

# THE MADAR PROJECT

FRAN RIDGE, PAUL WRIGHT AND MICHAEL PANICELLO JOIN US TO DISCUSS THE MADAR PROJECT AND THE HISTORY OF NICAP

**UFONN**

**SUNDAY**

1  
00:01:03,819 --> 00:00:17,200

[Music]

2  
00:01:06,850 --> 00:01:03,829

and good evening from Philadelphia Frank

3  
00:01:09,640 --> 00:01:06,860

here with yet another episode of UFO

4  
00:01:12,160 --> 00:01:09,650

news network Sunday back on a Wednesday

5  
00:01:13,539 --> 00:01:12,170

night doing some weeknight stuff and we

6  
00:01:16,180 --> 00:01:13,549

got a great show for you tonight

7  
00:01:18,600 --> 00:01:16,190

and let me bring on to introduce our

8  
00:01:22,389 --> 00:01:18,610

fabulous panel of guests tonight is

9  
00:01:25,770 --> 00:01:22,399

coming up on her one-year anniversary of

10  
00:01:31,029 --> 00:01:25,780

hosting podcasts are the one and only

11  
00:01:32,740 --> 00:01:31,039

Hannah how are you tonight I'm

12  
00:01:36,309 --> 00:01:32,750

doing great thank you very much for that

13  
00:01:37,930 --> 00:01:36,319

happy Anniversary Chad not yet we will

14

00:01:38,740 --> 00:01:37,940

be doing that anniversary show I

15

00:01:40,450 --> 00:01:38,750

guarantee it

16

00:01:42,940 --> 00:01:40,460

that will be a big big deal thank you so

17

00:01:45,399 --> 00:01:42,950

much so happy Anniversary to you too I

18

00:01:47,649 --> 00:01:45,409

wanted to go ahead and introduce some

19

00:01:51,249 --> 00:01:47,659

really wonderful people one I have

20

00:01:53,740 --> 00:01:51,259

interviewed before and everyone here is

21

00:01:54,279 --> 00:01:53,750

going to talk about a very special topic

22

00:01:56,980 --> 00:01:54,289

called

23

00:01:59,399 --> 00:01:56,990

made our it's about the made our project

24

00:02:02,740 --> 00:01:59,409

and I'm gonna start off with introducing

25

00:02:04,539 --> 00:02:02,750

Francis L rich who has had 60 years in

26  
00:02:09,729 --> 00:02:04,549  
UFO investigation or research with major

27  
00:02:12,039 --> 00:02:09,739  
organizations in 2017 of October he set

28  
00:02:16,330 --> 00:02:12,049  
up made our two at new location in

29  
00:02:18,550 --> 00:02:16,340  
Newburgh Indiana and 2018 made our three

30  
00:02:22,840 --> 00:02:18,560  
worldwide system went operational in May

31  
00:02:26,259 --> 00:02:22,850  
with 22 sites in mostly the US as of May

32  
00:02:29,039 --> 00:02:26,269  
2009 there are 65 sites nine foreign and

33  
00:02:32,349 --> 00:02:29,049  
the position statement of made our

34  
00:02:36,120 --> 00:02:32,359  
Frances Ridge quote here there is no

35  
00:02:40,150 --> 00:02:36,130  
doubt that most UFOs are actually IFOS

36  
00:02:41,740 --> 00:02:40,160  
identified misidentified etc for the

37  
00:02:43,840 --> 00:02:41,750  
subset of events that cannot be

38  
00:02:46,300 --> 00:02:43,850

explained there is a group of sightings

39

00:02:49,000 --> 00:02:46,310

that demonstrates solid objects under

40

00:02:51,220 --> 00:02:49,010

intelligent control I am convinced that

41

00:02:53,650 --> 00:02:51,230

these objects are somebody else's craft

42

00:02:56,199 --> 00:02:53,660

although I cannot prove that the

43

00:02:59,920 --> 00:02:56,209

intelligence behind the phenomena is et

44

00:03:02,860 --> 00:02:59,930

in nature I consider the ETH to be the

45

00:03:05,020 --> 00:03:02,870

least unlikely I also feel that there is

46

00:03:06,009 --> 00:03:05,030

a nuclear connection or one that

47

00:03:09,250 --> 00:03:06,019

indicates a cause-and-effect

48

00:03:11,680 --> 00:03:09,260

relationship with serious world events

49

00:03:13,900 --> 00:03:11,690

that could lead to a nuclear threat

50

00:03:16,510 --> 00:03:13,910

and that the evidence in the form of

51  
00:03:19,120 --> 00:03:16,520  
military sightings indicates an overt

52  
00:03:22,030 --> 00:03:19,130  
military type operation end of quote and

53  
00:03:24,910 --> 00:03:22,040  
also wanted to talk to one of our guests

54  
00:03:26,650 --> 00:03:24,920  
on the show later about a presentation I

55  
00:03:29,680 --> 00:03:26,660  
believe Frances Ridge just did recently

56  
00:03:32,020 --> 00:03:29,690  
in Connecticut MUFON chapter the next

57  
00:03:33,910 --> 00:03:32,030  
person of course is Michael panatela the

58  
00:03:36,030 --> 00:03:33,920  
director of MU fonts Connecticut chapter

59  
00:03:38,500 --> 00:03:36,040  
who I have had the pleasure and honor of

60  
00:03:41,650 --> 00:03:38,510  
interviewing before is also a friend of

61  
00:03:44,200 --> 00:03:41,660  
mine and Paul Wright who runs made our

62  
00:03:47,380 --> 00:03:44,210  
Frances Facebook page and is involved in

63  
00:03:52,900 --> 00:03:47,390

mater the made our three network page is

64

00:03:54,940 --> 00:03:52,910

what he runs maintained by him node 131

65

00:03:56,740 --> 00:03:54,950

France is what it's called and that he's

66

00:03:58,840 --> 00:03:56,750

been interested in this phenomena since

67

00:04:01,690 --> 00:03:58,850

he was a kid but only recently got

68

00:04:04,660 --> 00:04:01,700

involved with manner around end of 2017

69

00:04:07,930 --> 00:04:04,670

and also worked on some cases with the

70

00:04:10,030 --> 00:04:07,940

black fault in 2018 main focus at the

71

00:04:12,610 --> 00:04:10,040

moment is setting up and finding new

72

00:04:16,440 --> 00:04:12,620

tools to complement and work alongside

73

00:04:17,979 --> 00:04:16,450

made our welcome everyone to the show

74

00:04:27,970 --> 00:04:17,989

welcome aboard

75

00:04:29,290 --> 00:04:27,980

I'm eager Mike's ready to go okay and in

76

00:04:31,780 --> 00:04:29,300

that order I believe that was Michael

77

00:04:35,260 --> 00:04:31,790

panitch hello and I think that was Fran

78

00:04:37,060 --> 00:04:35,270

and then Paul right but when you talk

79

00:04:39,780 --> 00:04:37,070

gentlemen be sure to identify yourself

80

00:04:42,190 --> 00:04:39,790

so our audience knows who's speaking and

81

00:04:44,710 --> 00:04:42,200

wanted to ask Frank did you have a

82

00:04:46,720 --> 00:04:44,720

question you want to start off with yeah

83

00:04:49,600 --> 00:04:46,730

it should be pretty simple for you guys

84

00:04:52,210 --> 00:04:49,610

tell us all about the idea behind

85

00:04:55,060 --> 00:04:52,220

getting this made our project together

86

00:05:12,970 --> 00:04:55,070

and tell us a little bit about the gear

87

00:05:21,250 --> 00:05:18,250

the whole idea for me was the idea of an

88

00:05:22,870 --> 00:05:21,260

early warning system it's one thing it'd

89

00:05:27,160 --> 00:05:22,880

be an investigator I did a lot of

90

00:05:31,000 --> 00:05:27,170

investigating and I was at the mercy of

91

00:05:34,200 --> 00:05:31,010

the phenomena and I wanted to improve

92

00:05:37,240 --> 00:05:34,210

our chances of getting more sightings

93

00:05:42,910 --> 00:05:37,250

investigated and witnessed by people

94

00:05:48,910 --> 00:05:42,920

like us are trained so I built one

95

00:05:52,960 --> 00:05:48,920

device back in 1960 and worked on that

96

00:05:59,800 --> 00:05:52,970

and proved on it and didn't really get

97

00:06:01,600 --> 00:05:59,810

serious about it until 1973 when I got

98

00:06:04,330 --> 00:06:01,610

done traveling all over the place the

99

00:06:07,900 --> 00:06:04,340

company I work for used used to transfer

100

00:06:10,000 --> 00:06:07,910

us a lot and there's two or three years

101  
00:06:13,570 --> 00:06:10,010  
that I did that they made our wasn't

102  
00:06:15,640 --> 00:06:13,580  
hooked up so in 1973 when I got it

103  
00:06:22,870 --> 00:06:15,650  
hooked up got caught right in the middle

104  
00:06:28,120 --> 00:06:22,880  
of the wave of 1973 so it was always a

105  
00:06:33,040 --> 00:06:28,130  
one-man one station operation for a long

106  
00:06:36,550 --> 00:06:33,050  
time and we had several interesting you

107  
00:06:39,040 --> 00:06:36,560  
missed it took place but I am my

108  
00:06:42,280 --> 00:06:39,050  
greatest hope was to have a number of

109  
00:06:46,840 --> 00:06:42,290  
stations located worldwide operated by a

110  
00:06:49,330 --> 00:06:46,850  
number of trained people and April of

111  
00:06:51,760 --> 00:06:49,340  
night April of 2016

112  
00:06:55,510 --> 00:06:51,770  
that's where I came up on the idea of

113  
00:06:59,050 --> 00:06:55,520

how to make the main our three and it

114

00:07:02,320 --> 00:06:59,060

took us about six months to get started

115

00:07:04,270 --> 00:07:02,330

and then after about two years of hard

116

00:07:08,230 --> 00:07:04,280

work on that we were operational as me

117

00:07:14,500 --> 00:07:08,240

um the question I wanted to ask you Fran

118

00:07:16,900 --> 00:07:14,510

is how does made our work well right off

119

00:07:19,330 --> 00:07:16,910

the bat we knew we knew we couldn't lose

120

00:07:22,950 --> 00:07:19,340

that sounds kind of silly but when you

121

00:07:26,880 --> 00:07:22,960

have four or five hundred

122

00:07:31,090 --> 00:07:26,890

cases with vehicles being shut down and

123

00:07:33,270 --> 00:07:31,100

M effects and you have a hundred and

124

00:07:36,730 --> 00:07:33,280

fifty cases where compass needles movie

125

00:07:39,220 --> 00:07:36,740

that we knew that we had a winner we

126  
00:07:43,210 --> 00:07:39,230  
just had to figure out how to do it and

127  
00:07:45,330 --> 00:07:43,220  
what it basically does the original

128  
00:07:49,000 --> 00:07:45,340  
maker I was actually a physical compass

129  
00:07:52,270 --> 00:07:49,010  
that uses light beams to watch the

130  
00:07:58,890 --> 00:07:52,280  
movement but this new made our is all

131  
00:08:06,510 --> 00:08:01,240  
electronic compass which is the magnet

132  
00:08:09,850 --> 00:08:06,520  
Mary omer has the barometer and also

133  
00:08:11,650 --> 00:08:09,860  
has on board and an accelerometer which

134  
00:08:14,080 --> 00:08:11,660  
we don't use yet but it's there some of

135  
00:08:17,140 --> 00:08:14,090  
the people that have it already having

136  
00:08:21,610 --> 00:08:17,150  
on board we just haven't got the program

137  
00:08:25,240 --> 00:08:21,620  
written for it all of this data on the

138  
00:08:28,000 --> 00:08:25,250

radar is time dated with the universal

139

00:08:30,370 --> 00:08:28,010

time code so basically what it does it

140

00:08:32,980 --> 00:08:30,380

looks at it looks at the data about 15

141

00:08:36,280 --> 00:08:32,990

times a second and then every minute

142

00:08:40,560 --> 00:08:36,290

records those readings in milling gals

143

00:08:43,780 --> 00:08:40,570

and degrees in inches of mercury and

144

00:08:48,810 --> 00:08:43,790

then when the device goes into alert

145

00:08:51,790 --> 00:08:48,820

start it ramps up to once per second so

146

00:08:56,520 --> 00:08:51,800

Ricardian our friend now what type of

147

00:09:10,330 --> 00:09:03,930

well basically like indicating while ago

148

00:09:13,600 --> 00:09:10,340

we know that that ufos and compasses we

149

00:09:17,320 --> 00:09:13,610

have at least 150 cases where our

150

00:09:19,090 --> 00:09:17,330

compasses moved and so we may be that

151  
00:09:20,980 --> 00:09:19,100  
the magnetometer would also work but we

152  
00:09:23,590 --> 00:09:20,990  
do it'd be a lot more sensitive which it

153  
00:09:28,810 --> 00:09:23,600  
