00:05:56,639

optical illusions and so on so forth and

168

00:05:59,870 --> 00:05:58,199

there should be data to back up that

169

00:06:01,189 --> 00:05:59,880

kind of eyewitness account if if that's

170

00:06:03,890 --> 00:06:01,199

what happened

171

00:06:05,510 --> 00:06:03,900

um so yeah I was really encouraged at

172

00:06:06,770 --> 00:06:05,520

one point Sean said that there and he

173

00:06:08,450 --> 00:06:06,780

did this during the hearing as well but

174

00:06:11,150 --> 00:06:08,460

said that the designing purpose built

175

00:06:12,950 --> 00:06:11,160

UAP sensors to deploy for the dod and

176
00:06:14,570 --> 00:06:12,960
NASA are about to do the same Sean

177
00:06:18,050 --> 00:06:14,580
showed this big map

178
00:06:19,730 --> 00:06:18,060
of where they were looking at and uh

179
00:06:21,230 --> 00:06:19,740
it's on that kind of summary screen I'll

180
00:06:22,850 --> 00:06:21,240
pop it on screen if you're watching on

181
00:06:24,529 --> 00:06:22,860
YouTube I'll pop it up

182
00:06:26,029 --> 00:06:24,539
um but there's this little map and it

183
00:06:28,070 --> 00:06:26,039
just highlights the bases you know where

184
00:06:29,749 --> 00:06:28,080
the dod looking and it's worth

185
00:06:31,670 --> 00:06:29,759
remembering that the gray area where the

186
00:06:33,830 --> 00:06:31,680
dod aren't looking that's the whole area

187
00:06:35,570 --> 00:06:33,840
the NASA have to look and I was hugely

188
00:06:37,790 --> 00:06:35,580

encouraged that they they seemed really

189

00:06:39,770 --> 00:06:37,800

genuinely gung-ho to kind of go do their

190

00:06:42,189 --> 00:06:39,780

work you know and that was the gray area

191

00:06:44,809 --> 00:06:42,199

not the Grays great yeah

192

00:06:47,689 --> 00:06:44,819

get that one right yeah get that

193

00:06:50,809 --> 00:06:47,699

Amsterdam though yes so

194

00:06:53,150 --> 00:06:50,819

um you made a point I wanted to come

195

00:06:55,249 --> 00:06:53,160

back on there and I'm stalling for time

196

00:06:57,230 --> 00:06:55,259

thinking about what it was ah yes

197

00:06:58,309 --> 00:06:57,240

witness statements that was a and that's

198

00:06:59,990 --> 00:06:58,319

something we're going to get to talking

199

00:07:02,510 --> 00:07:00,000

about the Jeremy Corbell stuff later on

200

00:07:05,150 --> 00:07:02,520

as well with George Knapp um

201
00:07:07,249 --> 00:07:05,160
the good troubles show with Matt Ford

202
00:07:08,749 --> 00:07:07,259
had Robert Salas on it and it's just

203
00:07:10,670 --> 00:07:08,759
worth noting I think this is probably a

204
00:07:13,550 --> 00:07:10,680
good place to discuss that

205
00:07:15,770 --> 00:07:13,560
um they played a clip of Robert Salas

206
00:07:18,230 --> 00:07:15,780
who was the Air Force Captain obviously

207
00:07:20,570 --> 00:07:18,240
retired now who is present at Malmstrom

208
00:07:22,610 --> 00:07:20,580
Air Force Base when the missiles were

209
00:07:24,830 --> 00:07:22,620
shut down famously in that event and

210
00:07:27,170 --> 00:07:24,840
incident and he

211
00:07:30,110 --> 00:07:27,180
did I get that right he recorded himself

212
00:07:31,689 --> 00:07:30,120
his interview with arrow

213
00:07:33,490 --> 00:07:31,699

um yeah that's right

214

00:07:35,629 --> 00:07:33,500

yeah

215

00:07:37,490 --> 00:07:35,639

in in different states they have

216

00:07:38,809 --> 00:07:37,500

different parts again some of them both

217

00:07:41,510 --> 00:07:38,819

people have to say yes some of the one

218

00:07:43,969 --> 00:07:41,520

person could say yes so yeah he recorded

219

00:07:45,469 --> 00:07:43,979

it I hope it was legally otherwise he's

220

00:07:47,270 --> 00:07:45,479

going to be in a bit of trouble but uh

221

00:07:50,150 --> 00:07:47,280

yeah it was interestingly I know yeah

222

00:07:51,290 --> 00:07:50,160

yeah and the clappers played on the on

223

00:07:53,450 --> 00:07:51,300

like I said on the good trouble show

224

00:07:57,469 --> 00:07:53,460

it's quite a quite a short clip

225

00:07:59,870 --> 00:07:57,479

um was it just me or did that clip make

226

00:08:02,150 --> 00:07:59,880

Arrow sound a bit incompetent and

227

00:08:04,189 --> 00:08:02,160

inefficient I expected it to be like a

228

00:08:06,170 --> 00:08:04,199

professional Mr Salas you're being

229

00:08:09,409 --> 00:08:06,180

recorded by arrow and I'm gonna it was

230

00:08:11,689 --> 00:08:09,419

more like a uh yeah we don't really know

231

00:08:13,610 --> 00:08:11,699

um yeah I mean that yeah I can't yeah

232

00:08:17,450 --> 00:08:13,620

we've checked that but we've not really

233

00:08:19,490 --> 00:08:17,460

been able to get that and it was really

234

00:08:21,230 --> 00:08:19,500

I think it highlighted for me when you

235

00:08:22,969 --> 00:08:21,240

know we talk about people think the

236

00:08:25,909 --> 00:08:22,979

government the big bad government and

237

00:08:27,950 --> 00:08:25,919

you know it's it's a big well-oiled

238

00:08:30,170 --> 00:08:27,960

well-run system and it's really not it's

239

00:08:32,149 --> 00:08:30,180

people that work in offices and

240

00:08:33,769 --> 00:08:32,159

departments behind desks that tie into

241

00:08:35,510 --> 00:08:33,779

other departments and those have

242

00:08:38,630 --> 00:08:35,520

corridors which link into bigger

243

00:08:41,870 --> 00:08:38,640

corridors and it just it it wasn't

244

00:08:43,670 --> 00:08:41,880

surprising to me and to your point it

245

00:08:46,610 --> 00:08:43,680

ties in with that recent events comment

246

00:08:48,829 --> 00:08:46,620

you made that it's better to focus on

247

00:08:51,949 --> 00:08:48,839

recent events because the further back

248

00:08:54,470 --> 00:08:51,959

you go the easier it is for them to

249

00:08:57,410 --> 00:08:54,480

either play dumb or probably quite

250

00:08:59,269 --> 00:08:57,420

rightly say we don't have that data or

251

00:09:01,070 --> 00:08:59,279

the I think they mentioned on that clip

252

00:09:02,990 --> 00:09:01,080

the arrow clip with Robert Salas that

253

00:09:04,850 --> 00:09:03,000

the tapes are gone they're lost they

254

00:09:06,350 --> 00:09:04,860

don't have them anymore who can you ask

255

00:09:08,509 --> 00:09:06,360

because the people who were involved at

256

00:09:10,370 --> 00:09:08,519

the time are either incredibly old now

257

00:09:12,470 --> 00:09:10,380

or they've passed away they're not going

258

00:09:14,210 --> 00:09:12,480

to remember oh Dan do you remember 65

259

00:09:16,009 --> 00:09:14,220

years ago the data tapes from you know

260

00:09:18,050 --> 00:09:16,019

the radar we had at the time where do

261

00:09:21,170 --> 00:09:18,060

you think those would be now no I idea I

262

00:09:22,850 --> 00:09:21,180

mean retired 35 years ago yeah 100

263

00:09:23,930 --> 00:09:22,860

um someone commented that the B2 bomber

264

00:09:24,949 --> 00:09:23,940

tapes have been lost you know someone

265

00:09:26,329 --> 00:09:24,959

put them somewhere they don't know where

266

00:09:27,769 --> 00:09:26,339

they are I misplaced my airpods today

267

00:09:29,630 --> 00:09:27,779

you know there's things that are

268

00:09:31,130 --> 00:09:29,640

important to us in this place but it's

269

00:09:32,509 --> 00:09:31,140

you're absolutely right we have to

270

00:09:34,070 --> 00:09:32,519

remember that the organizations are full

271

00:09:35,090 --> 00:09:34,080

of different people

272

00:09:36,590 --> 00:09:35,100

um there were a lot of comments today

273

00:09:38,210 --> 00:09:36,600

about you know these guys are gonna lie

274

00:09:39,769 --> 00:09:38,220

to us on the panel and so on so forth

275

00:09:40,910 --> 00:09:39,779

and I was just thinking I was like I

276

00:09:42,650 --> 00:09:40,920

really don't think these are the guys

277

00:09:45,110 --> 00:09:42,660

that you know would be in on the secret

278

00:09:46,970 --> 00:09:45,120

you know there's no kind of data dump in

279

00:09:48,650 --> 00:09:46,980

the nasty NASA employee initiation

280

00:09:50,150 --> 00:09:48,660

process when you get a job there that

281

00:09:52,250 --> 00:09:50,160

kind of says oh actually yeah we edit

282

00:09:55,190 --> 00:09:52,260

the videos and we hide UFOs all the time

283

00:09:58,009 --> 00:09:55,200

these people seem very genuine in their

284

00:10:00,230 --> 00:09:58,019

intent here and if I was one of the

285

00:10:01,910 --> 00:10:00,240

secret Keepers I mean I wouldn't tell

286

00:10:03,350 --> 00:10:01,920

anyone at the organization that I was

287

00:10:05,210 --> 00:10:03,360

taking their raw data and kind of

288

00:10:08,329 --> 00:10:05,220

keeping it and there was a certain point

289

00:10:10,370 --> 00:10:08,339

that they made about data and uh I think

290

00:10:12,110 --> 00:10:10,380

it was the guy from the FAA said that

291

00:10:15,350 --> 00:10:12,120

they don't have unprocessed data which

292

00:10:16,490 --> 00:10:15,360

means that you know a good comparison is

293

00:10:17,870 --> 00:10:16,500

Chris Manor when he's talking about

294

00:10:20,030 --> 00:10:17,880

stuff that's detected they're on

295

00:10:22,130 --> 00:10:20,040

satellites coming in from space

296

00:10:24,230 --> 00:10:22,140

the UAP stuff is going to be outliers

297

00:10:25,550 --> 00:10:24,240

and in terms of keeping that data around

298

00:10:26,870 --> 00:10:25,560

you generally don't if you're doing

299

00:10:28,550 --> 00:10:26,880

stats you know you get rid of the

300

00:10:30,110 --> 00:10:28,560

outliers and you look at your Trends and

301

00:10:31,970 --> 00:10:30,120

patterns without them that's the stuff

302

00:10:33,230 --> 00:10:31,980

we need now and it seems like we just

303

00:10:35,990 --> 00:10:33,240

don't have it because we didn't keep the

304

00:10:37,730 --> 00:10:36,000

raw data and it's frustrating but you

305

00:10:39,470 --> 00:10:37,740

know if someone's gone in and scooped up

306

00:10:41,449 --> 00:10:39,480

the raw Data before they deleted it cool

307

00:10:43,490 --> 00:10:41,459

but you don't really know where that is

308

00:10:44,810 --> 00:10:43,500

and you know Nadia Drake for example

309

00:10:46,550 --> 00:10:44,820

doesn't know where it is she's just

310

00:10:48,110 --> 00:10:46,560

working on what she has you know yeah

311

00:10:49,670 --> 00:10:48,120

these you're right when you say these

312

00:10:52,790 --> 00:10:49,680

aren't the folks who are sitting in the

313

00:10:54,949 --> 00:10:52,800

room as they airbrush uaps out of the

314

00:10:56,930 --> 00:10:54,959

Martian landscape or you know the

315

00:10:58,730 --> 00:10:56,940

moonphobus and whatever that may or may

316

00:11:00,710 --> 00:10:58,740

not have on it that they're going ah you

317

00:11:03,050 --> 00:11:00,720

know what we've got this cracking HD

318

00:11:04,670 --> 00:11:03,060

photo of a tower yeah let's just brush

319

00:11:06,470 --> 00:11:04,680

that out and stick it stick the raw file

320

00:11:07,730 --> 00:11:06,480

on these aren't the folks that are

321

00:11:09,170 --> 00:11:07,740

sitting there doing that kind of stuff

322

00:11:10,910 --> 00:11:09,180

they aren't the ones that have been

323

00:11:12,590 --> 00:11:10,920

there for 30 40 years in the background

324

00:11:15,470 --> 00:11:12,600

and monitoring what happens when it

325

00:11:17,150 --> 00:11:15,480

happens and yeah that's just these

326

00:11:19,730 --> 00:11:17,160

aren't those people I mean they could be

327

00:11:21,769 --> 00:11:19,740

but I very very very much doubt it and

328

00:11:23,870 --> 00:11:21,779

like you see this was a group of of

329

00:11:25,790 --> 00:11:23,880

scientists academics who have been

330

00:11:27,470 --> 00:11:25,800

called in to to try and make this as

331

00:11:30,170 --> 00:11:27,480

independent as possible

332

00:11:32,090 --> 00:11:30,180

um on the face of it anyway so yeah it

333

00:11:35,090 --> 00:11:32,100

looked to me like there were the

334

00:11:36,949 --> 00:11:35,100

language is positive that they were they

335

00:11:38,810 --> 00:11:36,959

were quite open I like the format of it

336

00:11:40,610 --> 00:11:38,820

being like an open discussion in meeting

337

00:11:42,410 --> 00:11:40,620

where they were actually questioning

338

00:11:43,970 --> 00:11:42,420

each other and making points off the

339

00:11:45,650 --> 00:11:43,980

back of what each other

340

00:11:47,210 --> 00:11:45,660

um were saying as well

341

00:11:48,710 --> 00:11:47,220

um it was like watching them kind of

342

00:11:50,389 --> 00:11:48,720

brainstorm in front of you you know and

343

00:11:51,889 --> 00:11:50,399

I I appreciate that I want to be in that

344

00:11:54,470 --> 00:11:51,899

room when they're doing their job I give

345

00:11:55,670 --> 00:11:54,480

anything yeah and something that struck

346

00:11:57,410 --> 00:11:55,680

me as well as

347

00:11:58,550 --> 00:11:57,420

when we talked about this the first time

348

00:12:01,069 --> 00:11:58,560

and we were saying they should go back

349

00:12:02,810 --> 00:12:01,079

through the archival footage I realized

350

00:12:04,310 --> 00:12:02,820

in listening to to these people talk

351

00:12:06,050 --> 00:12:04,320

given their backgrounds and their

352

00:12:07,850 --> 00:12:06,060

expertise and their skill sets similar

353

00:12:09,949 --> 00:12:07,860

to what you said Dan it's all very well

354

00:12:12,530 --> 00:12:09,959

people like me and you and any number of

355

00:12:14,990 --> 00:12:12,540

folks listening are watching this we see

356

00:12:16,670 --> 00:12:15,000

some of those famous videos of UFOs in

357

00:12:18,230 --> 00:12:16,680

space do you remember the one where it

358

00:12:21,250 --> 00:12:18,240

shows you the the kind of the earth

359

00:12:23,569 --> 00:12:21,260

curven and sorry flight Arthurs

360

00:12:25,850 --> 00:12:23,579

yeah it comes in another Flash and it

361

00:12:27,470 --> 00:12:25,860

zooms away okay and we can point to that

362

00:12:28,970 --> 00:12:27,480

and go ha that's intelligent movement

363

00:12:31,430 --> 00:12:28,980

that's moved out the way something was

364

00:12:32,870 --> 00:12:31,440

fired at it these scientists are not

365

00:12:34,550 --> 00:12:32,880

going to watch that and go oh Christ

366

00:12:36,769 --> 00:12:34,560

there's an alien spaceship yeah so

367

00:12:39,110 --> 00:12:36,779

that's that's right they are going to

368

00:12:41,030 --> 00:12:39,120

look at that and say we need all the

369

00:12:43,790 --> 00:12:41,040

other data that would be around that to

370

00:12:45,949 --> 00:12:43,800

point to exactly what this is and what

371

00:12:47,569 --> 00:12:45,959

it isn't because they might not even

372

00:12:51,050 --> 00:12:47,579

know what

373

00:12:53,449 --> 00:12:51,060

you know that they are there is as we

374

00:12:55,009 --> 00:12:53,459

say and I I try to get an analogy for it

375

00:12:56,870 --> 00:12:55,019

and a really bad one with my story or

376

00:12:58,569 --> 00:12:56,880

but I I don't believe it you're gonna be

377

00:13:01,610 --> 00:12:58,579

doing allergies come on

378

00:13:03,650 --> 00:13:01,620

so I bet looking at a messy Cutlery

379

00:13:06,230 --> 00:13:03,660

drawer okay and determining how many

380

00:13:08,329 --> 00:13:06,240

Forks you have before you've taken all

381

00:13:10,069 --> 00:13:08,339

the crap out of it tidied it and then

382

00:13:11,569 --> 00:13:10,079

started putting things back together in

383

00:13:12,710 --> 00:13:11,579

like a nice and neat order you know

384

00:13:14,329 --> 00:13:12,720

looking at your shitty drawer with all

385

00:13:16,069 --> 00:13:14,339

your stuff going I've got 10 Forks but

386

00:13:17,690 --> 00:13:16,079

if you do it the right way and you pull

387

00:13:19,910 --> 00:13:17,700

everything out find the stuff you have

388

00:13:22,009 --> 00:13:19,920

put it back you go actually I've got

389

00:13:23,750 --> 00:13:22,019

seven Forks you find the conditioner of

390

00:13:24,949 --> 00:13:23,760

them the make of them and maybe you find

391

00:13:26,690 --> 00:13:24,959

out a few other things about them as

392

00:13:28,190 --> 00:13:26,700

well and that's what they kind of have

393

00:13:30,110 --> 00:13:28,200

to do because you need all that other

394

00:13:32,150 --> 00:13:30,120

data they're not going to watch a video

395

00:13:34,250 --> 00:13:32,160

and say it's probably an alien spaceship

396

00:13:35,750 --> 00:13:34,260

