

1

00:00:00,000 --> 00:00:03,000

Imagine if you had a nightmare.

2

00:00:09,000 --> 00:00:11,000

And it came true.

3

00:00:12,000 --> 00:00:17,000

Or that you drew a perfect picture of something you'd never seen.

4

00:00:17,000 --> 00:00:21,000

Or it could cure the sick just by looking at a photograph.

5

00:00:22,000 --> 00:00:24,000

Would you be losing your mind?

6

00:00:24,000 --> 00:00:29,000

Or have you found a strange new way to the truth?

7

00:00:30,000 --> 00:00:37,000

It's time to shine a light on the psychic mom with truth or scare.

8

00:01:00,000 --> 00:01:12,120

The

9

00:01:16,000 --> 00:01:18,000

Do you know what I'm thinking?

10

00:01:18,000 --> 00:01:23,000

Well then, maybe, just maybe you're psychic.

11

00:01:23,000 --> 00:01:28,000

You wouldn't be the first person to make that claim, but is it all just a bunch of talk?

12

00:01:28,000 --> 00:01:31,000

Do we really have that sixth sense?

13

00:01:31,000 --> 00:01:34,000

That's the question that science is trying to answer.

14

00:01:38,000 --> 00:01:43,000

Sometimes it starts with a nightmare.

15

00:01:43,000 --> 00:01:47,000

Back in the fall of 1985, a woman had a terrible dream.

16

00:01:47,000 --> 00:01:51,000

The scariest part is that it seemed so real.

17

00:01:52,000 --> 00:01:53,000

Too real.

18

00:01:58,000 --> 00:02:01,000

But it was only a dream.

19

00:02:01,000 --> 00:02:06,000

So she went back to sleep, safe in her husband's arms.

20

00:02:08,000 --> 00:02:13,000

But then, two weeks later, her husband's friend invited him to go on a hunting trip.

21

00:02:13,000 --> 00:02:16,000

The woman felt a chill deep in her bones.

22

00:02:17,000 --> 00:02:20,000

Her husband rarely went hunting.

23

00:02:20,000 --> 00:02:23,000

Was this more than a coincidence?

24

00:02:24,000 --> 00:02:27,000

With her nightmare flashing through her mind,

25

00:02:27,000 --> 00:02:29,000

she begged him to stay.

26

00:02:29,000 --> 00:02:31,000

When he asked her why,

27

00:02:32,000 --> 00:02:36,000

she was too embarrassed to admit that it was a dream.

28

00:02:38,000 --> 00:02:41,000

But then, how did she know?

29

00:02:43,000 --> 00:02:46,000

The hunter died in the woods that day.

30

00:02:46,000 --> 00:02:49,000

His wife's nightmare had become reality.

31

00:02:49,000 --> 00:02:52,000

Was it actually a vision of the future?

32

00:02:52,000 --> 00:02:57,000

Ask any skeptic, and they'll tell you it was a bizarre, tragic coincidence.

33

00:02:57,000 --> 00:03:02,000

That extrasensory perception is a figment of our imagination.

34

00:03:04,000 --> 00:03:06,000

But ask anyone on the street.

35

00:03:06,000 --> 00:03:08,000

Most people admit they believe.

36

00:03:10,000 --> 00:03:12,000

At least a little.

37

00:03:13,000 --> 00:03:16,000

And even some scientists are convinced that ESB is real.

38

00:03:16,000 --> 00:03:21,000

Now, psychic investigator Dr. William Rohl is looking for a way to prove it.

39

00:03:24,000 --> 00:03:26,000

Up until the present,

40

00:03:26,000 --> 00:03:29,000

parapsychologists have been focused on

41

00:03:29,000 --> 00:03:33,000

proving that psychic phenomena occur.

42

00:03:35,000 --> 00:03:39,000

Now it's changing, and we are convinced that a phenomena are real,

43

00:03:39,000 --> 00:03:42,000

and the question now is, how do they happen?

