

DEAN ASHLEY

DISCUSS FLIR TECHNOLOGY, THE THREE
DEPARTMENT OF DEFENSE UFO VIDEOS
RELEASED AND TEST VIDEOS HE HAS
TAKEN WITH FLIR CAMERAS TO
DEMONSTRATE THE DOD VIDEOS ARE NOT
COMMON AIRCRAFT

UFONN
SUNDAY

1
00:01:11,550 --> 00:00:26,020

[Music]

2
00:01:13,830 --> 00:01:11,560

and good afternoon from Philadelphia

3
00:01:17,310 --> 00:01:13,840

Frank here with another episode of UFO

4
00:01:18,870 --> 00:01:17,320

news network Sunday today we have a very

5
00:01:20,730 --> 00:01:18,880

special guest and I'm going to turn

6
00:01:23,370 --> 00:01:20,740

things right over to chant Hannah my

7
00:01:25,830 --> 00:01:23,380

co-host to introduce him chant go ahead

8
00:01:27,960 --> 00:01:25,840

hi Frank thank you so much we have a

9
00:01:30,210 --> 00:01:27,970

wonderful guest today his name is Dean

10
00:01:32,670 --> 00:01:30,220

Ashley he's a friend of Frank and I and

11
00:01:34,350 --> 00:01:32,680

he's married with two children born and

12
00:01:36,600 --> 00:01:34,360

raised in st. Louis graduated college

13
00:01:39,060 --> 00:01:36,610

with a BA in English joined the Navy in

14

00:01:41,400 --> 00:01:39,070

1996 became an aviation electronics

15

00:01:44,250 --> 00:01:41,410

technician and served for a little over

16

00:01:46,080 --> 00:01:44,260

four years when I asked him to share a

17

00:01:48,840 --> 00:01:46,090

little bit about himself he said gained

18

00:01:50,219 --> 00:01:48,850

the rank of e5 was decided the civilian

19

00:01:52,740 --> 00:01:50,229

world was better suited for me

20

00:01:54,510 --> 00:01:52,750

eventually found a job as depot level

21

00:01:56,580 --> 00:01:54,520

floor technician and have been in the

22

00:01:58,680 --> 00:01:56,590

same position ever since I have worked

23

00:02:00,900 --> 00:01:58,690

on a variety of Flers both old and new

24

00:02:02,910 --> 00:02:00,910

analog and digital I have seen more

25

00:02:04,020 --> 00:02:02,920

things in the sky with floors over with

26

00:02:05,910 --> 00:02:04,030

blurs over the years with different

27

00:02:07,590 --> 00:02:05,920

systems that make me believe that I'm

28

00:02:09,749 --> 00:02:07,600

somewhat of an expert in the field I'm

29

00:02:11,820 --> 00:02:09,759

not alone there are others in my shop

30

00:02:16,970 --> 00:02:11,830

but they aren't interested in commenting

31

00:02:22,949 --> 00:02:19,830

Dean thanks for coming on you know thank

32

00:02:25,350 --> 00:02:22,959

you for taking the time to to spend a

33

00:02:27,300 --> 00:02:25,360

little bit of time explaining the topic

34

00:02:30,050 --> 00:02:27,310

that you do research on today and also

35

00:02:32,850 --> 00:02:30,060

wanted to ask you who do you work for

36

00:02:35,610 --> 00:02:32,860

well I'm a defense contractor for

37

00:02:38,100 --> 00:02:35,620

government agency those type things I

38

00:02:39,630 --> 00:02:38,110

like to keep to myself because I'm still

39

00:02:41,330 --> 00:02:39,640

working on these government contracts

40

00:02:45,600 --> 00:02:41,340

and I don't want to jeopardize my

41

00:02:49,440 --> 00:02:45,610

livelihood but it is a three-letter

42

00:02:52,470 --> 00:02:49,450

agency it's pretty big and we'll just

43

00:02:54,300 --> 00:02:52,480

leave it at that for now that's fine you

44

00:02:57,680 --> 00:02:54,310

know we have a lot of guests actually

45

00:03:00,900 --> 00:02:57,690

high-profile guests too who work in

46

00:03:03,410 --> 00:03:00,910

defense contract type of positions and

47

00:03:05,640 --> 00:03:03,420

they definitely feel the same way you do

48

00:03:08,430 --> 00:03:05,650

researching this topic kind of puts them

49

00:03:10,080 --> 00:03:08,440

in that position so it's it's

50

00:03:11,490 --> 00:03:10,090

interesting we all have a passion for

51
00:03:13,770 --> 00:03:11,500
the same topic but we want to at least

52
00:03:16,830 --> 00:03:13,780
keep some semblance of privacy in our

53
00:03:20,040 --> 00:03:16,840
lives wanted to ask you could you please

54
00:03:20,880 --> 00:03:20,050
tell me oh do you recall the first

55
00:03:23,640 --> 00:03:20,890
moment

56
00:03:27,030 --> 00:03:23,650
that you felt the impetus to actually

57
00:03:31,290 --> 00:03:27,040
want to get to marry the topic of Fleur

58
00:03:33,870 --> 00:03:31,300
technology to the topic of UFOs or you

59
00:03:39,360 --> 00:03:33,880
ApS or you go ahead and tell us what

60
00:03:41,970 --> 00:03:39,370
topic that is okay looking back I've

61
00:03:44,100 --> 00:03:41,980
always been kind of a fan of science

62
00:03:47,220 --> 00:03:44,110
fiction and whatnot but I've never seen

63
00:03:50,520 --> 00:03:47,230

anything that would make me a real

64

00:03:54,120 --> 00:03:50,530

believer until I saw something that made

65

00:03:57,000 --> 00:03:54,130

me a skeptic which was the agua dia

66

00:04:00,660 --> 00:03:57,010

Puerto Rico UFO case that I stumbled

67

00:04:03,390 --> 00:04:00,670

across online when it was done by the

68

00:04:06,840 --> 00:04:03,400

SDU at the time scientific Coalition for

69

00:04:12,240 --> 00:04:06,850

ufology so I contacted them through

70

00:04:17,940 --> 00:04:12,250

their hyperlink and from there I started

71

00:04:22,220 --> 00:04:17,950

talking to some of the people and let's

72

00:04:26,880 --> 00:04:22,230

see I was talking to Richard rich - rich

73

00:04:28,830 --> 00:04:26,890

Hoffman and Robert Pape though we kind

74

00:04:31,170 --> 00:04:28,840

of went through the whole thing and I

75

00:04:33,810 --> 00:04:31,180

took the video to the shop and I showed

76

00:04:35,640 --> 00:04:33,820

my co-workers and you know all our years

77

00:04:38,750 --> 00:04:35,650

of combined experience we couldn't

78

00:04:43,020 --> 00:04:38,760

really come up with something that was a

79

00:04:45,690 --> 00:04:43,030

feasible theory so that's where I kind

80

00:04:46,920 --> 00:04:45,700

of remain today is that video freaked me

81

00:04:49,170 --> 00:04:46,930

out a lot of people are gonna say it's a

82

00:04:52,260 --> 00:04:49,180

mylar balloon or was a pelican or

83

00:04:56,690 --> 00:04:52,270

whatever but not from what we've seen on

84

00:04:59,219 --> 00:04:56,700

the videos because we get sent videos by

85

00:05:02,940 --> 00:04:59,229

pilots avionics techs and stuff to

86

00:05:05,340 --> 00:05:02,950

analyze problems system problems and we

87

00:05:08,430 --> 00:05:05,350

see that we also run the systems out

88

00:05:10,440 --> 00:05:08,440

back so we've seen plenty of video and

89

00:05:12,840 --> 00:05:10,450

then just didn't jive with the kind of

90

00:05:15,930 --> 00:05:12,850

things that we're used to saying oh that

91

00:05:18,510 --> 00:05:15,940

was dean real quick what was it about

92

00:05:21,120 --> 00:05:18,520

the Agudilla video that led you to

93

00:05:25,770 --> 00:05:21,130

believe it wasn't mylar balloons or

94

00:05:27,150 --> 00:05:25,780

Birds I think it's it was the the heat

95

00:05:29,520 --> 00:05:27,160

of the object and there was no obvious

96

00:05:33,450 --> 00:05:29,530

propulsion I mean I understand a balloon

97

00:05:34,560 --> 00:05:33,460

well it seemed like linear and travel it

98

00:05:37,650 --> 00:05:34,570

just

99

00:05:41,250 --> 00:05:37,660

is more erratic it'll go with the wind

100

00:05:43,620 --> 00:05:41,260

but for the in order for this object to

101
00:05:45,750 --> 00:05:43,630
just travel in this linear fashion

102
00:05:47,220 --> 00:05:45,760
they just didn't seem right and I know

103
00:05:49,650 --> 00:05:47,230
that the plane is going a different

104
00:05:52,200 --> 00:05:49,660
direction than the balloon and there

105
00:05:54,930 --> 00:05:52,210
might be some differences in elevation

106
00:05:59,250 --> 00:05:54,940
and whatnot but um it just seemed like

107
00:06:00,690 --> 00:05:59,260
um it didn't seem right you know the

108
00:06:03,150 --> 00:06:00,700
heat usually if you're gonna have a

109
00:06:04,350 --> 00:06:03,160
drone or mylar balloon mylar balloons

110
00:06:06,120 --> 00:06:04,360
are gonna be cold especially at that

111
00:06:08,820 --> 00:06:06,130
time at night it was like I think 9

112
00:06:11,340 --> 00:06:08,830
o'clock at night and this was pretty hot

113
00:06:14,430 --> 00:06:11,350

it was like the heat of you know an

114

00:06:17,780 --> 00:06:14,440

engine or you know over a hundred and

115

00:06:19,770 --> 00:06:17,790

140 degrees something like that but ok

116

00:06:22,290 --> 00:06:19,780

that's what kind of maintenance good

117

00:06:24,000 --> 00:06:22,300

because you're gonna see if it's you

118

00:06:26,840 --> 00:06:24,010

know drone you'll see the motors you'll

119

00:06:29,760 --> 00:06:26,850

see the props you it's just it wasn't it

120

00:06:32,910 --> 00:06:29,770

didn't I have okay

121

00:06:35,250 --> 00:06:32,920

okay and when how are you able to look

122

00:06:37,230 --> 00:06:35,260

at that piece of video and determine the

123

00:06:40,710 --> 00:06:37,240

heat that it's giving us and how do you

124

00:06:42,060 --> 00:06:40,720

know that it's about 140 degrees I'm not

125

00:06:44,540 --> 00:06:42,070

gonna say it's that temperature exactly

126

00:06:47,370 --> 00:06:44,550

because that's really hard to assess

127

00:06:49,020 --> 00:06:47,380

yeah just approximately oh yeah let's

128

00:06:51,270 --> 00:06:49,030

say between a hundred and two hundred

129

00:06:52,680 --> 00:06:51,280

degrees whatever you know and how are

130

00:06:55,700 --> 00:06:52,690

you able to determine the temperature by

131

00:06:58,020 --> 00:06:55,710

looking at the video temperature range

132

00:07:00,060 --> 00:06:58,030

yeah you see things in the background

133

00:07:01,710 --> 00:07:00,070

like you see the cars driving on the

134

00:07:03,720 --> 00:07:01,720

street I think at one point there was an

135

00:07:05,430 --> 00:07:03,730

engine on the tarmac there are other

136

00:07:08,130 --> 00:07:05,440

things to compare it to but it gets kind

137

00:07:11,540 --> 00:07:08,140

of tricky oh I know it was hot to the

138

00:07:14,010 --> 00:07:11,550

the air that it was traveling through

139

00:07:17,300 --> 00:07:14,020

because otherwise a balloon which was

140

00:07:20,100 --> 00:07:17,310

made out of a kind of tin foil mylar

141

00:07:22,950 --> 00:07:20,110

it's gonna cool down quickly and it

142

00:07:27,060 --> 00:07:22,960

wouldn't retain that heat so that's

143

00:07:32,100 --> 00:07:27,070

right it's it's gonna hard to explain

144

00:07:33,990 --> 00:07:32,110

but um you know I'm just comparing that

145

00:07:37,440 --> 00:07:34,000

compared to the other objects in the

146

00:07:45,900 --> 00:07:37,450

background okay and the Aguadilla that

147

00:07:47,890 --> 00:07:45,910

was a FLIR video as well yes let me try

148

00:07:50,260 --> 00:07:47,900

to make a distinction clear

149

00:07:53,590 --> 00:07:50,270

is forward-looking infra-red not to be

150

00:07:55,210 --> 00:07:53,600

confused with FSI which is where Systems

151

00:07:58,540 --> 00:07:55,220

Inc now sometimes are used

152

00:08:00,279 --> 00:07:58,550

interchangeably but when I say it's a

153

00:08:02,610 --> 00:08:00,289

FLIR video that just means it's an

154

00:08:06,700 --> 00:08:02,620

infrared video that's you know airborne

155

00:08:08,590 --> 00:08:06,710

sort of like not to jump in I think I'll

156

00:08:11,140 --> 00:08:08,600

clear this up for us at least some older

157

00:08:12,790 --> 00:08:11,150

folks they used to call every kind a lot

158

00:08:22,870 --> 00:08:12,800

of folks would call every copy machine a

159

00:08:28,680 --> 00:08:22,880

Xerox machine okay okay oh yeah I keep

160

00:08:34,000 --> 00:08:30,700

talking about the difference between

161

00:08:35,469 --> 00:08:34,010

what a flare is I was listening to

162

00:08:37,899 --> 00:08:35,479

actually can you can you explain

163

00:08:39,790 --> 00:08:37,909

elaborate a little bit more if there's

164

00:08:41,500 --> 00:08:39,800

any subtle or big differences if people

165

00:08:43,329 --> 00:08:41,510

have any misconceptions about what Fleur

166

00:08:45,100 --> 00:08:43,339

yeah and if you could explain the

167

00:08:48,100 --> 00:08:45,110

difference between FLIR and night-vision

168

00:08:49,930 --> 00:08:48,110

cuz I know a lot of folks go out on sky

169

00:08:51,550 --> 00:08:49,940

watches and whatnot and there's a lot of

170

00:08:54,430 --> 00:08:51,560

night vision floating around as well

171

00:08:55,840 --> 00:08:54,440

goggles and cameras and so on so if you

172

00:08:59,640 --> 00:08:55,850

could explain those differences that'd

173

00:09:05,530 --> 00:09:02,380

different manufacturers our shop takes

174

