

1

00:00:00,093 --> 00:00:09,876

We've seen photos and videos of UFOs, but now we may even have more tangible evidence

2

00:00:09,876 --> 00:00:10,876

that they're here.

3

00:00:10,876 --> 00:00:13,817

There's this thing you hear all the time that there is no evidence.

4

00:00:13,817 --> 00:00:16,357

There's tons of evidence.

5

00:00:16,357 --> 00:00:21,239

So there's a wave of UFOs over Pennsylvania and a strange residue reported coming down

6

00:00:21,239 --> 00:00:23,279

from one of the craft.

7

00:00:23,279 --> 00:00:28,881

It started opening up into a V and just dropped this metallic stuff.

8

00:00:28,881 --> 00:00:34,762

In Poland there was a UFO sighting and supposedly some weird glowing rocks were left behind.

9

00:00:34,762 --> 00:00:39,404

The object is an aluminum alloy of unknown origin.

10

00:00:39,404 --> 00:00:45,245

And a metallic object reportedly ejected from a UFO.

11

00:00:45,245 --> 00:00:49,526

So am I seeing the soil itself begin to glow now?

12

00:00:49,526 --> 00:00:55,448

Could this trace evidence be proof that aliens are now monitoring planet Earth?

13

00:00:55,448 --> 00:00:58,169

This is something that I've been looking for all my life.

14

00:00:58,169 --> 00:01:02,170

This is definitely action terrestrial.

15

00:01:02,170 --> 00:01:25,516

This is case number 85004, UFO Relics.

16

00:01:25,516 --> 00:01:34,358

One of the most intriguing aspects of ufology tantalizing is the aspect of trace evidence.

17

00:01:34,358 --> 00:01:39,239

Trace evidence which forms the basis for most modern police investigations for forensic

18

00:01:39,239 --> 00:01:40,720

lab work.

19

00:01:40,720 --> 00:01:43,921

Entire cases are broken on what trace evidence there is.

20

00:01:43,921 --> 00:01:48,202

We're going to apply that to ufology and to UFO cases.

21

00:01:48,202 --> 00:01:52,843

In most of the cases that we've investigated, most of the evidence has been photos, videos

22

00:01:52,843 --> 00:01:54,844

and eyewitness testimonies.

23

00:01:54,844 --> 00:01:58,845

It's actually very rare to have something that you can analyze.

24

00:01:58,845 --> 00:02:01,846

Maybe we can get an understanding of what we're actually dealing with, what the UFO

25

00:02:01,846 --> 00:02:06,167

phenomenon is.

26

00:02:06,167 --> 00:02:09,127

Before I get too excited, I just want some confirmation here.

27

00:02:09,127 --> 00:02:13,649

Do we actually have something physical from somebody to analyze or is this something somebody

28

00:02:13,649 --> 00:02:16,289

saw or an object that somebody heard about?

29

00:02:16,289 --> 00:02:23,331

We are actually on our way to meet a resident in Bucks County, Pennsylvania who saw an object

30

00:02:23,331 --> 00:02:29,613

drop some kind of a flake type residue, snowflake type residue on a tree.

31

00:02:29,613 --> 00:02:34,294

This was analyzed and we are going to talk about the results of that chemical analysis

32

00:02:34,294 --> 00:02:37,855

of that material and see that analysis first hand.

33

00:02:37,855 --> 00:02:43,977

If we complete an analysis on an object and the conclusion is that this object is extraterrestrial

34

00:02:43,977 --> 00:02:46,137

and it's manufactured.

35

00:02:46,137 --> 00:02:48,818

That to me stands a test of science.

36

00:02:48,818 --> 00:02:58,981

That is the proof that I've been looking for this whole time.

37

00:02:58,981 --> 00:03:04,742

We're heading out to Bucks County, Pennsylvania where in 2008 the people in this area experienced

38

00:03:04,742 --> 00:03:08,503

a large surge in UFO sightings.

39

00:03:08,503 --> 00:03:13,625

Although many witnesses have seen these unidentified craft in the skies over the last year, we

40

00:03:13,625 --> 00:03:19,826

hear that in one case the UFO actually left some clues behind that may prove something

41

00:03:19,826 --> 00:03:21,347

anomalous occurred.

42

00:03:21,347 --> 00:03:26,188

In the ufology we call this trace evidence.

43

00:03:26,188 --> 00:03:31,870

And although it's very rare, it could be the smoking gun evidence that we need to solve

44

00:03:31,870 --> 00:03:36,391

this huge mystery.

45

00:03:36,391 --> 00:03:40,472

I've saw three different sightings of this craft.

46

00:03:40,472 --> 00:03:44,233

It was probably about 30 or 40 feet wide.

47

00:03:44,233 --> 00:03:49,954

It almost looked like you took a magnifying glass and put it over the sky and kind of

48

00:03:49,954 --> 00:03:51,835

moved it along.

49

00:03:51,835 --> 00:03:53,355

It was dead silent.

50

00:03:53,355 --> 00:03:54,356

You couldn't hear anything.

51

00:03:54,356 --> 00:04:00,557

It was there and then it disappeared right before my eyes.

52

00:04:00,557 --> 00:04:06,319

Eye witness testimony about UFOs seen in Pennsylvania is eerily similar.

53

00:04:06,599 --> 00:04:12,801

One witness we set out to meet in Bucks County offers a story a bit more intriguing.

54

00:04:12,801 --> 00:04:20,323

The UFO left trace evidence behind a clue to the UFO's origin.

55

00:04:20,323 --> 00:04:25,404

I saw four craft in Bucks County.

56

00:04:25,404 --> 00:04:33,166

One of them spilled sparkle stuff down into my trees.

57

00:04:33,166 --> 00:04:35,887

My dog woke me up and he was growling.

58

00:04:35,887 --> 00:04:42,368

So when I came out I just saw this bright light in the sky.

59

00:04:42,368 --> 00:04:49,250

I looked up and this big metallic silver object was there.

60

00:04:49,250 --> 00:04:52,171

So about how large would you say this object was?

61

00:04:52,171 --> 00:04:55,372

Probably like four of those tall trees.

62

00:04:55,372 --> 00:04:59,493

When it went on to its side you could get a good view of the shape of it.

63

00:04:59,493 --> 00:05:04,054

It almost looked like it had a bumper that was shaped into a boomerang and the rest was

64

00:05:04,054 --> 00:05:07,335

just circular.

65

00:05:07,335 --> 00:05:14,897

It started opening up into a V and just dropped this beautiful metallic stuff into this tree

66

00:05:14,897 --> 00:05:16,618

and that tree.

67

00:05:16,618 --> 00:05:21,819

It looked like sparkles, like diamonds and it was just flickering and it's never stopped

68

00:05:21,819 --> 00:05:24,020

flickering.

69

00:05:24,020 --> 00:05:25,660

It was in the tree for about 20 minutes.

70

00:05:25,660 --> 00:05:27,661

I just was frozen.

