

UFO  **HUB**

1
00:00:21,020 --> 00:00:14,300

[Music]

2
00:00:26,870 --> 00:00:23,600

my name is Debbie cycle Meyer I've been

3
00:00:29,240 --> 00:00:26,880

an independent field investigator for

4
00:00:32,240 --> 00:00:29,250

probably beautiful field investigator

5
00:00:35,780 --> 00:00:32,250

for probably 25 years I've been a MUFON

6
00:00:38,830 --> 00:00:35,790

investigators since 2002 I'm currently

7
00:00:41,600 --> 00:00:38,840

the MUFON Missouri State Director and

8
00:00:44,090 --> 00:00:41,610

I'm also on the MUFON business board of

9
00:00:47,330 --> 00:00:44,100

directors I'm a small business owner and

10
00:00:49,490 --> 00:00:47,340

so when I finally get time on the

11
00:00:52,280 --> 00:00:49,500

weekends to do something recreational I

12
00:00:54,260 --> 00:00:52,290

decided that the best place to be

13
00:00:56,840 --> 00:00:54,270

especially in Missouri since it's so hot

14

00:01:00,860 --> 00:00:56,850

and humid is to be in the water so a few

15

00:01:02,810 --> 00:01:00,870

years ago I took up scuba diving and me

16

00:01:04,670 --> 00:01:02,820

with the a type personality that I have

17

00:01:07,070 --> 00:01:04,680

I wasn't satisfied just to be a

18

00:01:10,550 --> 00:01:07,080

recreational scuba diver I kept going

19

00:01:15,350 --> 00:01:10,560

until I became a scuba instructor so

20

00:01:18,410 --> 00:01:15,360

being a scuba instructor and knowing all

21

00:01:21,560 --> 00:01:18,420

that that's going on underwater all of

22

00:01:27,440 --> 00:01:21,570

our limitations begin made me start to

23

00:01:30,530 --> 00:01:27,450

think about the UFO related sightings

24

00:01:33,109 --> 00:01:30,540

that are with actually one in five UFO

25

00:01:35,899 --> 00:01:33,119

sightings are water related so I started

26
00:01:39,550 --> 00:01:35,909
putting my knowledge and my research of

27
00:01:42,830 --> 00:01:39,560
UFOs along with my knowledge of

28
00:01:45,350 --> 00:01:42,840
underwater and our limitations that I

29
00:01:47,230 --> 00:01:45,360
teach as a scuba instructor and I

30
00:01:50,270 --> 00:01:47,240
decided that something wasn't right

31
00:01:52,280 --> 00:01:50,280
there's a lot of crafts that are seeing

32
00:01:56,149 --> 00:01:52,290
UFOs that are seen coming in and out of

33
00:01:57,890 --> 00:01:56,159
the water and it seems like they go in

34
00:02:00,050 --> 00:01:57,900
and out of the water with ease we've

35
00:02:03,380 --> 00:02:00,060
also have reports of craft that are

36
00:02:05,630 --> 00:02:03,390
traveling underwater yet that as a scuba

37
00:02:07,429 --> 00:02:05,640
instructor I realized that there's an

38
00:02:12,979 --> 00:02:07,439

incredible amount of pressure involved

39

00:02:15,560 --> 00:02:12,989

with depth in water and as an instructor

40

00:02:17,630 --> 00:02:15,570

I'm also limited to a hundred and thirty

41

00:02:20,780 --> 00:02:17,640

feet of recreation and these things are

42

00:02:22,580 --> 00:02:20,790

going extremely deep and extremely fast

43

00:02:27,380 --> 00:02:22,590

so I started doing research in the last

44

00:02:31,479 --> 00:02:27,390

few years to find out what our human

45

00:02:35,460 --> 00:02:31,489

limitations are as far as submarines

46

00:02:37,929 --> 00:02:35,470

and and a scuba divers Tech divers and

47

00:02:40,360 --> 00:02:37,939

underwater bases and found that we

48

00:02:45,130 --> 00:02:40,370

actually do have military underwater

49

00:02:47,500 --> 00:02:45,140

bases and what are beyond our

