

1

00:00:00,000 --> 00:00:04,040

Due to the graphic nature of this program viewer discretion is advised

2

00:00:16,760 --> 00:00:25,980

No blood no tracks few clues a mysterious murder scene so brutal so bizarre are humans capable of such an act

3

00:00:26,980 --> 00:00:30,740

Or could this be the work of aliens on an intergalactic mission?

4

00:00:31,820 --> 00:00:33,820

Walk along the razor's edge

5

00:00:34,980 --> 00:00:38,700

between science fiction and science fact as we open

6

00:00:39,820 --> 00:00:42,140

UFO files cattle mutilations

7

00:00:45,420 --> 00:00:47,420

August 25th 2004

8

00:00:49,220 --> 00:00:51,220

Farnam, Nebraska

9

00:00:52,220 --> 00:00:57,140

This is cattle country where the farmers rise early to move their livestock to pasture

10

00:01:01,140 --> 00:01:06,300

Their quiet everyday routine is sometimes interrupted by the excitement of the birth of a new calf

11

00:01:10,980 --> 00:01:16,860

But in this small town tranquility is suddenly shaken by a gruesome discovery a

12

00:01:17,860 --> 00:01:24,600

Cow on Larry Juergens ranch has discovered dead mutilated in a remote canyon on his property

13

00:01:27,060 --> 00:01:30,180

Well, first thing I did I come around a corner up there

14

00:01:31,300 --> 00:01:34,500

I've seen this cow laying here, and I thought well

15

00:01:34,500 --> 00:01:36,500

It's just an old cow that dropped dead

16

00:01:36,660 --> 00:01:42,700

See what how old of a cow is and then the more investigation I seen I seen her bag was gone

17

00:01:42,900 --> 00:01:45,740

And I opened her mouth up and her tongue was gone

18

00:01:47,860 --> 00:01:52,500

But this is where the story goes from unusual to strange I

19

00:01:53,140 --> 00:01:57,380

Picked up her leg is the first thing I noticed in there her utter was cut off

20

00:01:59,380 --> 00:02:01,380

And there wasn't a round circle about

21

00:02:02,100 --> 00:02:06,380

About that size there just around circle where her utter was well the tongue was gone

22

00:02:06,380 --> 00:02:11,260

And I think that one eye eye bone the eye on the other side was gone

23

00:02:13,740 --> 00:02:16,180

Standing over the remains the ranchers are stunned

24

00:02:17,280 --> 00:02:22,760

By the fact there is no blood anywhere to be found on or around the scene

25

00:02:25,460 --> 00:02:29,860

Strangely the damage to the hide seems precise and deliberate

26

00:02:31,740 --> 00:02:34,500

This does not appear to be the work of predators

27

00:02:37,500 --> 00:02:39,740

The ranchers are perplexed

28

00:02:40,180 --> 00:02:46,620

That's part of the strange thing called an animal mutilation mystery and in addition

29

00:02:47,180 --> 00:02:52,300

The eye that was up there was a circle of flesh you can see that in the fresh photograph

30

00:02:54,940 --> 00:02:59,140

Linda howe may know more about cattle mutilations than any other researcher

31

00:03:01,300 --> 00:03:09,340

She has written books produced documentaries and investigated more than 1,000 cattle mutilation cases in the past 25 years

32

00:03:10,540 --> 00:03:13,420

Farnam Nebraska is her latest

33

00:03:18,900 --> 00:03:24,740

Cattle mutilation cases tend to show several commonalities and this cow is no different

34

00:03:26,500 --> 00:03:31,180

The utter had been removed in a circle the very clean bloodless circle

35

00:03:31,420 --> 00:03:33,900

So the Larry Georgian case

36

00:03:34,500 --> 00:03:42,260

Definitely fell in the category of classic mutilation and it had the addition of two holes that he found in the chest

37

00:03:44,340 --> 00:03:51,740

It is the appearance of bloodless surgically precise excisions on specific body parts that qualify some cases as so-called

38

00:03:52,300 --> 00:03:54,300

classic mutilations

39

00:03:56,220 --> 00:04:01,260

You may see part of the jaws being removed and higher moved here removed

40

00:04:01,940 --> 00:04:03,940

Sexual organs being cut out

41

00:04:04,900 --> 00:04:09,020

Lot of the cases of classic cases have what we call coring of the rectum

42

00:04:12,020 --> 00:04:18,180

As you know cattle have quite a lot of blood humans have approximately a gallon of blood in their bodies

43

00:04:18,460 --> 00:04:22,580

You can imagine how much blood a cow would have and there's none anywhere

44

00:04:24,700 --> 00:04:30,500

However those in the veterinary field are hesitant to describe these conditions as mysterious

45

00:04:32,260 --> 00:04:37,180

Just the fact that there is no blood around on the ground

46

00:04:37,940 --> 00:04:43,980

Does not mean at all that the animal did not have any blood that

47

00:04:44,740 --> 00:04:50,740

Just doesn't work. You can't tell by just looking at the ground around a dead animal

48

00:04:52,140 --> 00:04:59,500

Oddly other animals will stay away from the site of the killing and in many cases a thunder and lightning storm reported on

49

00:04:59,500 --> 00:05:01,500

About the date of the event

50

00:05:02,740 --> 00:05:10,740

While these deaths occur in remote canyons or hillsides away from prying eyes the events are not restricted to domestic pastures

51

00:05:11,220 --> 00:05:14,820

The animal mutilation phenomenon really is a global issue

52

00:05:15,100 --> 00:05:20,460

When you go out into the world you realize that just like in the United States

53

00:05:20,460 --> 00:05:25,580

There are hot spots and they have been the same repetitive hot spots for 50 60 years

