

1

00:00:00,000 --> 00:00:17,480

One of the most debated issues of the UFO phenomenon concerns the possible existence

2

00:00:17,480 --> 00:00:22,760

of alien vessels, which have crashed landed on Earth and are now kept in secret military

3

00:00:22,760 --> 00:00:24,200

bases.

4

00:00:24,200 --> 00:00:29,320

If they do exist, how far have scientists progressed in their efforts in understanding

5

00:00:29,320 --> 00:00:35,960

and replicating technologies that may be tens of thousands of years ahead of ours?

6

00:00:35,960 --> 00:00:41,080

Such programs do not officially exist and are kept under such tight security that the

7

00:00:41,080 --> 00:00:46,000

chances of information leaks are practically zero.

8

00:00:46,000 --> 00:00:52,680

And that they're trying to guard those secrets, they're trying to guard their proprietary technology,

9

00:00:52,680 --> 00:00:57,360

that they're one of the only ones that have it, and that might help explain why the U.S.

10

00:00:57,360 --> 00:01:02,680

is so different than many of these other countries that they're guarding their resources.

11

00:01:02,680 --> 00:01:09,280

Having access to this knowledge that the rest of the world is denied gives you a certain

12

00:01:09,280 --> 00:01:10,360

amount of power.

13

00:01:10,360 --> 00:01:16,920

It gives you the ability to study technology secretly and give you advantages that the

14

00:01:16,920 --> 00:01:18,280

rest of the world might lack.

15

00:01:18,280 --> 00:01:19,280

That's powerful.

16

00:01:19,280 --> 00:01:23,240

This is the kind of military approach to the subject.

17

00:01:23,240 --> 00:01:27,640

They are not interested in expert-terrestrial life and what it means for mankind and all

18

00:01:27,640 --> 00:01:28,640

this.

19

00:01:28,640 --> 00:01:35,920

They're interested in the technology, propulsion systems, acceleration and all of this.

20

00:01:35,920 --> 00:01:41,480

Could the U.S. military's desire to reverse engineer UFO technology for its own ends be

21

00:01:41,480 --> 00:01:46,920

behind its continuing reticence to disclose information about its UFO monitoring program?

22

00:02:23,240 --> 00:02:28,680

The U.S. military is the country's largest nuclear power plant.

23

00:02:28,680 --> 00:02:31,840

It's the country's largest nuclear power plant.

24

00:02:31,840 --> 00:02:35,280

It's the country's largest nuclear power plant.

25

00:02:35,280 --> 00:02:38,880

It's the country's largest nuclear power plant.

26

00:02:38,880 --> 00:02:42,280

It's the country's largest nuclear power plant.

27

00:02:42,280 --> 00:02:45,600

It's the country's largest nuclear power plant.

28

00:02:45,600 --> 00:02:49,040

It's the country's largest nuclear power plant.

29

00:02:49,040 --> 00:02:52,760

It's the country's largest nuclear power plant.

30

00:02:52,760 --> 00:02:56,360

It's the country's largest nuclear power plant.

31

00:02:56,360 --> 00:02:59,880

It's the country's largest nuclear power plant.

32

00:02:59,880 --> 00:03:03,320

It's the country's largest nuclear power plant.

33

00:03:03,320 --> 00:03:06,960

It's the country's largest nuclear power plant.

34

00:03:06,960 --> 00:03:10,520

It's the country's largest nuclear power plant.

35

00:03:10,520 --> 00:03:14,320

It's the country's largest nuclear power plant.

36

00:03:14,320 --> 00:03:21,200

The major at Fort Bliss Army Base in July 1947 is much more significant.

37

00:03:21,200 --> 00:03:29,040

July 1947, Fort Riley, Kansas.

38

00:03:29,040 --> 00:03:39,920

In May 1998, an unusual affidavit is filed with the U.S. District Court in Scottsdale, Arizona.

39

00:03:39,920 --> 00:03:48,200

It concerns a dispute between Colonel Philip J. Corso and the U.S. military.

40

00:03:48,200 --> 00:03:57,600

Corso, a highly decorated officer, claims under oath that on July 6, 1947, while at Fort Riley in Kansas,

41

00:03:57,600 --> 00:04:06,320

he saw the contents of a special cargo that had been secretly brought in that day.

42

00:04:09,920 --> 00:04:22,920

I listed one up and here's this body there in floating fluid.

43

00:04:22,920 --> 00:04:30,320

And I looked at it about 10, 15 seconds, not much more than that.

44

00:04:30,320 --> 00:04:36,560

In one of the elongated boxes, he saw the dead body of a non-human creature.

45

00:04:36,960 --> 00:04:43,120

He described the corpse as a four-foot-tall creature with bizarre-looking four-fingered hands,

46

00:04:43,120 --> 00:04:51,440

thin legs, and an oversized incandescent lightbulb-shaped head with no eyebrows or any facial hair.

47

00:04:51,440 --> 00:04:58,760

The creature only had a tiny flat slit for a mouth, which was completely closed resembling more of a crease

48

00:04:58,760 --> 00:05:05,040

or indentation between the nose and the bottom of the chinless skull than a fully functional orifice.

49

00:05:06,560 --> 00:05:15,040

I put it back down and said, Sarge, come on, get out of here now. I want to get you in trouble.

50

00:05:15,040 --> 00:05:21,840

Because I'm the duty officer, I can walk around here. But you might get in trouble for coming back.

51

00:05:21,840 --> 00:05:28,640

Just come on, let's go, come out with me. So we went out and I told him, where did it come from, Sarge?

52

00:05:28,640 --> 00:05:35,560

He said, well, five trucks came through here from an airfield in New Mexico.