because that's not how this works for

397

00:13:38,449 --> 00:13:35,760

them and it's not how their minds work

398

00:13:39,949 --> 00:13:38,459

either people like me and you how many

399

00:13:41,750 --> 00:13:39,959

times do I know will there be videos

400

00:13:44,569 --> 00:13:41,760

that mean you look at and will get to go

401
00:13:46,490 --> 00:13:44,579
fast or uh which was talked about and

402
00:13:48,350 --> 00:13:46,500
we'll go ah well given what we've been

403
00:13:50,150 --> 00:13:48,360
told that's that's like something

404
00:13:53,290 --> 00:13:50,160
non-human that's likely exotic

405
00:13:56,650 --> 00:13:53,300
technology but someone else with a more

406
00:14:00,530 --> 00:13:56,660
mathematical pragmatic logical

407
00:14:02,690 --> 00:14:00,540
science-based mindset goes ah I'm going

408
00:14:04,430 --> 00:14:02,700
to do all the work here first

409
00:14:06,230 --> 00:14:04,440
and you know they come up with a

410
00:14:08,030 --> 00:14:06,240
different conclusion not to say that was

411
00:14:09,829 --> 00:14:08,040
correct actually can we talk about the

412
00:14:11,090 --> 00:14:09,839
go fast thing yeah I was literally just

413
00:14:12,769 --> 00:14:11,100

going to go in yeah because there's

414

00:14:15,170 --> 00:14:12,779

there's a rich conversation point right

415

00:14:16,310 --> 00:14:15,180

but go go ahead wasn't expecting that to

416

00:14:17,870 --> 00:14:16,320

come up

417

00:14:19,790 --> 00:14:17,880

um that they would bring up you know one

418

00:14:22,129 --> 00:14:19,800

of there was no Infamous three videos

419

00:14:24,530 --> 00:14:22,139

that were released or leaked as we know

420

00:14:28,190 --> 00:14:24,540

I get one of them is around beforehand

421

00:14:29,810 --> 00:14:28,200

Etc back in uh 2017 now but the for

422

00:14:31,550 --> 00:14:29,820

those that may or may not remember the

423

00:14:33,050 --> 00:14:31,560

go fast was the kind of tic-tac-looking

424

00:14:35,870 --> 00:14:33,060

object shooting across the surface of

425

00:14:37,370 --> 00:14:35,880

the ocean the famous Warhol got it oh

426

00:14:39,350 --> 00:14:37,380

what the is that thing you know

427

00:14:41,389 --> 00:14:39,360

audio that you hear everywhere

428

00:14:42,470 --> 00:14:41,399

um they have basically had one of the

429

00:14:46,689 --> 00:14:42,480

scientists have you got his name there

430

00:14:54,670 --> 00:14:50,750

I do have his name here Josh Johnson Dr

431

00:14:58,970 --> 00:14:57,170

that's what it likes to be called yeah

432

00:15:00,230 --> 00:14:58,980

um so Dr Josh who went through all those

433

00:15:01,670 --> 00:15:00,240

years of training for us to call him

434

00:15:03,590 --> 00:15:01,680

Josh s

435

00:15:06,050 --> 00:15:03,600

um he basically gave a breakdown didn't

436

00:15:08,870 --> 00:15:06,060

he using the data that's on the screen

437

00:15:10,550 --> 00:15:08,880

of why he believes the object is only

438

00:15:12,230 --> 00:15:10,560

moving actually at 40 miles an hour

439

00:15:14,769 --> 00:15:12,240

which is in keeping with the wind speed

440

00:15:18,050 --> 00:15:14,779

and it could likely be a balloon

441

00:15:19,910 --> 00:15:18,060

no that's caused a bit of a flap online

442

00:15:22,370 --> 00:15:19,920

from the the limited time I spent online

443

00:15:25,009 --> 00:15:22,380

this afternoon and this evening that um

444

00:15:26,870 --> 00:15:25,019

won the pilots have all said otherwise

445

00:15:28,550 --> 00:15:26,880

there's also been people like Chris

446

00:15:30,949 --> 00:15:28,560

mailing Lou Alexander who have talked

447

00:15:33,410 --> 00:15:30,959

about that object performs a right angle

448

00:15:35,389 --> 00:15:33,420

turn apparently in the longer version of

449

00:15:36,829 --> 00:15:35,399

the video but we have to say again we

450

00:15:38,329 --> 00:15:36,839

have never seen the longer version of

451
00:15:40,310 --> 00:15:38,339
the video You Know The Wider Community

452
00:15:41,870 --> 00:15:40,320
we've only heard there is a longer

453
00:15:43,730 --> 00:15:41,880
version of the video

454
00:15:47,569 --> 00:15:43,740
um but

455
00:15:49,610 --> 00:15:47,579
that's uh uh Josh so I would call him

456
00:15:52,910 --> 00:15:49,620
Joseph Josh Dr Josh

457
00:15:55,129 --> 00:15:52,920
um Josh s he has from the data presented

458
00:15:57,050 --> 00:15:55,139
to him come up with a conclusion using

459
00:15:59,150 --> 00:15:57,060
basic trigonometry as he says what were

460
00:16:00,650 --> 00:15:59,160
your thoughts on what is presented it

461
00:16:01,970 --> 00:16:00,660
was really interesting it brought to

462
00:16:04,370 --> 00:16:01,980
mind the the point we were talking about

463
00:16:06,769 --> 00:16:04,380

a few weeks back where you know

464

00:16:08,509 --> 00:16:06,779

what expert would people listen to on

465

00:16:10,189 --> 00:16:08,519

this subject and so many people have

466

00:16:11,569 --> 00:16:10,199

done this work with go fast I'm saying

467

00:16:12,470 --> 00:16:11,579

that it's anomalous I'm saying that it's

468

00:16:14,509 --> 00:16:12,480

not

469

00:16:16,670 --> 00:16:14,519

um and it was interesting to hear you

470

00:16:18,710 --> 00:16:16,680

know a NASA expert break this down for

471

00:16:20,449 --> 00:16:18,720

us and he didn't take any work from the

472

00:16:22,310 --> 00:16:20,459

Internet or social media accounts or you

473

00:16:24,410 --> 00:16:22,320

know from the the game developer who

474

00:16:26,509 --> 00:16:24,420

likes to look at these things he did it

475

00:16:28,009 --> 00:16:26,519

all himself and whether you love it or

476

00:16:29,870 --> 00:16:28,019

hate it that's his conclusion you don't

477

00:16:32,110 --> 00:16:29,880

have to agree with it but you would need

478

00:16:35,269 --> 00:16:32,120

to respond with you know scientific

479

00:16:36,769 --> 00:16:35,279

robust kind of response in a

480

00:16:38,810 --> 00:16:36,779

peer-reviewed manner

481

00:16:40,370 --> 00:16:38,820

um I'd like to see him present a

482

00:16:42,050 --> 00:16:40,380

peer-reviewed paper on it even if it was

483

00:16:43,730 --> 00:16:42,060

short just to start that conversation or

484

00:16:47,150 --> 00:16:43,740

back and forth because you know probably

485

00:16:49,310 --> 00:16:47,160

Matthew siddecas from the seu uh the

486

00:16:50,689 --> 00:16:49,320

scientific Coalition for UAP studies he

487

00:16:52,850 --> 00:16:50,699

would probably refute that you know and

488

00:16:54,769 --> 00:16:52,860

come back out with his own paper that's

489

00:16:57,370 --> 00:16:54,779

the conversation we're looking at and

490

00:17:00,230 --> 00:16:57,380

and seeing the different reactions to

491

00:17:02,629 --> 00:17:00,240

Josh's uh presentation

492

00:17:04,549 --> 00:17:02,639

it just made me kind of realize that the

493

00:17:08,689 --> 00:17:04,559

bias inherent in this conversation and

494

00:17:10,309 --> 00:17:08,699

on all sides on all states yeah 100 on

495

00:17:11,929 --> 00:17:10,319

all sides you know we all have it and

496

00:17:14,270 --> 00:17:11,939

we've got to be mindful of that because

497

00:17:16,370 --> 00:17:14,280

you can't just go oh well I disagree in

498

00:17:19,069 --> 00:17:16,380

my gut therefore you know Josh is

499

00:17:21,110 --> 00:17:19,079

incompetent he's clearly competent but

500

00:17:22,490 --> 00:17:21,120

we need to see why he decided these

501
00:17:24,110 --> 00:17:22,500
things and try and understand it you

502
00:17:26,409 --> 00:17:24,120
know instead of just saying just is

503
00:17:28,490 --> 00:17:26,419
wrong and not presenting any information

504
00:17:31,789 --> 00:17:28,500
uh it tickled me a little bit that

505
00:17:33,289 --> 00:17:31,799
Graham brendel on social media was kind

506
00:17:34,610 --> 00:17:33,299
of asking like oh they should go in on

507
00:17:36,110 --> 00:17:34,620
Gimbal and have a look and then go fast

508
00:17:38,630 --> 00:17:36,120
popped up and I was like oh yeah close

509
00:17:41,510 --> 00:17:38,640
so close grave yeah

510
00:17:43,130 --> 00:17:41,520
um but they did um Kirkpatrick did at

511
00:17:45,770 --> 00:17:43,140
one point talk about

512
00:17:47,570 --> 00:17:45,780
Center jettors with another video that

513
00:17:49,549 --> 00:17:47,580

he presented which you know just side

514

00:17:50,930 --> 00:17:49,559

note that's three new UAP videos we've

515

00:17:52,730 --> 00:17:50,940

gotten out of the dod in the past two

516

00:17:54,650 --> 00:17:52,740

months that's kind of cool was this the

517

00:17:56,750 --> 00:17:54,660

video of the three star or the three

518

00:17:58,789 --> 00:17:56,760

dots yeah and it was like because at

519

00:18:00,289 --> 00:17:58,799

first they presented it as if ah this is

520

00:18:02,810 --> 00:18:00,299

really interesting here's a UAP video

521

00:18:04,190 --> 00:18:02,820

and the three dots come along and he

522

00:18:06,110 --> 00:18:04,200

mentions that it looks like they're

523

00:18:07,970 --> 00:18:06,120

moving but they're not moving it's just

524

00:18:09,890 --> 00:18:07,980

the sensor as you say moving side to

525

00:18:11,630 --> 00:18:09,900

side it shows the commercial airliner

526

00:18:13,850 --> 00:18:11,640

flying underneath going from left to

527

00:18:15,710 --> 00:18:13,860

right as you would expect so these three

528

00:18:17,090 --> 00:18:15,720

dots aren't commercial airlines are they

529

00:18:19,850 --> 00:18:17,100

because there's a commercial airline

530

00:18:22,070 --> 00:18:19,860

flying however they then mentioned it

531

00:18:24,049 --> 00:18:22,080

was resolved and they found out based on

532

00:18:26,390 --> 00:18:24,059

date location time everything they had

533

00:18:29,690 --> 00:18:26,400

these objects were just other airlines

534

00:18:32,390 --> 00:18:29,700

but flying away towards or away from

535

00:18:33,529 --> 00:18:32,400

basically they were further away than

536

00:18:35,690 --> 00:18:33,539

they initially thought yeah something

537

00:18:37,970 --> 00:18:35,700

like that that was it yeah yeah Sean

538

00:18:39,770 --> 00:18:37,980

Sean spoke about the the gesso being not

539

00:18:41,090 --> 00:18:39,780

from the camera moving and stuff like

540

00:18:42,710 --> 00:18:41,100

that but actually from the sensor trying

541

00:18:44,630 --> 00:18:42,720

to stabilize itself which I thought was

542

00:18:46,010 --> 00:18:44,640

maybe a little bit of shade at gimbal

543

00:18:48,169 --> 00:18:46,020

because that's the solution there

544

00:18:49,850 --> 00:18:48,179

supposedly for some people that you know

545

00:18:51,590 --> 00:18:49,860

the the whole thing kind of pivoted and

546

00:18:53,029 --> 00:18:51,600

it makes it look like there's a there's

547

00:18:54,350 --> 00:18:53,039

a rotating object there but it's not

548

00:18:55,850 --> 00:18:54,360

really rotating

549

00:18:58,190 --> 00:18:55,860

um I thought that was a little you know

550

00:19:01,250 --> 00:18:58,200

almost a wink to wiping gimbal off the

551
00:19:03,169 --> 00:19:01,260
table but for me that explanation didn't

552
00:19:04,370 --> 00:19:03,179
cut it you know I love watch Sean

553
00:19:06,470 --> 00:19:04,380
capacitor is doing and stuff like that

554
00:19:07,850 --> 00:19:06,480
but they were all perfectly equally

555
00:19:09,710 --> 00:19:07,860
spaced

556
00:19:10,850 --> 00:19:09,720
um you know nothing's perfect in this

557
00:19:12,230 --> 00:19:10,860
way that one will be a little more

558
00:19:14,150 --> 00:19:12,240
forward than the rest you know maybe

559
00:19:16,070 --> 00:19:14,160
something like that I I'd really love

560
00:19:17,810 --> 00:19:16,080
again to see that peer-reviewed data and

561
00:19:19,430 --> 00:19:17,820
he said that he's going to present her

562
00:19:21,650 --> 00:19:19,440
on a website so I look forward to that

563
00:19:23,270 --> 00:19:21,660

and that transparency you know do you

564

00:19:25,549 --> 00:19:23,280

think just on what you said there

565

00:19:28,490 --> 00:19:25,559

there's any danger that some of these

566

00:19:29,450 --> 00:19:28,500

cases that are being resolved quote

567

00:19:31,730 --> 00:19:29,460

unquote

568

00:19:34,370 --> 00:19:31,740

on

569

00:19:37,789 --> 00:19:34,380

shouldn't have been resolved as you know

570

00:19:41,150 --> 00:19:37,799

something prosaic and that potentially

571

00:19:43,070 --> 00:19:41,160

you're relying on their word de NATO to

572

00:19:44,630 --> 00:19:43,080

not maybe go ah nah just yeah it's

573

00:19:46,490 --> 00:19:44,640

probably our lane let's just resolve it

574

00:19:47,750 --> 00:19:46,500

when actually was it something else

575

00:19:49,190 --> 00:19:47,760

because that's what you're getting at

576

00:19:51,049 --> 00:19:49,200

with your and you're right about the

577

00:19:53,150 --> 00:19:51,059

distance and but then again just look

578

00:19:55,130 --> 00:19:53,160

weird but then here's two lemons though

579

00:19:57,409 --> 00:19:55,140

certainly talking about why these people

580

00:19:58,970 --> 00:19:57,419

who know better uh it's not commercial

581

00:20:00,370 --> 00:19:58,980

we're kind of making their own points

582

00:20:03,110 --> 00:20:00,380

aren't we but yeah yeah

583

00:20:05,270 --> 00:20:03,120

it's like it shouldn't be that yeah I

584

00:20:06,529 --> 00:20:05,280

think those three things in a row and

585

00:20:08,029 --> 00:20:06,539

then why are they all flying in a row

586

00:20:10,430 --> 00:20:08,039

like that and I get to be at different

587

00:20:11,870 --> 00:20:10,440

distances yeah and and I feel like a few

588

00:20:13,549 --> 00:20:11,880

of the scientists on the panel kind of

589

00:20:15,650 --> 00:20:13,559

brought up these questions and were like

590

00:20:17,390 --> 00:20:15,660

hmm okay we'll take you at your word for

591

00:20:19,310 --> 00:20:17,400

now but we'd like to see the data behind

592

00:20:21,049 --> 00:20:19,320

this decision and and Sean's always been

593

00:20:22,610 --> 00:20:21,059

very open about how they make these

594

00:20:24,350 --> 00:20:22,620

decisions right that it goes to two

595

00:20:26,930 --> 00:20:24,360

independent teams one in the IC or

596

00:20:29,510 --> 00:20:26,940

intelligence Community the other one in

597

00:20:31,250 --> 00:20:29,520

a kind of more kind of scientific-minded

598

00:20:32,870 --> 00:20:31,260

group will look at it and then he brings

599

00:20:34,549 --> 00:20:32,880

those things together and Compares them

600

00:20:36,770 --> 00:20:34,559

and then they have a final kind of

601
00:20:38,690 --> 00:20:36,780
powwow on deciding you know whereas

602
00:20:40,370 --> 00:20:38,700
ultimately whether it's resolve the

603
00:20:42,529 --> 00:20:40,380
weather it's not so it's gone through a

604
00:20:44,029 --> 00:20:42,539
few people already but he did say in the

605
00:20:45,169 --> 00:20:44,039
hearings that peer-reviewed papers is

606
00:20:47,090 --> 00:20:45,179
what they were going to present on these

607
00:20:48,350 --> 00:20:47,100
things so you know I won't I won't judge

608
00:20:49,430 --> 00:20:48,360
or get mad at him until I get to read

609
00:20:51,110 --> 00:20:49,440
that and

610
00:20:53,090 --> 00:20:51,120
maybe maybe I'll learn something or two

611
00:20:54,169 --> 00:20:53,100
yeah yeah I think the two teams are send

612
00:20:56,390 --> 00:20:54,179
them to I've got the names of the

613
00:20:58,330 --> 00:20:56,400

individuals it's one as a Midwest and

614

00:21:01,090 --> 00:20:58,340

others John Ramirez

615

00:21:03,110 --> 00:21:01,100

yeah

616

00:21:07,130 --> 00:21:03,120

can you imagine

617

00:21:09,529 --> 00:21:07,140

um yeah so for me uh interesting stuff

618

00:21:10,909 --> 00:21:09,539

uh Sean Kilpatrick's presentation we saw

619

00:21:14,150 --> 00:21:10,919

some of the slides similar to his

620

00:21:14,810 --> 00:21:14,160

presentation back without cast Angela

621

00:21:18,350 --> 00:21:14,820

brand

622

00:21:20,450 --> 00:21:18,360

um a few weeks ago and yeah I then

623

00:21:22,190 --> 00:21:20,460

didn't get to see a lot of the the

624

00:21:23,810 --> 00:21:22,200

conversation that happened afterwards

625

00:21:26,810 --> 00:21:23,820

what were some of the highlights then

626
00:21:28,190 --> 00:21:26,820
that you may have written down hopefully

627
00:21:31,250 --> 00:21:28,200
yeah

628
00:21:34,930 --> 00:21:31,260
uh Dan has left himself on mute there we

