PHOENIX MUFON BOOT CAMP FOR UFO INVESTIGATIONS

**UFONN
SUNDAY**

1
00:01:02,700 --> 00:00:12,000

[Music]

2
00:01:05,009 --> 00:01:02,710

and good afternoon from Philadelphia

3
00:01:07,740 --> 00:01:05,019

Frank here with another episode of UFO

4
00:01:09,120 --> 00:01:07,750

news network Sunday we're ready to go

5
00:01:11,880 --> 00:01:09,130

let's not waste any time

6
00:01:14,790 --> 00:01:11,890

let me bring on my co-host chant Hannah

7
00:01:16,350 --> 00:01:14,800

to introduce our panel and our topic for

8
00:01:18,510 --> 00:01:16,360

today hi jet

9
00:01:20,850 --> 00:01:18,520

hi Frank thank you for introducing you

10
00:01:22,560 --> 00:01:20,860

on the show we have a very very special

11
00:01:25,290 --> 00:01:22,570

show today at sea

12
00:01:27,930 --> 00:01:25,300

Phoenix MUFON camp a boot camp special

13
00:01:29,999 --> 00:01:27,940

and we have some fabulous people on that

14

00:01:32,420 --> 00:01:30,009

is Jim Mann Arizona State Director and

15

00:01:35,880 --> 00:01:32,430

co-director of Phoenix MUFON we have

16

00:01:39,480 --> 00:01:35,890

Stacey Wright and she is the assistant

17

00:01:42,499 --> 00:01:39,490

director of Phoenix MUFON we have Mark

18

00:01:46,710 --> 00:01:42,509

Dantonio and we've had mark on the show

19

00:01:48,450 --> 00:01:46,720

before he is a MUFON chief photo video

20

00:01:50,370 --> 00:01:48,460

analyst in his degree is in astronomy

21

00:01:53,820 --> 00:01:50,380

and he specializes in the study of

22

00:01:56,040 --> 00:01:53,830

exoplanets we also have Shane heard

23

00:01:57,870 --> 00:01:56,050

we've had him multiple times on our show

24

00:02:00,419 --> 00:01:57,880

and he's a field investigator for

25

00:02:02,190 --> 00:02:00,429

Phoenix MUFON we also have Russell as

26

00:02:05,339 --> 00:02:02,200

bill and he's been on our show before

27

00:02:09,690 --> 00:02:05,349

he's a field investigator for Arizona

28

00:02:12,449 --> 00:02:09,700

MUFON then we also have Tara she's a

29

00:02:14,130 --> 00:02:12,459

field investigator for Arizona MUFON we

30

00:02:16,500 --> 00:02:14,140

also have Maryann who is a field

31

00:02:18,690 --> 00:02:16,510

investigator for Phoenix MUFON we have

32

00:02:21,120 --> 00:02:18,700

Gwen who's new fonts experienced her

33

00:02:23,940 --> 00:02:21,130

team member and field investigator we

34

00:02:26,460 --> 00:02:23,950

also have John Dover he is a Navajo

35

00:02:28,650 --> 00:02:26,470

Nation's arranger and we will be

36

00:02:32,880 --> 00:02:28,660

listening to him regarding his sharing a

37

00:02:35,430 --> 00:02:32,890

little bit of background regarding UFO

38

00:02:37,920 --> 00:02:35,440

and the phenomenon and I actually had

39

00:02:40,740 --> 00:02:37,930

the privilege of interviewing him at the

40

00:02:43,830 --> 00:02:40,750

Phoenix lights show that dr. linkit I

41

00:02:45,210 --> 00:02:43,840

had this year in person thank you

42

00:02:46,740 --> 00:02:45,220

everybody for being on the show if

43

00:02:49,550 --> 00:02:46,750

there's anybody I miss please let me

44

00:02:54,509 --> 00:02:49,560

know you missed me

45

00:02:56,100 --> 00:02:54,519

Sharon and Sharon Jackson is the cydonia

46

00:02:58,290 --> 00:02:56,110

MUFON director and field investigator

47

00:02:59,550 --> 00:02:58,300

and Thank You Sharon for being on the

48

00:03:01,800 --> 00:02:59,560

show today we're very grateful to have

49

00:03:08,750 --> 00:03:01,810

you on welcome everybody on to the show

50

00:03:14,539 --> 00:03:11,280

well I wanted to go ahead and start

51
00:03:19,140 --> 00:03:14,549
by asking Jim Mann and Stacey writes

52
00:03:22,020 --> 00:03:19,150