44

00:03:42,000 --> 00:03:45,000

Dr. Rohl has investigated hundreds of cases.

45

00:03:45,000 --> 00:03:49,000

From the evidence, he's identified two different types of ESP.

46

00:03:49,000 --> 00:03:53,000

One is when people see into the future, like the woman's dream.

47

00:03:54,000 --> 00:03:57,000

The other is when people see events from the past,

48

00:03:57,000 --> 00:04:01,000

things they never experienced themselves, and couldn't know about.

49

00:04:02,000 --> 00:04:05,000

That's what happened to college professor Dr. Peter Nelson.

50

00:04:06,000 --> 00:04:09,000

When he was on vacation in Edinburgh, Scotland,

51

00:04:09,000 --> 00:04:11,000

he claims he had a psychic vision.

52

00:04:11,000 --> 00:04:13,000

One, he'll never forget.

53

00:04:13,000 --> 00:04:16,000

So I entered this building at this address,

54

00:04:16,000 --> 00:04:18,000

and as I opened the door and walked in,

55

00:04:18,000 --> 00:04:22,000

I had an intense feeling of a kind of a shockwave.

56

00:04:25,000 --> 00:04:28,000

And I saw very clearly, visually, in my mind's eye,

57

00:04:28,000 --> 00:04:33,000

a man in Workman's overalls falling from the top of the stairwell,

58

00:04:33,000 --> 00:04:35,000

down through the stairwell.

59

00:04:36,000 --> 00:04:39,000

I knew instantly, as I saw that,

60

00:04:39,000 --> 00:04:42,000

that he had died in the bottom of the stairwell.

61

00:04:42,000 --> 00:04:45,000

And as I said, I'd never been to this building before.

62

00:04:45,000 --> 00:04:48,000

And it was a very clear, inner, idetic image

63

00:04:48,000 --> 00:04:51,000

that I could see, I could see what he looked like.

64

00:04:51,000 --> 00:04:55,000

I could almost feel the moment of panic as he came off the scaffold.

65

00:04:56,000 --> 00:04:58,000

I was in the middle of the building,

66

00:04:58,000 --> 00:05:00,000

and I saw a man in the middle of the building,

67

00:05:00,000 --> 00:05:02,000

and I saw a man in the middle of the building,

68

00:05:02,000 --> 00:05:04,000

as he came off the scaffold.

69

00:05:05,000 --> 00:05:09,000

Dr. Nelson asked his friends if a Workman had died there.

70

00:05:09,000 --> 00:05:11,000

Their shocking answer?

71

00:05:12,000 --> 00:05:16,000

Two years before, a painter had fallen from the skylight.

72

00:05:18,000 --> 00:05:21,000

By carefully questioning people like Dr. Nelson,

73

00:05:21,000 --> 00:05:24,000

Dr. Rohl is developing his theory on where ESP comes from.

74

00:05:24,000 --> 00:05:27,000

People who are psychic,

75

00:05:27,000 --> 00:05:30,000

or people who are more psychic than the rest of us,

76

00:05:30,000 --> 00:05:34,000

very often had a stressful childhood.

77

00:05:34,000 --> 00:05:40,000

And the sort of heightened sensitivity seems to be

78

00:05:40,000 --> 00:05:46,000

because these people have their antennas out for pain, essentially.

79

00:05:46,000 --> 00:05:49,000

Dr. Nelson knows the future will bring him many more glimpses

80

00:05:49,000 --> 00:05:51,000

of someone else's painful past.

81

00:05:51,000 --> 00:05:55,000

But he has no idea when the next psychic vision will strike.

82

00:06:00,000 --> 00:06:03,000

Is there any truth to this woman's amazing claim?

83

00:06:03,000 --> 00:06:06,000

Can she actually help cure the sick with her psychic powers?

84

00:06:10,000 --> 00:06:12,000

Find out when Truth or Scare continues.

85

00:06:19,000 --> 00:06:24,000

So far, we've met people who say they only have random access to their psychic powers.