629
00:21:36,950 --> 00:21:34,940
go time stamp that one folks take a shot

630
00:21:38,270 --> 00:21:36,960
old school

631
00:21:39,529 --> 00:21:38,280
um at one point Sean and his

632
00:21:42,409 --> 00:21:39,539
presentation made some recommendations

633
00:21:44,990 --> 00:21:42,419
to NASA and they went from you know

634
00:21:46,549 --> 00:21:45,000
looking at making sure that the data

635
00:21:48,049 --> 00:21:46,559
follows a prescribed format so it's

636
00:21:49,250 --> 00:21:48,059
scientifically viable because they said

637
00:21:51,049 --> 00:21:49,260
that most data collected by

638
00:21:52,490 --> 00:21:51,059

organizations that are out there I

639

00:21:54,350 --> 00:21:52,500

assume they mean Enigma or various other

640

00:21:56,390 --> 00:21:54,360

people like that or organizations like

641

00:21:58,430 --> 00:21:56,400

that isn't scientifically viable there's

642

00:21:59,690 --> 00:21:58,440

like bias in the data

643

00:22:01,190 --> 00:21:59,700

um it was at the citizen science

644

00:22:03,529 --> 00:22:01,200

conversate they had that a few times

645

00:22:05,690 --> 00:22:03,539

they mentioned and I got the impression

646

00:22:07,310 --> 00:22:05,700

again from a limited viewing that some

647

00:22:09,409 --> 00:22:07,320

of them seemed quite far the whole

648

00:22:11,930 --> 00:22:09,419

citizen science aspect of it and others

649

00:22:13,909 --> 00:22:11,940

seem to be a little bit more standoffish

650

00:22:15,649 --> 00:22:13,919

about citizen science and how that may

651
00:22:17,149 --> 00:22:15,659
work yeah well it can kind of Muddy the

652
00:22:19,850 --> 00:22:17,159
data pool right but they talk about

653
00:22:21,649 --> 00:22:19,860
things like apps you know kind of uh

654
00:22:23,330 --> 00:22:21,659
notifying people in the area that

655
00:22:24,950 --> 00:22:23,340
there's an anomalous event going on so

656
00:22:26,510 --> 00:22:24,960
they could get triangulated data and

657
00:22:27,710 --> 00:22:26,520
they a few times said they're not sure

658
00:22:29,690 --> 00:22:27,720
whether they're going to use cell phone

659
00:22:31,730 --> 00:22:29,700
video those and photos because they're

660
00:22:33,409 --> 00:22:31,740
just not good enough yeah um which is an

661
00:22:35,090 --> 00:22:33,419
interesting comparison point to you know

662
00:22:35,810 --> 00:22:35,100
the recent players thing right

663
00:22:37,730 --> 00:22:35,820

um

664

00:22:39,289 --> 00:22:37,740

then Sean was talking about a

665

00:22:41,750 --> 00:22:39,299

large-scale ground-based scientific

666

00:22:43,130 --> 00:22:41,760

instrument evaluation uh which is very

667

00:22:45,110 --> 00:22:43,140

much you know kind of what Galileo

668

00:22:47,210 --> 00:22:45,120

project is doing using earth science

669

00:22:49,130 --> 00:22:47,220

satellite to look at geology and you

670

00:22:52,130 --> 00:22:49,140

know water flow and currents and things

671

00:22:55,010 --> 00:22:52,140

like that uh to look at UAP

672

00:22:58,010 --> 00:22:55,020

um helping the NOAA kind of come up with

673

00:22:59,990 --> 00:22:58,020

data collection platforms for UAP

674

00:23:02,450 --> 00:23:00,000

um I'm gonna trip over this word now but

675

00:23:04,610 --> 00:23:02,460

peer review parametrization of advanced

676
00:23:06,770 --> 00:23:04,620
capabilities not yet engineered

677
00:23:08,510 --> 00:23:06,780
sounds like atip right not peer-reviewed

678
00:23:09,890 --> 00:23:08,520
but looking at

679
00:23:11,090 --> 00:23:09,900
capabilities that have not been

680
00:23:12,950 --> 00:23:11,100
engineered yeah yeah that's exactly

681
00:23:16,370 --> 00:23:12,960
right it was doing yeah

682
00:23:18,529 --> 00:23:16,380
um looking at archives scientifically a

683
00:23:20,210 --> 00:23:18,539
scientific anomalous data review so this

684
00:23:21,409 --> 00:23:20,220
is looking at NASA's archives and seeing

685
00:23:22,970 --> 00:23:21,419
what they can apply there there was a

686
00:23:24,770 --> 00:23:22,980
lot of conversation about

687
00:23:26,029 --> 00:23:24,780
um Ai and machine learning which are one

688
00:23:28,010 --> 00:23:26,039

and the same

689

00:23:29,330 --> 00:23:28,020

um what we call AI Now is really just

690

00:23:31,130 --> 00:23:29,340

you know machine learning is nothing

691

00:23:32,690 --> 00:23:31,140

intelligent about it but we just use the

692

00:23:34,370 --> 00:23:32,700

term

693

00:23:36,830 --> 00:23:34,380

um looking at distributions of sightings

694

00:23:38,570 --> 00:23:36,840

so identifying areas maybe based on

695

00:23:41,330 --> 00:23:38,580

social media and things like that where

696

00:23:43,250 --> 00:23:41,340

these events commonly seem to happen and

697

00:23:44,750 --> 00:23:43,260

also foreign Partnerships and we heard

698

00:23:46,070 --> 00:23:44,760

Dr Sean Kilpatrick say for the first

699

00:23:48,110 --> 00:23:46,080

time that he actually had a meeting with

700

00:23:50,390 --> 00:23:48,120

five eyes last week yeah Forum that's

701
00:23:52,730 --> 00:23:50,400
with the UK New Zealand Australia Canada

702
00:23:54,890 --> 00:23:52,740
and the USA that's big a number of

703
00:23:56,390 --> 00:23:54,900
people probably have got their foia you

704
00:23:57,890 --> 00:23:56,400
know for your engines kind of started on

705
00:23:59,990 --> 00:23:57,900
that and it's really interesting the UK

706
00:24:01,610 --> 00:24:00,000
is typically shum when it comes to

707
00:24:02,810 --> 00:24:01,620
talking about this stuff so it's great

708
00:24:03,830 --> 00:24:02,820
that they're involved and hopefully

709
00:24:06,470 --> 00:24:03,840
they're going to be helpful rather than

710
00:24:09,289 --> 00:24:06,480
hindering you know

711
00:24:10,549 --> 00:24:09,299
um there was a Sean got pushed on the

712
00:24:13,490 --> 00:24:10,559
numbers too

713
00:24:15,230 --> 00:24:13,500

about you know what he said a small

714

00:24:16,789 --> 00:24:15,240

percentage of these are anomalous and

715

00:24:20,149 --> 00:24:16,799

there were 800 reports now because he

716

00:24:21,409 --> 00:24:20,159

integrated the FAA data and uh you know

717

00:24:24,230 --> 00:24:21,419

you can work that out then to be like

718

00:24:26,149 --> 00:24:24,240

what 15 to 40 50 cases that are

719

00:24:27,470 --> 00:24:26,159

seemingly anomalous that's a big load

720

00:24:29,930 --> 00:24:27,480

I'd love to see those you know let's

721

00:24:31,909 --> 00:24:29,940

talk about those things that's a truly

722

00:24:34,730 --> 00:24:31,919

anomalous it's truly anomalous yeah not

723

00:24:37,130 --> 00:24:34,740

just unresolved because yeah but that

724

00:24:38,870 --> 00:24:37,140

would be disappointing if it was imagine

725

00:24:40,310 --> 00:24:38,880

those three dots we have talked about

726

00:24:42,830 --> 00:24:40,320

that they're saying commercial airliners

727

00:24:43,610 --> 00:24:42,840

if they left that as anomalous you would

728

00:24:46,130 --> 00:24:43,620

go

729

00:24:50,270 --> 00:24:46,140

it's still quite vague and disappointing

730

00:24:52,430 --> 00:24:50,280

you'd be hoping those 16 cases are wow

731

00:24:53,750 --> 00:24:52,440

Casey's like we're not going to show you

732

00:24:55,970 --> 00:24:53,760

those because that is the good stuff

733

00:24:57,649 --> 00:24:55,980

yeah and there was a comment uh what is

734

00:24:58,909 --> 00:24:57,659

it you said we see these all over the

735

00:25:00,770 --> 00:24:58,919

world this is talking about the metallic

736

00:25:02,570 --> 00:25:00,780

orbs and we see these make it very

737

00:25:04,010 --> 00:25:02,580

interesting apparent Maneuvers that were

738

00:25:06,649 --> 00:25:04,020

shades of Obama for me you know they're

739

00:25:08,029 --> 00:25:06,659

making patterns and Maneuvers though we

740

00:25:10,010 --> 00:25:08,039

don't really understand what does he

741

00:25:12,470 --> 00:25:10,020

mean by a patent maneuver so not just to

742

00:25:14,630 --> 00:25:12,480

be pernicious about language but I saw

743

00:25:15,890 --> 00:25:14,640

that and I was like a parent Maneuvers I

744

00:25:17,990 --> 00:25:15,900

think just playing it safe same same

745

00:25:19,549 --> 00:25:18,000

with like seemingly anomalous he's kind

746

00:25:21,470 --> 00:25:19,559

of saying yeah it's anomalous as far as

747

00:25:22,909 --> 00:25:21,480

we know right now but with more work we

748

00:25:24,409 --> 00:25:22,919

might realize actually this isn't

749

00:25:27,890 --> 00:25:24,419

Anonymous at all so they can't

750

00:25:29,810 --> 00:25:27,900

definitively say it's anomalous you know

751
00:25:30,950 --> 00:25:29,820
um and yeah so then from there on each

752
00:25:32,750 --> 00:25:30,960
of the panel members kind of gave

753
00:25:34,789 --> 00:25:32,760
presentations Nadia Drake spoke about

754
00:25:36,470 --> 00:25:34,799
framing the UAP issue

755
00:25:38,510 --> 00:25:36,480
um talking about filling in gaps and I

756
00:25:40,430 --> 00:25:38,520
really felt Nadia delivered today there

757
00:25:42,169 --> 00:25:40,440
were a few moments where she really

758
00:25:43,909 --> 00:25:42,179
stood up and said you know thankful for

759
00:25:45,590 --> 00:25:43,919
the work of the DIA the dod but we're

760
00:25:47,269 --> 00:25:45,600
doing this we've got this science will

761
00:25:49,070 --> 00:25:47,279
do this we don't need you guys you know

762
00:25:50,930 --> 00:25:49,080
that it felt like a challenge to them

763
00:25:52,549 --> 00:25:50,940

and I really appreciated that she said

764

00:25:56,149 --> 00:25:52,559

it's not too far job to Define nature

765

00:25:57,950 --> 00:25:56,159

it's our job to to let nature tell us

766

00:26:00,110 --> 00:25:57,960

um she made an analogy about a needle in

767

00:26:02,149 --> 00:26:00,120

a haystack that came back later

768

00:26:04,190 --> 00:26:02,159

um with David grinspoon kind of saying

769

00:26:05,810 --> 00:26:04,200

you know it's it's not even real in the

770

00:26:07,130 --> 00:26:05,820

haystack it's we don't even know we're

771

00:26:09,409 --> 00:26:07,140

looking for a needle at the moment so

772

00:26:11,090 --> 00:26:09,419

how do we do this and that that was a

773

00:26:12,649 --> 00:26:11,100

great little comment uh David grinspoon

774

00:26:15,289 --> 00:26:12,659

for me one of the heroes of this whole

775

00:26:18,649 --> 00:26:15,299

presentation along with her Dr Federica

776

00:26:22,250 --> 00:26:18,659

Bianco both outstanding

777

00:26:23,990 --> 00:26:22,260

um both clearly up for being challenged

778

00:26:25,789 --> 00:26:24,000

in their beliefs you know and being

779

00:26:28,610 --> 00:26:25,799

totally open to what they find so they

780

00:26:31,490 --> 00:26:28,620

it was very encouraging to to hear them

781

00:26:32,750 --> 00:26:31,500

on there do you think on that so a lot

782

00:26:35,450 --> 00:26:32,760

of people when you see this especially

783

00:26:37,250 --> 00:26:35,460

online will not that it's wrong or right

784

00:26:39,590 --> 00:26:37,260

I'm going to sit on the fence we'll

785

00:26:41,210 --> 00:26:39,600

shout about that we've got all the proof

786

00:26:43,010 --> 00:26:41,220

we need we've got all the evidence that

787

00:26:44,570 --> 00:26:43,020

you know the the sources are in the

788

00:26:46,310 --> 00:26:44,580

hangers they're buried under the desert

789

00:26:48,710 --> 00:26:46,320

you know we've got the bases we've got

790

00:26:50,870 --> 00:26:48,720

the tech we've got the tr3b

791

00:26:52,310 --> 00:26:50,880

do you think people have to take a step

792

00:26:54,890 --> 00:26:52,320

back and go look

793

00:26:56,630 --> 00:26:54,900

if we do now have scientists and

794

00:26:58,669 --> 00:26:56,640

academics looking to get involved in

795

00:27:01,010 --> 00:26:58,679

this we have to realize they're going at

796

00:27:03,230 --> 00:27:01,020

it from Square zero not even square one

797

00:27:04,789 --> 00:27:03,240

and you have to forget they're not even

798

00:27:06,590 --> 00:27:04,799

thinking okay we're going after the

799

00:27:09,350 --> 00:27:06,600

aliens here that they're looking at

800

00:27:10,789 --> 00:27:09,360

something anomalous and like you say

801
00:27:13,250 --> 00:27:10,799
that needle in a haystack they don't

802
00:27:15,890 --> 00:27:13,260
even know needles exist yet so they're

803
00:27:18,590 --> 00:27:15,900
literally going at this raw they're

804
00:27:20,330 --> 00:27:18,600
looking for raw data what do you have

805
00:27:22,490 --> 00:27:20,340
that they can start looking at and

806
00:27:24,830 --> 00:27:22,500
literally look for those patterns to say

807
00:27:26,450 --> 00:27:24,840
what have you got that we go wow that's

808
00:27:29,330 --> 00:27:26,460
interesting let's look at that further

809
00:27:32,450 --> 00:27:29,340
without that bias of yeah we're trying

810
00:27:34,970 --> 00:27:32,460
to look for aliens because you need to

811
00:27:37,310 --> 00:27:34,980
forget that we need to forget

812
00:27:38,510 --> 00:27:37,320
not completely but just for for moments

813
00:27:40,669 --> 00:27:38,520

like this and for things like this

814

00:27:43,310 --> 00:27:40,679

forget Roswell forget the Phoenix Lights

815

00:27:45,649 --> 00:27:43,320

forget Betty and Barney Hill forget all

816

00:27:47,510 --> 00:27:45,659

the abduction experiences you have to

817

00:27:50,390 --> 00:27:47,520

just someone throw a shoe at this area

818

00:27:52,610 --> 00:27:50,400

right now 100 yeah but even like even

819

00:27:54,769 --> 00:27:52,620

like massiting like you have to forget

820

00:27:56,990 --> 00:27:54,779

it it's not relevant to what they are

821

00:27:58,730 --> 00:27:57,000

doing but it doesn't mean that they

822

00:28:00,769 --> 00:27:58,740

might not help get the progress to get

823

00:28:02,990 --> 00:28:00,779

to the point where all that stuff comes

824

00:28:05,090 --> 00:28:03,000

back into the conversation for them yeah

825

00:28:07,190 --> 00:28:05,100

I completely agree you know the the way

826

00:28:10,070 --> 00:28:07,200

that they spoke about kind of being able

827

00:28:12,049 --> 00:28:10,080

to tackle this is uh to Define Life as

828

00:28:14,390 --> 00:28:12,059

we know it right to come up with the

829

00:28:15,890 --> 00:28:14,400

signatures in a database where we can

830

00:28:17,330 --> 00:28:15,900

apply machine learning that will just

831

00:28:21,310 --> 00:28:17,340

kind of go cool that's a missile that's

832

00:28:25,070 --> 00:28:23,810

you're working in maths yeah you know

833

00:28:26,210 --> 00:28:25,080

when you would have like an exam an

834

00:28:27,769 --> 00:28:26,220

average one of those that could sit down

835

00:28:29,750 --> 00:28:27,779

and they would show me the equation and

836

00:28:31,850 --> 00:28:29,760

I can go all the answers this but it was

837

00:28:33,649 --> 00:28:31,860

worth seven points and I would struggle

838

00:28:35,450 --> 00:28:33,659

to get seven ways to show how I got

839

00:28:36,470 --> 00:28:35,460

there sure these are the people that can

840

00:28:39,409 --> 00:28:36,480

literally go

841

00:28:42,110 --> 00:28:39,419

never mind the answer we can do all the

842

00:28:43,430 --> 00:28:42,120

work in and get to the answer and that's

843

00:28:46,730 --> 00:28:43,440

that's what we need these are the folks

844

00:28:48,590 --> 00:28:46,740

sorry to interrupt with that stats

845

00:28:50,570 --> 00:28:48,600

I don't have that in me to do that

846

00:28:53,330 --> 00:28:50,580

whereas these people do I'm already at

847

00:28:55,130 --> 00:28:53,340

yes aliens but I need these folks who

848

00:28:56,390 --> 00:28:55,140

are going oh well I'm not getting to

849

00:28:58,010 --> 00:28:56,400

that point yet I'm gonna get the seven

850

00:29:00,289 --> 00:28:58,020

points I'm going to get the seven marks

851
00:29:01,970 --> 00:29:00,299
to get to your answer and that's what we

852
00:29:03,590 --> 00:29:01,980
need and that's important for people

853
00:29:05,690 --> 00:29:03,600
looking in as well you know this very

854
00:29:07,610 --> 00:29:05,700
stigma kept coming up in this event over

855
00:29:09,169 --> 00:29:07,620
and over and over talking about how we

856
00:29:11,210 --> 00:29:09,179
tackle it and

857
00:29:12,950 --> 00:29:11,220
people made the the very relevant point

858
00:29:15,470 --> 00:29:12,960
that the very event taking place today

859
00:29:16,789 --> 00:29:15,480
NASA hosting it hugely reduces the

860
00:29:18,649 --> 00:29:16,799