turned out to be true it's very very

154  
00:09:33,700 --> 00:09:28,820  
sensitive there may be times when we'll

155  
00:09:35,579 --> 00:09:33,710  
have an alert and and not know what it

156  
00:09:37,079 --> 00:09:35,589  
was of course and we're not concerned

157  
00:09:40,980 --> 00:09:37,089  
that what we're concerned about is two

158  
00:09:43,110 --> 00:09:40,990  
things if we have an alert and somebody

159  
00:09:46,079 --> 00:09:43,120  
reports UFO that's what we're looking

160  
00:09:49,350 --> 00:09:46,089  
for but the primary thing is when we

161  
00:09:51,179 --> 00:09:49,360  
have an alert we want to go out look so

162  
00:09:53,069 --> 00:09:51,189  
we're not really too concerned about all

163  
00:09:57,360 --> 00:09:53,079

the other times that it goes off and we

164

00:10:01,049 --> 00:09:57,370

don't I I have other questions but I

165

00:10:04,619 --> 00:10:01,059

wanted to skip to Paul right and ask him

166

00:10:08,309 --> 00:10:04,629

if he could just explain to us what kind

167

00:10:23,220 --> 00:10:08,319

of involvement he has in the made our

168

00:10:28,769 --> 00:10:26,720

my primary focus at the moment is

169

00:10:32,369 --> 00:10:28,779

looking for other tools to help

170

00:10:34,499 --> 00:10:32,379

complement the made our project and by

171

00:10:38,160 --> 00:10:34,509

that I mean I'm currently looking at

172

00:10:42,150 --> 00:10:38,170

setting up a passive radar system using

173

00:10:44,579 --> 00:10:42,160

an RTL SDR dongle that's the tiny little

174

00:10:47,579 --> 00:10:44,589

dongle that I'll plug into a laptop or a

175

00:10:52,590 --> 00:10:47,589

desktop and you connect an aerial such

176  
00:10:56,970 --> 00:10:52,600  
as a Yankee five element and that will

177  
00:11:00,929 --> 00:10:56,980  
scan the atmosphere and using signals

178  
00:11:02,790 --> 00:11:00,939  
from other like TV station transmitters

179  
00:11:04,679 --> 00:11:02,800  
in this case I'm going to be using the

180  
00:11:07,230 --> 00:11:04,689  
graves radar which is based in Leon

181  
00:11:10,410 --> 00:11:07,240  
which I think's in military radar I

182  
00:11:14,460 --> 00:11:10,420  
might not be right on that but if

183  
00:11:18,059 --> 00:11:14,470  
anything enters the atmosphere the radar

184  
00:11:21,689 --> 00:11:18,069  
will pick up these anomalies that are

185  
00:11:23,730 --> 00:11:21,699  
out there so hopefully that will match

186  
00:11:25,799 --> 00:11:23,740  
up with some some of the made our hits

187  
00:11:28,049 --> 00:11:25,809  
which will be really interesting before

188  
00:11:30,840 --> 00:11:28,059

I move on to Michael Pento cello the

189

00:11:32,460 --> 00:11:30,850

question I have for you is did your

190

00:11:39,880 --> 00:11:32,470

equipment ever go off and did you ever

191

00:11:53,540 --> 00:11:51,680

apart yeah hello yeah either nope for me

192

00:11:54,830 --> 00:11:53,550

this is this is still in development at

193

00:11:58,250 --> 00:11:54,840

the moment so this is something that I'm

194

00:12:02,210 --> 00:11:58,260

going to be testing fairly soon with

195

00:12:04,150 --> 00:12:02,220

regard to getting made eye hits but with

196

00:12:06,170 --> 00:12:04,160

with the made our system lieutenant we

197

00:12:09,440 --> 00:12:06,180

correct me if I'm wrong here and but I

198

00:12:12,400 --> 00:12:09,450

think we get emails that sent to us when

199

00:12:14,510 --> 00:12:12,410

the made our system picks up an alert I

200

00:12:17,060 --> 00:12:14,520

haven't actually got the system

201  
00:12:20,000 --> 00:12:17,070  
implemented where it will send up a an

202  
00:12:21,710 --> 00:12:20,010  
actual alarm say in the house to let me

203  
00:12:27,560 --> 00:12:21,720  
write then that I can go outside and

204  
00:12:30,620 --> 00:12:27,570  
look so I'm always slightly behind real

205  
00:12:33,140 --> 00:12:30,630  
real quick before champ moves along over

206  
00:12:37,370 --> 00:12:33,150  
to Michael yeah is there a ceiling for

207  
00:12:39,820 --> 00:12:37,380  
this particular device for the middle or

208  
00:12:44,840 --> 00:12:39,830  
for the passive radar

209  
00:12:47,120 --> 00:12:44,850  
we got it off and I don't know about the

210  
00:12:49,370 --> 00:12:47,130  
made are but that for the passive radar

211  
00:12:51,470 --> 00:12:49,380  
as far as I know it it can literally go

212  
00:12:53,960 --> 00:12:51,480  
to the edge of the atmosphere okay so

213  
00:12:59,750 --> 00:12:53,970

that's roughly ninety a hundred thousand

214

00:13:01,190 --> 00:12:59,760

feet right yeah okay Michael I wanted to

215

00:13:06,580 --> 00:13:01,200

ask you what is your involvement

216

00:13:08,810 --> 00:13:06,590

regarding the made our project well well

217

00:13:11,360 --> 00:13:08,820

Connecticut has been involved with it

218

00:13:14,830 --> 00:13:11,370

since beginning with some of the testing

219

00:13:17,510 --> 00:13:14,840

and implementation of the Automator

220

00:13:22,280 --> 00:13:17,520

but we've been supporting it as best as

221

00:13:26,620 --> 00:13:22,290

we can since it started and would it be

222

00:13:30,380 --> 00:13:26,630

fair to say that you actually have done

223

00:13:33,440 --> 00:13:30,390

youtube videos on this regarding talking

224

00:13:36,370 --> 00:13:33,450

about the research on it or what kind of

225

00:13:40,430 --> 00:13:36,380

what is the extent of the involvement

226

00:13:42,680 --> 00:13:40,440

well two of our members Armando and a

227

00:13:46,610 --> 00:13:42,690

guy named Mike they run two notes in

228

00:13:50,060 --> 00:13:46,620

Connecticut and we have talked about on

229

00:13:52,160 --> 00:13:50,070

our ham radio and that's that we run on

230

00:13:53,000 --> 00:13:52,170

Tuesdays and that's probably why you're

231

00:13:56,510 --> 00:13:53,010

talking about him

232

00:14:00,050 --> 00:13:56,520

regards to discussing minor operations

233

00:14:03,910 --> 00:14:00,060

over the internet yeah and also wanted

234

00:14:06,350 --> 00:14:03,920

to ask you is it correct that Fran Ridge

235

00:14:08,920 --> 00:14:06,360

visited your chapter and did a

236

00:14:12,460 --> 00:14:08,930

presentation recently or a while back

237

00:14:18,590 --> 00:14:12,470

yes he came to our November meeting the

238

00:14:22,640 --> 00:14:18,600

telephone everyone like they find the

239

00:14:25,930 --> 00:14:22,650

very interesting and informative the

240

00:14:29,150 --> 00:14:25,940

notes that are being run that Mike and

241

00:14:32,120 --> 00:14:29,160

Armando laundry on are running wanted to

242

00:14:35,150 --> 00:14:32,130

ask you have they detected any unusual

243

00:14:37,100 --> 00:14:35,160

activity and if so did anybody see

244

00:14:40,570 --> 00:14:37,110

anything in the sky has anything like

245

00:14:42,710 --> 00:14:40,580

that happened or have they detected any

246

00:14:50,650 --> 00:14:42,720

anomalous activity that could not be

247

00:14:56,720 --> 00:14:50,660

explained or could be explained the data

248

00:14:59,630 --> 00:14:56,730

on their machines I think Mike had some

249

00:15:01,730 --> 00:14:59,640

do to some more man-made objects but he

250

00:15:05,870 --> 00:15:01,740

simply fixed that and I think he's

251  
00:15:09,080 --> 00:15:05,880  
running smooth now the any anomalies are

252  
00:15:12,170 --> 00:15:09,090  
run by Fran through the database on the

253  
00:15:14,150 --> 00:15:12,180  
MUFON side I don't know of any in

254  
00:15:17,800 --> 00:15:14,160  
Connecticut that have correspondent it

255  
00:15:21,290 --> 00:15:17,810  
directly with them Hightower head okay

256  
00:15:24,260 --> 00:15:21,300  
okay so a back to you Fran a question I

257  
00:15:26,450 --> 00:15:24,270  
have for you is I have a few questions

258  
00:15:29,000 --> 00:15:26,460  
but one question I wanted to ask you is

259  
00:15:45,080 --> 00:15:29,010  
can you please state the main goals of

260  
00:15:47,690 --> 00:15:45,090  
the made our project what we were up

261  
00:15:51,050 --> 00:15:47,700  
against because we went operational in

262  
00:15:54,230 --> 00:15:51,060  
May of last year and I think you even

263  
00:15:57,590 --> 00:15:54,240

mentioned that we had like 22 was that

264

00:15:59,900 --> 00:15:57,600

when I but you said that we had 22 sites

265

00:16:03,710 --> 00:15:59,910

and all we started out oh now we got

266

00:16:05,090 --> 00:16:03,720

close to a hundred so basically we need

267

00:16:08,240 --> 00:16:05,100

the number

268

00:16:11,750 --> 00:16:08,250

and we're working out all kinds of

269

00:16:14,840 --> 00:16:11,760

little issues as we go they were getting

270

00:16:18,440 --> 00:16:14,850

hits on most of the notes so what we

271

00:16:21,020 --> 00:16:18,450

have to do is study those hits watch how

272

00:16:22,580 --> 00:16:21,030

the numbers change and of course they

273

00:16:25,850 --> 00:16:22,590

don't mean anything they're uncorrelated

274

00:16:30,530 --> 00:16:25,860

targets unless we do get sightings we're

275

00:16:32,920 --> 00:16:30,540

right now working with MUFON to check

276

00:16:35,810 --> 00:16:32,930

sightings for the previous week and

277

00:16:39,140 --> 00:16:35,820

actually also we're going back a year

278

00:16:43,010 --> 00:16:39,150

because we weren't doing it back at that

279

00:16:47,780 --> 00:16:43,020

time with Hans help so they're checking

280

00:16:49,990 --> 00:16:47,790

the June sightings of last year and the

281

00:16:53,570 --> 00:16:50,000

most important thing is to work out a

282

00:16:55,250 --> 00:16:53,580

system where it's actually an early

283

00:16:58,760 --> 00:16:55,260

warning system and we didn't build that

284

00:17:02,330 --> 00:16:58,770

in the device if you if you've seen the

285

00:17:06,290 --> 00:17:02,340

device it's so small that we couldn't

286

00:17:07,819 --> 00:17:06,300

have a car created an alarm panel there

287

00:17:10,130 --> 00:17:07,829

because that would first go I would have

288

00:17:14,329 --> 00:17:10,140

taken a lot more space and also would

289

00:17:16,250 --> 00:17:14,339

have been an e/m source so we would have

290

00:17:21,590 --> 00:17:16,260

been triggering the device

291

00:17:22,520 --> 00:17:21,600

- so device now to make an alarm panel

292

00:17:25,040 --> 00:17:22,530

and we're trying to get everybody

293

00:17:27,050 --> 00:17:25,050

equipped with that I just wanted to let

294

00:17:29,390 --> 00:17:27,060

our other guests know anytime you want

295

00:17:32,480 --> 00:17:29,400

to interrupt and talk please do because

296

00:17:34,220 --> 00:17:32,490

this shows about you and made our so by

297

00:17:35,540 --> 00:17:34,230

all means please jump in and start

298

00:17:38,750 --> 00:17:35,550

talking if you feel like you have

299

00:17:41,660 --> 00:17:38,760

something to add to the discussion one

300

00:17:45,920 --> 00:17:41,670

reason Fran why made are so successful

301  
00:17:46,930 --> 00:17:45,930  
was the WoW signal can you please chime

302  
00:17:50,900 --> 00:17:46,940  
in on that

303  
00:17:55,870 --> 00:17:50,910  
yeah first the first sightings that we

304  
00:17:59,570 --> 00:17:55,880  
had tied to made our were unbelievably

305  
00:18:01,760 --> 00:17:59,580  
Hubble spike quartz to dental they were