86

00:06:24,000 --> 00:06:29,000

A dream of the future, a glimpse of the past, always without warning.

87

00:06:30,000 --> 00:06:34,000

But there are some who can summon their psychic gifts at will.

88

00:06:34,000 --> 00:06:36,000

At least, that's what they claim.

89

00:06:46,000 --> 00:06:49,000

Joan Windsor tries to help the sick using her mysterious abilities.

90

00:06:49,000 --> 00:06:53,000

Instead of medical training, she uses psychic power.

91

00:06:54,000 --> 00:06:58,000

Sick people from all over the world write to her for help.

92

00:06:59,000 --> 00:07:02,000

She professes to have the power of clairvoyance,

93

00:07:02,000 --> 00:07:05,000

the ability to solve mysteries with any of the facts.

94

00:07:07,000 --> 00:07:09,000

Out of desperation, these people have turned to her,

95

00:07:09,000 --> 00:07:14,000

hoping that she can diagnose their mysterious illnesses and figure out a treatment.

96

00:07:15,000 --> 00:07:17,000

Maybe even a cure.

97

00:07:18,000 --> 00:07:23,000

I'm able to pick up the photograph and I think that it has vibrations

98

00:07:23,000 --> 00:07:26,000

because I think everybody has a unique vibration.

99

00:07:26,000 --> 00:07:30,000

So if I can hold on to the photograph, I tune into that person.

100

00:07:30,000 --> 00:07:34,000

The woman in this picture can't digest food without feeling intense pain.

101

00:07:34,000 --> 00:07:37,000

Her doctor had given her test after test,

102

00:07:37,000 --> 00:07:40,000

but the cause of her problem remains a mystery.

103

00:07:43,000 --> 00:07:47,000

Can Joan Windsor possibly see what all those medical tests missed?

104

00:07:49,000 --> 00:07:54,000

This is an intuitive evaluation for Joyce White.

105

00:07:54,000 --> 00:08:00,000

Joan's psychic vision was one of the woman's spine getting weaker and weaker.

106

00:08:00,000 --> 00:08:04,000

It turns out that when the woman was a child, she'd hurt herself while ice skating.

107

00:08:04,000 --> 00:08:09,000

Joan believes that injury is causing the woman's unbearable pain.

108

00:08:10,000 --> 00:08:12,000

Is this all too much to be believed?

109

00:08:12,000 --> 00:08:18,000

Well, Joan claims that doctors have confirmed 70% of her diagnoses.

110

00:08:18,000 --> 00:08:23,000

And in this case, her clairvoyant diagnosis was picture perfect.

111

00:08:24,000 --> 00:08:28,000

And there are more than just a few believers in second sight.

112

00:08:33,000 --> 00:08:38,000

When Joe McMonagall was a young man, he had a frightening near-death experience.

113

00:08:38,000 --> 00:08:42,000

Ever since, he says he has felt psychic powers.

114

00:08:43,000 --> 00:08:49,000

Back in the 1970s, the Central Intelligence Agency created the Stargate Program.

115

00:08:49,000 --> 00:08:53,000

Joe and more than 20 others were hired to be psychic spies.

116

00:08:56,000 --> 00:08:58,000

Joe got right to work.

117

00:08:58,000 --> 00:09:03,000

From one of his visions, he diagrammed a new Russian submarine before it was even left.

118

00:09:03,000 --> 00:09:06,000

Then he told the government where to look for it.

119

00:09:08,000 --> 00:09:11,000

About four months later, a satellite spotted the sub.

120

00:09:11,000 --> 00:09:13,000

It was just where Joe had said it would be.

121

00:09:13,000 --> 00:09:18,000

The way the information comes generally is in bits and pieces of fragments.

122

00:09:18,000 --> 00:09:26,000

It's sort of like getting parts or portions of a picture, not all simultaneously, but in bits and pieces.

123

00:09:27,000 --> 00:09:28,000

Was it just luck?