about the Phoenix of the mufon boot camp

53
00:03:24,809 --> 00:03:22,030
that you had can you let us know when

54
00:03:27,000 --> 00:03:24,819
you had it and why why would you have

55
00:03:28,920 --> 00:03:27,010
that was that something that was

56
00:03:31,530 --> 00:03:28,930
required or is that something that you

57
00:03:35,539 --> 00:03:31,540
requested and was approved and then had

58
00:03:39,119 --> 00:03:35,549
it let me just say something this is Jim

59
00:03:42,929 --> 00:03:39,129
the boot camp that we conducted here

60
00:03:45,030 --> 00:03:42,939
this year I have to give credit to the

61
00:03:48,119 --> 00:03:45,040
assistant state my assistant state

62
00:03:51,030 --> 00:03:48,129
director Stacey Wright Stacey is the

63
00:03:53,220 --> 00:03:51,040

engine behind all of this she is the the

64

00:03:55,710 --> 00:03:53,230

person that does all the boots on the

65

00:03:57,869 --> 00:03:55,720

ground hard work putting it all together

66

00:04:02,699 --> 00:03:57,879

so I'll let Stacey tell you how it all

67

00:04:04,409 --> 00:04:02,709

turned out okay thank you yeah the the

68

00:04:06,690 --> 00:04:04,419

boot camp is actually a MUFON

69

00:04:09,420 --> 00:04:06,700

internationals field investigator boot

70

00:04:11,069 --> 00:04:09,430

camp and what we did is last year when

71

00:04:13,860 --> 00:04:11,079

we had the first one that had been held

72

00:04:15,960 --> 00:04:13,870

in about oh maybe there had been one

73

00:04:16,920 --> 00:04:15,970

previously seven years ago I believe but

74

00:04:18,899 --> 00:04:16,930

there just hadn't been anything

75

00:04:20,430 --> 00:04:18,909

happening lately and I just came up with

76

00:04:22,409 --> 00:04:20,440

the idea that we need to put on a boot

77

00:04:24,000 --> 00:04:22,419

camp this would be a great place to have

78

00:04:25,890 --> 00:04:24,010

it we've got the perfect weather during

79

00:04:28,950 --> 00:04:25,900

the month of November let's have

80

00:04:31,770 --> 00:04:28,960

something here and we'll do the work so

81

00:04:33,659 --> 00:04:31,780

Phoenix MUFON has great people in our

82

00:04:35,850 --> 00:04:33,669

organization actually all through the

83

00:04:38,129 --> 00:04:35,860

state of Arizona so we got everyone that

84

00:04:40,170 --> 00:04:38,139

we knew here that could help us out and

85

00:04:42,000 --> 00:04:40,180

we have people with such skills and

86

00:04:44,339 --> 00:04:42,010

talents that we could supply all that

87

00:04:46,170 --> 00:04:44,349

within ourselves and we decided to put

88

00:04:48,540 --> 00:04:46,180

this on do all the work for move on and

89

00:04:52,370 --> 00:04:48,550

move on gets the registration money for

90

00:04:55,080 --> 00:04:52,380

it to go towards you know our coffers so

91

00:04:56,909 --> 00:04:55,090

we were really happy to do this and last

92

00:04:58,980 --> 00:04:56,919

year was our first one and it turned out

93

00:05:01,110 --> 00:04:58,990

really well so we decided to duplicate

94

00:05:02,040 --> 00:05:01,120

it again this year and it turned out

95

00:05:04,140 --> 00:05:02,050

perfect

96

00:05:05,670 --> 00:05:04,150

in addition so we've had a great time

97

00:05:09,629 --> 00:05:05,680

doing it and we're just happy to do this

98

00:05:11,909 --> 00:05:09,639

for a move on before we get going on the

99

00:05:15,450 --> 00:05:11,919

order that you do the boot camp and

100

00:05:17,339 --> 00:05:15,460

because of course I know you have a

101

00:05:18,810 --> 00:05:17,349

certain order you would do that in a

102

00:05:21,209 --> 00:05:18,820

chronological order what I was going to

103

00:05:23,339 --> 00:05:21,219