00:09:08,320 --> 00:09:05,540

in different manufacturers somewhere in

175

00:09:11,710 --> 00:09:08,330

Canada some are in Portland somewhere in

176

00:09:13,960 --> 00:09:11,720

Boston that kind of thing but yeah

177

00:09:15,940 --> 00:09:13,970

you're working on a variety of different

178

00:09:19,300 --> 00:09:15,950

ones than we get a factory trained that

179

00:09:20,980 --> 00:09:19,310

kind of thing as far as the difference

180

00:09:24,130 --> 00:09:20,990

between em fur that's a very good

181

00:09:26,590 --> 00:09:24,140

question because let's start at visible

182

00:09:31,060 --> 00:09:26,600

light which is like 400 to 700

183

00:09:33,579 --> 00:09:31,070

nanometers and that covers your rainbow

184

00:09:37,960 --> 00:09:33,589

spectrum there yep and they go in the

185

00:09:39,870 --> 00:09:37,970

near IR which is about I'm just gonna

186

00:09:42,670 --> 00:09:39,880

say about eight nine hundred nanometers

187

00:09:44,440 --> 00:09:42,680

okay so that's gonna be your video

188

00:09:47,230 --> 00:09:44,450

systems like your closed-circuit

189

00:09:48,760 --> 00:09:47,240

television you guys your cameras that

190

00:09:53,320 --> 00:09:48,770

are mounted and they have like an array

191

00:09:56,620 --> 00:09:53,330

of LEDs around the actual CCD or charge

192

00:09:59,740 --> 00:09:56,630

couple device so at night it needs

193

00:10:01,090 --> 00:09:59,750

illumination to see what's on the ground

194

00:10:04,270 --> 00:10:01,100

what you're looking at

195

00:10:06,790 --> 00:10:04,280

so that's where that array of LEDs comes

196

00:10:08,770 --> 00:10:06,800

into play because it'll switch over it

197

00:10:10,630 --> 00:10:08,780

says hey I like a photodiode or

198

00:10:12,310 --> 00:10:10,640

something to say hey look it's now night

199

00:10:16,020 --> 00:10:12,320

time where you need to turn the LEDs on

200

00:10:18,730 --> 00:10:16,030

and you know illuminate this source so

201

00:10:20,950 --> 00:10:18,740

that's still working in kind of a

202

00:10:24,550 --> 00:10:20,960

visible spectrum but when you're getting

203

00:10:28,060 --> 00:10:24,560

into shortwave infrared which is like

204

00:10:31,020 --> 00:10:28,070

kind of right the 1 2 3 micrometer then

205

00:10:34,360 --> 00:10:31,030

you're kind of overlapping the heat and

206

00:10:36,430 --> 00:10:34,370

the visible spectrum but what I deal

207

00:10:41,700 --> 00:10:36,440

with mostly is mid wave which is a 3 to

208

00:10:47,050 --> 00:10:41,710

5 micrometer so that is strictly thermal

209

00:10:48,850 --> 00:10:47,060

so it doesn't care about light anymore

210

00:10:50,710 --> 00:10:48,860

it just cares about heat and that's

211

00:10:52,060 --> 00:10:50,720

where people have a confusion because

212

00:10:55,000 --> 00:10:52,070

unless you use these systems a lot

213

00:10:57,790 --> 00:10:55,010

you're not going to understand that the

214

00:11:00,580 --> 00:10:57,800

difference between the two you can take

215

00:11:01,530 --> 00:11:00,590

two flashlights let's say you have an

216

00:11:04,060 --> 00:11:01,540

old in Kontest

217

00:11:07,000 --> 00:11:04,070

incandescent bulb flashlights in an LED

218

00:11:08,860 --> 00:11:07,010

flashlight well if you shine them both

219

00:11:11,050 --> 00:11:08,870

at the flare it's gonna see the bulb one

220

00:11:12,700 --> 00:11:11,060

easier because it sees the heat it's not

221

00:11:15,700 --> 00:11:12,710

gonna see the LED one at all because

222

00:11:18,550 --> 00:11:15,710

they're relatively not heat generating

223

00:11:20,620 --> 00:11:18,560

so you have to kind of relearn what

224

00:11:26,830 --> 00:11:20,630

you're seeing on the screen and it

225

00:11:28,420 --> 00:11:26,840

confuses a lot of people well I just was

226

00:11:29,830 --> 00:11:28,430

going over the Agudilla report which i

227

00:11:32,380 --> 00:11:29,840

have in front of me and i also shared

228

00:11:35,500 --> 00:11:32,390

the link to that in the time of the chat

229

00:11:37,990 --> 00:11:35,510

the chatroom that we have going on the

230

00:11:40,210 --> 00:11:38,000

podcast and this aagadu report is you

231

00:11:42,370 --> 00:11:40,220

were talking about Dean which was

232

00:11:45,670 --> 00:11:42,380

written up by folks from the scientific

233

00:11:49,360 --> 00:11:45,680

coalition of UAP studies I noticed in it

234

00:11:51,070 --> 00:11:49,370

it says and the conclusion part of it

235

00:11:53,050 --> 00:11:51,080

the problem with assigning the

236

00:11:56,380 --> 00:11:53,060

temperature variation to low pressure

237

00:11:57,970 --> 00:11:56,390

zones is that variations with the same

238

00:12:00,220 --> 00:11:57,980

order of magnitude are seen to be

239

00:12:02,530 --> 00:12:00,230

occurring in areas away from the unknown

240

00:12:04,570 --> 00:12:02,540

object so there could be issues

241

00:12:09,100 --> 00:12:04,580

regarding assigning temperature

242

00:12:12,150 --> 00:12:09,110

variation to low pressure zones so

243

00:12:14,920 --> 00:12:12,160

there's all kinds of potential

244

00:12:17,230 --> 00:12:14,930

challenges that a person might deal with

245

00:12:19,739 --> 00:12:17,240

regarding studying you AP's in the sky

246

00:12:22,509 --> 00:12:19,749

with flair technology is that right

247

00:12:24,999 --> 00:12:22,519

that's very right and there's also the

248

00:12:27,639 --> 00:12:25,009

issue of the auto gain and Auto level

249

00:12:30,340 --> 00:12:27,649

within the clear that automatically

250

00:12:33,220 --> 00:12:30,350

adjust the gain level depending on the

251

00:12:35,199 --> 00:12:33,230

scene that it's looking at so there's

252

00:12:37,269 --> 00:12:35,209

gonna be you can't really say oh that's

253

00:12:39,970 --> 00:12:37,279

gonna be 180 degrees because it's

254

00:12:42,699 --> 00:12:39,980

automatically adjusting the the white

255

00:12:45,519 --> 00:12:42,709

gray black gradients to what it's

256

00:12:48,280 --> 00:12:45,529

looking at okay looking at a jet engine

257

00:12:53,619 --> 00:12:48,290

and it's gonna tone things down you know

258

00:12:54,910 --> 00:12:53,629

it's not going to be sharp no it's okay

259

00:12:56,590 --> 00:12:54,920

you could you don't even have to use

260

00:12:58,419 --> 00:12:56,600

layman language all the time because

261

00:13:01,989 --> 00:12:58,429

there are people who will listen to show

262

00:13:04,210 --> 00:13:01,999

who are our expert level so so so see if

263

00:13:10,929 --> 00:13:04,220

you can do layman language and the

264

00:13:14,199 --> 00:13:10,939

expert language that's fine okay it's a

265

00:13:17,230 --> 00:13:14,209

fluctuation and the and the scenes that

266

00:13:22,090 --> 00:13:17,240

you will be seeing so I'll just leave it

267

00:13:23,499 --> 00:13:22,100

there yeah and then also yeah Dean I

268

00:13:27,579 --> 00:13:23,509

want to jump in here real quick with a

269

00:13:30,730 --> 00:13:27,589

question now on the actual Raytheon and

270

00:13:33,129 --> 00:13:30,740

FLIR pod display information now it

271

00:13:35,860 --> 00:13:33,139

looks like you know what you would look

272

00:13:37,929 --> 00:13:35,870

at when you look in the the the

273

00:13:41,499 --> 00:13:37,939

viewfinder of sort of any camera where

274

00:13:45,389 --> 00:13:41,509

it's got different measurements

275

00:13:49,139 --> 00:13:45,399

available and do you know if the

276

00:13:52,239 --> 00:13:49,149

infrared level you know the the the

277

00:13:54,429 --> 00:13:52,249

height of the wavelength so is that an

278

00:13:58,210 --> 00:13:54,439

adjustable kind of thing or is that that

279

00:13:59,650 --> 00:13:58,220

pretty well set no that should be an

280

00:14:01,329 --> 00:13:59,660

adjustable thing at least from the

281

00:14:04,989 --> 00:14:01,339

systems that I work with you know you

282

00:14:07,090 --> 00:14:04,999

can go annual gain in level and adjusted

283

00:14:13,030 --> 00:14:07,100

just a situation I don't see why they

284

00:14:15,429 --> 00:14:13,040

wouldn't make certain situations where

285

00:14:16,960 --> 00:14:15,439

the auto dating level isn't gonna do

286

00:14:19,119 --> 00:14:16,970

what you want it to so you're gonna want

287

00:14:22,389 --> 00:14:19,129

to be able to you know manipulate it to

288

00:14:24,160 --> 00:14:22,399

your likings okay now on the screen now

289

00:14:27,830 --> 00:14:24,170

I don't know if you have that available

290

00:14:30,170 --> 00:14:27,840

but the the at FLIR display in

291

00:14:33,770 --> 00:14:30,180

the the on the right-hand side under

292

00:14:36,710 --> 00:14:33,780

where it says LST I saw the same number

293

00:14:38,720 --> 00:14:36,720

on a couple of different videos 1688 do

294

00:14:42,230 --> 00:14:38,730

you know if a that's the adjustment or

295

00:14:45,020 --> 00:14:42,240

the the wavelength levels for the the

296

00:14:48,440 --> 00:14:45,030

infrared light spectrum are you not do

297

00:14:53,180 --> 00:14:48,450

you just not know what that is or my

298

00:14:55,070 --> 00:14:53,190

glasses you say it's LST yeah it's on

299

00:14:57,020 --> 00:14:55,080

the right side of the display and

300

00:15:00,980 --> 00:14:57,030

there's nothing there describing what it

301
00:15:02,750 --> 00:15:00,990
is or what it does yeah I have a shirt

302
00:15:05,060 --> 00:15:02,760
screen going Frank are you talking about

303
00:15:07,220 --> 00:15:05,070
the picture you have right now yeah it's

304
00:15:09,320 --> 00:15:07,230
gonna be the to the right right under

305
00:15:13,940 --> 00:15:09,330
where it says LST you've got two numbers

306
00:15:16,070 --> 00:15:13,950
1688 and 1688 oh I see it okay do you

307
00:15:19,520 --> 00:15:16,080
see it right there my arrows going over

308
00:15:21,290 --> 00:15:19,530
at LST okay maybe it's like laser slant

309
00:15:24,560 --> 00:15:21,300
or maybe they're doing some kind of

310
00:15:27,980 --> 00:15:24,570
slant range okay anything to do with the

311
00:15:29,810 --> 00:15:27,990
manual Gaynor levels okay okay so I

312
00:15:32,150 --> 00:15:29,820
wanted to also ask you a little bit more

313
00:15:35,300 --> 00:15:32,160

about this aqua do report because in

314

00:15:37,610 --> 00:15:35,310

there it also talks about this it says

315

00:15:40,010 --> 00:15:37,620

some arguments have been advanced that

316

00:15:42,590 --> 00:15:40,020

the object regarding again the aqua do

317

00:15:44,390 --> 00:15:42,600

report could be a balloon and that the

318

00:15:46,370 --> 00:15:44,400

motion of the balloon relative to the

319

00:15:48,350 --> 00:15:46,380

background is an illusion created by the

320

00:15:51,470 --> 00:15:48,360

motion of the plane circling the balloon

321

00:15:54,110 --> 00:15:51,480

that is incorrect there are some frames

322

00:15:56,420 --> 00:15:54,120

of video having no background motion at

323

00:16:00,400 --> 00:15:56,430

all and the UAP can be seen changing

324

00:16:02,720 --> 00:16:00,410

locations relative to the background so

325

00:16:04,970 --> 00:16:02,730

there's folks and I have seen this -

326

00:16:08,000 --> 00:16:04,980

I've seen a few videos where people are

327

00:16:12,530 --> 00:16:08,010

vehemently exclaiming and explaining

328

00:16:14,990 --> 00:16:12,540

that there this Aguadilla object was a

329

00:16:21,350 --> 00:16:15,000

balloon why was it not a balloon in your

330

00:16:24,500 --> 00:16:21,360

opinion team the nature of the travel

331

00:16:27,350 --> 00:16:24,510

because if the balloon was flying oh

332

00:16:28,640 --> 00:16:27,360

cool it's just across the lowan then you

333

00:16:31,130 --> 00:16:28,650

would see more changes in elevation

334

00:16:34,040 --> 00:16:31,140

because a balloon just doesn't fly in a

335

00:16:36,620 --> 00:16:34,050

straight line and it doesn't I know it

336

00:16:40,310 --> 00:16:36,630

was kind of like yeah that makes sense

337

00:16:41,900 --> 00:16:40,320

actually it's just yeah it's just

338

00:16:44,960 --> 00:16:41,910

happily floating in the air

339

00:16:47,420 --> 00:16:44,970

you know so it is this just looked like

340

00:16:50,000 --> 00:16:47,430

it was headed in a certain direction and

341

00:16:53,120 --> 00:16:50,010

then of course when it gets to the the

342

00:16:54,530 --> 00:16:53,130

ocean mm-hmm it goes under the water

343

00:16:57,620 --> 00:16:54,540

from what it looks like there's a bit of

344

00:17:00,050 --> 00:16:57,630

ha what that was and then when it pops

345

00:17:03,110 --> 00:17:00,060

up water and it splits into objects

346

00:17:05,140 --> 00:17:03,120

that's another line of speculation

347

00:17:08,059 --> 00:17:05,150