54

00:05:25,700 --> 00:05:29,140

Maybe this has been going on for millions of years and we just caught on

55

00:05:30,380 --> 00:05:35,140

The long history of cattle mutilations has still another unusual element

56

00:05:36,900 --> 00:05:41,340

The presence of unidentified flying objects UFO

57

00:05:43,340 --> 00:05:50,040

Perhaps the earliest written document on the subject is a newspaper article and sworn affidavit that involved a cow a

58

00:05:50,580 --> 00:05:55,500

politician and a UFO in a story that predated the 20th century

59

00:05:56,460 --> 00:05:58,460

well back in

60

00:05:58,460 --> 00:06:03,340

2007 was probably the earliest recorded case of a cattle mutilation

61

00:06:03,580 --> 00:06:09,340

Alexander Hamilton a member of the House of Representatives in Kansas reported that a 300 foot long

62

00:06:10,020 --> 00:06:12,020

cylindrical object landed in his farm

63

00:06:13,460 --> 00:06:19,180

Picked up a one of his cattle and abducted it one thing that the politicians need is a good reputation

64

00:06:19,180 --> 00:06:25,660

I truly believe this is an actual case. I think this was probably the first verifiable story of

65

00:06:26,060 --> 00:06:27,220

a

66

00:06:27,220 --> 00:06:29,220

abduction

67

00:06:29,420 --> 00:06:31,420

Mutilation case

68

00:06:31,540 --> 00:06:37,300

Well, it turns out that mr. Hamilton was a member of a Liars Club and this he later cheerfully admitted

69

00:06:37,300 --> 00:06:39,620

This was just a tall tale that he made up

70

00:06:41,220 --> 00:06:47,040

Whether the story is true or not clearly the subject was publicly discussed before the 1900s

71

00:06:48,040 --> 00:06:56,920

Fifty years before Roswell and the sci-fi movie craze that filled our modern minds with images of UFOs

72

00:06:58,720 --> 00:07:03,240

Cattle horses sheep and other animals may have been mutilated as well

73

00:07:03,240 --> 00:07:08,080

But were overlooked because the phenomena was not defined or communicated publicly

74

00:07:11,000 --> 00:07:17,000

Well, there wasn't any mention I'm aware of in the in the really in the first half of the 20th century

75

00:07:17,040 --> 00:07:23,480

I think the first case that we really know about is the 1967 case in Alamosa, Colorado

76

00:07:24,160 --> 00:07:26,160

Snippy was the

77

00:07:26,280 --> 00:07:30,040

Press's term for the horse the horse's actual name was lady

78

00:07:30,880 --> 00:07:36,200

They in their effort to get the facts straight got the horse's name wrong

79

00:07:36,480 --> 00:07:41,120

but Snippy was found in the middle of the field by by her owners and

80

00:07:41,920 --> 00:07:46,000

Had all the classic signs the symptoms of a catamillation once again had

81

00:07:46,680 --> 00:07:49,680

Surgical precise type cuts that were found

82

00:07:50,160 --> 00:07:54,120

There's no tracks or footprints found anywhere the sheriff's office

83

00:07:54,560 --> 00:08:00,680

Investigated this and they could not come to conclusion one way or the other what it was and to this day

84

00:08:00,680 --> 00:08:02,680

It's an unsolved case

85

00:08:05,640 --> 00:08:09,600

Over the years one key element of evidence was eerily similar

86

00:08:09,960 --> 00:08:11,960

So

87

00:08:15,800 --> 00:08:20,600

With the mutilations being strange you have even higher strangeness of

88

00:08:21,240 --> 00:08:27,680

huge sounds and nothing there or complete silence with what looks like helicopters

89

00:08:30,600 --> 00:08:32,600

Well, I think people are

90

00:08:32,880 --> 00:08:36,720

Seeing something in the sky while this is happening

91

00:08:37,440 --> 00:08:39,440

beforehand people will hear

92

00:08:40,120 --> 00:08:47,680

Loud noises that they describe as being similar to a jet aircraft engine sometimes. It's so loud with their whole house vibrates

93

00:08:48,720 --> 00:08:52,480

Other people are seeing a bright orange lights in the sky

94

00:08:52,840 --> 00:08:58,640

So we really don't know what we're dealing with but this is a very common part of the cow mutilation case

95

00:08:58,640 --> 00:09:02,160

Is that you'll get reports of UFOs in the area?

96

00:09:04,280 --> 00:09:06,280

Such was the case in Farnham

97

00:09:07,320 --> 00:09:12,560

Residents started to share stories of unusual sights and sounds on the night the Juergens cow was killed

98

00:09:14,600 --> 00:09:19,760

The rancher turned to the internet looking for information he found Linda molten how

99

00:09:21,200 --> 00:09:27,680

If I'll often get a fax or an email or a phone call either from a rancher directly or for somebody who says we

100

00:09:27,760 --> 00:09:34,720

Read about your work and here's a dead animal and that's what happened with the Larry Juergens ranch in Farnham, Nebraska

101

00:09:37,320 --> 00:09:44,840

She knows what clues to look for and how to acquire the forensic evidence to understand cattle mutilations and

102

00:09:45,640 --> 00:09:51,140

This rancher is counting on her to figure out who or what did this to his cow

103

00:09:53,240 --> 00:09:58,600

When we return how attempts to unravel the murder mystery on the Juergens ranch

104

00:10:07,520 --> 00:10:09,520

You

105

00:10:13,680 --> 00:10:21,880

Cattle mutilation expert Linda how arrived at the ranch in Farnham, Nebraska to begin the investigation of the unusual death of Larry Juergens cow