ask you is do you have people from all

104

00:05:24,810 --> 00:05:23,349

around the world or other states that go

105

00:05:27,870 --> 00:05:24,820

to your boot camp

106

00:05:30,900 --> 00:05:27,880

and if so why you like the reason why

107

00:05:34,200 --> 00:05:30,910

I'm asking that is a wouldn't residents

108

00:05:37,230 --> 00:05:34,210

of Arizona only be allowed to go or is

109

00:05:39,120 --> 00:05:37,240

that not true is that a myth once you're

110

00:05:40,830 --> 00:05:39,130

a field investigator from MUFON you

111

00:05:43,850 --> 00:05:40,840

could be a field investigator anywhere

112

00:05:45,810 --> 00:05:43,860

you just have to be you know in

113

00:05:47,130 --> 00:05:45,820

communication with the state director of

114

00:05:50,330 --> 00:05:47,140

that state and let them know that you

115

00:05:52,770 --> 00:05:50,340

want to do your work with them there so

116

00:05:55,200 --> 00:05:52,780

yeah you can become a field investigator

117

00:05:57,540 --> 00:05:55,210

for move on and maintain that status no

118

00:05:59,820 --> 00:05:57,550

matter what state you live in so we did

119

00:06:02,940 --> 00:05:59,830

have people come from let's see last

120

00:06:04,170 --> 00:06:02,950

year we had some people from Canada and

121

00:06:06,150 --> 00:06:04,180

the United States

122

00:06:07,650 --> 00:06:06,160

this year's same thing we had one member

123

00:06:10,080 --> 00:06:07,660

from Canada and the rest of the United

124

00:06:12,090 --> 00:06:10,090

States but they come from all over so

125

00:06:13,650 --> 00:06:12,100

it's not just an Arizona thing they come

126

00:06:15,450 --> 00:06:13,660

from all over the place and everyone

127

00:06:18,000 --> 00:06:15,460

became really good friends at the end of

128

00:06:19,800 --> 00:06:18,010

three days and they just really formed a

129

00:06:26,100 --> 00:06:19,810

fellowship and it was really nice to see

130

00:06:29,730 --> 00:06:26,110

that okay you have something called the

131

00:06:33,090 --> 00:06:29,740

scientific method in MUFON that you all

132

00:06:38,030 --> 00:06:33,100

rely upon heavily and I wanted to quote

133

00:06:40,860 --> 00:06:38,040

Roger Stan Kovac in MUFON who is also

134

00:06:42,690 --> 00:06:40,870

the national director I believe of

135

00:06:45,030 --> 00:06:42,700

Australia New Zealand

136

00:06:48,090 --> 00:06:45,040

MUFON if I'm incorrect about that please

137

00:06:49,710 --> 00:06:48,100

correct me Stacey Jim or anyone he said

138

00:06:52,020 --> 00:06:49,720

in MUFON we attempt to exhaust all

139

00:06:54,900 --> 00:06:52,030

possible avenues to exclude all possible

140

00:06:57,000 --> 00:06:54,910

prosaic explanations when we can't still

141

00:06:59,670 --> 00:06:57,010

explain the object we label it as an

142

00:07:01,410 --> 00:06:59,680

unknown when I was going to ask Jim and

143

00:07:04,440 --> 00:07:01,420

Stacey and then I'll move on to the

144

00:07:05,760 --> 00:07:04,450

other guests after Jim and Stacey let us

145

00:07:08,520 --> 00:07:05,770

know about the chronological order of

146

00:07:11,340 --> 00:07:08,530

their boot camp Jim and Stacey why do

147

00:07:12,900 --> 00:07:11,350

you use the scientific method what good

148

00:07:15,690 --> 00:07:12,910

is it what does it do for your

149

00:07:22,050 --> 00:07:15,700

organization and for the folks who end

150

00:07:25,350 --> 00:07:22,060

up being exposed to that method well if

151

00:07:30,710 --> 00:07:25,360

we simply start with what is mo fons

152

00:07:36,300 --> 00:07:33,659

investigation of UFOs for the benefit of

153

00:07:41,550 --> 00:07:36,310

all and

154