71

00:05:27,661 --> 00:05:31,702

It just couldn't take my eyes off and I didn't want to go in the house and try to get a photograph

72

00:05:31,702 --> 00:05:35,423

because I was afraid of missing something and I'm glad that I chose that because all

73

00:05:35,423 --> 00:05:39,464

of a sudden it just sucked back up like it was a vacuum and it went right back up into

74

00:05:39,464 --> 00:05:43,985

a V shape again.

75

00:05:43,985 --> 00:05:46,265

Did you sense that it was a solid material?

76

00:05:46,265 --> 00:05:54,508

It looked like flakes or glitter that you would buy for a party and sprinkle around.

77

00:05:54,508 --> 00:05:55,508

Was it there the next morning?

78

00:05:55,508 --> 00:05:56,508

No.

79

00:05:56,508 --> 00:05:59,469

I didn't see anything after that.

80

00:05:59,469 --> 00:06:03,590

If this craft ejected or sprayed something onto Denise's tree, you would think that it

81

00:06:03,590 --> 00:06:05,671

would leave some physical evidence behind.

82

00:06:05,671 --> 00:06:11,312

So that's what we're looking for.

83

00:06:11,312 --> 00:06:14,153

So eventually you contacted Move Farm with this.

84

00:06:14,153 --> 00:06:16,474

What exactly did they do when they showed up?

85

00:06:16,474 --> 00:06:21,155

They took pictures, took my story and they were taking samples of my tree.

86

00:06:21,155 --> 00:06:22,155

Did they find anything?

87

00:06:22,155 --> 00:06:23,155

Yeah, they said they did.

88

00:06:23,155 --> 00:06:31,798

Now our next step in this investigation is to talk to our friends from Pennsylvania

89

00:06:31,798 --> 00:06:37,519

Mufon, John Venturi and Bob Gardner and see exactly what they found and get their analysis

90

00:06:37,519 --> 00:06:39,360

of that material.

91

00:06:39,360 --> 00:06:45,241

Can you tell me what you guys did when you got the call, how you investigated this case?

92

00:06:45,241 --> 00:06:50,083

We have very specific procedures on how to collect evidence in the chain of custody.

93

00:06:50,083 --> 00:06:52,803

We stick to that chain of custody very tightly.

94

00:06:52,803 --> 00:06:56,124

So you're treating each case like a crime scene.

95

00:06:56,124 --> 00:06:59,645

Exactly.

96

00:06:59,645 --> 00:07:04,446

So how long did it take after Denise's report before you guys came down to take the samples?

97

00:07:04,446 --> 00:07:09,368

It took the sample maybe about a week after it came down.

98

00:07:09,368 --> 00:07:13,809

An entire week elapsed before Bob was able to get to the scene and search for trace evidence.

99

00:07:13,809 --> 00:07:17,970

And this might not sound like a long time, but when searching for clues at a crime scene,

100

00:07:17,970 --> 00:07:21,771

like these guys treat every one of their cases, it's an eternity.

101

00:07:21,891 --> 00:07:27,733

Any evidence that could possibly have been left there could be contaminated or gone altogether.

102

00:07:27,733 --> 00:07:28,933

But hopefully they got lucky.

103

00:07:28,933 --> 00:07:32,494

There were two trees that were actually affected.

104

00:07:32,494 --> 00:07:36,015

This privet tree here and then the maple tree back there.

105

00:07:36,015 --> 00:07:42,296

I took samples from the affected trees, took soil samples from the affected area.

106

00:07:42,296 --> 00:07:46,338

And then I walked down about a hundred yards, there was another maple tree on there.

107

00:07:46,338 --> 00:07:50,779

So I took a sample from there and then the closest thing I could find to this privet

108

00:07:50,779 --> 00:07:51,779

was around the corner.

109

00:07:51,779 --> 00:07:57,781

So I took a sample of that along with the soil, bagged it up and then sent it out to labs to be tested.

110

00:07:59,781 --> 00:08:00,781

What about equipment?

111

00:08:00,781 --> 00:08:03,782

Do you guys have any special equipment to detectors, that sort of thing?

112

00:08:03,782 --> 00:08:08,784

I have a Geiger counter, which for example when I came out, I put the Geiger counter over the leaves.

113

00:08:08,784 --> 00:08:10,784

It went off.

114

00:08:10,784 --> 00:08:14,785

And when I reached into the tree closer to the branches, it didn't go off.

115

00:08:14,785 --> 00:08:18,786

It went off on the outer part of the leaves where it was affected.

116

00:08:18,786 --> 00:08:21,787

And it even tested other trees around and got nothing.

117

00:08:21,787 --> 00:08:24,788

Bob conducted his investigation just like a CSI.

118

00:08:24,788 --> 00:08:30,789

An important step is to collect control samples from the trees and the dirt in the surrounding area.

119

00:08:30,789 --> 00:08:34,791

These samples are then used by scientists to read what is normal in the environment.

120

00:08:34,791 --> 00:08:41,792

They're then compared to samples that are collected from ground zero of the event to determine if anything anomalous has occurred.

121

00:08:41,792 --> 00:08:44,793

Like Bob said, he took samples from all around.

122

00:08:44,793 --> 00:08:50,795

But on this tree in particular, the leaves had like little busterets and burn marks on them.

123

00:08:50,795 --> 00:08:53,796

We have boron and magnesium on the leaves.

124

00:08:53,796 --> 00:09:03,798

So would you say in your opinion after the analysis that at least this and maybe the two of them, they were anomalous in their readings?

125

00:09:03,798 --> 00:09:04,799

Absolutely.

126

00:09:04,799 --> 00:09:08,800

Because Denise said she saw it happen on this tree and that tree.

127

00:09:08,800 --> 00:09:11,800

And plus, it's not in the soil either.

128

00:09:11,800 --> 00:09:13,801

Normally what's in the soil is in the tree.

129

00:09:13,801 --> 00:09:18,802

Bob took soil samples and the boron and magnesium, it was not in the soil.

130

00:09:18,802 --> 00:09:20,803

So something had to land on this tree.

131

00:09:24,804 --> 00:09:26,804

We normally get about eight UFO sightings a month.

132

00:09:26,804 --> 00:09:31,806

What happened in this case, we had 225 sightings in the second half of the year.

133

00:09:31,806 --> 00:09:38,808

We went from eight to a high of 63 in July and we were averaging 45 sightings a month.

134

00:09:38,808 --> 00:09:42,809

This area had half of all the UFO sightings last year.

135

00:09:44,809 --> 00:09:58,813

Could it be that the craft that dispersed an unknown substance over Denise's murderous tree matches the same craft that was seen by other witnesses in the area, but on different occasions?

136

00:09:58,813 --> 00:10:10,816

Although we have yet to find any other witnesses to talk about sparkles coming down from the craft, we decided to pull together three of the key UFO eye witnesses in the area.