50

00:02:49,720 --> 00:02:47,510

limitations and it's I've found a lot of

51
00:02:51,869 --> 00:02:49,730
very interesting facts I found out that

52
00:02:56,080 --> 00:02:51,879
we've been underwater since I believe

53
00:03:00,670 --> 00:02:56,090
1963 in research labs underwater oceanic

54
00:03:04,740 --> 00:03:00,680
research labs and our military

55
00:03:09,550 --> 00:03:04,750
I found a document stating that we were

56
00:03:12,729 --> 00:03:09,560
building underwater bases that were

57
00:03:15,039 --> 00:03:12,739
capable of people living in an extended

58
00:03:18,220 --> 00:03:15,049
periods of time in one atmosphere

59
00:03:22,059 --> 00:03:18,230
conditions which one atmosphere is what

60
00:03:25,179 --> 00:03:22,069
we breathe for you know extended periods

61
00:03:26,830 --> 00:03:25,189
of time and this was back in 1966 so you

62
00:03:29,020 --> 00:03:26,840
can just imagine what we have today

63
00:03:31,300 --> 00:03:29,030

that's underwater that's hidden but

64

00:03:33,129 --> 00:03:31,310

there's still crafts that are coming in

65

00:03:34,960 --> 00:03:33,139

and out of the water at high rates of

66

00:03:37,960 --> 00:03:34,970

speed and if you've ever seen a video of

67

00:03:39,580 --> 00:03:37,970

a plane crash which there are videos of

68

00:03:42,580 --> 00:03:39,590

plane crashes now into the water you

69

00:03:45,490 --> 00:03:42,590

notice that our aircraft and the water

70

00:03:47,319 --> 00:03:45,500

are not a friendly combination what

71

00:03:49,240 --> 00:03:47,329

happens is when that craft hits the

72

00:03:52,059 --> 00:03:49,250

water it's like hitting a concrete wall

73

00:03:55,390 --> 00:03:52,069

and it breaks up yet we have several

74

00:03:57,490 --> 00:03:55,400

videos of submitted by witnesses of

75

00:04:00,129 --> 00:03:57,500

craft and then lately Toobin spen

76

00:04:03,909 --> 00:04:00,139

submitted by military of craft coming in

77

00:04:07,030 --> 00:04:03,919

and out of the water with ease I started

78

00:04:08,979 --> 00:04:07,040

wondering how these craft are able to

79

00:04:11,530 --> 00:04:08,989

come in and out of the water and in and

80

00:04:13,990 --> 00:04:11,540

out of our atmosphere with ease and as a

81

00:04:15,879 --> 00:04:14,000

child I lived in southern Arizona and

82

00:04:19,449 --> 00:04:15,889

there were a lot of experimental craft

83

00:04:22,450 --> 00:04:19,459

that were either from I guess from

84

00:04:24,550 --> 00:04:22,460

Nevada or maybe from Tucson I found out

85

00:04:27,040 --> 00:04:24,560

later there there was a base in Tucson

86

00:04:28,360 --> 00:04:27,050

but these craft would come low across

87

00:04:32,740 --> 00:04:28,370

the sky and there were always these

88

00:04:35,020 --> 00:04:32,750

sonic booms and and if most people my

89
00:04:36,460 --> 00:04:35,030
age remember growing up with sonic booms

90
00:04:38,860 --> 00:04:36,470
we you really don't hear sonic booms

91
00:04:41,469 --> 00:04:38,870
anymore but that's that's breaking the

92
00:04:44,440 --> 00:04:41,479
sound barrier at you know at a low

93
00:04:45,010 --> 00:04:44,450
altitude yet these crafts are being

94
00:04:47,920 --> 00:04:45,020
report

95
00:04:52,180 --> 00:04:47,930
by witnesses that are zipping across the

96
00:04:54,340 --> 00:04:52,190
sky I believe it was Kenneth Arnold said

97
00:04:59,320 --> 00:04:54,350
that it was well that that the craft

98
00:05:02,050 --> 00:04:59,330
that he saw that was C June 25th 1947

