

1

00:00:00,685 --> 00:00:06,685

Around the world, military pilots have reportedly seen UFOs.

2

00:00:07,685 --> 00:00:13,685

In some cases, the pilots have actually engaged them in air-to-air combat.

3

00:00:14,685 --> 00:00:18,685

Now, two military pilots have come forward.

4

00:00:19,685 --> 00:00:23,685

If it comes closer than four or five months, I'm going to jump out.

5

00:00:24,685 --> 00:00:28,685

He was expecting the object to explode, but it didn't happen.

6

00:00:28,685 --> 00:00:33,685

To actually engage a UFO for a period of 20 minutes, that's something extraordinary.

7

00:00:35,685 --> 00:00:45,685

In 1976, reports of an unknown object over Tehran sends an F-4 scrambling to confront and destroy it.

8

00:00:45,685 --> 00:00:48,685

It jumped from here to here, just like that.

9

00:00:49,685 --> 00:00:57,685

In 1980, a Peruvian fighter jet opens fire on an unknown object trespassing in military airspace.

10

00:00:58,685 --> 00:01:02,685

A commander gave him the order to take off and destroy the object.

11

00:01:03,685 --> 00:01:09,685

Do these UFOs execute maneuvers and capabilities that rule out terrestrial craft?

12

00:01:10,685 --> 00:01:13,685

Camera guy's Puka trying to do his business in the bag.

13

00:01:13,685 --> 00:01:22,685

The team, along with former military pilots, put two of the world's best UFO dogfight cases to the test, high above the Pacific.

14

00:01:23,685 --> 00:01:25,685

That's certainly no aircraft ever seen.

15

00:01:25,685 --> 00:01:31,685

This is case number 76102 UFO Dogfights.

16

00:01:33,685 --> 00:01:35,685

UFOs always got a chance.

17

00:01:36,685 --> 00:01:59,684

Dogfight is a term that really came out of World War I, World War II era.

18

00:01:59,684 --> 00:02:09,684

An important element of what I would consider a real dogfight is that both parties are trying to shoot down, kill the other one.

19

00:02:10,684 --> 00:02:18,684

When I hear that some of our best pilots, some of our best fighters have had a dogfight with a UFO, I say, I'm not exactly sure.

20

00:02:19,684 --> 00:02:27,684

I'm Bill Scott, former flight test engineer. I tested aircraft between 1974 and 1987.

21

00:02:28,684 --> 00:02:42,684

On February 21, 2008, the team was invited to March Air Force Base in Riverside, California to continue their investigations into reported dogfights between military aircraft and UFOs.

22

00:02:43,684 --> 00:02:46,684

They have uncovered some shocking new evidence.

23

00:02:47,684 --> 00:02:55,684

We're going to be talking about some of the most credible, phenomenal evidence in all of ufology, military dogfights with UFOs.

24

00:02:55,684 --> 00:03:01,684

We're going to be meeting with the pilot who actually engaged a UFO over Peru.

25

00:03:02,684 --> 00:03:11,684

And we're going to be talking about a case of Parviz Jufari who actually engaged the UFO over Iran, over Tehran in 1976.

26

00:03:12,684 --> 00:03:13,684

So these are two cases we're really excited about.

27

00:03:14,684 --> 00:03:17,684

This is all testimony based or do we have actual physical or hard evidence?

28

00:03:18,684 --> 00:03:20,684

I understand there are official government documents involved.

29

00:03:21,684 --> 00:03:23,684

If we have hard evidence, I'm very curious to take away.

30

00:03:23,684 --> 00:03:25,684

Get set to get your world rock. Let's go.

31

00:03:26,684 --> 00:03:27,684

All right.

32

00:03:32,684 --> 00:03:40,684

One of the most incredible stories you'll ever hear is the story of Parviz Jufari from the Iranian Air Force.

33

00:03:41,684 --> 00:03:46,684

It is approximately 11 p.m. on September 18, 1976.

34

00:03:47,684 --> 00:03:52,684

Citizens of Tehran, Iran are frightened by a large lighted orb circling above them.

35

00:03:53,684 --> 00:04:00,684

These are not the standard helicopters, military jets and civilian aircraft which frequent the Iranian skies.

36

00:04:01,684 --> 00:04:05,684

At this time, Iran is a major U.S. ally in the Middle East.

37

00:04:06,684 --> 00:04:11,684

This is still three years away from the Islamic Revolution and the Ayatollah Khomeini's rise to power.

38

00:04:11,684 --> 00:04:22,684

Because Iran shares a border with the Soviet Union, the U.S. military provided training and state-of-the-art F-4 Phantom fighters to the Iranian Air Force.

39

00:04:23,684 --> 00:04:25,684

The F-4E was what was used in the Jufari case.

40

00:04:26,684 --> 00:04:32,684

At that particular time, it was probably one of the best jets that could go out to do aerial engagements.

41

00:04:33,684 --> 00:04:41,684

Shown for the first time on American television, the following are scenes from an Iranian TV movie about this UFO encounter.

42

00:04:42,684 --> 00:04:51,684

It starred some of the actual military personnel involved in this event, including Parviz Jufari, and used the actual control tower transcripts.

43

00:04:52,684 --> 00:05:05,684

Numerous UFO reports continue to come into the control tower at Maribat Airport. These are not military or commercial aircraft.

44

00:05:06,684 --> 00:05:17,683

Hussein Pruhuzi is in charge of the air traffic control tower. He has heard enough and notifies the Iranian Air Force.

45

00:05:21,683 --> 00:05:33,683

At 11.31 p.m., they scramble an F-4 from Sharoki Air Base, located in Hamadon, 175 miles southwest of Tehran.