306  
00:18:03,830 --> 00:18:01,770  
they would they would occur within a few

307  
00:18:09,830 --> 00:18:03,840  
days and it was enough to get us excited

308  
00:18:12,530 --> 00:18:09,840  
but it wasn't until 1977 that we had we

309  
00:18:15,800 --> 00:18:12,540  
had seven sightings in July and August

310  
00:18:17,390 --> 00:18:15,810  
and right before I get to the Wow school

311  
00:18:18,380 --> 00:18:17,400  
now when I mentioned that on the 12th of

312  
00:18:23,240 --> 00:18:18,390  
July

313  
00:18:25,730 --> 00:18:23,250

we had a made art event that police

314

00:18:28,550 --> 00:18:25,740

reported there were sighting 65 miles

315

00:18:31,850 --> 00:18:28,560

and 85 miles away two different

316

00:18:34,040 --> 00:18:31,860

directions at the same time so that gave

317

00:18:36,970 --> 00:18:34,050

us a clue that a lot of times UFOs

318

00:18:40,880 --> 00:18:36,980

operate over large distances so by

319

00:18:43,850 --> 00:18:40,890

August the 15th we had the biggest event

320

00:18:48,370 --> 00:18:43,860

that we never recorded three minutes in

321

00:18:52,880 --> 00:18:48,380

29 seconds and 18 pulses and the

322

00:18:54,560 --> 00:18:52,890

radiation doubled well at the time that

323

00:18:56,720 --> 00:18:54,570

happened we didn't know about the wild

324

00:18:59,030 --> 00:18:56,730

signal so when I wrote my book I never

325

00:19:03,260 --> 00:18:59,040

mentioned the West didn't know about it

326

00:19:06,170 --> 00:19:03,270

32 years later we found out at the WoW

327

00:19:09,200 --> 00:19:06,180

signal 310 miles away at that

328

00:19:12,260 --> 00:19:09,210

Observatory occurred that exact same

329

00:19:14,180 --> 00:19:12,270

time and it's hard to think of a

330

00:19:17,090 --> 00:19:14,190

coincidence there so we think that was

331

00:19:18,920 --> 00:19:17,100

very important so one of the questions I

332

00:19:21,550 --> 00:19:18,930

have planned on asking you was can you

333

00:19:23,690 --> 00:19:21,560

share an instance an instance where a

334

00:19:26,630 --> 00:19:23,700

detection by a made our unit

335

00:19:30,440 --> 00:19:26,640

conclusively showed us data caused by a

336

00:19:32,390 --> 00:19:30,450

UFO with that instance fall under that

337

00:19:39,200 --> 00:19:32,400

or is there another instance you can

338

00:19:43,690 --> 00:19:39,210

share regarding that question excuse me

339

00:19:59,700 --> 00:19:43,700

those started right after the 1973

340

00:20:05,260 --> 00:20:01,960

well let's put it this way there was a

341

00:20:07,870 --> 00:20:05,270

there was a series of sightings during

342

00:20:11,620 --> 00:20:07,880

that massive signing away one of which

343

00:20:15,310 --> 00:20:11,630

was the coin case in Mansfield Ohio yes

344

00:20:19,270 --> 00:20:15,320

the gula incident the DEF CON three over

345

00:20:22,960 --> 00:20:19,280

the arab-israeli war we had local

346

00:20:25,090 --> 00:20:22,970

signings we had one sighting actually

347

00:20:31,330 --> 00:20:25,100

two sightings locally at the same time I

348

00:20:33,130 --> 00:20:31,340

made or went off the whole year went

349

00:20:36,790 --> 00:20:33,140

along without any major events until

350

00:20:39,130 --> 00:20:36,800

November the 1st and it was striking to

351  
00:20:44,860 --> 00:20:39,140  
see the graph or made art was right at

352  
00:20:47,530 --> 00:20:44,870  
the peak really quickly oh yeah Fran I

353  
00:20:49,450 --> 00:20:47,540  
really quick did you ever regarding the

354  
00:20:53,470 --> 00:20:49,460  
WoW signal did you ever follow up with

355  
00:20:57,460 --> 00:20:53,480  
dr. Jerry Amon who found that signal in

356  
00:21:14,590 --> 00:20:57,470  
his data and you know see if see what he

357  
00:21:17,410 --> 00:21:14,600  
thought we kind of worked hard with my

358  
00:21:19,270 --> 00:21:17,420  
discovery of the the anomaly on the

359  
00:21:22,270 --> 00:21:19,280  
backside of the moon appear cells to see

360  
00:21:23,980 --> 00:21:22,280  
I was working with NASA on different

361  
00:21:26,260 --> 00:21:23,990  
aspects of that and the men and I

362  
00:21:29,740 --> 00:21:26,270  
brought that report up and reported it I

363  
00:21:31,840 --> 00:21:29,750

lost contact all the people um Fran

364

00:21:35,350 --> 00:21:31,850

realizing that many things can alter a

365

00:21:38,470 --> 00:21:35,360

magnetic field how do you discern the

366

00:21:46,210 --> 00:21:38,480

difference between completely normal

367

00:21:48,490 --> 00:21:46,220

events versus a UFO well we don't we

368

00:21:51,940 --> 00:21:48,500

don't get too concerned about it if we

369

00:21:54,940 --> 00:21:51,950

don't have a sighting so the way we look

370

00:21:56,920 --> 00:21:54,950

at it if you have an anomaly reported

371

00:22:00,670 --> 00:21:56,930

and there's no signing it's what we call

372

00:22:04,030 --> 00:22:00,680

that and uncorrelated target but if we

373

00:22:05,620 --> 00:22:04,040

have a sighting then you know then it

374

00:22:07,900 --> 00:22:05,630

becomes important no thing we have to

375

00:22:10,840 --> 00:22:07,910

watch to someone they haven't made our

376

00:22:11,970 --> 00:22:10,850

unit it made trigger and they may go out

377

00:22:14,770 --> 00:22:11,980

and see an airplane

378

00:22:19,480 --> 00:22:14,780

if they're too far out they might

379

00:22:22,510 --> 00:22:19,490

consider that to be which that's a good

380

00:22:24,300 --> 00:22:22,520

segue just when sex sorry Frank to lead

381

00:22:27,880 --> 00:22:24,310

to the next question I have which is

382

00:22:35,950 --> 00:22:27,890

Fran who analyzes any data that is

383

00:22:38,730 --> 00:22:35,960

collected at an event we have about 50

384

00:22:44,530 --> 00:22:38,740

members with different degrees of

385

00:22:46,690 --> 00:22:44,540

expertise and if we after going over the

386

00:22:48,450 --> 00:22:46,700

data with Mia phone and those people if

387

00:22:51,940 --> 00:22:48,460

we have something that looks very

388

00:22:56,020 --> 00:22:51,950

compelling we're right now working on a

389

00:22:57,730 --> 00:22:56,030

group of people making independently so

390

00:22:59,260 --> 00:22:57,740

slightly similar question who

391

00:23:10,150 --> 00:22:59,270

investigates the triggered events

392

00:23:15,700 --> 00:23:10,160

noticed by the unit knew fine we would

393

00:23:20,020 --> 00:23:15,710

work with the state director okay Frank

394

00:23:21,780 --> 00:23:20,030

go ahead uh yeah basically yeah for

395

00:23:26,980 --> 00:23:21,790

something to really get your attention

396

00:23:29,140 --> 00:23:26,990

you would want a made are alert and then

397

00:23:31,030 --> 00:23:29,150

an independent witness somebody who

398

00:23:33,190 --> 00:23:31,040

doesn't have the radar node you would

399

00:23:35,230 --> 00:23:33,200

want that independent witness to have

400

00:23:38,020 --> 00:23:35,240

witnessed something and reported it so

401  
00:23:42,700 --> 00:23:38,030  
is that about right really get your

402  
00:23:45,850 --> 00:23:42,710  
follow-up reasons why we also record

403  
00:23:48,130 --> 00:23:45,860  
aircraft transmissions because that to

404  
00:23:50,980 --> 00:23:48,140  
me would be one of the highest-rated is

405  
00:23:53,290 --> 00:23:50,990  
some air pilot talking to a control

406  
00:23:57,460 --> 00:23:53,300  
tower a hundred miles away would be

407  
00:24:02,560 --> 00:23:57,470  
reporting an unusual object that would

408  
00:24:04,840 --> 00:24:02,570  
be pretty compelling to me and so then

409  
00:24:09,310 --> 00:24:04,850  
Fran what if anything is done with the

410  
00:24:18,280 --> 00:24:09,320  
data collected and who uses it how is it

411  
00:24:21,790 --> 00:24:18,290  
shared for research purposes that's

412  
00:24:25,420 --> 00:24:21,800  
being considered okay what to do and how

413  
00:24:27,700 --> 00:24:25,430

to do it another quick question you

414

00:24:29,680 --> 00:24:27,710

got these made our alerts going off and

415

00:24:33,040 --> 00:24:29,690

obviously not everybody can be you know

416

00:24:34,960 --> 00:24:33,050

sort of around their node 24/7 now

417

00:24:35,410 --> 00:24:34,970

people have to sleep and so on and so

418

00:24:37,840 --> 00:24:35,420

forth

419

00:24:39,820 --> 00:24:37,850

are these things running at and go to

420

00:24:43,060 --> 00:24:39,830

work and all that good stuff so are

421

00:24:44,530 --> 00:24:43,070

these devices of the running 24/7 are

422

00:24:45,820 --> 00:24:44,540

people shutting them down and only

423

00:24:48,850 --> 00:24:45,830

running them you know when they're at

424

00:24:50,140 --> 00:24:48,860

home and just kind of relaxing I mean

425

00:24:57,940 --> 00:24:50,150

how does how does that part of the

426  
00:25:00,700 --> 00:24:57,950  
system work and the server records those

427  
00:25:06,460 --> 00:25:00,710  
debut lines that I described at once per

428  
00:25:08,410 --> 00:25:06,470  
minute it's called a status line okay

429  
00:25:11,800 --> 00:25:08,420  
and that there's there one centralized

430  
00:25:15,070 --> 00:25:11,810  
server that does this yes got it okay

431  
00:25:17,590 --> 00:25:15,080  
okay and let's say yeah an alert goes

432  
00:25:20,740 --> 00:25:17,600  
off and somebody's not home the

433  
00:25:22,570 --> 00:25:20,750  
centralized server will the server get

434  
00:25:27,190 --> 00:25:22,580  
the alert as well or how exactly does

435  
00:25:37,090 --> 00:25:27,200  
that work okay

436  
00:25:39,610 --> 00:25:37,100  
alert email to the okay okay Fran I've

437  
00:25:42,250 --> 00:25:39,620  
got a kind of a hardball question for

438  
00:25:44,230 --> 00:25:42,260

you and that is how would your unit for

439

00:25:47,500 --> 00:25:44,240

hundreds of dollars be any different

440

00:25:50,470 --> 00:25:47,510

than say having a compass or using a

441

00:25:53,110 --> 00:25:50,480

magno meter like an application called

442

00:26:01,410 --> 00:25:53,120

Tesla meter 11 that rich Hoffmann

443

00:26:04,000 --> 00:26:01,420

mentioned on our previous show and the

444

00:26:08,610 --> 00:26:04,010

I'm trying to think of that fourth one

445

00:26:14,800 --> 00:26:08,620

there's one that has lights on the goose

446

00:26:16,900 --> 00:26:14,810

mm-hmm they would be like they would be

447

00:26:19,510 --> 00:26:16,910

used if someone saw a UFO and they would

448

00:26:22,360 --> 00:26:19,520

grab one of those and see what they can

449

00:26:23,800 --> 00:26:22,370

do and the odds against that are kinda

450

00:26:27,180 --> 00:26:23,810

rare but I would still suggest that they

451  
00:26:29,830 --> 00:26:27,190  
do that but none of those would

452  
00:26:35,350 --> 00:26:29,840  
automatically and would not be running

453  
00:26:43,630 --> 00:26:38,320  
and store data and so how sensitive is

454  
00:26:47,920 --> 00:26:43,640  
the unit Oh too sensitive but we would

455  
00:26:49,960 --> 00:26:47,930  
be or we rather have that and have a lot

456  
00:26:52,360 --> 00:26:49,970  
of uncorrelated targets rather than miss

457  
00:26:54,460 --> 00:26:52,370  
something so right now we're running

458  
00:26:57,910 --> 00:26:54,470  
them at its ratio of what we call 30

459  
00:26:59,350 --> 00:26:57,920  