99
00:05:04,810 --> 00:05:02,060
just a few days prior to the Roswell

100
00:05:08,080 --> 00:05:04,820
crash of 1947 and this wasn't Mountain

101
00:05:09,880 --> 00:05:08,090
Rainier that these crafts were zipping

102
00:05:12,220 --> 00:05:09,890
across the sky and they were well over

103
00:05:15,070 --> 00:05:12,230
doing well over a thousand miles an hour

104
00:05:17,020 --> 00:05:15,080
without a sonic boom now you also have

105
00:05:20,400 --> 00:05:17,030
crafts that are coming in and out of the

106
00:05:24,340 --> 00:05:20,410
water and they're doing it with these

107
00:05:26,740 --> 00:05:24,350
they're traveling through the water at a

108
00:05:31,570 --> 00:05:26,750
high rate of speed this has been

109
00:05:33,340 --> 00:05:31,580
reported by sonar operators that I have

110
00:05:39,190 --> 00:05:33,350
at least two witnesses that have told me

111
00:05:43,450 --> 00:05:39,200
that they were in the area of a

112
00:05:44,980 --> 00:05:43,460
submarine in next to the sonar operator

113
00:05:46,840 --> 00:05:44,990

because they were seasick and apparently

114

00:05:50,500 --> 00:05:46,850

that's the place to go if you get

115

00:05:53,050 --> 00:05:50,510

seasickness on a submarine and they saw

116

00:05:55,300 --> 00:05:53,060

what they refer to as fast movers

117

00:05:57,940 --> 00:05:55,310

something that comes across the sonar

118

00:06:00,220 --> 00:05:57,950

screen at such a fast rate of speed that

119

00:06:04,510 --> 00:06:00,230

it's faster than anything we have it's

120

00:06:07,270 --> 00:06:04,520

definitely not a whale or a fish and

121

00:06:09,970 --> 00:06:07,280

it's not a missile it's something that's

122

00:06:12,340 --> 00:06:09,980

coming across fast and going very fast

123

00:06:16,080 --> 00:06:12,350

so they are referred to as fast movers

124

00:06:21,610 --> 00:06:16,090

so I started thinking what is it that's

125

00:06:23,860 --> 00:06:21,620

causing these things to adapt to our

126
00:06:29,140 --> 00:06:23,870
harsh environment our pressure of our

127
00:06:32,170 --> 00:06:29,150
oceans and and the vacuum of space and

128
00:06:36,010 --> 00:06:32,180
coming across our sky without a sonic

129
00:06:37,720 --> 00:06:36,020
boom at high rates of speed one as an

130
00:06:41,590 --> 00:06:37,730
investigator one of the first things we

131
00:06:46,900 --> 00:06:41,600
ask is about electromagnetic field EMF

132
00:06:50,980 --> 00:06:46,910
and this this EMF field that's reported

133
00:06:53,530 --> 00:06:50,990
when craft are seen is something that as

134
00:06:56,740 --> 00:06:53,540
the craft goes over though the lights

135
00:06:58,450 --> 00:06:56,750
will blink around the town round the

136
00:07:00,279 --> 00:06:58,460
house street lights

137
00:07:03,340 --> 00:07:00,289
to dawn lights the people's house maybe

138
00:07:06,189 --> 00:07:03,350

their car radial will go out if you

139

00:07:07,510 --> 00:07:06,199

watch the movie Close Encounters and Roy

140

00:07:08,980 --> 00:07:07,520

was out there trying to figure out why

141

00:07:10,659 --> 00:07:08,990

all the electric went out on the movie

142

00:07:12,580 --> 00:07:10,669

and the mailboxes were shaking back and

143

00:07:14,409 --> 00:07:12,590

forth and he looked up and his face was

144

00:07:15,460 --> 00:07:14,419

burned I mean there was this was all

145

00:07:17,890 --> 00:07:15,470

these reactions where the

146

00:07:19,960 --> 00:07:17,900

electromagnetic field so all of these

147

00:07:21,879 --> 00:07:19,970