00:07:45,090 --> 00:07:41,560

- we are yes we are the ones that are

155

00:07:49,100 --> 00:07:45,100

open-minded enough to include and accept

156

00:07:54,150 --> 00:07:52,409

but when we do an investigation we're

157

00:07:55,890 --> 00:07:54,160

looking for a disposition we're looking

158

00:07:59,040 --> 00:07:55,900

for some sort of final conclusion after

159

00:08:01,740 --> 00:07:59,050

we review all of our data and now the

160

00:08:05,909 --> 00:08:01,750

last thing we do is run to the et

161

00:08:07,940 --> 00:08:05,919

solution we look for a more scientific a

162

00:08:12,870 --> 00:08:07,950

more grounded a more commonplace

163

00:08:14,430 --> 00:08:12,880

solution to a case somebody sees funny

164

00:08:16,320 --> 00:08:14,440

lights in the sky what we don't write

165

00:08:18,420 --> 00:08:16,330

you know we're the last people that's

166

00:08:22,260 --> 00:08:18,430

gonna say well it's not et but then

167

00:08:26,640 --> 00:08:22,270

we're also gonna Excel we're gonna

168

00:08:29,310 --> 00:08:26,650

exhaust every effort effort to to find

169

00:08:32,399 --> 00:08:29,320

what it could be other than you know the

170

00:08:35,370 --> 00:08:32,409

mother ship so we're the last ones I

171

00:08:40,170 --> 00:08:35,380

think to go to ET side of the room and

172

00:08:42,659 --> 00:08:40,180

say eh it was it was aliens we so I mean

173

00:08:45,960 --> 00:08:42,669

I did I don't know if that's answering

174

00:08:48,210 --> 00:08:45,970

your question chant maybe you know

175

00:08:51,620 --> 00:08:48,220

somebody else that in in MUFON who is

176

00:08:54,780 --> 00:08:51,630

very good at scientific methods and and

177

00:08:56,430 --> 00:08:54,790

what-have-you would be Mark Dantonio and

178

00:08:58,829 --> 00:08:56,440

so if Mark is still on the line maybe

179

00:09:00,590 --> 00:08:58,839

Mark can help answer that - yeah mark

180

00:09:03,540 --> 00:09:00,600

please do try man if you wish

181

00:09:05,790 --> 00:09:03,550

well sure I mean the scientific method

182

00:09:08,760 --> 00:09:05,800

is the basis of science going back

183

00:09:12,230 --> 00:09:08,770

you'll be on 17th century so it starts

184

00:09:16,770 --> 00:09:12,240

with asked question are we alone

185

00:09:20,340 --> 00:09:16,780

and it goes through finding information

186

00:09:22,550 --> 00:09:20,350

getting looking for research doing the

187

00:09:25,590 --> 00:09:22,560

research and when you do the research

188

00:09:28,530 --> 00:09:25,600

that allows you to construct a

189

00:09:30,480 --> 00:09:28,540

hypothesis right a working model of what

190

00:09:32,250 --> 00:09:30,490

you think is going on and then you

191

00:09:34,110 --> 00:09:32,260

devise an experiment to test that

192

00:09:37,740 --> 00:09:34,120

hypothesis and you have to be fully

193

00:09:41,210 --> 00:09:37,750

willing as we all are fully willing to

194

00:09:44,130 --> 00:09:41,220

let that be something that could fail

195

00:09:46,710 --> 00:09:44,140

you have to be willing to allow your

196

00:09:49,300 --> 00:09:46,720

hypothesis to be wrong and you ask the

197

00:09:51,489 --> 00:09:49,310

questions is this hypothesis

198

00:09:54,189 --> 00:09:51,499

working is it answering the question

199

00:09:56,379 --> 00:09:54,199

well it could be no er yes you analyze

200

00:09:58,780 --> 00:09:56,389

you draw conclusions from the

201
00:10:00,699 --> 00:09:58,790
experiments and if the results aligned

202
00:10:02,400 --> 00:10:00,709
with your hypothesis then you

203
00:10:06,519 --> 00:10:02,410
communicate the results if they don't

204
00:10:08,710 --> 00:10:06,529
then what you do is you re construct