stigma in terms of you know kind of

861
00:29:21,110 --> 00:29:18,659
getting this forward

862
00:29:22,850 --> 00:29:21,120
um when we look at uh David greenspoon

863
00:29:26,930 --> 00:29:22,860

or Dr David grinspoon Dr greenspoon can

864

00:29:30,230 --> 00:29:28,909

um you know he he said that we're

865

00:29:32,269 --> 00:29:30,240

looking for Life as we know it because

866

00:29:34,789 --> 00:29:32,279

Earth is our one example of a habitable

867

00:29:36,590 --> 00:29:34,799

planet with life that's fair enough you

868

00:29:38,570 --> 00:29:36,600

know he seemed open to kind of you know

869

00:29:39,470 --> 00:29:38,580

he brought the fact that 20 years ago we

870

00:29:41,029 --> 00:29:39,480

didn't think there were any planets

871

00:29:42,830 --> 00:29:41,039

outside the Milky Way and now we're up

872

00:29:45,230 --> 00:29:42,840

to like 5 000 odd

873

00:29:47,769 --> 00:29:45,240

um and and really kind of considering

874

00:29:51,470 --> 00:29:47,779

um he also spoke on

875

00:29:53,510 --> 00:29:51,480

on uh you know one Discovery so if they

876

00:29:55,610 --> 00:29:53,520

were to get data that suggested like a

877

00:29:58,190 --> 00:29:55,620

techno signature or some life out there

878

00:29:59,930 --> 00:29:58,200

some intelligent life that you wouldn't

879

00:30:01,549 --> 00:29:59,940

just announce it right away that you're

880

00:30:03,470 --> 00:30:01,559

gonna send other instruments to go look

881

00:30:05,210 --> 00:30:03,480

for it and and that's a really permanent

882

00:30:06,889 --> 00:30:05,220

Point uh like a month or two ago Jimmy

883

00:30:08,570 --> 00:30:06,899

Church said you know someone emailed me

884

00:30:10,850 --> 00:30:08,580

from James Webb team saying that they

885

00:30:12,110 --> 00:30:10,860

found technological life and that would

886

00:30:13,310 --> 00:30:12,120

really be putting the car in front of

887

00:30:14,750 --> 00:30:13,320

the horse you know you can read things

888

00:30:16,130 --> 00:30:14,760

like that when you know the scientific

889

00:30:17,510 --> 00:30:16,140

process and kind of go no that's not

890

00:30:18,950 --> 00:30:17,520

since you would send a probe you would

891

00:30:21,049 --> 00:30:18,960

send something you're trying to see HMA

892

00:30:23,450 --> 00:30:21,059

church was being sensationalist then I

893

00:30:27,409 --> 00:30:25,310

no I love what Jimmy does don't get me

894

00:30:29,570 --> 00:30:27,419

wrong but you know that that

895

00:30:31,370 --> 00:30:29,580

there's there's almost an inherent logic

896

00:30:32,870 --> 00:30:31,380

to some things that take some of the

897

00:30:35,149 --> 00:30:32,880

more Sensational claims off the table

898

00:30:38,090 --> 00:30:35,159

you know and it's similar too and this

899

00:30:40,370 --> 00:30:38,100

isn't a dig but that Skinwalker Ranch or

900

00:30:42,169 --> 00:30:40,380

a documentary released by James Fox

901
00:30:44,990 --> 00:30:42,179
because we love James and what his work

902
00:30:47,510 --> 00:30:45,000
isn't going to have Smoking Gun

903
00:30:49,970 --> 00:30:47,520
disclosure after six months of

904
00:30:53,149 --> 00:30:49,980
post-production yeah they would have

905
00:30:54,769 --> 00:30:53,159
that out now or in the short term with a

906
00:30:58,130 --> 00:30:54,779
press release and done the right way and

907
00:30:59,990 --> 00:30:58,140
reviewed James Fox if he got the

908
00:31:01,909 --> 00:31:00,000
evidence do you know what James Fox for

909
00:31:03,710 --> 00:31:01,919
example who again like I say we love if

910
00:31:06,350 --> 00:31:03,720
he got the video of the Virginia being

911
00:31:07,730 --> 00:31:06,360
standing there whatever it was he

912
00:31:09,470 --> 00:31:07,740
wouldn't wait and see I'm going to put

913
00:31:11,110 --> 00:31:09,480

this out in a documentary no I don't

914

00:31:13,610 --> 00:31:11,120

think so yeah

915

00:31:15,830 --> 00:31:13,620

yeah he wouldn't he'd be on live news

916

00:31:18,830 --> 00:31:15,840

I've got the video big announcement nine

917

00:31:21,289 --> 00:31:18,840

o'clock on Friday evening here it is

918

00:31:22,909 --> 00:31:21,299

bang there's the video and that's what

919

00:31:24,409 --> 00:31:22,919

would happen or even like a Rogan

920

00:31:27,110 --> 00:31:24,419

potentially it would be like a live Joe

921

00:31:28,310 --> 00:31:27,120

Rogan because modern day but you would

922

00:31:31,070 --> 00:31:28,320

go for the biggest audience which is

923

00:31:32,930 --> 00:31:31,080

still TV so yeah um but yeah no and yeah

924

00:31:33,769 --> 00:31:32,940

Fair Point sorry exactly there was an

925

00:31:35,510 --> 00:31:33,779

interesting point he made about

926
00:31:37,010 --> 00:31:35,520
searching for anomalous things in the

927
00:31:38,990 --> 00:31:37,020
solar system as well that really that's

928
00:31:41,330 --> 00:31:39,000
NASA's kind of remit once you get you

929
00:31:42,950 --> 00:31:41,340
know above a certain height above the

930
00:31:44,450 --> 00:31:42,960
Earth it's all NASA NASA's the only

931
00:31:46,010 --> 00:31:44,460
people looking there

932
00:31:48,289 --> 00:31:46,020
um and that just brought me shades of

933
00:31:49,789 --> 00:31:48,299
umua and throughout this whole thing I

934
00:31:51,470 --> 00:31:49,799
just kept thinking of project Galileo

935
00:31:53,389 --> 00:31:51,480
who released a bunch of peer-reviewed

936
00:31:55,730 --> 00:31:53,399
papers the other day and I'll just I'll

937
00:31:58,250 --> 00:31:55,740
touch on those real quick yeah um that

938
00:31:59,450 --> 00:31:58,260

basically the papers explore different

939

00:32:00,889 --> 00:31:59,460

branches of what they're doing at

940

00:32:02,389 --> 00:32:00,899

project Galileo they were looking at

941

00:32:05,090 --> 00:32:02,399

Interstellar objects Interstellar

942

00:32:07,490 --> 00:32:05,100

meteors UAP UAP Computing and processing

943

00:32:09,370 --> 00:32:07,500

pipelines UAP wide field observations

944

00:32:12,169 --> 00:32:09,380

which is like a wide camera basically

945

00:32:14,450 --> 00:32:12,179

Acoustics radar Network satellite data

946

00:32:15,710 --> 00:32:14,460

you know all the paints kind of focus on

947

00:32:17,149 --> 00:32:15,720

what they would do with it how they

948

00:32:19,430 --> 00:32:17,159

would Define it you know getting to know

949

00:32:21,169 --> 00:32:19,440

the tools and and the parameters of what

950

00:32:24,049 --> 00:32:21,179

they could see on there

951
00:32:25,909 --> 00:32:24,059
um and it almost feels like Galileo

952
00:32:27,230 --> 00:32:25,919
project is because they don't have this

953
00:32:28,850 --> 00:32:27,240
governmental red tape they've just run

954
00:32:30,350 --> 00:32:28,860
with this so when NASA's kind of going

955
00:32:31,970 --> 00:32:30,360
oh yeah maybe we'll make a census system

956
00:32:33,710 --> 00:32:31,980
with multiple different sensors project

957
00:32:35,570 --> 00:32:33,720
Galileo or Avi is just over there going

958
00:32:37,370 --> 00:32:35,580
yeah we we've done this do you want in

959
00:32:39,649 --> 00:32:37,380
on this you know they've made the

960
00:32:41,570 --> 00:32:39,659
software and things like that work for

961
00:32:44,810 --> 00:32:41,580
each other if I copy and paste all those

962
00:32:46,789 --> 00:32:44,820
pure reviewed papers into Dan GPT and

963
00:32:49,010 --> 00:32:46,799

ask that and GPT to summarize it quickly

964

00:32:50,990 --> 00:32:49,020

for me so what what work have they done

965

00:32:53,269 --> 00:32:51,000

what's the impact to this work

966

00:32:56,269 --> 00:32:53,279

so basically it's laying the groundwork

967

00:32:57,769 --> 00:32:56,279

for what we know so that when something

968

00:32:59,510 --> 00:32:57,779

anomalous comes along we can

969

00:33:01,130 --> 00:32:59,520

definitively say it's anomalous and it's

970

00:33:02,990 --> 00:33:01,140

not a trick of the sensor it's not you

971

00:33:04,970 --> 00:33:03,000

know all these other little weird quirks

972

00:33:07,549 --> 00:33:04,980

that are always said to be

973

00:33:10,909 --> 00:33:07,559

um yeah essentially very citizen science

974

00:33:12,289 --> 00:33:10,919

heavy uh and and they're real eager so I

975

00:33:13,549 --> 00:33:12,299

mean I can go through in detail with you

976
00:33:16,190 --> 00:33:13,559
if you want

977
00:33:18,289 --> 00:33:16,200
um but the the few standout things is

978
00:33:19,430 --> 00:33:18,299
Avi used a few new acronyms throughout

979
00:33:22,310 --> 00:33:19,440
the papers

980
00:33:25,490 --> 00:33:22,320
um IMS Interstellar meteors isos

981
00:33:26,690 --> 00:33:25,500
Interstellar objects and etc's not heard

982
00:33:28,789 --> 00:33:26,700
that one before extraterrestrial

983
00:33:30,350 --> 00:33:28,799
technological civilizations

984
00:33:32,330 --> 00:33:30,360
interesting way to talk about it and

985
00:33:33,289 --> 00:33:32,340
today we even heard

986
00:33:36,830 --> 00:33:33,299
um

987
00:33:39,049 --> 00:33:36,840
mentioned in this briefing and it was to

988
00:33:40,610 --> 00:33:39,059

deny that they exist but that phrase

989

00:33:42,470 --> 00:33:40,620

hasn't been out there before this is

990

00:33:43,909 --> 00:33:42,480

like you know you could almost suspect

991

00:33:45,529 --> 00:33:43,919

that it's seeding these kind of ideas

992

00:33:46,610 --> 00:33:45,539

slowly drip your grip with the

993

00:33:47,870 --> 00:33:46,620

disclosure

994

00:33:49,730 --> 00:33:47,880

um if you wanted to think that way to

995

00:33:52,250 --> 00:33:49,740

get to the point of well actually we

996

00:33:55,009 --> 00:33:52,260

said it doesn't exist but we've just got

997

00:33:57,889 --> 00:33:55,019

this piece of data or actually this data

998

00:34:00,529 --> 00:33:57,899

set or we've been looking at x and we've

999

00:34:02,210 --> 00:34:00,539

found why so yeah like you say it's it

1000

00:34:04,130 --> 00:34:02,220

just introduces the language doesn't it

1001
00:34:05,389 --> 00:34:04,140
yeah absolutely and you know if you had

1002
00:34:06,830 --> 00:34:05,399
a bingo card out there I would have

1003
00:34:12,230 --> 00:34:06,840
struck it off even though it denied it

1004
00:34:15,770 --> 00:34:14,149
um but yeah you know we just reiterated

1005
00:34:17,510 --> 00:34:15,780
or they reiterated a lot of what we've

1006
00:34:19,909 --> 00:34:17,520
heard from Galileo project anyway but

1007
00:34:21,290 --> 00:34:19,919
just in a peer-reviewed form and as we

1008
00:34:22,970 --> 00:34:21,300
always say this is the language of

1009
00:34:24,770 --> 00:34:22,980
science this is how we professionalize

1010
00:34:26,329 --> 00:34:24,780
the UAP studies and move things forward

1011
00:34:28,790 --> 00:34:26,339
there

1012
00:34:30,109 --> 00:34:28,800
um they were looking at

1013
00:34:32,389 --> 00:34:30,119

the phrase patterns of life was

1014

00:34:33,950 --> 00:34:32,399

mentioned again the other day and a lot

1015

00:34:35,869 --> 00:34:33,960

of that plays into what Galileo were

1016

00:34:37,909 --> 00:34:35,879

doing essentially identifying what a

1017

00:34:39,950 --> 00:34:37,919

signature of an airplane is or a drone

1018

00:34:43,250 --> 00:34:39,960

and be able to just apply that to data

1019

00:34:45,409 --> 00:34:43,260

gathered and and have these AI or ml

1020

00:34:46,430 --> 00:34:45,419

systems just wipe out the prosaic stuff

1021

00:34:48,230 --> 00:34:46,440

and leave you with the really

1022

00:34:49,909 --> 00:34:48,240

interesting anomalous things to kind of

1023

00:34:51,889 --> 00:34:49,919

work on

1024

00:34:53,869 --> 00:34:51,899

um so yeah that's in a little nutshell

1025

00:34:55,250 --> 00:34:53,879

that's kind of what the Galileo stuff is

1026
00:34:56,510 --> 00:34:55,260
I'd recommend people go reading the

1027
00:34:58,370 --> 00:34:56,520
abstracts they're just like summery

1028
00:34:59,810 --> 00:34:58,380
pieces the front of the papers that you

1029
00:35:01,250 --> 00:34:59,820
know don't get into the math and things

1030
00:35:03,530 --> 00:35:01,260
like that

1031
00:35:05,390 --> 00:35:03,540
um but there's nothing you know there

1032
00:35:07,190 --> 00:35:05,400
are no Bombshells as people like to say

1033
00:35:09,050 --> 00:35:07,200
in there it's just more you know it's a

1034
00:35:10,849 --> 00:35:09,060
big moment it's a seven peer-reviewed

1035
00:35:13,069 --> 00:35:10,859
papers that are out there now and and

1036
00:35:14,810 --> 00:35:13,079
before they were very limited amount um

1037
00:35:16,670 --> 00:35:14,820
it's cool to think that someone from

1038
00:35:18,290 --> 00:35:16,680

Harvard is doing this and they all have

1039

00:35:20,870 --> 00:35:18,300

so many authors as well that it's just

1040

00:35:23,329 --> 00:35:20,880

yeah it's impressive and AVI has a new

1041

00:35:25,609 --> 00:35:23,339

book out in a few months does he what's

1042

00:35:28,250 --> 00:35:25,619

the book yes

1043

00:35:30,950 --> 00:35:28,260

uh the book's called Interstellar and it

1044

00:35:33,589 --> 00:35:30,960

comes out in August 29th

1045

00:35:35,750 --> 00:35:33,599

um would you just just kind of that's

1046

00:35:37,370 --> 00:35:35,760

like a month after we heard the report

1047

00:35:39,890 --> 00:35:37,380

was coming this year Kirkpatrick said

1048

00:35:41,030 --> 00:35:39,900

August 1 on August 1st as the rest of us

1049

00:35:44,329 --> 00:35:41,040

say

1050

00:35:46,430 --> 00:35:44,339

um the the public unclassified UAP

1051
00:35:47,990 --> 00:35:46,440
annual report will come out with updated

1052
00:35:50,030 --> 00:35:48,000
figures and things like that for us to

1053
00:35:52,010 --> 00:35:50,040
dig into and no doubt complain about and

1054
00:35:54,170 --> 00:35:52,020
praise and you know really tear apart

1055
00:35:56,329 --> 00:35:54,180
but again as we always say this is now

1056
00:35:57,770 --> 00:35:56,339
chapter three of a sixth chapter book

1057
00:36:00,050 --> 00:35:57,780
that we're gonna get at the very least

1058
00:36:01,130 --> 00:36:00,060
studying this stuff on the point of view

1059
00:36:04,370 --> 00:36:01,140
of the

1060
00:36:06,109 --> 00:36:04,380
the federal government essentially I

1061
00:36:07,569 --> 00:36:06,119
mean that's been a slow burner so far

1062
00:36:10,010 --> 00:36:07,579
Dan I hope

1063
00:36:11,329 --> 00:36:10,020

soon yeah it's worse than Game of

1064

00:36:13,130 --> 00:36:11,339

Thrones do you think they're definitely

1065

00:36:14,510 --> 00:36:13,140

gonna get the last one in I'm still

1066

00:36:16,730 --> 00:36:14,520

waiting Kiefer Sutherland coming in and

1067

00:36:17,990 --> 00:36:16,740

kicking the door and his daughter being

1068

00:36:21,470 --> 00:36:18,000

kidnapped

1069

00:36:23,510 --> 00:36:21,480

um to round off the NASA stuff then um

1070

00:36:25,370 --> 00:36:23,520

went well what was the final kind of

1071

00:36:26,870 --> 00:36:25,380

moments are we looking at is this

1072

00:36:29,990 --> 00:36:26,880

getting extended are we going to get

1073

00:36:31,910 --> 00:36:30,000

funding for it is this going to continue

1074

00:36:34,190 --> 00:36:31,920

somebody asked about mud funding in the

1075

00:36:35,930 --> 00:36:34,200

in the media conference

1076

00:36:37,370 --> 00:36:35,940

um and the response was like Hey look we

1077

00:36:38,930 --> 00:36:37,380

were just coming up the roadmap we

1078

00:36:41,089 --> 00:36:38,940

didn't give them a budget or anything

1079

00:36:43,010 --> 00:36:41,099

like that really what NASA do is they

1080

00:36:44,750 --> 00:36:43,020

ask a bunch of these independent teams

1081

00:36:46,970 --> 00:36:44,760

to come up with road maps and plans and

1082

00:36:48,410 --> 00:36:46,980

things like that and then during summer

1083

00:36:49,849 --> 00:36:48,420

they will assess it when the report is

1084

00:36:50,930 --> 00:36:49,859

released I think it was end of July they

1085

00:36:52,010 --> 00:36:50,940

said that we'll be able to read that

1086

00:36:53,810 --> 00:36:52,020

yeah

1087

00:36:55,430 --> 00:36:53,820

um and then they'll go from there but

1088

00:36:58,130 --> 00:36:55,440

you know the highlights of five eyes the

1089

00:36:59,930 --> 00:36:58,140

15 to 40 anomalous events in Arrow

1090

00:37:01,970 --> 00:36:59,940

um see an experts really dig into this

1091

00:37:04,609 --> 00:37:01,980

and seem to salivate in the moment you

1092

00:37:06,349 --> 00:37:04,619

know I know Nadia Dr Nadia Drake has