106

00:10:23,880 --> 00:10:32,600

The location was remote and hard to access but once there how approached slowly making preliminary observations through the lens of her camera

107

00:10:36,720 --> 00:10:43,400

I am on a north south axis with this animal one of the interesting things is this is a

108

00:10:44,640 --> 00:10:46,640

360 degree

109

00:10:47,280 --> 00:10:50,560

Surrounded by hills whatever happened in here

110

00:10:52,000 --> 00:10:54,560

It could operate without anybody seeing

111

00:10:59,600 --> 00:11:03,160

She was looking for the classic indications of an authentic mutilation

112

00:11:04,160 --> 00:11:09,640

As she stepped around fairly fresh cow dung indicating the herd had been there a few days ago

113

00:11:09,960 --> 00:11:14,120

She noted the far distance being maintained by other cattle at the time

114

00:11:16,000 --> 00:11:22,160

Further documentation was made of the area and the orientation of the body the cow laid dead for nearly a week

115

00:11:22,520 --> 00:11:25,400

Then she went in for a closer look

116

00:11:25,400 --> 00:11:34,000

The ears are intact so this one is one of the few in which the ear is not taken

117

00:11:37,160 --> 00:11:41,000

You can tell even now with the collapse of the body in

118

00:11:41,640 --> 00:11:44,560

Death that this was a very large healthy

119

00:11:45,280 --> 00:11:48,280

Animal and she had given birth to a calf

120

00:11:48,960 --> 00:11:52,440

That had grown to 400 pounds so she was a very healthy

121

00:11:53,040 --> 00:11:55,040

animal

122

00:11:56,040 --> 00:12:01,040

Despite days of decay and maggot infestation there were no body parts or organs strewn about

123

00:12:01,520 --> 00:12:05,320

In a manner typically found when predators or scavengers strike

124

00:12:06,040 --> 00:12:08,640

The remote settings surgical precision

125

00:12:08,960 --> 00:12:17,280

Absence of evidence no claims of responsibility and the huge geographic area covered over decades have led some researchers to

126

00:12:17,760 --> 00:12:19,760

extraordinary conclusions

127

00:12:20,680 --> 00:12:29,360

Well some people do make the connection that this is a extraterrestrial event and really there's no evidence one way or the other

128

00:12:30,160 --> 00:12:33,480

There's but then there's no evidence that humans are involved in this either

129

00:12:35,800 --> 00:12:38,560

However, they do see UFOs in the area and

130

00:12:40,000 --> 00:12:44,840

Leads a lot of us to come to conclusions that this could possibly be aliens involved

131

00:12:50,760 --> 00:12:59,080

Does our government have these craft and if they have the craft do they have hard proof

132

00:12:59,600 --> 00:13:04,600

That that which is in the craft is involved with the animal mutilations

133

00:13:06,480 --> 00:13:11,640

If they exist UFOs could account for the rumblings heard and the light seen in the sky

134

00:13:13,800 --> 00:13:16,920

Or even the cattle mutilations by

135

00:13:17,800 --> 00:13:20,080

1989 I had become personally convinced

136

00:13:20,840 --> 00:13:27,800

That extraterrestrial biological entities or something from outer space being involved that this was in fact the story a

137

00:13:28,840 --> 00:13:34,480

Story that tells of spaceships that may have the technology to levitate cows up to the craft

138

00:13:35,080 --> 00:13:37,080

perform the surgical excisions

139

00:13:40,560 --> 00:13:46,880

And then let them plummet to the earth and when you find that the cow had dropped on its mother

140

00:13:46,920 --> 00:13:54,120

Its muscles it's consistent with people who said they've seen animals drop from glowing discs in the sky to the ground

141

00:13:55,840 --> 00:14:03,840

Would aliens possess the technology capable of performing bloodless surgery with precision a process that humans would have trouble carrying out

142

00:14:06,280 --> 00:14:09,880

Most of the cases that we find the cause of death is

143

00:14:10,560 --> 00:14:11,640

exanguination

144

00:14:11,640 --> 00:14:13,640

complete loss of blood

145

00:14:14,360 --> 00:14:17,480

We don't have the surgical equipment that takes to do that kind of thing

146

00:14:18,000 --> 00:14:21,560

The kind of vacuum that would require to do that's just not available

147

00:14:22,400 --> 00:14:24,600

Even at hospitals alone in the field

148

00:14:26,400 --> 00:14:33,480

But even if extraterrestrials had the ability to conduct this long-term killing spree is there a motivation?

149

00:14:39,000 --> 00:14:41,000

Some people say that the ETS

150

00:14:41,920 --> 00:14:43,920

motivation behind this is

151

00:14:44,760 --> 00:14:45,640

genetics

152

00:14:45,640 --> 00:14:51,840

That they're involved in our DNA and cattle DNA is very similar to humans

153

00:14:58,440 --> 00:15:05,480

This suggests that aliens are harvesting bovine biology as part of a mission that serves some greater galactic purpose

154

00:15:06,040 --> 00:15:10,760

One that is well beyond human understanding and is vital to alien survival

155

00:15:11,320 --> 00:15:16,800

They can use that genetic manipulation to fill in the it's not quite Jurassic Park

156

00:15:16,840 --> 00:15:21,600

Where you're skipping a few genetic codes to get to the dinosaurs from the amphibians as they did in that film

157

00:15:21,880 --> 00:15:25,520

But they do have unbelievable high technology when it comes to

158

00:15:26,240 --> 00:15:33,680

Genetic mentality so they can use cattle for their research and some times to fill in the gaps that they don't have enough human DNA for