46

00:05:34,683 --> 00:05:39,683

The first pilot, Captain Aziz Khani, takes off to investigate the object.

47

00:05:40,683 --> 00:05:47,683

Ten minutes later, the base orders another F-4 to be scrambled, this one piloted by Parviz Jufari.

48

00:05:47,683 --> 00:05:57,683

Jufari was a major at that time, and he was vectored to intercept a strange light that was over Tehran.

49

00:05:58,683 --> 00:06:03,683

I'm Parviz Jufari, retired general from Iranian Air Force.

50

00:06:04,683 --> 00:06:09,683

Jufari estimates the object is as large as a Boeing 707 jet.

51

00:06:10,683 --> 00:06:18,683

I'll befall the light towards the Russian border when suddenly an object broke off from the light and headed towards Jufari's own plane.

52

00:06:24,683 --> 00:06:37,683

I turned toward it, and put it on my 12 o'clock. I got close to it, and you can't imagine all of a sudden it jumped from here to here, just like that.

53

00:06:39,683 --> 00:06:47,683

Based on his location, Jufari estimates the object has traveled almost 28 miles to his right in the blink of an eye.

54

00:06:48,683 --> 00:06:53,683

This movement was well beyond the capabilities of any man-made object.

55

00:06:54,683 --> 00:07:01,683

I asked the tower if they had any flight, they said no, they don't have any flight overhead.

56

00:07:02,683 --> 00:07:08,683

As Jufari continues his approach toward the object, he witnesses something incredible.

57

00:07:09,683 --> 00:07:13,683

Something like a moon came out of it.

58

00:07:14,683 --> 00:07:17,683

A second object came out of the first object.

59

00:07:17,683 --> 00:07:21,683

Another object below the horizon and started flying toward me.

60

00:07:22,683 --> 00:07:30,683

This second orb-like object descends from beneath the triangular lights and races toward Jufari's F-4.

61

00:07:31,683 --> 00:07:41,683

Although Jufari is traveling at supersonic speed, this incoming craft streaks by his jet and circles him, as if he's standing still.

62

00:07:42,683 --> 00:07:51,683

Now imagine I'm flying to a speed of close-up sound and something making circling around me.

63

00:07:52,683 --> 00:08:02,683

After circling Jufari's aircraft, the second orb now returns to the larger diamond-shaped craft, still hovering approximately 25 miles in the distance.

64

00:08:03,683 --> 00:08:15,683

For a moment, Jufari thinks he is out of danger, but to his astonishment, another orb has descended and is streaking directly toward his jet for the second time.

65

00:08:17,683 --> 00:08:20,683

Jufari now realizes he is under attack.

66

00:08:21,683 --> 00:08:26,683

He reaches for his instrument panel to arm and fire an A-9 heat-seeking missile.

67

00:08:27,683 --> 00:08:29,683

But what happens next shocks him.

68

00:08:29,683 --> 00:08:33,683

Green and red light should be both on so I could fire.

69

00:08:34,683 --> 00:08:40,682

When I looked back on the left side of the instrument panel, the vent panel was out and no light on it.

70

00:08:42,682 --> 00:08:50,682

Jufari believes that in the heat of combat with his UFO, it sent a massive pulse of electromagnetic energy toward his plane,

71

00:08:50,682 --> 00:08:59,682

temporarily disabling all of the onboard electronics, including the navigation equipment, avionics and weapons systems.

72

00:09:01,682 --> 00:09:09,682

With a disabled missile system and no way to defend against this unknown object, Jufari considers ditching his plane.

73

00:09:10,682 --> 00:09:15,682

I thought, if you come closer than four or five miles, I'm going to jump out.

74

00:09:15,682 --> 00:09:23,682

But before Jufari has to make that fateful decision, the object reverses direction and once again

returns to the larger crack.

75

00:09:24,682 --> 00:09:33,682

When it moved away from me, I could see the main object dead and went right underneath it and disappeared.

76

00:09:34,682 --> 00:09:40,682

Having just endured a harrowing engagement with multiple UFOs over the dark skies north of Tehran,

77

00:09:41,682 --> 00:09:47,682

Major Jufari decides it is no longer safe to continue tracking this mysterious diamond shaped object.

78

00:09:48,682 --> 00:09:57,682

He is granted permission to return to Tehran, but as he descends, he realizes a second chapter of his encounter is about to unfold.

79

00:09:58,682 --> 00:10:04,682

When I was on descent, again another of these strong shapes was chasing me.

80

00:10:05,682 --> 00:10:12,682

As Jufari descends for his approach to Maribot Airport, he sees another small object chasing from behind.

81

00:10:13,682 --> 00:10:19,682

On his final approach, he looks over his shoulder and witnesses the object descending toward the desert floor.

82

00:10:20,682 --> 00:10:25,682

I could see all of the sands on the ground. It was so bright, so bright.

83

00:10:26,682 --> 00:10:33,682

Jufari is diverted from landing and is ordered to identify the object that has appeared to touch down near the air base.

84

00:10:34,682 --> 00:10:43,682

According to both military and civilian eyewitnesses, the object is believed to have crash landed just outside of Shemaran, Iran.

85

00:10:44,682 --> 00:10:53,682

In a very fast speed toward the ground which I thought I will see a very, very big explosion, but it didn't happen.

86

00:10:53,682 --> 00:10:58,682

The object came right underground and stopped there.

87

00:10:59,682 --> 00:11:06,682

Upon landing at Maribot Airport, Parviz Jufari knew he would have to soon debrief his commanders about the night's events.

88

00:11:07,682 --> 00:11:12,682

What he didn't realize is that the Iranian military weren't the only ones interested in his encounter.

89

00:11:13,682 --> 00:11:19,682

One of the American colonel was listening to me, writing, taking notes.