1093

00:37:08,630 --> 00:37:06,359

experienced some kind of backlash online

1094

00:37:10,430 --> 00:37:08,640

and like I said I feel like she had an

1095

00:37:12,710 --> 00:37:10,440

incredible show and today you know like

1096

00:37:14,810 --> 00:37:12,720

for someone that said it's not aliens

1097

00:37:18,109 --> 00:37:14,820

um she certainly seems open to it uh you

1098

00:37:20,390 --> 00:37:18,119

know when you go beyond 140 characters

1099

00:37:22,250 --> 00:37:20,400

um I felt like Dr Kirkpatrick was almost

1100

00:37:23,690 --> 00:37:22,260

nudging NASA to kind of say go on do the

1101
00:37:25,910 --> 00:37:23,700
things I can't because my hands are tied

1102
00:37:27,829 --> 00:37:25,920
in certain ways and that in itself is

1103
00:37:29,630 --> 00:37:27,839
interesting

1104
00:37:32,810 --> 00:37:29,640
um they recommended to look at archival

1105
00:37:34,910 --> 00:37:32,820
data they recommended that a permanent

1106
00:37:37,010 --> 00:37:34,920
NASA office is established look at UAP

1107
00:37:38,150 --> 00:37:37,020
so that the work isn't in vain that was

1108
00:37:39,230 --> 00:37:38,160
when they were talking about harassment

1109
00:37:40,430 --> 00:37:39,240
and things like that and kind of saying

1110
00:37:41,930 --> 00:37:40,440
you know this could go away if the right

1111
00:37:43,190 --> 00:37:41,940
person wanted it to go away do you know

1112
00:37:44,450 --> 00:37:43,200
it's quite funny you would just kind of

1113
00:37:46,130 --> 00:37:44,460

think NASA would have had that stuff

1114

00:37:48,890 --> 00:37:46,140

anyway wouldn't you given it's NASA it

1115

00:37:50,990 --> 00:37:48,900

would yeah yeah yeah you really would

1116

00:37:52,250 --> 00:37:51,000

um and especially with Bill Nelson being

1117

00:37:53,810 --> 00:37:52,260

at the head of IT who was on one of the

1118

00:37:55,550 --> 00:37:53,820

subcommittees that started this whole

1119

00:37:56,750 --> 00:37:55,560

thing anyway with the language

1120

00:37:58,730 --> 00:37:56,760

um you know I can't see it going away

1121

00:37:59,990 --> 00:37:58,740

but the more work they do the more sd6

1122

00:38:02,329 --> 00:38:00,000

do you know what else a lot about like

1123

00:38:04,010 --> 00:38:02,339

imagine we had like an organization for

1124

00:38:07,069 --> 00:38:04,020

the world that was just in charge of the

1125

00:38:08,510 --> 00:38:07,079

oceans and that organization when you

1126

00:38:09,650 --> 00:38:08,520

went to it one day you were like ah so

1127

00:38:11,890 --> 00:38:09,660

who's looking at all the animals in

1128

00:38:17,210 --> 00:38:11,900

there oh but don't look at those yeah

1129

00:38:18,829 --> 00:38:17,220

yeah it could be we don't know yeah the

1130

00:38:20,690 --> 00:38:18,839

space and animal occupies is the absence

1131

00:38:22,609 --> 00:38:20,700

of water so we don't look at that yeah

1132

00:38:26,810 --> 00:38:22,619

exactly so yeah if anything that are

1133

00:38:28,550 --> 00:38:26,820

hindrance um move on uh so yeah and the

1134

00:38:30,050 --> 00:38:28,560

pub public portion of the public

1135

00:38:32,450 --> 00:38:30,060

questions that's one thing I didn't get

1136

00:38:34,790 --> 00:38:32,460

to see yeah I mean anything interesting

1137

00:38:36,710 --> 00:38:34,800

from there so a lot of the questions

1138

00:38:37,910 --> 00:38:36,720

were kind of bundled into subject areas

1139

00:38:39,230 --> 00:38:37,920

because they just have a lot of

1140

00:38:40,370 --> 00:38:39,240

questions they've also said that stuff

1141

00:38:41,930 --> 00:38:40,380

that they didn't get to they'll be

1142

00:38:43,670 --> 00:38:41,940

posting answers to on their website in

1143

00:38:44,870 --> 00:38:43,680

their kind of monster stuff which is

1144

00:38:46,609 --> 00:38:44,880

cool

1145

00:38:49,190 --> 00:38:46,619

um so they spoke about

1146

00:38:50,870 --> 00:38:49,200

uh what data is in the report so again

1147

00:38:52,670 --> 00:38:50,880

they reiterated that they're creating a

1148

00:38:55,190 --> 00:38:52,680

road map it's a better data collection

1149

00:38:57,349 --> 00:38:55,200

not necessarily looking backwards

1150

00:38:58,730 --> 00:38:57,359

um spoke about hiding of info someone

1151
00:39:01,069 --> 00:38:58,740
asked about cutting of the International

1152
00:39:03,829 --> 00:39:01,079
Space Station feed uh to which they said

1153
00:39:05,089 --> 00:39:03,839
you know no not as far as we're aware

1154
00:39:06,550 --> 00:39:05,099
um again these people don't work on

1155
00:39:09,069 --> 00:39:06,560
those cameras they could be disconnected

1156
00:39:10,730 --> 00:39:09,079
because they said no

1157
00:39:13,010 --> 00:39:10,740
you're right

1158
00:39:14,870 --> 00:39:13,020
um Usos Sean Kirkpatrick said that there

1159
00:39:16,310 --> 00:39:14,880
was nothing on record of Uso and that

1160
00:39:18,170 --> 00:39:16,320
anything that goes under the water was

1161
00:39:19,910 --> 00:39:18,180
actually a sensor anomaly and there's

1162
00:39:22,370 --> 00:39:19,920
nothing in those 800 reports he has that

1163
00:39:24,310 --> 00:39:22,380

is a Uso pretty interesting considering

1164

00:39:26,870 --> 00:39:24,320

can you can you smell that then

1165

00:39:28,130 --> 00:39:26,880

is that is it does that smell of cow

1166

00:39:31,780 --> 00:39:28,140

dung is that is that what was

1167

00:39:37,030 --> 00:39:31,790

occasionally yeah smells like BS

1168

00:39:42,530 --> 00:39:38,829

yeah

1169

00:39:45,230 --> 00:39:42,540

then uh solving the stigma as well

1170

00:39:46,730 --> 00:39:45,240

um working with Partners uh got brought

1171

00:39:49,130 --> 00:39:46,740

up where they were just talking about

1172

00:39:50,690 --> 00:39:49,140

you know this was where non-human

1173

00:39:52,130 --> 00:39:50,700

intelligence was mentioned

1174

00:39:53,150 --> 00:39:52,140

um yeah and this was really them talking

1175

00:39:54,230 --> 00:39:53,160

about work in the private space

1176

00:39:56,270 --> 00:39:54,240

companies

1177

00:39:58,370 --> 00:39:56,280

um apparently a bunch of private place

1178

00:40:00,170 --> 00:39:58,380

companies wanted to present today which

1179

00:40:01,970 --> 00:40:00,180

makes you wonder like oh okay does

1180

00:40:04,010 --> 00:40:01,980

SpaceX have some information they maybe

1181

00:40:06,470 --> 00:40:04,020

want to share or you know that'd be

1182

00:40:08,150 --> 00:40:06,480

interesting to hear from them

1183

00:40:09,650 --> 00:40:08,160

um then they spoke about budgeting which

1184

00:40:11,450 --> 00:40:09,660

we already spoke about

1185

00:40:13,550 --> 00:40:11,460

um and also what wouldn't have to do if

1186

00:40:14,870 --> 00:40:13,560

ET was discovered which I thought was

1187

00:40:16,849 --> 00:40:14,880

interesting you know what were they

1188

00:40:19,490 --> 00:40:16,859

actually do and the answer was a lot of

1189

00:40:21,829 --> 00:40:19,500

more science right uh to kind of confirm

1190

00:40:23,750 --> 00:40:21,839

what it is and so on so forth

1191

00:40:25,310 --> 00:40:23,760

um but it just makes my brain kind of go

1192

00:40:26,870 --> 00:40:25,320

to okay so if you send a probe to a

1193

00:40:28,310 --> 00:40:26,880

planet to look at intelligent life that

1194

00:40:31,190 --> 00:40:28,320

intelligent life is good to experience

1195

00:40:33,290 --> 00:40:31,200

their tic tack from us you know it's a

1196

00:40:35,569 --> 00:40:33,300

really interesting thing about

1197

00:40:37,970 --> 00:40:35,579

um they mentioned that more people were

1198

00:40:40,370 --> 00:40:37,980

watching today than watch a typical NASA

1199

00:40:41,750 --> 00:40:40,380

live stream so like you said earlier the

1200

00:40:42,829 --> 00:40:41,760

figures you know people might be looking

1201

00:40:45,050 --> 00:40:42,839

thinking they're low but actually

1202

00:40:47,510 --> 00:40:45,060

there's huge interest in this

1203

00:40:50,630 --> 00:40:47,520

um it's still not still not dead versus

1204

00:40:52,010 --> 00:40:50,640

here which I'll always be my go-to maybe

1205

00:40:53,390 --> 00:40:52,020

if we can get Johnny Depp in court again

1206

00:40:56,630 --> 00:40:53,400

and him talking about it on the stand

1207

00:40:58,609 --> 00:40:56,640

just a sidebar Review AP you know that

1208

00:41:00,589 --> 00:40:58,619

lasted trick

1209

00:41:02,030 --> 00:41:00,599

um but yeah they made the point you know

1210

00:41:05,089 --> 00:41:02,040

they'd be highly driven to share of

1211

00:41:12,650 --> 00:41:05,099

results Captain Jack Arrow nice I like

1212

00:41:15,170 --> 00:41:14,329

um and yeah they were kind of saying you

1213

00:41:17,089 --> 00:41:15,180

know we want to show that we're

1214

00:41:18,230 --> 00:41:17,099

succeeding we're paid to succeed so

1215

00:41:20,210 --> 00:41:18,240

therefore we want to show that we're

1216

00:41:22,310 --> 00:41:20,220

succeeding so if you found something uh

1217

00:41:23,690 --> 00:41:22,320

we would absolutely share it and follow

1218

00:41:25,609 --> 00:41:23,700

it up you know with our International

1219

00:41:27,230 --> 00:41:25,619

partners and things like that we saw in

1220

00:41:29,810 --> 00:41:27,240

a 12-part series building up to it in

1221

00:41:32,930 --> 00:41:29,820

the 12th episode yeah for sure

1222

00:41:35,030 --> 00:41:32,940

um then uh yeah the brainstorming out

1223

00:41:36,710 --> 00:41:35,040

loud needle in the haystack thing like I

1224

00:41:39,170 --> 00:41:36,720

said Heroes for me today were Federica

1225

00:41:40,910 --> 00:41:39,180

Bianco and David grinspoon their names I

1226

00:41:42,349 --> 00:41:40,920

think we should look out for

1227

00:41:43,490 --> 00:41:42,359

um maybe email try and get us through a

1228

00:41:44,870 --> 00:41:43,500

conversation I know you've been talking

1229

00:41:47,630 --> 00:41:44,880

to Nadia

1230

00:41:48,890 --> 00:41:47,640

um for possible future shows Gavin the

1231

00:41:53,030 --> 00:41:48,900

online abuse have all been getting I

1232

00:41:56,210 --> 00:41:55,069

um mentioned that they want to make the

1233

00:41:59,329 --> 00:41:56,220

app

1234

00:42:01,490 --> 00:41:59,339

um and also just after this uh looking

1235

00:42:02,930 --> 00:42:01,500

on the BBC front page boom there it was

1236

00:42:04,849 --> 00:42:02,940

right on the front page really big not

1237

00:42:06,410 --> 00:42:04,859

small not downplaying it not talking

1238

00:42:07,910 --> 00:42:06,420

about oh most of them are solved it was

1239

00:42:09,829 --> 00:42:07,920

talking about right up front in the

1240

00:42:11,630 --> 00:42:09,839

article that a lot of cases are unsolved

1241

00:42:13,609 --> 00:42:11,640

and seem to be anomalous which was kind

1242

00:42:15,290 --> 00:42:13,619

of a sea change right this is this is

1243

00:42:17,690 --> 00:42:15,300

what we get with NASA coming into this

1244

00:42:19,550 --> 00:42:17,700

game and just being honest about it and

1245

00:42:21,589 --> 00:42:19,560

just overall you know it finished and I

1246

00:42:24,410 --> 00:42:21,599

I tend to Elaine and I was like did we

1247

00:42:27,670 --> 00:42:24,420

just watch a full odd bleep in our NASA

1248

00:42:31,130 --> 00:42:27,680

event on ueb when did this become normal

1249

00:42:34,190 --> 00:42:31,140

uh snow Infinity War slash endgame Saga

1250

00:42:35,630 --> 00:42:34,200

but it'll do but I think we've had 42

1251
00:42:37,130 --> 00:42:35,640
minutes on that now thank you for the

1252
00:42:39,230 --> 00:42:37,140
for the recap and all the bullet points

1253
00:42:41,030 --> 00:42:39,240
Dan very much appreciated

1254
00:42:43,730 --> 00:42:41,040
um it was positive I think you said so

1255
00:42:46,490 --> 00:42:43,740
the same more than what I expected and

1256
00:42:48,589 --> 00:42:46,500
fingers crossed after that report we see

1257
00:42:49,910 --> 00:42:48,599
some kind of movement in terms of NASA

1258
00:42:52,130 --> 00:42:49,920
staying involved

1259
00:42:53,210 --> 00:42:52,140
opening up that budget getting more of a

1260
00:42:55,370 --> 00:42:53,220
budget

1261
00:42:57,530 --> 00:42:55,380
to let folks work on this in the way

1262
00:42:58,430 --> 00:42:57,540
that they're suggesting yeah 100 you

1263
00:42:59,690 --> 00:42:58,440

know if there was a five-year-old

1264

00:43:01,490 --> 00:42:59,700

watching today who's inspired to go

1265

00:43:03,530 --> 00:43:01,500

study UAP and do it with all seriousness

1266

00:43:06,050 --> 00:43:03,540

boom mission accomplished as far as I

1267

00:43:08,569 --> 00:43:06,060

probably need someone 18 plus but I

1268

00:43:10,069 --> 00:43:08,579

appreciate it yeah

1269

00:43:11,750 --> 00:43:10,079

um one one thing to mention just before

1270

00:43:13,370 --> 00:43:11,760

we close out Michael Masters Dr Michael

1271

00:43:14,569 --> 00:43:13,380

Masters has a new book

1272

00:43:16,130 --> 00:43:14,579

um Olaf and I had the pleasure of doing

1273

00:43:18,170 --> 00:43:16,140

the cover which we thought was wonderful

1274

00:43:19,790 --> 00:43:18,180

we had a good time doing it but

1275

00:43:21,890 --> 00:43:19,800

um it's called Revelation the future

1276

00:43:23,089 --> 00:43:21,900

human past and just as a little kind of

1277

00:43:24,650 --> 00:43:23,099

summary

1278

00:43:26,809 --> 00:43:24,660

um the back of the book blurb says a

1279

00:43:30,050 --> 00:43:26,819

society teaches on the brink of nuclear

1280

00:43:31,849 --> 00:43:30,060

apocalypse Marcus Moksha and oversexed

1281

00:43:34,069 --> 00:43:31,859

alcoholic Anthropologist encounters

1282

00:43:36,290 --> 00:43:34,079

dodon a telepathic woman from the future

1283

00:43:39,170 --> 00:43:36,300

who recognizes his import to the fate of

1284

00:43:41,089 --> 00:43:39,180

humanity she recruits him to join her

1285

00:43:43,010 --> 00:43:41,099

team of time traveling scientists aboard

1286

00:43:44,809 --> 00:43:43,020

the UFO as they Venture back to the

1287

00:43:46,490 --> 00:43:44,819

distant past seeking to enact a change

1288

00:43:48,290 --> 00:43:46,500

that will bring peace to his time and

1289

00:43:51,710 --> 00:43:48,300

avert the Great War so this is really

1290

00:43:53,809 --> 00:43:51,720

Michael running with his idea of these

1291

00:43:55,490 --> 00:43:53,819

UFOs the time travelers from the future

1292

00:43:56,930 --> 00:43:55,500

and kind of thinking okay in fiction how

1293

00:43:58,250 --> 00:43:56,940

can I explore what that would actually

1294

00:43:59,930 --> 00:43:58,260

look like from their point of view

1295

00:44:01,910 --> 00:43:59,940

really interesting

1296

00:44:04,849 --> 00:44:01,920

Michael's on the podcast in two weeks to

1297

00:44:05,930 --> 00:44:04,859

discuss that in detail yeah I've got one

1298

00:44:08,030 --> 00:44:05,940

of the first copies of the book before

1299

00:44:10,309 --> 00:44:08,040

Michael has a copy actually yeah because

1300

00:44:11,510 --> 00:44:10,319

of the way he sent out it was like yeah

1301

00:44:13,370 --> 00:44:11,520

um you're going to get it before me so

1302

00:44:15,470 --> 00:44:13,380

send me pictures of what it looks like I

1303

00:44:17,089 --> 00:44:15,480

was like okay yeah and that was the same

1304

00:44:19,910 --> 00:44:17,099

first time I saw the cover as well so

1305

00:44:21,410 --> 00:44:19,920

that that's wild nice uh right anyway

1306

00:44:23,809 --> 00:44:21,420

yeah so something we hadn't talked about

1307

00:44:25,370 --> 00:44:23,819

last week and that happened and there's

1308

00:44:28,130 --> 00:44:25,380

been follow-up too and it's worth kind

1309

00:44:31,250 --> 00:44:28,140

of going over was Jeremy Corbell and

1310

00:44:33,710 --> 00:44:31,260

George Knapp announced uh high noon uh

1311

00:44:36,050 --> 00:44:33,720

new UA UAP case

1312

00:44:38,710 --> 00:44:36,060

um it was the Mojave Desert triangle and

1313

00:44:41,270 --> 00:44:38,720

that dropped last week to a lot of

1314

00:44:43,550 --> 00:44:41,280

scuttlebutt and Fanfare and everything

1315

00:44:45,230 --> 00:44:43,560

in between and essentially to recap

1316

00:44:46,910 --> 00:44:45,240

there were lights in the sky observed

1317

00:44:48,890 --> 00:44:46,920

and recorded by Marines out in the

1318

00:44:50,510 --> 00:44:48,900

Mojave theater and a test area test

1319

00:44:53,569 --> 00:44:50,520

range that's about a thousand square

1320

00:44:56,329 --> 00:44:53,579

miles in April 2021.