137

00:10:10,816 --> 00:10:22,819

And we enlisted the help of sketch artist, Detective Sergeant Ivan Mendes of the Trenton Police Department to help us draw a composite sketch of what these witnesses might have seen.

138

00:10:25,820 --> 00:10:31,822

I would say it's like an aspirin shape. The sides were bubbled out.

139

00:10:31,822 --> 00:10:36,823

There was three glass bulbs on the bottom of the craft.

140

00:10:36,823 --> 00:10:42,825

And then it had small windows around the side of it. They were glowing.

141

00:10:42,825 --> 00:10:46,826

Beautiful colors kind of like spinning around look like windows.

142

00:10:46,826 --> 00:10:50,827

Do you mean you think the light was coming from inside the craft?

143

00:10:50,827 --> 00:10:53,828

That's what I was guessing by the look that I had.

144

00:10:53,828 --> 00:10:59,829

And it was kind of shaped like this like a hang glider is the way I would describe it.

145

00:10:59,829 --> 00:11:03,830

And it was flying this way like that.

146

00:11:07,831 --> 00:11:10,832

Oh, that's good. That's excellent.

147

00:11:12,833 --> 00:11:18,834

It's kind of like a ball, like a circular, but it was very like edgy like it kind of had a lot of angles.

148

00:11:18,834 --> 00:11:21,835

If you had to compare this to an object, what would you compare it to?

149

00:11:21,835 --> 00:11:25,836

Probably more like a stop sign. But it had like plates on the side of it.

150

00:11:25,836 --> 00:11:27,837

It had more angles than that.

151

00:11:27,837 --> 00:11:33,838

So it was a sphere, but multifaceted, a lot more sides on this thing.

152

00:11:33,838 --> 00:11:34,839

Yeah, exactly.

153

00:11:34,839 --> 00:11:37,839

Take a look at this and just see how close this is to what you saw.

154

00:11:37,839 --> 00:11:41,841

I think that's pretty accurate on the way I saw it.

155

00:11:41,841 --> 00:11:44,841

It's looking pretty real like the way I saw it.

156

00:11:45,842 --> 00:11:50,843

After meeting with the witnesses and after seeing Sergeant Mendez and Sketch's,

157

00:11:50,843 --> 00:11:55,844

we made a discovery that I believe validates Denise Murders' experience.

158

00:11:55,844 --> 00:11:59,845

I mean, it's quite obvious based on the pictures. Everything's consistent with each other.

159

00:12:05,847 --> 00:12:11,849

At first it looked like it would be a plane, but I could tell at night time when I saw it that all these lights,

160

00:12:11,849 --> 00:12:14,849

they don't match up to what a plane would look like.

161

00:12:15,850 --> 00:12:20,851

We've enlisted the help of police sketch artist Sergeant Ivan Mendez

162

00:12:20,851 --> 00:12:26,853

to see if eyewitnesses here in Pennsylvania are seeing the same or similar craft.

163

00:12:26,853 --> 00:12:30,854

The sketches are mind-boggling, and I feel that the sketch has shown to us

164

00:12:30,854 --> 00:12:37,855

authenticate Denise Murders' sighting and quite possibly the UFO trace evidence itself.

165

00:12:37,855 --> 00:12:43,857

I mean, it's quite obvious based on the pictures. Everything has an asper light circular shape.

166

00:12:44,857 --> 00:12:48,858

They definitely all have some similarity with respect to the lighting.

167

00:12:49,859 --> 00:12:52,859

Everything's consistent with each other.

168

00:12:53,860 --> 00:12:58,861

What's really interesting about this description is it looks so similar to Denise's description.

169

00:12:58,861 --> 00:13:02,862

You've got lights around the edge primarily and then lights on the bottom.

170

00:13:02,862 --> 00:13:07,863

Denise says that there were three lights. It was Caitlin who says there are multiple lights at the bottom,

171

00:13:07,863 --> 00:13:10,864

but I don't know, maybe this is just a recollection.

172

00:13:10,864 --> 00:13:14,865

Would it be safe to conclude that these might actually be the same craft?

173

00:13:14,865 --> 00:13:18,866

Oh, absolutely. Witnesses see things differently, especially during the course of excitement

174

00:13:18,866 --> 00:13:21,867

or the level of stress they're experiencing at the time.

175

00:13:21,867 --> 00:13:24,868

So being the fact that we actually put these together side by side,

176

00:13:24,868 --> 00:13:28,869

I mean, they have a lot of characteristics in common, so I would have to say yes.

177

00:13:32,870 --> 00:13:38,872

According to Sergeant Mendez's professional opinion, all of our witnesses in Bucks County saw the same thing.

178

00:13:38,872 --> 00:13:41,873

The question in front of us now is why are they here?

179

00:13:41,873 --> 00:13:46,874

Are they testing our trees? Are they testing our people as well?

180

00:13:46,874 --> 00:13:49,875

We have to find out what they're testing.

181

00:13:49,875 --> 00:13:55,876

We're going to meet with Nancy Talbot of BLT Research, who's investigated countless other trace evidence cases.

182

00:13:55,876 --> 00:13:59,877

She packaged the research on this whole Bucks County investigation.

183

00:14:02,878 --> 00:14:06,879

Well, Nancy, we're investigating some of the best UFO trace cases that we can.

184

00:14:06,879 --> 00:14:09,880

We're wondering what are some of the best cases you've come up with?

185

00:14:09,880 --> 00:14:11,881

Several years ago, I went to Poland.

186

00:14:11,881 --> 00:14:16,882

We discovered the Golobki Rock case, which produced some magnificent evidence.

187

00:14:16,882 --> 00:14:22,884

Nancy embarked on a research trip to Poland to investigate multiple trace evidence cases.

188

00:14:22,884 --> 00:14:26,885

She visited the small town of Golobki, where she investigated a UFO encounter

189

00:14:26,885 --> 00:14:30,886

that occurred on a small farm in a very rural area.

190

00:14:30,886 --> 00:14:33,886

There's a young man there. His name is Mio■.

191

00:14:33,886 --> 00:14:38,888

And he was 11 or 12 at the time this had happened. It was 1998, I believe.

192

00:14:38,888 --> 00:14:44,889

And they live in this tiny little town of Golobki. There are only maybe five or six farms in the village.

193

00:14:44,889 --> 00:14:52,892

And one night, his mother, Evelina Kus, was awakened in the middle of the night by an orange red glow coming through her windows.

194

00:14:53,892 --> 00:15:01,894

She got up, went to the windows, and then observed a disc-shaped, brilliant, fiery, orangey-red object

195

00:15:01,894 --> 00:15:05,895

very slowly coming down into this field.

196

00:15:05,895 --> 00:15:13,897

As she watched this thing to slowly settle down into that field, and after a while the glow died out,

197

00:15:13,897 --> 00:15:15,898

it wasn't very long before the whole family got up.

198

00:15:15,898 --> 00:15:21,899

Mio■ decided to go down to the spot in the field where she had seen this thing.