crafts that are reported maybe not all

148

00:07:23,499 --> 00:07:21,889

of them but a very good portion of them

149

00:07:25,890 --> 00:07:23,509

have some type of an electromagnetic

150

00:07:28,900 --> 00:07:25,900

field around them this electric

151

00:07:30,909 --> 00:07:28,910

electromagnetic field is around the

152

00:07:32,020 --> 00:07:30,919

craft and so it's protecting it and as

153

00:07:33,400 --> 00:07:32,030

they're coming in and out of our

154

00:07:35,980 --> 00:07:33,410

atmosphere they're never touching our

155

00:07:41,529 --> 00:07:35,990

atmosphere they're protected by this

156

00:07:44,980 --> 00:07:41,539

field which is basically oh I guess it's

157

00:07:47,589 --> 00:07:44,990

it's basically a protection a dome dome

158

00:07:50,110 --> 00:07:47,599

like protection so as they hit the water

159

00:07:52,839 --> 00:07:50,120

the craft isn't touching the water it's

160

00:07:55,559 --> 00:07:52,849

being protected by the shield and as

161

00:07:58,180 --> 00:07:55,569

they go through the water the shield of

162

00:08:01,779 --> 00:07:58,190

energy is causing them to Trent to be

163

00:08:03,460 --> 00:08:01,789

able to transport through the water or

164

00:08:03,909 --> 00:08:03,470

travel through the water at a high rate

165

00:08:06,460 --> 00:08:03,919

of speed

166

00:08:09,010 --> 00:08:06,470

never affecting the craft so I thought

167

00:08:11,710 --> 00:08:09,020

okay well there's crafts that are seen

168

00:08:14,080 --> 00:08:11,720

in the water one in five again 1/5 UFO

169

00:08:15,730 --> 00:08:14,090

sightings are water related so I started

170

00:08:17,950 --> 00:08:15,740

thinking well what are they looking for

171

00:08:19,450 --> 00:08:17,960

what are they down there for well a lot

172

00:08:20,709 --> 00:08:19,460

of times they're down there for an

173

00:08:22,330 --> 00:08:20,719

extended period of time

174

00:08:24,790 --> 00:08:22,340

which means there's some type of a base

175

00:08:28,570 --> 00:08:24,800

or maybe your portal that's underwater

176

00:08:30,999 --> 00:08:28,580

they're traveling in and out of theirs

177

00:08:33,040 --> 00:08:31,009

maybe they're hiding but sometimes

178

00:08:35,409 --> 00:08:33,050

there's a craft it's just over the water

179

00:08:37,360 --> 00:08:35,419

and they're filtering something up we

180

00:08:38,769 --> 00:08:37,370

have pictures of craft that have been

181

00:08:40,060 --> 00:08:38,779

submitted that are hovering over the

182

00:08:42,250 --> 00:08:40,070

water and there's something that's

183

00:08:44,590 --> 00:08:42,260

coming up water coming up and then back

184

00:08:47,380 --> 00:08:44,600

down reports of craft under water that

185

00:08:49,980 --> 00:08:47,390

are sucking up something so I thought is

186

00:08:54,250 --> 00:08:49,990

a dive instructor I thought well our

187

00:08:58,000 --> 00:08:54,260

atmosphere is 79 percent nitrogen 1%

188

00:09:01,990 --> 00:08:58,010

oxygen so what what is it about water

189

00:09:04,389 --> 00:09:02,000

that the Oh h₂O hydrogen and oxygen so I

190

00:09:06,640 --> 00:09:04,399

started doing research on hydrogen and I

191

00:09:08,980 --> 00:09:06,650

found that hydrogen is the field that

192

00:09:11,740 --> 00:09:08,990

was used in the shuttles and nASA uses

193

00:09:12,400 --> 00:09:11,750

it in a lot of their rockets why because

194

00:09:14,860 --> 00:09:12,410

hydrogen

195

00:09:18,790 --> 00:09:14,870