because people have said ah no it's a

348

00:17:09,439 --> 00:17:08,069

that it was a bundled mylar balloon so

349

00:17:14,360 --> 00:17:09,449

that's why it appeared to do that that's

350

00:17:17,120 --> 00:17:14,370

that's that's a you know you a secrecy

351
00:17:18,710 --> 00:17:17,130
with the FLIR camera and I still say no

352
00:17:22,579 --> 00:17:18,720
they don't do that I've never seen them

353
00:17:24,650 --> 00:17:22,589
do that but I just I look at it and I

354
00:17:27,290 --> 00:17:24,660
say that's weird I show other people the

355
00:17:29,630 --> 00:17:27,300
shot though that's weird yeah and that

356
00:17:32,360 --> 00:17:29,640
also brings up another question that I

357
00:17:34,520 --> 00:17:32,370
have for you and that is not just with

358
00:17:36,200 --> 00:17:34,530
the Aguadilla report regarding this

359
00:17:38,780 --> 00:17:36,210
object that seemed to have some kind of

360
00:17:43,610 --> 00:17:38,790
intelligence that was dictating where it

361
00:17:46,910 --> 00:17:43,620
went but also in many reports around the

362
00:17:49,070 --> 00:17:46,920
world there are objects that are

363
00:17:51,470 --> 00:17:49,080

reported traversing at incredibly high

364

00:17:53,630 --> 00:17:51,480

speeds obviously there's some kind of

365

00:17:57,440 --> 00:17:53,640

form of intelligence directing of the

366

00:17:59,420 --> 00:17:57,450

object whether it's something inside the

367

00:18:02,330 --> 00:17:59,430

craft if there is a craft or it's a

368

00:18:04,250 --> 00:18:02,340

drone related object what I wanted to

369

00:18:07,250 --> 00:18:04,260

ask you is you ever rely on your gut

370

00:18:08,960 --> 00:18:07,260

feeling common sense so to speak or

371

00:18:11,360 --> 00:18:08,970

rationalizing it through gut feeling

372

00:18:13,700 --> 00:18:11,370

saying this feels like this is not a

373

00:18:15,620 --> 00:18:13,710

balloon this feels like it's not a drone

374

00:18:26,750 --> 00:18:15,630

this feels like it could be something

375

00:18:30,200 --> 00:18:26,760

else do you ever go by gut feeling the

376

00:18:32,000 --> 00:18:30,210

weirdest thing that I see is things in

377

00:18:34,520 --> 00:18:32,010

terms of motion and when we look out

378

00:18:36,350 --> 00:18:34,530

back with the system's when I look up in

379

00:18:38,780 --> 00:18:36,360

the sky is something circling it's a

380

00:18:40,850 --> 00:18:38,790

bird as something's traveling traveling

381

00:18:42,830 --> 00:18:40,860

in a linear fashion then it's a plane

382

00:18:47,680 --> 00:18:42,840

could be a couple like that one right

383

00:18:50,660 --> 00:18:47,690

there that's a what is it's a p3 so

384

00:18:55,040 --> 00:18:50,670

that's that's a close-up because we're

385

00:18:57,580 --> 00:18:55,050

kind of close to NES Jack's but um

386

00:19:00,440 --> 00:18:57,590

okay all right there you go that's a PA

387

00:19:02,480 --> 00:19:00,450

so I see these things all the time and

388

00:19:05,420 --> 00:19:02,490

see those the spiking of the engines

389

00:19:07,070 --> 00:19:05,430

there and the flaring that's the what

390

00:19:09,710 --> 00:19:07,080

typically what a jet engine looks like

391

00:19:11,720 --> 00:19:09,720

it looks like one of those little balls

392

00:19:13,220 --> 00:19:11,730

that you would stick your sock when

393

00:19:15,830 --> 00:19:13,230

you're a kid you know I'm talking about

394

00:19:19,160 --> 00:19:15,840

mmm they're little hitchhikers or

395

00:19:22,430 --> 00:19:19,170

whatever they call it fluctuates but

396

00:19:24,080 --> 00:19:22,440

that's what you're gonna see now I guess

397

00:19:25,910 --> 00:19:24,090

to the the videos that have been

398

00:19:29,960 --> 00:19:25,920

released by the Defense Department the

399

00:19:32,150 --> 00:19:29,970

three the the FLIR the gimbal and the

400

00:19:34,130 --> 00:19:32,160

go-fast videos you've taken a closer

401
00:19:37,820 --> 00:19:34,140
look at all those and what about those

402
00:19:40,220 --> 00:19:37,830
that really got your attention you know

403
00:19:44,570 --> 00:19:40,230
the the gimbal is the one that rotates

404
00:19:46,030 --> 00:19:44,580
right right okay yeah the FLIR and

405
00:19:50,420 --> 00:19:46,040
they're gonna go fast

406
00:19:52,910 --> 00:19:50,430
yeah you know interesting but caught my

407
00:19:55,100 --> 00:19:52,920
attention was a gimbal and I've been

408
00:19:56,300 --> 00:19:55,110
arguing with skeptics for quite some

409
00:20:00,320 --> 00:19:56,310
time now okay

410
00:20:01,880 --> 00:20:00,330
it's the it's how crisp the image

411
00:20:04,820 --> 00:20:01,890
remains because you see these things

412
00:20:07,280 --> 00:20:04,830
flying and you see the heat signature

413
00:20:09,470 --> 00:20:07,290

that it gives you it's a kind of erratic

414

00:20:11,780 --> 00:20:09,480

but the gimbal one just kind of remains

415

00:20:14,690 --> 00:20:11,790

a consistent form and it's crisp and

416

00:20:17,030 --> 00:20:14,700

then when it does that rotation to me

417

00:20:20,930 --> 00:20:17,040

just a layman sturms it looks like

418

00:20:23,660 --> 00:20:20,940

you're adjusting like a potentiometer or

419

00:20:28,330 --> 00:20:23,670

on a motor it's just it rolls in a very

420

00:20:31,130 --> 00:20:28,340

odd fashion that I don't normally see I

421

00:20:33,770 --> 00:20:31,140

have recorded f-18s flying and I

422

00:20:36,770 --> 00:20:33,780

recorded one banking to the left and it

423

00:20:40,250 --> 00:20:36,780

didn't have the same signature as the

424

00:20:42,770 --> 00:20:40,260

one on gimble so you know I can you can

425

00:20:44,900 --> 00:20:42,780

tell you can get an idea of what the

426

00:20:51,050 --> 00:20:44,910

craft is by the heat signature can you

427

00:20:53,090 --> 00:20:51,060

not yeah because that's you know okay

428

00:20:58,010 --> 00:20:53,100

you got the f-18 video up there now yeah

429

00:21:01,820 --> 00:20:58,020

yeah I wanted to ask you just a random

430

00:21:04,880 --> 00:21:01,830

question about radar whether you're an

431

00:21:08,340 --> 00:21:04,890

expert on radar or not how do you feel

432

00:21:13,320 --> 00:21:08,350

about the possibility of radar

433

00:21:16,860 --> 00:21:13,330

regarding a UAP being used as proof that

434

00:21:18,389 --> 00:21:16,870

there was a UFO or a UAP again I

435

00:21:21,330 --> 00:21:18,399

understand that means unidentified

436

00:21:23,370 --> 00:21:21,340

object you know what I'm saying here but

437

00:21:26,159 --> 00:21:23,380

that it's not an airplane or whatever

438

00:21:30,240 --> 00:21:26,169

but radar being used to determine as

439

00:21:33,090 --> 00:21:30,250

proof that it's not an airplane do you

440

00:21:39,450 --> 00:21:33,100

believe that that can be used as proof

441

00:21:41,070 --> 00:21:39,460

or evidence radar I do um I don't have

442

00:21:43,619 --> 00:21:41,080

any personal experience with repairing

443

00:21:48,180 --> 00:21:43,629

radar you know operating it in an

444

00:21:51,119 --> 00:21:48,190

aircraft but I I have been approached by

445

00:21:55,409 --> 00:21:51,129

a pilot who talked to us in the shop and

446

00:21:57,600 --> 00:21:55,419

he this is maybe twelve thirteen years

447

00:21:59,070 --> 00:21:57,610

ago he came into our shop and he said

448

00:22:01,320 --> 00:21:59,080

hey look you know I saw this thing on

449

00:22:03,419 --> 00:22:01,330

the aircraft like it was an older flare

450

00:22:07,350 --> 00:22:03,429

system but he said it was kind of cigar

451
00:22:09,350 --> 00:22:07,360
shaped and he said his radar just pinged

452
00:22:14,009 --> 00:22:09,360
out is the way he said it was all nines

453
00:22:15,450 --> 00:22:14,019
so wouldn't give him any these are the

454
00:22:19,409 --> 00:22:15,460
object just moved an incredible rate of

455
00:22:22,499 --> 00:22:19,419
speed and his radar in the aircraft was

456
00:22:24,560 --> 00:22:22,509
showing him something ridiculous so it

457
00:22:27,629 --> 00:22:24,570
was corresponding in that fashion but

458
00:22:31,200 --> 00:22:27,639
that's about all that comes to mind all

459
00:22:33,269 --> 00:22:31,210
I can give you on that okay and then I

460
00:22:36,090 --> 00:22:33,279
just wanted to ask you a different

461
00:22:40,200 --> 00:22:36,100
question and that is when you were a kid

462
00:22:42,149 --> 00:22:40,210
and then you you went into like a you

463
00:22:44,820 --> 00:22:42,159

know like high school and then college

464

00:22:49,470 --> 00:22:44,830

at what point were you fascinated by

465

00:22:52,470 --> 00:22:49,480

technology that allowed people to record

466

00:22:54,749 --> 00:22:52,480

events in the sky were you recording all

467

00:22:57,749 --> 00:22:54,759

along or what point did you become

468

00:23:02,789 --> 00:22:57,759

fascinated by the equipment to use to do

469

00:23:05,100 --> 00:23:02,799

what you do I guess when I started my

470

00:23:08,639 --> 00:23:05,110

career job that I'm doing now I never

471

00:23:10,379 --> 00:23:08,649

was a Sky Watcher you know or I'll look

472

00:23:11,879 --> 00:23:10,389

up in the sky every once in a while but

473

00:23:13,919 --> 00:23:11,889

I'm just like anybody else in that

474

00:23:16,889 --> 00:23:13,929

regards um it didn't really start

475

00:23:20,009 --> 00:23:16,899

catching my attention until I saw the

476

00:23:22,609 --> 00:23:20,019

Aguadilla case and then I had a know my

477

00:23:24,950 --> 00:23:22,619

own little sighting in the

478

00:23:38,529 --> 00:23:24,960

I don't think I've told you about but

479

00:23:46,149 --> 00:23:42,499

are you guys okay a little bit of an

480

00:23:52,460 --> 00:23:49,090

how am i doing now you're doing quite

481

00:23:55,159 --> 00:23:52,470

okay alright so um anyway in the

482

00:24:03,999 --> 00:23:56,930

I was typing in an email and a co-worker

483

00:24:06,919 --> 00:24:04,009

came up to me so okay I was kind of

484

00:24:09,590 --> 00:24:06,929

annoyed because I'm sitting there you

485

00:24:10,820 --> 00:24:09,600

know structuring a sentence I just send

486

00:24:12,200 --> 00:24:10,830

to a vendor you know I'm getting ready

487

00:24:14,930 --> 00:24:12,210

to type this email okay let's see what

488

00:24:17,119 --> 00:24:14,940

you got right now so we go on the back

489

00:24:19,759 --> 00:24:17,129

and there's an object this guy is just a

490

00:24:20,960 --> 00:24:19,769

circle and I said okay what a jet you

491

00:24:23,239 --> 00:24:20,970

know he's like now it's just been

492

00:24:25,930 --> 00:24:23,249

sitting there for 10-15 minutes I said

493

00:24:29,180 --> 00:24:25,940

okay so we started looking at it and

494

00:24:31,159 --> 00:24:29,190

then when he's all the weirdest thing is

495

00:24:35,060 --> 00:24:31,169

you can't see with a daylight cameras

496

00:24:38,539 --> 00:24:35,070

and we switch over to the EO wide and

497

00:24:42,289 --> 00:24:38,549

the EO arrow and you can't see the

498

00:24:43,759 --> 00:24:42,299

object it's a blue sky and by the size

499

00:24:44,779 --> 00:24:43,769

of it I couldn't understand why you

500

00:24:47,930 --> 00:24:44,789

wouldn't be able to see there's almost

501
00:24:50,359 --> 00:24:47,940
like it was quote so the weirdest part

502
00:24:51,830 --> 00:24:50,369
of it is it didn't move you know cuz we

503
00:24:54,019 --> 00:24:51,840
look at the moon and stuff all the time

504
00:24:56,509 --> 00:24:54,029
and you still see the moon traversing to

505
00:24:59,299 --> 00:24:56,519
the sky because you know planetary

506
00:25:00,950 --> 00:24:59,309
movement but this thing didn't move it

507
00:25:04,159 --> 00:25:00,960
was like geosynchronous they just sat

508
00:25:05,539 --> 00:25:04,169
there and then we were about five or six

509
00:25:07,249 --> 00:25:05,549
of us were sitting there watching it and

510
00:25:08,810 --> 00:25:07,259
we said you know what we're watch it

511
00:25:11,899 --> 00:25:08,820
with this old analog system let's get a

512
00:25:13,489 --> 00:25:11,909
high-def system and get a better stand

513
00:25:15,529 --> 00:25:13,499

off you know so we can see it clearer

514

00:25:18,109 --> 00:25:15,539

and so that's what we did we put another

515

00:25:21,169 --> 00:25:18,119

system in its place and by the time the

516

00:25:24,799 --> 00:25:21,179

cryogenic cooler had reached his optimal

517

00:25:27,440 --> 00:25:24,809

temperature then the system couldn't

518

00:25:29,060 --> 00:25:27,450

find it it was gone it was just there

519

00:25:30,950 --> 00:25:29,070

was no way it could have if it was a

520

00:25:33,320 --> 00:25:30,960

plane or something just travel through

521

00:25:36,050 --> 00:25:33,330