199

00:15:22,900 --> 00:15:29,901

He found a bunch of stones in a more or less elliptical arrangement down at the very end of that field

200

00:15:29,901 --> 00:15:31,902

that had never been there before.

201

00:15:32,902 --> 00:15:35,903

It was the location of the sighting of the unidentified flying object.

202

00:15:35,903 --> 00:15:40,904

Did that correlate to the location of the ring of stones that was found in the field?

203

00:15:40,904 --> 00:15:43,905

According to Evelina, precisely.

204

00:15:44,905 --> 00:15:50,907

It's an interesting connection that this mysterious ring of stones were found exactly where the UFO was witnessed.

205

00:15:50,907 --> 00:15:55,908

I'm eager to find out what these stones really are and why were they even placed there.

206

00:15:56,909 --> 00:16:00,910

So he tried to pick them up and they were too heavy. He was only 11 at the time.

207

00:16:00,910 --> 00:16:07,912

In the center though, there was one smaller one and that picture on the top is the one smaller one that he could lift.

208

00:16:07,912 --> 00:16:09,912

They were very dense.

209

00:16:09,912 --> 00:16:14,913

Okay, so these rocks, they were actually sitting on top of the ground.

210

00:16:14,913 --> 00:16:16,914

They were apparently deposited.

211

00:16:16,914 --> 00:16:22,916

It is bizarre, but the evidence points to these stones just being dropped on a farm in Poland.

212

00:16:22,916 --> 00:16:27,917

Although there is no obvious way to explain this, Nancy told us of some other cases that occurred nearby the farm

213

00:16:27,917 --> 00:16:30,918

that may offer another explanation.

214

00:16:31,918 --> 00:16:37,920

While I was there, I also investigated a number of very strange holes in a nearby village.

215

00:16:37,920 --> 00:16:44,921

A neighbor had witnessed one evening a brilliant triangle up over the trees, very close to the house.

216

00:16:44,921 --> 00:16:53,924

It hovered for a while over that field and her grandson found this huge hole in the snow with no dirt on the snow at all.

217

00:16:53,924 --> 00:16:55,924

And all the fill was taken out?

218

00:16:55,924 --> 00:16:58,925

And there was none of it deposited on the snow.

219

00:16:59,925 --> 00:17:07,928

There were several other cases of that same sort of thing documented in the time period just before Evelina Kus had her sighting.

220

00:17:08,928 --> 00:17:17,930

We wonder, are these crafts actually using soil to test and deposit elsewhere?

221

00:17:17,930 --> 00:17:26,933

Is it like Denise Murders' tree where some particles rain down on it and then we're vacuumed up again by some beam?

222

00:17:26,933 --> 00:17:30,934

Wherever these crafts come from, they're not just looking at us.

223

00:17:30,934 --> 00:17:33,935

They're testing our leaves and grass and ground.

224

00:17:33,935 --> 00:17:35,935

They're testing our soil.

225

00:17:36,935 --> 00:17:38,936

And they're testing us.

226

00:17:42,937 --> 00:17:52,940

Samples from Denise Murders' tree and pieces of the rock from Golobki, Poland were sent to frontier labs in Chagrin Falls, Ohio.

227

00:17:53,940 --> 00:18:00,942

Phyllis Budinger along with Nick Ryder have analyzed these samples and we hope they can provide us with some answers.

228

00:18:01,942 --> 00:18:05,943

So what was the first analysis that you did with the samples that you got from Mufa?

229

00:18:05,943 --> 00:18:10,944

I reviewed them with a fluorescent light to see if I could find any visible particles.

230

00:18:10,944 --> 00:18:14,946

Was there anything actually stuck to the leaves that looked unusual?

231

00:18:14,946 --> 00:18:15,946

Was there?

232

00:18:15,946 --> 00:18:26,949

I did find on the affected tree leaves a couple of specks that actually floreste green under a long wave UV handheld lamp.

233

00:18:26,949 --> 00:18:36,951

So those piqued my interest and took a look at them with a scanning electron microscope and energy dispersive spectroscopy.

234

00:18:38,952 --> 00:18:47,954

A scanning electron microscope, or SEM, is a type of electron microscope that images a sample's surface by scanning it with a high energy beam of electrons.

235

00:18:48,955 --> 00:19:00,958

The electrons then interact with the atoms that make up the sample, or in this case, the UFO trace evidence, which then provides the analysts with important information regarding the sample's composition and chemical makeup.

236

00:19:02,958 --> 00:19:05,959

As you can see here in this photo, they look like eggshells.

237

00:19:05,959 --> 00:19:12,961

Now of course this whole flight that these were part of was only maybe the size of a head of a pin.

238

00:19:12,961 --> 00:19:14,962

Nick, have you found this substance in any other cases?

239

00:19:14,962 --> 00:19:23,964

There have been a number of cases off and on over the years in UFO residue of very small microscopic spherical particles.

240

00:19:23,964 --> 00:19:31,966

The leaves at least appeared to have roughly twice the boron content than the control leaves did.

241

00:19:33,967 --> 00:19:39,968

Is it possible that the landlord of the premises saw that this tree wasn't doing well and sprayed some pesticides on it?

242

00:19:39,968 --> 00:19:41,969

It is certainly possible.

243

00:19:42,969 --> 00:19:54,972

Boron is a key element in many pesticides, so it's entirely plausible that the reason for these increased levels of boron is due to the landlord or the gardener simply spraying an infested tree.

244

00:19:54,972 --> 00:19:58,973

What is the evidence that we have here that is absolutely anomalous?

245

00:19:58,973 --> 00:20:01,974

It sounds to me like it might be these fluorescent particles.

246

00:20:01,974 --> 00:20:03,975

Explanation was something natural.

247

00:20:03,975 --> 00:20:06,975

And I says, oh my goodness, I recognize that.

248

00:20:06,975 --> 00:20:08,976

And I match it up with a reference in my files.

249

00:20:08,976 --> 00:20:10,977

And I said, it's uric acid.

250

00:20:10,977 --> 00:20:14,978

I said, that's the primary component of bird urine.

251

00:20:17,978 --> 00:20:19,979

So maybe the findings are a bit humorous.

252

00:20:19,979 --> 00:20:25,981

The analysis shows that Nick and Phyllis' work, it's been meticulous.

253

00:20:25,981 --> 00:20:28,981

And you can't blame them because all they found was bird pee.

254

00:20:28,981 --> 00:20:36,983

You know, trace evidence because quite frankly, all the real trace evidence, the evidence of the

UFO back had been washed away long ago.

255

00:20:36,983 --> 00:20:38,984

That doesn't mean the end of this case.

256

00:20:38,984 --> 00:20:43,985

It only means that the trace evidence might have been there, but now it's gone.

257

00:20:45,986 --> 00:20:52,988

So in addition to this Bucks County case, both of you also analyzed the material from the Golobki case in Poland.

258

00:20:52,988 --> 00:20:54,988

What did you find in that case?

