

1

00:00:00,000 --> 00:00:09,300

Of the many UFO related events that continue to plague planet Earth, none is more perplexing

2

00:00:09,300 --> 00:00:17,300

to experts than the escalating reports of USOs, unidentified submerged objects.

3

00:00:17,300 --> 00:00:24,560

USO sightings continue all around the world to this very day.

4

00:00:24,560 --> 00:00:28,520

They continue to come out of the water and they continue to be seen by witnesses around

5

00:00:28,520 --> 00:00:29,520

the world.

6

00:00:29,520 --> 00:00:31,600

This is our last USO report.

7

00:00:31,600 --> 00:00:36,760

Extraordinary new facts, stories and details have come to light about this most elusive

8

00:00:36,760 --> 00:00:37,760

class of UFO.

9

00:00:37,760 --> 00:00:41,280

It was the summer of 2000.

10

00:00:41,280 --> 00:00:46,080

My shit was visiting Guantanamo Bay, Cuba when I saw three strange big white lights

11

00:00:46,080 --> 00:00:49,720

in the water.

12

00:00:49,720 --> 00:00:54,680

Witness for the first time, new evidence of USO related anomalies on the surface of our

13

00:00:54,680 --> 00:00:56,480

oceans and waters.

14

00:00:57,000 --> 00:01:01,200

USOs can manifest crop circles on water.

15

00:01:01,200 --> 00:01:06,520

And find out why one of America's first nuclear armed aircraft carriers, the USS Franklin

16

00:01:06,520 --> 00:01:12,720

Delano Roosevelt, continued to be a magnet for reported UFO and USO events for over 30

17

00:01:12,720 --> 00:01:13,720

years.

18

00:01:13,720 --> 00:01:22,160

I was on the USS Franklin D. Roosevelt in 1958 and I seen a UFO and we were out at sea.

19

00:01:22,160 --> 00:01:29,040

Some brand new reports of deep sea UFOs, the stories that go back over 100 years.

20

00:01:29,040 --> 00:01:48,400

Many experts continue to wonder, are we the first inhabitants of our planet or are they?

21

00:01:48,400 --> 00:01:55,600

In early 2006, after viewing the history channel's broadcast of deep sea UFOs, 36 year old US

22

00:01:55,600 --> 00:02:00,480

Navy Chief Petty Officer Charles Howard was just one person to contact the network with

23

00:02:00,480 --> 00:02:07,680

stories and accounts of unusual, frightening and terrifying unidentified objects in our

24

00:02:07,680 --> 00:02:08,680

waters.

25

00:02:08,680 --> 00:02:13,680

Petty Officer Howard, a 17 year veteran of the Navy, tells his story of a possible USO

26

00:02:13,680 --> 00:02:17,040

encounter for the first time.

27

00:02:17,040 --> 00:02:20,680

The history channel was broadcasting the show about UFOs and USOs.

28

00:02:20,680 --> 00:02:22,360

I never heard of USOs.

29

00:02:22,360 --> 00:02:25,440

I thought that was very interesting because I hadn't experienced.

30

00:02:25,440 --> 00:02:30,320

I never shared it with anybody but I thought it was pretty interesting.

31

00:02:30,320 --> 00:02:35,880

In the summer of 2000, Howard shipped the USS Thorn was docked off Guantanamo Bay Cuba

32

00:02:35,880 --> 00:02:37,680

after routine maneuvers.

33

00:02:37,680 --> 00:02:42,440

It was kind of late, 10 o'clock, so it was coming back to the ship.

34

00:02:42,440 --> 00:02:45,720

I'm walking down the pier, I was pretty tired so I wanted to get back before everybody,

35

00:02:45,720 --> 00:02:47,840

you know, so I get back and get some sleep.

36

00:02:47,840 --> 00:02:49,520

And the pier was pretty long.

37

00:02:49,520 --> 00:02:51,920

I was about 30 paces ahead of everybody.

38

00:02:51,920 --> 00:02:55,320

I saw like this glowing white light out of the corner of my eye.

39

00:02:55,320 --> 00:03:00,040

I was walking, I kind of looked to the side and it was glowing under the water.

40

00:03:00,040 --> 00:03:04,400

The glowing USO initially appears about 30 yards from the pier.

41

00:03:04,400 --> 00:03:07,960

Howard estimates the object at almost 10 feet across.

42

00:03:07,960 --> 00:03:12,640

As it approaches, Howard comments he couldn't tell if the object was man-made.

43

00:03:12,640 --> 00:03:17,040

At first it kind of popped up out of nowhere, like a soft white glow.

44

00:03:17,040 --> 00:03:20,960

As I'm looking at it gets brighter and brighter and then that's when the other two lights popped

45

00:03:20,960 --> 00:03:23,040

up behind it.

46

00:03:23,040 --> 00:03:24,520

Almost formed like a triangle.

47

00:03:24,520 --> 00:03:28,040

It was a light here, light here, and a light here.

48

00:03:28,040 --> 00:03:32,600

At first I really wasn't afraid because it was just one soft light.

49

00:03:32,600 --> 00:03:34,760

It just was kind of weird to me.

50

00:03:34,760 --> 00:03:38,600

But then when the other two lights popped up behind it and they started moving, that's

51

00:03:38,600 --> 00:03:39,600

when I got kind of afraid.

52

00:03:39,600 --> 00:03:42,480

I was like, hey guys, come look at this, look at this.

53

00:03:42,480 --> 00:03:46,400

The other seamen respond to Howard's calls but arrived too late.

54

00:03:46,400 --> 00:03:51,040

The USO has disappeared under the water.

55

00:03:51,040 --> 00:03:57,840

He has never seen anything like it before or since and hopes to never see another.

56

00:03:57,840 --> 00:04:00,200

I've been out to see almost 17 years now.

57

00:04:00,200 --> 00:04:02,000

I've never seen anything like this.

58

00:04:02,000 --> 00:04:08,320

It was, it was weird.

59

00:04:08,320 --> 00:04:12,640

Other sightings continue to surface from the areas adjacent to Santa Catalina Channel

60

00:04:12,640 --> 00:04:15,920

off the coast of Los Angeles.

61

00:04:15,920 --> 00:04:20,880

Tomorrow off a dive ship, we're going to go out with divers to find trace evidence of

62

00:04:20,880 --> 00:04:27,240

that 1992 USO sighting right here in Santa Monica Bay.

63

00:04:27,240 --> 00:04:32,040

June 14th, 1992, 10.24 p.m.

