LY

1  
00:00:04,370 --> 00:00:02,210  
Elon Musk has bought Twitter I think

2  
00:00:05,990 --> 00:00:04,380  
because he has realized that Twitter is

3  
00:00:07,970 --> 00:00:06,000  
the network of among all the social

4  
00:00:09,110 --> 00:00:07,980  
networks that is closest to a global

5  
00:00:11,150 --> 00:00:09,120  
brain

6  
00:00:12,950 --> 00:00:11,160  
it's totally mind-blowing to realize

7  
00:00:15,650 --> 00:00:12,960  
that he basically trades a bunch of Rosy

8  
00:00:19,310 --> 00:00:15,660  
stock for the opportunity to become Pope

9  
00:00:21,529 --> 00:00:19,320  
pope of a religion that has more active

10  
00:00:23,810 --> 00:00:21,539  
participants than Catholicism even right

11  
00:00:25,970 --> 00:00:23,820  
daily practicing people who enter

12  
00:00:27,589 --> 00:00:25,980  
this church and think together and it's

13  
00:00:28,790 --> 00:00:27,599

a thing that is completely incoherent at

14

00:00:31,009 --> 00:00:28,800

this point almost and completely

15

00:00:32,330 --> 00:00:31,019

incorrect the bubbles of sentience but

16

00:00:33,889 --> 00:00:32,340

for the most part this thing is just

17

00:00:36,110 --> 00:00:33,899

screeching at itself

18

00:00:38,030 --> 00:00:36,120

and now the SD question can we fix the

19

00:00:39,290 --> 00:00:38,040

incentives of Twitter to turn it into a

20

00:00:43,790 --> 00:00:39,300

global brain

21

00:00:45,709 --> 00:00:43,800

believes that this is the case and

22

00:00:47,389 --> 00:00:45,719

that's the experiment that he is trying

23

00:00:49,190 --> 00:00:47,399

to do which makes me super excited right

24

00:00:51,410 --> 00:00:49,200

this might fail is a very big chance

25

00:00:53,209 --> 00:00:51,420

that it fails but there is also the

26

00:00:54,590 --> 00:00:53,219

chance that we get the global brain that