259

00:20:54,988 --> 00:20:58,989

Well, we basically found that there was vitrified glass-like soil.

260

00:20:58,989 --> 00:21:02,990

It looked like it was dirt in a glassy form.

261

00:21:03,991 --> 00:21:09,992

Soil vitrification occurs when soil is heated to 1500 to 3000 degrees Fahrenheit.

262

00:21:09,992 --> 00:21:13,993

Although vitrification can occur naturally, let's say with a lightning strike,

263

00:21:13,993 --> 00:21:18,995

the unnatural process of soil vitrification is being used to clean up toxic waste sites.

264

00:21:18,995 --> 00:21:23,996

The process includes putting four electrodes into the infected area of the toxic spill.

265

00:21:23,996 --> 00:21:28,997

An electric current is then passed through the electrodes to create heat, thus melting the surrounding soil.

266

00:21:28,997 --> 00:21:34,999

The result? A glass-like rock that contains the harmful contaminants, making it safe for transportation.

267

00:21:34,999 --> 00:21:41,001

It's an expensive process and fairly new technology that is only now beginning to be utilized.

268

00:21:41,001 --> 00:21:47,002

Is it likely that this is the explanation for the soil vitrification in Golobki, Poland? Probably not.

269

00:21:47,002 --> 00:21:51,003

So there was no evidence of someone performing this vitrification there?

270

00:21:51,003 --> 00:21:52,004

No, that was my understanding.

271

00:21:52,004 --> 00:22:01,006

So which leaves us with the possibility that it was either trucked in or that there is some connection with the UFO that was sighted the night before.

272

00:22:01,006 --> 00:22:09,008

One other explanation is that hoaxsters created this vitrified soil and placed it in the backyard of the Kus family farm.

273

00:22:09,008 --> 00:22:14,009

Why? Who knows? But we have to entertain this possibility.

274

00:22:14,009 --> 00:22:19,011

So they found vitrified soil the size of cinder blocks, and that's a pretty big size.

275

00:22:19,011 --> 00:22:24,012

What kind of equipment do you think it would take for a human being to make something like that?

276

00:22:24,012 --> 00:22:32,014

You'd probably have to resort to a really large hydrogen torch, but all of those things require industrial-sized commitment.

277

00:22:32,014 --> 00:22:35,015

You could not make these in your barn.

278

00:22:37,016 --> 00:22:42,017

Vitrification of soil is expensive, and it's difficult. However, it is possible.

279

00:22:42,017 --> 00:22:44,017

But is it with tools normally found on a farm?

280

00:22:44,017 --> 00:22:52,020

We've arranged a vitrification test to determine if using an arc welder and an oxyacetylene torch can produce enough heat to create vitrified soil.

281

00:22:56,021 --> 00:23:06,023

We're in Levittown, Pennsylvania, meeting Cindy Fidgielkowski, owner of First Choice Welding, to see if we can fuse soil together using common welding equipment.

282

00:23:06,023 --> 00:23:11,025

We have two different processes that can definitely surpass 3,000 degrees.

283

00:23:11,025 --> 00:23:18,027

The oxygen-acetylene torch uses the two gases combined to produce temperatures around 6,000 degrees.

284

00:23:18,027 --> 00:23:22,028

The other process that we can use is called stick welding.

285

00:23:22,028 --> 00:23:28,029

What that uses is an electrical current that goes from the welding rod into the workpiece.

286

00:23:28,029 --> 00:23:31,030

Temperatures can go up to 10 to 12,000 degrees.

287

00:23:32,030 --> 00:23:41,033

So, speaking from the perspective of a rural barn in Poland, you'd need a real power supply, a real heavy-duty power supply for that second process you're talking about.

288

00:23:41,033 --> 00:23:42,033

Yes.

289

00:23:44,033 --> 00:23:46,034

Have you ever tried anything like this before?

290

00:23:46,034 --> 00:23:47,034

No, I have not.

291

00:23:47,034 --> 00:23:48,035

Do you think we'll have any success?

292

00:23:48,035 --> 00:23:49,035

Give it a whirl.

293

00:23:49,035 --> 00:23:50,035

Let's go.

294

00:23:56,037 --> 00:23:59,037

We've come to First Choice Welding to meet with Cindy Fidgielkowski.

295

00:23:59,037 --> 00:24:07,040

We've set up a vitrification test to determine if common tools found on a farm or an industrial environment can produce enough heat to create vitrified soil.

296

00:24:07,040 --> 00:24:16,042

We know that during a UFO sighting in Galapki, Poland, vitrified soil was either dropped or intentionally placed on a farm, but we don't know why.

297

00:24:16,042 --> 00:24:24,044

Entertaining the theory that this could be a hoax, we want to see what somebody would have to go

through to create these chunks of vitrified soil.

298

00:24:25,044 --> 00:24:28,045

All right, I'm happy with the way the soil is set up.

299

00:24:29,045 --> 00:24:41,049

I did look into the Securo New Mexico case, which involved Lonnie Zamora's sighting of a craft that landed in the desert and caused a classification or vitrification to occur in the desert.

300

00:24:41,049 --> 00:24:46,050

We actually visited a local artisan who used a type of oven for melting glass.

301

00:24:46,050 --> 00:24:54,052

He told me that it's actually very difficult to melt sand using welding equipment, so I'll be very interested to see if we can actually do that today.

302

00:24:55,052 --> 00:24:58,053

So the first thing I'd like to do is start with the arc welder.

303

00:25:00,054 --> 00:25:05,055

We're first going to see if an arc welder can produce a vitrified piece of soil.

304

00:25:05,055 --> 00:25:07,056

The process is relatively simple.

305

00:25:07,056 --> 00:25:12,057

We laid a piece of metal on top of the dirt and welded it to the surrounding box that we built to contain the soil.

306

00:25:12,057 --> 00:25:18,059

This container is now grounded to the earth, allowing the current to flow and the weld to take place.

307

00:25:18,059 --> 00:25:24,060

The hottest point on the metal is going to be the exact point where the welding rod meets the metal.

308

00:25:24,060 --> 00:25:29,062

And then as we weld, the heat is going to flow with the weld and it is going to disperse.

309

00:25:29,062 --> 00:25:32,062

However, it is going to lose about 50% of its heat processed.

310

00:25:32,062 --> 00:25:55,068

Well, there seems to be some charring there.

311

00:25:55,068 --> 00:25:59,070

Is it possible that some vitrification occurred on a granular level?

312

00:25:59,070 --> 00:26:01,070

Maybe for a minute.

313

00:26:01,070 --> 00:26:03,071

But certainly not on the scale that we're talking about in polis.

314

00:26:03,071 --> 00:26:04,071

No.

315

00:26:04,071 --> 00:26:07,072

Huge significant blocks of vitrified substance.

316

00:26:08,072 --> 00:26:13,073

We attempted to vitrify soil using an arc welding process and we had no success.