64

00:04:32,040 --> 00:04:37,600

Multiple witnesses reported seeing over 200 bright disc-shaped objects silently exiting

65

00:04:37,600 --> 00:04:43,560

the water and hovering for a moment before bursting into space.

66

00:04:43,560 --> 00:04:48,440

Reports of this incident were phoned into local police departments as far away as Malibu.

67

00:04:48,440 --> 00:04:50,440

Also, Sheriff's Station.

68

00:04:50,440 --> 00:04:53,440

Does anyone report anything strange tonight?

69

00:04:53,440 --> 00:04:58,440

Uh, anything other than what's so perfect is strange.

70

00:04:58,440 --> 00:04:59,440

Light.

71

00:04:59,440 --> 00:05:00,440

Light.

72

00:05:00,440 --> 00:05:01,440

What exactly happened to you?

73

00:05:01,440 --> 00:05:04,440

I'm ashamed to tell you because I think you're going to think you're crazy.

74

00:05:04,440 --> 00:05:11,440

We saw what we thought was a bright light up in the sky.

75

00:05:11,440 --> 00:05:12,440

Okay?

76

00:05:12,440 --> 00:05:13,440

We could hear it wasn't a helicopter.

77

00:05:13,440 --> 00:05:22,000

I'm telling you, I have never been more frightened in my life.

78

00:05:22,000 --> 00:05:27,960

On March 9th, 2006, Patrick Uskert, Kevin Brunn and Julius Willis invited the History

79

00:05:27,960 --> 00:05:34,640

Channel along on a research expedition to seek evidence of USOs in the Santa Catalina

80

00:05:34,640 --> 00:05:36,280

Channel.

81

00:05:36,280 --> 00:05:42,040

Where coincidentally, at 9.37 p.m. the night before, witnesses reported seeing several

82

00:05:42,040 --> 00:05:48,800

disc-shaped silver USOs diving into and out of the channel.

83

00:05:48,800 --> 00:05:53,880

Uskert Brunn and Willis were joined on this 11-hour quest by UFO researcher and veteran

84

00:05:53,880 --> 00:06:01,000

sailor, Captain William Burns, and by Preston Dennett, who first reported on this large-scale

85

00:06:01,000 --> 00:06:06,600

1992 USO event in these waters off of Los Angeles in our previous broadcast.

86

00:06:06,600 --> 00:06:11,640

So we're all set today, right?

87

00:06:11,640 --> 00:06:13,600

You got the Geiger counter?

88

00:06:13,600 --> 00:06:14,600

I got all the scientific equipment.

89

00:06:14,600 --> 00:06:16,720

You have all the vials and everything we need.

90

00:06:16,720 --> 00:06:17,720

Yep.

91

00:06:17,720 --> 00:06:18,720

We've got the tanks.

92

00:06:18,720 --> 00:06:19,720

I got the tanks.

93

00:06:19,720 --> 00:06:20,720

You got the underwater camera.

94

00:06:20,720 --> 00:06:21,720

Yeah.

95

00:06:21,720 --> 00:06:22,720

Infrared.

96

00:06:22,720 --> 00:06:23,720

Infrared we have.

97

00:06:24,560 --> 00:06:25,560

We're all set.

98

00:06:25,560 --> 00:06:26,560

Okay, let's go.

99

00:06:26,560 --> 00:06:30,200

They're plan is to dive in two areas of the channel.

100

00:06:30,200 --> 00:06:35,800

Divers Uskert and Brunn will collect samples and Brunn, a PhD and research scientist, will

101

00:06:35,800 --> 00:06:41,360

conduct preliminary testing on the ship and further testing later in his lab.

102

00:06:41,360 --> 00:06:48,240

Our mission would go down, collect samples and basically look for any evidence of underwater

103

00:06:48,240 --> 00:06:51,040

UFOs.

104

00:06:51,040 --> 00:06:56,400

In this largely unexplored area called the Redondo Trench, detection of USOs has been

105

00:06:56,400 --> 00:06:59,080

happened by its incredible depth.

106

00:06:59,080 --> 00:07:03,280

In some places reaching almost one mile.

107

00:07:03,280 --> 00:07:07,440

Sonar on most ships is incapable of tracking anything this deep.

108

00:07:07,440 --> 00:07:09,960

Good morning folks, welcome aboard Pacific Star.

109

00:07:09,960 --> 00:07:14,160

I guess we're going to go out to the trench this morning.

110

00:07:14,160 --> 00:07:19,120

Trench drops off fast, probably a 60 degree angle.

111

00:07:19,120 --> 00:07:23,920

It's down to, well my meter goes to 1400 feet and I can't find the bottom.

112

00:07:23,920 --> 00:07:30,120

We don't want to go too deep because we don't know what's there.

113

00:07:30,120 --> 00:07:35,360

Jump, jump.

114

00:07:35,360 --> 00:07:39,720

The ship leaves Redondo Beach, California at 837 AM.

115

00:07:39,720 --> 00:07:44,200

It heads due west into the murky waters of the Pacific.

116

00:07:44,200 --> 00:07:48,960

The team faces a strong breeze and heavier than normal chop.

117

00:07:48,960 --> 00:07:53,160

The only thing that could possibly be worse is if that wind were to pick up.

118

00:07:53,160 --> 00:07:59,200

As we get these brown swells rolling through like this, they will stir up the bottom 70,

119

00:07:59,200 --> 00:08:00,200

80 foot down.

120

00:08:00,200 --> 00:08:04,600

We have to bump into them down there in order to find anything.

121

00:08:04,600 --> 00:08:09,600

At 922 AM, the team catches their first glimpse of something unusual.

122

00:08:09,600 --> 00:08:14,280

Look at that, holy cow.

123

00:08:14,280 --> 00:08:17,280

A strange anomaly is witnessed on the surface of the water.

124

00:08:17,720 --> 00:08:20,720

Guys, I'm serious, look at that.

125

00:08:20,720 --> 00:08:26,560

The round impression, approximately 15 feet across, vibrates constantly as it is seen

126

00:08:26,560 --> 00:08:31,040

to disappear as quickly as it came.

127

00:08:31,040 --> 00:08:38,720

It sounds crazy but there have been a lot of UFO crashes, or your 50 at least.

128

00:08:38,720 --> 00:08:42,520

So it's entirely possible that there is some type of material down there.

129

00:08:42,520 --> 00:08:47,160

There's plenty of places for USOs to hide.

130

00:08:48,040 --> 00:08:54,040

The captain orders the anchor down about two nautical miles downrange.