124

00:09:28,000 --> 00:09:34,000

To put Joe's psychic powers to the test, the CIA sent an agent to a secret location.

125

00:09:34,000 --> 00:09:36,000

Joe was asked to find him.

126

00:09:36,000 --> 00:09:40,000

He drew pictures of windmills 100 miles from San Francisco.

127

00:09:41,000 --> 00:09:44,000

In exactly the area where the agent was standing.

128

00:09:46,000 --> 00:09:52,000

Joe was successful in his assignments, but those who don't believe in psychic powers like to point out that he was the only one.

129

00:09:52,000 --> 00:09:58,000

Overall, the psychic predictions in the Stargate Program were about the same as if a person had guessed.

130

00:09:58,000 --> 00:10:01,000

But the believers are not discouraged.

131

00:10:03,000 --> 00:10:09,000

At the world-famous Ryan Institute in Durham, North Carolina, psychic research is being conducted every day.

132

00:10:11,000 --> 00:10:19,000

Researchers use something called remote viewing to test the mysterious phenomenon called mental telepathy.

133

00:10:19,000 --> 00:10:24,000

The remote viewing test requires two people, a sender and a receiver.

134

00:10:24,000 --> 00:10:27,000

A computer selects some photographs at random.

135

00:10:27,000 --> 00:10:31,000

The sender looks at them and concentrates on each image.

136

00:10:31,000 --> 00:10:35,000

Here, she's looking at a campsite in the middle of the woods.

137

00:10:35,000 --> 00:10:39,000

In another room, the receiver tries to picture what the sender is seeing.

138

00:10:39,000 --> 00:10:42,000

I'd like you to look through Maggie's eyes and describe what you see.

139

00:10:45,000 --> 00:10:49,000

The receiver concentrates, then draws the first images that appear in her mind.

140

00:10:50,000 --> 00:10:51,000

A square?

141

00:10:51,000 --> 00:10:55,000

Dr. James Broughton is the director of the Ryan Institute.

142

00:10:55,000 --> 00:10:58,000

If you ask him, we all have psychic potential.

143

00:10:58,000 --> 00:11:01,000

The question is, can we develop it?

144

00:11:01,000 --> 00:11:03,000

I think psychic is precisely that.

145

00:11:03,000 --> 00:11:06,000

It's an ability, a human ability, nothing magical about it.

146

00:11:06,000 --> 00:11:08,000

And it's going to be there.

147

00:11:08,000 --> 00:11:13,000

Whether somebody believes it or not may control how much they deploy it,

148

00:11:13,000 --> 00:11:17,000

very much along the way that somebody may think they just have no musical ability.

149

00:11:17,000 --> 00:11:20,000

And every time they pick up an instrument, it kind of sounds lousy.

150

00:11:20,000 --> 00:11:26,000

Do they not believe in music or do they just not have any faith in their own ability to deploy it?

151

00:11:26,000 --> 00:11:30,000

Through something flat, through the tree trunks.

152

00:11:30,000 --> 00:11:33,000

The experiment continues.

153

00:11:33,000 --> 00:11:36,000

The sender concentrates on other photographs.

154

00:11:36,000 --> 00:11:39,000

The receiver makes more drawings.

155

00:11:40,000 --> 00:11:44,000

Afterwards, Dr. Broughton compares the drawings to the photographs.

156

00:11:44,000 --> 00:11:47,000

Are the sender and receiver psychically connected?

157

00:11:47,000 --> 00:11:51,000

The answer is a definite maybe.

158

00:11:51,000 --> 00:11:54,000

The receiver picked up the campsite photo exactly.

159

00:11:54,000 --> 00:11:57,000

But her other drawings were a lot sketchier.

160

00:11:57,000 --> 00:12:00,000

This trial, well, sort of in the middle, I guess,

161

00:12:00,000 --> 00:12:02,000

neither a success or a failure.

162

00:12:02,000 --> 00:12:04,000

Successes are good.