317

00:26:13,073 --> 00:26:15,074

To tell you the truth, I didn't expect that we would.

318

00:26:15,074 --> 00:26:20,075

The heat dissipated into the environment and it wasn't concentrated enough to vitrify the soil.

319

00:26:21,075 --> 00:26:25,077

So next we're going to attempt to vitrify the soil using an oxyacetylene torch.

320

00:26:25,077 --> 00:26:32,078

And I expect to have more success with this because we have a high temperature flame in direct contact with the soil.

321

00:26:32,078 --> 00:26:39,080

We're talking about a maximum of 6,000 degrees of heat, which is well beyond the limits of what is needed.

322

00:26:39,080 --> 00:26:42,081

And we're going to apply this heat for about a minute, maybe two.

323

00:26:55,085 --> 00:27:03,087

It looks like we're having some kind of reaction there to tell you the truth already.

324

00:27:03,087 --> 00:27:07,088

I'm not sure of the vitrification, but you can see the soil glowing.

325

00:27:08,088 --> 00:27:14,090

Right now the flame from the oxyacetylene torch is melting and therefore fusing the different elements inside.

326

00:27:14,090 --> 00:27:21,091

I think it's obvious that this is working, but how much vitrified soil are we actually going to be able to create is the question.

327

00:27:22,092 --> 00:27:25,093

So am I seeing the soil itself begin to glow now?

328

00:27:25,093 --> 00:27:31,094

Look at how much work it's taking just to melt that little coin-sized bit of dirt though.

329

00:27:34,095 --> 00:27:36,095

Alright, I think that's good enough for now.

330

00:27:40,097 --> 00:27:42,097

Okay, so we have a little crater.

331

00:27:52,100 --> 00:28:01,102

Well, it's obvious from the results of the oxyacetylene test that you can vitrify soil using high heat, using metalworking tools that are found on a farm.

332

00:28:01,102 --> 00:28:11,105

But it was just such a small amount, a very thin layer, and we would not be able to make anything comparable to the size of what was found in Poland.

333

00:28:12,105 --> 00:28:17,106

What are the chances of some kid in Poland being able to do this with welding equipment?

334

00:28:17,106 --> 00:28:23,108

Maybe if we took about 15 of them, put them together and did it impossible on a farm.

335

00:28:25,109 --> 00:28:27,109

This was really fascinating.

336

00:28:27,109 --> 00:28:33,111

Well, I think it's interesting when you think about how much energy was generated just to create that little tiny chunk.

337

00:28:33,111 --> 00:28:38,112

I think it's safe to say that these giant vitrified chunks weren't created with normal farming equipment.

338

00:28:38,112 --> 00:28:39,112

That's for sure.

339

00:28:39,112 --> 00:28:46,114

Well, there's one thing that we really need to remember is that soil vitrification didn't happen at the same place where the UFO sighting was.

340

00:28:46,114 --> 00:28:50,115

I'm not saying that the UFO didn't create it, but it didn't vitrify there.

341

00:28:50,115 --> 00:28:55,117

Now, you know Nancy was talking about these mysterious holes that she was investigating in Poland as well.

342

00:28:55,117 --> 00:29:03,119

Put two and two together, maybe these UFOs are analyzing our soil the same way we think the sparkles are analyzing Denise Murders tree.

343

00:29:03,119 --> 00:29:05,119

Well, think about it for a second.

344

00:29:05,119 --> 00:29:13,121

If there are extraterrestrials traveling halfway across the universe to the planet Earth, they have superior technology in so many ways.

345

00:29:13,121 --> 00:29:18,123

Do they really need to analyze a tree in Nancy's backyard and some soil in a farm in Poland?

346

00:29:18,123 --> 00:29:19,123

Well, I mean, why not?

347

00:29:19,123 --> 00:29:21,124

What would you know about an advanced civilization?

348

00:29:21,124 --> 00:29:23,124

We don't know what they're up to.

349

00:29:23,124 --> 00:29:25,125

You're both right in your own way.

350

00:29:25,125 --> 00:29:29,126

I think we could debate this the entire day.

351

00:29:29,126 --> 00:29:32,126

Here's something that I think will really fascinate you.

352

00:29:32,126 --> 00:29:34,127

We're going to talk to Bob White.

353

00:29:34,127 --> 00:29:41,129

Bob White says that he saw a UFO, it saw him, it shot something to Earth.

354

00:29:41,129 --> 00:29:44,130

He picked it up and he's a piece of a UFO.

355

00:29:44,130 --> 00:29:46,130

If this is the real thing, I want to see it.

356

00:29:54,132 --> 00:30:01,134

When it went up into the sky, it was something I had never seen before and I had the feeling it was not of this world.

357

00:30:04,135 --> 00:30:07,136

Hi, good morning. Hi Bob, how are you?

358

00:30:12,137 --> 00:30:17,139

Although we've looked at other UFO trace evidence cases, Bob's is different.

359

00:30:17,139 --> 00:30:24,140

He says he has an actual piece of a UFO that he discovered after an amazing encounter in 1985.

360

00:30:26,141 --> 00:30:31,142

Bob, could you tell us how you came into possession of this unique looking object?

361

00:30:31,142 --> 00:30:39,144

I was in Grand Junction, Colorado, between Grand Junction and Cistl, Utah, and it was late at night and the lady friend and I were driving.

362

00:30:39,144 --> 00:30:41,145

We saw this light up ahead.

363

00:30:43,145 --> 00:30:47,147

This was a huge light. It was about the size of a three-story building.

364

00:30:48,147 --> 00:30:54,148

She turned the headlights on me and when she did this thing just shot up in the air like that just as fast as my eyes could follow it.

365

00:30:55,149 --> 00:31:03,151

And it connected to two other lights, like two blue and neon tubular lights, one on top of the other with a space in between.

366

00:31:04,151 --> 00:31:16,154

And when it hit this, it just shot out of sight. But before it did, I saw kind of a little explosion like this thing came back down toward me.

367

00:31:18,155 --> 00:31:25,157

There was a groove in the ground and I followed the groove in the ground until I saw this thing lying there and it was still going hot.

368

00:31:26,157 --> 00:31:37,160

So after Bob sees this object, he heads out to where he thought the piece had landed and he sees this groove in the ground as if this piece came down at a high velocity and skidded to a stop.

369

00:31:38,160 --> 00:31:46,162

Now this is the first time I've heard a story like this and the fact that he not only found this piece but has it to show is amazing.

370

00:31:47,163 --> 00:31:49,163

So Dr. Gibbons, have you done any work yourself on this?

371

00:31:50,163 --> 00:31:51,164

Yes, I have.

372

00:31:52,164 --> 00:31:58,166

Dr. Robert Gibbons is a physicist who's formerly worked at NASA, Northrop Grumman and Hughes Aircraft.

373

00:31:59,166 --> 00:32:06,168

He served in the U.S. Army for over 20 years and his entire experience, he's never encountered anything quite like the Bob White object.