131

00:08:54,040 --> 00:08:56,480

We're looking for a couple of things.

132

00:08:56,480 --> 00:09:01,400

Are there any patterns on the bottom of the water, any trace evidence that remains from

133

00:09:01,400 --> 00:09:02,400

the soil?

134

00:09:02,400 --> 00:09:04,360

Is there any radioactivity down there?

135

00:09:04,360 --> 00:09:08,840

Are there any strange elements?

136

00:09:08,840 --> 00:09:11,440

People in this area saw this craft last night.

137

00:09:11,440 --> 00:09:17,040

So if that craft was here last night, if that craft left the traces, our guides on the bottom

138

00:09:17,080 --> 00:09:20,760

are collecting those traces now and bringing them up to the surface and we're going to

139

00:09:20,760 --> 00:09:22,760

see these traces be tested.

140

00:09:30,760 --> 00:09:32,760

What was the visibility like down there?

141

00:09:32,760 --> 00:09:34,760

Very well, like 5 to 10 feet.

142

00:09:34,760 --> 00:09:38,760

Too rough to see anything, couldn't see much when we were down.

143

00:09:38,760 --> 00:09:42,760

Hopefully, the past gets some footage, maybe some samples.

144

00:09:43,480 --> 00:09:49,480

While Uskut reported that he sensed something peculiar in the water, the conditions prevented

145

00:09:49,480 --> 00:09:51,080

him from seeing it.

146

00:09:51,080 --> 00:09:53,080

He did however collect samples for testing.

147

00:09:53,080 --> 00:10:00,080

Couldn't see a thing, just my flashlight beam going into blackness.

148

00:10:00,080 --> 00:10:07,080

If there is someone who wanted a place to hide, that'd be a pretty nice place to hide.

149

00:10:07,080 --> 00:10:09,360

Nice and dark, nice and deep.

150

00:10:09,360 --> 00:10:11,720

I didn't feel like I belonged there.

151

00:10:11,720 --> 00:10:14,400

I didn't feel like I was supposed to be there.

152

00:10:14,400 --> 00:10:20,800

Due to poor visibility at this location, the team moves 4 miles downrange, even further

153

00:10:20,800 --> 00:10:22,800

into the channel.

154

00:10:25,800 --> 00:10:31,800

We're going to head out to another spot where, again, if you were trying to camouflage yourself,

155

00:10:31,800 --> 00:10:35,800

you're probably sitting right here in the best place to be camouflaged.

156

00:10:36,800 --> 00:10:42,800

With underwater visibility of less than 15 feet at the first location, the divers prep

157

00:10:43,200 --> 00:10:47,200

a more sensitive camera to record evidence in this deeper area.

158

00:10:47,200 --> 00:10:50,200

I've already got it in the housing.

159

00:10:50,200 --> 00:10:54,200

I'll set it up so it's especially sensitive to low light.

160

00:10:54,200 --> 00:10:57,200

If there's anything down there, you're going to see it.

161

00:11:05,800 --> 00:11:12,800

What you're seeing is they're taking samples from the bottom of the ocean bed and they're

162

00:11:20,400 --> 00:11:25,800

going to be testing these for radioactive traces and chemical traces.

163

00:11:25,800 --> 00:11:28,640

USOs leave traces.

164

00:11:28,640 --> 00:11:31,800

Maybe they're magnetic, maybe they're highly electrical charge.

165

00:11:31,800 --> 00:11:36,800

They're looking to test for electrical charges, for magnetism and for radioactivity.

166

00:11:36,800 --> 00:11:43,640

The clearer conditions at this location help the divers collect samples, and this time,

167

00:11:43,640 --> 00:11:45,640

they find something unusual.

168

00:11:45,640 --> 00:11:52,640

I'm pretty satisfied with what we collected.

169

00:11:52,800 --> 00:11:55,800

We're going to check it with the Geiger counter, see if they're reading hot.

170

00:11:55,800 --> 00:11:58,800

Great, just open a little piece.

171

00:12:01,800 --> 00:12:04,800

Negative, this one.

172

00:12:04,800 --> 00:12:07,800

Got a small sample here.

173

00:12:07,800 --> 00:12:09,800

Wow.

174

00:12:12,800 --> 00:12:16,800

We got something, we got something.

175

00:12:16,800 --> 00:12:21,800

Due to the elevated Geiger counter reading, the team decides further testing is needed.

176

00:12:21,800 --> 00:12:23,800

All right, the rest of you do back to the lab.

177

00:12:23,800 --> 00:12:25,800

Awesome.

178

00:12:26,800 --> 00:12:33,800

So it's really no mystery why a USO would choose this particular area to hide in.

179

00:12:33,800 --> 00:12:35,800

They just can't be seen.

180

00:12:35,800 --> 00:12:40,800

We can't really know what the results will be until we analyze everything and put it all together,

181

00:12:40,800 --> 00:12:42,800

but it's all part of the process.

182

00:12:42,800 --> 00:12:46,800

What we try to do is test our hypotheses by setting up very controlled experiments.

183

00:12:46,800 --> 00:12:52,800

We're trying to eliminate variables, and out here, it's very difficult to eliminate all these variables that we deal with.

184

00:12:52,800 --> 00:12:55,800

So we're kind of on the level of just observing.

185

00:12:55,800 --> 00:13:00,800

And if anything comes up strange or worthy of continuing investigation,

186

00:13:00,800 --> 00:13:03,800

then we'll certainly be back out here.

187

00:13:03,800 --> 00:13:05,800

Kevin will probably agree with me here, right?

188

00:13:05,800 --> 00:13:08,800

There's a good probability that they're down there.

189

00:13:08,800 --> 00:13:10,800

If you're going to find anything, you've got to look.

190

00:13:10,800 --> 00:13:13,800

Further testing on the USO sample proved inconclusive.

191

00:13:13,800 --> 00:13:17,800

However, due to the initial positive result on sample number two,

192

00:13:17,800 --> 00:13:22,800

a more comprehensive USO dive is planned for the fall of 2006.

193

00:13:22,800 --> 00:13:24,800

We've got to go back.

194

00:13:29,800 --> 00:13:35,800

Coming up, we'll open the secret files of one of America's first nuclear-armed aircraft carriers,

195

00:13:35,800 --> 00:13:43,800

the USS Franklin D. Roosevelt, to uncover why she continues to be at the heart of the worldwide USO

controversy.