is a clean form of energy it's non

196

00:09:21,130 --> 00:09:18,800

pollutant that you can developed and it

197

00:09:23,110 --> 00:09:21,140

will nASA has developed hydrogen cells

198

00:09:26,830 --> 00:09:23,120

like a car battery only their hydrogen

199

00:09:29,470 --> 00:09:26,840

cells and these cells like a car battery

200

00:09:32,530 --> 00:09:29,480

that can be recharged these hydrogen

201
00:09:34,570 --> 00:09:32,540
cells can be replenished so I thought

202
00:09:36,250 --> 00:09:34,580
that's got to be it these crafts are

203
00:09:37,930 --> 00:09:36,260
going underwater and when they're

204
00:09:41,620 --> 00:09:37,940
whatever it is that they're sucking up

205
00:09:43,720 --> 00:09:41,630
they're sucking up hydrogen which may or

206
00:09:45,370 --> 00:09:43,730
may not be but it seems pretty logical

207
00:09:48,040 --> 00:09:45,380
they're sucking up the hydrogen to

208
00:09:50,680 --> 00:09:48,050
replenish their electromagnetic field

209
00:09:52,630 --> 00:09:50,690
that's protecting their craft one would

210
00:09:57,600 --> 00:09:52,640
wonder why you would have a base

211
00:10:00,370 --> 00:09:57,610
underwater there's been a lot of reports

212
00:10:06,340 --> 00:10:00,380
speculation witness reports especially

213
00:10:10,990 --> 00:10:06,350

at the MUFON symposium in 2017 talking

214

00:10:14,200 --> 00:10:11,000

about bases on Mars and possible bases

215

00:10:17,770 --> 00:10:14,210

on the moon alien craft and our own

216

00:10:20,950 --> 00:10:17,780

bases but underwater is a fantastic

217

00:10:24,670 --> 00:10:20,960

place to hide there had there could have

218

00:10:26,380 --> 00:10:24,680

been and may have been bases underwater

219

00:10:28,420 --> 00:10:26,390

you know if okay so if you're an alien

220

00:10:33,370 --> 00:10:28,430

race and you want to come and visit the

221

00:10:36,360 --> 00:10:33,380

earth where would you go and be able to

222

00:10:39,610 --> 00:10:36,370

hide without anybody coming upon you

223

00:10:42,160 --> 00:10:39,620

staying there for for unlimited amount

224

00:10:45,670 --> 00:10:42,170

of time if you're traveling through

225

00:10:47,920 --> 00:10:45,680

space you're also able to travel

226

00:10:49,090 --> 00:10:47,930

I mean well they are capable of

227

00:10:54,520 --> 00:10:49,100

traveling through the water we have

228

00:10:56,700 --> 00:10:54,530

reports back predating Columbus of craft

229

00:10:57,880 --> 00:10:56,710

I think the oldest one I found was at

230

00:11:01,420 --> 00:10:57,890

1067

231

00:11:03,520 --> 00:11:01,430

of a UFO sighting coming in and out of

232

00:11:05,710 --> 00:11:03,530

the water so this has been going on for

233

00:11:08,320 --> 00:11:05,720

a very very long time perfect place to

234

00:11:10,690 --> 00:11:08,330

hide if you want to observe somebody on

235

00:11:12,790 --> 00:11:10,700

this landmass where's the best place to

236

00:11:18,420 --> 00:11:12,800

hide you hide underwater right near the

237

00:11:22,270 --> 00:11:20,920

run into you no one's gonna accidentally

238

00:11:24,040 --> 00:11:22,280

you know all of a sudden here you are

239

00:11:25,570 --> 00:11:24,050

and these people are in a panic it's a

240

00:11:26,050 --> 00:11:25,580

good place to hide a good place to set

241

00:11:29,070 --> 00:11:26,060

up your base

242

00:11:33,400 --> 00:11:29,080

so the probability of an underwater base

243

00:11:35,590 --> 00:11:33,410

is a very good one also if you have a

244

