

PROBECAST

WITH THE UFO BROS

ALIEN CON

ALIEN METAL ANALYSIS

STARRING

TRAVIS TAYLOR

1
00:00:06,670 --> 00:00:02,270

[Music]

2
00:00:12,890 --> 00:00:10,070

I'm Joe and we're the UFO Bros and we're

3
00:00:16,849 --> 00:00:12,900

here with Travis Taylor from Skinwalker

4
00:00:18,410 --> 00:00:16,859

Ranch also lead scientists on the uapf

5
00:00:20,269 --> 00:00:18,420

report is that correct that's that is

6
00:00:21,950 --> 00:00:20,279

true I was the chief scientist for the

7
00:00:24,230 --> 00:00:21,960

UAP task force that's absolutely

8
00:00:26,630 --> 00:00:24,240

incredible I wish you could share with

9
00:00:30,710 --> 00:00:26,640

us what the public isn't seeing is there

10
00:00:33,049 --> 00:00:30,720

anything worth worth uh well you know I

11
00:00:34,610 --> 00:00:33,059

can't I can't violate the

12
00:00:36,110 --> 00:00:34,620

non-disclosures in my security clearance

13
00:00:39,530 --> 00:00:36,120

and stuff that I have but what I can

14

00:00:42,290 --> 00:00:39,540

tell you is it was a purely 100 serious

15

00:00:44,270 --> 00:00:42,300

uh investigation and here's the thing a

16

00:00:45,410 --> 00:00:44,280

lot of people don't know we were never

17

00:00:47,270 --> 00:00:45,420

funded

18

00:00:49,610 --> 00:00:47,280

the while the National Defense

19

00:00:53,150 --> 00:00:49,620

authorization Act was was signed and

20

00:00:55,610 --> 00:00:53,160

created and it did in 2020 say there

21

00:00:58,250 --> 00:00:55,620

were there was 20 million dollars to be

22

00:01:00,590 --> 00:00:58,260

appropriated the Senate Appropriations

23

00:01:03,410 --> 00:01:00,600

Committee never appropriated the funds

24

00:01:05,990 --> 00:01:03,420

so the task force everybody was working

25

00:01:09,649 --> 00:01:06,000

as other duties as a signed volunteer

26
00:01:12,649 --> 00:01:09,659
for the task force work uh and the only

27
00:01:13,850 --> 00:01:12,659
few people uh like Jay Stratton and

28
00:01:16,310 --> 00:01:13,860
there were two other people that

29
00:01:18,530 --> 00:01:16,320
actually they were transferred that that

30
00:01:21,230 --> 00:01:18,540
was their full-time job yeah I was still

31
00:01:24,350 --> 00:01:21,240
uh supporting my day job with the Army

32
00:01:27,109 --> 00:01:24,360
and Jay asked my boss to if the Army

33
00:01:28,850 --> 00:01:27,119
would volunteer my time to be on the

34
00:01:30,710 --> 00:01:28,860
task force so it was never funded and

35
00:01:32,210 --> 00:01:30,720
the public doesn't know that they they

36
00:01:34,249 --> 00:01:32,220
think we had all these millions of

37
00:01:37,010 --> 00:01:34,259
dollars you've heard it here all this

38
00:01:39,590 --> 00:01:37,020

stuff and yeah so that's uh something

39

00:01:42,109 --> 00:01:39,600

that I think uh is a misinterpretation

40

00:01:44,510 --> 00:01:42,119

right you know

41

00:01:45,590 --> 00:01:44,520

um with skin rocker Ranch I want to get

42

00:01:47,510 --> 00:01:45,600

to that with you because I know we've

43

00:01:50,870 --> 00:01:47,520

only got a little bit of time

44

00:01:51,950 --> 00:01:50,880

um what do you say is the and is there's

45

00:01:54,050 --> 00:01:51,960

a new season that's going to be coming

46

00:01:56,350 --> 00:01:54,060

in April yes in April are we going to

47

00:01:59,389 --> 00:01:56,360

see anything in April that um

48

00:02:02,330 --> 00:01:59,399

is going to change the Skeptics Minds

49

00:02:03,830 --> 00:02:02,340

well you know Skeptics are going to be

50

00:02:05,749 --> 00:02:03,840

Skeptics you know my dad used to tell me

51
00:02:07,670 --> 00:02:05,759
about Benjamin Franklin used to say a

52
00:02:10,010 --> 00:02:07,680
man convinced against his will is that

53
00:02:11,390 --> 00:02:10,020
another opinion still so the Skeptics

54
00:02:13,550 --> 00:02:11,400
are always going to be Skeptics even if

55
00:02:16,430 --> 00:02:13,560
the spacecraft landed on in their yard

56
00:02:19,729 --> 00:02:16,440
and came to their house for dinner uh

57
00:02:22,670 --> 00:02:19,739