90

00:11:20,682 --> 00:11:25,682

How deeply was the CIA involved in this case and its cover-up?

91

00:11:26,682 --> 00:11:33,682

When Jufari landed, there were American CIA agents and an Air Force colonel waiting for him to debrief him.

92

00:11:34,682 --> 00:11:40,682

Seen on television for the first time ever, the unclassified official military report.

93

00:11:41,682 --> 00:11:48,682

Why did this document go all the way to the White House and what was found the next day at the crash site?

94

00:11:50,682 --> 00:12:01,682

Over Iran in 1976, Major Parviz Jufari has a harrowing dogfight encounter with what he thinks is a UFO.

95

00:12:02,682 --> 00:12:07,681

Upon landing, he was debriefed by high-ranking Iranian military officials.

96

00:12:08,681 --> 00:12:11,681

There was also an American CIA agent present.

97

00:12:11,681 --> 00:12:23,681

The agent filed a report which is now unclassified that was distributed to the CIA, the Air Force, the Secretary of State, the Secretary of Defense, and the White House.

98

00:12:24,681 --> 00:12:28,681

It was titled, quote, Iran reported UFO sighting.

99

00:12:29,681 --> 00:12:36,681

According to the report, a UFO was seen about 11 p.m. on September 18, 1976.

100

00:12:37,681 --> 00:12:50,681

Besides Jufari's sighting, the control tower received, quote, four telephone calls from citizens living in the Shemaran area of Tehran, saying they had seen strange objects in the sky.

101

00:12:51,681 --> 00:12:59,681

Some reported a bird-like object, while others reported a helicopter. There were no helicopters airborne at that time.

102

00:13:00,681 --> 00:13:15,681

The report details and confirms Jufari's sighting, including the loss of his avionics, quote, as the F-4 approached a range of 25 nautical miles, he lost all instrumentation and communications.

103

00:13:16,681 --> 00:13:28,681

The report further confirms that two objects were seen, one as big as, quote, a 707 tanker, and again, quote, the second object headed straight toward the F-4.

104

00:13:29,681 --> 00:13:40,681

At a very fast rate of speed, and then, quote, the pilot attempted to fire an AIM-9 missile at the object, but at that instant, his weapons control panel went off.

105

00:13:41,681 --> 00:13:47,681

And then, quote, initiated a turn and negative G-dive to get away.

106

00:13:48,681 --> 00:14:03,681

In a very curious ending to this event, the Department of Defense report says that the next day, the crew was taken by helicopter to an area where the object was seen to crash land by local residents.

107

00:14:04,681 --> 00:14:10,681

According to the report, the landing area is, quote, being checked for possible radiation.

108

00:14:11,681 --> 00:14:16,681

Further information about this case either never came or remains classified.

109

00:14:17,681 --> 00:14:21,681

I saw it, so I have to believe it.

110

00:14:24,681 --> 00:14:34,681

Impressed with Jufari's story and the detailed Department of Defense report, the team wants to dissect and test the three most critical elements of this case.

111

00:14:34,681 --> 00:14:40,681

First, the object appears to jump over 25 miles in an instant.

112

00:14:41,681 --> 00:14:48,681

Second, the object appears to release an orb that approaches Jufari at a speed faster than anything man made.

113

00:14:49,681 --> 00:14:58,681

And third, what would it take to shut down all of the electronics on one of the world's most advanced fighter jets at the time, the F-4E Phantom?

114

00:14:59,681 --> 00:15:14,681

The team, along with their flight consultant, former Air Force Flight Test Engineer Bill Scott, feel the very best way to test and understand this event is through a practical demonstration using actual fighter planes.

115

00:15:15,681 --> 00:15:23,681

The team is at Air Combat USA in Orange County, California, the top aerial dogfight group in America.

116

00:15:23,681 --> 00:15:29,681

Their staff is made up of former military pilots with years of military flight experience.

117

00:15:30,681 --> 00:15:32,681

My name is Ben Clarks, XUS Air Force.

118

00:15:33,680 --> 00:15:36,680

I'm Michael Fompingo, of course I'm Baron, and I was a captain in the German Air Force.

119

00:15:40,680 --> 00:15:48,680

You're flying the C.I. Marchetti SF-260. It's an Italian light attack aircraft capable of dropping bombs, shooting rockets and machine gun fire.

120

00:15:49,680 --> 00:16:00,680

The aircraft is rated at plus six, minus three Gs, goes about 270 miles per hour, and it flies just like a light attack fighter. It's the real deal.

121

00:16:01,680 --> 00:16:18,680

The pilots, along with Bill Scott, have calculated that recreating this event at 25% scale would give the best results with this airplane, meaning they will fly at 25% of the speed and cover 25% of the distance.

122

00:16:19,680 --> 00:16:32,680

We chose to use regular airplanes to try to duplicate some of these engagements, because I think it really brings home to people the kind of dynamics involved in some of these engagements.

123

00:16:33,680 --> 00:16:42,680

Yes, we're using different types of aircraft. There are a lot of things we could not do with the Machis, but it's very illustrative, I think.

124

00:16:43,680 --> 00:16:54,680

Today we want to recreate the events. We want to go out with two airplanes, and one of us will simulate the unadulterated flying object.

125

00:16:55,680 --> 00:17:00,680

We don't want to get within 500 feet. That's our safety distance. In case of an emergency, we will have parachutes.

126

00:17:01,680 --> 00:17:06,680

We'll say, bailout, bailout, bailout. That's our commander. We all are jettiers in the canopy. Okay, let's go fly.

127

00:17:07,680 --> 00:17:08,680

Alright.

128

00:17:13,680 --> 00:17:15,680

We're going to take off.