the sky a jet vanished and we're

522

00:25:39,140 --> 00:25:36,060

thinking to ourselves well even if

523

00:25:39,890 --> 00:25:39,150

like a blip if it wouldn't take that

524

00:25:41,840 --> 00:25:39,900

long

525

00:25:44,780 --> 00:25:41,850

we just couldn't figure it out so where

526

00:25:47,270 --> 00:25:44,790

to go where did it go yeah I've never

527

00:25:49,820 --> 00:25:47,280

seen it since and that kind of sucks

528

00:25:51,920 --> 00:25:49,830

because I'm cursed now every time I look

529

00:25:54,650 --> 00:25:51,930

out the back I'm always looking for this

530

00:25:58,820 --> 00:25:54,660

thing it's just you know where where is

531

00:26:00,850 --> 00:25:58,830

it just it's gone it was cool to see it

532

00:26:03,340 --> 00:26:00,860

but at the same time you know I'm still

533

00:26:07,490 --> 00:26:03,350

looking forward to pop up again someday

534

00:26:11,480 --> 00:26:07,500

okay well I wanted to ask you Dean about

535

00:26:13,790 --> 00:26:11,490

drones the quad copters multirotors that

536

00:26:15,470 --> 00:26:13,800

people fly for hobby do you mind telling

537

00:26:17,810 --> 00:26:15,480

us a little bit about that and how I

538

00:26:25,400 --> 00:26:17,820

think that you also get involved in

539

00:26:29,780 --> 00:26:25,410

building and flying them yes after the

540

00:26:33,020 --> 00:26:29,790

case there was speculation I jumped into

541

00:26:36,320 --> 00:26:33,030

the whole argument but building drones

542

00:26:39,170 --> 00:26:36,330

and I started building them because you

543

00:26:41,210 --> 00:26:39,180

can buy a drone and fly it but it's not

544

00:26:42,410 --> 00:26:41,220

as much fun to me because I want to know

545

00:26:46,280 --> 00:26:42,420

how it works because I know I'm gonna

546

00:26:48,350 --> 00:26:46,290

crash it that's what I started doing is

547

00:26:50,210 --> 00:26:48,360

and you do crash them you know if you

548

00:26:52,550 --> 00:26:50,220

buy a drone that's the first north

549

00:26:55,040 --> 00:26:52,560

that's the first log dirty you're gonna

550

00:26:58,850 --> 00:26:55,050

crash it right well I'm able to rebuild

551
00:27:00,950 --> 00:26:58,860
and now I've got like a little squadron

552
00:27:05,480 --> 00:27:00,960
of maybe five or six drones in my garage

553
00:27:07,700 --> 00:27:05,490
that I can fly but anyway when you look

554
00:27:11,210 --> 00:27:07,710
at them with a FLIR camera I don't know

555
00:27:13,580 --> 00:27:11,220
if you had the video but you see the

556
00:27:16,190 --> 00:27:13,590
legs you see the rotors you see the heat

557
00:27:18,590 --> 00:27:16,200
and the motor see it's pretty obvious

558
00:27:22,310 --> 00:27:18,600
it's a drone there's not you don't see a

559
00:27:25,160 --> 00:27:22,320
blob of heat it's you're able to

560
00:27:27,680 --> 00:27:25,170
distinguish movement you know you know

561
00:27:29,570 --> 00:27:27,690
or you would see like if it was a model

562
00:27:35,060 --> 00:27:29,580
plane or something you'd see the heat of

563
00:27:40,960 --> 00:27:35,070

the propulsion does that make sense yeah

564

00:27:44,300 --> 00:27:40,970

yeah and but you know you might end up

565

00:27:46,010 --> 00:27:44,310

being a little redundant here but that's

566

00:27:49,370 --> 00:27:46,020

okay because I want our listeners to

567

00:27:53,960 --> 00:27:49,380

hear why you think

568

00:27:57,350 --> 00:27:53,970

some objects seen in Fleur videos could

569

00:27:59,659 --> 00:27:57,360

not be drones can you can you break it

570

00:28:01,850 --> 00:27:59,669

down even further or give more arguments

571

00:28:09,139 --> 00:28:01,860

regarding why that's the separation

572

00:28:11,570 --> 00:28:09,149

between that okay use me for example

573

00:28:15,019 --> 00:28:11,580

let's take the Agudilla case where you

574

00:28:16,519 --> 00:28:15,029

have the supposed object going across

575

00:28:18,440 --> 00:28:16,529

the island a lot of people have said ah

576

00:28:20,899 --> 00:28:18,450

well probably there's a drone and

577

00:28:23,060 --> 00:28:20,909

somebody just flew it and I said well

578

00:28:25,220 --> 00:28:23,070

that's not really feasible because to

579

00:28:26,659 --> 00:28:25,230

fly a drone at night you're gonna need a

580

00:28:28,249 --> 00:28:26,669

couple of different things you're gonna

581

00:28:30,980 --> 00:28:28,259

need lights on the drone that show you

582

00:28:34,310 --> 00:28:30,990

the position of the drone I've seen that

583

00:28:35,930 --> 00:28:34,320

yeah yeah so I usually have like green

584

00:28:38,749 --> 00:28:35,940

on the back leg this would show me it's

585

00:28:40,549 --> 00:28:38,759

facing away from me and red if it gets

586

00:28:42,320 --> 00:28:40,559

turned around because you have to have

587

00:28:45,740 --> 00:28:42,330

it you know it fits the wrong position

588

00:28:48,320 --> 00:28:45,750

in Y all the way that you steer and it's

589

00:28:51,110 --> 00:28:48,330

gonna go a different direction so anyway

590

00:28:54,230 --> 00:28:51,120

you would have to be a pretty advanced

591

00:28:58,639 --> 00:28:54,240

drone flier to be flying at night that

592

00:29:00,529 --> 00:28:58,649

much travel because typically even the

593

00:29:03,440 --> 00:29:00,539

drones that I build they only have like

594

00:29:05,360 --> 00:29:03,450

a mile range so your dad it's sort of

595

00:29:08,389 --> 00:29:05,370

like any kind of an RC aircraft that

596

00:29:13,310 --> 00:29:08,399

isn't it exactly so that's what I use is

597

00:29:15,740 --> 00:29:13,320

a turnigy RC controller so it only has

598

00:29:18,789 --> 00:29:15,750

so much range and then once the range is

599

00:29:21,619 --> 00:29:18,799

done it's just gonna fall out of the sky

600

00:29:23,960 --> 00:29:21,629

unless it has an auto return function or

601
00:29:26,690 --> 00:29:23,970
something like that but yeah this thing

602
00:29:31,090 --> 00:29:26,700
just went right into the okay I mean it

603
00:29:34,310 --> 00:29:31,100
just didn't add up for me okay go ahead

604
00:29:35,600 --> 00:29:34,320
just again you would see some movement

605
00:29:37,909 --> 00:29:35,610
of the blades

606
00:29:40,070 --> 00:29:37,919
you know chopping the air you would see

607
00:29:42,320 --> 00:29:40,080
the the heat of those motors it's not

608
00:29:45,200 --> 00:29:42,330
going to be a solid ball a heat even if

609
00:29:49,850 --> 00:29:45,210
it's a drone unless you make the drone a

610
00:29:51,440 --> 00:29:49,860
solid looking object and it's heated up

611
00:29:55,249 --> 00:29:51,450
somehow which would be ridiculous but

612
00:29:58,100 --> 00:29:55,259
anyway I noticed a picture where you're

613
00:30:00,279 --> 00:29:58,110

flying so you have your pilot's license

614

00:30:02,700 --> 00:30:00,289

and when did you get involved in that

615

00:30:06,539 --> 00:30:02,710

I'm a hobbyist so

616

00:30:08,399 --> 00:30:06,549

okay I started years ago before the FAA

617

00:30:12,419 --> 00:30:08,409

got involved with it a lot of the

618

00:30:14,820 --> 00:30:12,429

groaning no I didn't register the drones

619

00:30:17,159 --> 00:30:14,830

but now they think they are at the point

620

00:30:18,840 --> 00:30:17,169

where you're like a hobbyist then we're

621

00:30:21,560 --> 00:30:18,850

not concerned about you having drones

622

00:30:24,240 --> 00:30:21,570

license I think you need a license to do

623

00:30:27,269 --> 00:30:24,250

commercial type of applications like if

624

00:30:29,940 --> 00:30:27,279

you're gonna do surveying or if you're

625

00:30:31,919 --> 00:30:29,950

gonna do like a real estate pan around

626

00:30:33,389 --> 00:30:31,929

the house with the drone that kind of

627

00:30:35,460 --> 00:30:33,399

thing if you use an ink professionally

628

00:30:37,320 --> 00:30:35,470

in essence then you need the drones

629

00:30:39,600 --> 00:30:37,330

license otherwise it's a hobbyist you

630

00:30:42,029 --> 00:30:39,610

can you know you're limited to certain

631

00:30:43,529 --> 00:30:42,039

things like you can only have like 400

632

00:30:44,940 --> 00:30:43,539

feet in elevation you're not supposed to

633

00:30:46,560 --> 00:30:44,950

fly at night you're not supposed to

634

00:30:51,600 --> 00:30:46,570

drink a lot of beer before you fly that

635

00:30:53,419 --> 00:30:51,610

kind of okay and then I wanted to jump

636

00:30:58,260 --> 00:30:53,429

to a different subject Frank and that is

637

00:31:02,039 --> 00:30:58,270

Dean on our show while back we had USS

638

00:31:05,490 --> 00:31:02,049

Nimitz in USS Princeton folks talking

639

00:31:08,060 --> 00:31:05,500

about the tic-tac object and you know

640

00:31:12,480 --> 00:31:08,070

something really interesting came up I

641

00:31:16,620 --> 00:31:12,490

asked them the gist of my question was

642

00:31:19,710 --> 00:31:16,630

do you believe that UFO was derived from

643

00:31:22,860 --> 00:31:19,720

et related technology or do you believe

644

00:31:25,740 --> 00:31:22,870

it was one of ours and one of them said

645

00:31:26,519 --> 00:31:25,750

it was one of ours how do you feel about

646

00:31:34,100 --> 00:31:26,529

that

647

00:31:36,539 --> 00:31:34,110

possibility I mean if you look at DARPA

648

00:31:39,750 --> 00:31:36,549

you know Defense Advanced Research

649

00:31:42,330 --> 00:31:39,760

Projects Agency they do a lot of crazy

650

00:31:44,700 --> 00:31:42,340

stuff and probably have technology that

651
00:31:47,120 --> 00:31:44,710
we're not aware of so I wouldn't rule it

652
00:31:52,440 --> 00:31:47,130
out I would say that's definitely a

653
00:31:56,340 --> 00:31:52,450
plausible explanation okay and wanted to

654
00:31:59,490 --> 00:31:56,350
ask you going along that idea that it is

655
00:32:02,100 --> 00:31:59,500
ours would it be true then that the

656
00:32:05,279 --> 00:32:02,110
military is ahead by I'm just making it

657
00:32:07,500 --> 00:32:05,289
up I've always heard 10 to 20 years

658
00:32:12,539 --> 00:32:07,510
maybe even slightly longer in their

659
00:32:13,680 --> 00:32:12,549
technology than the private sector how

660
00:32:16,320 --> 00:32:13,690
do you how do you what's your

661
00:32:18,630 --> 00:32:16,330
perspective on that

662
00:32:22,590 --> 00:32:18,640
yeah I could say that's the possibility

663
00:32:25,500 --> 00:32:22,600

- I think you kind of have to be high up

664

00:32:28,230 --> 00:32:25,510

there in order to be privy to that kind

665

00:32:36,050 --> 00:32:28,240

of technology mm-hmm I've seen some

666

00:32:38,340 --> 00:32:36,060

technology when I was in AV missiles and

667

00:32:41,880 --> 00:32:38,350

that was something we just didn't talk

668

00:32:44,760 --> 00:32:41,890

about but it's probably a normal thing

669

00:32:47,760 --> 00:32:44,770

nowadays but well the problem I have

670

00:32:52,920 --> 00:32:47,770

with it being one of ours is is if the

671

00:32:55,040 --> 00:32:52,930

technology is maybe 10 to 20 years in

672

00:32:57,270 --> 00:32:55,050

the future according to that military

673

00:32:58,920 --> 00:32:57,280

that theory just gave you about the

674

00:33:01,410 --> 00:32:58,930

military being ahead in the technology

675

00:33:06,060 --> 00:33:01,420

by 10 to 20 years when they have to be

676

00:33:08,400 --> 00:33:06,070

ahead by many years many many more years

677

00:33:10,410 --> 00:33:08,410

than say 10 to 20 years to have an

678

00:33:20,250 --> 00:33:10,420

object traverse space like that ticked

679

00:33:26,430 --> 00:33:20,260

acted you're just saying it's possible

680

00:33:28,290 --> 00:33:26,440

still anyway right because you know if

681

00:33:31,200 --> 00:33:28,300

you're gonna go into the theory that

682

00:33:34,440 --> 00:33:31,210

there's reverse engineering then you

683

00:33:36,420 --> 00:33:34,450

know yeah it could be you know when did

684

00:33:37,860 --> 00:33:36,430

we come out with transistors and lasers

685

00:33:40,650 --> 00:33:37,870

did we already have that technology

686

00:33:43,800 --> 00:33:40,660

before there's a lot of hypotheses going

687

00:33:45,840 --> 00:33:43,810

on about that okay you know this

688

00:33:48,870 --> 00:33:45,850

breakthrough of technology like the

689

00:33:51,450 --> 00:33:48,880

transistor or the laser you know it just

690

00:33:54,330 --> 00:33:51,460

maybe these things have been kept by the

691

00:33:56,100 --> 00:33:54,340

government well before you know the

692

00:33:57,630 --> 00:33:56,110

private sector was ready or maybe they

693

00:34:00,150 --> 00:33:57,640

wanted a slow trickle down I don't know

694

00:34:03,240 --> 00:34:00,160

I just played one of your videos Dean

695