163

00:12:04,000 --> 00:12:08,000

We have quite a few direct hits which are real nice to have.

164

00:12:08,000 --> 00:12:13,000

But we learn as much from the failures, the ones that aren't quite right,

165

00:12:13,000 --> 00:12:16,000

because we're trying to understand the process here.

166

00:12:21,000 --> 00:12:24,000

Can humans sense when someone's watching them?

167

00:12:24,000 --> 00:12:26,000

Science sets out to try and prove it.

168

00:12:30,000 --> 00:12:33,000

When truth or scare returns.

169

00:12:36,000 --> 00:12:38,000

Question.

170

00:12:38,000 --> 00:12:42,000

Have you ever had the feeling that someone is watching you?

171

00:12:50,000 --> 00:12:52,000

It's a feeling we've all experienced.

172

00:12:52,000 --> 00:12:55,000

You're sitting there, minding your own business,

173

00:12:55,000 --> 00:12:57,000

and then you feel a chill,

174

00:12:57,000 --> 00:13:02,000

an unmistakable sense that someone is watching you.

175

00:13:06,000 --> 00:13:10,000

I mean, just think of how many times you have had that very same feeling.

176

00:13:10,000 --> 00:13:14,000

But when you turn, there's no one there.

177

00:13:16,000 --> 00:13:20,000

The experiment is concerned with the remote detection of staring.

178

00:13:20,000 --> 00:13:24,000

Dr. Richard Weissman is a professor at the University of Hertfordshire in England.

179

00:13:24,000 --> 00:13:28,000

He's not convinced that the feeling of being watched is a psychic one.

180

00:13:28,000 --> 00:13:32,000

So, he's conducting an experiment to see how well it is.

181

00:13:32,000 --> 00:13:37,000

The subject is monitored by a machine that works like a lie detector.

182

00:13:37,000 --> 00:13:42,000

His physical reactions are recorded to see if he can actually feel it when someone is watching it.

183

00:13:42,000 --> 00:13:47,000

For 20 minutes, Dr. Weissman will randomly stare at the subject's image.

184

00:13:48,000 --> 00:13:51,000

If the subject senses he's being watched,

185

00:13:51,000 --> 00:13:54,000

the monitors will detect the changes in his vital signs.

186

00:13:54,000 --> 00:13:57,000

I think this experiment is interesting for a number of reasons.

187

00:13:57,000 --> 00:14:00,000

People come into it expecting it to be successful.

188

00:14:00,000 --> 00:14:02,000

They've had the experience of being stared at,

189

00:14:02,000 --> 00:14:04,000

turning around, seeing somebody looking at them.

190

00:14:04,000 --> 00:14:06,000

It's an everyday phenomena.

191

00:14:06,000 --> 00:14:09,000

And so they come in thinking that, yes, there might be something psychic going on here.

192

00:14:09,000 --> 00:14:13,000

And what I hope is that we actually find some strong evidence for psychic ability.

193

00:14:13,000 --> 00:14:19,000

Unfortunately, this session was a failure.

194

00:14:19,000 --> 00:14:23,000

In fact, most of his remote viewing sessions are.

195

00:14:23,000 --> 00:14:28,000

Back in the United States, remote viewing tests like this are more successful.

196

00:14:28,000 --> 00:14:31,000

But those tests are usually by believers.

197

00:14:31,000 --> 00:14:36,000

Professor Weissman's research has shown that those tests are interpreted more favorably

198

00:14:36,000 --> 00:14:39,000

than ones given by more skeptical scientists like him.

199

00:14:39,000 --> 00:14:47,000

So what is needed is an ESB test that can't be influenced by the personal opinions of the researchers.

200

00:14:47,000 --> 00:14:53,000

At the University of Edinburgh in Scotland, they believe they've developed that test.

201

00:14:53,000 --> 00:14:58,000

The university is one of the few in the world with a program in parapsychology,

202

00:14:58,000 --> 00:15:00,000

the study of psychic phenomena.