159

00:15:34,360 --> 00:15:39,280

also that human blood is transferable with cattle blood in emergencies, so

160

00:15:40,280 --> 00:15:48,200

There's enough similarity between us and the bovine to make me believe that there's some sort of research being done on our DNA

161

00:15:48,280 --> 00:15:55,800

The idea of aliens collecting blood from cows in order to extract DNA for some unfathomable genetic research

162

00:15:55,960 --> 00:16:03,000

Easily attract skeptics that extraterrestrials are doing animal mutilations is the least likely explanation

163

00:16:04,000 --> 00:16:10,120

Within veterinary circles such theories may sound a bit too alien to be scientifically grounded

164

00:16:11,720 --> 00:16:18,760

I'm not aware of that at all that there's that much similarity between human and and bovine blood

165

00:16:19,320 --> 00:16:24,960

A human has 46 chromosomes a cow has 60 chromosomes

166

00:16:24,960 --> 00:16:32,440

So there's a there's a difference right there. Are they that closely related? I don't think so, but I don't know

167

00:16:34,000 --> 00:16:38,760

UFO believers aside there are many who don't look that far for answers

168

00:16:39,000 --> 00:16:46,680

They contend these mysterious mutilation occurrences are simply the work of pranksters or some dark cult ritual

169

00:16:48,080 --> 00:16:51,960

I have seen instances where animals were

170

00:16:53,640 --> 00:16:57,600

Mutilated or maimed but in all those instances it was

171

00:16:58,880 --> 00:17:00,880

corroborated with law enforcement effort

172

00:17:01,640 --> 00:17:08,880

People that it was actually the act of a mentally ill person, but otherwise I've never seen an unexplained

173

00:17:09,960 --> 00:17:11,960

mutilation

174

00:17:12,000 --> 00:17:18,440

We've been 30 years 40 years now of these abductions and nobody's ever seen a human

175

00:17:19,160 --> 00:17:26,320

Involved in this there's never been a farmer come across somebody in middle of some sort of a satanic ritual or something

176

00:17:27,320 --> 00:17:33,160

For the ranchers in the Western Prairie States cattle mutilations are a loss of inventory and a

loss of revenue

177

00:17:33,880 --> 00:17:36,240

And they want some answers

178

00:17:36,240 --> 00:17:57,520

By 1975 cattle mutilation mysteries were so prolific Colorado Senator Floyd Haskell asked the US government for help

179

00:18:01,160 --> 00:18:04,600

In a request dated August 29th 1975

180

00:18:06,240 --> 00:18:10,400

Haskell wrote I'm asking that the Federal Bureau of Investigation enter the case

181

00:18:11,080 --> 00:18:19,640

Although the Colorado Bureau of Investigation has been investigating the incidents the lack of central unified direction has frustrated the investigation

182

00:18:22,280 --> 00:18:30,080

The Colorado Bureau of Investigation got involved in this late 70s because there are so many

complaints from farmers that they were losing their cattle

183

00:18:30,320 --> 00:18:34,840

This is their livelihood and they're losing valuable cattle every day

184

00:18:36,480 --> 00:18:38,200

Haskell's letter warned

185

00:18:38,200 --> 00:18:42,880

It now appears that ranchers are arming themselves to protect their livestock and their families

186

00:18:43,480 --> 00:18:46,760

Clearly something must be done before somebody gets hurt

187

00:18:47,280 --> 00:18:49,480

They didn't really have an idea what was going on

188

00:18:56,400 --> 00:19:00,360

Before the whole animal mutilation craze happened

189

00:19:01,360 --> 00:19:07,600

Ranchers were just going out and finding dead animals and scratching their heads and saying I guess

190

00:19:08,440 --> 00:19:11,360

You know, I guess old Betsy just keeled over

191

00:19:12,000 --> 00:19:14,000

And the predators got her

192

00:19:16,880 --> 00:19:26,120

In his reply to Senator Haskell FBI Director Clarence Kelly wrote I regret to inform you that these actions do not constitute a violation of federal law

193

00:19:26,400 --> 00:19:29,400

Coming within the FBI's investigative jurisdiction

194

00:19:31,240 --> 00:19:36,920

March 14th 1979 New Mexico Senator Harrison Schmidt a former Apollo astronaut

195

00:19:37,360 --> 00:19:42,240

Call for a federal investigation citing the mutilation phenomena crossed state lines

196

00:19:42,240 --> 00:19:47,280

I think they really thought at one point that it could have alien involvement

197

00:19:48,240 --> 00:19:50,960

They really at the final conclusion of it all

198

00:19:51,480 --> 00:19:55,840

They just really came to the point where they thought that it needed more investigation

199

00:19:56,200 --> 00:20:03,040

This led to the investigation headed by Kenneth Rommel who retired from the FBI in May 1979 and

200

00:20:03,200 --> 00:20:07,160

shortly afterwards assumed the role of director of investigations for

201

00:20:07,480 --> 00:20:13,440

Operation animal mutilation for the state of New Mexico. He looked at many cases and

202

00:20:14,800 --> 00:20:19,400

He's fairly open-minded with his investigation from the report that I've read

203

00:20:22,040 --> 00:20:25,680

Rommel had hundreds of historical and current cases to investigate

204

00:20:26,240 --> 00:20:28,240

I

205

00:20:29,760 --> 00:20:36,320

Somehow I think his opinion would have changed throughout his tenure with the New Mexico government

206

00:20:38,400 --> 00:20:42,720

Cattle mutilation researcher Linda Howe had a firsthand experience with Rommel

207

00:20:45,000 --> 00:20:51,280

So we get into the office of Kenneth Rommel and I'm there to do an interview

208

00:20:52,080 --> 00:20:56,760

As a reporter with an investigator working for the state of New Mexico

209

00:20:57,760 --> 00:21:00,560

and we sit down and we're getting ready and

210

00:21:01,840 --> 00:21:06,960

First thing he says to me, you know, I'm going to prove that this is nothing but predator