1321

00:44:58,730 --> 00:44:56,339

um the the lights were like a five

1322

00:45:00,650 --> 00:44:58,740

points of light in a sort of triangle

1323

00:45:02,630 --> 00:45:00,660

looking formation from angle of the

1324

00:45:05,450 --> 00:45:02,640

picture that was posted online the

1325

00:45:07,309 --> 00:45:05,460

initial episode of weaponized presented

1326

00:45:10,130 --> 00:45:07,319

it with the audio from the Marines

1327

00:45:12,589 --> 00:45:10,140

filming it and we were told that from a

1328

00:45:15,410 --> 00:45:12,599

few different video clips of this that

1329

00:45:17,569 --> 00:45:15,420

the longer the objects where they are or

1330

00:45:19,010 --> 00:45:17,579

the object was a solid body it was a

1331

00:45:21,170 --> 00:45:19,020

craft and it was there for up to half an

1332

00:45:22,730 --> 00:45:21,180

hour 35 minutes none of the videos

1333

00:45:26,510 --> 00:45:22,740

showed that

1334

00:45:28,069 --> 00:45:26,520

um got a lot of questions online I think

1335

00:45:31,550 --> 00:45:28,079

it was the usual split off while this is

1336

00:45:33,230 --> 00:45:31,560

amazing down to Absolute nothing Burger

1337

00:45:35,089 --> 00:45:33,240

um a few people done some work online

1338

00:45:36,890 --> 00:45:35,099

including John Greenwald I know Mick

1339

00:45:38,569 --> 00:45:36,900

West done some work on it and you've got

1340

00:45:41,210 --> 00:45:38,579

to give them credit when it's due

1341

00:45:42,890 --> 00:45:41,220

because they very quickly found dates

1342

00:45:44,750 --> 00:45:42,900

and times relating to a military

1343

00:45:45,890 --> 00:45:44,760

training exercise at the same date and

1344

00:45:48,349 --> 00:45:45,900

time

1345

00:45:50,210 --> 00:45:48,359

um where our flares were dropped this is

1346

00:45:54,130 --> 00:45:50,220

where things get a bit muddied though

1347

00:45:56,690 --> 00:45:54,140

because you had testimony from Marines

1348

00:45:59,150 --> 00:45:56,700

confirming or they were at least saying

1349

00:46:00,530 --> 00:45:59,160

they saw a body or an apparent body of a

1350

00:46:02,809 --> 00:46:00,540

craft and that the object was there for

1351

00:46:05,510 --> 00:46:02,819

a long time however if you just look at

1352

00:46:07,250 --> 00:46:05,520

the data and we we always say and other

1353

00:46:10,010 --> 00:46:07,260

people say we need more data on these

1354

00:46:12,530 --> 00:46:10,020

things the data really does point to it

1355

00:46:14,809 --> 00:46:12,540

was flares dropping there were even some

1356

00:46:17,930 --> 00:46:14,819

some other pictures and videos showing

1357

00:46:20,569 --> 00:46:17,940

The Descent of the flares and none of

1358

00:46:22,370 --> 00:46:20,579

the supposed longer videos bear in mind

1359

00:46:23,750 --> 00:46:22,380

you're on mute Dan when you talk oh

1360

00:46:27,349 --> 00:46:23,760

sorry I just said Thank you to gnosis

1361

00:46:30,410 --> 00:46:27,359

for his little graphic of the yeah

1362

00:46:32,450 --> 00:46:30,420

um none of the longer videos are

1363

00:46:34,370 --> 00:46:32,460

actually there or have been seen by

1364

00:46:36,410 --> 00:46:34,380

Jeremy Corbell so I get to that that was

1365

00:46:38,569 --> 00:46:36,420

what happened in the first week and but

1366

00:46:40,550 --> 00:46:38,579

in the follow-up Jeremy corbill and

1367

00:46:43,490 --> 00:46:40,560

George Knapp have just released a show

1368

00:46:45,230 --> 00:46:43,500

where they're looking over that initial

1369

00:46:47,150 --> 00:46:45,240

episode they've done they said they

1370

00:46:48,770 --> 00:46:47,160

worked on it for two years George Knapp

1371

00:46:51,109 --> 00:46:48,780

is quick to follow up it wasn't two

1372

00:46:52,910 --> 00:46:51,119

years of solid research it was on and

1373

00:46:54,650 --> 00:46:52,920

off obviously they're busy people as

1374

00:46:56,089 --> 00:46:54,660

well so for anyone who pointed out

1375

00:46:58,370 --> 00:46:56,099

you've done this for two years and this

1376

00:47:00,710 --> 00:46:58,380

is what you've got that wasn't the case

1377

00:47:02,270 --> 00:47:00,720

um so in the follow-up napping corbella

1378

00:47:04,910 --> 00:47:02,280

showed they only presented dinner

1379

00:47:06,950 --> 00:47:04,920

showcase and then said it's time to

1380

00:47:08,569 --> 00:47:06,960

investigate giving off the impression

1381

00:47:11,030 --> 00:47:08,579

that they they put out there for other

1382

00:47:13,910 --> 00:47:11,040

people to then do some leg work they

1383

00:47:16,670 --> 00:47:13,920

played some additional audio of Marines

1384

00:47:19,130 --> 00:47:16,680

calling up to say what they believe they

1385

00:47:20,690 --> 00:47:19,140

saw including formed a craft it wasn't

1386

00:47:21,950 --> 00:47:20,700

flares dropping they know what flares

1387

00:47:24,230 --> 00:47:21,960

look like

1388

00:47:26,210 --> 00:47:24,240

um so let's get to it then

1389

00:47:28,790 --> 00:47:26,220

part of the issue I feel with this Dan

1390

00:47:30,950 --> 00:47:28,800

is people who don't like Jerry mccorbell

1391

00:47:32,510 --> 00:47:30,960

of which there are plenty and Jeremy

1392

00:47:33,950 --> 00:47:32,520

knows that as well and to a lesson

1393

00:47:35,270 --> 00:47:33,960

extent people who can have bash George

1394

00:47:36,170 --> 00:47:35,280

Knapp

1395

00:47:38,210 --> 00:47:36,180

um

1396

00:47:40,130 --> 00:47:38,220

aren't going to like anything they put

1397

00:47:42,349 --> 00:47:40,140

out and if it was other people may have

1398

00:47:43,730 --> 00:47:42,359

had more time and patience for it uh

1399

00:47:45,710 --> 00:47:43,740

there's a bit of a cult of personality

1400

00:47:47,630 --> 00:47:45,720

that goes on around that

1401

00:47:49,190 --> 00:47:47,640

um but they put that information out

1402

00:47:51,470 --> 00:47:49,200

there and they got what they wanted

1403

00:47:54,890 --> 00:47:51,480

quickly and that was the public working

1404

00:47:56,690 --> 00:47:54,900

on this uh and like I say the work drunk

1405

00:48:00,530 --> 00:47:56,700

Dreamworld Mick West and others have

1406

00:48:01,910 --> 00:48:00,540

done seem to point to it was flares so

1407

00:48:03,710 --> 00:48:01,920

what what's been your initial thoughts

1408

00:48:06,109 --> 00:48:03,720

on all of this and then can I wherever

1409

00:48:08,510 --> 00:48:06,119

that yeah it's it's a really curious

1410

00:48:09,950 --> 00:48:08,520

case like like most of these drops I

1411

00:48:11,569 --> 00:48:09,960

tend to like to sit back and just see

1412

00:48:12,890 --> 00:48:11,579

what data falls out from it from the

1413

00:48:14,569 --> 00:48:12,900

discussion instead of you know going

1414

00:48:17,150 --> 00:48:14,579

knee deep in it and

1415

00:48:18,290 --> 00:48:17,160

yeah just making my mind upon limited

1416

00:48:19,670 --> 00:48:18,300

data

1417

00:48:22,430 --> 00:48:19,680

um you know we had a statement from

1418

00:48:24,170 --> 00:48:22,440

Susan Goff who who pointed out the uh

1419

00:48:25,790 --> 00:48:24,180

weapons and tactics instructor course

1420

00:48:27,470 --> 00:48:25,800

was being conducted and that's where a

1421

00:48:29,569 --> 00:48:27,480

lot of the activity for the Humvees and

1422

00:48:32,270 --> 00:48:29,579

helicopters that we heard about was but

1423

00:48:34,250 --> 00:48:32,280

I would say Jeremy and George were very

1424

00:48:35,210 --> 00:48:34,260

upfront in that first episode saying you

1425

00:48:37,130 --> 00:48:35,220

know we're putting this out there

1426

00:48:38,990 --> 00:48:37,140

because we want people to help us

1427

00:48:40,490 --> 00:48:39,000

in a way I kind of wish they did that

1428

00:48:41,690 --> 00:48:40,500

earlier instead of holding it back for

1429

00:48:43,250 --> 00:48:41,700

two years

1430

00:48:45,650 --> 00:48:43,260

um you know we seem to get pretty far

1431

00:48:47,630 --> 00:48:45,660

within a short amount of time uh once it

1432

00:48:49,309 --> 00:48:47,640

was released you know

1433

00:48:51,410 --> 00:48:49,319

um and like you say there's that Cult of

1434

00:48:53,510 --> 00:48:51,420

Personality at Play We heard initially

1435

00:48:55,430 --> 00:48:53,520

there were about 50 Witnesses probably

1436

00:48:56,870 --> 00:48:55,440

closer to you know eight that's actually

1437

00:48:58,550 --> 00:48:56,880

speaking

1438

00:49:01,069 --> 00:48:58,560

um and it's really curious to hear those

1439

00:49:02,870 --> 00:49:01,079

guys talk what we have to remember is

1440

00:49:04,730 --> 00:49:02,880

that their expertise at their expertise

1441

00:49:05,930 --> 00:49:04,740

you know one of the guys for example

1442

00:49:08,990 --> 00:49:05,940

said

1443

00:49:11,030 --> 00:49:09,000

um I'm a player expert they don't fall

1444

00:49:12,530 --> 00:49:11,040

for that long when we heard from other

1445

00:49:14,569 --> 00:49:12,540

places already that actually some

1446

00:49:16,250 --> 00:49:14,579

players do fall for a half hour and we

1447

00:49:17,390 --> 00:49:16,260

really can't count that out and neither

1448

00:49:19,550 --> 00:49:17,400

of those people are being malicious

1449

00:49:21,170 --> 00:49:19,560

they're just sharing what they know yeah

1450

00:49:22,609 --> 00:49:21,180

and that's what we've got to kind of you

1451

00:49:24,470 --> 00:49:22,619

know be easy on people and kind of say

1452

00:49:27,670 --> 00:49:24,480

okay sure you saw that let's kind of dig

1453

00:49:34,190 --> 00:49:30,890

again maliciously but and this this is

1454

00:49:35,990 --> 00:49:34,200

not to downplay any Marines or combat

1455

00:49:37,849 --> 00:49:36,000

veterans or anything like that but you

1456

00:49:39,410 --> 00:49:37,859

can misremember any of it I remember

1457

00:49:42,109 --> 00:49:39,420

things I'd done in School playing

1458

00:49:44,270 --> 00:49:42,119

football at lunchtime and I scored a

1459

00:49:46,849 --> 00:49:44,280

goal from 35 yards out into the top

1460

00:49:48,470 --> 00:49:46,859

Corner great volume everyone ran after

1461

00:49:50,329 --> 00:49:48,480

me and shield probably didn't happen

1462

00:49:51,650 --> 00:49:50,339

like that but it's just the way my

1463

00:49:53,030 --> 00:49:51,660

memories remember that you've got your

1464

00:49:54,309 --> 00:49:53,040

medal as well right and then you played

1465

00:49:57,410 --> 00:49:54,319

for real

1466

00:49:59,990 --> 00:49:57,420

madridor 100 yeah and that's just that's

1467

00:50:02,329 --> 00:50:00,000

just what happens to to memory

1468

00:50:04,309 --> 00:50:02,339

um and the confirmation base comes into

1469

00:50:06,050 --> 00:50:04,319

it some of the folks and I'll be really

1470

00:50:07,730 --> 00:50:06,060

honest and I messaged Jeremy about this

1471

00:50:10,069 --> 00:50:07,740

after as well just kind of having a bit

1472

00:50:11,270 --> 00:50:10,079

of a back and forward on it I felt some

1473

00:50:15,050 --> 00:50:11,280

of the

1474

00:50:18,410 --> 00:50:15,060