196

00:13:47,800 --> 00:13:52,800

Of the US Navy's many great technical achievements after World War II,

197

00:13:52,800 --> 00:14:00,800

few surpassed the dramatic might, power and capabilities of its midway class carrier, the USS Franklin D. Roosevelt.

198

00:14:00,800 --> 00:14:06,800

Commissioned on October 27, 1945, from the New York Naval shipyards,

199

00:14:06,800 --> 00:14:16,800

the 1,000-foot-long, 64,000-ton FDR was one of the first ships in the Navy's fleet to carry nuclear weapons full-time.

200

00:14:18,800 --> 00:14:22,800

The Franklin D. Roosevelt was very capable ship in every stretch of imagination.

201

00:14:22,800 --> 00:14:28,800

She was an experimental, floating, active laboratory for the entire Navy Department.

202

00:14:28,800 --> 00:14:31,800

According to many of the men who served aboard the FDR,

203

00:14:31,800 --> 00:14:40,800

the ship's sophisticated capabilities caused the carrier to be at the center of one of the great USO mysteries of the 20th century.

204

00:14:40,800 --> 00:14:46,800

I have no doubt about the existence of UFOs and their interaction with the Franklin D. Roosevelt,

205

00:14:46,800 --> 00:14:50,800

and there have been many other sailors out there who have the same experiences I have had.

206

00:14:50,800 --> 00:14:58,800

There's probably a good connection with the USS FDR and the nuclear weapons and the UFOs, saying, the Magnet for UFOs.

207

00:14:58,800 --> 00:15:07,800

Chet Grzynski served aboard the FDR from July 1958 until December 1960 as a fireman and metalworks engineer.

208

00:15:08,800 --> 00:15:19,800

He says his harrowing close-range encounter with a large USO-like object in September 1958 off Guantanamo Bay, Cuba has distressed him ever since.

209

00:15:19,800 --> 00:15:23,800

He tells his story on camera for the first time.

210

00:15:23,800 --> 00:15:30,800

We're down below Dex's evening between 8 and 9 o'clock. It was dark outside.

211

00:15:30,800 --> 00:15:33,800

A bunch of men came running up the ladder from the engine.

212

00:15:33,800 --> 00:15:37,800

My buddy then said, hey, Red, why don't you go up there and see what's going on?

213

00:15:37,800 --> 00:15:41,800

So I followed those men all the way up the ladder up to the hangar deck, all the way up to the flight deck.

214

00:15:41,800 --> 00:15:47,800

Grzynski witnessed a cigar-shaped UFO traveling at an incredible speed toward the FDR.

215

00:15:47,800 --> 00:15:54,800

He also comments that the object made no sound and maneuvered unlike any man-made aircraft.

216

00:15:54,800 --> 00:15:58,800

We had no air operations going on the flight deck. It was quiet up there.

217

00:15:58,800 --> 00:16:02,800

This thing just came right out and I could see what the light was when it came out of our ship.

218

00:16:02,800 --> 00:16:12,800

It was a roll of windows with figures inside and they got close enough I could feel the heat on my face and those figures looking at us through those windows.

219

00:16:12,800 --> 00:16:17,800

The impression I got that those figures were looking at us were not human beings.

220

00:16:17,800 --> 00:16:22,800

Then this thing turned like a bright red-orange color and I could see the shape of it.

221

00:16:22,800 --> 00:16:26,800

It was a cigar shape when it turned colors and then it just took right off like that.

222

00:16:28,800 --> 00:16:40,800

Grzynski further reports that this bright USO-like craft rose from the water and remained relatively silent over this 45-second event before flying away.

223

00:16:40,800 --> 00:16:45,800

Approximately 25 of his shipmates reportedly witnessed this event as well.

224

00:16:45,800 --> 00:16:49,800

Most he says were quickly transferred off the FDR.

225

00:16:49,800 --> 00:16:55,800

Even more curious, he alleges that within hours the ship's logbook was altered.

226

00:16:55,800 --> 00:16:59,800

When I got the deck log, a lot of things were blackened out on the logbooks.

227

00:16:59,800 --> 00:17:01,800

There was nothing in there.

228

00:17:01,800 --> 00:17:07,800

The witness was traveling off the ship and they probably imagined they must have had to sign some papers to say something about it.

229

00:17:07,800 --> 00:17:11,800

But I never had to sign anything like that, maybe because I didn't see how much about it.

230

00:17:11,800 --> 00:17:17,800

After almost 50 years, his search for answers about what really happened that night continues.

231

00:17:17,800 --> 00:17:22,800

I'm still trying to find these men on the flight deck. I didn't have to sign the papers. I wasn't transferred off the ship.

232

00:17:22,800 --> 00:17:29,800

I got a lot of wives. What happened? Why? That's what it is. That's why I've been spending all

these years research on it.

233

00:17:29,800 --> 00:17:35,800

But Grzynski is not alone in his belief that he witnessed a UFO while serving aboard the FDR.

234

00:17:35,800 --> 00:17:45,800

A second FDR veteran, Harry Jordan, served aboard the FDR from 1962 until 1965 as seaman first class.

235

00:17:45,800 --> 00:17:52,800

His raiding as a radar operator put him in charge of one of the world's most advanced and sensitive radar systems.

236

00:17:52,800 --> 00:17:57,800

She also had the capability of jamming rockets, continental ballistic missiles,

237

00:17:57,800 --> 00:18:03,800

and even break through some of the countermeasures being put upon us by Soviet block countries.

238

00:18:03,800 --> 00:18:13,800

While on duty in 1963, Jordan says he became part of another significant USO of anti-border ship

that has remained secret until now.

239

00:18:13,800 --> 00:18:23,800

The Roosevelt definitely attracted UFOs because of all of the technical equipment and all of the armaments that she had and also nuclear weapons.

240

00:18:23,800 --> 00:18:30,800

Jordan agreed to tell his mysterious and alarming story of possible USO contact for the first time.

241

00:18:30,800 --> 00:18:36,800

I do remember the incident and the details of it because it just stays with you when you've gone through this.

242

00:18:36,800 --> 00:18:42,800

October 2, 1963, off the coast of Sardinia, approximately 2 a.m.

243

00:18:42,800 --> 00:18:49,800

Jordan stands watch over his radar monitor, all as normal, on this unusually warm fall night.

244

00:18:49,800 --> 00:18:55,800

Suddenly and without warning, he says, a contact abruptly appears on his screen,

245

00:18:55,800 --> 00:19:04,800

an object 600 miles downrange at an altitude almost impossible for conventional aircraft to reach at the time, 80,000 feet.