211

00:21:11,440 --> 00:21:14,960

After one year of research Rommel submitted his final report

212

00:21:15,280 --> 00:21:19,560

It stated after laboriously weighing and analyzing the evidence

213

00:21:19,560 --> 00:21:25,560

I have come to the conclusion that the vast majority of mutilations are caused by predators and scavengers

214

00:21:27,640 --> 00:21:33,040

All of the news media we're doing stories about what is this mystery that is stalking the prairie

215

00:21:36,360 --> 00:21:40,760

The subject transition from a rural myth to front page headlines

216

00:21:41,480 --> 00:21:49,600

News reports elevated the phrase cattle mutilation into the lexicon for strange unexplained and paranormal research

217

00:21:51,960 --> 00:22:00,600

Cattle mutilations like most UFO related phenomena have lurked in the shadows of US government conspiracy since the days of the Roswell incident

218

00:22:02,360 --> 00:22:06,360

It's hard to imagine why the United States government

219

00:22:07,200 --> 00:22:09,000

for any reason

220

00:22:09,000 --> 00:22:16,640

Would go out and mutilate cattle. I cannot imagine why and if they did so why they would do so in a way that seems to mimic

221

00:22:16,920 --> 00:22:18,920

the work of predators

222

00:22:19,040 --> 00:22:22,280

The government theory doesn't make sense

223

00:22:23,640 --> 00:22:27,360

Because the head of the Colorado Bureau of Investigation had said to me

224

00:22:27,960 --> 00:22:29,960

if the CIA NSA

225

00:22:30,480 --> 00:22:36,640

DIA FBI if they were all involved in animal mutilations for some covert government project

226

00:22:36,880 --> 00:22:42,240

They just go out and buy what they need they just take them to one of the military bases

227

00:22:42,240 --> 00:22:45,680

They would do whatever they're gonna do and no one would know

228

00:22:48,000 --> 00:22:53,600

We can't prove that the government's involved in this we can't say that there's extra trust deals involved in this

229

00:22:53,680 --> 00:22:57,080

We can't say that they're even extra trust reels out there. There's no proof

230

00:22:58,720 --> 00:23:00,720

They haven't landed on the White House lawn yet

231

00:23:01,720 --> 00:23:03,720

But

232

00:23:04,520 --> 00:23:12,000

Linda how has seen too many dead animals to subscribe to the government's position that all unusual deaths are the act of predators

233

00:23:12,760 --> 00:23:17,360

Perhaps an answer to the question of alien involvement can be derived from the Farnham case

234

00:23:19,120 --> 00:23:23,360

When we return there is shocking news a second cow is down

235

00:23:25,840 --> 00:23:29,800

And Linda's investigation reveals what eyewitnesses saw

236

00:23:30,040 --> 00:23:33,480

Yeah, you didn't see an airplane so the only thing you were seeing was that white light

237

00:23:47,040 --> 00:23:49,040

August 25th 2004

238

00:23:51,400 --> 00:23:53,400

Juergens ranch Farnham, Nebraska

239

00:23:54,400 --> 00:24:01,240

Cattle mutilation research expert Linda molten how completes her photo documentation of the area near the dead cow

240

00:24:02,800 --> 00:24:06,440

Then she carefully collects apples of the surrounding vegetation

241

00:24:08,960 --> 00:24:14,200

And I want to make sure that I'm getting enough green chlorophyll because

242

00:24:14,920 --> 00:24:16,720

there's a

243

00:24:16,720 --> 00:24:20,100

very accurate test having to deal with the measurement of the

244

00:24:20,460 --> 00:24:26,460

Metabolism in anything that is growing with chlorophyll to see if there has been an impact on the mitochondria

245

00:24:28,740 --> 00:24:33,020

Elementary earth science describes chlorophyll as green growth matter in plants

246

00:24:33,260 --> 00:24:36,980

Whereas mitochondria contains the genetic material of vegetation

247

00:24:37,700 --> 00:24:41,020

How wants to learn if these microscopic components were altered?

248

00:24:43,420 --> 00:24:48,580

So she records the locations and labels each of the grass samples she takes from around the body

249

00:24:49,580 --> 00:24:52,660

I'm taking about 75 feet north of the body

250

00:24:54,540 --> 00:24:57,420

75 to 100 feet is about as far out as

251

00:24:59,500 --> 00:25:03,820

Or as close to the body as you want to get when you are doing controls

252

00:25:04,620 --> 00:25:07,420

Trying to find what is the normal soil in grass?

253

00:25:09,260 --> 00:25:14,220

And then I'm gonna walk in a ring around to the west

254

00:25:14,580 --> 00:25:16,580

And

255

00:25:18,940 --> 00:25:22,860

About the same distance from the body straight west

256

00:25:29,580 --> 00:25:34,980

She uses this same method of collecting and recording evidence as she gathers soil samples from the site

257

00:25:44,740 --> 00:25:52,060

Then armed with a strong magnet she delicately tries to attract any iron material from the ground surface near the cow

258

00:25:54,620 --> 00:25:56,620

And I'm gonna drag the magnet

259

00:25:57,420 --> 00:26:04,380

Around the animal and I'm gonna go out in a spiral and see if we get any particles from any of this ground

260

00:26:05,140 --> 00:26:10,580

Sometimes we find magnetite which is unusual at some of these scenes and in some of these cases