203

00:15:00,000 --> 00:15:06,000

Dr. Robert Morris runs that program, though most psychologists would probably not agree.

204

00:15:06,000 --> 00:15:11,000

He believes that the study of ESP is just as important as psychology itself.

205

00:15:11,000 --> 00:15:18,000

We've been improving our techniques all along, partly because we've had access to more sophisticated procedures.

206

00:15:18,000 --> 00:15:23,000

The problems we have are problems shared by psychology, biology and various other areas.

207

00:15:23,000 --> 00:15:26,000

So they've been developing new techniques as well.

208

00:15:26,000 --> 00:15:28,000

The computer has been very helpful.

209

00:15:28,000 --> 00:15:31,000

That's because like humans, process lots of information.

210

00:15:31,000 --> 00:15:35,000

But unlike people, they don't have opinions.

211

00:15:35,000 --> 00:15:38,000

They're the ultimate impartial scientists.

212

00:15:38,000 --> 00:15:43,000

And with them conducting the test, can the skeptics question the results?

213

00:15:48,000 --> 00:15:52,000

Could a boy's nightmare be the key to saving his family from tragedy?

214

00:15:55,000 --> 00:15:57,000

Next, on Truth or Scare.

215

00:15:58,000 --> 00:16:02,000

The Test of Human Psychic Abilities

216

00:16:04,000 --> 00:16:09,000

The testing of human psychic abilities has finally entered the computer age.

217

00:16:09,000 --> 00:16:15,000

Now, it's up to a man-made brain to help determine the capacity of human psychic power.

218

00:16:19,000 --> 00:16:22,000

What we'll do next is go ahead and put on the eye shields.

219

00:16:22,000 --> 00:16:24,000

Now I'd like to go ahead and start on your left hand side.

220

00:16:24,000 --> 00:16:25,000

If you go ahead and close your eyes.

221

00:16:25,000 --> 00:16:30,000

Welcome to the most advanced experiment ever devised to test psychic powers.

222

00:16:30,000 --> 00:16:34,000

First thing you need to do, cut a ping-pong ball in half.

223

00:16:37,000 --> 00:16:43,000

Here at the University of Edinburgh, Simon is being given an auto-guns-filled test to see if he can read minds.

224

00:16:44,000 --> 00:16:48,000

He'll be placed in a sensory deprivation chamber.

225

00:16:48,000 --> 00:16:52,000

The ping-pong balls block out everything but light.

226

00:16:52,000 --> 00:16:55,000

The headphones remove all outside sounds.

227

00:16:56,000 --> 00:16:58,000

It's total isolation.

228

00:16:59,000 --> 00:17:03,000

Simon is the receiver in this experiment and is the sender.

229

00:17:04,000 --> 00:17:07,000

A computer randomly chooses a video to show her.

230

00:17:08,000 --> 00:17:10,000

As she concentrates on that image,

231

00:17:17,000 --> 00:17:20,000

Simon will describe what he sees and feels.

232

00:17:20,000 --> 00:17:22,000

I'm feeling tension in my chest.

233

00:17:22,000 --> 00:17:24,000

My heart rate's going up.

234

00:17:25,000 --> 00:17:29,000

That's the kind of sensation of claustrophobia and anxiety.

235

00:17:30,000 --> 00:17:33,000

Kind of almost fear but not quite.

236

00:17:33,000 --> 00:17:36,000

Image of space.

237

00:17:36,000 --> 00:17:38,000

People floating in space.

238

00:17:40,000 --> 00:17:42,000

It's the sensation of water.

239

00:17:44,000 --> 00:17:47,000

Okay, Simon, what we're going to do now is do the judging sequence.

240

00:17:47,000 --> 00:17:50,000

On the screen in front of you will come up your four possible choices.

241

00:17:51,000 --> 00:17:54,000

Now, Simon looks at a series of images.