205
00:10:10,869 --> 00:10:08,720
another hypothesis you go back through

206
00:10:13,600 --> 00:10:10,879
this again and think okay what's really

207
00:10:16,179 --> 00:10:13,610
going on then alright and that's really

208
00:10:19,749 --> 00:10:16,189
what this this whole process is about

209
00:10:21,999 --> 00:10:19,759
and you know I've always done that with

210
00:10:23,049 --> 00:10:22,009
every photo I've analyzed with every

211
00:10:26,199 --> 00:10:23,059
video I've analyzed

212
00:10:29,199 --> 00:10:26,209
I never go at it looking at it as this

213
00:10:31,629 --> 00:10:29,209

is an alien craft let me just you know

214

00:10:35,470 --> 00:10:31,639

prove it I say this is an object in the

215

00:10:38,079 --> 00:10:35,480

sky what could it be and you know I

216

00:10:39,460 --> 00:10:38,089

always look at it as when you when you

217

00:10:41,259 --> 00:10:39,470

go through and you look at the

218

00:10:43,509 --> 00:10:41,269

scientific method or when you go through

219

00:10:47,049 --> 00:10:43,519

and look at your results of your your

220

00:10:50,410 --> 00:10:47,059

your experimentation you have to say

221

00:10:52,059 --> 00:10:50,420

this is like a funnel you you bury your

222

00:10:53,530 --> 00:10:52,069

very hard in the data I'm very hard on

223

00:10:55,809 --> 00:10:53,540

the data people call me at the bunker

224

00:10:57,460 --> 00:10:55,819

that's not true I'm not at the bunker

225

00:10:58,929 --> 00:10:57,470

all I'm trying to do is get to the

226

00:11:01,389 --> 00:10:58,939

bottom of the mystery I've had things

227

00:11:03,490 --> 00:11:01,399

happen to me that I cannot explain so

228

00:11:06,519 --> 00:11:03,500

you know and I believe that that alien

229

00:11:09,100 --> 00:11:06,529

life has reached us in the past and

230

00:11:10,360 --> 00:11:09,110

presently so I'm not saying that death

231

00:11:14,470 --> 00:11:10,370

has never happened I'm saying that it

232

00:11:17,470 --> 00:11:14,480

probably has however being hard on the

233

00:11:19,749 --> 00:11:17,480

data is is what we have to do because if

234

00:11:22,360 --> 00:11:19,759

we don't we're doing a disservice to all

235

00:11:24,910 --> 00:11:22,370

who follow us we have to make sure the

236

00:11:28,059 --> 00:11:24,920

results are accurate we have to test and

237

00:11:29,740 --> 00:11:28,069

we have to be willing to be wrong see so

238

00:11:31,590 --> 00:11:29,750

and that's what move funds about and

239

00:11:33,730 --> 00:11:31,600

many times and move on you reach people

240

00:11:35,230 --> 00:11:33,740

that you know agree with you and you

241

00:11:38,379 --> 00:11:35,240

also reach people to say oh you're just

242

00:11:40,780 --> 00:11:38,389

full of baloney you know you're not you

243

00:11:43,269 --> 00:11:40,790

know you're not really doing the data

244

00:11:46,900 --> 00:11:43,279

properly do it doing the data proper

245

00:11:49,449 --> 00:11:46,910

service but the bottom line is we can

246

00:11:52,569 --> 00:11:49,459

all leap to the wrong conclusion so the

247

00:11:54,759 --> 00:11:52,579

idea is don't leap you take it in small

248

00:11:57,490 --> 00:11:54,769

bite-sized chunks and you make your way

249

00:12:00,220 --> 00:11:57,500

slowly inexorably to the conclusion

250

00:12:02,379 --> 00:12:00,230

whether it's the one you want or whether

251

00:12:03,170 --> 00:12:02,389

it's one you don't expect or whether

252

00:12:05,150 --> 00:12:03,180

it's completely

253

00:12:08,090 --> 00:12:05,160

and you have to be willing to accept all

254

00:12:09,890 --> 00:12:08,100

those outcomes okay mark thank you very

255