00:11:37,990 --> 00:11:35,600

stationary base underwater you can

245

00:11:40,180 --> 00:11:38,000

disperse your craft from this base in

246

00:11:42,370 --> 00:11:40,190

and out and do your research but that

247

00:11:45,010 --> 00:11:42,380

way you've got one stationary place

248

00:11:46,360 --> 00:11:45,020

where you can do your research and you

249

00:11:48,820 --> 00:11:46,370

don't have to keep coming in and out of

250

00:11:50,500 --> 00:11:48,830

our atmosphere so let's say you have a

251
00:11:53,740 --> 00:11:50,510
base on the moon okay every time you

252
00:11:56,290 --> 00:11:53,750
want to come and observe or replenish

253
00:12:00,930 --> 00:11:56,300
your hydrogen or take water or replenish

254
00:12:05,670 --> 00:12:00,940
Golda now a lot of researchers have

255
00:12:08,140 --> 00:12:05,680
speculated that I guess because of

256
00:12:09,790 --> 00:12:08,150
microchips and we're using a lot of gold

257
00:12:13,150 --> 00:12:09,800
and that type of thing microchips it's

258
00:12:15,100 --> 00:12:13,160
in it's in phones that gold is something

259
00:12:19,390 --> 00:12:15,110
else that's being harvested from Earth

260
00:12:21,660 --> 00:12:19,400
but every time somebody or someone some

261
00:12:25,480 --> 00:12:21,670
creature or some being comes from

262
00:12:29,080 --> 00:12:25,490
another planet and wants to take one of

263
00:12:31,420 --> 00:12:29,090

our resources or observer observe us or

264

00:12:33,970 --> 00:12:31,430

do whatever it is that they have in mind

265

00:12:36,100 --> 00:12:33,980

they have to come through the sky into

266

00:12:40,810 --> 00:12:36,110

our atmosphere and now more and more

267

00:12:42,190 --> 00:12:40,820

there's radar there's planes there's

268

00:12:45,130 --> 00:12:42,200

people with cell phones it's a lot

269

00:12:49,960 --> 00:12:45,140

easier to be detected coming in and out

270

00:12:52,060 --> 00:12:49,970

so if you want to try and stay hidden

271

00:12:53,860 --> 00:12:52,070

for a lot longer it makes more sense to

272

00:12:55,240 --> 00:12:53,870

try and put a base under water you can

273

00:12:59,680 --> 00:12:55,250

kind of zip in and out of the water go

274

00:13:00,850 --> 00:12:59,690

back underwater and stay undetected it

275

00:13:02,320 --> 00:13:00,860

just makes a lot of sense it's a great

276

00:13:04,270 --> 00:13:02,330

place to hide you can't be picked up by

277

00:13:06,310 --> 00:13:04,280

satellites either you just say well okay

278

00:13:08,320 --> 00:13:06,320

just let's just take an alien base and

279

00:13:10,600 --> 00:13:08,330

let's just put it on the moon well I

280

00:13:13,150 --> 00:13:10,610

have a telescope and I can see the moon

281

00:13:16,450 --> 00:13:13,160

I have a 10-inch Schmitt Cassegrain

282

00:13:18,010 --> 00:13:16,460

telescope in my backyard and I can I was

283

00:13:19,420 --> 00:13:18,020

asked if I could if I looked at the moon

284

00:13:22,570 --> 00:13:19,430

during the Eclipse because the Eclipse

285

00:13:25,600 --> 00:13:22,580

went right almost directly over my house

286

00:13:27,310 --> 00:13:25,610

last year when we had the Eclipse over

287

00:13:29,230 --> 00:13:27,320

the United States and I said well no my

288

00:13:33,550 --> 00:13:29,240

telescope is so powerful I can only see

289

00:13:35,830 --> 00:13:33,560

1/12 of the moon at a time so and I get

290

00:13:37,780 --> 00:13:35,840

old actually a ten-inch there are

291

00:13:39,370 --> 00:13:37,790