246

00:19:04,800 --> 00:19:09,800

The first blip came on at the beginning of about two and a half hours into the watch.

247

00:19:09,800 --> 00:19:17,800

It was 600 miles from the ship at 80,000 feet, then it came into 300 miles at about 35,000 feet,

248

00:19:17,800 --> 00:19:23,800

and then it came into about 10 miles at 10 to 15,000 feet from the ship off our port site.

249

00:19:23,800 --> 00:19:28,800

I reported it to the watch commander at the time, and he came over, went through the same process,

250

00:19:28,800 --> 00:19:32,800

and confirmed it and reported it to the officer of the deck on the bridge.

251

00:19:32,800 --> 00:19:39,800

Then the officer of the deck on the bridge woke up the captain after this contact started to move.

252

00:19:39,800 --> 00:19:47,800

An object on Jordan's screen begins moving at a speed and on a course that he believes would have crushed any man-made aircraft.

253

00:19:47,800 --> 00:19:53,800

This thing was covering 10 miles in just a few seconds, and it was traveling about 4,000 miles an hour.

254

00:19:53,800 --> 00:20:01,800

It was making right-angled turns, and it was almost like a Z-pattern if you took about four Zs and lined it across your scope.

255

00:20:01,800 --> 00:20:07,800

So I could tell that she was going pretty fast, and then so when she stops, they didn't have any heat signature.

256

00:20:07,800 --> 00:20:10,800

Okay, this was highly unusual.

257

00:20:10,800 --> 00:20:19,800

After Jordan makes his report, he says the FDR's captain orders the launch of a pair of Phantom II jets to analyze the situation.

258

00:20:19,800 --> 00:20:23,800

They went to afterburners and then launched one right after the other.

259

00:20:23,800 --> 00:20:27,800

They left the Rosy and headed up on a course of about 012.

260

00:20:27,800 --> 00:20:37,800

So then I thought immediately that there might be something new going on here because that wasn't following protocol as far as normal ship operations that I was used to.

261

00:20:37,800 --> 00:20:43,800

The Phantom jets, now about 20 miles down range, still seek contact with the object.

262

00:20:43,800 --> 00:20:53,800

Jordan reports that the blip on his radar screen continues to dive close to the USS FDR before it disappears in a literal flash.

263

00:20:53,800 --> 00:21:10,800

It's being recorded on the view board up on the right-hand side in CIC, and then the contact winked out about 20, 30 seconds after, and I could hear one of the pilots say, what, that's all I heard.

264

00:21:10,800 --> 00:21:18,800

Moments later he says as quickly as it disappeared, the target returns, but now it's bigger and closer.

265

00:21:18,800 --> 00:21:26,800

The Phantom II has landed and then it winked back on again off the port side of the ship and someone yelled out in CIC, you know, what the hell is that?

266

00:21:26,800 --> 00:21:31,800

And I bet you had 15 people out there with binoculars looking.

267

00:21:31,800 --> 00:21:43,800

232 AM. In full view of the FDR's crew, the USO reportedly hovers for a moment, several hundred feet from the ship before disappearing.

268

00:21:44,800 --> 00:21:49,800

I saw the Z pattern and it stopped, it winked out, and then it was gone.

269

00:21:49,800 --> 00:21:58,800

I know what the fingerprints are of the electronics on Soviet aircraft, Korean aircraft, Chinese, MiGs, you name it.

270

00:21:58,800 --> 00:22:08,800

If it had been a meteor, it would have burned up in the atmosphere, and I have seen meteors streak across the scope, but it only happens in about two or three seconds. I mean, it's gone.

271

00:22:09,800 --> 00:22:14,800

236 AM. Jordan records the event in his logbook as a UFO incident.

272

00:22:14,800 --> 00:22:19,800

Seconds later he says his commanding officer bursts in.

273

00:22:19,800 --> 00:22:26,800

Jordan, what did you put in your log? And I had UFO in there and I had the contact number at the time.

274

00:22:26,800 --> 00:22:31,800

I held it up in front of the commander and he says, you can take that out.

275

00:22:31,800 --> 00:22:42,800

My commander acknowledged to me in not so many terms that, yeah, Jordan, that's what it was, but no Jordan, nobody else is to know. Period.

276

00:22:42,800 --> 00:22:48,800

I had too much respect for him and the Navy to say anything about it for over 20 years.

277

00:22:48,800 --> 00:22:55,800

This was an historical moment for the United States Navy and it was left out of the logs.

278

00:22:56,800 --> 00:23:04,800

As astonishing as these mysterious first hand encounters aboard the FDR might be, they are far from the only ones.

279

00:23:04,800 --> 00:23:12,800

During her unusually brief 32 year commission, the FDR will host at least a half dozen similar events.

280

00:23:12,800 --> 00:23:19,800

The FDR seemed to have been attractive to USOs. She certainly saw a lot of them.

281

00:23:19,800 --> 00:23:27,800

Coming up, the 1952 NATO mission Operation Main Brace is rocked by continuous UFO and USO reports.

282

00:23:27,800 --> 00:23:31,800

The lead ship, the USS FDR.

283

00:23:31,800 --> 00:23:38,800

Wallace Litwin took photos of the flying disc going over the USS FDR in Operation Main Brace.

284

00:23:39,800 --> 00:23:48,800

I've interviewed three people separately who have been on the FDR where large UFOs have been seen over the ship,

285

00:23:48,800 --> 00:23:56,800

observing it, making its presence known and at times interfering with what appears to be some of the electronics on the ship.

286

00:23:56,800 --> 00:24:07,800

Franklin Delano Roosevelt was the first aircraft carrier to carry nuclear weapons and UFOs seem to be drawn to anything that's nuclear related.

287

00:24:08,800 --> 00:24:16,800

The first instance of this occurring was in the North Sea, off England, on NATO operations.

288

00:24:16,800 --> 00:24:25,800

September 1952, NATO initiates Operation Main Brace, the first cooperative multilateral maneuvers since the war.

289

00:24:25,800 --> 00:24:32,800

The FDR was part of a NATO fleet exercise off Denmark called Operation Main Brace.

290

00:24:33,800 --> 00:24:44,800

The FDR and the RAF and British aircraft carriers were witnesses to one of the most incredible multiple USO sightings in history.

291

00:24:44,800 --> 00:24:50,800

The Ministry of Defense in the UK actually wrote it up as a USO sighting.

292

00:24:50,800 --> 00:24:59,800

The exercise involves 200 ships, 1,000 planes and over 80,000 men from its member nations in the waters near Denmark.