00:12:12,410 --> 00:12:09,900

much for that that was a great summary

256

00:12:16,130 --> 00:12:12,420

regarding the question I got and then

257

00:12:18,230 --> 00:12:16,140

Jim and Stacey would you mind doing us

258

00:12:20,480 --> 00:12:18,240

the privilege of actually starting the

259

00:12:22,430 --> 00:12:20,490

show regarding the very first thing you

260

00:12:23,870 --> 00:12:22,440

do in boot camp and then we can go ahead

261

00:12:25,790 --> 00:12:23,880

and bring everybody else in because

262

00:12:27,470 --> 00:12:25,800

naturally they participated so it'll be

263

00:12:30,290 --> 00:12:27,480

really nice to hear you

264

00:12:33,170 --> 00:12:30,300

I'll introduce us into a boot camp as if

265

00:12:34,910 --> 00:12:33,180

we're walking right on into your chapter

266

00:12:37,970 --> 00:12:34,920

and we're going to start today what

267

00:12:39,410 --> 00:12:37,980

happens okay well the first thing we do

268

00:12:40,910 --> 00:12:39,420

is try to get people comfortable with

269

00:12:43,280 --> 00:12:40,920

each other so we had kind of a

270

00:12:45,710 --> 00:12:43,290

meet-and-greet thing on Friday nights

271

00:12:47,360 --> 00:12:45,720

so people fly into Phoenix on Friday we

272

00:12:49,820 --> 00:12:47,370

have a meet and greet that night right

273

00:12:51,140 --> 00:12:49,830

next door to the hotel at a bar and

274

00:12:53,210 --> 00:12:51,150

grill right there so they let us use

275

00:12:55,070 --> 00:12:53,220

their big patio and so everyone got to

276

00:12:58,130 --> 00:12:55,080

know everyone there by having some

277

00:13:00,710 --> 00:12:58,140

beverages and some food and we were

278

00:13:02,420 --> 00:13:00,720

there for a few hours that night then we

279

00:13:04,910 --> 00:13:02,430

reconvene the next morning Saturday

280

00:13:08,150 --> 00:13:04,920

morning at 8 a.m. sharp so we have 4

281

00:13:09,790 --> 00:13:08,160

hours of classroom work at the the hotel

282

00:13:12,350 --> 00:13:09,800

has a big meeting room there that we use

283

00:13:13,820 --> 00:13:12,360

so it's the same hotel where everyone is

284

00:13:15,620 --> 00:13:13,830

staying which makes it really convenient

285

00:13:17,810 --> 00:13:15,630

no one needs to have a rental car at all

286

00:13:19,760 --> 00:13:17,820

and so we have four hours of classroom

287

00:13:22,070 --> 00:13:19,770

work we break for lunch and then we go

288

00:13:24,500 --> 00:13:22,080

out and we have four hours of forensic

289

00:13:28,040 --> 00:13:24,510

field work out in the desert at a spot

290

00:13:31,850 --> 00:13:28,050

that we had allocated and then we had

291

00:13:34,100 --> 00:13:31,860

treated them to a campout dinner there

292

00:13:36,380 --> 00:13:34,110

right on-site and then a sky watch which

293

00:13:38,300 --> 00:13:36,390

was also the second part of our

294

00:13:41,570 --> 00:13:38,310

astronomy lesson that we did earlier

295

00:13:44,690 --> 00:13:41,580

that day so the the second day is pretty

296

00:13:46,730 --> 00:13:44,700

much a mirror of the first day although

297

00:13:48,410 --> 00:13:46,740

the second day we had actually some

298

00:13:50,630 --> 00:13:48,420

practicals that they needed to work on

299

00:13:53,120 --> 00:13:50,640

for the forensic fieldwork so it was a

300

00:13:55,070 --> 00:13:53,130

little bit of a test and then we went

301
00:13:57,350 --> 00:13:55,080
back to the hotel the the second night

302
00:14:00,050 --> 00:13:57,360
and had a big dinner that we treated

303
00:14:01,820 --> 00:14:00,060
them all to poolside so we had you know

304
00:14:05,210 --> 00:14:01,830
a big grilled chicken dinner and wheat

305