milli gals their true

460  
00:27:06,460 --> 00:26:59,360  
some of those are triggering twice a

461  
00:27:08,380 --> 00:27:06,470  
week okay there's something and yeah

462  
00:27:14,050 --> 00:27:08,390  
what type of things come up that trigger

463  
00:27:15,910 --> 00:27:14,060

false positives very few very few

464

00:27:19,480 --> 00:27:15,920

because that inverse keep with the

465

00:27:22,000 --> 00:27:19,490

distance I know one time my wife pulled

466

00:27:24,640 --> 00:27:22,010

the car up real close to the office door

467

00:27:27,520 --> 00:27:24,650

and triggered it it was like two feet

468

00:27:30,490 --> 00:27:27,530

away but in most cases you know a fire

469

00:27:32,680 --> 00:27:30,500

truck or a UPS truck or a train might

470

00:27:35,290 --> 00:27:32,690

Millea wouldn't it wouldn't trigger now

471

00:27:38,710 --> 00:27:35,300

one guy in Georgia claimed the c-130

472

00:27:40,570 --> 00:27:38,720

flew for treetop level on trigger day it

473

00:27:44,650 --> 00:27:40,580

was carrying the electronic equipments

474

00:27:47,860 --> 00:27:44,660

alright we don't really know um okay so

475

00:27:50,670 --> 00:27:47,870

few more questions one connected to what

476

00:27:55,860 --> 00:27:50,680

you just said is some kind of a

477

00:27:59,020 --> 00:27:55,870

barometer or some kind of some kind of a

478

00:28:02,290 --> 00:27:59,030

part of your equipment that can can

479

00:28:04,300 --> 00:28:02,300

desensitize the sensitivity level if you

480

00:28:06,490 --> 00:28:04,310

can understand what I'm saying so that

481

00:28:08,350 --> 00:28:06,500

it doesn't it doesn't pick up everything

482

00:28:12,640 --> 00:28:08,360

can you actually lower the sensitivity

483

00:28:14,860 --> 00:28:12,650

level of the equipment yes okay and is

484

00:28:27,010 --> 00:28:14,870

there a warranty with this unit for if

485

00:28:29,470 --> 00:28:27,020

so for how long we have we've gone well

486

00:28:34,780 --> 00:28:29,480

over you know we're backwards to make

487

00:28:36,370 --> 00:28:34,790

sure they stay running properly is there

488

00:28:38,140 --> 00:28:36,380

any kind of maintenance involved like

489

00:28:40,690 --> 00:28:38,150

any kind of calibration that has to be

490

00:28:45,670 --> 00:28:40,700

done on a yeah I got a yearly basis or

491

00:28:48,550 --> 00:28:45,680

quarterly basis anything like that no so

492

00:28:49,100 --> 00:28:48,560

so Fran how does one know if the unit is

493

00:28:50,810 --> 00:28:49,110

working

494

00:28:54,970 --> 00:28:50,820

or not so let's just say I have one in

495

00:28:59,630 --> 00:28:54,980

front of me how do I know it's working

496

00:29:02,240 --> 00:28:59,640

go to the main site and click on the

497

00:29:05,240 --> 00:29:02,250

node and if first of all if the node

498

00:29:08,090 --> 00:29:05,250

shows that the time is correct you know

499

00:29:12,200 --> 00:29:08,100

that it that it's running now if the

500

00:29:14,510 --> 00:29:12,210

numbers if it's if it's running but the

501  
00:29:17,150 --> 00:29:14,520  
numbers are never changing that would

502  
00:29:18,860 --> 00:29:17,160  
indicate you know something is wrong and

503  
00:29:19,580 --> 00:29:18,870  
so far we haven't had anything like that

504  
00:29:21,169 --> 00:29:19,590  
happen

505  
00:29:23,210 --> 00:29:21,179  
and I would like to mention to our

506  
00:29:24,530 --> 00:29:23,220  
listeners I'm on the made our site right

507  
00:29:30,560 --> 00:29:24,540  
now so what you would do is you would

508  
00:29:35,000 --> 00:29:30,570  
type in triple w dot m a dar dot site s

509  
00:29:37,220 --> 00:29:35,010  
ite and on this site what you can do is

510  
00:29:39,590 --> 00:29:37,230  
you can use your cursor you know click

511  
00:29:41,360 --> 00:29:39,600  
on the pad that you have in front of you

512  
00:29:44,080 --> 00:29:41,370  
the mousepad if you're on a laptop or

513  
00:29:47,330 --> 00:29:44,090

use your mouse if you're on a computer

514

00:29:50,630 --> 00:29:47,340

and you can actually zoom in and out and

515

00:29:52,820 --> 00:29:50,640

control the distance level and also grab

516

00:29:55,640 --> 00:29:52,830

the screen and move it up and down to be

517

00:29:57,230 --> 00:29:55,650

able to see where all the mater is it

518

00:30:04,210 --> 00:29:57,240

the made our units I'm looking at right

519

00:30:09,620 --> 00:30:04,220

now yes or is it all the hits location

520

00:30:12,680 --> 00:30:09,630

okay good yeah all right yeah real quick

521

00:30:15,380 --> 00:30:12,690

Apollo you're over in France are you

522

00:30:17,299 --> 00:30:15,390

plugged into the us-based ed network or

523

00:30:21,340 --> 00:30:17,309

do you have your own independent network

524

00:30:39,440 --> 00:30:21,350

in France it's connected back to friends

525

00:30:43,130 --> 00:30:39,450

server Wow okay Michael my question to

526

00:30:46,400 --> 00:30:43,140

you is what prompted your interest in

527

00:30:50,180 --> 00:30:46,410

the made our topic in other words why

528

00:30:53,240 --> 00:30:50,190

why get involved at all what was in it

529

00:30:56,480 --> 00:30:53,250

for you as far as getting involved in

530

00:30:58,070 --> 00:30:56,490

the made our project well I really got

531

00:31:00,770 --> 00:30:58,080

involved because one of my members

532

00:31:03,110 --> 00:31:00,780

wanted to get involved with it and he

533

00:31:07,549 --> 00:31:03,120

liked it and I wanted to support

534

00:31:10,160 --> 00:31:07,559

him and do what I can to to promote it

535

00:31:15,130 --> 00:31:10,170

within the chapter to help him improve

536

00:31:18,500 --> 00:31:15,140

it because he liked it I like it because

537

00:31:21,500 --> 00:31:18,510

it can't hurt to try having another way

538

00:31:25,340 --> 00:31:21,510

of looking for UFOs on a more regular

539

00:31:27,290 --> 00:31:25,350

basis and once it gets proven I look

540

00:31:30,170 --> 00:31:27,300

forward to it being a regular part of

541

00:31:34,280 --> 00:31:30,180

you ethology are you talking about my

542

00:31:36,320 --> 00:31:34,290

kin Armando or one of them yeah

543

00:31:40,160 --> 00:31:36,330

Armand does a really wonderful person

544

00:31:42,440 --> 00:31:40,170

he's a friend of mine also he is I mean

545

00:31:44,120 --> 00:31:42,450

if you want to say deeply involved it

546

00:31:47,120 --> 00:31:44,130

seems like he is regarding the made our

547

00:31:49,360 --> 00:31:47,130

project I think he also is involved in

548

00:31:52,640 --> 00:31:49,370

would it be fair to say ham radio

549

00:31:57,140 --> 00:31:52,650

interest he's an enthusiast of that we

550

00:31:59,060 --> 00:31:57,150

both are yeah and also you know there's

551

00:32:01,160 --> 00:31:59,070

a quite a few people who don't really

552

00:32:03,280 --> 00:32:01,170

know what ham radio is can you explain

553

00:32:08,419 --> 00:32:03,290

to us what does that mean what is it

554

00:32:12,770 --> 00:32:08,429

ham radio is amateur radio - ham it's

555

00:32:15,110 --> 00:32:12,780

more like a just the jargon of it so on

556

00:32:19,330 --> 00:32:15,120

the radio spectrum some of the radio

557

00:32:22,100 --> 00:32:19,340

waves are put aside for communication by

558

00:32:24,530 --> 00:32:22,110

basically talking to a device

559

00:32:27,140 --> 00:32:24,540

the most common way people think of it

560

00:32:32,020 --> 00:32:27,150

is CB radios you know if you watched on

561

00:32:34,700 --> 00:32:32,030

TV with the truckers citizen band that's

562

00:32:37,220 --> 00:32:34,710

kind of gives you an idea what ham radio

563

00:32:40,040 --> 00:32:37,230

is ham radio was one level higher get

564

00:32:43,040 --> 00:32:40,050

license by the FCC

565

00:32:45,710 --> 00:32:43,050

you can you know you run all kinds of

566

00:32:48,470 --> 00:32:45,720

nets for example you want to Skywarn net

567

00:32:51,290 --> 00:32:48,480

not me particularly but ham radio in

568

00:32:54,530 --> 00:32:51,300

general we participate in a lot of

569

00:32:58,940 --> 00:32:54,540

public service so Skywarn is a way where

570

00:33:00,799 --> 00:32:58,950

we will in a storm monitor the weather

571

00:33:03,140 --> 00:33:00,809

so when you're watching your local

572

00:33:05,120 --> 00:33:03,150

forecast for example on the Thursday

573

00:33:06,919 --> 00:33:05,130

night or whenever and it's like well we

574

00:33:10,130 --> 00:33:06,929

have three inches of snow here four

575

00:33:11,990 --> 00:33:10,140

inches of snow there ham radios were

576

00:33:15,950 --> 00:33:12,000

involved in collecting that data ham

577

00:33:17,090 --> 00:33:15,960

radio operators and so it's a rewarding

578

00:33:19,610 --> 00:33:17,100

field for sir

579

00:33:22,580 --> 00:33:19,620

and just regular communication and for

580

00:33:25,940 --> 00:33:22,590

your apology we use it for crime to

581

00:33:29,180 --> 00:33:25,950

promote the field and combine the two

582

00:33:31,990 --> 00:33:29,190

fields into one and since Armando is a

583

00:33:35,060 --> 00:33:32,000

ham and I'm a ham we decided to run de

584

00:33:37,789 --> 00:33:35,070

annette and it's it's been picking up

585

00:33:40,759 --> 00:33:37,799

it's pretty popular and we enjoy it

586

00:33:42,680 --> 00:33:40,769

people enjoy listening to it Michael I

587

00:33:44,450 --> 00:33:42,690

was going to ask you if people in

588

00:33:46,039 --> 00:33:44,460

Connecticut or even outside of

589

00:33:49,310 --> 00:33:46,049

Connecticut want to travel to your

590

00:33:52,759 --> 00:33:49,320

chapter to listen to presentations by

591

00:33:55,039 --> 00:33:52,769

speakers from all over the world can

592

00:33:57,830 --> 00:33:55,049

where do they go you know what's the

593

00:33:59,840 --> 00:33:57,840

address where how do they actually go

594

00:34:03,619 --> 00:33:59,850

see these wonderful presentations that

595

00:34:06,980 --> 00:34:03,629

Connecticut MUFON has well you can see

596

00:34:09,559 --> 00:34:06,990

all of our information on MUFON CT comm

597

00:34:11,419 --> 00:34:09,569

there's a link to the Connecticut might

598

00:34:14,349 --> 00:34:11,429

our page which will talk about our

599

00:34:17,359 --> 00:34:14,359

involvement in the might our program

600

00:34:19,220 --> 00:34:17,369

there's a link to our YouTube page so if

601  
00:34:20,960 --> 00:34:19,230  
you want to see our ham and radio and

602  
00:34:25,700 --> 00:34:20,970  
that's live if you're curious about what

603  
00:34:28,280 --> 00:34:25,710  
ham radio is you can go on there and any

604  
00:34:33,139 --> 00:34:28,290  
kind of events that we have we post on

605  
00:34:35,180 --> 00:34:33,149  
that website as well to answer your

606  
00:34:37,700 --> 00:34:35,190  
question if they want to see what we're

607  
00:34:39,740 --> 00:34:37,710  
doing and and see some of our videos of

608  
00:34:43,369 --> 00:34:39,750  
our presentations it is all linked for

609  
00:34:44,930 --> 00:34:43,379  
our website thank you uh just one

610  
00:34:49,220 --> 00:34:44,940  
question left for you Michael did you

611  
00:34:50,669 --> 00:34:49,230  
ever did you ever get involved in nycap

612  
00:34:52,930 --> 00:34:50,679  
in any way shape or form

613  
00:34:56,180 --> 00:34:52,940

[Music]