but yes in season four uh last summer

58
00:02:25,610 --> 00:02:22,680
between July and November

59
00:02:26,770 --> 00:02:25,620
we were do we did experiments that were

60
00:02:30,229 --> 00:02:26,780
so

61
00:02:31,430 --> 00:02:30,239
complex the last experiment we did I was

62
00:02:34,309 --> 00:02:31,440
telling somebody last night that they

63
00:02:36,170 --> 00:02:34,319

were I counted there were 1016 moving

64

00:02:37,970 --> 00:02:36,180

Parts in the experiment there were so

65

00:02:41,030 --> 00:02:37,980

many people there so many things it was

66

00:02:46,309 --> 00:02:41,040

it was amazingly huge experiment and we

67

00:02:48,650 --> 00:02:46,319

got data pictures uh video of things

68

00:02:50,150 --> 00:02:48,660

that it's gonna just and we're not

69

00:02:51,949 --> 00:02:50,160

making there's nothing made up it's all

70

00:02:54,050 --> 00:02:51,959

in the moment when it's happening it's a

71

00:02:56,809 --> 00:02:54,060

big season and uh it's 14 episodes

72

00:02:59,150 --> 00:02:56,819

actually wow and every single one of

73

00:03:00,949 --> 00:02:59,160

them there's something just bizarre and

74

00:03:02,210 --> 00:03:00,959

fantastic that happened great so it

75

00:03:04,850 --> 00:03:02,220

sounds like we're getting more evidence

76

00:03:06,110 --> 00:03:04,860

yes this next coming season because I

77

00:03:08,390 --> 00:03:06,120

know the Skeptics they have their

78

00:03:10,430 --> 00:03:08,400

negative thoughts and or negative a

79

00:03:12,470 --> 00:03:10,440

Viewpoint of the sort of science you're

80

00:03:14,570 --> 00:03:12,480

doing there and I was saying like

81

00:03:15,890 --> 00:03:14,580

people are spending money to actually do

82

00:03:19,990 --> 00:03:15,900

science you think you'd want to support

83

00:03:22,309 --> 00:03:20,000

this endeavor yeah and you know Brandon

84

00:03:24,530 --> 00:03:22,319

fuel Brandon fogle we hope to get to

85

00:03:25,550 --> 00:03:24,540

meet him someday we have some basic back

86

00:03:27,290 --> 00:03:25,560

and forth

87

00:03:28,910 --> 00:03:27,300

um well we'll see if I can set that up

88

00:03:30,290 --> 00:03:28,920

Brandon's a really good we want to come

89

00:03:32,509 --> 00:03:30,300

out to Skinwalker Ranch we'll have to

90

00:03:34,009 --> 00:03:32,519

see it yeah and we don't let just

91

00:03:36,350 --> 00:03:34,019

anybody there because number one there's

92

00:03:38,089 --> 00:03:36,360

an experiment going on and it's in and

93

00:03:40,490 --> 00:03:38,099

it can be dangerous so well maybe

94

00:03:43,070 --> 00:03:40,500

someday yeah maybe someday

95

00:03:45,289 --> 00:03:43,080

um well shall we move on to what we

96

00:03:49,190 --> 00:03:45,299

wanted to show you which is sure

97

00:03:50,149 --> 00:03:49,200

um in 2008 a UFO crashed in Needles

98

00:03:53,449 --> 00:03:50,159

California

99

00:03:55,610 --> 00:03:53,459

yeah it's the most recent crash that

100

00:03:58,850 --> 00:03:55,620

we've heard of and so we actually worked

101
00:04:01,610 --> 00:03:58,860
with a land surveyor that had detailed

102
00:04:03,589 --> 00:04:01,620
maps of the approximate area that this

103
00:04:04,850 --> 00:04:03,599
object crashed it came screaming out of

104
00:04:06,649 --> 00:04:04,860
the sky in the middle of the night blue

105
00:04:08,990 --> 00:04:06,659
light crashed on the banks of the

106
00:04:11,330 --> 00:04:09,000
Colorado River wow yeah the whole city

107
00:04:13,190 --> 00:04:11,340
or the whole town of needles saw it

108
00:04:15,530 --> 00:04:13,200
coming and crashing so we were able to

109
00:04:17,030 --> 00:04:15,540
kind of you know zero in on the

110
00:04:19,069 --> 00:04:17,040
approximation to like where it might

111
00:04:21,110 --> 00:04:19,079
have crashed and we found this

112
00:04:23,870 --> 00:04:21,120
Joe you want to tell them about it

113
00:04:26,390 --> 00:04:23,880

yeah it's a

114

00:04:28,850 --> 00:04:26,400

we went we went to the surveyed site

115

00:04:32,390 --> 00:04:28,860

where they said that the uh the crash