293

00:25:00,800 --> 00:25:06,800

As one of the largest and most advanced ships of the time, the USS FDR leads the way.

294

00:25:06,800 --> 00:25:14,800

She was part of a task force that was sealing off the Russian submarine access through the North Sea into the Atlantic.

295

00:25:14,800 --> 00:25:24,800

Extremely important because what if there had been a USO base underneath the North Sea in that area north of Europe?

296

00:25:24,800 --> 00:25:28,800

We were surveilling them, they were surveilling us.

297

00:25:28,800 --> 00:25:36,800

September 13, 1952, the Danish destroyer Villamos is in the Baltic Sea north of Bornham Island.

298

00:25:36,800 --> 00:25:45,800

Lieutenant Commander Schmidt Jensen and several crew members reportedly see a luminous, triangular shaped object moving at high speeds above the water.

299

00:25:45,800 --> 00:25:55,800

In close proximity to the main fleet, the bluish object travels westward and suddenly turns southeast, directly toward the FDR.

300

00:25:56,800 --> 00:26:04,800

Over the next week, there are several more sightings stretching from Denmark back to the Air Operations Command bases in Scotland.

301

00:26:04,800 --> 00:26:17,800

September 20, 1952, 7.30pm. Three Danish officers reportedly observe a shiny disc shaped object rise from the water and pass over them.

302

00:26:17,800 --> 00:26:27,800

Again headed toward the NATO fleet and the FDR, the fast moving metallic UFO heads east and disappears into the cloud layer.

303

00:26:27,800 --> 00:26:41,800

September 21, 1952, less than 24 hours later, six British pilots above the North Sea spot a shiny spherical object rising from water and stoutly approached the fleet's location.

304

00:26:41,800 --> 00:26:48,800

They reportedly give chase, but the swift moving object evades their pursuit.

305

00:26:48,800 --> 00:26:53,800

FDR veteran Jordan says that he spoke to a witness over 40 years ago.

306

00:26:53,800 --> 00:27:02,800

They had a sooner contact from three or four destroyers and they couldn't figure out what the hell it was because it was moving with them.

307

00:27:02,800 --> 00:27:12,800

The damn thing was like a quarter mile wide and it came up out of the water and when it did, it dinged one of the ships.

308

00:27:12,800 --> 00:27:22,800

That was later reported as a collision between two destroyers and he says that's not what happened because he went up and said this damn thing came up out of the water and flew up.

309

00:27:22,800 --> 00:27:27,800

According to reports, all of these sightings share a similar eerie trait.

310

00:27:27,800 --> 00:27:37,800

The witnesses uniformly feel that these USO objects, whatever they might be, are actually observing the naval exercises at close range.

311

00:27:37,800 --> 00:27:45,800

After Operation Main Brace, there were so many sailors who saw the objects and airmen from the RAF that saw the objects.

312

00:27:45,800 --> 00:27:50,800

This wasn't just one or two people. These were crew members on the USS FDR.

313

00:27:50,800 --> 00:27:57,800

So this is one of those very famous multiple sightings where everybody saw these objects.

314

00:27:57,800 --> 00:28:08,800

One journalist aboard the USS FDR during the operations had perhaps the very best view of this reported swarm of USO activity through his camera lens.

315

00:28:08,800 --> 00:28:13,800

September 20, 1952, 11 a.m.

316

00:28:13,800 --> 00:28:21,800

Several crewmen witnessed yet another fast maneuvering spherical USO rise from the water to the sky just behind the fleet.

317

00:28:21,800 --> 00:28:36,800

Journalist Wallace Litwin on board the FDR documenting the operation points his 35mm Canon camera at the horizon and quickly snaps two images of a fast moving disc that seemingly defies all laws of gravity.

318

00:28:37,800 --> 00:28:44,800

The images were believed to have been studied by the Navy, but no official report was ever filed.

319

00:28:44,800 --> 00:28:53,800

Wallace Litwin took photos of the flying disc going over the USS FDR in Operation Main Brace.

320

00:28:53,800 --> 00:29:01,800

I got copies of his photographs and there it shows the object going over the ship and you see the ship's superstructure and part of a wing of an airplane.

321

00:29:01,800 --> 00:29:08,800

Just like a bright light going over the ship with the forward control but they said it was like a dislike to some of the witnesses.

322

00:29:08,800 --> 00:29:17,800

USO sightings aboard the USS FDR during Operation Main Brace were not exclusive to enlisted men and

non-coms.

323

00:29:17,800 --> 00:29:25,800

Some believe that General Dwight Eisenhower may have even witnessed similar objects as a guest aboard the FDR.

324

00:29:25,800 --> 00:29:31,800

I have heard reports that Eisenhower was on the FDR when one of these sightings occurred.

325

00:29:31,800 --> 00:29:43,800

The people who are the serious witnesses to operations and events have been afraid to come forward both because they've been threatened, they're also afraid of being ridiculed.

326

00:29:43,800 --> 00:29:50,800

According to experts, many documents involving Main Brace remain classified, however others have been released.

327

00:29:50,800 --> 00:29:55,800

Is there a motive for officials to keep 50-year-old events secret?

328

00:29:55,800 --> 00:30:01,800

The military, in fact the militaries of all First World nations treat these things as threats.

329

00:30:01,800 --> 00:30:10,800

They say the fact that they can penetrate airspace, they can go into highly secure areas, they can outfly our fastest jets.

330

00:30:10,800 --> 00:30:13,800

Does that mean they're hostile?

331

00:30:13,800 --> 00:30:22,800

Although many FDR veterans and researchers suspect that the ship's advanced capabilities may have made her a target for otherworldly attention,

332

00:30:22,800 --> 00:30:28,800

some wonder, could all of this reported activity actually serve as proof?

333

00:30:28,800 --> 00:30:34,800

I have spoken with people over the years since my Roosevelt experience and that one,

334

00:30:34,800 --> 00:30:39,800

and I've seen the evidence firsthand to those who have not had those experiences.

335

00:30:39,800 --> 00:30:46,800

You cannot know what you've yet to experience and hopefully you'll believe that they are out there.

336

00:30:48,800 --> 00:30:58,800

Coming up, the architect of modern USO research, Ivan T. Sanderson's controversial discoveries and extraordinary USO cases.

337

00:30:58,800 --> 00:31:05,800

And later from Australia, two disc-like objects are witnessed leaving an impression on the surface of the water.