614

00:34:58,640 --> 00:34:56,190

however friend has and Fran I wanted to

615

00:35:01,220 --> 00:34:58,650

ask you can you please share with us

616

00:35:05,180 --> 00:35:01,230

your involvement in nycap your role and

617

00:35:08,660 --> 00:35:05,190

just a little bit about that well of

618

00:35:11,059 --> 00:35:08,670

course Mike it was along with a pro the

619

00:35:14,920 --> 00:35:11,069

two major organizations when I was a

620

00:35:18,500 --> 00:35:14,930

young man getting out of high school and

621

00:35:22,250 --> 00:35:18,510

when I got involved with my cap they had

622

00:35:24,680 --> 00:35:22,260

about 18 subcommittees and I got a team

623

00:35:27,650 --> 00:35:24,690

of investigators together and three

624

00:35:29,730 --> 00:35:27,660

advisors we had a seven-man team and we

625

00:35:33,450 --> 00:35:29,740

were indiana unit 1 which is 1

626

00:35:38,609 --> 00:35:33,460

for an Indiana that went until about the

627

00:35:44,990 --> 00:35:38,619

mid 70s when I kept went under and of

628

00:35:48,240 --> 00:35:45,000

course be fine was yeah yeah I okay so

629

00:35:50,190 --> 00:35:48,250

there's 32 people on your a team who

630

00:35:52,050 --> 00:35:50,200

have participated in your nightcap

631

00:35:55,589 --> 00:35:52,060

research over the years is that right

632

00:35:59,640 --> 00:35:55,599

yes okay and then the chronology of

633

00:36:01,800 --> 00:35:59,650

NICAP can you just kind of share a short

634

00:36:15,960 --> 00:36:01,810

blurb on that and then I wanted to move

635

00:36:19,079 --> 00:36:15,970

on to another topic and of course they

636

00:36:21,660 --> 00:36:19,089

were the early years and then when I got

637

00:36:25,440 --> 00:36:21,670

started they continued that on on that

638

00:36:30,270 --> 00:36:25,450

to about 1964 when they put out the UFO

639

00:36:33,660 --> 00:36:30,280

evidence so when I got the nightcap site

640

00:36:36,510 --> 00:36:33,670

going in the mid 90s we took those we

641

00:36:41,450 --> 00:36:36,520

improved on them and of course added the

642

00:36:43,530 --> 00:36:41,460

following years so each each year has

643

00:36:46,980 --> 00:36:43,540

chronological listings they're very

644

00:36:49,770 --> 00:36:46,990

brief and in most cases at least the

645

00:36:51,480 --> 00:36:49,780

important ones there's a hot link that

646

00:36:54,950 --> 00:36:51,490

you can click on that takes you to the

647

00:36:58,410 --> 00:36:54,960

directory bring yeah the directory has a

648

00:37:00,570 --> 00:36:58,420

little bit you know a short story but it

649

00:37:02,760 --> 00:37:00,580

has all these pertinent documents right

650

00:37:04,410 --> 00:37:02,770

the database and link information the

651  
00:37:06,839 --> 00:37:04,420  
full storing documents on the nightcap

652  
00:37:10,020 --> 00:37:06,849  
site right there but can you please

653  
00:37:12,570 --> 00:37:10,030  
share with us a little bit about ruh-ruh

654  
00:37:23,520 --> 00:37:12,580  
Pelt's book maybe an anecdotal story

655  
00:37:27,120 --> 00:37:23,530  
about that most important books and

656  
00:37:29,430 --> 00:37:27,130  
anybody anybody in the into this field

657  
00:37:32,339 --> 00:37:29,440  
should definitely read that book and

658  
00:37:35,370 --> 00:37:32,349  
it's free it's actually free on the

659  
00:37:40,800 --> 00:37:35,380  
night side by the way and that's where I

660  
00:37:43,350 --> 00:37:40,810  
found it yeah I was in the eighth grade

661  
00:37:46,140 --> 00:37:43,360  
and I was in the

662  
00:37:49,200 --> 00:37:46,150  
the middle row approximately two or

663  
00:37:51,150 --> 00:37:49,210

three people back from the gym from a

664

00:37:56,790 --> 00:37:51,160

young man who was reading that book in

665

00:37:59,040 --> 00:37:56,800

class and he and Ira friend he passed it

666

00:38:01,770 --> 00:37:59,050

back to me and it was the pocket look

667

00:38:05,040 --> 00:38:01,780

denelle aversion you know like a bantam

668

00:38:07,680 --> 00:38:05,050

version and we were both paging through

669

00:38:11,280 --> 00:38:07,690

that during class and we got detention

670

00:38:13,410 --> 00:38:11,290

over um

671

00:38:15,570 --> 00:38:13,420

you recommend people actually look at

672

00:38:18,150 --> 00:38:15,580

the mantel case which at first you had a

673

00:38:20,370 --> 00:38:18,160

lot of doubts about until you

674

00:38:22,920 --> 00:38:20,380

investigate it and you came to a

675

00:38:24,900 --> 00:38:22,930

different conclusion on it channel 14

676

00:38:27,090 --> 00:38:24,910

interviewed you on that it took two

677

00:38:29,670 --> 00:38:27,100

years to finalize the conclusion on it

678

00:38:32,640 --> 00:38:29,680

and if folks want to read more about

679

00:38:33,930 --> 00:38:32,650

that regarding that investigation all

680

00:38:36,030 --> 00:38:33,940

they need to do is go to the made our

681

00:38:37,890 --> 00:38:36,040

site for the mantle and root belt book

682

00:38:45,500 --> 00:38:37,900

as you're saying can you tell us a

683

00:38:50,760 --> 00:38:48,090

for years and years and years I mean

684

00:38:54,900 --> 00:38:50,770

root belt mentioned it he explained it

685

00:38:57,360 --> 00:38:54,910

as a skyhook balloon and four decades

686

00:38:59,970 --> 00:38:57,370

after that just about every responsible

687

00:39:02,670 --> 00:38:59,980

researcher that had read into it

688

00:39:06,450 --> 00:39:02,680

basically read what bruco had available

689

00:39:10,560 --> 00:39:06,460

and there was nothing new but then later

690

00:39:13,920 --> 00:39:10,570

on we got into the FOIA documents and we

691

00:39:16,980 --> 00:39:13,930

found one that said that he had an

692

00:39:19,680 --> 00:39:16,990

operating oxygen system which blew

693

00:39:23,220 --> 00:39:19,690

everybody away and then of course we got

694

00:39:26,700 --> 00:39:23,230

the we had to buy but we we bought the

695

00:39:29,700 --> 00:39:26,710

accident report and my eight my 18 went

696

00:39:32,220 --> 00:39:29,710

over all that data and the conclusion

697

00:39:35,610 --> 00:39:32,230

was that the object he was chasing

698

00:39:37,740 --> 00:39:35,620

wasn't unknown yeah and just for the

699

00:39:42,720 --> 00:39:37,750

folks who might not be really familiar

700

00:39:45,390 --> 00:39:42,730

with that case January 1948 in Kentucky

701

00:39:48,840 --> 00:39:45,400

they were getting a number of UFO

702

00:39:52,110 --> 00:39:48,850

sightings citizens as well as a state

703

00:39:56,400 --> 00:39:52,120

police were you know they were they were

704

00:39:59,560 --> 00:39:56,410

seeing this UFO and enough people had

705

00:40:01,210 --> 00:39:59,570

reported to the local airport I believe

706

00:40:04,170 --> 00:40:01,220

is our God when I believe was the Air

707

00:40:08,650 --> 00:40:04,180

Force Base but anyway they they had

708

00:40:11,440 --> 00:40:08,660

contacted a group of four p50 ones that

709

00:40:13,839 --> 00:40:11,450

were just happened to be flying by I

710

00:40:15,640 --> 00:40:13,849

think they were heading from Georgia and

711

00:40:18,400 --> 00:40:15,650

I'm not sure what their destination was

712

00:40:20,520 --> 00:40:18,410

but they were asked to go take a closer

713

00:40:25,839 --> 00:40:20,530

look and one of them of course was a

714

00:40:28,660 --> 00:40:25,849

captain Mantell he got a beetle in

715

00:40:31,140 --> 00:40:28,670

the UFO was a track he was following it

716

00:40:34,780 --> 00:40:31,150

up to a very high altitudes and

717

00:40:37,420 --> 00:40:34,790

ultimately he crashed as I was as a

718

00:40:40,900 --> 00:40:37,430

result of days chasing this UFO so it

719

00:40:42,339 --> 00:40:40,910

was a huge story at the time and the

720

00:40:46,570 --> 00:40:42,349

story had always been that yeah

721

00:40:48,130 --> 00:40:46,580

basically that he didn't have his oxygen

722

00:40:50,349 --> 00:40:48,140

system wasn't ready to go they weren't

723

00:40:54,339 --> 00:40:50,359

expecting to fly that high so he didn't

724

00:40:57,640 --> 00:40:54,349

have oxygen he may have just ran out and

725

00:40:59,620 --> 00:40:57,650

suffer from hypoxia and that's what

726

00:41:02,230 --> 00:40:59,630

caused them to lose control of the plane

727

00:41:05,410 --> 00:41:02,240

and ultimately crash and tragically end

728

00:41:09,400 --> 00:41:05,420

up dead so that was a huge case back in

729

00:41:12,640 --> 00:41:09,410

the day but you're saying that he the

730

00:41:13,990 --> 00:41:12,650

the the p-51 the oxygen was actually

731

00:41:19,930 --> 00:41:14,000

ready to go and he should have been able

732

00:41:22,690 --> 00:41:19,940

to use it and he was probably defective

733

00:41:24,490 --> 00:41:22,700

in some way and then he actually did you

734

00:41:27,700 --> 00:41:24,500

know he died from the crash it wasn't

735

00:41:30,609 --> 00:41:27,710

anything you know anything like that

736

00:41:36,910 --> 00:41:30,619

what came out and the investigation was

737

00:41:39,220 --> 00:41:36,920

that the wingman lied and it was amazing

738

00:41:40,690 --> 00:41:39,230

the the facts and the details that we

739

00:41:44,980 --> 00:41:40,700

found out for one thing they used to

740

00:41:47,470 --> 00:41:44,990

plan 62 which as the as he was chasing

741

00:41:51,700 --> 00:41:47,480

the object airports that were listening

742

00:41:54,040 --> 00:41:51,710

in to hear everything he said there yeah

743

00:41:55,839 --> 00:41:54,050

now there are a lot of reports that they

744

00:41:59,530 --> 00:41:55,849

had some very interesting things to say

745

00:42:01,329 --> 00:41:59,540

as he got a beat on it oh yeah he said

746

00:42:02,980 --> 00:42:01,339

it was larger metallic tremendous in

