Gary Osborn is a best selling author, who has written about topics such as Ancient Mysteries, Alchemy, Shamanism, the nature of reality, and the Rendlesham binary code.

The Rendlesham Forest Incident is arguably the best documented UFO case ever reported, and the binary download received by USAF Officer Jim Penniston would be decoded decades later to reveal some amazing information.

Over a series of three nights in December 1980 an extraordinary series of UFO incidents took place in Rendlesham Forest in the UK, next to the twin United States Air Force bases of Bentwaters and Woodbridge. A UFO was tracked on military radar and left physical evidence at the landing site, including damage and scorch marks on trees, indentations in the frozen ground, abnormally high levels of radiation, and physical injuries to the officers involved.

The UFO was seen by dozens of military witnesses, including the Deputy Base Commander. The object fired light beams at some of the men, and later into the weapons storage area where some military personnel allege that nuclear weapons were kept.

2023 04 06 UAP STUDIES Podcast <https://youtu.be/oksYxYEfrAU> THE TIC TAC INCIDENT WITNESS KEVIN DAY SHARES HIS EMOTIONAL EXPERIENCE ABOARD THE U.S.S. PRINCETON On November 14, 2004, the Nimitz Carrier Strike Group was conducting a training exercise about 100 miles southwest of San Diego California. Unbeknownst to them, advanced radar on a nearby ship the U.S.S. Princeton had been detecting what operators called "multiple anomalous aerial vehicles" over the horizon, descending eighty-thousand feet in less than a second.

During their training exercise F/A-18F, pilots said they were diverted to investigate the anomalous object(s). They say at first they found an area of roiling whitewater the size of a Boeing 737. And then they saw something strange above the water.

"We saw this little white Tic-Tac-looking object... and it's just kind of moving above the whitewater area," (Cmdr. Fravor recounted) "No predictable movement, no predictable trajectory," said Pilot Alex Dietrich.

The object had no markings, no wings, and no exhaust plumes. Later, another flight crew's targeting camera locked on to what it believed was the same UAP before it zipped off again, though the camera did manage to capture infrared video of something.

Kevin Day and the controllers on the USS Princeton had been tracking similar anomalous objects for days.

In August of 2020, Deputy Secretary of Defense David Norquist approved the establishment of a small group called the Unidentified

Can we decipher information from UAP video footage? Is there hidden math and information encoded in ancient structures and locations around the globe?

Jimmy Blanchette joins us for part 2, to discuss "Geometric Harmonics" which is uncovering mathematical connections, and helping us find patterns from UAP photos and videos. These connections are far more than co-incidental, and we break down some famous UFO sightings, as well as ancient & significant landmarks across the globe. The patterns are unmistakable and hard to refute.

Is there a way we can summon E.T. visitation? Jimmy Blanchette says yes, and provides evidence based on the many sightings associated with his method for contacting our galactic neighbours.

Many people have heard of using meditation and intention to try and establish contact and communication, however this method involves using focused high power radio waves to broadcast an intention and a location with the hope contact will be made.

Jimmy is a licensed amateur radio operator, and his 250,000 Watt radio tower is five times more powerful than Los Angeles' largest radio station. Jimmy uses focused waves and "moon bounce technology" to broadcast messages of intent for CE-5 groups all over the world.

Lt. Ryan Graves, is a former F/A-18 Super Hornet pilot who flew for the Navy for 10 years. In 2013/2014 Ryan and his VFA-11 "Red Rippers" squadron reported many anomalous radar hits, including verified craft sightings and even pilot near misses that were subsequently reported to the Pentagon and Congress.

Ryan has become an advocate for military and government UFO/UAP transparency, while encouraging further research on the anomalous activities which military personnel are reporting.

Ryan recently launched "Americans for Safe Aerospace", an advocacy group that will push Congress and the Biden administration to expand investigations into unidentified aerial phenomena (UAP), and share more details with the public. The Pentagon has yet to explain the existence of several UAPs identified by military pilots. Susan McCue, former chief of staff to Sen. Harry Reid (D-Nev.), who successfully pushed for Pentagon funding to investigate UAPs, will advise the group, along with former "Politico" defense editor Bryan Bender.

His groundbreaking medical work has been recognized worldwide, and his interest in the field of UAP makes him one of only a few great academic minds currently working on this subject. We asked Garry about his recent projects, as well as some big questions regarding the existence of ET life, the Government's use and possession of exotic materials, and what amazing scientific work is happening in the near future.

Dr. Nolan is the Rachford and Carlota A. Harris Professor in the Department of Pathology at Stanford University School of Medicine. He has published over 300 research articles and is the holder of 40 US patents, and has been honoured as one of the top 25 inventors at Stanford University.

His areas of research include hematopoiesis, cancer and leukemia, autoimmunity and inflammation, and computational approaches for network and systems immunology. Dr. Nolan's recent efforts are focused on a single cell analysis advance using a mass spectrometry-flow cytometry hybrid device, the so- call "CyTOF" and the "Multiparameter Ion Beam Imager" (MIBI) developed by Dr. Mike Angelo in his lab (Dr. Angelo is now an Assistant Professor in the Dept of Pathology at Stanford). The approaches use an advanced ion plasma source to determine the levels of tagged reagents bound to cells—enabling a vast increase in the number of parameters that can be measured per cell—either as flow cytometry devices (CyTOF) or imaging platforms for cancer (MIBI).