374

00:32:07,168 --> 00:32:13,170

In the year 2000, he joined Bob White's team to determine once and for all what this object really is.

375

00:32:14,170 --> 00:32:23,172

We went to Laughlin, Nevada and during that time the object affected the batteries in the wall safe at the hotel three days in a row.

376

00:32:24,172 --> 00:32:27,173

The batteries had died and were broken open the first day.

377

00:32:28,174 --> 00:32:32,175

People from the hotel had to come up and put on an electronic meter to open the safe.

378

00:32:33,175 --> 00:32:37,176

The meter said the safe is open yet it was not. So the first night they had to drill it.

379

00:32:37,176 --> 00:32:48,179

This happened two more nights in a row. There must be some effect coming from the object, some kind of radiation or something causing those batteries to go dead.

380

00:32:50,179 --> 00:32:55,181

Whatever caused this safe to malfunction, it was obviously not an isolated incident.

381

00:32:56,181 --> 00:33:04,183

So to determine if it was some kind of x-ray or gamma ray, Dr. Gibbons set up a test utilizing dental x-ray film and the Bob White object.

382

00:33:05,183 --> 00:33:17,187

I made a cylinder. We put a film, an exposed film at the top, an exposed film at the bottom and then we had a casing in on the cylinder film.

383

00:33:18,187 --> 00:33:21,188

And we came up with a really, really interesting conclusion.

384

00:33:22,188 --> 00:33:28,190

These are the actual dental x-ray films. The one of importance is the one with the two black spots.

385

00:33:29,190 --> 00:33:32,191

So you're saying you held the object up to x-ray.

386

00:33:33,191 --> 00:33:46,194

Actually, they sat on the film for 48 hours and during that time something exposed the film, not just fogged it, but put two distinct spots which match up with the two lobes, if you will, of the object.

387

00:33:48,195 --> 00:33:52,196

It looks like the object has two distinct lobes, as Dr. Gibbons calls them.

388

00:33:52,196 --> 00:33:59,198

And in this x-ray test, when you line up the film with the object, the two lobes match up almost perfectly with the exposure on the film.

389

00:34:00,198 --> 00:34:09,201

So something is emitting from the object that causes the film to expose. But what this is and the reason for this, it's still undetermined.

390

00:34:10,201 --> 00:34:13,202

Well, what about scientists? What have they said about this?

391

00:34:13,202 --> 00:34:23,204

The first thing I did was send it to New Mexico Tech and Dr. F***ing said, had I known the story on this, I would have suggested that you do isotope ratio abundance test on it.

392

00:34:24,205 --> 00:34:27,205

Because he said we don't have the equipment here to perform these tests.

393

00:34:28,206 --> 00:34:33,207

An isotopic ratio abundance test measures the amount of isotopes in a given element.

394

00:34:34,207 --> 00:34:39,209

Different elements like chromium, titanium and strontium have a range of isotopes in their composition.

395

00:34:39,209 --> 00:34:44,210

But formed in a different or even alien environment, these ratios could be different.

396

00:34:45,210 --> 00:34:58,214

I had contacts to go to Los Alamos and there I met F***ing who was the top metallurgist and Dr. F***ing who they called in on special occasions.

397

00:34:59,214 --> 00:35:03,215

And he was really excited about this because he had never seen anything like it before.

398

00:35:03,215 --> 00:35:09,217

He said to me, this is something that I've been looking for all my life. He said this is definitely exentraceal.

399

00:35:10,217 --> 00:35:16,218

Now we have a report from Los Alamos. They said they did the analysis on silicon.

400

00:35:17,219 --> 00:35:21,220

I called Dr. F***ing and I asked him about it. He said aluminum, aluminum.

401

00:35:22,220 --> 00:35:28,222

And I'm saying, why does he keep talking about aluminum? The report says you did it on silicon.

402

00:35:28,222 --> 00:35:37,224

He said we will have to talk about it. So I called F***ing and F***ing said isotopes? No, we didn't do any isotopes tests at all.

403

00:35:38,224 --> 00:35:43,226

Although Los Alamos was supposed to do this isotopic ratio abundance test, they denied that they did.

404

00:35:44,226 --> 00:35:49,227

So were you getting the feeling that all these scientists that were doing the analysis were lying to you?

405

00:35:50,228 --> 00:35:51,228

Absolutely lying to me.

406

00:35:51,228 --> 00:36:03,231

We have a piece that may have fallen off of a UFO. We know that it affected a wall safe and caused it to malfunction three nights in a row.

407

00:36:04,231 --> 00:36:11,233

And although there have been multiple labs and analysts that have looked at this object, Bob claims that they're scared to talk about it after their tests.

408

00:36:12,233 --> 00:36:16,234

But we've contacted two scientists who are brave enough to talk to us and analyze the Bob White object.

409

00:36:17,235 --> 00:36:24,237

My initial impression of the object was that it was extremely extraordinary. It was something like which I'd never seen before.

410

00:36:25,237 --> 00:36:30,238

Chris Ellis is a solid state physicist with an expertise focusing on aluminum alloys and semiconductors.

411

00:36:31,238 --> 00:36:42,241

After pouring over the data, we found that the object is an aluminum alloy of unknown origin. This is not anything like we've seen before.

412

00:36:43,242 --> 00:36:50,244

There are some very unusual metals in this object that you typically do not find in other alloys.

413

00:36:51,244 --> 00:36:58,246

What's the chance that these elements would end up in this alloy either naturally or accidentally?

414

00:36:59,246 --> 00:37:00,246

I'd have to say pretty much zero.

415

00:37:01,246 --> 00:37:05,248

So this is absolutely a manufactured object.

416

00:37:05,248 --> 00:37:13,250

Looking at a detailed list of all the metals and all the elements that can be found in this object, it's conclusive that they're there by purpose.

417

00:37:14,250 --> 00:37:18,251

This looks like a manufactured piece created by some form of intelligence.

418

00:37:19,251 --> 00:37:24,253

Now, could it be made by us or could it have been made by an extraterrestrial?

419

00:37:25,253 --> 00:37:29,254

We're looking at something much more advanced than what we're currently familiar with today.

420

00:37:35,256 --> 00:37:39,257

We are in Kimberling City, Missouri investigating the Bob White story.

421

00:37:40,257 --> 00:37:47,259

In 1985, after seeing multiple UFOs, an object is either ejected or shot down towards the ground.

422

00:37:48,259 --> 00:37:54,261

Through scrupulous scientific analysis, no one can say what this piece actually is.

423

00:37:55,261 --> 00:38:00,262

We are now sitting down with two scientists who are brave enough to come out and speak to us.

424

00:38:00,262 --> 00:38:10,265

And even though the institutions that are affiliated with requested to remain anonymous, we are uncovering new clues that are being discovered about Bob White's object.

425

00:38:11,265 --> 00:38:16,267

I did two types of tests. The first test I did was X-ray diffraction analysis.