129

00:17:22,680 --> 00:17:26,680

We're going to take off. Good afternoon. Command 1, flight of 3, we're going to go back to the combat area, ready to taxi.

130

00:17:29,680 --> 00:17:39,680

The pilots estimate it will take 13 minutes to reach the FAA designated dogfight zone, high over the Pacific Ocean, between Long Beach and Catalina Island.

131

00:17:43,680 --> 00:17:45,680

The dogfight begins.

132

00:17:47,680 --> 00:17:54,680

The team is demonstrating the first key element of this case, that the UFO moved miles in an instant.

133

00:17:55,680 --> 00:18:01,680

Ted and Baron, as the UFO, make a very fast and exaggerated turn at maximum speed.

134

00:18:02,680 --> 00:18:05,680

It jumped from here to here, just like that.

135

00:18:06,680 --> 00:18:11,680

Bill Scott and Joker attempt to follow from a slow and gliding start.

136

00:18:13,680 --> 00:18:17,680

Roger, on this one we've got to simulate a right turn, trying to track the target.

137

00:18:18,680 --> 00:18:23,680

And this is simulating the target jumping 10 degrees in a very short amount of time.

138

00:18:25,680 --> 00:18:26,680

There are another leak.

139

00:18:29,680 --> 00:18:33,680

Alright, Bill, looks like we've got target acquisition about 9.30, 10 o'clock.

140

00:18:36,680 --> 00:18:41,680

Well, all of a sudden he jumped over to 10.30 in the space of about a split second.

141

00:18:42,680 --> 00:18:44,680

Yeah, like 10 degrees jumps in a time, it looks like.

142

00:18:45,680 --> 00:18:47,680

Alright, now he's over there at about 11 o'clock.

143

00:18:48,680 --> 00:18:55,680

We're in the right turn trying to track him here, every time he gets close enough, he jumps out about another 10 degrees.

144

00:18:56,680 --> 00:18:59,680

At about 25 miles up, that's about a 3 mile change every second or so.

145

00:19:00,679 --> 00:19:01,679

Yeah, that's pretty dramatic.

146

00:19:01,679 --> 00:19:07,679

It's just instantaneous acceleration, it's just a split second and he's another 10 degrees over there.

147

00:19:08,679 --> 00:19:09,679

Now he's at about 11 o'clock.

148

00:19:10,679 --> 00:19:18,679

Even at this reduced scale, the movements Ted and Barron's plane execute, makes it nearly impossible for Joker and Bill to follow.

149

00:19:19,679 --> 00:19:24,679

Imagine this scenario, when both craft are traveling at over 1,000 miles per hour.

150

00:19:25,679 --> 00:19:27,679

That's certainly no aircraft ever seen.

151

00:19:28,679 --> 00:19:37,679

The team's second simulation will demonstrate the incredible speed at which the secondary object was moving, as it raced directly at Jaffari's F-4 Phantom.

152

00:19:38,679 --> 00:19:45,679

Although the single-engine Marquetti aircraft being flown today are nowhere near the F-4 Phantom's capabilities,

153

00:19:46,679 --> 00:19:56,679

they will be able to demonstrate the sense of speed and closure rate that Jaffari experienced as the secondary UFO approached and circled his supersonic fighter.

154

00:19:57,679 --> 00:20:00,679

Check about 90 right then Barron will set up another pass.

155

00:20:01,679 --> 00:20:02,679

Yeah, Barron is coming in.

156

00:20:03,679 --> 00:20:04,679

Roger.

157

00:20:06,679 --> 00:20:08,679

Got a whole lot of margin for error there.

158

00:20:09,679 --> 00:20:18,679

This is what it looks like when two objects, both traveling at 160 miles per hour, pass in opposite

directions at a distance of 50 feet.

159

00:20:19,679 --> 00:20:20,679

It is just a blur.

160

00:20:21,679 --> 00:20:32,679

Now imagine this scenario at night, and both Jaffari and the UFO are traveling toward each other at a combined speed of over 2,000 miles per hour.

161

00:20:34,679 --> 00:20:39,679

The team repeats this maneuver, this time even faster and even closer.

162

00:20:51,679 --> 00:20:59,679

The day after the event, September 19, 1976, the crash site was reportedly searched and tested for radiation.

163

00:21:00,679 --> 00:21:04,679

But according to Jaffari, nothing was found, despite the numerous reports.

164

00:21:06,679 --> 00:21:07,679

Okay, let's go.

165

00:21:07,679 --> 00:21:23,679

So what was the experience? Here you are, you are combining each other at 160 miles an hour?

166

00:21:24,679 --> 00:21:28,679

Yeah, about 130 knots, and they were doing about 130 knots closing, that's about 320.

167

00:21:29,679 --> 00:21:30,679

It happens in a blink of an eye.

168

00:21:30,679 --> 00:21:39,679

You know, they're a tiny black speck way off in the distance, and a few seconds later they're blowing right by you, 300 plus miles an hour.

169

00:21:41,679 --> 00:21:50,679

He's flying that way, and suddenly when he goes to take a defensive position, because the object makes a hostile move towards him, his missile panel locks up.

170

00:21:51,679 --> 00:21:56,679

Well, first of all, it's a pilot. If your intra-panel goes down, you are in deep shit.

171

00:21:56,679 --> 00:22:01,679

There's no way it's meant to happen. These systems are built, they've evolved, they're the most robust engineering that we have.

172

00:22:02,679 --> 00:22:09,679

You know, there's equipment that's used for war, it's got to be incredibly robust, it's got to last up through, you know, bullets going through it.

173

00:22:10,679 --> 00:22:17,679

To have your entire panel go down is stunning, and it's not just the pneumatic system, it's not just the electrical system, it was all the systems.