261

00:26:11,580 --> 00:26:16,980

Around mutilations and crop circles what we have found is

262

00:26:18,100 --> 00:26:20,100

750 times more magnetite

263

00:26:21,220 --> 00:26:24,380

That clings to a magnet than in normal soil

264

00:26:25,660 --> 00:26:32,660

And that's why we do this because if we get a big number then we'll know something strange happened

265

00:26:33,460 --> 00:26:35,460

And after I have done this

266

00:26:35,540 --> 00:26:38,700

I'll put this magnet back in the plastic bag

267

00:26:39,220 --> 00:26:46,780

So that anything that I have collected will stay in the bag and they will examine all of this under a microscope back at

268

00:26:48,540 --> 00:26:50,540

Biophysicist Levin Good's lab

269

00:26:54,340 --> 00:26:56,340

Now

270

00:26:56,700 --> 00:26:58,700

magnetite is

271

00:26:59,700 --> 00:27:07,980

The highly magnetic form of iron oxide magnetite is a very black solid crystalline form

272

00:27:12,180 --> 00:27:18,700

Magnetite is found all over the globe but the indications of higher concentration around sites associated with UFO activity

273

00:27:19,340 --> 00:27:21,900

May be an important scientific finding

274

00:27:22,500 --> 00:27:24,500

And

275

00:27:24,940 --> 00:27:32,380

The fact that we find these changes in grass and plants that are very similar in some cases

276

00:27:32,380 --> 00:27:37,540

We're wondering if some kind of similar technology is involved and if so who's and why

277

00:27:39,580 --> 00:27:44,300

How soon turns her focus on the two curious holes found in the cows upper body

278

00:27:44,620 --> 00:27:51,780

We're dealing now with something that is really closer to about an eighth

279

00:27:51,780 --> 00:27:56,340

You try to poke your fingers through our pencil through her hide any place else you won't be able to poke it

280

00:27:57,300 --> 00:28:04,300

Yeah, exactly now. We're helping find the second hole and and when they did the necropsy on that one in Colorado

281

00:28:04,820 --> 00:28:08,020

That was one of the cows when they found that the heart muscle was

282

00:28:08,380 --> 00:28:10,460

Totally removed from inside the pericardium

283

00:28:11,020 --> 00:28:17,500

The pericardium was intact and the only thing that they could figure out was somehow that quarter-inch hole

284

00:28:17,780 --> 00:28:21,660

Had something to do with what happened inside the cow

285

00:28:24,180 --> 00:28:27,420

Could this hole actually be a conduit that leads to the heart

286

00:28:28,300 --> 00:28:38,500

It's all muscle pretty muscle and connective tissue other elastic tissue and

287

00:28:40,900 --> 00:28:46,420

The pericardial sac I've not seen a situation where

288

00:28:47,620 --> 00:28:48,980

the

289

00:28:48,980 --> 00:28:50,980

heart actually just became

290

00:28:51,980 --> 00:28:57,420

Soft mush and the pericardial sac was not affected

291

00:29:04,260 --> 00:29:11,500

With the help of the rancher an important section of the cows hide with the small holes is cut and removed for further analysis

292

00:29:13,860 --> 00:29:15,380

Yeah, now

293

00:29:15,380 --> 00:29:18,460

Let's bring this out here on the ground and see if we've got

294

00:29:19,380 --> 00:29:23,900

Let's lay that down and see if we can find that second hole any easier

295

00:29:32,100 --> 00:29:38,860

After several hours of investigation the team receives word that a nearby rancher has just discovered another cow down

296

00:29:40,420 --> 00:29:43,740

They rushed to a remote canyon on his property seven miles away

297

00:29:45,100 --> 00:29:47,940

And you just saw this today this morning, yep

298

00:29:48,460 --> 00:29:52,100

Well, she could have died last night. She could she could have been here as far as I know

299

00:29:53,140 --> 00:29:57,140

48 hours is just my guess because I didn't see anything sitting here yesterday

300

00:30:00,860 --> 00:30:05,540

But I could have just so it could be 48 hours that have to be between last night and now

301

00:30:08,260 --> 00:30:10,620

How and the others find a similar scenario

302

00:30:11,420 --> 00:30:15,700

She photo documents the second cow and interviews the second rancher

303

00:30:16,700 --> 00:30:22,300

Considering this is another hidden canyon. She is intrigued by the similarities of the two cases

304

00:30:24,420 --> 00:30:31,180

The most classic part of this is the one missing teat and the mist missing tongue that we can't see it in the mouth at all

305

00:30:31,820 --> 00:30:35,020

The disappearance of the tongue is not easily explained

306

00:30:37,420 --> 00:30:42,700

Predators not gonna be able to latch on to a tongue and tear it off unless it's really

307

00:30:43,340 --> 00:30:45,340

Rotten decomposed

308

00:30:45,340 --> 00:30:50,460

what they typically do is bite away at it a little bit at a time and

309

00:30:53,380 --> 00:30:55,380

They just keep

310

00:30:55,980 --> 00:31:02,020

Pecking at it if it's a bird if it's a small rodent, they're just gonna keep chewing at it

311

00:31:04,300 --> 00:31:10,420

One explanation for the tongue being back in the mouth that it was out and as

312

00:31:11,340 --> 00:31:16,340

The other tissues start to contract it may pull it back into the mouth

313

00:31:19,340 --> 00:31:22,860

What so what what's your take on this deal is it?