00:34:05,100 --> 00:34:03,250

where there was a UFO Jacksonville was

696

00:34:09,200 --> 00:34:05,110

that the UFO you were talking about

697

00:34:12,570 --> 00:34:09,210

before is that something different yeah

698

00:34:15,150 --> 00:34:12,580

a lot of people when you first see the

699

00:34:18,600 --> 00:34:15,160

UFO and I'm making it move around that's

700

00:34:20,640 --> 00:34:18,610

me moving the controller around to show

701
00:34:23,010 --> 00:34:20,650
that it's not a group of dead pixels or

702
00:34:26,070 --> 00:34:23,020
anything that's me centering the object

703
00:34:27,570 --> 00:34:26,080
within the reticle so a lot of people

704
00:34:30,120 --> 00:34:27,580
are like oh it's zipping around the sky

705
00:34:32,490 --> 00:34:30,130
and I'm like no that's me it's just you

706
00:34:34,470 --> 00:34:32,500
I have a point of reference to show you

707
00:34:37,050 --> 00:34:34,480
know where it is in relation to you know

708
00:34:38,700 --> 00:34:37,060
just clear sky right right but that what

709
00:34:43,940 --> 00:34:38,710
I was trying to do is to show that it

710
00:34:51,840 --> 00:34:47,820
okay and I wanted to ask you what is the

711
00:34:54,240 --> 00:34:51,850
the most astounding object you've seen

712
00:34:56,610 --> 00:34:54,250
whether it was something you caught or

713
00:34:58,500 --> 00:34:56,620

something somebody else had actually

714

00:35:00,180 --> 00:34:58,510

thought that you had the privilege of

715

00:35:04,260 --> 00:35:00,190

being able to view on YouTube or

716

00:35:07,290 --> 00:35:04,270

anywhere else can you relate to us what

717

00:35:13,590 --> 00:35:07,300

that video or what that object was the

718

00:35:15,450 --> 00:35:13,600

history behind it you know first-hand

719

00:35:18,150 --> 00:35:15,460

experience so obviously it's going to be

720

00:35:20,520 --> 00:35:18,160

a little bit more significant to me but

721

00:35:24,900 --> 00:35:20,530

I did like the gimbal one and there was

722

00:35:26,550 --> 00:35:24,910

also one from the npas what was at the

723

00:35:30,840 --> 00:35:26,560

Wales Bristol Channel

724

00:35:32,820 --> 00:35:30,850

UFO that was caught on a system that I'm

725

00:35:35,250 --> 00:35:32,830

very familiar were that I work we have

726

00:35:36,930 --> 00:35:35,260

fixed dozens and dozens of them and seen

727

00:35:39,810 --> 00:35:36,940

many different characteristics of the

728

00:35:42,360 --> 00:35:39,820

system still they were looking at an

729

00:35:45,450 --> 00:35:42,370

object again they're travelling in like

730

00:35:48,420 --> 00:35:45,460

a helicopter and they're focusing on a

731

00:35:52,020 --> 00:35:48,430

circle not unlike the object that I had

732

00:35:55,020 --> 00:35:52,030

you know some orb in the sky and it

733

00:35:57,660 --> 00:35:55,030

didn't move in elevation you know

734

00:35:59,490 --> 00:35:57,670

there's probably I don't know they would

735

00:36:01,830 --> 00:35:59,500

have saying it was flying into the wind

736

00:36:03,780 --> 00:36:01,840

so a lot of people are saying oh it

737

00:36:07,080 --> 00:36:03,790

could be a Chinese lantern it could be a

738

00:36:09,000 --> 00:36:07,090

drone but what I've seen it didn't

739

00:36:11,040 --> 00:36:09,010

change in elevation that's that's the

740

00:36:14,850 --> 00:36:11,050

weirdest part for me it's remaining at a

741

00:36:17,730 --> 00:36:14,860

certain altitude and you know a Chinese

742

00:36:20,100 --> 00:36:17,740

lanterns gonna be kind of similar to a

743

00:36:22,200 --> 00:36:20,110

balloon that's gonna be erratic yeah I

744

00:36:24,450 --> 00:36:22,210

think I might have this video up now

745

00:36:26,880 --> 00:36:24,460

ardeen this looks like it's got some

746

00:36:31,530 --> 00:36:26,890

concentric circles within it is that the

747

00:36:33,180 --> 00:36:31,540

one I think so I see what am I looking

748

00:36:35,520 --> 00:36:33,190

at I'm looking at my there's a little

749

00:36:37,680 --> 00:36:35,530

bit of a delay so I'm going to it now

750

00:36:39,450 --> 00:36:37,690

that's it now yeah that's it right there

751
00:36:41,790 --> 00:36:39,460
so I think it's kind of maybe a little

752
00:36:43,560 --> 00:36:41,800
out of focus right there and you can see

753
00:36:46,710 --> 00:36:43,570
them focus

754
00:36:51,840 --> 00:36:46,720
in the objects but if you look let me

755
00:36:54,720 --> 00:36:51,850
look here put my glasses okay see the

756
00:36:58,230 --> 00:36:54,730
scale over to the left-hand side right

757
00:37:01,410 --> 00:36:58,240
and there 0 30 60 90 yeah

758
00:37:03,390 --> 00:37:01,420
so that's your elevation okay stake or

759
00:37:04,800 --> 00:37:03,400
like you know they might have it at the

760
00:37:08,640 --> 00:37:04,810
bottom - it's hard to see

761
00:37:10,410 --> 00:37:08,650
I might have elevation down there yeah I

762
00:37:12,240 --> 00:37:10,420
think I saw there is an elevation but it

763
00:37:14,400 --> 00:37:12,250

stays about like maybe five six seven

764

00:37:16,770 --> 00:37:14,410

degrees so does that get what the the

765

00:37:20,730 --> 00:37:16,780

azimuth then is that what that does or

766

00:37:22,590 --> 00:37:20,740

what does its way that's the elevation

767

00:37:24,120 --> 00:37:22,600

the a Smith's on the bottom you see it's

768

00:37:27,630 --> 00:37:24,130

at like negative ninety degrees right

769

00:37:29,940 --> 00:37:27,640

there and now it's dipped below zero

770

00:37:31,950 --> 00:37:29,950

degrees in elevation right there at

771

00:37:34,560 --> 00:37:31,960

least there might be a play like you

772

00:37:39,030 --> 00:37:34,570

said but um yeah it doesn't move much in

773

00:37:40,470 --> 00:37:39,040

elevation though balloon or Chinese

774

00:37:43,830 --> 00:37:40,480

lanterns going to be kind of all over

775

00:37:47,100 --> 00:37:43,840

the place yeah so that was the the video

776

00:37:51,390 --> 00:37:47,110

from wales bristol channel the MPAA

777

00:37:54,210 --> 00:37:51,400

right right okay so and you said you

778

00:37:55,680 --> 00:37:54,220

like of the videos that were released by

779

00:37:57,740 --> 00:37:55,690

the Defense Department you like the

780

00:38:01,260 --> 00:37:57,750

gimbal the best is that about right

781

00:38:11,400 --> 00:38:01,270

right yeah it's it's the that's the one

782

00:38:13,860 --> 00:38:11,410

where it's rotating looking crisp type

783

00:38:15,840 --> 00:38:13,870

of outline to it and then it's got that

784

00:38:19,080 --> 00:38:15,850

little point at the bottom which isn't

785

00:38:20,490 --> 00:38:19,090

really something I see at all so that's

786

00:38:23,250 --> 00:38:20,500

what kind of made me looking at the guns

787

00:38:25,080 --> 00:38:23,260

out of the ordinary and then the rotate

788

00:38:29,240 --> 00:38:25,090

it's alright go ahead finish up please

789

00:38:32,940 --> 00:38:29,250

oh yeah the rotation you know you have a

790

00:38:36,350 --> 00:38:32,950

fluid motion when the Jets gonna turn

791

00:38:39,750 --> 00:38:36,360

it's not that course in its rotation

792

00:38:42,240 --> 00:38:39,760

that's like a nurse driver okay and a

793

00:38:44,400 --> 00:38:42,250

lot has been made of the lack of lift

794

00:38:46,590 --> 00:38:44,410

that if that were an actual plane

795

00:38:48,630 --> 00:38:46,600

turning like that and it was a holding

796

00:38:51,360 --> 00:38:48,640

that position sort of that in that turn

797

00:38:53,910 --> 00:38:51,370

you know if it's a plane of course it

798

00:38:55,560 --> 00:38:53,920

would really just drop it would just

799

00:38:56,970 --> 00:38:55,570

drop out of the skies or anything in now

800

00:38:59,790 --> 00:38:56,980

your FLIR background you could

801
00:39:04,320 --> 00:38:59,800
- that that gives you an indication that

802
00:39:06,660 --> 00:39:04,330
that might not be a good argument yeah

803
00:39:09,359 --> 00:39:06,670
as far as the aerodynamics of it I just

804
00:39:11,609 --> 00:39:09,369
call it like I see it but yeah it

805
00:39:14,730 --> 00:39:11,619
wouldn't if it was moving like that it

806
00:39:17,970 --> 00:39:14,740
would be more violent and turning it

807
00:39:22,170 --> 00:39:17,980
wouldn't just it just doesn't correspond

808
00:39:25,260 --> 00:39:22,180
to a normal jet aircraft moving in that

809
00:39:27,540 --> 00:39:25,270
fact okay and the go fast video was

810
00:39:29,609 --> 00:39:27,550
another interesting one because Nick

811
00:39:31,980 --> 00:39:29,619
West did they can a look at it and

812
00:39:33,960 --> 00:39:31,990
thought that it was a bird I looked at

813
00:39:35,430 --> 00:39:33,970

it and thought well maybe at first but

814

00:39:39,120 --> 00:39:35,440

it's going at a pretty good clip and

815

00:39:41,640 --> 00:39:39,130

seabirds Dutra can travel at a fast clip

816

00:39:43,109 --> 00:39:41,650

but not that fast a clip and it was

817

00:39:43,770 --> 00:39:43,119

wondering if you had any thoughts on

818

00:39:45,780 --> 00:39:43,780

that one as well

819

00:39:48,510 --> 00:39:45,790

on the go fast because he was also

820

00:39:50,550 --> 00:39:48,520

saying that that parallax which is an

821

00:39:51,810 --> 00:39:50,560

interesting phenomenon might have played

822

00:39:53,540 --> 00:39:51,820

a role in making it look like it was

823

00:39:56,420 --> 00:39:53,550

going faster than it actually was

824

00:39:59,880 --> 00:39:56,430

because the plane is traveling as well

825

00:40:02,010 --> 00:39:59,890

right and that's where I kind of jump

826

00:40:04,710 --> 00:40:02,020

out of that science because it's not my

827

00:40:07,730 --> 00:40:04,720

particular field of expertise though but

828

00:40:10,650 --> 00:40:07,740

I do see it moving in that fashion and

829

00:40:14,490 --> 00:40:10,660

kind of trust them to a certain extent

830

00:40:18,420 --> 00:40:14,500

but it again the thing I can't agree

831

00:40:22,349 --> 00:40:18,430

with the period or the flapping of wings

832

00:40:24,690 --> 00:40:22,359

right things that are moving like these

833

00:40:27,810 --> 00:40:24,700

orbs are gonna be drones or birds but

834

00:40:30,599 --> 00:40:27,820

you see the characteristics of the

835

00:40:33,060 --> 00:40:30,609

object how it's moving I see you know

836

00:40:35,490 --> 00:40:33,070

even birds that are like miles out I can

837

00:40:38,670 --> 00:40:35,500

see a flapping of wings or I can see the

838

00:40:42,359 --> 00:40:38,680

seagull shaped look over their outline

839

00:40:46,130 --> 00:40:42,369

and you know a drone I can see that it's

840

00:40:48,630 --> 00:40:46,140

moving parts it's not just a blob soon

841

00:40:51,510 --> 00:40:48,640

that's where I'm left with that yeah and

842

00:40:53,970 --> 00:40:51,520

there has been talk that some of these

843

00:40:56,070 --> 00:40:53,980

objects might be drones I mean they

844

00:40:57,980 --> 00:40:56,080

would obviously be more of the type of

845

00:41:00,750 --> 00:40:57,990

the military drones that we see

846

00:41:04,410 --> 00:41:00,760

photographed as sort of triangular

847

00:41:06,870 --> 00:41:04,420

shaped drones as compared to sort of the

848

00:41:08,820 --> 00:41:06,880

bolted together drones that people get

849

00:41:10,299 --> 00:41:08,830

privately a little bit of a difference

850

00:41:12,549 --> 00:41:10,309

there what rules out

851

00:41:16,229 --> 00:41:12,559

drone in your mind for any of the DoD

852

00:41:25,630 --> 00:41:23,620

I guess the travel like some of the that

853

00:41:27,969 --> 00:41:25,640

speed because I know the drones that I

854

00:41:30,339 --> 00:41:27,979

make and again they're not high-end but

855

00:41:33,400 --> 00:41:30,349

I don't know you can get maybe fifty

856

00:41:36,370 --> 00:41:33,410

miles an hour out of them but it depends

857

00:41:40,239 --> 00:41:36,380

on the motor speed and how we're bus do

858

00:41:42,489 --> 00:41:40,249

you build this drone and just the area

859

00:41:44,140 --> 00:41:42,499

that they're in you know who's gonna fly

860

00:41:47,859 --> 00:41:44,150

a drone out in the middle of the ocean

861

00:41:49,199 --> 00:41:47,869

around a US naval vessel it just doesn't

862

00:41:52,779 --> 00:41:49,209

make sense

863

00:41:55,599 --> 00:41:52,789

yeah and I'm starting to rip but that's

864

00:41:57,640 --> 00:41:55,609

a good point see this is the thing if

865

00:42:00,539 --> 00:41:57,650

this is one of ours

866

00:42:02,709 --> 00:42:00,549

the the problem I have with it is

867

00:42:08,309 --> 00:42:02,719

exactly what you just said

868

00:42:11,829 --> 00:42:08,319

why would DARPA or any agency that is

869

00:42:14,679 --> 00:42:11,839

from our government want to fly over