53

00:05:36,360 --> 00:05:44,200

In 1961, Corso, by this time a colonel based at the White House, claimed he received a file which contained,

54

00:05:44,200 --> 00:05:52,200

among other things, reports of an autopsy he witnessed in Fort Riley in 1947 and of technological fragments

55

00:05:52,200 --> 00:05:59,160

from an alien craft that crashed in Roswell, New Mexico at the same time that year.

56

00:05:59,160 --> 00:06:04,760

He later described attempts to extract and analyze that technology and use it for human advancements.

57

00:06:05,560 --> 00:06:11,080

He said when he was working at the White House that his job was to take some of the technology

58

00:06:11,080 --> 00:06:19,560

and take it to corporations for them to reverse engineer it and Teflon, fiber optics, the digital chip.

59

00:06:19,560 --> 00:06:28,760

What I would generally say is that ETTech probably gives us ideas. It gives us impetus for trying things.

60

00:06:28,760 --> 00:06:35,160

One thing that I think I could say pretty confidently from everything that I've studied and the people that I've talked to

61

00:06:35,160 --> 00:06:39,160

is that their materials science is way, way beyond ours.

62

00:06:39,160 --> 00:06:46,520

So they have the ability to create, manufacture materials at a very, very, very fine level

63

00:06:46,520 --> 00:06:51,160

that we're only now beginning to be able to approximate.

64

00:06:53,880 --> 00:06:58,360

Have we reached a point where the scientific community has become polarized?

65

00:06:58,360 --> 00:07:02,280

Where one faction is using scientific procedures in quantum physics

66

00:07:02,440 --> 00:07:07,960

to try to understand the prospect of life in other parts of our universe or universes beyond,

67

00:07:07,960 --> 00:07:13,880

while the other is engaged in secret projects examining alien crafts here and now.

68

00:07:13,880 --> 00:07:18,920

Some of the best brains on Earth are inventing telescopes and satellites for space exploration,

69

00:07:18,920 --> 00:07:25,880

while others are trying to understand the incomparable technologies of extraterrestrial origin.

70

00:07:25,880 --> 00:07:36,200

I don't have a definitive date of when the first reverse engineering ever started,

71

00:07:37,400 --> 00:07:40,920

but I do know that ET's have been coming here way before us.

72

00:07:41,480 --> 00:07:48,600

And after visiting the Vatican and going into their classified museum and their library,

73

00:07:49,320 --> 00:07:52,680

there were some very ancient devices and relics.

74

00:07:52,680 --> 00:07:57,160

So, you know, it's been going on since we've been here.

75

00:07:58,120 --> 00:08:03,560

If you tell the world that you've recovered their technology, you may be pressured to share

76

00:08:04,200 --> 00:08:07,160

that technology. And what if you don't want to share the technology?

77

00:08:07,160 --> 00:08:11,640

The United States didn't want to share its atomic technology in 1947.

78

00:08:11,640 --> 00:08:13,080

That was a very big issue at the time.

79

00:08:14,280 --> 00:08:18,680

There was certainly no way the United States would want to share its extraterrestrial technology.

80

00:08:19,240 --> 00:08:24,760

Not surprisingly, there are very few testimonies from people who claim to have had a chance to

81

00:08:24,760 --> 00:08:31,240

witness or directly participate in secret programs associated with probable alien craft

82

00:08:31,240 --> 00:08:37,000

and their reverse engineering. Due to their degree of secrecy, it is difficult to find

83

00:08:37,000 --> 00:08:42,680

another person participating in the same program who could support the credibility of these testimonies.

84

00:08:43,640 --> 00:08:49,080

I think we just have to be very discerning in terms of the information we take on. I need to get

85

00:08:49,080 --> 00:08:54,840

plenty of information about something before I start to believe that that's a possibility.

86

00:08:54,840 --> 00:09:01,000

But I keep an open mind to everything because you can't say categorically anything

87

00:09:01,000 --> 00:09:03,160

because that would not be very intelligent.

88

00:09:05,160 --> 00:09:08,680

1971, Broom Lake, Nevada.

89

00:09:12,680 --> 00:09:17,800

One of those who arouses controversial opinions among UFO researchers is David Adair.

90

00:09:18,680 --> 00:09:24,680

According to his story and his claims, he is probably the only person to refuse participation

91

00:09:24,680 --> 00:09:32,440

in a secret UFO reverse engineering program. The moment in 1971, he comes up with the idea

92

00:09:32,440 --> 00:09:38,680

of electromagnetic fusion rocket propulsion is the moment he lands in the sights of military

93

00:09:38,680 --> 00:09:40,360

and U.S. intelligence services.

94

00:09:43,320 --> 00:09:50,200

Soon after receiving his prestigious award from the U.S. Air Force, he is taken to Groom Lake

95

00:09:50,200 --> 00:09:57,720

to visit the base now known as Area 51. Adair also claims he met with General Curtis LeMay,

96

00:09:58,280 --> 00:10:03,400

then chief of staff of the U.S. Air Force and in the high security underground section

97

00:10:03,400 --> 00:10:09,960

of the Area 51 military base, he has shown an engine about the size of a school bus.

98

00:10:12,840 --> 00:10:18,440

The one thing that they showed me at Area 51 was an electromagnetic fusion

99

00:10:18,440 --> 00:10:26,600

attainment engine also, but they didn't build it. Mine was about a meter long.

100

00:10:28,120 --> 00:10:31,080

This thing was the size of an 18-wheel semi.

101

00:10:32,280 --> 00:10:41,160

Gigantic. It was not built by us because the manufacturing techniques that was on this thing

102

00:10:42,120 --> 00:10:51,320

are beyond our capabilities. As big as it was, it did not have a single bolt, screw,

103

00:10:52,040 --> 00:10:56,440

rivet, or weld or seam line. It looked like an eggplant.

104

00:10:57,640 --> 00:11:02,280

David Adair described the inside of the engine as similar to a frog's belly.