sounded like they were kind of like UFO

1475

00:50:19,849 --> 00:50:18,420

fans sure like they would maybe lean

1476

00:50:22,490 --> 00:50:19,859

towards and I might be wrong and just

1477

00:50:24,950 --> 00:50:22,500

from what I heard they would maybe lean

1478

00:50:27,770 --> 00:50:24,960

towards this being like a UFO event

1479

00:50:30,410 --> 00:50:27,780

and look for that and I wonder like you

1480

00:50:31,790 --> 00:50:30,420

say of those other Witnesses one of the

1481

00:50:33,530 --> 00:50:31,800

one of the Marines talks about the

1482

00:50:34,849 --> 00:50:33,540

hooches which is what they I think where

1483

00:50:37,069 --> 00:50:34,859

they live or stay or something it

1484

00:50:38,390 --> 00:50:37,079

sounded like just from the context and

1485

00:50:39,829 --> 00:50:38,400

that there were around eight to ten

1486

00:50:42,349 --> 00:50:39,839

people in each Hutch and there were like

1487

00:50:44,809 --> 00:50:42,359

10 hutches lined up and it made out

1488

00:50:46,490 --> 00:50:44,819

there was probably 100 odd Witnesses so

1489

00:50:47,930 --> 00:50:46,500

would they all say the same thing or

1490

00:50:50,390 --> 00:50:47,940

would if you played more audio would

1491

00:50:51,650 --> 00:50:50,400

more of them have said nah it was flares

1492

00:50:53,870 --> 00:50:51,660

they dropped and they were gone like

1493

00:50:55,670 --> 00:50:53,880

that was it it's been conveyed a lot to

1494

00:50:57,530 --> 00:50:55,680

the Phoenix Lights right and and you

1495

00:50:59,210 --> 00:50:57,540

cannot have the same sorry I'll back off

1496

00:51:01,730 --> 00:50:59,220

that one then I'm going to talk about

1497

00:51:02,870 --> 00:51:01,740

post-processing on photos

1498

00:51:05,030 --> 00:51:02,880

um just before we get to the Phoenix

1499

00:51:06,650 --> 00:51:05,040

Lights there's there's kind of a thing

1500

00:51:08,750 --> 00:51:06,660

that happens in smartphone photos these

1501
00:51:10,490 --> 00:51:08,760
days a few months back there uh Samsung

1502
00:51:12,170 --> 00:51:10,500
got accused of replacing the moon in

1503
00:51:13,970 --> 00:51:12,180
shots yeah people were zooming in and

1504
00:51:15,470 --> 00:51:13,980
taking pictures of the Moon and someone

1505
00:51:16,670 --> 00:51:15,480
found that they were uniform throughout

1506
00:51:18,950 --> 00:51:16,680
all these pictures and it would reveal

1507
00:51:21,049 --> 00:51:18,960
that actually the AI or you know the the

1508
00:51:23,750 --> 00:51:21,059
chips in the phone were replacing the

1509
00:51:25,370 --> 00:51:23,760
picture with a detailed picture of the

1510
00:51:27,710 --> 00:51:25,380
moon so it looked better than it was

1511
00:51:30,109 --> 00:51:27,720
this happens all the time on phones even

1512
00:51:33,049 --> 00:51:30,119
on on an iPhone when you're taking a raw

1513
00:51:34,370 --> 00:51:33,059

photo it'll still process this stuff so

1514

00:51:36,890 --> 00:51:34,380

we need to be aware that sometimes

1515

00:51:38,510 --> 00:51:36,900

lights Bunch together far away they will

1516

00:51:40,190 --> 00:51:38,520

be rendered as if there's a shape there

1517

00:51:41,569 --> 00:51:40,200

it doesn't mean there was a shape there

1518

00:51:43,010 --> 00:51:41,579

you know I can take pictures of stars

1519

00:51:45,109 --> 00:51:43,020

and do that

1520

00:51:47,089 --> 00:51:45,119

um I saw examples of people taking

1521

00:51:48,710 --> 00:51:47,099

pictures of like cityscapes and if you

1522

00:51:50,750 --> 00:51:48,720

zoomed in on the windows the way that

1523

00:51:52,430 --> 00:51:50,760

the the kind of algorithms or all the

1524

00:51:55,069 --> 00:51:52,440

shapes on the Windows was letters so

1525

00:51:57,349 --> 00:51:55,079

they were random like juttred up words

1526

00:51:58,849 --> 00:51:57,359

kind of just on the side of buildings

1527

00:52:00,710 --> 00:51:58,859

and letters and things like that that

1528

00:52:02,210 --> 00:52:00,720

just weren't present in the photo so

1529

00:52:04,190 --> 00:52:02,220

you've got to be real mindful of that

1530

00:52:05,510 --> 00:52:04,200

and I think that's why NASA were kind of

1531

00:52:07,309 --> 00:52:05,520

saying you know we can't take these at

1532

00:52:08,870 --> 00:52:07,319

face value anymore it's not just the

1533

00:52:10,670 --> 00:52:08,880

camera doesn't lie the camera lies all

1534

00:52:12,950 --> 00:52:10,680

the time and we know about AI photos now

1535

00:52:14,750 --> 00:52:12,960

and things like that that we really need

1536

00:52:17,030 --> 00:52:14,760

to you know

1537

00:52:18,530 --> 00:52:17,040

kind of educate ourselves on it and know

1538

00:52:20,630 --> 00:52:18,540

what they do

1539

00:52:22,130 --> 00:52:20,640

one of the arguments and this is where

1540

00:52:25,910 --> 00:52:22,140

the Phoenix light thing comes in was

1541

00:52:28,250 --> 00:52:25,920

that there was a a genuine UAP event and

1542

00:52:32,170 --> 00:52:28,260

the lights were there and flares were

1543

00:52:34,790 --> 00:52:32,180

dropped to eliminate the craft sure now

1544

00:52:37,130 --> 00:52:34,800

this is easily similar to the original

1545

00:52:38,870 --> 00:52:37,140

Phoenix Lights event where people

1546

00:52:40,069 --> 00:52:38,880

people saw the craft there was the

1547

00:52:41,750 --> 00:52:40,079

thousands of Witnesses were sort of

1548

00:52:43,370 --> 00:52:41,760

flying overhead and over the over the

1549

00:52:45,170 --> 00:52:43,380

town but then

1550

00:52:47,210 --> 00:52:45,180

the flares were dropped over the

1551
00:52:49,130 --> 00:52:47,220
mountain range and that's what the video

1552
00:52:52,130 --> 00:52:49,140
is that people see online in the famous

1553
00:52:54,650 --> 00:52:52,140
shot as of the flares

1554
00:52:56,450 --> 00:52:54,660
now is there a chance that's what

1555
00:52:58,309 --> 00:52:56,460
happened here that there was a UAP event

1556
00:53:00,170 --> 00:52:58,319
but they used the fact they were on a

1557
00:53:01,970 --> 00:53:00,180
military trading range they let the

1558
00:53:04,250 --> 00:53:01,980
object up I tried to light the object up

1559
00:53:05,930 --> 00:53:04,260
where it was knowing that well this is

1560
00:53:07,790 --> 00:53:05,940
going to be a good opportunity to to

1561
00:53:09,589 --> 00:53:07,800
quash this if indeed it does come out

1562
00:53:11,329 --> 00:53:09,599
and I wonder

1563
00:53:13,790 --> 00:53:11,339

and I've got this done as a discussion

1564

00:53:15,530 --> 00:53:13,800

Point here people are very suspicious of

1565

00:53:18,109 --> 00:53:15,540

the government right and they play Down

1566

00:53:20,390 --> 00:53:18,119

genuine events why in this case have

1567

00:53:22,730 --> 00:53:20,400

people been so quick to accept that it's

1568

00:53:25,250 --> 00:53:22,740

likely flares and nothing to see here

1569

00:53:27,589 --> 00:53:25,260

when it's happened before and people

1570

00:53:30,470 --> 00:53:27,599

have unless quickly jump on board again

1571

00:53:32,750 --> 00:53:30,480

I'm not saying what I'm still seeing I

1572

00:53:35,390 --> 00:53:32,760

think it looked like it was flares but

1573

00:53:38,450 --> 00:53:35,400

is this because of who presented the

1574

00:53:40,490 --> 00:53:38,460

information or how it was presented

1575

00:53:42,890 --> 00:53:40,500

all the strength of the evidence against

1576

00:53:44,990 --> 00:53:42,900

it I'm still unsure and all that at the

1577

00:53:46,609 --> 00:53:45,000

minute yeah that's a great show you know

1578

00:53:47,870 --> 00:53:46,619

sometimes the dod we're like oh yeah

1579

00:53:49,130 --> 00:53:47,880

that's great thank you for the statement

1580

00:53:50,870 --> 00:53:49,140

that backs up what I was thinking before

1581

00:53:52,190 --> 00:53:50,880

and then other times it's like oh you're

1582

00:53:54,290 --> 00:53:52,200

talking nonsense that doesn't I don't

1583

00:53:56,750 --> 00:53:54,300

agree with that at all guilty of that

1584

00:53:58,010 --> 00:53:56,760

everyone's yeah that's this is the bias

1585

00:54:00,230 --> 00:53:58,020

that we were talking about earlier right

1586

00:54:01,910 --> 00:54:00,240

we we take what's useful to us if we

1587

00:54:05,329 --> 00:54:01,920

drop the rest when really we should be

1588

00:54:06,589 --> 00:54:05,339

looking at everything and it's why I

1589

00:54:08,510 --> 00:54:06,599

really love the idea of different

1590

00:54:10,130 --> 00:54:08,520

independent study teams tackling these

1591

00:54:11,569 --> 00:54:10,140

things because they're free of that bias

1592

00:54:13,910 --> 00:54:11,579

in different ways and then a combined

1593

00:54:15,829 --> 00:54:13,920

picture can kind of paint a a decent

1594

00:54:17,450 --> 00:54:15,839

presentation of the event you know even

1595

00:54:18,890 --> 00:54:17,460

the mayor since Phoenix Lights happened

1596

00:54:20,210 --> 00:54:18,900

has come out and said yeah I saw it too

1597

00:54:21,829 --> 00:54:20,220

and it was crazy and I'm really sorry

1598

00:54:25,010 --> 00:54:21,839

that I downplayed it at the time and so

1599

00:54:26,630 --> 00:54:25,020

on so forth uh so we've always got to be

1600

00:54:28,370 --> 00:54:26,640

mindful that of these things that they

1601
00:54:29,990 --> 00:54:28,380
can happen and who am I to say that

1602
00:54:31,670 --> 00:54:30,000
someone didn't see a UAP you know I I

1603
00:54:33,290 --> 00:54:31,680
feel like I've seen crazy things in the

1604
00:54:34,730 --> 00:54:33,300
sky that some people tell me were not

1605
00:54:37,010 --> 00:54:34,740
crazy things

1606
00:54:39,109 --> 00:54:37,020
um so I just I don't have the authority

1607
00:54:41,809 --> 00:54:39,119
to say no I've got to take everything

1608
00:54:45,589 --> 00:54:41,819
seriously and hold it lightly and and

1609
00:54:47,930 --> 00:54:45,599
kind of paint a picture that way

1610
00:54:50,150 --> 00:54:47,940
um we said when weaponized was first

1611
00:54:52,309 --> 00:54:50,160
announced it was a great opportunity for

1612
00:54:56,210 --> 00:54:52,319
instant gratification and the

1613
00:54:58,250 --> 00:54:56,220

opportunity for napping corbel to

1614

00:54:59,690 --> 00:54:58,260

to drop something but then talk about it

1615

00:55:01,370 --> 00:54:59,700

straight away and then the week after

1616

00:55:02,930 --> 00:55:01,380

follow-up and I don't think there's been

1617

00:55:04,910 --> 00:55:02,940

enough of that follow-up and this seemed

1618

00:55:07,549 --> 00:55:04,920

to be the first show where they really

1619

00:55:09,530 --> 00:55:07,559

got their teeth into to what they talked

1620

00:55:10,849 --> 00:55:09,540

about before and that's that was always

1621

00:55:12,710 --> 00:55:10,859

going to be the beauty of this the

1622

00:55:14,750 --> 00:55:12,720

podcast format for those two

1623

00:55:15,770 --> 00:55:14,760

particularly for me so I'm glad they've

1624

00:55:16,150 --> 00:55:15,780

done it

1625

00:55:17,349 --> 00:55:16,160

um

1626

00:55:19,370 --> 00:55:17,359

[Music]