747

00:42:05,240 --> 00:42:02,990

size instead he was going to go up a

748

00:42:09,710 --> 00:42:07,339

thing was the airforce pretended that

749

00:42:12,530 --> 00:42:09,720

the that there wasn't much UFO activity

750

00:42:15,230 --> 00:42:12,540

in the area and it turns out there were

751  
00:42:18,650 --> 00:42:15,240  
some real good UFO sightings starting

752  
00:42:21,950 --> 00:42:18,660  
over in Ohio I wanted to ask Michael

753  
00:42:23,750 --> 00:42:21,960  
Penn a cello a question I interviewed

754  
00:42:26,960 --> 00:42:23,760  
you a while back I think it was last

755  
00:42:30,080 --> 00:42:26,970  
year Michael and I asked you to please

756  
00:42:31,609 --> 00:42:30,090  
share a list of UFO cases that

757  
00:42:33,560 --> 00:42:31,619  
influenced you regarding the most

758  
00:42:36,740 --> 00:42:33,570  
evidence of a possible extraterrestrial

759  
00:42:39,500 --> 00:42:36,750  
presence or crafts and you said the

760  
00:42:42,680 --> 00:42:39,510  
Rendlesham forest incident the O'Hare

761  
00:42:45,920 --> 00:42:42,690  
Airport UFO sighting the Belgium Wave

762  
00:42:49,280 --> 00:42:45,930  
sightings Malstrom air force base UFO

763  
00:42:51,170 --> 00:42:49,290

incident and Roswell Michael do you have

764

00:42:59,089 --> 00:42:51,180

any other case that you would like to

765

00:43:01,700 --> 00:42:59,099

add to that list popular cases I think

766

00:43:03,920 --> 00:43:01,710

the Phoenix flights I've been reading a

767

00:43:07,520 --> 00:43:03,930

lot more about the Phoenix lights the

768

00:43:09,800 --> 00:43:07,530

last few years and I don't remember it

769

00:43:13,550 --> 00:43:09,810

was before after you interviewed me we

770

00:43:16,910 --> 00:43:13,560

had Peter Davenport come on our do a

771

00:43:19,250 --> 00:43:16,920

lecture for our chapter and his whole

772

00:43:21,620 --> 00:43:19,260

lecture was on the Phoenix lights I mean

773

00:43:24,410 --> 00:43:21,630

he describes this the reports that he

774

00:43:28,700 --> 00:43:24,420

got in the night of the site of that

775

00:43:31,250 --> 00:43:28,710

event it was it was something unique now

776

00:43:34,220 --> 00:43:31,260

whether it was ours it was something

777

00:43:36,530 --> 00:43:34,230

classified or or it was extraterrestrial

778

00:43:39,290 --> 00:43:36,540

I don't know but it was definitely an

779

00:43:41,150 --> 00:43:39,300

unknown so I that guy will add that one

780

00:43:44,510 --> 00:43:41,160

to the list because he gave an excellent

781

00:43:46,400 --> 00:43:44,520

presentation you had a lot of new

782

00:43:49,520 --> 00:43:46,410

information that I didn't know about and

783

00:43:50,060 --> 00:43:49,530

then so I would put that one in there as

784

00:43:52,640 --> 00:43:50,070

well

785

00:43:54,320 --> 00:43:52,650

okay and then also when I asked you what

786

00:43:56,780 --> 00:43:54,330

is the most interesting case you've

787

00:43:59,180 --> 00:43:56,790

worked on you said I worked on an

788

00:44:02,060 --> 00:43:59,190

abduction case a few years ago the

789

00:44:04,070 --> 00:44:02,070

person has had a unique experience the

790

00:44:06,650 --> 00:44:04,080

case is still going on so you can't talk

791

00:44:07,880 --> 00:44:06,660

much about it but for sure it has raised

792

00:44:10,930 --> 00:44:07,890

a lot of questions that need to be

793

00:44:13,490 --> 00:44:10,940

answered why is it my most interesting

794

00:44:16,250 --> 00:44:13,500

case you've worked on you would say

795

00:44:18,200 --> 00:44:16,260

because of how it's working out there

796

00:44:19,130 --> 00:44:18,210

are parts that are classic abduction and

797

00:44:21,260 --> 00:44:19,140

parts that are

798

00:44:23,390 --> 00:44:21,270

man-made was something going on in this

799

00:44:26,030 --> 00:44:23,400

case we don't know yet can you share

800

00:44:29,630 --> 00:44:26,040

with us in the most general manner what

801  
00:44:34,730 --> 00:44:29,640  
did happen with that case the witness

802  
00:44:38,120 --> 00:44:34,740  
just rehash what the way the witness was

803  
00:44:42,170 --> 00:44:38,130  
home alone on a Friday night it was a

804  
00:44:47,660 --> 00:44:42,180  
the person was in bed they heard a loud

805  
00:44:51,950 --> 00:44:47,670  
like thump they saw three little aliens

806  
00:44:54,410 --> 00:44:51,960  
that describe this typical greys the the

807  
00:44:57,680 --> 00:44:54,420  
person was paralyzed couldn't move his

808  
00:45:02,150 --> 00:44:57,690  
body when he woke up the graves were

809  
00:45:05,180 --> 00:45:02,160  
gone and the interesting thing about it

810  
00:45:06,980 --> 00:45:05,190  
was some of the characteristics and the

811  
00:45:08,570 --> 00:45:06,990  
characteristics of the abduction was he

812  
00:45:14,690 --> 00:45:08,580  
saw a blue light which is common with

813  
00:45:17,540 --> 00:45:14,700

abductions the the way that the aliens

814

00:45:20,960 --> 00:45:17,550

were described with typical greys in

815

00:45:26,390 --> 00:45:20,970

description the size matched what a gray

816

00:45:30,080 --> 00:45:26,400

size would be their interest in him it

817

00:45:32,240 --> 00:45:30,090

was a guy and his son also matches with

818

00:45:33,980 --> 00:45:32,250

abductions as they usually happen within

819

00:45:38,530 --> 00:45:33,990

families or there's a family connection

820

00:45:42,140 --> 00:45:38,540

it's usually never an isolated abduction

821

00:45:43,850 --> 00:45:42,150

the things that were weird was he's

822

00:45:45,890 --> 00:45:43,860

heard like a hissing sound in the

823

00:45:48,290 --> 00:45:45,900

background that he couldn't explain and

824

00:45:51,080 --> 00:45:48,300

we couldn't really explain

825

00:45:56,110 --> 00:45:51,090

he never was abducted before or after a

826

00:46:00,140 --> 00:45:56,120

40-day him his his offspring his child

827

00:46:02,450 --> 00:46:00,150

doesn't report any abductions clean

828

00:46:05,450 --> 00:46:02,460

background nothing unusual with the guy

829

00:46:08,000 --> 00:46:05,460

in his background so you know it's

830

00:46:09,710 --> 00:46:08,010

something that it's just random we can't

831

00:46:14,300 --> 00:46:09,720

really figure out like why they wanted

832

00:46:16,400 --> 00:46:14,310

him or what they needed him for but yeah

833

00:46:18,860 --> 00:46:16,410

it's still it's still I guess it's still

834

00:46:21,290 --> 00:46:18,870

ongoing we closed it as an unknown we

835

00:46:23,870 --> 00:46:21,300

hold on we haven't heard from the guy

836

00:46:26,150 --> 00:46:23,880

since so I assume he's okay but he has

837

00:46:28,040 --> 00:46:26,160

our numbers if you ever need this last

838

00:46:30,080 --> 00:46:28,050

time I interviewed you you also said

839

00:46:33,080 --> 00:46:30,090

you've never had a UFO sighting is that

840

00:46:36,590 --> 00:46:33,090

still true yeah I thought

841

00:46:39,410 --> 00:46:36,600

had to mm-hmm but I went on and looked

842

00:46:42,890 --> 00:46:39,420

at the playing radar data and one was a

843

00:46:46,370 --> 00:46:42,900

UPS and one was a FedEx aircraft going

844

00:46:48,110 --> 00:46:46,380

in there Bradley they were both on final

845

00:46:49,460 --> 00:46:48,120

approach so they look like triangles

846

00:46:51,920 --> 00:46:49,470

because they were low and other

847

00:46:55,190 --> 00:46:51,930

navigation lights on mm-hmm but they

848

00:46:57,380 --> 00:46:55,200

they were just craft that were ours I'm

849

00:46:59,300 --> 00:46:57,390

glad you mentioned that triangle shape

850

00:47:01,040 --> 00:46:59,310

because that rich Hoffman was mentioning

851  
00:47:04,160 --> 00:47:01,050  
he had a case where there were

852  
00:47:06,290 --> 00:47:04,170  
satellites that were actually multiple

853  
00:47:08,000 --> 00:47:06,300  
ones in the shape of a triangle so it's

854  
00:47:10,730 --> 00:47:08,010  
important for our listeners to know that

855  
00:47:12,890 --> 00:47:10,740  
that's possible also I wanted to also

856  
00:47:17,840 --> 00:47:12,900  
let our listeners know one thing that

857  
00:47:20,390 --> 00:47:17,850  
Michael said and that is Hynek had the

858  
00:47:22,310 --> 00:47:20,400  
right idea that evidence and scientific

859  
00:47:25,280 --> 00:47:22,320  
approaches to ufology are the best ways

860  
00:47:26,870 --> 00:47:25,290  
to make the feel credible sources get

861  
00:47:28,970 --> 00:47:26,880  
people to go on the record

862  
00:47:31,400 --> 00:47:28,980  
find factual data and documents to use

863  
00:47:33,860 --> 00:47:31,410

in your presentations and papers pie in

864

00:47:35,990 --> 00:47:33,870

the sky thinking is good however it is

865

00:47:38,300 --> 00:47:36,000

not taken serious but mainstream media

866

00:47:40,880 --> 00:47:38,310

the scientific community or most people

867

00:47:42,350 --> 00:47:40,890

who are critical thinkers and then you

868

00:47:44,000 --> 00:47:42,360

gave an example you attended a

869

00:47:45,830 --> 00:47:44,010

conference once and the featured speaker

870

00:47:48,110 --> 00:47:45,840

was giving all this info about multiple

871

00:47:49,010 --> 00:47:48,120

dimensions and aliens that was hearsay

872

00:47:51,350 --> 00:47:49,020

at best

873

00:47:53,540 --> 00:47:51,360

after the lecture was over the speaker

874

00:47:56,030 --> 00:47:53,550

was ripped to pieces by the audience's

875

00:47:58,550 --> 00:47:56,040

questions if someone new to the field of

876

00:48:00,710 --> 00:47:58,560

ufology heard the speaker as their first

877

00:48:03,830 --> 00:48:00,720

intro to the field it would have looked

878

00:48:05,470 --> 00:48:03,840

pretty bad in your opinion and you will

879

00:48:08,860 --> 00:48:05,480