242

00:17:54,000 --> 00:17:58,000

He picks out any that he feels relate to what he saw in his mind's eye.

243

00:18:01,000 --> 00:18:02,000

Have a look.

244

00:18:03,000 --> 00:18:06,000

Okay, so you saw Simon's ratings.

245

00:18:06,000 --> 00:18:08,000

I saw what he picked up as his first choice.

246

00:18:08,000 --> 00:18:10,000

So tell us what was the target.

247

00:18:10,000 --> 00:18:11,000

Seat diving!

248

00:18:11,000 --> 00:18:12,000

Oh, yeah!

249

00:18:12,000 --> 00:18:16,000

What Simon said was exactly right.

250

00:18:16,000 --> 00:18:22,000

And so far, more than half the auto-gans filled tests in Scotland have been successful.

251

00:18:22,000 --> 00:18:26,000

Results like that are more than just luck.

252

00:18:26,000 --> 00:18:30,000

It still doesn't prove conclusively that ESP exists,

253

00:18:30,000 --> 00:18:35,000

but it's made it a lot harder for non-believers to turn a blind eye.

254

00:18:38,000 --> 00:18:43,000

Still, the most amazing examples of psychic power aren't found in the lab.

255

00:18:43,000 --> 00:18:45,000

They're found right outside the front door.

256

00:18:47,000 --> 00:18:50,000

Like in the summer of 1993.

257

00:18:50,000 --> 00:18:56,000

That's when Perry Gumbawa, an 11-year-old boy in California, had a dream that changed his life.

258

00:18:56,000 --> 00:19:01,000

He was taking a walk with his grandmother, his brother, and baby sister.

259

00:19:01,000 --> 00:19:03,000

He saw a smiling old woman.

260

00:19:03,000 --> 00:19:05,000

There was something strange about her.

261

00:19:05,000 --> 00:19:10,000

Then, suddenly, a van came flying down the street.

262

00:19:10,000 --> 00:19:11,000

Out of control.

263

00:19:11,000 --> 00:19:14,000

Perry just watched, helpless, unable to move.

264

00:19:17,000 --> 00:19:22,000

But it was only a dream.

265

00:19:22,000 --> 00:19:25,000

Perry still remembered it a few weeks later.

266

00:19:25,000 --> 00:19:28,000

It's a good thing that he did.

267

00:19:28,000 --> 00:19:31,000

Because that's when Perry did go for a walk with his family.

268

00:19:31,000 --> 00:19:36,000

And just like in his dream, he looked up to see that strange old woman.

269

00:19:39,000 --> 00:19:42,000

But this time, she was real.

270

00:19:43,000 --> 00:19:46,000

So when a van came flying around the corner,

271

00:19:46,000 --> 00:19:48,000

Perry knew what was about to happen.

272

00:19:48,000 --> 00:19:53,000

And because he did, his family's lives were saved.

273

00:19:55,000 --> 00:19:57,000

It's only one story.

274

00:19:57,000 --> 00:20:03,000

But when you add all of them up, possibilities are mind-boggling.

275

00:20:04,000 --> 00:20:07,000

Is the future happening now?

276

00:20:08,000 --> 00:20:13,000

Just like those glimpses of the past that some people can see happening around us today?

277

00:20:13,000 --> 00:20:20,000

And if we can truly see into the future, is it actually possible to change it?

278

00:20:23,000 --> 00:20:27,000

So many questions with answers that might make some people a little uneasy.

279

00:20:27,000 --> 00:20:32,000

It can be terrifying to confront the unknown psychic potential of the human mind.

280

00:20:33,000 --> 00:20:37,000

Fortunately, science continues to search for that proof of potential.

281

00:20:37,000 --> 00:20:39,000

Imagine what we might do.

282

00:20:39,000 --> 00:20:41,000

Read someone else's thoughts.

283

00:20:41,000 --> 00:20:43,000

Save lives.

284

00:20:43,000 --> 00:20:46,000

And maybe even see a picture of the future.