105

00:11:02,840 --> 00:11:09,480

The surface appeared wet and slippery, but was smooth to the touch. Even stranger is that it

106

00:11:09,480 --> 00:11:17,400

responds to touch, like something from a sci-fi movie. Adair realized that this was no terrestrial

107

00:11:17,400 --> 00:11:22,600

propulsion system. Could it have been salvaged from a UFO or the remains of one?

108

00:11:24,040 --> 00:11:31,160

They've got alien technologies from all over the planet. They're trying to reverse engineer stuff,

109

00:11:31,160 --> 00:11:38,920

and if you notice, they talk about technology in general, and it is said that in the last 15,

110

00:11:39,480 --> 00:11:46,680

20 years, we have quadrupled the technology from the previous 5,000 years combined.

111

00:11:47,720 --> 00:11:53,640

How could we do so much so fast? We cheated. You didn't earn it. You stalled it.

112

00:11:54,600 --> 00:12:03,080

So David explained how in the last 15, 20 years we were all the technology at 5,000 years before.

113

00:12:03,400 --> 00:12:11,640

The most convincing testimony related to reverse engineering is that of Bob Lazar. Not only because

114

00:12:11,640 --> 00:12:17,000

he comes up with his revelations much earlier than anyone else, but above all because of its

115

00:12:17,000 --> 00:12:23,320

consistency and verifiable detail. His story has been followed up and researched for years

116

00:12:23,320 --> 00:12:29,400

by renowned journalists and filmmakers who are convinced Bob Lazar is telling the truth.

117

00:12:30,280 --> 00:12:35,000

George Knapp, the holder of a number of prestigious journalistic awards, is one of them.

118

00:12:35,720 --> 00:12:41,400

I spent 30 years working on this story. If I did not believe that it was true, I wouldn't still be

119

00:12:41,400 --> 00:12:48,200

working on it. Robert Lazar, initially under a pseudonym and later under his real name, shares

120

00:12:48,200 --> 00:12:55,400

details of his experiences at the Area 51 base in the S4 sector, where he says he was given the

121

00:12:55,400 --> 00:13:01,160

job of working on reverse engineering efforts on nine recovered flying saucers. It is the first

122

00:13:01,160 --> 00:13:07,000

time that someone involved with the secret project is willing to risk his career or even his life

123

00:13:07,000 --> 00:13:13,560

by opening up to the media. Until now, the world has practically known nothing about Area 51.

124

00:13:15,240 --> 00:13:23,720

The story of Bob Lazar is fascinating and I must say I've changed my mind on this as the

125

00:13:23,720 --> 00:13:32,120

story has evolved. I think when he first came out and spoke about it, I was fairly skeptical and

126

00:13:32,120 --> 00:13:38,520

I thought, well, this is just crazy. I believe Bob Lazar, but I believe him based upon an

127

00:13:38,520 --> 00:13:42,520

information pool that I have that the majority of people just don't have. That's because I went

128

00:13:42,520 --> 00:13:49,400

after the case following in George's footsteps who broke it. So imagine him. Over 30 years of

129

00:13:49,400 --> 00:13:54,760

following this story, what has he been exposed to about Bob Lazar and his story and his account?

130

00:13:55,400 --> 00:13:59,800

What have I been exposed to? What has the general public? When I had access and was permitted

131

00:14:00,440 --> 00:14:06,920

to view and look at the operation of this main level with the gravity amplifiers and the level

132

00:14:06,920 --> 00:14:14,120

below the gravity emitters. Trying to make a movie to show people who Bob Lazar is. Same story.

133

00:14:14,120 --> 00:14:19,320

Same story he told George and I 30 years ago, but again, we're living in a different world.

134

00:14:20,120 --> 00:14:26,280

Through the lens of 30 years, it should be obvious that what Bob Lazar told you is most likely correct.

135

00:14:27,640 --> 00:14:32,600

I don't believe that Lazar ever claimed that we had actively recreated an alien craft.

136

00:14:33,320 --> 00:14:39,320

Other people have made that claim. What I think is the case is that we have been trying to replicate

137

00:14:39,320 --> 00:14:46,200

alien craft since the 1940s or 50s. But that our science has not gotten us to the capability where

138

00:14:46,200 --> 00:14:57,880

we can truly do what they do. In a 1989 interview, Bob asserted that alien spacecraft were powered by

139

00:14:57,880 --> 00:15:05,800

the element 115. At the time, the mainstream science community ridiculed him, claiming there was no

140

00:15:05,800 --> 00:15:14,600

such element. In August 2013, European scientists conducted experiments that proved element 115 was real.

141

00:15:15,560 --> 00:15:26,440

So Bob Lazar talked about element 115 as being the fuel that would allow these flying craft to bend

142

00:15:26,440 --> 00:15:32,280

space time around them to create a fold in space time, as he called it, to allow them to do what

143

00:15:32,280 --> 00:15:40,120

they do. We don't have a way of making it. Lazar always said that the extraterrestrials had a supply

144

00:15:40,120 --> 00:15:45,240

of this, maybe from a supernova, maybe they manufactured it. I don't know how they got it.

145

00:15:45,240 --> 00:15:49,720

There's a certain amount of that supply and that we don't know how to make it.

146

00:15:50,760 --> 00:15:58,200

In the laboratory, years after Bob Lazar came out with his story, scientists did in fact manage to

147

00:15:58,280 --> 00:16:05,640

create element 115. It's real. It exists. Now, it's not stable yet. You can't

148

00:16:07,160 --> 00:16:13,640

kind of see it in solid form and say, here it is. Is element 115 in effect the key to

149

00:16:13,640 --> 00:16:20,520

electromagnetic anti-gravity propulsion? Yet Colonel Corso, during his service at the Pentagon,

150

00:16:20,520 --> 00:16:26,120

saw photocopies of documents proving Nikola Tesla's research into anti-gravity propulsion.