amateur astronomers out here out there

292

00:13:41,680 --> 00:13:39,380

with way way more than that

293

00:13:43,570 --> 00:13:41,690

so it doesn't make sense to hide

294

00:13:45,250 --> 00:13:43,580

something in plain view also our

295

00:13:46,570 --> 00:13:45,260

satellites let's say well why don't

296

00:13:49,810 --> 00:13:46,580

these aliens just go out the middle of

297

00:13:50,860 --> 00:13:49,820

the the desert where there's nobody out

298

00:13:52,450 --> 00:13:50,870

there go to the top of a mountain

299

00:13:53,830 --> 00:13:52,460

because our satellites can pick all that

300

00:13:54,550 --> 00:13:53,840

up so where do you hide you hide

301
00:13:56,650 --> 00:13:54,560
underwater

302
00:13:58,270 --> 00:13:56,660
you can't pick that up to a certain

303
00:14:01,570 --> 00:13:58,280
extent there are some anomalies that are

304
00:14:03,730 --> 00:14:01,580
being picked up by Google Earth that we

305
00:14:06,220 --> 00:14:03,740
have seen because there are fairly

306
00:14:08,350 --> 00:14:06,230
shallow water but you go really really

307
00:14:11,560 --> 00:14:08,360
deep they're able to obviously able to

308
00:14:15,160 --> 00:14:11,570
handle the pressure of water and the

309
00:14:18,070 --> 00:14:15,170
vacuum of space and travel in between

310
00:14:21,100 --> 00:14:18,080
the two with ease that's a place to hide

311
00:14:24,670 --> 00:14:21,110
the smart place to hide when people

312
00:14:28,330 --> 00:14:24,680
think UFOs they look up there's a lot of

313
00:14:30,910 --> 00:14:28,340

sky watchers the sky watching groups

314

00:14:32,560 --> 00:14:30,920

people go outside sometimes you have a

315

00:14:35,800 --> 00:14:32,570

go out then let's see this great sky and

316

00:14:39,010 --> 00:14:35,810

I'm just gonna look for UFOs and granted

317

00:14:41,620 --> 00:14:39,020

they do see things I live out in an

318

00:14:45,610 --> 00:14:41,630

area where I have gone up and I've seen

319

00:14:48,400 --> 00:14:45,620

something that's unexplained but if you

320

00:14:52,030 --> 00:14:48,410

really want to find out what's going on

321

00:14:54,370 --> 00:14:52,040

you really want to see what's what's

322

00:14:58,000 --> 00:14:54,380

being hidden from us not only by our

323

00:15:01,330 --> 00:14:58,010

government other governments may be

324

00:15:04,090 --> 00:15:01,340

combined alien government technology

325

00:15:07,810 --> 00:15:04,100

alien government bases the place to look

326

00:15:10,750 --> 00:15:07,820

is underwater only 5% of our oceans have

327

00:15:13,450 --> 00:15:10,760

been explored 5% you know we're called

328

00:15:18,580 --> 00:15:13,460

the blue planet this is WEF there's a

329

00:15:21,910 --> 00:15:18,590

mess 70% of our planet is water and 5%

330

00:15:23,350 --> 00:15:21,920

has been explored so this is the place

331

00:15:26,740 --> 00:15:23,360

we should be looking while everybody is

332

00:15:29,080 --> 00:15:26,750

looking up everything is being hidden

333

00:15:33,130 --> 00:15:29,090

beneath the Seas beneath the oceans and

334

00:15:35,680 --> 00:15:33,140

beneath our seas and I'm I've decided

335

00:15:37,840 --> 00:15:35,690

that I'm going to spill the beans on

336

00:15:39,310 --> 00:15:37,850

this I'm gonna get everybody looking in

337

00:15:41,680 --> 00:15:39,320

the right place because it's a it's

338

00:15:45,340 --> 00:15:41,690

about time we started thinking more

339

00:15:46,960 --> 00:15:45,350

about what's going on underwater and a