116

00:04:34,249 --> 00:04:32,400

had happened and we went out and went up

117

00:04:35,990 --> 00:04:34,259

took our metal detectors and we went and

118

00:04:38,030 --> 00:04:36,000

we checked around we checked on this one

119

00:04:39,469 --> 00:04:38,040

area and was this piece of weird metal

120

00:04:41,870 --> 00:04:39,479

that we pulled out of the ground no

121

00:04:43,610 --> 00:04:41,880

kidding let's see it yeah

122

00:04:45,530 --> 00:04:43,620

you guys checked it for radiation and

123

00:04:50,090 --> 00:04:45,540

anything everything yeah we used to

124

00:04:54,770 --> 00:04:52,550

not that

125

00:04:56,749 --> 00:04:54,780

we just would love to get your opinion

126

00:04:59,810 --> 00:04:56,759

on anything strange or weird about it

127

00:05:02,210 --> 00:04:59,820

because we did show this to astronaut

128

00:05:04,490 --> 00:05:02,220

Mark Kelly and he said that um the

129

00:05:05,990 --> 00:05:04,500

yellowing on this side sometimes could

130

00:05:08,150 --> 00:05:06,000

indicate that Metal's been to space

131

00:05:10,850 --> 00:05:08,160

that's what he had explained to us yeah

132

00:05:12,590 --> 00:05:10,860

I agree with this right here so did you

133

00:05:14,870 --> 00:05:12,600

guys hit it with a torch or anything no

134

00:05:17,990 --> 00:05:14,880

no so I think I need to figure out what

135

00:05:19,670 --> 00:05:18,000

it is but this this is was hot enough

136

00:05:21,710 --> 00:05:19,680

that it became multiple

137

00:05:25,070 --> 00:05:21,720

so that right there is clearly it got

138

00:05:27,650 --> 00:05:25,080

really really hot right here

139

00:05:31,390 --> 00:05:27,660

it you know it doesn't just from looking

140

00:05:35,150 --> 00:05:31,400

at it doesn't uh look like anything

141

00:05:37,010 --> 00:05:35,160

exotic uh but I can't say that for real

142

00:05:38,570 --> 00:05:37,020

without taking scientific measurements

143

00:05:41,330 --> 00:05:38,580

right right we need to hit it with a

144

00:05:45,310 --> 00:05:41,340

x-ray uh fluorescent spectrometer to see

145

00:05:49,969 --> 00:05:45,320

what it it actually is made of it it it

146

00:05:53,990 --> 00:05:49,979

feels like it's got a maybe 10 in it

147

00:05:55,670 --> 00:05:54,000

kind of like solder okay and uh in this

148

00:05:58,550 --> 00:05:55,680

oxidation though looks more like it's

149

00:06:01,129 --> 00:05:58,560

aluminum uh it's not copper I'm pretty

150

00:06:02,810 --> 00:06:01,139

sure it's not copper so and and where

151
00:06:04,510 --> 00:06:02,820
did you get this I mean who what's the

152
00:06:09,710 --> 00:06:04,520
the the

153
00:06:11,330 --> 00:06:09,720
it we pulled it out of the sand you

154
00:06:12,890 --> 00:06:11,340
literally dug it out yeah we've

155
00:06:15,590 --> 00:06:12,900
literally dug it out of the ground and

156
00:06:17,330 --> 00:06:15,600
this is where the alleged event happened

157
00:06:19,310 --> 00:06:17,340
right they didn't crashed we're just

158
00:06:21,770 --> 00:06:19,320
wondering if let's say even if it isn't

159
00:06:24,350 --> 00:06:21,780
uh it wasn't an extraterrestrial crap

160
00:06:27,170 --> 00:06:24,360
but maybe even just something from one

161
00:06:30,230 --> 00:06:27,180
of the um aerospace companies so if it

162
00:06:31,430 --> 00:06:30,240
were a rocket or a uh spacecraft or

163
00:06:34,309 --> 00:06:31,440

something like that they would have

164

00:06:36,110 --> 00:06:34,319

certainly come to uh collect it right I

165

00:06:38,809 --> 00:06:36,120

guess so yeah and they could have missed

166

00:06:40,909 --> 00:06:38,819

a part this does actually you know now

167

00:06:45,050 --> 00:06:40,919

that you mention it I've built Rockets

168

00:06:46,550 --> 00:06:45,060

out of thin material about like this and

169

00:06:49,490 --> 00:06:46,560

uh you make it in a structure called

170

00:06:51,409 --> 00:06:49,500

Monaco where the it's like a balloon so

171

00:06:53,090 --> 00:06:51,419

the fuel when you fuel it up it makes it

172