151

00:16:27,000 --> 00:16:29,960

He had apparently been many decades ahead of his time.

152

00:16:35,560 --> 00:16:41,480

Four atoms were fabricated in Russia. Great. There are 37 different isotopes for gold.

153

00:16:41,480 --> 00:16:46,760

One of them is stable. That's the one that you make a ring out of. Same thing with element 115.

154

00:16:46,760 --> 00:16:53,640

He always thought that there would be a way to find that stable isotope. However, the fabrication

155

00:16:53,640 --> 00:17:00,520

of any quantity or amount is so restrictive by cost and time and energy and power.

156

00:17:03,560 --> 00:17:08,760

The disclosure of the Pentagon's secret Advanced Aerospace Threat Identification Program,

157

00:17:08,760 --> 00:17:14,760

or ATIP, in the new millennium, leaves no doubt of the U.S. military's long-standing interest

158

00:17:14,760 --> 00:17:20,840

in the development of so-called exotic technologies. With the latest deep-space research into

159

00:17:20,840 --> 00:17:26,200

behavior of wormholes and anti-gravitational principles, it would be difficult to disguise

160

00:17:26,200 --> 00:17:35,240

recovered extraterrestrial technologies. Our government is actively and currently interested in

161

00:17:35,960 --> 00:17:42,200

how the propulsion systems work of these vehicles. How can they go 20,000 miles per hour

162

00:17:42,920 --> 00:17:49,400

without burning jet fuel? How is that possible? Well, it's possible. And I'm telling you this as a

163

00:17:49,480 --> 00:17:59,080

non-scientist for the material of the craft itself to be constructed in such a way that it serves as

164

00:17:59,080 --> 00:18:05,560

what is called a wave guide for high-frequency electromagnetic radiation that essentially

165

00:18:05,560 --> 00:18:12,360

converts to an anti-... becomes like an anti-gravity effect. Jack Sarfati, one of the great rogue

166

00:18:12,360 --> 00:18:16,760

physicists in America, he makes a very powerful case about the fact that once you have an

167

00:18:17,720 --> 00:18:23,480

anti-gravity system, we'll call it an anti-gravity system, that allows you to negate gravity in your

168

00:18:23,480 --> 00:18:29,640

area. So essentially, the craft weighs nothing. You could fly their thing around with some five-volt

169

00:18:29,640 --> 00:18:38,040

batteries. Think about it. Imagine if you could make a 747-wave virtually nothing. You could run

170

00:18:38,040 --> 00:18:44,440

the thing with a couple of propellers. And so it may not take that much energy to make them do

171

00:18:45,240 --> 00:18:52,040

the maneuver. However, the anti-gravity system has got to take energy. There's got to be energy

172

00:18:52,040 --> 00:18:59,880

involved in it. So I am still hoping that they have made major strides in developing,

re-engineering,

173

00:19:00,920 --> 00:19:08,600

paradigm-shifting energy systems derived from these vehicles. And if that is true, then that

174

00:19:08,600 --> 00:19:13,880

absolutely is something that has got to get in the public domain as soon as possible.

175

00:19:14,520 --> 00:19:21,480

Once specific events could reinforce claims that the United States military has at its disposal

176

00:19:21,480 --> 00:19:28,120

a propulsion system obtained from extraterrestrial crafts. Apart from whistleblower testimonies,

177

00:19:28,120 --> 00:19:34,360

the most compelling evidence comes from a top-secret project code named Aurora. The U.S.

178

00:19:34,360 --> 00:19:40,360

military continues to deny the existence of this program, despite references to it and documents

179

00:19:40,360 --> 00:19:47,720

obtained under the Freedom of Information Act. Most often, it is associated with the development

180

00:19:47,720 --> 00:19:53,320

by the U.S. military industrial complex of a state-of-the-art stealth fighter aircraft

181

00:19:53,320 --> 00:20:04,920

called Darkstar or Astra. And the Aurora project involves multiple craft. There's the SR-75,

182

00:20:04,920 --> 00:20:12,520

which is a craft that can travel using scram jets up to high altitudes, 100,000 feet. And

183

00:20:13,320 --> 00:20:20,840

using their scram jets, they're able to achieve a hypersonic velocity of Mach 5. And then it piggybacks.

184

00:20:22,680 --> 00:20:31,480

On its back is an SR-74, which is a craft that is capable of breaking into Earth's orbit. It's

185

00:20:31,560 --> 00:20:37,720

capable of achieving speeds of above 40,000 kilometers per hour. And so this was technology

186

00:20:37,720 --> 00:20:45,560

that was developed out of Area 51 to give the Air Force an ability to be able to send craft into

187

00:20:45,560 --> 00:20:53,240

Earth's orbit at very short notice. That we have exo-atmospheric technology that is light years

188

00:20:53,960 --> 00:20:59,320

behind or beyond any fighter aircraft that we could see at our local air show. That's really the bottom line.

189

00:21:01,480 --> 00:21:06,680

Some of those secret technologies can be perhaps moved into private industry,

190

00:21:06,680 --> 00:21:11,000

and you've got some wonderful ground floor investment opportunities. So there's really no

191

00:21:11,000 --> 00:21:16,520

incentive, honestly, for giving that secret up once you have it. It's power and it's wealth.

192

00:21:17,320 --> 00:21:22,600

The Lockheed Advanced Development Projects, nicknamed the Skunkworks since the early 40s,

193

00:21:23,400 --> 00:21:27,000

well known for its ability to produce in a tight security atmosphere,

194

00:21:27,800 --> 00:21:35,800

was selected to proceed with this highly sensitive program.