870

00:42:18,729 --> 00:42:14,689

another one of our government agencies

871

00:42:21,609 --> 00:42:18,739

or one of our branches of military what

872

00:42:23,499 --> 00:42:21,619

do you think about well unless they're

873

00:42:25,419 --> 00:42:23,509

playing like you know simulation

874

00:42:28,689 --> 00:42:25,429

wargames where they're testing out hey

875

00:42:30,939 --> 00:42:28,699

how does this f-18 maneuver in relation

876

00:42:32,859 --> 00:42:30,949

to what we just created you know as

877

00:42:34,660 --> 00:42:32,869

they're trying to test the capabilities

878

00:42:38,289 --> 00:42:34,670

of the aircraft's I couldn't see that

879

00:42:41,829 --> 00:42:38,299

but the pilots are saying no they just

880

00:42:44,979 --> 00:42:41,839

popped up out of nowhere and then you

881

00:42:47,229 --> 00:42:44,989

know they they explain their their

882

00:42:49,689 --> 00:42:47,239

experience and then you know if they're

883

00:42:51,640 --> 00:42:49,699

gonna tell a pilot they would say hey

884

00:42:53,259 --> 00:42:51,650

look you know we're gonna launch this

885

00:42:54,880 --> 00:42:53,269

aircraft you guys are gonna chase it for

886

00:42:56,259 --> 00:42:54,890

a little bit we're gonna debrief you on

887

00:42:58,870 --> 00:42:56,269

that they're not just gonna throw it out

888

00:43:00,849 --> 00:42:58,880

there wait at least the Navy that I know

889

00:43:04,390 --> 00:43:00,859

unless they've changed their protocol

890

00:43:06,429 --> 00:43:04,400

right so so this is a thing

891

00:43:07,929 --> 00:43:06,439

there's pilots coming out saying that

892

00:43:12,370 --> 00:43:07,939

they didn't know what it was they saw

893

00:43:14,890 --> 00:43:12,380

and so if it was one of ours and we

894

00:43:17,289 --> 00:43:14,900

would in theory at least briefed them

895

00:43:19,839 --> 00:43:17,299

when we at least let them know by the

896

00:43:22,449 --> 00:43:19,849

way this was just a test we're just

897

00:43:24,190 --> 00:43:22,459

testing our equipment to see what your

898

00:43:25,780 --> 00:43:24,200

reaction would be whether

899

00:43:29,880 --> 00:43:25,790

you would go ahead and use the best of

900

00:43:33,640 --> 00:43:29,890

your training in order to track this UAP

901
00:43:35,980 --> 00:43:33,650
what are you just yeah I think that the

902
00:43:37,930 --> 00:43:35,990
debriefing you know you go through this

903
00:43:40,060 --> 00:43:37,940
experience and then they would probably

904
00:43:41,770 --> 00:43:40,070
pull you aside I don't you know we're

905
00:43:43,660 --> 00:43:41,780
room and say hey look you know we were

906
00:43:45,069 --> 00:43:43,670
just messing with you we got this new

907
00:43:50,410 --> 00:43:45,079
thing out there and here's the

908
00:43:53,890 --> 00:43:50,420
capabilities and so that so then that

909
00:43:55,780 --> 00:43:53,900
leads me to ask you again then how could

910
00:43:57,520 --> 00:43:55,790
it be one of ours if we're not briefing

911
00:43:59,380 --> 00:43:57,530
them in that way because then why would

912
00:44:03,210 --> 00:43:59,390
pilots come out and say I don't know

913
00:44:07,329 --> 00:44:03,220

what I saw because they really don't

914

00:44:08,920 --> 00:44:07,339

maybe they were doing a separate step or

915

00:44:12,190 --> 00:44:08,930

type of project and there was an

916

00:44:14,650 --> 00:44:12,200

intercept between you know the planes on

917

00:44:17,260 --> 00:44:14,660

the aircraft carrier we're not flying

918

00:44:18,640 --> 00:44:17,270

and then this project hypothetical

919

00:44:21,160 --> 00:44:18,650

project maybe there was just an

920

00:44:23,920 --> 00:44:21,170

intercept but I don't see why they would

921

00:44:26,890 --> 00:44:23,930

do that it doesn't make sense to me yeah

922

00:44:31,420 --> 00:44:26,900

because my understanding is the military

923

00:44:33,849 --> 00:44:31,430

and any agency of that would want to

924

00:44:37,480 --> 00:44:33,859

have a UAP in the sky so to speak we'll

925

00:44:39,910 --> 00:44:37,490

just call it a uep and intentionally so

926
00:44:42,160 --> 00:44:39,920
would probably know what's going to be

927
00:44:44,109 --> 00:44:42,170
in the sky that day you would imagine

928
00:44:46,270 --> 00:44:44,119
because they don't want it to intersect

929
00:44:49,329 --> 00:44:46,280
and crash with anything so would be a

930
00:44:53,050 --> 00:44:49,339
planned event right that's what I would

931
00:44:55,089 --> 00:44:53,060
think I'm just trying to keep yeah I'm

932
00:44:57,520 --> 00:44:55,099
just I thought about this and I you know

933
00:44:59,470 --> 00:44:57,530
just ever since the was it before he's

934
00:45:02,800 --> 00:44:59,480
by the way that said that it was Gary

935
00:45:04,900 --> 00:45:02,810
yep okay you know Gary I believe it was

936
00:45:05,950 --> 00:45:04,910
carrying Frank's right said yeah he

937
00:45:08,620 --> 00:45:05,960
thought it was one of ours

938
00:45:12,190 --> 00:45:08,630

I was thinking as you can clearly see

939

00:45:14,950 --> 00:45:12,200

for a while well how could that be

940

00:45:17,770 --> 00:45:14,960

wouldn't we want to let them know we're

941

00:45:22,059 --> 00:45:17,780

going to have that kind of exercise if

942

00:45:23,530 --> 00:45:22,069

we're not going to why I don't know was

943

00:45:27,609 --> 00:45:23,540

it a social experiment with their own

944

00:45:28,000 --> 00:45:27,619

people in just an eg spacecraft to never

945

00:45:31,809 --> 00:45:28,010

know

946

00:45:33,849 --> 00:45:31,819

government agencies they don't always

947

00:45:35,920 --> 00:45:33,859

cooperate you can have the CIA doing

948

00:45:37,380 --> 00:45:35,930

something and be like we need to fly

949

00:45:39,749 --> 00:45:37,390

over this way and then

950

00:45:41,789 --> 00:45:39,759

getting it there's that aircraft carrier

951
00:45:44,009 --> 00:45:41,799
it could be something they'd there's no

952
00:45:45,059 --> 00:45:44,019
communication between the military and a

953
00:45:48,499 --> 00:45:45,069
government agency

954
00:46:02,460 --> 00:45:48,509
I just like to think that there's other

955
00:46:05,279 --> 00:46:02,470
explanations but uh okay so anyway just

956
00:46:07,470 --> 00:46:05,289
to I'm started this there's one last

957
00:46:09,720 --> 00:46:07,480
thing I'm to say about this and that is

958
00:46:13,200 --> 00:46:09,730
let's just pretend DARPA for the heck of

959
00:46:15,239 --> 00:46:13,210
it actually how to plan you ap event

960
00:46:17,370 --> 00:46:15,249
that was going to happen and they do

961
00:46:19,620 --> 00:46:17,380
need to know who's gonna be out in the

962
00:46:21,779 --> 00:46:19,630
sky that day wouldn't that be the

963
00:46:23,849 --> 00:46:21,789

military's hint if they're being asked

964

00:46:26,910 --> 00:46:23,859

by DARPA hey are you guys flying today

965

00:46:34,529 --> 00:46:26,920

there could be a PE related event that's

966

00:46:36,720 --> 00:46:34,539

going to happen see that's what I was

967

00:46:38,999 --> 00:46:36,730

gonna ask you do you think that DARPA

968

00:46:41,130 --> 00:46:39,009

and other government agencies have a way

969

00:46:43,710 --> 00:46:41,140

of actually knowing what's gonna be in

970

00:46:45,569 --> 00:46:43,720

the sky even if they don't ask the

971

00:46:47,400 --> 00:46:45,579

military if they're gonna be flying that

972

00:46:49,829 --> 00:46:47,410

day is there a way for them find out

973

00:46:52,920 --> 00:46:49,839

yeah well there was and we well we found

974

00:46:55,049 --> 00:46:52,930

this out after the fact but it is known

975

00:46:58,620 --> 00:46:55,059

that there was a test of a hypersonic

976

00:47:02,160 --> 00:46:58,630

craft in the general vicinity of the

977

00:47:06,900 --> 00:47:02,170

Nimitz encounter during that timeframe

978

00:47:08,249 --> 00:47:06,910

and obviously what they captured a video

979

00:47:10,019 --> 00:47:08,259

doesn't look anything like what was

980

00:47:12,630 --> 00:47:10,029

being tested or anything along those

981

00:47:14,670 --> 00:47:12,640

lines but it's not been confirmed as far

982

00:47:16,739 --> 00:47:14,680

as I know that anybody on the ship

983

00:47:17,970 --> 00:47:16,749

actually knew about that test going on I

984

00:47:19,220 --> 00:47:17,980

don't know if they did or they didn't

985

00:47:28,440 --> 00:47:19,230

but you would think they would have

986

00:47:30,210 --> 00:47:28,450

exactly go ahead okay so let me just go

987

00:47:32,009 --> 00:47:30,220

ahead and be blunt here and ask you Dean

988

00:47:34,620 --> 00:47:32,019

do you believe that there's

989

00:47:37,349 --> 00:47:34,630

extraterrestrial life that's visiting

990

00:47:39,239 --> 00:47:37,359

our planet or they've always been here

991

00:47:41,640 --> 00:47:39,249

whatever your perspective is but do you

992

00:47:43,620 --> 00:47:41,650

believe that there's extraterrestrial

993

00:47:49,640 --> 00:47:43,630

life that's intelligent enough to

994

00:47:55,849 --> 00:47:52,130

I think Jodie Foster said in that

995

00:47:57,529 --> 00:47:55,859

contact movie it'd be an awful waste of

996

00:48:01,400 --> 00:47:57,539

space that there there wasn't other

997

00:48:04,160 --> 00:48:01,410

life-forms yeah you know the more we

998

00:48:05,660 --> 00:48:04,170

figure out I think and there's other

999

00:48:07,759 --> 00:48:05,670

things that are on this planet that you

1000

00:48:09,289 --> 00:48:07,769

can watch an ancient aliens I think

1001
00:48:11,450 --> 00:48:09,299
sometimes ancient aliens kind of

1002
00:48:15,370 --> 00:48:11,460
stretches things to just to generate a

1003
00:48:18,829 --> 00:48:15,380
show but they do have some what is it

1004
00:48:21,109 --> 00:48:18,839
what's I think it's in Peru Mountain

1005
00:48:22,339 --> 00:48:21,119
Time oh yeah yeah yeah well yeah

1006
00:48:23,749 --> 00:48:22,349
there's a few of that I thought you were

1007
00:48:26,029 --> 00:48:23,759
going in a different direction but yeah

1008
00:48:29,359 --> 00:48:26,039
I know what you mean yep I'm just saying

1009
00:48:31,759 --> 00:48:29,369
ya jus think there's things that can't

1010
00:48:35,289 --> 00:48:31,769
be explained and the only explanation is

1011
00:48:40,130 --> 00:48:35,299
some kind of outside and any Wayne

1012
00:48:43,309 --> 00:48:40,140
interaction I don't like the only thing

1013
00:48:45,710 --> 00:48:43,319

that I had was that one shot that you

1014

00:48:47,870 --> 00:48:45,720

showed earlier that was the orb up in

1015

00:48:50,420 --> 00:48:47,880

the sky and that may or may not be

1016

00:48:52,640 --> 00:48:50,430

explained sometime in the future but as

1017

00:48:55,789 --> 00:48:52,650

far as aliens you know being in the

1018

00:49:03,319 --> 00:48:55,799

government reptile people that's a hard

1019

00:49:04,700 --> 00:49:03,329

one for me to accept yeah but yeah

1020

00:49:06,170 --> 00:49:04,710

you're interested in this started with

1021

00:49:09,109 --> 00:49:06,180

Aguadilla as you mentioned and that

1022

00:49:11,930 --> 00:49:09,119

predated the more recent videos coming

1023

00:49:13,880 --> 00:49:11,940

out when those well the two at first and

1024

00:49:16,489 --> 00:49:13,890

then the one later on in that March of

1025

00:49:19,700 --> 00:49:16,499

last year came out the gimbal and the

1026

00:49:23,089 --> 00:49:19,710

FLIR and then in March of 2018 the

1027

00:49:27,470 --> 00:49:23,099

go-fast video what was your initial

1028

00:49:29,029 --> 00:49:27,480

response to those and clear but the

1029

00:49:32,089 --> 00:49:29,039

gimbal is the one that stood out to me

1030

00:49:35,059 --> 00:49:32,099

because if you're gonna say it's a jet

1031

00:49:38,599 --> 00:49:35,069

propulsion and you're looking at the

1032

00:49:40,729 --> 00:49:38,609

rear of the aircraft that's where I said

1033

00:49:43,789 --> 00:49:40,739

that doesn't look like it at all so and

1034

00:49:47,509 --> 00:49:43,799

I have video to compare so that's why I

1035

00:49:53,569 --> 00:49:47,519

got involved in that one but it was

1036

00:49:56,359 --> 00:49:53,579

interesting to me it was very I can't

1037

00:49:59,650 --> 00:49:56,369

think of the word flatten system Riyadh

1038

00:50:05,080 --> 00:50:02,200

okay so going along the idea that you do

1039

00:50:10,600 --> 00:50:05,090

believe that there is an ET or ET

1040

00:50:12,880 --> 00:50:10,610

civilizations out there that are

1041

00:50:13,390 --> 00:50:12,890

visiting the planet or have always been

1042

00:50:16,030 --> 00:50:13,400

here

1043

00:50:18,430 --> 00:50:16,040

you do believe also would it be correct

1044

00:50:24,850 --> 00:50:18,440