00:06:56,029 --> 00:06:53,100

rigid you know it can stand on a full

173

00:06:57,770 --> 00:06:56,039

Coke can oh yeah but if you if you empty

174

00:07:00,290 --> 00:06:57,780

it and you stand on it it'll it'll

175

00:07:03,650 --> 00:07:00,300

collapse yeah so it's possible this was

176

00:07:06,170 --> 00:07:03,660

part of a rocket tank a spacecraft

177

00:07:08,450 --> 00:07:06,180

structure or something but it clearly

178

00:07:10,370 --> 00:07:08,460

this is the most interesting part to me

179

00:07:12,230 --> 00:07:10,380

it was clearly hot enough to become

180

00:07:14,629 --> 00:07:12,240

molten because that's where it got hot

181

00:07:16,129 --> 00:07:14,639

and melted and ran yeah and we noticed

182

00:07:17,990 --> 00:07:16,139

there's no scorching and it's almost as

183

00:07:19,610 --> 00:07:18,000

if it blew off something is what we

184

00:07:21,469 --> 00:07:19,620

thought maybe and it looks torn right

185

00:07:23,749 --> 00:07:21,479

yeah and wow does this look like it's

186

00:07:27,409 --> 00:07:23,759

rolled over and crimped right why why

187

00:07:29,629 --> 00:07:27,419

that so I find it it's intriguing I

188

00:07:32,629 --> 00:07:29,639

would uh I would suggest you guys take

189

00:07:33,589 --> 00:07:32,639

it to a university that has a an xrf is

190

00:07:35,749 --> 00:07:33,599

what the machine is called a little

191

00:07:38,089 --> 00:07:35,759

handheld looks like laser gun and it'll

192

00:07:40,129 --> 00:07:38,099

tell you what elements are in it and

193

00:07:42,290 --> 00:07:40,139

that's an acceptance we have one out at

194

00:07:44,749 --> 00:07:42,300

the ranch uh if you guys ever come out

195

00:07:46,610 --> 00:07:44,759

the ranch bring it with you if you ever

196

00:07:48,290 --> 00:07:46,620

make it out there yeah yeah that's our

197

00:07:49,969 --> 00:07:48,300

next step we were figured well before we

198

00:07:52,309 --> 00:07:49,979

actually like invest any money let's

199

00:07:53,930 --> 00:07:52,319

have an expert take a look and see you

200

00:07:56,270 --> 00:07:53,940

know somebody who deals with flying

201

00:07:58,070 --> 00:07:56,280

Rockets yeah like the Rocket Man it

202

00:08:00,890 --> 00:07:58,080

could be part of a rocket or an aircraft

203

00:08:02,870 --> 00:08:00,900

or spacecraft but it got so hot it makes

204

00:08:05,870 --> 00:08:02,880

me think that maybe it was part of a

205

00:08:07,490 --> 00:08:05,880

rocket motor and it was near the engine

206

00:08:09,230 --> 00:08:07,500

or the engine malfunctioned or whatever

207

00:08:10,969 --> 00:08:09,240

and it got super hot right there and

208

00:08:13,550 --> 00:08:10,979

melted it and that's why it weakened and

209

00:08:16,189 --> 00:08:13,560

blew up and crashed probably right but

210

00:08:18,230 --> 00:08:16,199

it could be anything so I I would

211

00:08:19,550 --> 00:08:18,240

recommend uh and you can take it to

212

00:08:21,290 --> 00:08:19,560

University they'd probably do it for

213

00:08:22,369 --> 00:08:21,300

free uh you think so yeah I think I

214

00:08:23,390 --> 00:08:22,379

think if you took it to University they

215

00:08:26,390 --> 00:08:23,400

would look at it and tell you what it is

216

00:08:28,309 --> 00:08:26,400

okay okay that's what we'll do yeah well

217

00:08:30,290 --> 00:08:28,319

that's pretty much the interview all

218

00:08:31,490 --> 00:08:30,300

right guys well hey I appreciate it yeah

219

00:08:32,930 --> 00:08:31,500

thank you very much enjoyed it thanks

220

00:08:35,029 --> 00:08:32,940

for showing me that that was interesting

221

00:08:37,510 --> 00:08:35,039

that's that's probably the most exciting

222

00:08:39,889 --> 00:08:37,520

thing will happen today all right

223

00:08:43,250 --> 00:08:39,899

hopefully thank you nice to meet you

224

00:08:45,470 --> 00:08:43,260

brother yeah yeah and this is for you oh

225

00:08:47,750 --> 00:08:45,480

wow if you want to find us on Twitter

226

00:08:50,449 --> 00:08:47,760

we're there yep real UFO Bros thank you