195

00:21:36,120 --> 00:21:48,840

In the late 1990s, inside the Skunkworks building, there was a large chart depicting the lineage

196

00:21:48,840 --> 00:21:57,080

of Skunkworks aircraft over the decades. From the XP-80 to the U-2, the SR-71 Blackbird,

197

00:21:57,640 --> 00:22:04,920

the F-117A stealth fighter, passed the YF-22 and Darkstar to what Lazar says was something called

198

00:22:05,480 --> 00:22:12,360

Astra. Sitting at the top of the tree, Astra looked like an ultra-high-speed reconnaissance

199

00:22:12,360 --> 00:22:21,960

aircraft. Ben Rich was director of Skunkworks from 1975 to 1991, so at this time he had been

200

00:22:21,960 --> 00:22:29,080

out of the top slot for two years. But naturally, he still had a firm grasp of the development

201

00:22:29,080 --> 00:22:37,560

of secret prototypes. Connected to this presentation, within the walls of Skunkworks,

202

00:22:38,120 --> 00:22:44,680

is a remarkable part of Ben Rich's lecture to the UCLA School of Engineering in 1993.

203

00:22:50,040 --> 00:22:55,640

Ben Rich began his talk with 40 slides, the last of which showed a black disc heading off

204

00:22:55,640 --> 00:22:59,640

somewhere into space. He ended his speech with the words,

205

00:23:00,280 --> 00:23:07,160

We now have the technology to take ET home, which made many of the audience sit up and take notice.

206

00:23:07,880 --> 00:23:14,200

Was this related to some top secret project? After the speech, Rich told one of the attendees

207

00:23:14,200 --> 00:23:21,560

outside the lecture hall that the vessel worked on the principle of ESP, extra sensory perception,

208

00:23:21,560 --> 00:23:26,360

although it wasn't entirely clear how it was connected to the propulsion of the craft.

209

00:23:27,160 --> 00:23:32,600

Rich merely hinted mysteriously that all points in space-time were connected.

210

00:23:39,240 --> 00:23:45,640

The TR-3B Astra has been described as a triangular nuclear power aircraft,

211

00:23:45,640 --> 00:23:50,040

developed under the Aurora Top Secret Project for the Strategic Defense Initiative,

212

00:23:50,600 --> 00:23:57,000

and first tested in the early 1990s. According to league specifications of the Astra,

213

00:23:57,000 --> 00:24:02,360

it is a noiseless aircraft capable of achieving both radar and optical invisibility.

214

00:24:03,080 --> 00:24:07,480

It has a magnetic field disruptor, which neutralizes the effect of gravity.

215

00:24:13,880 --> 00:24:19,320

From the late 1980s up to the present day, many sightings have been reported of a V-shaped

216

00:24:19,320 --> 00:24:26,520

aircraft remarkably similar to the descriptions of the Astra, of an aircraft that does not officially exist.

217

00:24:31,800 --> 00:24:39,400

It's probably the most sophisticated aircraft we have today, and it's really fast, flies really high,

218

00:24:40,600 --> 00:24:48,120

and probably has the ability to be stealth, in other words, you can't even see it, but it's real.

219

00:24:49,800 --> 00:24:56,840

Nobody's ever really seen it or know where it's at, but it's out there. You'll never see it unless they want you to see it.

220

00:24:58,360 --> 00:25:03,960

Reports of these triangular craft come in from all over the world. Common aspects of the descriptions

221

00:25:03,960 --> 00:25:09,560

are that they move silently and are massive in size, comparable to a football field.

222

00:25:10,200 --> 00:25:16,520

That's a very interesting wave of UFO sightings that took place in 1989-1990

223

00:25:17,240 --> 00:25:22,920

in the German-Belgian area near the German border.

224

00:25:34,520 --> 00:25:41,160

In November 1989, Belgian soldiers were picking up unidentified flying objects on their radar screens.

225

00:25:41,960 --> 00:25:50,280

At the same time, several Belgian police officers reported sightings of a triangular UFO with three powerful light sources.

226

00:25:51,240 --> 00:25:54,600

They see a red light flashing irregularly on the craft's bottom.

227

00:25:55,320 --> 00:26:01,400

Another 150 witnesses observe the craft, and this is just the beginning.

228

00:26:12,120 --> 00:26:18,680

Four months later, on March 30, 1990, the entire incident is repeated.

229

00:26:19,480 --> 00:26:24,920

At 2,300 hours, unknown objects again appear on radar screens.

230

00:26:25,800 --> 00:26:31,080

F-16 fighters are scrambled from Bouvet-Champ airbase under the code NV90.

231

00:26:32,040 --> 00:26:41,480

Shortly before making visual contact, the UFO accelerates from about 270 to 1,745 km per hour in seconds

232

00:26:42,040 --> 00:26:46,440

and performs incredible maneuvers, contrary to all known laws of physics.

233

00:26:47,320 --> 00:26:58,040

The investigating officer, Colonel Wilfred de Bruyere, states that no American stealth aircraft or any other U.S. or NATO aircraft were operating in Belgium at that time.

234

00:26:58,440 --> 00:27:10,200

On February 3, 1990, a football match in the town of Spa is interrupted when a massive triangular object flies over the heads of the astonished spectators.

235

00:27:10,840 --> 00:27:14,840

It is the size equal to that of the football stadium.

236

00:27:15,800 --> 00:27:23,800

This so-called Belgian UFO is later observed in, among other places, Germany as well as the Czech Republic.

237

00:27:28,440 --> 00:27:34,440

What they reported is a low-frequency electrical humming noise.

238

00:27:35,240 --> 00:27:40,280

Keep in mind, this thing was as big as a football field across, in fact, two football fields.

239

00:27:40,760 --> 00:27:46,280

And there was a red light on the bottom that detached itself and then came back to the craft.

240

00:27:46,760 --> 00:27:50,600

And they reported this tube's pipes and cylinders on the bottom of the craft,

241

00:27:51,080 --> 00:27:53,000

low-frequency electrical humming noise.