to say that they have the capability of

1045

00:50:26,610 --> 00:50:24,860

going under the water - yeah this is

1046

00:50:29,830 --> 00:50:26,620

just a theory but I don't think their

1047

00:50:34,050 --> 00:50:29,840

technology is the same as us that it's

1048

00:50:38,980 --> 00:50:34,060

limited to atmospheric type of

1049

00:50:40,780 --> 00:50:38,990

interference like when you see the

1050

00:50:43,780 --> 00:50:40,790

object from the Aguadilla go into the

1051
00:50:45,970 --> 00:50:43,790
water it remains at a constant speed it

1052
00:50:47,410 --> 00:50:45,980
doesn't slow down as a normal you know

1053
00:50:49,450 --> 00:50:47,420
let's say you launched a missile into

1054
00:50:51,070 --> 00:50:49,460
the water that's gonna slow down because

1055
00:50:53,950 --> 00:50:51,080
now you're traveling through water and

1056
00:50:56,410 --> 00:50:53,960
it's more friction than the air it's

1057
00:50:57,610 --> 00:50:56,420
obvious but I don't think I think there

1058
00:51:02,500 --> 00:50:57,620
might be some kind of gravitational

1059
00:51:10,900 --> 00:51:02,510
field that doesn't matter what kind of

1060
00:51:12,910 --> 00:51:10,910
medium you're traveling through and

1061
00:51:14,410 --> 00:51:12,920
after those videos came out there that's

1062
00:51:15,760 --> 00:51:14,420
when you went out and really started

1063
00:51:18,070 --> 00:51:15,770

doing some testing is that about right

1064

00:51:22,540 --> 00:51:18,080

or did you do that for the Agudilla

1065

00:51:24,190 --> 00:51:22,550

video as well no it started with the

1066

00:51:29,200 --> 00:51:24,200

Agudilla and that's when I did some

1067

00:51:30,640 --> 00:51:29,210

testing and comparing because you know I

1068

00:51:32,200 --> 00:51:30,650

was working with the guys and they asked

1069

00:51:34,480 --> 00:51:32,210

me to do certain things and some things

1070

00:51:37,300 --> 00:51:34,490

I could do you know it's like

1071

00:51:39,940 --> 00:51:37,310

coincidental if I'm testing a system out

1072

00:51:41,560 --> 00:51:39,950

back then yeah I can do a little bit of

1073

00:51:44,530 --> 00:51:41,570

a test or something that I can't just

1074

00:51:47,820 --> 00:51:44,540

stop you know do all these other tests

1075

00:51:51,600 --> 00:51:47,830

it's got to be coincidental but yeah

1076

00:51:54,250 --> 00:51:51,610

interesting I guess the whole

1077

00:51:57,100 --> 00:51:54,260

experimentation started with Aguadilla

1078

00:52:01,120 --> 00:51:57,110

and then i kind of advanced a little bit

1079

00:52:05,110 --> 00:52:01,130

after that with the go-fast and I'm

1080

00:52:07,780 --> 00:52:05,120

sorry to gamble and FLIR app apparently

1081

00:52:09,730 --> 00:52:07,790

is available for mobile phones do you

1082

00:52:12,200 --> 00:52:09,740

know anything about that and how good is

1083

00:52:15,410 --> 00:52:12,210

that system if you're familiar with it

1084

00:52:18,559 --> 00:52:15,420

yeah I actually have one okay pull the

1085

00:52:20,120 --> 00:52:18,569

FLIR one and it takes a thermal image

1086

00:52:23,720 --> 00:52:20,130

again it's a long wave if it's not mid

1087

00:52:27,920 --> 00:52:23,730

wave but it it's an uncool FLIR and it

1088

00:52:31,370 --> 00:52:27,930

overlaps your normal camera that you'd

1089

00:52:33,530 --> 00:52:31,380

have on your phone onto the infrared so

1090

00:52:36,890 --> 00:52:33,540

it'll you're kind of looking at two

1091

00:52:38,900 --> 00:52:36,900

things at once okay it's good for

1092

00:52:40,309 --> 00:52:38,910

applications like if you're looking

1093

00:52:44,030 --> 00:52:40,319

around the house you want to see if your

1094

00:52:47,089 --> 00:52:44,040

windows are leaking or your insulation

1095

00:52:48,589 --> 00:52:47,099

and your AC system like the ducting in

1096

00:52:50,270 --> 00:52:48,599

LA if you want to look up in your attic

1097

00:52:53,000 --> 00:52:50,280

and see if something's leaking you'll be

1098

00:52:54,829 --> 00:52:53,010

able to see it blow out it's definitely

1099

00:52:58,160 --> 00:52:54,839

it's these in the dark just like a

1100

00:53:01,549 --> 00:52:58,170

normal thermal imager would so you can

1101
00:53:03,140 --> 00:53:01,559
go outside and not have any light at all

1102
00:53:04,579 --> 00:53:03,150
in the ambient light and you can still

1103
00:53:06,589 --> 00:53:04,589
see objects like if somebody else

1104
00:53:08,329 --> 00:53:06,599
standing in your backyard you'll see the

1105
00:53:10,460 --> 00:53:08,339
person there because it's looking at

1106
00:53:13,250 --> 00:53:10,470
heat it's not looking at lights oh right

1107
00:53:16,490 --> 00:53:13,260
yeah it's kind of a lower resolution but

1108
00:53:20,630 --> 00:53:16,500
for for fun you know or if you have a

1109
00:53:22,819 --> 00:53:20,640
scientific reason to use it yeah what's

1110
00:53:24,650 --> 00:53:22,829
the cost point on that that way the

1111
00:53:26,480 --> 00:53:24,660
price point so folks have an idea of

1112
00:53:29,839 --> 00:53:26,490
what they can expect to pay for

1113
00:53:31,549 --> 00:53:29,849

something like that yeah I bought mine

1114

00:53:33,829 --> 00:53:31,559

it's a second-generation I think that

1115

00:53:35,900 --> 00:53:33,839

was two hundred and fifty and I think

1116

00:53:37,960 --> 00:53:35,910

they have a third generation now that

1117

00:53:40,940 --> 00:53:37,970

there's like a little foam wheel that

1118

00:53:45,020 --> 00:53:40,950

the Lightning port will extend out of

1119

00:53:47,720 --> 00:53:45,030

the the flare itself to allow for like a

1120

00:53:50,569 --> 00:53:47,730

cell phone case to where I have an

1121

00:53:52,940 --> 00:53:50,579

extender on mine but I like this option

1122

00:53:56,390 --> 00:53:52,950

on the third generation I think it's the

1123

00:53:58,520 --> 00:53:56,400

same price of \$250 but you're able to

1124

00:53:59,990 --> 00:53:58,530

just plug it in you don't have to worry

1125

00:54:02,990 --> 00:54:00,000

about taking the case off or have an

1126
00:54:05,059 --> 00:54:03,000
extender how about the equipment that

1127
00:54:07,190 --> 00:54:05,069
you have that's FLIR related with what's

1128
00:54:10,039 --> 00:54:07,200
the actual cost of that or just a rough

1129
00:54:12,680 --> 00:54:10,049
idea what kind of money do people need

1130
00:54:14,630 --> 00:54:12,690
to look forward to investing in order to

1131
00:54:19,910 --> 00:54:14,640
actually get to where you're at to use

1132
00:54:24,529 --> 00:54:19,920
the equipment that you do or do do you

1133
00:54:29,059 --> 00:54:26,269
time but this is government-owned

1134
00:54:31,759 --> 00:54:29,069
equipment that's with high-end equipment

1135
00:54:33,499 --> 00:54:31,769
like just one camera to replace a camera

1136
00:54:35,569 --> 00:54:33,509
might be sixty or seventy thousand

1137
00:54:38,390 --> 00:54:35,579
dollars and that doesn't even it all the

1138
00:54:39,589 --> 00:54:38,400

magnification so you know rough estimate

1139

00:54:42,199 --> 00:54:39,599

maybe a million

1140

00:54:43,609 --> 00:54:42,209

you know it's an airborne system so this

1141

00:54:46,309 --> 00:54:43,619

is the stuff that the government works

1142

00:54:50,809 --> 00:54:46,319

on and there's all associated cables the

1143

00:54:52,579 --> 00:54:50,819

hand controllers yeah it's gonna be well

1144

00:54:54,019 --> 00:54:52,589

outside don't you don't want to play

1145

00:55:02,269 --> 00:54:54,029

cheap on the cables if you're spending

1146

00:55:04,099 --> 00:55:02,279

all that money on the gear so just step

1147

00:55:05,779 --> 00:55:04,109

for like a regular person now let's say

1148

00:55:07,009 --> 00:55:05,789

I've got a sky watch tonight and it

1149

00:55:09,769 --> 00:55:07,019

looks like it's gonna be kind of clear

1150

00:55:11,989 --> 00:55:09,779

and it's gonna be a great night what

1151
00:55:13,579 --> 00:55:11,999
what would you recommend and do you

1152
00:55:15,769 --> 00:55:13,589
recommend folks stay with the night

1153
00:55:19,849 --> 00:55:15,779
vision or maybe they take a look at FLIR

1154
00:55:21,559 --> 00:55:19,859
and it is a consumer level set up but

1155
00:55:23,630 --> 00:55:21,569
you know is the price comparable to

1156
00:55:27,529 --> 00:55:23,640
night vision or can you tell us a little

1157
00:55:31,669 --> 00:55:27,539
bit about that um if you're seeing night

1158
00:55:34,219 --> 00:55:31,679
vision you mean like the near IR um kind

1159
00:55:35,749 --> 00:55:34,229
of like looking at I just know that a

1160
00:55:37,729 --> 00:55:35,759
friend of mine had a night vision

1161
00:55:39,439 --> 00:55:37,739
monocular it was pretty interesting to

1162
00:55:42,140 --> 00:55:39,449
see what you can see through that thing

1163
00:55:43,729 --> 00:55:42,150

so I really have never looked at the

1164

00:55:45,559 --> 00:55:43,739

different options that are available or

1165

00:55:47,899 --> 00:55:45,569

the pricing I just wanted to get an idea

1166

00:55:51,289 --> 00:55:47,909

what if somebody decided you know what I

1167

00:55:53,120 --> 00:55:51,299

think maybe we're technology would be

1168

00:55:54,529 --> 00:55:53,130

better for me than using the night

1169

00:55:56,779 --> 00:55:54,539

vision so I'll take a look at that is

1170

00:55:59,739 --> 00:55:56,789

that you know a viable option price-wise

1171

00:56:04,399 --> 00:55:59,749

and what you'll get out of the results

1172

00:56:06,019 --> 00:56:04,409

yeah if you want to use those

1173

00:56:08,569 --> 00:56:06,029

interchangeably is that you're still

1174

00:56:09,799 --> 00:56:08,579

depending on light your ambient light

1175

00:56:11,959 --> 00:56:09,809

light from the moon something like that

1176
00:56:14,029 --> 00:56:11,969
you're not looking at a thermal image

1177
00:56:15,919 --> 00:56:14,039
and not looking at a heat signature so

1178
00:56:20,749 --> 00:56:15,929
if you want to go into the realm of

1179
00:56:23,209 --> 00:56:20,759
actual I mean FLIR Systems Inc FSI you

1180
00:56:26,779 --> 00:56:23,219
kind of been flashing some of their

1181
00:56:30,019 --> 00:56:26,789
products on the screen they offer a wide

1182
00:56:32,329 --> 00:56:30,029
variety of options with magnification II

1183
00:56:34,819 --> 00:56:32,339
need you can have these things on your

1184
00:56:38,030 --> 00:56:34,829
rifle if you want a an infrared scope

1185
00:56:41,240 --> 00:56:38,040
that kind of thing but yeah

1186
00:56:44,000 --> 00:56:41,250
a market that needs to be explored I

1187
00:56:47,390 --> 00:56:44,010
would say because they're just stuck

1188
00:56:48,970 --> 00:56:47,400

right now at the FLIR one which is the

1189

00:56:52,670 --> 00:56:48,980

thing that you can plug into your iPhone

1190

00:56:56,350 --> 00:56:52,680

they kind of would I don't know if they

1191

00:56:59,780 --> 00:56:56,360

came up with something that was more

1192

00:57:01,940 --> 00:56:59,790

higher resolution and it had some

1193

00:57:03,350 --> 00:57:01,950

magnification to it then I would

1194

00:57:04,940 --> 00:57:03,360

recommend that and they probably do but

1195

00:57:08,690 --> 00:57:04,950

they're probably handheld units I

1196

00:57:11,450 --> 00:57:08,700

haven't explored that too much so you

1197

00:57:15,950 --> 00:57:11,460

can go the low light round realm but

1198

00:57:18,070 --> 00:57:15,960

you're not going to get the same results

1199

00:57:20,660 --> 00:57:18,080

as you would with the thermal imagers

1200

00:57:22,370 --> 00:57:20,670

okay and the the gear that you did your

1201
00:57:25,820 --> 00:57:22,380
testing with that's the government gear

1202
00:57:28,310 --> 00:57:25,830
the you know the f-18 and all that right

1203
00:57:31,490 --> 00:57:28,320
okay okay

1204
00:57:33,560 --> 00:57:31,500
Dean there's a person uh I don't want to

1205
00:57:39,530 --> 00:57:33,570
say this individuals name but they do

1206
00:57:42,230 --> 00:57:39,540
tours regarding I guess sky tours you

1207
00:57:44,750 --> 00:57:42,240
know astronomy related ones were they

1208
00:57:46,730 --> 00:57:44,760
take somebody a group of folks out into

1209
00:57:50,150 --> 00:57:46,740
the desert look up in the sky with

1210
00:57:53,780 --> 00:57:50,160
night-vision binoculars military-issue

1211
00:57:56,750 --> 00:57:53,790
level is what they say they are wanted

1212
00:57:59,870 --> 00:57:56,760
to let you know that I have known a few

1213
00:58:03,740 --> 00:57:59,880

people to go on these tours and one of

1214

00:58:06,490 --> 00:58:03,750

them is an astronomer and he said that

1215

00:58:09,260 --> 00:58:06,500

all they were looking at was satellites

1216

00:58:11,060 --> 00:58:09,270

do you have any perspective regarding