and basically you're just saying

880

00:48:11,360 --> 00:48:08,870

research that's credible needs to be

881

00:48:13,730 --> 00:48:11,370

needs to be what brings credibility to

882

00:48:14,960 --> 00:48:13,740

this field how do you feel about what

883

00:48:17,540 --> 00:48:14,970

you said there Michael do you have any

884

00:48:18,790 --> 00:48:17,550

more to add to that no I think that

885

00:48:23,780 --> 00:48:18,800

still stands

886

00:48:26,930 --> 00:48:23,790

yeah okay and so it's going to ask Paul

887

00:48:30,770 --> 00:48:26,940

write a question Paul can you please

888

00:48:34,040 --> 00:48:30,780

tell me the kind of a kind of a pointed

889

00:48:39,050 --> 00:48:34,050

question let's say you do have a miter

890

00:48:41,090 --> 00:48:39,060

unit and it goes off and you you for

891

00:48:43,280 --> 00:48:41,100

some reason have this strange feeling

892

00:48:46,789 --> 00:48:43,290

that there's something outside that

893

00:48:49,459 --> 00:48:46,799

might not be airplanes satellite or

894

00:48:52,759 --> 00:48:49,469

or easily identifiable then you go

895

00:49:00,140 --> 00:48:52,769

outside and it's exactly that it's an

896

00:49:02,509 --> 00:49:00,150

anomalous craft what do you do what

897

00:49:04,789 --> 00:49:02,519

would you do if that happened to you and

898

00:49:07,910 --> 00:49:04,799

you could not identify what it was and

899

00:49:10,249 --> 00:49:07,920

it was hovering over where you lived

900

00:49:13,519 --> 00:49:10,259

it'd be great if I could film it first

901  
00:49:14,220 --> 00:49:13,529  
off ok I'd pick up the phone to friend

902  
00:49:19,390 --> 00:49:14,230  
straight away

903  
00:49:27,979 --> 00:49:22,299  
you have Fred on speed dial

904  
00:49:31,249 --> 00:49:27,989  
hopefully yeah all right ok and Frank

905  
00:49:33,439 --> 00:49:31,259  
did you have any questions for me yeah I

906  
00:49:35,089 --> 00:49:33,449  
wanted to double back a friend now this

907  
00:49:36,949 --> 00:49:35,099  
was something that I turned up doing a

908  
00:49:39,019 --> 00:49:36,959  
little background preparing for this

909  
00:49:41,630 --> 00:49:39,029  
show regarding nycap and something I

910  
00:49:45,439 --> 00:49:41,640  
didn't realize before and that night cap

911  
00:49:48,079 --> 00:49:45,449  
was founded by the inventor T Townsend

912  
00:49:50,289 --> 00:49:48,089  
Brown who was actually a heavy heavily

913  
00:49:53,689 --> 00:49:50,299

involved in the research regarding

914

00:49:55,939 --> 00:49:53,699

anti-gravity and I know is out likely uh

915

00:49:58,130 --> 00:49:55,949

he was involved a little bit before you

916

00:50:09,169 --> 00:49:58,140

joined the organization but if you had

917

00:50:13,609 --> 00:50:09,179

any thoughts on all that a lot of the

918

00:50:17,499 --> 00:50:13,619

historic things because I had so much

919

00:50:22,339 --> 00:50:17,509

going we had so much going you know

920

00:50:25,219 --> 00:50:22,349

these weird coincidences we run into I

921

00:50:27,259 --> 00:50:25,229

didn't tell you that one of the reasons

922

00:50:29,059 --> 00:50:27,269

why I got involved was because a man

923

00:50:32,479 --> 00:50:29,069

that worked for project sign

924

00:50:34,459 --> 00:50:32,489

I told me how to finish the Geiger

925

00:50:37,400 --> 00:50:34,469

counter I was working for in high school

926

00:50:41,029 --> 00:50:37,410

and because of that I got involved with

927

00:50:43,099 --> 00:50:41,039

making a UFO detector basically similar

928

00:50:51,049 --> 00:50:43,109

to the Cartwright detective so he was

929

00:50:53,989 --> 00:50:51,059

with projects that's incredible

930

00:50:57,199 --> 00:50:53,999

ok and Fran I wanted to ask you if

931

00:51:00,750 --> 00:50:57,209

anyone is interested in my dar and

932

00:51:02,040 --> 00:51:00,760

purchasing a unit

933

00:51:05,460 --> 00:51:02,050

we'll go ahead and let them know where

934

00:51:09,470 --> 00:51:05,470

to go you know online to do that but

935

00:51:13,140 --> 00:51:09,480

right now how much are they running for

936

00:51:15,600 --> 00:51:13,150

two hundred and forty dollars and they

937

00:51:17,400 --> 00:51:15,610

go to that site that you mentioned it

938

00:51:21,210 --> 00:51:17,410

has at the top of the page it has

939

00:51:23,010 --> 00:51:21,220

purchased okay and so our listeners know

940

00:51:29,490 --> 00:51:23,020

where to go they would go to triple w

941

00:51:30,630 --> 00:51:29,500

dot m ad AR dot s ite is that right then

942

00:51:32,370 --> 00:51:30,640

I'll have a link to that in the

943

00:51:35,850 --> 00:51:32,380

description so that'll be easy to find

944

00:51:38,240 --> 00:51:35,860

good you know we did a wonderful kind of

945

00:51:42,380 --> 00:51:38,250

pre-interview with Fran last night and

946

00:51:45,390 --> 00:51:42,390

Frank you and Fran were talking about

947

00:51:48,590 --> 00:51:45,400

some really fascinating cases one was

948

00:51:51,090 --> 00:51:48,600

the coin helicopter case and

949

00:51:53,910 --> 00:51:51,100

incidentally Dick Cavett did a show on

950

00:51:56,130 --> 00:51:53,920

that as you were saying Fran and so did

951  
00:51:58,260 --> 00:51:56,140  
Hickson and you can't see any of those

952  
00:52:00,540 --> 00:51:58,270  
on YouTube nobody can seem to find them

953  
00:52:02,490 --> 00:52:00,550  
if any of our members can by the way

954  
00:52:04,140 --> 00:52:02,500  
please let us know we'd love to see

955  
00:52:06,840 --> 00:52:04,150  
those shows be sure to download them

956  
00:52:08,310 --> 00:52:06,850  
first and then send us the link so they

957  
00:52:11,400 --> 00:52:08,320  
don't take him off YouTube before you

958  
00:52:14,690 --> 00:52:11,410  
can get him but can you Fran or Frank

959  
00:52:17,160 --> 00:52:14,700  
chime in on the coin helicopter case I

960  
00:52:19,710 --> 00:52:17,170  
just know that it's a favorite case of

961  
00:52:24,060 --> 00:52:19,720  
an awful lot of people it basically it

962  
00:52:27,180 --> 00:52:24,070  
involved an Ohio National Guard two

963  
00:52:29,820 --> 00:52:27,190

helicopter pilot lieutenant coin and he

964

00:52:32,100 --> 00:52:29,830

and his crew were flying from Columbus

965

00:52:36,540 --> 00:52:32,110

to Cleveland a roughly Cleveland area

966

00:52:42,120 --> 00:52:36,550

and in flight what they encountered was

967

00:52:43,770 --> 00:52:42,130

a UFO that also raised their altitude in

968

00:52:46,230 --> 00:52:43,780

a matter of seconds raised the actual

969

00:52:47,010 --> 00:52:46,240

altitude of the helicopter several

970

00:52:50,160 --> 00:52:47,020

thousand feet

971

00:52:52,530 --> 00:52:50,170

there were also ground sightings of this

972

00:52:54,390 --> 00:52:52,540

UFO so it was an extraordinary occasion

973

00:52:56,790 --> 00:52:54,400

of course bran was discussing a

974

00:52:58,080 --> 00:52:56,800

correlation between some of the the

975

00:53:00,330 --> 00:52:58,090

sightings and the hits that he was

976  
00:53:02,580 --> 00:53:00,340  
getting in Indiana with this particular

977  
00:53:04,920 --> 00:53:02,590  
case so I know it's a favorite of a lot

978  
00:53:11,180 --> 00:53:04,930  
of people my friend what are your

979  
00:53:16,519 --> 00:53:13,819  
a lot of people you know it perk it

980  
00:53:18,940 --> 00:53:16,529  
prepped them up and what we found though

981  
00:53:22,670 --> 00:53:18,950  
there was a sighting at the same time in

982  
00:53:25,249 --> 00:53:22,680  
Mount Vernon over on Ford Road and this

983  
00:53:28,690 --> 00:53:25,259  
woman had just gone to bed and she heard

984  
00:53:31,549 --> 00:53:28,700  
this vibrating noise throbbing noise and

985  
00:53:34,239 --> 00:53:31,559  
she went out sciency so this huge

986  
00:53:37,130 --> 00:53:34,249  
tubular shaped object that looked like

987  
00:53:40,069 --> 00:53:37,140  
it had a lot of lights all over it

988  
00:53:42,170 --> 00:53:40,079

and it had just passed through the

989

00:53:46,309 --> 00:53:42,180

vehicle order which is the mile from her

990

00:53:48,559 --> 00:53:46,319

house between her and the river so it

991

00:53:50,989 --> 00:53:48,569

was seen at the same time so it

992

00:53:52,759 --> 00:53:50,999

indicates you know that there was

993

00:53:57,319 --> 00:53:52,769

something going on over that region at

994

00:54:01,339 --> 00:53:57,329

the same time okay yeah we were talking

995

00:54:05,479 --> 00:54:01,349

about how there was a UFO in Indiana

996

00:54:10,190 --> 00:54:05,489

Mount Vernon 15 miles of from Evansville

997

00:54:14,120 --> 00:54:10,200

during the mid-70s last night Fran do

998

00:54:16,130 --> 00:54:14,130

you remember that yes can you can you

999

00:54:26,089 --> 00:54:16,140

give us a little bit of information on

1000

00:54:29,239 --> 00:54:26,099

that a little bit more people were

1001  
00:54:32,299 --> 00:54:29,249  
reporting but it looked like a rotating

1002  
00:54:36,079 --> 00:54:32,309  
disc the lights on it were rotating and

1003  
00:54:40,549 --> 00:54:36,089  
we we watched it several nights in a row

1004  
00:54:43,339 --> 00:54:40,559  
and the control car told us that the FAA

1005  
00:54:45,039 --> 00:54:43,349  
was testing a new lighting system called

1006  
00:54:48,019 --> 00:54:45,049  
the see and be seen

1007  
00:54:50,859 --> 00:54:48,029  
so this jet from Memphis would be coming

1008  
00:54:55,690 --> 00:54:50,869  
in and then be hundreds of miles out and

1009  
00:54:58,219 --> 00:54:55,700  
you could see it would be like the

1010  
00:55:00,920 --> 00:54:58,229  
orange in color because of the dirty

1011  
00:55:02,719 --> 00:55:00,930  
atmosphere and then as it got close the

1012  
00:55:05,180 --> 00:55:02,729  