174

00:22:18,679 --> 00:22:21,679

And like, I can't even imagine an explanation for how that would happen physically.

175

00:22:26,679 --> 00:22:37,678

The biggest mystery of this case remains. It's a fact that Jaffari lost all instrumentation and use of his weapons systems through some electrical anomaly.

176

00:22:38,678 --> 00:22:42,678

So there was something affecting the comm panel and the missile system, we know for sure.

177

00:22:43,678 --> 00:22:49,678

Was this caused by the UFO? The team puts Jaffari's key theory to the test.

178

00:22:57,678 --> 00:23:08,678

In the Iranian case, when the F-4 ran out there, the pilot, I'm sure, was very confident he had one of the top fighters of the world, go check it out.

179

00:23:09,678 --> 00:23:14,678

And then when something came at him very quickly, you know, he immediately saw it as a threat.

180

00:23:15,678 --> 00:23:22,678

So he, you know, armed an AIM-9 missile, master armed, went to fire, everything locked up on him.

181

00:23:23,678 --> 00:23:31,678

The team heads to experiments producer John Tindall's lab to participate in an EMP demonstration.

182

00:23:32,678 --> 00:23:46,678

Tindall's going to show us what might have happened to the AIM-9 weapons panel on Jaffari's F-4 Phantom jet when he tried to lock his missile on to defend himself against what he believed to be an attack by a UFO.

183

00:23:47,678 --> 00:23:56,678

My demonstration today is basically to recreate an EMP event such as that might have been experienced in the certain Iranian case that we're investigating.

184

00:23:57,678 --> 00:24:04,678

This UFO seemed to fire some sort of a pulse at the fighter jet and it knocked out a lot of the electronics.

185

00:24:06,678 --> 00:24:11,678

So basically I have an EMP generator, we're going to kind of investigate what was going on in the Iranian case.

186

00:24:11,678 --> 00:24:18,678

His instrumentation all went down, weapons locked, and somehow this thing was able to basically control his airplane and prevent him from firing.

187

00:24:19,678 --> 00:24:29,678

What we have here is basically a modified test of the coil and what that means is we're going to take a house current at 110 volts, take it up to 15,000 volts.

188

00:24:29,678 --> 00:24:37,678

The charge is building up within the capacitors until it reaches a threshold and then bam, it is going into this coil and inducing current up into this coil.

189

00:24:38,678 --> 00:24:51,678

If the test is successful, John will be able to knock out a standard consumer computer without fully disabling it, illustrating that a similar event could happen on a much larger scale.

190

00:24:52,678 --> 00:24:59,678

One of the things about onboard computers and fly by wire airplanes is that they usually have a built-in protection, which is the airframe itself.

191

00:24:59,678 --> 00:25:09,678

We're going to set up a flight simulator here and show how the effects of this EMP burst will disrupt flight computers or any kind of computer for that matter.

192

00:25:09,678 --> 00:25:12,678

Whoa, all right, level it off baby.

193

00:25:14,678 --> 00:25:15,678

Bring the music in.

194

00:25:16,678 --> 00:25:22,678

So we can say at this point we're like about to say at the 25 mile point, I think you want to come over next to me.

195

00:25:22,678 --> 00:25:23,678

Okay.

196

00:25:23,678 --> 00:25:24,678

Lights.

197

00:25:24,678 --> 00:25:25,678

All right.

198

00:25:25,678 --> 00:25:26,678

Are you ready?

199

00:25:26,678 --> 00:25:29,678

In three, two, one.

200

00:25:37,678 --> 00:25:43,678

15,000 volts of low amperage power was able to shut down the computer.

201

00:25:43,678 --> 00:25:48,678

But will it turn back on after such a dramatic EMP event?

202

00:25:48,678 --> 00:25:49,678

Okay, we're disarmed.

203

00:25:49,678 --> 00:25:51,678

Jeff, see if you can reboot the computer.

204

00:25:51,678 --> 00:25:53,678

Here's the attempt.

205

00:25:53,678 --> 00:25:57,677

Hey, wow.

206

00:25:57,677 --> 00:26:00,677

John, you're getting some computer operation there.

207

00:26:00,677 --> 00:26:01,677

Yep, it came back.

208

00:26:01,677 --> 00:26:03,677

CPU did not die.

209

00:26:05,677 --> 00:26:11,677

Like Jeff Farry's electronics, the computer returns to normal at the end of the pulse.

210

00:26:12,677 --> 00:26:22,677

John, you've demonstrated that you're able to render a panel on that computer inoperative in much the same way that an electron beam or whatever beam that UFO fired will be.

211

00:26:23,677 --> 00:26:27,677

You've rendered Jeff Farry's controls inoperable on that night in 1976.

212

00:26:27,677 --> 00:26:36,677

If we're talking about an extraterrestrial civilization visiting us, they may have technology that's far superior to what we have in the lab today.

213

00:26:36,677 --> 00:26:40,677

So even though this was a success, the scale is the big surprise.

214

00:26:40,677 --> 00:26:50,677

Because to get these results, you know, from something 36 inches away at 25 miles away is just an unbelievable amount of power.

215

00:26:50,677 --> 00:26:56,677

And especially since it's actually has to penetrate a metal cage, a metal airframe, to do its damage.

216

00:26:59,677 --> 00:27:07,677

Although Jeff Farry's encounter was witnessed by many, and he claimed the Iranian military is interested in the UFO phenomenon,

217

00:27:07,677 --> 00:27:14,677

just three years later, the Iranian Revolution created a closed and secret society within Iran.

218

00:27:14,677 --> 00:27:18,677

Reports of UFOs were no longer coming to the West.