242

00:27:53,080 --> 00:28:01,240

And then on each terminating corner of the craft itself, it had a white light that was shining down on the people below or like empty fields.

243

00:28:03,240 --> 00:28:08,440

And it's very interesting because there were police officers who saw it.

244

00:28:08,760 --> 00:28:16,840

There were military people who saw it. The Belgian military actually scrambled fighter jets to intercept this phenomenon.

245

00:28:17,240 --> 00:28:19,240

They had stuff on their radar.

246

00:28:19,320 --> 00:28:23,480

They registered flight characteristics way beyond everything we have.

247

00:28:25,640 --> 00:28:37,480

They fairly closely approximate what insiders have said about the TR-33V, these flying triangles operating out of Area 51.

248

00:28:37,800 --> 00:28:46,040

And so they used anti-gravity technology, which meant that they could fly anywhere over the planet very, very quickly.

249

00:28:46,120 --> 00:28:53,400

So they could get from Area 51 in Nevada to a place like Belgium very quickly.

250

00:28:56,120 --> 00:29:01,960

To this day, the U.S. military denies the existence of Project Aurora and the Astra aircraft,

251

00:29:02,440 --> 00:29:10,840

which merely fuels the conviction of researchers that the TR-3B Astra is the most closely guarded prototype aircraft in U.S. history.

252

00:29:11,480 --> 00:29:17,480

Reported sightings of UFOs have accumulated over the years that are consistent in many aspects.

253

00:29:18,280 --> 00:29:23,960

What makes these observed flying objects unidentifiable, even by professional pilots and other trained personnel,

254

00:29:24,280 --> 00:29:31,080

is that they exhibit flight characteristics that we are as of yet incapable of achieving or competing with.

255

00:29:32,840 --> 00:29:39,720

We simply don't have publicly acknowledged technology capable of enabling aircraft to change direction at such high speeds.

256

00:29:40,680 --> 00:29:42,680

Or stop dead in midair.

257

00:29:44,360 --> 00:29:51,480

Such maneuvers would mean certain death for a human pilot. So who, if anyone, is actually piloting these craft?

258

00:29:52,280 --> 00:29:57,880

That is the question that since 2008 has been plaguing a man by the name of Louis Elizondo.

259

00:29:59,960 --> 00:30:01,960

2008 Washington, D.C.

260

00:30:10,680 --> 00:30:20,760

In 2008, at the U.S. State Department of Defense, Louis Elizondo, a man with extensive experience in anti-terrorism and intelligence operations,

261

00:30:21,400 --> 00:30:23,400

receives an unexpected visit.

262

00:30:27,160 --> 00:30:32,840

Two men, without any official identification, enter his office unannounced.

263

00:30:33,880 --> 00:30:36,440

They ask him a peculiar question.

264

00:30:37,400 --> 00:30:39,880

What do you think about UFOs?

265

00:30:40,920 --> 00:30:45,080

And that's how he becomes a team member of a UFO monitoring program,

266

00:30:45,800 --> 00:30:53,480

whose outcome clearly shows that the U.S. military, despite its claims, is still investigating UFOs.

267

00:30:54,840 --> 00:31:00,760

Elizondo sees secret army videos at first hand and watches incredible things.

268

00:31:06,840 --> 00:31:24,360

Even after five years of the program's existence, the team still has no answers to basic questions, and Elizondo resigns.

269

00:31:25,640 --> 00:31:31,160

At the end of 2017, he meets with New York Times journalist in a hotel in Washington,

270

00:31:31,640 --> 00:31:37,960

and soon the whole world sees the videos which Elizondo says prove his claims.

271

00:31:43,080 --> 00:31:47,560

Is this another carefully orchestrated leak of information by U.S. government agencies

272

00:31:48,200 --> 00:31:52,360

designed to bleed information about UFO encounters into the public domain?

273

00:31:53,240 --> 00:32:00,840

Or is it an unanticipated and unwelcome security breach about new propulsion systems and technologies

274

00:32:01,240 --> 00:32:03,960

reverse engineered from recovered UFOs?

275

00:32:06,840 --> 00:32:15,800

I'm only prepared to vaguely refer to perhaps the potential of nuclear and water,

276

00:32:16,600 --> 00:32:22,600

and not necessarily having to be related nuclear and water, but there are some patterns there,

277

00:32:22,600 --> 00:32:28,280

and I'm not prepared to go into any more detail on that at this point, but there are some congruencies.

278

00:32:32,120 --> 00:32:38,760

The footage shot by the U.S. Navy in 2004 and published in 2017 is exceptionally compelling.

279

00:32:39,560 --> 00:32:44,200

The Navy's admission that the recordings were made by instruments on its aircraft

280

00:32:44,200 --> 00:32:50,200

leaves no room for doubt about the truthfulness of the testimonies of witnesses to the USS Nimitz

281

00:32:50,200 --> 00:32:57,400

UFO incident, an encounter reported by U.S. fighter pilots and Navy personnel of the Nimitz Carrier Strike Group.

282

00:32:58,200 --> 00:33:06,680

It's not just a video, it's the testimony of the pilots who are trusted to protect our nation.

283

00:33:06,680 --> 00:33:11,880

They have the highest security clearances in our nation, they're trusted to defend us from all

284

00:33:11,880 --> 00:33:16,680

adversaries, they say it was real that that pursuit was real, that they encountered these

285

00:33:16,680 --> 00:33:21,960

craft and they performed in a way that we've never seen before. This is now not a secret,

286

00:33:21,960 --> 00:33:27,080

this is out there, it's admitted, ground radar, air radar, ground visual, air visual,

287

00:33:27,720 --> 00:33:34,200

everything has come together to a point where our technology itself is better capable of detecting

288

00:33:34,200 --> 00:33:40,520

these things. The government has admitted it to you. Experts believe that the number of

289

00:33:40,520 --> 00:33:44,600

sightings of these unidentified aircraft at sea is no coincidence.