338

00:31:06,800 --> 00:31:12,800

Now, Ivan Sanderson, a foreword taking you into a puncture.

339

00:31:12,800 --> 00:31:19,800

USOs in general are unidentified submerged objects.

340

00:31:19,800 --> 00:31:28,800

USOs have been in history for a long, long time and an associate and friend of mine, Ivan T. Sanderson, did a study of them long ago.

341

00:31:28,800 --> 00:31:33,800

They are there all the time. They're in the data. They're a part of the phenomena.

342

00:31:33,800 --> 00:31:41,800

Even more frightening than extraterrestrials is what Ivan T. Sanderson said when he wrote the book *Invisible Residence*.

343

00:31:41,800 --> 00:31:46,800

They're not extraterrestrials. They're already here.

344

00:31:47,800 --> 00:32:00,800

To this day, the pioneering USO research by zoologist and former British spy Ivan T. Sanderson continues to astound and frighten experts and buffs alike.

345

00:32:00,800 --> 00:32:11,800

His controversial 1970 book *Invisible Residence* forever opened the world's eyes and ears to the murky realm of unidentified submerged objects.

346

00:32:12,800 --> 00:32:17,800

Sanderson proposes two primary theories about USOs in *Invisible Residence*.

347

00:32:17,800 --> 00:32:27,800

The first is that USOs are in fact here and have either evolved along with the Earth or have come from space and made a home in our oceans long ago.

348

00:32:27,800 --> 00:32:34,800

When you talk about underwater UFOs, you have to remember that three-fourths of the Earth's surface is covered with water.

349

00:32:34,800 --> 00:32:39,800

And UFOs are seen pretty much all over the Earth in every country.

350

00:32:39,800 --> 00:32:46,800

So it's not at all surprising that they're using the oceans because we haven't even fully explored the oceans ourselves.

351

00:32:47,800 --> 00:32:51,800

Sanderson's USO theories lead to a stark prospect.

352

00:32:51,800 --> 00:33:01,800

If over 50% of UFO reports occur on or above water as he reports, are over 50% of these UFOs in fact USOs.

353

00:33:02,800 --> 00:33:05,800

You know, UFOs are not just being seen over land.

354

00:33:05,800 --> 00:33:12,800

Ivan T. Sanderson said that 50% of all UFOs were actually being seen over bodies of water.

355

00:33:12,800 --> 00:33:27,800

Do USOs mean that living underneath the surface of planet Earth is a whole civilization of creatures, entities, aliens for whom Earth is home just as it's home for us on the surface?

356

00:33:27,800 --> 00:33:34,800

And these were residents who've been here for millions of years probably before life evolved on the surface of the planet.

357

00:33:36,800 --> 00:33:50,800

As evidence of his second theory, Sanderson says there are several crucial points across the Earth, together forming an unseen invisible map, triangles that he refers to as vile vortices.

358

00:33:51,800 --> 00:34:06,800

By locating the areas where ships and aircraft reportedly disappear, Sanderson realized that the USO sightings correlate almost perfectly with the triangles on Earth, where it is believed that

strange magnetic anomalies occur.

359

00:34:07,800 --> 00:34:23,800

He wondered if some of these unusual spaces, whether they were called triangles or, you know, vortices or whatever, might have unusual animals, might have USOs coming in and out of them.

360

00:34:24,800 --> 00:34:36,800

Sanderson's vortices theory has a terrible dark side as well. The major areas of anomaly are the areas located in some of the most treacherous water regions on Earth.

361

00:34:37,800 --> 00:34:56,800

Ivan Sanderson did a latitudinal study and found out that there is a line around the planet in which geographic north and magnetic north merge, and these are areas that have a great deal of lost vessels, lost planes and manifestations of objects.

362

00:34:57,800 --> 00:35:09,800

After 17 years of research, Sanderson came to one startling conclusion. There is a clear link between the high number of USO reports and the areas of unusual gravitational or vortical poles on Earth.

363

00:35:10,800 --> 00:35:18,800

The specific areas were the two intersect of the mysterious triangle regions, off-Permuta, Japan and Australia.

364

00:35:19,800 --> 00:35:27,800

I think it's about time that somebody does go into the thing, rather than just sitting sadly and saying it doesn't exist, or saying it's a fork, we go ahead and prove it.

365

00:35:28,800 --> 00:35:39,800

According to Sanderson, this link is no coincidence. He believes that the unusual magnetic hotspots on Earth and high number of USO sightings are connected, and for a reason.

366

00:35:40,800 --> 00:35:47,800

In fact, some USO researchers have interpreted the vortices as likely locations of USO bases.

367

00:35:48,800 --> 00:35:56,800

We began to think about underwater bases, are they aliens from outer space, are they really interacting with us?

368

00:35:56,800 --> 00:36:11,800

I believe that over time, there have been various times, there have been concentrated areas of extraterrestrial facilities that are based underwater, very deep and undetectable, where they've been observing what we're doing.

369

00:36:12,800 --> 00:36:17,800

USOs might be indigenous to planet Earth, they were even here before we were.

370

00:36:18,800 --> 00:36:30,800

A remarkable yet virtually forgotten USO case from Sanderson's research, is the mysterious St. Andrew incident off the coast of Nova Scotia, Canada, on October 30th, 1906.

371

00:36:30,800 --> 00:36:40,800

One of the great cases from the early part of the 20th century is the SS St. Andrew. She was a vessel that was crossing the Atlantic on a way to Humber.

372

00:36:41,800 --> 00:36:48,800

She was off Halifax when not only her crew, but passengers aboard that ship, sighted a UFO.

373

00:36:49,800 --> 00:36:59,800

Sanderson reports that at 4.30pm the ship was bombarded by a huge flaming object that zigzags through the sky, falls into the water and disappears.

374

00:37:00,800 --> 00:37:07,800

But according to his reports, it couldn't have been a meteor, because meteors do not zigzag and move with apparent intelligent control.

375

00:37:08,800 --> 00:37:19,800

The story was even covered in the New York Times. First officer V.E. Spencer says, quote, I have

seen meteors all over the world, but never such a large one as this.

376

00:37:22,800 --> 00:37:26,800

Throughout Sanderson's career, a cloud of mystery drifted around him.

377

00:37:26,800 --> 00:37:38,800

Sanderson was a part of the British intelligence service, but what we're really cloudy about is a lot of his friends were in the OSS, which was the precursor to the CIA.

378

00:37:39,800 --> 00:37:48,800

And then, as we can tell from some of his books, Sanderson had a direct connection to the office of Navy intelligence and was getting information from them.