1627

00:55:22,250 --> 00:55:19,380

testimony was the big thing here and

1628

00:55:24,530 --> 00:55:22,260

we've talked about this before that it's

1629

00:55:26,990 --> 00:55:24,540

hard for some people to just rely on

1630

00:55:28,730 --> 00:55:27,000

testimony for any UFO or UAP event it's

1631

00:55:30,530 --> 00:55:28,740

not everyone's cup of tea it's Marmite

1632

00:55:32,750 --> 00:55:30,540

some folks love it some folks will take

1633

00:55:34,490 --> 00:55:32,760

your story and go bang yeah God that

1634

00:55:36,530 --> 00:55:34,500

sounds incredible others will go is that

1635

00:55:37,790 --> 00:55:36,540

all it is just your word and that's

1636

00:55:39,829 --> 00:55:37,800

that's fine

1637

00:55:41,630 --> 00:55:39,839

um Corbell said that given the testimony

1638

00:55:44,089 --> 00:55:41,640

and the video showing the potential

1639

00:55:46,670 --> 00:55:44,099

dissent that he couldn't dismiss flares

1640

00:55:47,990 --> 00:55:46,680

that he did say which is fair

1641

00:55:50,390 --> 00:55:48,000

um however for him the additional

1642

00:55:52,910 --> 00:55:50,400

witness testimony is what's stopping him

1643

00:55:56,630 --> 00:55:52,920

saying case closed on this at the moment

1644

00:55:58,450 --> 00:55:56,640

for me this case at the minute

1645

00:56:01,970 --> 00:55:58,460

um which very much rests on how much

1646

00:56:03,589 --> 00:56:01,980

value you put into the limited testimony

1647

00:56:04,730 --> 00:56:03,599

provided

1648

00:56:07,730 --> 00:56:04,740

um

1649

00:56:09,650 --> 00:56:07,740

means that it's got to be filed under

1650

00:56:10,730 --> 00:56:09,660

it'd be great if more evidence comes out

1651
00:56:12,770 --> 00:56:10,740
but

1652
00:56:15,230 --> 00:56:12,780
we can go back to another time if that

1653
00:56:19,069 --> 00:56:15,240
happens otherwise you've got to go with

1654
00:56:21,170 --> 00:56:19,079
flares if they can get additional video

1655
00:56:23,569 --> 00:56:21,180
longer video

1656
00:56:26,569 --> 00:56:23,579
um maybe even better quality video

1657
00:56:28,069 --> 00:56:26,579
then maybe more witnesses coming forward

1658
00:56:30,109 --> 00:56:28,079
but right now

1659
00:56:31,309 --> 00:56:30,119
it's it goes down as yeah it was

1660
00:56:34,670 --> 00:56:31,319
probably flares and a bit of

1661
00:56:35,930 --> 00:56:34,680
misidentification and you know hey ho um

1662
00:56:38,750 --> 00:56:35,940
you cannot move on

1663
00:56:41,150 --> 00:56:38,760

I'll ask you that question then I think

1664

00:56:42,849 --> 00:56:41,160

the answer is part one year you're going

1665

00:56:45,290 --> 00:56:42,859

with its flares from what you can tell

1666

00:56:48,170 --> 00:56:45,300

probably like statistically I would say

1667

00:56:50,569 --> 00:56:48,180

probably 90 flares you know right yeah

1668

00:56:52,069 --> 00:56:50,579

um in that way other question though and

1669

00:56:54,710 --> 00:56:52,079

I think I've asked you something similar

1670

00:56:56,150 --> 00:56:54,720

before given given the reaction to this

1671

00:56:58,370 --> 00:56:56,160

and what's happened and how it was

1672

00:56:59,750 --> 00:56:58,380

presented and the follow-up Fallout and

1673

00:57:01,910 --> 00:56:59,760

the everything else

1674

00:57:05,750 --> 00:57:01,920

would you rather we didn't get any drops

1675

00:57:09,170 --> 00:57:05,760

like this I include the LA bruja stuff

1676
00:57:11,089 --> 00:57:09,180
um the corbel stuff from 2019 the Omaha

1677
00:57:13,190 --> 00:57:11,099
the speed in the water

1678
00:57:15,170 --> 00:57:13,200
would you rather none of this stuff ever

1679
00:57:18,349 --> 00:57:15,180
came out the rubber duck footage

1680
00:57:19,670 --> 00:57:18,359
to then pour over and look at and and

1681
00:57:23,510 --> 00:57:19,680
discuss

1682
00:57:26,750 --> 00:57:23,520
or are you are you okay with this

1683
00:57:28,370 --> 00:57:26,760
for me I feel I like these releases

1684
00:57:30,530 --> 00:57:28,380
who I would have liked is for this one

1685
00:57:32,990 --> 00:57:30,540
to come out with the training kind of

1686
00:57:34,549 --> 00:57:33,000
exercise data I don't see the point in

1687
00:57:36,470 --> 00:57:34,559
leaving that out we experienced this

1688
00:57:38,089 --> 00:57:36,480

before with um Ben Hansen and the

1689

00:57:39,170 --> 00:57:38,099

spotlights and they said oh well we

1690

00:57:40,790 --> 00:57:39,180

didn't think they were the spotlight so

1691

00:57:42,530 --> 00:57:40,800

we just left out the story and it just

1692

00:57:44,210 --> 00:57:42,540

makes it look really suspicious to to

1693

00:57:45,470 --> 00:57:44,220

people that are outside of our circles

1694

00:57:48,049 --> 00:57:45,480

you know

1695

00:57:50,630 --> 00:57:48,059

um and almost uh

1696

00:57:52,309 --> 00:57:50,640

Jeremy keep kept going back to that

1697

00:57:54,470 --> 00:57:52,319

point of kind of saying you know this

1698

00:57:56,690 --> 00:57:54,480

may or may not be anomalous but the one

1699

00:57:58,490 --> 00:57:56,700

thing that we should realize is this

1700

00:58:00,349 --> 00:57:58,500

wasn't reported to Arrow this wasn't

1701
00:58:02,150 --> 00:58:00,359
reported up the chain the stigma is very

1702
00:58:04,910 --> 00:58:02,160
real and alive here and that's a broken

1703
00:58:06,290 --> 00:58:04,920
process so why didn't our investigate it

1704
00:58:07,849 --> 00:58:06,300
did they find out it was flares before

1705
00:58:09,230 --> 00:58:07,859
because I feel like they would

1706
00:58:11,089 --> 00:58:09,240
definitively be able to answer whether

1707
00:58:14,030 --> 00:58:11,099
it was flares or not it's kind of in

1708
00:58:16,730 --> 00:58:14,040
their remit so that that information

1709
00:58:18,230 --> 00:58:16,740
pipeline has to be fixed as far as I'm

1710
00:58:19,790 --> 00:58:18,240
concerned and that's what this video is

1711
00:58:22,309 --> 00:58:19,800
highlighting flares or not doesn't

1712
00:58:23,930 --> 00:58:22,319
matter it was it confused a lot of

1713
00:58:26,450 --> 00:58:23,940

people and those people are doing answer

1714

00:58:28,609 --> 00:58:26,460

yeah that's fairly fair and for me again

1715

00:58:30,230 --> 00:58:28,619

I'll just to state for anyone else who

1716

00:58:31,430 --> 00:58:30,240

wanted to have a goal not that it

1717

00:58:34,309 --> 00:58:31,440

bothers me

1718

00:58:35,690 --> 00:58:34,319

um yeah more than likely Slayers

1719

00:58:39,289 --> 00:58:35,700

um I would love to see more information

1720

00:58:40,670 --> 00:58:39,299

on it I would still rather these drops

1721

00:58:42,109 --> 00:58:40,680

happened

1722

00:58:44,329 --> 00:58:42,119

um I would so rather we got to look at

1723

00:58:46,490 --> 00:58:44,339

it put over it discuss debate not argue

1724

00:58:47,750 --> 00:58:46,500

like dicks but just just look at these

1725

00:58:49,309 --> 00:58:47,760

things and discuss it and go yeah it's

1726

00:58:51,170 --> 00:58:49,319

probably something no it's probably

1727

00:58:52,910 --> 00:58:51,180

nothing and move on because it's

1728

00:58:54,829 --> 00:58:52,920

interesting and I enjoy personally

1729

00:58:57,349 --> 00:58:54,839

looking at it I also enjoy getting to

1730

00:58:59,990 --> 00:58:57,359

discuss it on here however I think what

1731

00:59:03,049 --> 00:59:00,000

where the danger would be for

1732

00:59:05,569 --> 00:59:03,059

George knob Jenny mccarbell is that if

1733

00:59:08,510 --> 00:59:05,579

there was a successive line of these

1734

00:59:10,730 --> 00:59:08,520

types of drops where like you say little

1735

00:59:13,670 --> 00:59:10,740

things keep being missed off that

1736

00:59:15,410 --> 00:59:13,680

constantly make it look like ah it

1737

00:59:18,049 --> 00:59:15,420

really wasn't anything uh it was pretty

1738

00:59:21,109 --> 00:59:18,059

prosaic ah that starts to add up and

1739

00:59:23,870 --> 00:59:21,119

we've talked about the real argument for

1740

00:59:25,730 --> 00:59:23,880

the UFO Topic at the moment is a body of

1741

00:59:27,470 --> 00:59:25,740

evidence of lots of little things adding

1742

00:59:29,750 --> 00:59:27,480

up to look at this folder we've got here

1743

00:59:31,549 --> 00:59:29,760

but you have to look through it all that

1744

00:59:35,030 --> 00:59:31,559

other folder also starts to add up

1745

00:59:35,870 --> 00:59:35,040

quickly of ah ah prosaic ah was

1746

00:59:53,089 --> 00:59:35,880

a

1747

00:59:55,309 --> 00:59:53,099

something strong for the next for the

1748

00:59:57,289 --> 00:59:55,319

next big drop something where they've

1749

00:59:59,450 --> 00:59:57,299

really done their due diligence and even

1750

01:00:01,130 --> 00:59:59,460

if that includes going to a John

1751
01:00:03,349 --> 01:00:01,140
Greenwald in the background and saying

1752
01:00:05,210 --> 01:00:03,359
look if we are going to drop this and

1753
01:00:06,950 --> 01:00:05,220
I'm sure John would keep that to himself

1754
01:00:08,750 --> 01:00:06,960
you know we're asking your opinion now

1755
01:00:10,730 --> 01:00:08,760
what do you think is anything you think

1756
01:00:12,049 --> 01:00:10,740
is worth looking I don't think they will

1757
01:00:14,210 --> 01:00:12,059
because of the relationship being broken

1758
01:00:16,910 --> 01:00:14,220
there but I don't think something like

1759
01:00:19,370 --> 01:00:16,920
that would hurt on all sides but I agree

1760
01:00:21,950 --> 01:00:19,380
maybe that absolutely thinking it would

1761
01:00:25,549 --> 01:00:21,960
it would come with a robust nice kind of

1762
01:00:27,349 --> 01:00:25,559
rounded analysis then and

1763
01:00:28,609 --> 01:00:27,359

I'm dubious as to whether that would

1764

01:00:30,470 --> 01:00:28,619

happen but I think it would enrich the

1765

01:00:31,910 --> 01:00:30,480

conversation you know these these things

1766

01:00:34,190 --> 01:00:31,920

are mainly looked at by people in the

1767

01:00:36,770 --> 01:00:34,200

community and they're the people who see

1768

01:00:38,030 --> 01:00:36,780

these Flair kind of assertions and all

1769

01:00:39,950 --> 01:00:38,040

these really quick follow-ups and things

1770

01:00:41,569 --> 01:00:39,960

like that so just present all the data

1771

01:00:42,710 --> 01:00:41,579

just right up front just present it all

1772

01:00:44,390 --> 01:00:42,720

and let people make up their own mind

1773

01:00:46,130 --> 01:00:44,400

and do the work you know like I I joke

1774

01:00:47,930 --> 01:00:46,140

telling about Midwest and John Ramirez

1775

01:00:50,569 --> 01:00:47,940

being on tour teams to review a tape but

1776

01:00:53,030 --> 01:00:50,579

the West Wes memo there you go there's a

1777

01:00:55,309 --> 01:00:53,040

memo for it goes to going on record

1778

01:00:57,650 --> 01:00:55,319

together discussing you know events and

1779

01:00:59,510 --> 01:00:57,660

stuff grab a great podcast my quest John

1780

01:01:01,490 --> 01:00:59,520

Ramirez get that recorded yeah it would

1781

01:01:02,569 --> 01:01:01,500

be really good and me and I mean like

1782

01:01:04,370 --> 01:01:02,579

those two are doing a podcast together

1783

01:01:07,069 --> 01:01:04,380

yeah

1784

01:01:08,990 --> 01:01:07,079

um someone someone pointed out that you

1785

01:01:10,670 --> 01:01:09,000

know I posted the go fast stuff from the

1786

01:01:11,809 --> 01:01:10,680

NASA Sunday and I said well there you go

1787

01:01:14,210 --> 01:01:11,819

there's an expert opinion you know what

1788

01:01:16,549 --> 01:01:14,220

do we think and and someone kind of put

1789

01:01:17,750 --> 01:01:16,559

it out like this isn't de facto and

1790

01:01:19,010 --> 01:01:17,760

someone else came in and said you know

1791

01:01:20,450 --> 01:01:19,020

what it would be amazing to get these

1792

01:01:21,650 --> 01:01:20,460

people in a room together everyone that

1793

01:01:23,030 --> 01:01:21,660

thinks it's an anomalous thing that

1794

01:01:24,530 --> 01:01:23,040

thinks it's a not anomalous thing you

1795

01:01:26,990 --> 01:01:24,540

just get them talking because this is

1796

01:01:28,609 --> 01:01:27,000

science and the scientists on each of

1797

01:01:30,289 --> 01:01:28,619

each other's throats like we are you

1798

01:01:31,609 --> 01:01:30,299

know in the community

1799

01:01:33,170 --> 01:01:31,619

um that was the lovely thing about it

1800

01:01:34,370 --> 01:01:33,180

today they disagreed they challenged

1801

01:01:35,569 --> 01:01:34,380

each other but no one insulted each

1802

01:01:36,950 --> 01:01:35,579

other that's that no we're starting to

1803

01:01:38,450 --> 01:01:36,960

get that we're starting to get these

1804

01:01:41,030 --> 01:01:38,460

people in a room and sitting together

1805

01:01:43,730 --> 01:01:41,040

and that whole panel of people were

1806

01:01:46,609 --> 01:01:43,740

wearing all UFO fans you know otherwise

1807

01:01:47,990 --> 01:01:46,619

Scott Kelly he's wrote that Simpson

1808

01:01:50,270 --> 01:01:48,000

balloon thing that was a low point for

1809

01:01:51,770 --> 01:01:50,280

me he kind of got the laughs that we're

1810

01:01:54,170 --> 01:01:51,780

used to with the stigma and things like

1811

01:01:56,329 --> 01:01:54,180

that but yeah I mean it's a balanced

1812

01:01:58,309 --> 01:01:56,339

opinion you know or balance group then

1813

01:02:01,309 --> 01:01:58,319

so fine he's there but and that doesn't

1814

01:02:03,349 --> 01:02:01,319

like uapists as an act like he is yeah

1815

01:02:05,770 --> 01:02:03,359

it made me think of a analytical

1816

01:02:07,910 --> 01:02:05,780

therapist from uh Arrested Development

1817

01:02:09,349 --> 01:02:07,920

and I wouldn't go into the rest of that

1818

01:02:10,370 --> 01:02:09,359

joke but for anyone who's watched it

1819

01:02:12,109 --> 01:02:10,380

though I appreciate that one I'm sure

1820

01:02:13,910 --> 01:02:12,119

there was a moment where they put the

1821

01:02:16,910 --> 01:02:13,920

acronym on screen

1822

01:02:17,630 --> 01:02:16,920

um it was like a UAP investigation study

1823

01:02:19,849 --> 01:02:17,640

team

1824

01:02:21,710 --> 01:02:19,859

but they've refer to them as uapists

1825

01:02:23,329 --> 01:02:21,720

which yeah it's it's kind of an awkward

1826

01:02:24,890 --> 01:02:23,339

word to say and it's just it feels wrong

1827

01:02:27,530 --> 01:02:24,900

right and in Scotland it's kind of

1828

01:02:31,190 --> 01:02:27,540

texting someone like you are pissed like

1829

01:02:33,309 --> 01:02:31,200

so yeah and on that note Dan uh we've

1830

01:02:35,809 --> 01:02:33,319

had the other Mark uh so yeah

1831

01:02:37,190 --> 01:02:35,819

interesting day week yeah yeah really

1832

01:02:38,870 --> 01:02:37,200

interesting week like big moves you know

1833

01:02:40,490 --> 01:02:38,880

this was this was a huge move for the

1834

01:02:42,289 --> 01:02:40,500

professionalization of the subject and

1835

01:02:43,490 --> 01:02:42,299

the sub data and everything like that I

1836

01:02:45,770 --> 01:02:43,500

think we're gonna see a lot come from

1837

01:02:47,329 --> 01:02:45,780

this would you like another chat GPT

1838

01:02:49,190 --> 01:02:47,339

joke we got a little bit of feedback

1839

01:02:51,109 --> 01:02:49,200

that people love these terrible jokes as

1840

01:02:53,150 --> 01:02:51,119

as you mentioned the professionalization

1841

01:02:54,530 --> 01:02:53,160

of the subject so oh yeah the jokes

1842

01:02:56,809 --> 01:02:54,540

folks you can turn off now and pretend

1843

01:03:00,650 --> 01:02:56,819

it never happened like I will but yeah

1844

01:03:02,750 --> 01:03:00,660

go on why did the alien go to the doctor

1845

01:03:05,630 --> 01:03:02,760

I don't know Andy's rolling his eyes

1846

01:03:07,849 --> 01:03:05,640

already for people that can't see uh he

1847

01:03:10,670 --> 01:03:07,859

was choking on an unidentified frying

1848

01:03:12,829 --> 01:03:10,680

object that is all for this week's show

1849

01:03:14,690 --> 01:03:12,839

thank you very much for listening please

1850

01:03:17,450 --> 01:03:14,700

remember to leave the podcast the review

1851

01:03:19,970 --> 01:03:17,460

on your chosen platform you can like

1852

01:03:21,890 --> 01:03:19,980

retweet And subscribe that would all be

1853

01:03:23,990 --> 01:03:21,900

very much appreciated the shows are

1854

01:03:25,549 --> 01:03:24,000

being uploaded onto YouTube as we speak

1855

01:03:28,010 --> 01:03:25,559

more and more you can sign up at

1856

01:03:30,230 --> 01:03:28,020

patreon.com forward slash that UFO

1857

01:03:32,150 --> 01:03:30,240

podcast to access it shows ad free as

1858

01:03:35,329 --> 01:03:32,160

well please get in touch on Twitter

1859

01:03:39,230 --> 01:03:35,339

Facebook Instagram that UFO podcast of

1860

01:03:41,210 --> 01:03:39,240

course on Twitter it's at UFO uapam and

1861

01:03:43,820 --> 01:03:41,220

again folks as always keep looking up

1862

01:03:51,130 --> 01:03:43,830

you never know what you might see

1863

01:04:18,289 --> 01:03:51,140

[Music]

1864

01:04:59,300 --> 01:04:19,510

to the game

1865

01:05:19,809 --> 01:05:09,420

[Music]

1866

01:05:19,819 --> 01:05:28,960

open your mind

1867

01:06:38,349 --> 01:05:38,390

[Music]

1868

01:06:42,740 --> 01:06:38,359

thank you
