

TOE

compared to us

**Robots Have
Spirits**

1
00:00:04,490 --> 00:00:01,910
a houseplant is not going to get very

2
00:00:06,050 --> 00:00:04,500
old with compared to us because the

3
00:00:08,330 --> 00:00:06,060
information processing is so much slower

4
00:00:10,850 --> 00:00:08,340
so they're not going to be very smart

5
00:00:12,650 --> 00:00:10,860
but at the level of ecosystems it's

6
00:00:14,690 --> 00:00:12,660
conceivable that there is quite

7
00:00:16,849 --> 00:00:14,700
considerable intelligence and then I

8
00:00:19,849 --> 00:00:16,859
stumbled on this notion that our

9
00:00:21,710 --> 00:00:19,859
ancestors thought that one day in

10
00:00:24,830 --> 00:00:21,720
Fairyland equals seven years in human

11
00:00:28,490 --> 00:00:24,840
land which is taught in the oldness

12
00:00:30,589 --> 00:00:28,500
and also I this at some point I revised

13
00:00:33,049 --> 00:00:30,599

my notion of what the spirit is for

14

00:00:34,910 --> 00:00:33,059

instance is a spirit is it's an old word

15

00:00:36,709 --> 00:00:34,920

for the operating system for an

16

00:00:38,690 --> 00:00:36,719

autonomous robot

17

00:00:41,569 --> 00:00:38,700

and the event this world was invented

18

00:00:43,610 --> 00:00:41,579

the only autonomous robots that were