314

00:31:23,580 --> 00:31:30,900

Just some wacko doing wild stuff or it have to be a wacko that had access to the northern hemisphere

315

00:31:31,020 --> 00:31:35,820

And the southern hemisphere in every country you can think of because it's world-wide

316

00:31:36,460 --> 00:31:38,740

It's been going on since at least the 50s

317

00:31:39,740 --> 00:31:46,740

And nobody has ever once been arrested and arraigned on an animal mutilation charge not anywhere in the world

318

00:31:49,220 --> 00:31:57,980

Her interviews with these ranchers reveal there have been reports of some local residents hearing strange noises and seeing lights in the sky on the nights in question

319

00:32:04,180 --> 00:32:06,180

I was in bed and

320

00:32:06,660 --> 00:32:08,060

I

321

00:32:08,060 --> 00:32:10,060

was asleep and

322

00:32:11,620 --> 00:32:18,100

Startled out of a deep sleep by by a loud noise it sounded like

323

00:32:19,380 --> 00:32:24,540

An airplane or a helicopter or something going over the house almost

324

00:32:25,060 --> 00:32:28,940

It it almost scared me enough to think that it was gonna run into the house

325

00:32:28,940 --> 00:32:36,100

And how long do you think you laid listening to it? It was probably 30 to 40 seconds

326

00:32:36,420 --> 00:32:41,540

It was almost like a helicopter, but I wouldn't say it was totally like one

327

00:32:42,340 --> 00:32:44,340

It was just real loud

328

00:32:45,180 --> 00:32:47,580

like a loud airplane or I

329

00:32:50,460 --> 00:32:55,740

Mean I'm right next to the road where there's trucks and vehicles going up and down the road

330

00:32:56,060 --> 00:32:58,060

And it didn't sound like any of those

331

00:32:58,820 --> 00:33:00,820

Strange though. It's strange

332

00:33:02,540 --> 00:33:04,540

Scary

333

00:33:07,060 --> 00:33:13,360

Stories of the unidentified flying object were recorded many miles away from the ranches where the mutilated cattle lie

334

00:33:16,180 --> 00:33:18,180

And it sounded like an aircraft

335

00:33:19,060 --> 00:33:23,340

Coming in low because it was a loud rumbly sound and lasted for a while

336

00:33:23,340 --> 00:33:29,180

And then he came in about that time and I asked him what that was and he went outside and Dan

337

00:33:29,180 --> 00:33:31,180

What did you see when you went out?

338

00:33:31,700 --> 00:33:34,980

Didn't say it, but I did see a white light

339

00:33:36,340 --> 00:33:38,020

Going that way

340

00:33:38,020 --> 00:33:40,020

and my low flying

341

00:33:40,540 --> 00:33:42,300

Had to be an airplane

342

00:33:42,300 --> 00:33:45,500

So the only thing she an airplane. Yeah, you didn't see an airplane

343

00:33:45,500 --> 00:33:48,140

So the only thing you were seeing was that white light. That's right

344

00:33:53,380 --> 00:34:00,740

With the field investigation complete the samples are immediately sent to laboratories in Michigan and Pennsylvania for forensic analysis

345

00:34:01,660 --> 00:34:04,500

When we return the test results

346

00:34:07,140 --> 00:34:13,580

Two weeks after the Nebraska cattle mutilation investigation

347

00:34:14,420 --> 00:34:18,860

Researcher Linda Howe met with dr. Wc Levengood at the Pinelandia

348

00:34:19,140 --> 00:34:24,060

Biophysics Lab in Michigan to review his findings of the soil samples she collected in Farnham

349

00:34:27,100 --> 00:34:31,180

He's looking for microscopic balls of black magnetite and iron oxide

350

00:34:32,460 --> 00:34:35,980

And the reddish fears of an iron ore called hematite

351

00:34:36,260 --> 00:34:40,340

Which are frequently found in high concentration at cattle mutilation sites

352

00:34:42,700 --> 00:34:45,300

This is magnetic drag material from the farm

353

00:34:46,300 --> 00:34:50,420

And the main thing here is you'll see that the

354

00:34:51,340 --> 00:34:57,180

tiny tiny magnetite and hematite particles are extremely small

355

00:34:57,980 --> 00:35:02,340

From five to 20 microns in diameter, which is very small

356

00:35:03,340 --> 00:35:09,620

Some cases we get up 30 40 microns, but this particular sample is just these tiny particles

357

00:35:11,100 --> 00:35:17,100

Strewing all over the soil so we do have magnetite from the mutilation site of Farnham

358

00:35:18,060 --> 00:35:20,060

Yes, yeah

359

00:35:22,700 --> 00:35:25,660

Magnetite can be found in the meteoric dust floating in space

360

00:35:26,540 --> 00:35:34,100

Dr. Levengood suggests that it can get mixed into plasma energy like the aurora borealis commonly known as the northern lights

361

00:35:38,500 --> 00:35:44,500

This occurs way up in the ionosphere about 60 to 100 miles above the earth

362

00:35:46,740 --> 00:35:53,760

These are self-organized energies that form what we call plasma vortices

363

00:35:55,660 --> 00:35:58,820

These atmospheric anomalies can swirl around so quickly

364

00:36:00,020 --> 00:36:04,540

That like a tornado they can spin to earth and pull the magnetite with it

365

00:36:04,660 --> 00:36:09,860

This spiral of energy may explain how the increased density of magnetite gets on the ground

366

00:36:12,060 --> 00:36:18,340

We're not talking about an energy that produces the bovine excision

367

00:36:18,380 --> 00:36:21,220

We're talking about a number of

368

00:36:21,740 --> 00:36:25,980

Interacting energies what we call in science boundary conditions

369

00:36:29,300 --> 00:36:35,260

Linda Howe's explanation is that extraterrestrial technology targets these plasma energies at cattle

370

00:36:37,380 --> 00:36:40,780

And what we're looking at in this microscope in a way is

371

00:36:41,300 --> 00:36:46,940

Kind of like the trail the connection between that energy in the upper atmosphere