219

00:27:19,677 --> 00:27:33,677

I haven't seen anything like this before, and what I think and what I believe and everybody else believe that that was an unknown foreign object, a UFO.

220

00:27:35,677 --> 00:27:46,677

After putting the three main components of Jeff Farry's case to the test, the team doubts that a man-made flying object could mimic the movements that Jeff Farry saw that night.

221

00:27:46,677 --> 00:27:56,677

And while the sudden loss of the F-4's computer system can be explained by the intense electromagnetic pulse, the real facts remain elusive.

222

00:27:57,677 --> 00:28:04,677

But four years later, a similar and even more dramatic UFO dogfight occurs over Peru.

223

00:28:04,677 --> 00:28:09,677

But this time, the pilot was able to attack.

224

00:28:10,677 --> 00:28:22,677

On February 18, 2008, Oscar Santa Maria arrives at Los Angeles International Airport from Lima, Peru.

225

00:28:22,677 --> 00:28:35,677

Santa Maria is in Los Angeles to work with the UFO hunters to help prove the facts and events around his extraordinary case of a UFO dogfight over Peru in 1980.

226

00:28:35,677 --> 00:28:45,677

I am Oscar Santa Maria Huertas, a pilot for the Peruvian Air Force, right now in retirement.

227

00:28:47,677 --> 00:29:03,677

On April 11, 1980, at 7.15 in the morning, at the airbase of La Jolla in Peru,

228

00:29:03,677 --> 00:29:14,677

1,800 military people in charge that day, they observed at the end of the runway an object that looked like a balloon

229

00:29:15,677 --> 00:29:24,676

that didn't have authorization to fly in the area, and they thought it was an spy.

230

00:29:25,676 --> 00:29:33,676

A commander gave him the order to take off and destroy the object right away.

231

00:29:34,676 --> 00:29:40,676

Santa Maria fires 64 rounds from his 30mm cannon directly at the object.

232

00:29:40,676 --> 00:29:50,676

But to his amazement, the bullet seemed to pass right through the object and would have clearly destroyed anything in their path, including a weather balloon.

233

00:29:50,676 --> 00:30:01,676

He was expecting the object to explode, but it didn't happen and the object started to send it.

234

00:30:02,676 --> 00:30:06,676

He proceeded to go after the object.

235

00:30:07,676 --> 00:30:12,676

Santa Maria pursues and notices the unidentified object is doing something else.

236

00:30:13,676 --> 00:30:20,676

Every time he gets within range, the object climbs, executing maneuvers worthy of top gun.

237

00:30:21,676 --> 00:30:29,676

However, the most harrowing part of his story is yet to come, and it involves the U.S. military.

238

00:30:32,676 --> 00:30:38,676

I just recently met Oscar Santa Maria and I listened to his story, and I have to wonder,

239

00:30:38,676 --> 00:30:45,676

why would this military commander come out with this UFO story unless he was really really affected by this experience?

240

00:30:45,676 --> 00:30:49,676

I believe he saw something that really shook him and that stayed with him to this day.

241

00:30:51,676 --> 00:30:59,676

Due to the complexity and shocking nature of this event, Oscar Santa Maria has always encountered skeptics who simply cannot believe

242

00:30:59,676 --> 00:31:08,676

that both he and this object made such extraordinary maneuvers during his dogfight with what he thinks was a real UFO.

243

00:31:09,676 --> 00:31:18,676

The team wants to determine if the Santa Maria UFO had maneuvering capabilities that were greater than anything that existed at the time.

244

00:31:19,676 --> 00:31:26,676

Since they don't have access to a Sequoy 22 jet, they will use the next best thing available.

245

00:31:27,676 --> 00:31:32,676

They return to Air Combat USA to take this case to the sky.

246

00:31:33,676 --> 00:31:39,676

The team has identified three key elements of this case that they want to test and demonstrate.

247

00:31:40,676 --> 00:31:49,676

The fact that Santa Maria locked onto and fired at the UFO with no effect is incredibly impressive to the team, but difficult to test.

248

00:31:49,676 --> 00:31:55,676

However, two key aerial maneuvers can be analyzed with some accuracy in the air.

249

00:31:57,676 --> 00:32:01,676

First, the UFO came to a dead stop in midair.

250

00:32:02,676 --> 00:32:08,676

Second, from this dead stop, the UFO began a steep fast climb.

251

00:32:09,676 --> 00:32:14,676

In order to give the team an accurate depiction of the events of that night,

252

00:32:14,676 --> 00:32:24,676

Experiments producer John Tyndall has devised a laser tracking tool with two lasers, one red, one green, both controlled by joysticks.

253

00:32:25,676 --> 00:32:29,676

The green laser represents the flight path of the UFO.

254

00:32:29,676 --> 00:32:32,676

The red laser represents the flight path of the jet.

255

00:32:33,676 --> 00:32:37,676

Together, they give a scale representation of the event.

256

00:32:39,676 --> 00:32:55,675

What I have here is a top-down view using these laser pointers as a scale model of the movement of any of these UFOs in the aircraft.

257

00:32:55,675 --> 00:33:01,675

I can scale the movement to match the speed of the scale on the map.

258

00:33:01,675 --> 00:33:03,675

Where was your airfield?

259

00:33:04,675 --> 00:33:12,675

The red laser is indicating your aircraft and that is traveling at around a thousand miles an hour.

260

00:33:12,675 --> 00:33:18,675

Santa Maria, using the red laser, shows his position at the point of the first attack.

261

00:33:18,675 --> 00:33:22,675

He got closer to the 900-meter firing position.

262

00:33:22,675 --> 00:33:26,675

He fired 64 rounds.