lights would separate me bright like

1013  
00:55:09,049 --> 00:55:05,190

headlights and then they on Zeke return

1014

00:55:11,809 --> 00:55:09,059

on its approach and drop to 8,000 feet

1015

00:55:14,120 --> 00:55:11,819

and kick on all these lights and that's

1016

00:55:16,190 --> 00:55:14,130

what people were seeing so me and two

1017

00:55:18,859 --> 00:55:16,200

other guys with three did three

1018

00:55:21,559 --> 00:55:18,869

different automobiles and CB radios went

1019

00:55:24,150 --> 00:55:21,569

out to op1 which is a cemetery hill and

1020

00:55:27,420 --> 00:55:24,160

we were watching this and marveling over

1021

00:55:29,400 --> 00:55:27,430

but while we were in there and this is

1022

00:55:31,530 --> 00:55:29,410

really one reason to watch still doing

1023

00:55:33,870 --> 00:55:31,540

what I've done while we were there

1024

00:55:36,030 --> 00:55:33,880

something came out of the West that

1025

00:55:38,910 --> 00:55:36,040

looked like an ambulance

1026

00:55:41,610 --> 00:55:38,920

it had the lights going around it's

1027

00:55:46,680 --> 00:55:41,620

similar to the objects seen in Close

1028

00:55:48,960 --> 00:55:46,690

Encounters of their kind ha ha and as it

1029

00:55:52,550 --> 00:55:48,970

was coming towards us it turned south

1030

00:55:55,890 --> 00:55:52,560

and headed right down the highway but

1031

00:55:57,780 --> 00:55:55,900

being new in the area I wasn't I wasn't

1032

00:55:59,910 --> 00:55:57,790

familiar with the roads and the next day

1033

00:56:01,980 --> 00:55:59,920

we found out there was no road there so

1034

00:56:05,450 --> 00:56:01,990

whatever it was came over a cornfield

1035

00:56:09,030 --> 00:56:05,460

straight towards us and headed south and

1036

00:56:12,780 --> 00:56:09,040

to this day I can't help but believe

1037

00:56:14,460 --> 00:56:12,790

somebody somebody we were there that's

1038

00:56:24,270 --> 00:56:14,470

amazing too bad you didn't have your

1039

00:56:26,700 --> 00:56:24,280

cell phone with you yeah that was an

1040

00:56:29,010 --> 00:56:26,710

amazing time that's that's the period

1041

00:56:32,670 --> 00:56:29,020

that first got me into being interested

1042

00:56:35,040 --> 00:56:32,680

in the UFOs that that 1973 timeframe

1043

00:56:37,290 --> 00:56:35,050

yeah I Paul I wanted to jump over to you

1044

00:56:39,990 --> 00:56:37,300

now you're headquartered in France now

1045

00:56:43,290 --> 00:56:40,000

and I also I couldn't help but notice

1046

00:56:46,560 --> 00:56:43,300

your marvelous British accent so I I

1047

00:56:48,600 --> 00:56:46,570

wanted to ask you it seems like at least

1048

00:56:51,210 --> 00:56:48,610

in France that we hear that the subject

1049

00:56:52,920 --> 00:56:51,220

of the UFOs is taking a little bit more

1050

00:56:55,680 --> 00:56:52,930

seriously than it might be here in the

1051  
00:56:57,870 --> 00:56:55,690  
States and wondered you know can you

1052  
00:56:59,520 --> 00:56:57,880  
talk a little bit about that and talk

1053  
00:57:01,980 --> 00:56:59,530  
about you know are there any differences

1054  
00:57:04,740 --> 00:57:01,990  
between how its accepted in france's our

1055  
00:57:09,030 --> 00:57:04,750  
visa via the UK and the u.s. can you

1056  
00:57:13,500 --> 00:57:09,040  
tell us a little bit about that well I

1057  
00:57:15,600 --> 00:57:13,510  
want the Jeep and here in France they

1058  
00:57:20,010 --> 00:57:15,610  
seemed to take forever to get their data

1059  
00:57:21,300 --> 00:57:20,020  
out on their website they're hard to

1060  
00:57:25,860 --> 00:57:21,310  
approach they're not they're not very

1061  
00:57:28,860 --> 00:57:25,870  
forthcoming with information but it's it

1062  
00:57:31,530 --> 00:57:28,870  
to me coming from the UK it seems very

1063  
00:57:35,880 --> 00:57:31,540

sort of closed doors here with our

1064

00:57:37,280 --> 00:57:35,890

theater folks albeit taken seriously at

1065

00:57:39,770 --> 00:57:37,290

the same time

1066

00:57:41,540 --> 00:57:39,780

so the books we take it seriously yeah

1067

00:57:43,730 --> 00:57:41,550

yeah yeah it does are the folks is taken

1068

00:57:45,860 --> 00:57:43,740

seriously take it seriously but they

1069

00:57:53,840 --> 00:57:45,870

don't share openly what they've at what

1070

00:57:56,450 --> 00:57:53,850

the data they've gathered no okay well I

1071

00:57:59,890 --> 00:57:56,460

wanted to let everybody know that if

1072

00:58:02,840 --> 00:57:59,900

they want to find out more about the

1073

00:58:07,780 --> 00:58:02,850

roof on Connecticut chapter all they

1074

00:58:13,900 --> 00:58:07,790

have to do is go on Facebook and look up

1075

00:58:17,740 --> 00:58:13,910

facebook.com slash groups slash MUFON CT

1076

00:58:22,310 --> 00:58:17,750

and MUFON is Mau Fon so that's

1077

00:58:25,180 --> 00:58:22,320

facebook.com slash groups slash MUFON CT

1078

00:58:27,910 --> 00:58:25,190

and then they have a page which is

1079

00:58:31,540 --> 00:58:27,920

relatively the same URL it's

1080

00:58:34,040 --> 00:58:31,550

facebook.com slash MUFON Connecticut and

1081

00:58:35,900 --> 00:58:34,050

Michael panecillo is the director of

1082

00:58:37,520 --> 00:58:35,910

MUFON Connecticut thank you very much

1083

00:58:42,110 --> 00:58:37,530

for having been on the show today and

1084

00:58:46,460 --> 00:58:42,120

then we also had Paul Wright on who runs

1085

00:58:48,530 --> 00:58:46,470

the made our system in France for Fran

1086

00:58:49,880 --> 00:58:48,540

Ridge and you're going to you're

1087

00:58:55,310 --> 00:58:49,890

basically working on more equipment

1088

00:58:57,710 --> 00:58:55,320

right regarding the mitre node I suppose

1089

00:59:00,260 --> 00:58:57,720

is that how is that the terminology I

1090

00:59:05,420 --> 00:59:00,270

would use to refer to it or what would

1091

00:59:08,990 --> 00:59:05,430

you call it okay and then hahaha thank

1092

00:59:12,500 --> 00:59:09,000

you and then we had Fran Ridge who is

1093

00:59:15,970 --> 00:59:12,510

the head of my dar and he's had sixty

1094

00:59:19,010 --> 00:59:15,980

years regarding the topic of ufology and

1095

00:59:20,630 --> 00:59:19,020

studying and researching it and we're

1096

00:59:22,940 --> 00:59:20,640

just so very grateful to have had you on

1097

00:59:27,380 --> 00:59:22,950

the show want to direct people to please

1098

00:59:33,260 --> 00:59:27,390

go to his site which is triple w dot M a

1099

00:59:34,970 --> 00:59:33,270

dar dot s ite and would like to ask Fran

1100

00:59:37,550 --> 00:59:34,980

and everybody else to please come back

1101

00:59:39,710 --> 00:59:37,560

on our show again next year and I

1102

00:59:41,510 --> 00:59:39,720

recommend probably like you know late

1103

00:59:43,640 --> 00:59:41,520

next year when there's more developments

1104

00:59:45,200 --> 00:59:43,650

going on with the equipment Paul would

1105

00:59:47,210 --> 00:59:45,210

you be willing to come back on with us

1106

00:59:49,310 --> 00:59:47,220

to give us a report on that you know

1107

00:59:51,200 --> 00:59:49,320

that'd be great yeah when you got that

1108

00:59:53,210 --> 00:59:51,210

some some hot stuff fight so

1109

00:59:57,560 --> 00:59:53,220

matter of time if you keep the other

1110

01:00:00,980 --> 00:59:57,570

gear right and then Michael I would love

1111

01:00:04,359 --> 01:00:00,990

to ask Armando and Mike to join us on

1112

01:00:07,310 --> 01:00:04,369

the show also regarding their might our

1113

01:00:09,859 --> 01:00:07,320

equipment experiences and of course Fran

1114

01:00:11,810 --> 01:00:09,869

we cannot have a show without you so

1115

01:00:17,120 --> 01:00:11,820

would love to have you all back on the

1116

01:00:20,829 --> 01:00:17,130

show again next year thank you all for

1117

01:00:26,990 --> 01:00:24,200

thanks again thank you very much well

1118

01:00:27,770 --> 01:00:27,000

everybody chant thanks thanks to our

1119

01:00:31,099 --> 01:00:27,780

guests

1120

01:00:33,250 --> 01:00:31,109

Michael panitch hello Fran Ridge and

1121

01:00:35,329 --> 01:00:33,260

Paul Wright thanks for joining us and

1122

01:00:37,400 --> 01:00:35,339

amazing tech we've got here we don't

1123

01:00:39,410 --> 01:00:37,410

have a made our set up here but we got

1124

01:00:41,900 --> 01:00:39,420

some amazing tech to bring these people

1125

01:00:43,910 --> 01:00:41,910

in from all over the states and even

1126  
01:00:46,460 --> 01:00:43,920  
over into Europe so thanks again fellas

1127  
01:00:48,800 --> 01:00:46,470  
thanks chantara for setting this up I

1128  
01:00:50,390 --> 01:00:48,810  
sure do appreciate that and is there

1129  
01:00:51,440 --> 01:00:50,400  
anything else you got for us in closing

1130  
01:00:54,560 --> 01:00:51,450  
I do

1131  
01:00:58,940 --> 01:00:54,570  
I really recommend people buy this unit

1132  
01:01:02,450 --> 01:00:58,950  
and one reason why is we all want to

1133  
01:01:05,420 --> 01:01:02,460  
learn more about this topic it's vitally

1134  
01:01:08,329 --> 01:01:05,430  
important that we all put forth an

1135  
01:01:11,540 --> 01:01:08,339  
effort to find out more about it and if

1136  
01:01:15,530 --> 01:01:11,550  
you have the discretionary income to

1137  
01:01:17,839 --> 01:01:15,540  
spend to buy unit I highly recommend

1138  
01:01:23,540 --> 01:01:17,849

doing so so you can go ahead and do that

1139

01:01:25,940 --> 01:01:23,550

on their site at triple w dot made r dot

1140

01:01:29,780 --> 01:01:25,950

SI te thank you very much and have a

1141

01:01:31,880 --> 01:01:29,790

lovely evening all right yeah thanks a

1142

01:01:33,680 --> 01:01:31,890

lot everybody good night and we'll be

1143

01:01:34,970 --> 01:01:33,690

seeing you soon with another fine show