372

00:36:47,100 --> 00:36:50,820

That has come down and done something to this grass and to this soil

373

00:36:51,660 --> 00:36:53,060

that

374

00:36:53,060 --> 00:36:59,600

The magnetite is like proof of some unusual interaction. It's it's a it's a strong indication. Yes

375

00:37:03,140 --> 00:37:10,460

Dr. Levengood also analyzed the grass samples and calculated subtle changes in the growth patterns caused by undetermined energies

376

00:37:13,700 --> 00:37:15,500

In Farnham

377

00:37:15,500 --> 00:37:21,220

What you have found the red and the blue is that some energy is destructive

378

00:37:22,340 --> 00:37:31,180

And some energy is actually accelerating growth. That's correct. Yeah, and and they need part of it is on this method

379

00:37:32,540 --> 00:37:37,660

What what we can do is we know that the way this energy

380

00:37:37,860 --> 00:37:43,460

Changes with time in the grass follows a very precise mathematical function

381

00:37:44,420 --> 00:37:49,420

So we can apply that function and see what this is actually metabolizing normally or not

382

00:37:54,540 --> 00:38:00,700

Dr. Levengood's analysis indicated Linda's grass samples were taken in a circular pattern around the cow

383

00:38:04,100 --> 00:38:06,300

This one is the one

384

00:38:07,140 --> 00:38:09,140

taken at the west end and

385

00:38:09,420 --> 00:38:14,100

It follows it but notice how the slope it's very almost flat

386

00:38:14,980 --> 00:38:21,740

But of the animal it still follows that it's still metabolizing grass and this is the one taken

387

00:38:23,900 --> 00:38:29,100

Showing the very high energy input and you can see the difference in the slope of those two

388

00:38:29,620 --> 00:38:35,940

This is the one that was north or north that was the one that had the accelerated growth and when

389

00:38:36,620 --> 00:38:43,220

Your data you found that there was a direction and a change in the energy before you've even seen these yeah

390

00:38:44,420 --> 00:38:51,500

Even though dr. Levensgood had not seen these images before his findings were consistent with the photographs from the Farnham site

391

00:38:55,980 --> 00:39:00,780

That's where the energy was destructive that's right and the graph is

392

00:39:01,260 --> 00:39:05,940

Related to energy out here. Yeah, I'd be over over in here somewhere

393

00:39:06,300 --> 00:39:10,100

Suggesting that something came in from the Northwest. Yeah, right

394

00:39:12,060 --> 00:39:16,460

Unbeknownst to dr. Levengood this is a significant conclusion because

395

00:39:17,700 --> 00:39:24,300

The witnesses to the strange lights and rumbling sounds also describe the direction of flight from the Northwest

396

00:39:31,780 --> 00:39:40,660

This height sample removed from Larry Juergens mutilated cow featured two small holes that how believes indicate surgical access to the cows heart area

397

00:39:43,540 --> 00:39:51,180

The specimen was examined by the chief of pathology of large animals at the University of Pennsylvania's animal diagnostic laboratory

398

00:39:52,660 --> 00:40:00,740

He wrote a report as honestly as he could and what is so interesting talking with him personally and reading the hard text of his report

399

00:40:01,060 --> 00:40:03,060

He cannot rule out

400

00:40:04,180 --> 00:40:07,580

Thermal influence at that hole cannot rule it out

401

00:40:11,180 --> 00:40:14,860

I've been a pathologist for 27 years. I have not

402

00:40:16,220 --> 00:40:21,140

Posted a cow where I felt there was an unusual

403

00:40:21,940 --> 00:40:27,860

circumstance of why the tongue or the utter or the rectum was removed

404

00:40:28,500 --> 00:40:31,220

That was not explainable by predators

405

00:40:35,700 --> 00:40:40,140

Regardless of the outcome of the laboratory testing this level of forensic investigation

406

00:40:41,060 --> 00:40:48,660

underscores the mysterious circumstances surrounding cattle mutilations and a question of UFO intervention

407

00:40:53,180 --> 00:40:57,620

Our government still stands by the Romer report from 1979

408

00:40:57,860 --> 00:41:02,420

that these abduction cases are nothing more than

409

00:41:02,980 --> 00:41:06,500

Humans being involved or predators being involved

410

00:41:07,100 --> 00:41:10,900

Aliens have nothing to do with it and the government has nothing to do with it

411

00:41:14,340 --> 00:41:16,540

There is really no evidence

412

00:41:17,740 --> 00:41:20,740

That extra terrestrials of any kind

413

00:41:21,700 --> 00:41:24,300

Are involved with animal mutilation?

414

00:41:25,020 --> 00:41:27,460

No evidence no good evidence

415

00:41:28,860 --> 00:41:30,860

In

416

00:41:32,820 --> 00:41:37,140

The final analysis no witness admits to seeing the cow being mutilated

417

00:41:37,620 --> 00:41:42,100

There has been no claim of responsibility from cults pranksters or

418

00:41:43,300 --> 00:41:45,300

Aliens

419

00:41:46,140 --> 00:41:51,100

And there is no hard proof of secret government operations or UFOs

420

00:41:57,860 --> 00:41:59,860

In

421

00:42:04,860 --> 00:42:07,340

Farnam the fact stand

422

00:42:08,900 --> 00:42:10,900

No blood

423

00:42:10,900 --> 00:42:12,900

No tracks and

424

00:42:13,140 --> 00:42:19,460

Two more cows have been added to the growing list of dead animals that some call cattle mutilations

425

00:42:27,860 --> 00:42:29,860

You

426

00:42:57,860 --> 00:43:00,820

You