290

00:33:45,160 --> 00:33:53,720

November 2004 Pacific Ocean off the coast of San Diego.

291

00:33:59,160 --> 00:34:05,720

These objects, based on the way they were flying, most certainly it's not Newtonian physics,

292

00:34:06,760 --> 00:34:12,280

it's non-classical physics, so based on that I have to say yeah, they probably are trans-medium

293

00:34:12,280 --> 00:34:19,720

type craft where they can go from space to atmosphere to the water seamlessly and I have to

294

00:34:19,720 --> 00:34:27,240

say it could have been not from this earth. Kevin Day, a US Navy officer on board the USS

295

00:34:27,240 --> 00:34:33,000

Princeton, is one of those witnesses who observed the strange activities of unidentified aerial

296

00:34:33,000 --> 00:34:39,560

phenomena over a period of two whole weeks. The ship's cutting-edge military technology

297

00:34:39,560 --> 00:34:43,080

alerted him that unknown vessels were moving through the military airspace

298

00:34:43,640 --> 00:34:49,800

and it was he who scrambled commander-favors, fighter squadron. And I notice these really

299

00:34:49,800 --> 00:34:54,760

odd tracks on the radar, I couldn't really understand and they had never seen anything like this before.

300

00:34:55,960 --> 00:35:02,120

Between five and six tracks and they were tracking real slow from north to south at 28,000 feet going

301

00:35:02,120 --> 00:35:07,160

about at 100 knots, which is really strange. Usually things that high in the sky don't travel

302

00:35:07,160 --> 00:35:12,760

that slowly because they'll fall straight out of the sky. So we tried our best, the whole combat

303

00:35:12,760 --> 00:35:18,280

team tried their best to identify what these things were and we weren't really concerned about them

304

00:35:18,280 --> 00:35:22,280

because we were way off doing our own thing and these things could have been totally unrelated to

305

00:35:22,280 --> 00:35:29,000

us. They weren't emitting any type of electronic signals and they were very anomalous, I had never

306

00:35:29,000 --> 00:35:35,000

seen anything like that. On the November 14th we had an air defense exercise scheduled, we call it

307

00:35:35,000 --> 00:35:41,400

ADEX, in which the strike fighter interceptors from the USS Nimitz were going to launch.

308

00:35:42,120 --> 00:35:48,040

And it happened to be commander-favors flight, he's one of the squadron skippers off the Nimitz.

309

00:35:50,280 --> 00:35:54,280

Flight was called fast equal flight. I have his comms up in the overhead speaker,

310

00:35:54,280 --> 00:35:57,400

he screams out, oh my god, oh my god, I'm engaged, I'm engaged.

311

00:36:05,080 --> 00:36:07,720

Look on the ass, oh my gosh.

312

00:36:10,200 --> 00:36:13,240

We're all going against the wind, the wind's a hundred and point out to the west.

313

00:36:16,600 --> 00:36:23,240

And we watched this object on our radar scope, it went from 28,000 feet down to the surface of

314

00:36:23,240 --> 00:36:29,640

the ocean in .78 seconds I found out the next day, less than a second, no sonic booms.

315

00:36:29,720 --> 00:36:35,640

So he left his wingman up at the altitude, he went down to chase it and he said, oh Charlie,

316

00:36:35,640 --> 00:36:39,160

I think we might have a downed aircraft in this position, I'm seeing some sort of

317

00:36:39,160 --> 00:36:47,160

disturbance in the water. And at that time he saw the tick-clack looking object hovering

318

00:36:47,160 --> 00:36:52,760

right above the surface of the ocean. And he later described it as looking like a giant

319

00:36:53,480 --> 00:37:01,160

tic-tac candy mitt. It was pure white, no doors, no windows, no wings, no obvious means of propulsion.

320

00:37:02,520 --> 00:37:07,800

And they're pretty shot by it. There was no time ever when I thought they were hostile. I had the

321

00:37:09,000 --> 00:37:12,600

impression that they were acting like a flock of birds and they just like if you throw a rocket

322

00:37:12,600 --> 00:37:18,440

of flock of birds they scatter and they rejoin. That's exactly what they did. This is really

323

00:37:18,440 --> 00:37:23,480

strange behavior and I don't know what these things are. And strangely enough all of our

324

00:37:23,480 --> 00:37:28,920

communications data was missing. I couldn't write the message and the same thing with all the radar

325

00:37:28,920 --> 00:37:35,080

data was missing. I didn't have no evidence to write a message with and I'd never received any

326

00:37:35,080 --> 00:37:42,200

explanation of where that data went. The question also arose as to whether it might have been a test

327

00:37:42,200 --> 00:37:48,280

of new U.S. military technologies based on reverse engineering without the Navy being aware.

328

00:37:50,520 --> 00:37:54,920

I don't know who in the right mind would try to test it against us without briefing us.

329

00:37:56,200 --> 00:38:03,240

Just due to this, if I could describe Navy training in one word it would be safety. If that was a

330

00:38:03,240 --> 00:38:10,200

deliberate test on top of our exercise it was not safe. And I have a very hard time accepting that

331

00:38:10,760 --> 00:38:19,880

premise. In late 2019, To the Stars Academy, an organization composed of former high-ranking

332

00:38:19,880 --> 00:38:26,120

military and intelligence service personnel including Luis Elizondo, admitted openly that

333

00:38:26,120 --> 00:38:32,440

it plans to collaborate with U.S. armed forces. They plan on analyzing and re-engineering

334

00:38:32,440 --> 00:38:38,440

meta-material samples that, according to many indicators, do not originate on our planet.

335

00:38:39,400 --> 00:38:45,000

Just imagine a private company comes out and says we have material from a crashed UFO.

