DR. NADIA DRAKE  
NASA UAP STUDY

1  
00:00:05,510 --> 00:00:03,350  
in 2023 what does credible evidence of

2  
00:00:07,610 --> 00:00:05,520  
ET look like

3  
00:00:10,129 --> 00:00:07,620  
well I think

4  
00:00:11,810 --> 00:00:10,139  
I don't I don't actually know

5  
00:00:13,249 --> 00:00:11,820  
um for the simple reason that I don't

6  
00:00:16,730 --> 00:00:13,259  
know what

7  
00:00:18,710 --> 00:00:16,740  
an ET might look like which is also a

8  
00:00:20,570 --> 00:00:18,720  
really boring answer but um

9  
00:00:23,390 --> 00:00:20,580  
I mean what I would want to see are

10  
00:00:25,670 --> 00:00:23,400  
observations again made with instruments

11  
00:00:28,550 --> 00:00:25,680  
that were calibrated for the purposes

12  
00:00:30,830 --> 00:00:28,560  
that they were being used for

13  
00:00:33,170 --> 00:00:30,840

um you know multi-spectral observations

14

00:00:36,590 --> 00:00:33,180

of the same object potentially you know

15

00:00:38,510 --> 00:00:36,600

made by multiple people where we have

16

00:00:41,690 --> 00:00:38,520

data from sensors that matches

17

00:00:43,490 --> 00:00:41,700

eyewitness reports and then after that

18

00:00:46,010 --> 00:00:43,500

that's just the beginning right so

19

00:00:47,690 --> 00:00:46,020

that's that's step one and then after

20

00:00:49,549 --> 00:00:47,700

that you go and you interrogate all of

21

00:00:52,850 --> 00:00:49,559

that and say well

22

00:00:55,130 --> 00:00:52,860

in the search for life beyond Earth

23

00:00:58,069 --> 00:00:55,140

um you know life is the hypothesis of

24

00:00:59,689 --> 00:00:58,079

Last Resort you have to systematically

25

00:01:01,310 --> 00:00:59,699

rule out everything else that something

26

00:01:03,950 --> 00:01:01,320

could possibly be

27

00:01:05,750 --> 00:01:03,960

before you look at that answer and so

28

00:01:08,149 --> 00:01:05,760

you know what else could this possibly

29

00:01:10,969 --> 00:01:08,159

be what we've seen

30

00:01:12,890 --> 00:01:10,979

um you know even during even the meeting

31

00:01:14,750 --> 00:01:12,900

um we saw some videos that looked like

32

00:01:19,190 --> 00:01:14,760

they were showing objects behaving very

33

00:01:20,810 --> 00:01:19,200

very weirdly but the explanations were

34

00:01:23,090 --> 00:01:20,820

you know this is just the way that the

35

00:01:24,469 --> 00:01:23,100

sensor was moving or this object looks

36

00:01:27,410 --> 00:01:24,479

like it's moving really quickly because

37

00:01:30,230 --> 00:01:27,420

the plane that was looking at it is

38

00:01:32,929 --> 00:01:30,240

going 430 miles an hour so that you know

39

00:01:35,030 --> 00:01:32,939

the sensor is moving really quickly

40

00:01:36,890 --> 00:01:35,040

um so can we rule out sensor artifacts

41

00:01:38,569 --> 00:01:36,900

can we rule out like what what do we

42

00:01:42,050 --> 00:01:38,579

need to rule out before we can say all

43

00:01:43,190 --> 00:01:42,060

right like we have landed at a point

44

00:01:46,550 --> 00:01:43,200

where