263

00:33:26,675 --> 00:33:31,675

He knows that he hit the object but nothing happened, it exploded.

264

00:33:31,675 --> 00:33:35,675

The object started moving away at a fast pace.

265

00:33:35,675 --> 00:33:40,675

Yes, as he moved away, he climbed at the same time.

266

00:33:40,675 --> 00:33:47,675

The object stopped all of a sudden, he almost hit it, so he went around his right to take a firing position.

267

00:33:47,675 --> 00:33:51,675

As he was getting close to the 900-meter range, he activated the post-conveyor.

268

00:33:51,675 --> 00:33:52,675

Is he after burn?

269

00:33:52,675 --> 00:33:53,675

After burn and post-conveyor.

270

00:33:53,675 --> 00:33:57,675

Yes, all of a sudden, the object climbed once again.

271

00:33:57,675 --> 00:34:06,675

The most amazing part of this story is that once he goes to after burners, the UFO makes an evasive move straight up.

272

00:34:06,675 --> 00:34:14,675

And Santa Maria yanks back and starts to fly up as well, now traveling at over 1,000 miles per hour.

273

00:34:14,675 --> 00:34:18,675

But incredibly, the UFO stops in mid-air.

274

00:34:18,675 --> 00:34:26,675

And after he passes, the UFO follows him, accelerating from a dead stop.

275

00:34:26,675 --> 00:34:29,675

An impossible maneuver.

276

00:34:29,675 --> 00:34:35,675

So he was doing the supersonic speed and he passed the object, the object then started climbing next to him.

277

00:34:35,675 --> 00:34:38,675

They're both climbing roughly vertically, then what?

278

00:34:38,675 --> 00:34:43,675

At 19,000 meters, he couldn't climb no more and he was practically floating.

279

00:34:43,675 --> 00:34:52,675

At 19,000 meters, just over 62,000 feet, Santa Maria began to lose control of his plane.

280

00:34:52,675 --> 00:35:00,675

The Su-22 has a ceiling of 60,000 feet and could no longer operate at this altitude.

281

00:35:00,675 --> 00:35:05,675

Without a capacity to attack one last time, he started getting back to the base.

282

00:35:05,675 --> 00:35:17,675

After briefing the pilots on his specific flight plan and maneuvers, Baron, Joker, Ted and Bill Scott prepare for takeoff to demonstrate the details of this strange engagement.

283

00:35:22,675 --> 00:35:40,675

Music

284

00:35:40,675 --> 00:35:48,675

I gotta keep your eyes peeled out here. It's not exclusively ours, the airspace.

285

00:35:48,675 --> 00:35:52,675

Now, the UFO hunters have fighters in the air.

286

00:35:52,675 --> 00:35:55,675

Come in for the attack. Gun, gun, gun.

287

00:35:55,675 --> 00:35:59,675

And are looking to prove this case once and for all.

288

00:35:59,675 --> 00:36:07,675

Like the Jafari event, Oscar Santa Maria's case was discovered by the Department of Defense and Joint Chiefs of Staff,

289

00:36:07,675 --> 00:36:15,674

and a full report was issued, which landed on some of the most powerful desks in Washington, D.C.

290

00:36:15,674 --> 00:36:20,674

Music

291

00:36:20,674 --> 00:36:33,674

Pilots have just taken off in two fighter planes to help recreate and prove Oscar Santa Maria's reported UFO dogfight encounter over Peru in 1980.

292

00:36:33,674 --> 00:36:40,674

The pilots are now approximately seven minutes away from their dogfight location.

293

00:36:40,674 --> 00:36:45,674

I gotta keep your eyes peeled out here. It's not exclusively ours, the airspace.

294

00:36:45,674 --> 00:36:57,674

Recently declassified military documents show that a detailed report was actually made about this

event, much to Santa Maria's surprise.

295

00:36:57,674 --> 00:37:09,674

After your flight, the American Department of Defense just had your whole statement in a Defense Department report, and I'm wondering, how do you think they got it?

296

00:37:09,674 --> 00:37:14,674

The intelligence community between the states exchange information.

297

00:37:14,674 --> 00:37:15,674

Oh, really?

298

00:37:15,674 --> 00:37:22,674

It's a close community between countries and the air forces, so they communicate with each other and they let each other know.

299

00:37:22,674 --> 00:37:29,674

While the U.S. government stopped investigating UFOs with the closure of Project Gloopbook in 1970,

300

00:37:29,674 --> 00:37:36,674

this Santa Maria report, released by the Joint Chiefs of Staff, shows something else.

301

00:37:36,674 --> 00:37:40,674

It is presented here for the first time on television.

302

00:37:40,674 --> 00:37:48,674

This document was distributed to the Secretary of Defense, Secretary of State, the NSA, and the CIA.

303

00:37:48,674 --> 00:37:53,674

The title of the document is, quote, UFO, cited in Peru.

304

00:37:53,674 --> 00:38:01,674

The document clearly states, quote, source is officer in the Peruvian Air Force who observed the event.

305

00:38:01,674 --> 00:38:08,674

The source reported, quote, a UFO was spotted near a Peruvian Air Force base in southern Peru,

306

00:38:08,674 --> 00:38:14,674

and the FAP tried to intercept and destroy the UFO, but without success.

307

00:38:14,674 --> 00:38:20,674

This event reached the highest levels of the United States Department of Defense,

308

00:38:20,674 --> 00:38:27,674

and remember, Peru was not an American client at the time, it was a Soviet client, if only to work.

309

00:38:27,674 --> 00:38:31,674

So it reached the highest levels of our defense department, how?

310

00:38:33,674 --> 00:38:38,674

Oscar Santa Maria first received a copy of this document in 2001,

311

00:38:38,674 --> 00:38:44,674

when the Peruvian Air Force opened up the country's first official UFO investigation.