1217

00:58:13,850 --> 00:58:11,070

folks who take people out into the

1218

00:58:18,170 --> 00:58:13,860

desert and say you're looking at ET

1219

00:58:21,310 --> 00:58:18,180

craft and misjudging it when they don't

1220

00:58:23,210 --> 00:58:21,320

actually realize it's satellite

1221

00:58:26,600 --> 00:58:23,220

satellites that they're looking at do

1222

00:58:29,390 --> 00:58:26,610

you have any insight on that I don't

1223

00:58:31,700 --> 00:58:29,400

have any experience with that though um

1224

00:58:34,250 --> 00:58:31,710

I don't know how well you're gonna be

1225

00:58:35,870 --> 00:58:34,260

able to pick up a satellite with you

1226
00:58:37,880 --> 00:58:35,880
know that type of equipment I thought

1227
00:58:39,950 --> 00:58:37,890
that they are pretty much it needs a

1228
00:58:45,170 --> 00:58:39,960
pretty strong magnification as far as I

1229
00:58:47,330 --> 00:58:45,180
would think yeah well with the night

1230
00:58:49,190 --> 00:58:47,340
vision that you can you can see some

1231
00:58:51,349 --> 00:58:49,200
things really well and now they are

1232
00:58:53,120 --> 00:58:51,359
kind of blown up I can just tell you

1233
00:58:56,870 --> 00:58:53,130
from personal experience that you can

1234
00:58:59,630 --> 00:58:56,880
and that is very interesting very

1235
00:59:02,720 --> 00:58:59,640
interesting technology of course that is

1236
00:59:05,000 --> 00:59:02,730
used for that and it is helpful you will

1237
00:59:06,740 --> 00:59:05,010
be able to spot satellites that you

1238
00:59:07,849 --> 00:59:06,750

might not normally be able to see but

1239

00:59:09,920 --> 00:59:07,859

you got to remember that those

1240

00:59:11,630 --> 00:59:09,930

satellites even though they're

1241

00:59:13,579 --> 00:59:11,640

reflecting a little bit of light because

1242

00:59:15,410 --> 00:59:13,589

they're up higher and they're still

1243

00:59:17,029 --> 00:59:15,420

catching the Sun the Sun you know likely

1244

00:59:20,059 --> 00:59:17,039

has just gone down they're at an

1245

00:59:21,680 --> 00:59:20,069

altitude way way up there where you can

1246

00:59:23,299 --> 00:59:21,690

still see them and then of course once

1247

00:59:25,400 --> 00:59:23,309

in a while they'll flare up because

1248

00:59:26,870 --> 00:59:25,410

they've got the big solar panels on them

1249

00:59:29,269 --> 00:59:26,880

and they'll reflect a lot of light and a

1250

00:59:32,539 --> 00:59:29,279

lot of the folks are out on these sky

1251
00:59:36,799 --> 00:59:32,549
watches they do think that what they're

1252
00:59:38,120 --> 00:59:36,809
seeing is ET craft but in reading with

1253
00:59:40,339 --> 00:59:38,130
them but in reality you know what

1254
00:59:42,650 --> 00:59:40,349
they're seeing is just light reflecting

1255
00:59:44,059 --> 00:59:42,660
off solar panels on a satellite and it

1256
00:59:52,059 --> 00:59:44,069
can flare up and it can really get your

1257
00:59:57,410 --> 00:59:54,890
what about exposure though to satellites

1258
00:59:59,839 --> 00:59:57,420
do you ever see satellites going by

1259
01:00:02,509 --> 00:59:59,849
during the day or at night when you're

1260
01:00:05,029 --> 01:00:02,519
using the equipment you do from the

1261
01:00:11,120 --> 01:00:05,039
government in order to survey the skies

1262
01:00:13,370 --> 01:00:11,130
you ever come across them no I'm not

1263
01:00:15,049 --> 01:00:13,380

quite sure why I think I have to the

1264

01:00:17,569 --> 01:00:15,059

atmosphere because once you get here

1265

01:00:19,579 --> 01:00:17,579

they likely get washed out during the

1266

01:00:21,170 --> 01:00:19,589

day it's at night when you can see them

1267

01:00:22,609 --> 01:00:21,180

and even then you see them a lot better

1268

01:00:27,740 --> 01:00:22,619

when they're directly overhead in the

1269

01:00:30,140 --> 01:00:27,750

darkest spot of the sky right so it's

1270

01:00:34,370 --> 01:00:30,150

possible it's just I worked the day

1271

01:00:35,630 --> 01:00:34,380

check so I would never know oh so the

1272

01:00:38,390 --> 01:00:35,640

folks that you work with

1273

01:00:41,749 --> 01:00:38,400

do they ever or throughout the history

1274

01:00:44,749 --> 01:00:41,759

of ever being around people that use the

1275

01:00:46,970 --> 01:00:44,759

kind of equipment you do through the

1276

01:00:49,609 --> 01:00:46,980

many years you've done it has anybody

1277

01:00:52,089 --> 01:00:49,619

ever confided in you whether they work

1278

01:00:54,620 --> 01:00:52,099

with you or you know them personally

1279

01:00:58,999 --> 01:00:54,630

that they have seen an object that they

1280

01:01:00,710 --> 01:00:59,009

believed to be eg craft related well

1281

01:01:02,220 --> 01:01:00,720

besides the one pilot that I mentioned

1282

01:01:05,099 --> 01:01:02,230

earlier

1283

01:01:07,289 --> 01:01:05,109

now it's pretty much you know it's a

1284

01:01:10,370 --> 01:01:07,299

technical shop there pretty much they'd

1285

01:01:14,970 --> 01:01:10,380

show up and they'd do the work and some

1286

01:01:16,890 --> 01:01:14,980

variety of beliefs and ideas that some

1287

01:01:18,809 --> 01:01:16,900

people will say yeah it's still weird

1288

01:01:20,069 --> 01:01:18,819

you know and the guy that first

1289

01:01:23,009 --> 01:01:20,079

approached me when I was on the computer

1290

01:01:25,319 --> 01:01:23,019

he still agrees why was that sitting in

1291

01:01:28,049 --> 01:01:25,329

the sky for 10-15 minutes but then other

1292

01:01:30,960 --> 01:01:28,059

people like now that was just the ISS or

1293

01:01:34,079 --> 01:01:30,970

something right yeah things like that so

1294

01:01:47,269 --> 01:01:34,089

it's yeah I've seen the ISS and it does

1295

01:01:53,309 --> 01:01:49,920

all right well let's see what else I

1296

01:01:55,410 --> 01:01:53,319

wanted to see up so that part of Rico

1297

01:01:57,029 --> 01:01:55,420

Aguadilla UFO case when did that come to

1298

01:02:02,999 --> 01:01:57,039

your attention by the way before we let

1299

01:02:08,609 --> 01:02:03,009

that topic go not too long after all the

1300

01:02:11,069 --> 01:02:08,619

scu for Rico and then you know did their

1301

01:02:12,509 --> 01:02:11,079

analysis and then came back how did they

1302

01:02:14,789 --> 01:02:12,519

catch your attention though did you

1303

01:02:16,979 --> 01:02:14,799

actually see it in your Facebook feed

1304

01:02:19,109 --> 01:02:16,989

you know their report that they may have

1305

01:02:20,609 --> 01:02:19,119

done a post on or did somebody bring it

1306

01:02:22,670 --> 01:02:20,619

to your attention or did you just do a

1307

01:02:26,489 --> 01:02:22,680

search on it how did you know about it

1308

01:02:29,370 --> 01:02:26,499

I'm not sure if like an algorithm threw

1309

01:02:31,829 --> 01:02:29,380

it at me but I was just looking at

1310

01:02:33,599 --> 01:02:31,839

things online and that popped up and I

1311

01:02:37,370 --> 01:02:33,609

said no I haven't seen this before and

1312

01:02:39,920 --> 01:02:37,380

then one thing led to another after that

1313

01:02:42,089 --> 01:02:39,930

okay well yeah that's an absolutely

1314

01:02:44,789 --> 01:02:42,099

astounding case and they did a really

1315

01:02:46,170 --> 01:02:44,799

amazing report on it I highly recommend

1316

01:02:49,170 --> 01:02:46,180

people check that out I did leave the

1317

01:02:51,900 --> 01:02:49,180

link to it in the chat and Frank did you

1318

01:02:53,549 --> 01:02:51,910

have any other questions no we are good

1319

01:02:55,049 --> 01:02:53,559

we covered a lot of technical ground

1320

01:02:56,849 --> 01:02:55,059

today and I did that stay a little bit

1321

01:02:58,170 --> 01:02:56,859

focused on not getting those videos up

1322

01:03:00,870 --> 01:02:58,180

and played but I think they'll be

1323

01:03:04,289 --> 01:03:00,880

helpful as well Dean it's a I've been

1324

01:03:05,999 --> 01:03:04,299

great today

1325

01:03:08,309 --> 01:03:06,009

absolutely yeah we yeah we got through

1326

01:03:09,930 --> 01:03:08,319

everything pretty efficiently so I think

1327

01:03:13,140 --> 01:03:09,940

it was a great show I'm very pleased

1328

01:03:15,210 --> 01:03:13,150

about it I I think it was a great show

1329

01:03:15,810 --> 01:03:15,220

too I look forward to seeing it after

1330

01:03:18,450 --> 01:03:15,820

you guys

1331

01:03:22,170 --> 01:03:18,460

all published uh yep it'll be up and

1332

01:03:23,400 --> 01:03:22,180

should be processed shortly and chant do

1333

01:03:27,600 --> 01:03:23,410

you have anything else before we wrap up

1334

01:03:29,250 --> 01:03:27,610

I don't I just wanted to tell Dean that

1335

01:03:32,190 --> 01:03:29,260

it's been a privilege and an honor to

1336

01:03:34,380 --> 01:03:32,200

have the ability to interview him and

1337

01:03:36,780 --> 01:03:34,390

thank you so much for having spent time

1338

01:03:38,580 --> 01:03:36,790

with us on a Sunday I know you have a

1339

01:03:39,810 --> 01:03:38,590

family and we're just very grateful that

1340

01:03:43,310 --> 01:03:39,820

you took a little time out of your day

1341

01:03:45,870 --> 01:03:43,320

to be interviewed thank you so much

1342

01:03:49,590 --> 01:03:45,880

thanks a lot Dave I really appreciate it

1343

01:03:50,340 --> 01:03:49,600

well thank you guys we'll talk soon yep

1344

01:03:53,070 --> 01:03:50,350

absolutely

1345

01:03:55,710 --> 01:03:53,080

alright so we're gonna wrap things up

1346

01:03:58,140 --> 01:03:55,720

with fantastic show today yeah thanks

1347

01:04:00,600 --> 01:03:58,150

very much [h__h] and thanks again Dean and

1348

01:04:03,450 --> 01:04:00,610

we will be back I think our next

1349

01:04:05,460 --> 01:04:03,460

scheduled show is next Sunday and we've

1350

01:04:07,140 --> 01:04:05,470

got some more stuff coming up and chant

1351

01:04:08,610 --> 01:04:07,150

one of these days soon you will be

1352

01:04:11,070 --> 01:04:08,620

following up on that smoking gun

1353

01:04:12,990 --> 01:04:11,080

document and we'll get the rest of what

1354

01:04:15,000 --> 01:04:13,000

you got lined up on that when do you

1355

01:04:18,080 --> 01:04:15,010

think you want to do that I'm putting

1356

01:04:21,420 --> 01:04:18,090

you on the spot by asking you on the air

1357

01:04:23,760 --> 01:04:21,430

I know you and I talked about this often

1358

01:04:25,620 --> 01:04:23,770

you know look I'm just gonna be honest

1359

01:04:31,320 --> 01:04:25,630

with you I got a little burned out on it

1360

01:04:33,270 --> 01:04:31,330

because I was so much yeah and but yeah

1361

01:04:35,220 --> 01:04:33,280

I think it would be a bad idea for us to

1362

01:04:37,530 --> 01:04:35,230

go ahead and focus in on doing that say

1363

01:04:40,170 --> 01:04:37,540

next week so you discovered they have

1364

01:04:41,790 --> 01:04:40,180

you yeah okay sure you're right this

1365

01:04:43,050 --> 01:04:41,800

coming week because you and I have a lot

1366

01:04:44,790 --> 01:04:43,060

of research we've done extensive

1367

01:04:46,830 --> 01:04:44,800

research on that topic that we have not

1368

01:04:48,870 --> 01:04:46,840

shared with anybody and they think the

1369

01:04:50,550 --> 01:04:48,880

timing wouldn't be bad to do that so

1370

01:04:51,930 --> 01:04:50,560

yeah I think so I mean they've had a

1371

01:04:54,600 --> 01:04:51,940

couple of months and they really haven't

1372

01:04:56,010 --> 01:04:54,610

added anything to that mix so yeah we

1373

01:04:59,040 --> 01:04:56,020

definitely want to go ahead and do that

1374

01:05:00,720 --> 01:04:59,050

I think we I think we found out more

1375

01:05:03,150 --> 01:05:00,730

interesting stuff about their the case

1376

01:05:06,150 --> 01:05:03,160

even the stuff material that they could

1377

01:05:09,210 --> 01:05:06,160

spin in their own direction but we found

1378

01:05:11,610 --> 01:05:09,220

a lot of good stuff and yeah well let's

1379

01:05:14,220 --> 01:05:11,620

let's focus on that during the week and

1380

01:05:16,410 --> 01:05:14,230

I think next week next Sunday Professor

1381

01:05:18,480 --> 01:05:16,420

Kevin Knuth is gonna be back and then

1382

01:05:20,930 --> 01:05:18,490

Derek Gilbert who's gonna be hosting a

1383

01:05:22,860 --> 01:05:20,940

conference coming up in Missouri in

1384

01:05:25,050 --> 01:05:22,870

September and we're gonna be talking to

1385

01:05:27,990 --> 01:05:25,060

him so we've got a quite a few more

1386

01:05:29,460 --> 01:05:28,000

things lined up and that is about it

1387

01:05:31,440 --> 01:05:29,470

let's wrap things up and that

1388

01:05:32,849 --> 01:05:31,450

turn the fan back on and cool off so