336

00:38:46,120 --> 00:38:53,960

Everyone would laugh. But then the United States military makes a contract with this private company

337

00:38:53,960 --> 00:39:00,760

in order to be able to investigate, to do research with these materials that are allegedly from a

338

00:39:00,760 --> 00:39:08,200

crashed UFO. So that's where everybody stops laughing because then it becomes quite evident

339

00:39:08,200 --> 00:39:14,600

that there must be something to it, right? Why would the U.S. military seriously consider

340

00:39:14,600 --> 00:39:20,440

investigating stuff from a crashed UFO if there weren't a slight chance that it may be true?

341

00:39:21,480 --> 00:39:25,320

So that is the most interesting development for me in years.

342

00:39:25,960 --> 00:39:29,800

I think the same time next year we're going to have a fundamentally different conversation.

343

00:39:30,520 --> 00:39:37,480

I think disclosure already occurred. I don't think necessarily disclosure is an event. I think

344

00:39:37,480 --> 00:39:43,000

it's a process. And I think that process began. If we could figure out how that technology works,

345

00:39:43,000 --> 00:39:47,240

if our private companies, the aerospace companies or the Department of Defense could figure out how

346

00:39:47,240 --> 00:39:53,400

it works and duplicate it, it's game over. We would rule the world. We would have an advantage

347

00:39:53,400 --> 00:39:59,640

over any of our adversaries. The other part of that coin is if China, if Russia, if another country

348

00:39:59,640 --> 00:40:03,880

is able to make a breakthrough in that technology, we would be in bad trouble. The United States

349

00:40:03,880 --> 00:40:09,400

would be in bad trouble. Whoever has that technology controls the world. So there is a race. It's an

350

00:40:09,400 --> 00:40:15,560

arms race, a source to figure it out. So for example, they've been setting artifacts that are

351

00:40:15,560 --> 00:40:21,400

nano engineered at the angstrom level, which is one tenth of a nanometer. So in other words,

352

00:40:21,400 --> 00:40:29,080

at a much tinier area of manufacture than what we are currently able to do. And this artifact,

353

00:40:29,720 --> 00:40:36,440

allegedly from the 1940s, we're told. So if that's true, and I tend to believe this,

354

00:40:37,320 --> 00:40:42,760

then someone was manufacturing angstrom level metamaterials in the 1940s. We're not even close

355

00:40:42,760 --> 00:40:50,200

to that now. Whatever or whomever they are, they evidently have technology that allows them to go

356

00:40:50,200 --> 00:40:56,120

anywhere they choose, whether it's the depths of the ocean or the upper atmosphere, and that it is

357

00:40:56,120 --> 00:41:03,880

capable of surpassing any security or surveillance system. Is it up to these visitors alone to decide

358

00:41:03,880 --> 00:41:09,720

when the time is ripe for the disclosure day, for the unveiling of the greatest mystery in human

359

00:41:09,720 --> 00:41:15,800

history? Or can we piece the truth together from the information provided by whistleblowers,

360

00:41:15,800 --> 00:41:23,160

government employees and hackers? Just how impenetrable is the veil of secrecy?

361

00:41:23,240 --> 00:41:33,480

If we get away from vector jet propulsion and we're able to use the electromagnetic force to

362

00:41:33,480 --> 00:41:38,200

counter the force of gravity, there's huge ramifications, there's huge applications with

363

00:41:38,200 --> 00:41:43,480

that would revolutionize the airline industry. We could all move about the world much more quickly.

364

00:41:43,480 --> 00:41:51,240

So I think because of the applicability, the importance of this technology, if we did get

365

00:41:51,320 --> 00:41:57,320

crash in 1947, we would work very hard to try to develop that for all of these different applications.

366

00:41:58,120 --> 00:42:05,000

In my view, what we really need to be doing is looking at the evidence that we can actually

367

00:42:05,880 --> 00:42:12,440

analyze and debate about. To me, that evidence shows there is an overwhelming presence

368

00:42:13,240 --> 00:42:21,560

of intelligence, of vastly greater capabilities than what we have in the global technology that

369

00:42:21,560 --> 00:42:27,960

we're using. They've got capabilities that we lack and they are here. That's the first thing

370

00:42:27,960 --> 00:42:32,680

that we need to get out is have that public discussion, really worldwide discussion.

371

00:42:35,560 --> 00:42:40,440

According to some ufologists, this government collaboration with a private company

372

00:42:41,080 --> 00:42:46,360

that appears consistently transparent in publishing information indicates a behind-the-scenes

373

00:42:46,360 --> 00:42:52,200

strategy of preparing the public for complete disclosure. Facts that have been concealed for

374

00:42:52,200 --> 00:42:57,240

decades will be revealed gradually and the mysteries hidden from scrutiny since the

375

00:42:57,240 --> 00:43:02,360

post-war years will be allowed to trickle down slowly into public awareness.

376

00:43:02,920 --> 00:43:12,520

Once the public has absorbed the information that scientists are examining samples of

377

00:43:12,520 --> 00:43:18,520

metamaterials from space, it will be less shocked by the revelation that entire extraterrestrial

378

00:43:18,520 --> 00:43:22,760

vessels are being examined and have been for many decades.

379

00:43:25,960 --> 00:43:31,160

Our military intelligence and its deep-buck programs are studying and trying to understand

380

00:43:31,160 --> 00:43:36,920

every aspect of every little thing they've ever gotten from an ET craft. And if they've actually

381

00:43:36,920 --> 00:43:42,440

dealt with the ETs, which still remains to be seen and interviewed them somehow, they're working

382

00:43:42,440 --> 00:43:47,960

with all of that. They never stop. This is the most important and the most classified program in the

383

00:43:47,960 --> 00:43:51,960

world.

384

00:44:31,160 --> 00:44:32,540

you

385

00:45:01,160 --> 00:45:02,040

you