312

00:38:44,674 --> 00:38:55,674

After studying dozens of cases, the Peruvian Air Force found this to be the most credible, unresolved UFO case in the country's history.

313

00:38:55,674 --> 00:39:01,674

There is no word on what the official U.S. government's response was to this document.

314

00:39:04,674 --> 00:39:06,674

We're in the area, we're ready.

315

00:39:06,674 --> 00:39:08,674

At Doka U.S. Police.

316

00:39:08,674 --> 00:39:14,674

The fighter planes have reached their location. The dogfight is about to begin.

317

00:39:14,674 --> 00:39:21,674

Former U.S. Air Force Flight Test Engineer Bill Scott sits in the Oscar Santa Maria plane,

318

00:39:21,674 --> 00:39:28,674

and UFO Hunter Ted Ackworth will be in the UFO plane, attempting to maneuver like the UFO.

319

00:39:28,674 --> 00:39:38,674

Just like Santa Maria, they line up in firing position. Santa Maria said he fired on the UFO with

no effect.

320

00:39:38,674 --> 00:39:46,673

Next, Santa Maria said the UFO came to a complete stop. It's something no known plane can do,

321

00:39:46,673 --> 00:39:50,673

because the incredible G-forces would kill the pilot.

322

00:39:50,673 --> 00:39:55,673

Guns, guns, guns, we're going. Ready, ready. Here comes the break.

323

00:39:57,673 --> 00:40:06,673

As the UFO plane hits the brakes, the Santa Maria plane flies right by, having to bank in order to avoid collision.

324

00:40:06,673 --> 00:40:14,673

Even in this prop plane, the G-forces of slowing down so much have a rough effect on the cameraman in the chase plane.

325

00:40:15,673 --> 00:40:19,673

Camera guy's puking, trying to do his business with the bag.

326

00:40:19,673 --> 00:40:23,673

The team repeats this maneuver three times.

327

00:40:29,673 --> 00:40:34,673

In the most harrowing maneuver possibly ever attempted by a Peruvian Air Force pilot,

328

00:40:34,673 --> 00:40:42,673

Santa Maria reached the operating ceiling of his aircraft, 62,000 feet, while being pursued by the UFO.

329

00:40:42,673 --> 00:40:45,673

His life was on the line.

330

00:41:03,673 --> 00:41:07,673

Joker, in the Santa Maria plane, swoops down from above.

331

00:41:07,673 --> 00:41:14,673

The UFO evades, and Joker dives into a J pattern, climbing to nearly vertical.

332

00:41:14,673 --> 00:41:19,673

The UFO follows behind, attempting to climb vertically as well.

333

00:41:26,673 --> 00:41:33,673

What they have just shown is that there is no way a man-made craft could accelerate from a standstill

334

00:41:33,673 --> 00:41:38,673

to over 1,000 miles per hour at that altitude in an instant.

335

00:41:38,673 --> 00:41:45,673

It further shows that one of the world's best fighter jets at the time could have never caught up to it.

336

00:41:45,673 --> 00:41:50,673

Camera guy's puking, trying to do his business with the bag.

337

00:42:16,673 --> 00:42:20,673

Sounded like the UFO was just playing with him.

338

00:42:20,673 --> 00:42:26,673

Being inside the aircraft and attempting to copy or mimic those maneuvers,

339

00:42:26,673 --> 00:42:33,673

you just realize there's no way any man-made vehicle could have performed those maneuvers that the UFO did.

340

00:42:33,673 --> 00:42:39,673

Either the colonel is lying, or we had some sort of object that is totally not man-made,

341

00:42:39,673 --> 00:42:45,673

but exceeded all known flight performance characteristics of anything that we have, trustingly.

342

00:42:47,673 --> 00:42:52,673

The team reconvenes in the map room to discuss the results of their test flights.

343

00:42:52,673 --> 00:42:56,673

The planes we just flew, there's no way they can climb vertically.

344

00:42:56,673 --> 00:42:59,673

And is there a need for a standing start to that speed?

345

00:42:59,673 --> 00:43:04,673

How many planes are there out there that could climb supersonically vertically?

346

00:43:04,673 --> 00:43:08,673

There's a lot of them that can't, anything with a better than one-to-one thrust ratio.

347

00:43:08,673 --> 00:43:12,672

However, you don't start from a dead start, you have to get a run like he did.

348

00:43:12,672 --> 00:43:15,672

It's the speed and the maneuverability.

349

00:43:15,672 --> 00:43:21,672

When you hear the story of this thing stops, goes vertical, goes to more than supersonic instantly.

350

00:43:21,672 --> 00:43:26,672

Nothing we can do, nothing we can do to match that.

351

00:43:26,672 --> 00:43:33,672

To actually engage a UFO for a period of 20 minutes, that's something extraordinary.

352

00:43:33,672 --> 00:43:37,672

You know, you might see something for a moment or two and not be able to identify it,

353

00:43:37,672 --> 00:43:43,672

but be able to engage it for 20, 22 minutes, that's a totally credible situation.

354

00:43:45,672 --> 00:43:52,672

Two cases, two credible pilots, two sets of official military unclassified documents

355

00:43:52,672 --> 00:43:57,672

that show these cases went to the highest level of the government.

356

00:43:57,672 --> 00:44:04,672

And what about the other cases of UFO dogfights that have not yet been reported?

357

00:44:04,672 --> 00:44:12,672

Two pilots in two different parts of the world have engaged objects with extraordinary maneuverability,

358

00:44:12,672 --> 00:44:14,672

but it's not clear what.

359

00:44:14,672 --> 00:44:17,672

The team's work continues.