379

00:37:49,800 --> 00:38:03,800

Until his death in 1973, Sanderson traversed the globe in search of underwater submerged objects. Today, some USO experts believe his research was provided to him by highly placed government sources.

380

00:38:04,800 --> 00:38:23,800

Many of us wonder, was Sanderson still in the intelligence services? Was he still going on some of his expeditions, some of his explorations, and using part of what he was doing to feed back to his old friends in intelligence services, but also getting new information for his books from them too?

381

00:38:24,800 --> 00:38:31,800

At the end of his life, weakened by cancer, Sanderson fell victim to friends and enemies alike who coveted his research.

382

00:38:31,800 --> 00:38:39,800

A lot of people would back their station wagon up to his bunkhouse and said they were going to borrow files and never brought them back.

383

00:38:40,800 --> 00:38:52,800

Speculation continues in various circles about whether secret government operatives removed Sanderson's files, thereby destroying the best cache of deep-sea UFO evidence ever collected.

384

00:38:53,800 --> 00:39:08,800

In the beginning, Ivan Sanderson was thinking about USOs as creatures that were in the air, that came into water. Towards the end of his career, he also had to engage in thinking about them as possibly intelligent craft from outer space.

385

00:39:11,800 --> 00:39:19,800

Coming up, an eyewitness report of two massive, disc-like objects emerging from an Australian lagoon and leaving evidence in its wake.

386

00:39:23,800 --> 00:39:39,800

According to experts, one of the most impressive traits of USOs is their ability to affect, change, and displace the surface of the water in much the same way that UFOs in our skies reportedly generate similar crop circles on land.

387

00:39:42,800 --> 00:39:49,800

An interesting aspect of UFOs or USOs is the fact that they leave a physical presence on the water.

388

00:39:50,800 --> 00:40:05,800

USOs create the same kind of effect over water, over ice, so there's a real similarity between the physical trace evidence of a USO landing and a UFO landing on planet Earth.

389

00:40:06,800 --> 00:40:12,800

It's like if you took a glass and stuck it in water, right? Well, now you have a hole in the water.

390

00:40:13,800 --> 00:40:25,800

To USO researchers, the most impressive and well-publicized water crop circle case is the Tully Waternest case, which occurred in northern Australia in January 1966.

391

00:40:26,800 --> 00:40:41,800

This Tully's nest story was one of the most publicized USO slash UFO events in Australia. In fact, it had much the same kind of publicity that Roswell had here in the United States because everybody was involved.

392

00:40:41,800 --> 00:40:49,800

The military, the newspapers, it became a tourist attraction. People made pilgrimages to Tully's

nest to see where the USO came out of the water.

393

00:40:50,800 --> 00:40:58,800

Over the past decade, Australian researcher Bill Chalker has conducted the most intensive study of the Tully case.

394

00:40:59,800 --> 00:41:15,800

At 9am on January 19, 1966, a farmer, a young farmer, George Pedley, was driving a tractor through a neighboring farmer's property, a place called Horseshoe Lagoon near Tully and Far North Queensland.

395

00:41:16,800 --> 00:41:26,800

He first started to experience some problems with his tractor. It seemed to be missing as if it was about to stop on him.

396

00:41:26,800 --> 00:41:33,800

Then he heard this high-pitched hissing noise and he looked in the direction where this noise was coming from.

397

00:41:33,800 --> 00:42:02,800

George Pedley described the object as appearing like two massive dinner plates stacked atop one another, about 30 feet in width and 12 feet in height.

398

00:42:04,800 --> 00:42:12,800

It was a media sensation for quite a number of weeks. We've sort of corresponded to appearing, giving kind of on-the-spot reports.

399

00:42:12,800 --> 00:42:18,800

There was even international coverage of it and it was described in the press as a flying saucer nest.

400

00:42:19,800 --> 00:42:27,800

This nest contained evidence of reported USO touchdown, a distinctive imprint left behind on the surface of the lagoon.

401

00:42:27,800 --> 00:42:37,800

The whirlpool effect in the water lasted for days and days after the USO took off. The Navy tested it, scientists tested it.

402

00:42:37,800 --> 00:42:47,800

A lot of tests were done on it and analyses were done on it and there were all kinds of theories and what they found was nothing could explain the water impressions.

403

00:42:48,800 --> 00:42:56,800

In his numerous interviews and investigations over the years, trucker found George Pedley to be a unique USO witness.

404

00:42:58,800 --> 00:43:07,800

George Pedley impressively is being a very credible kind of witness, a typical kind of North Queensland type cane farmer character.

405

00:43:07,800 --> 00:43:11,800

Really the last kind of person you'd expect to come out with a story like this.

406

00:43:12,800 --> 00:43:21,800

During the various public and private investigations in Tully over the subsequent weeks, at least a half dozen other water nests were identified in the area.

407

00:43:21,800 --> 00:43:27,800

Water samples were sent to the physics department at the University of Brisbane for radiation testing.

408

00:43:29,800 --> 00:43:37,800

A read from the center of the water nest tested positive for beta radiation, but within days the sample mysteriously disappeared.

409

00:43:38,800 --> 00:43:42,800

Research into the Tully case continues to this day.

410

00:43:45,800 --> 00:43:55,800

With no shortage of USO cases in the past and present, many continue to wonder why these objects are here and what could possibly be next.

411

00:43:55,800 --> 00:44:05,800

My belief is we got this big universe of all these different planets. I mean anything is possible. Why should we be the only intelligent beings?

412

00:44:05,800 --> 00:44:11,800

Some researchers interpret the recent events involving USOs as something more sinister.

413

00:44:11,800 --> 00:44:23,800

I believe that there are extraterrestrial civilizations who have been watching our development over the last hundred years with knowing there's a lot of promise, but also a lot of risk.

414

00:44:23,800 --> 00:44:31,800

No doubt about it, there's something going on. They're covering stuff up, they're lying and I would like to see congressional hearings in Washington and cut the crap and see what's going on.

415

00:44:31,800 --> 00:44:43,800

Does it mean that somehow there's an event coming on planet Earth, cataclysmic, end of time and somehow the USOs are coming out of the Earth because the Earth itself is in trouble?

416

00:44:43,800 --> 00:44:46,800

Maybe we're nearing the end of days.

417

00:45:01,800 --> 00:45:05,800

I don't think this is going to be used for centuries.

418

00:45:05,800 --> 00:45:08,800

Out there is a whole lost world.