426

00:38:17,267 --> 00:38:21,268

David Lamb is a research scientist currently at a major university in the U.S.

427

00:38:22,268 --> 00:38:27,269

His expertise is in physics and material science, and he spent the past year researching the Bob White object.

428

00:38:27,269 --> 00:38:32,271

What's very unique about this is we have what's called an amorphous peak here.

429

00:38:33,271 --> 00:38:38,272

And that amorphous peak tells me that this is a polycrystalline semiconductor.

430

00:38:39,273 --> 00:38:42,273

What's the significance of that? I mean, how anomalous is that?

431

00:38:43,274 --> 00:38:44,274

You don't find that in aircraft aluminum.

432

00:38:45,274 --> 00:38:46,275

Where do you find it?

433

00:38:47,275 --> 00:38:48,275

I'm not aware you find it anywhere.

434

00:38:49,275 --> 00:38:56,277

Another thing that's very unusual in this is it has silver in it and a very high percentage of silver, about 4.3% silver.

435

00:38:57,277 --> 00:39:02,279

Silver is only used in aluminum at the experimental stage of superconductivity.

436

00:39:03,279 --> 00:39:09,281

If you spray the surface of aluminum with silver, then you enhance superconductivity.

437

00:39:10,281 --> 00:39:20,284

Superconductivity is a phenomenon in some metals that occurs at very low temperatures, resulting in absolutely zero electrical resistance and excludes the interior magnetic field.

438

00:39:20,284 --> 00:39:29,286

This means that an electric current introduced to the superconductor can flow and persist freely and indefinitely without any added power source.

439

00:39:30,286 --> 00:39:36,288

Let's say you fire a bullet through a magnetic field, well, it's going to have experience dragged.

440

00:39:37,288 --> 00:39:39,289

But what if that bullet was able to superconductor?

441

00:39:40,289 --> 00:39:43,290

It would expel the magnetic field and that bullet would not slow down.

442

00:39:44,290 --> 00:39:46,291

It would not experience any kind of drag.

443

00:39:46,291 --> 00:40:00,294

So if this was something traveling through space and it was going through, let's say, Jupiter's powerful magnetic field, it could theoretically expel that magnetic field and zip past Jupiter without experiencing those forces.

444

00:40:02,295 --> 00:40:04,295

Now, is superconductivity that difficult to achieve?

445

00:40:05,296 --> 00:40:13,298

Space is the perfect environment for superconductivity. You have to expend no energy to get objects to be superconductive in space.

446

00:40:13,298 --> 00:40:20,300

So if an object were fabricated to travel in space on its own, this would be the kind of object it would be.

447

00:40:21,300 --> 00:40:28,302

Yes. You're going to get the biggest bang for your buck out of the native properties of this object in space.

448

00:40:29,302 --> 00:40:30,302

It's a perfect fit.

449

00:40:32,303 --> 00:40:34,303

Let's put the pieces together.

450

00:40:35,304 --> 00:40:38,304

Bob White's object reminds me of other cases we've investigated in the past.

451

00:40:39,305 --> 00:40:45,306

Morrie Island, where a witness said metal objects were ejected from a UFO.

452

00:40:46,307 --> 00:40:56,309

I took a little sample from the serrated edge of this aluminum piece. Most of the material you can identify. You know, it's the question of whether it's anomalous or whether it's normal.

453

00:40:57,310 --> 00:41:04,311

Aurora, Texas, where Brawley Oates gave us an unknown aluminum alloy discovered at a mysterious crash site.

454

00:41:05,312 --> 00:41:08,312

Right away we could tell this was aluminum. That's the highest peak.

455

00:41:09,313 --> 00:41:12,314

What's that one, that larger peak? Could we have picked up contaminants from the soil?

456

00:41:13,314 --> 00:41:17,315

Even if we did it, it should correspond to some element that we could match here.

457

00:41:18,315 --> 00:41:20,316

That's interesting. Maybe we discovered a brand new element.

458

00:41:21,316 --> 00:41:29,318

What do all these things have in common? These objects have unique qualities that might point to an extraterrestrial origin.

459

00:41:30,318 --> 00:41:35,320

So we've had three trace evidence cases that we've looked at.

460

00:41:36,320 --> 00:41:42,322

And each time I get excited that we're going to come up with some kind of evidence that proves what we're dealing with is not of this earth.

461

00:41:43,322 --> 00:41:45,322

But every time I'm disappointed.

462

00:41:46,323 --> 00:41:48,323

I think the evidence is absolutely overwhelming.

463

00:41:49,323 --> 00:41:57,326

Going all the way back to the 1930s, running right through for 70 years, there's a collection of trace evidence that is astounding.

464

00:41:57,326 --> 00:42:08,329

The problem is it's absolutely proving without a shadow of a doubt that that trace evidence is causally connected to the high strangeness that people experience.

465

00:42:09,329 --> 00:42:16,331

I think the wall between what we have now and where we want to be for absolute proof is tissue paper thin.

466

00:42:17,331 --> 00:42:20,332

We must keep going the answers on the other side of that wall.

467

00:42:20,332 --> 00:42:24,333

We've investigated Bucks County and heard amazing testimony.

468

00:42:25,333 --> 00:42:29,334

And we corroborated the stories of eyewitnesses to an amazing craft.

469

00:42:30,334 --> 00:42:39,337

Although we had no idea what to think of these sparkles that Denise Murder described, I think we've shown with a preponderance of evidence what these UFOs are up to.

470

00:42:40,337 --> 00:42:49,339

After hearing the cases in Poland of this vitrified soil possibly connected to these unidentified holes, we think they might be testing us.

471

00:42:50,340 --> 00:42:52,340

But for what reason? We don't know.

472

00:42:53,341 --> 00:43:02,343

Then we hear the story of Bob White and actually hold the object in our hands and we read the reports from top level institutions that can identify it.

473

00:43:02,343 --> 00:43:12,346

It's fantastic and as time passes, further scientific testing may one day prove that it's of extraterrestrial origin.

474

00:43:13,346 --> 00:43:21,348

I'm not alone in thinking that trace evidence may be the key to discovering what's behind these UFOs.

475

00:43:22,348 --> 00:43:28,350

It's just a matter of time before we discover that smoking gun that will blow this secret wide open.

476

00:43:29,350 --> 00:43:30,350

Let's go.

477

00:43:33,351 --> 00:43:39,353

We just received a phone call from David Lam.

478

00:43:40,353 --> 00:43:50,356

After conducting additional scientific testing, he now theorizes that Bob White's object is a quasi crystal of a very complex structure.

479

00:43:51,356 --> 00:43:55,357

This type of structure is considered to be the cutting edge of nanotechnology.

480

00:43:56,357 --> 00:44:03,359

It didn't exist in 1985 and even today it's in its early stages of development.

481

00:44:04,360 --> 00:44:19,364

I believe as science and technology progress, it will one day be possible to properly identify the nature of Bob White's object and prove once and for all its extraterrestrial.