00:14:07,670 --> 00:14:05,220
then we gave everyone a certificate of

306
00:14:09,830 --> 00:14:07,680
completion that attended the boot camp

307
00:14:11,330 --> 00:14:09,840
and there was just you know like I said

308
00:14:14,510 --> 00:14:11,340
before there was lots of friendships

309
00:14:17,100 --> 00:14:14,520
made everyone exchanged email addresses

310
00:14:18,810 --> 00:14:17,110
and these people are

311
00:14:20,490 --> 00:14:18,820
I know the people that we had last year

312
00:14:22,470 --> 00:14:20,500
they're still writing each other all of

313
00:14:23,730 --> 00:14:22,480

her Facebook and emails from last year

314

00:14:26,190 --> 00:14:23,740

so they really created some great

315

00:14:27,930 --> 00:14:26,200

friendships and then that way when they

316

00:14:30,060 --> 00:14:27,940

do become field investigators for their

317

00:14:32,430 --> 00:14:30,070

state you know they've got a really good

318

00:14:34,019 --> 00:14:32,440

understanding of what it takes and they

319

00:14:35,970 --> 00:14:34,029

start off their training really well

320

00:14:38,040 --> 00:14:35,980

because they got a concentrated weekend

321

00:14:39,840 --> 00:14:38,050

of it to begin with and they've got some

322

00:14:42,420 --> 00:14:39,850

friends along the way so it just really

323

00:14:45,480 --> 00:14:42,430

works out great and that helps keep the

324

00:14:48,630 --> 00:14:45,490

mutual UFO network the network that it

325

00:14:50,850 --> 00:14:48,640

needs to be exactly when when we have

326

00:14:52,650 --> 00:14:50,860

these boot camps and so many people meet

327

00:14:55,710 --> 00:14:52,660

each other that just broadens their

328

00:14:57,960 --> 00:14:55,720

their their resource base they can act

329

00:15:00,600 --> 00:14:57,970

there's nothing wrong with with a field

330

00:15:03,329 --> 00:15:00,610

investor investigator calling another

331

00:15:07,199 --> 00:15:03,339

field investigator from some other state

332

00:15:09,240 --> 00:15:07,209

just ask opinions and get an idea about

333

00:15:12,630 --> 00:15:09,250

this or that so the whole idea of

334

00:15:14,759 --> 00:15:12,640

working together as a team really comes

335

00:15:16,290 --> 00:15:14,769

into play when we do these boot camps

336

00:15:18,480 --> 00:15:16,300

and that's the thing that I've noticed

337

00:15:23,600 --> 00:15:18,490

is that that the friendships that are

338

00:15:26,610 --> 00:15:23,610

bonded and it's just a great thing so I

339

00:15:32,250 --> 00:15:26,620

have a question for Sharon Jackson and

340

00:15:34,079 --> 00:15:32,260

that is Sharon do you go to Phoenix

341

00:15:36,210 --> 00:15:34,089

MUFON for the boot camps or do you ever

342

00:15:37,829 --> 00:15:36,220

have boot camps where you're out in

343

00:15:40,850 --> 00:15:37,839

Sedona or is Phoenix

344

00:15:46,230 --> 00:15:40,860

MUFON sort of the boot camp headquarters

345

00:15:50,460 --> 00:15:46,240

well so far we have Sedona MUFON is

346

00:15:55,590 --> 00:15:50,470

small we have roughly 20 people at a

347

00:15:58,680 --> 00:15:55,600

meeting so so far it's been Phoenix

348

00:16:01,980 --> 00:15:58,690

MUFON has been the headquarters for boot

349

00:16:04,130 --> 00:16:01,990

camp fantastic thank you very much for

350

00:16:07,650 --> 00:16:04,140

that input I had a question for the

351

00:16:11,519 --> 00:16:07,660

MUFON field investigators we have and

352

00:16:13,860 --> 00:16:11,529

that is what was your take away from the

353

00:16:18,139 --> 00:16:13,870

boot camp what were some of the

354

00:16:22,380 --> 00:16:18,149

takeaways that you had Shane tarek when

355

00:16:27,579 --> 00:16:22,390

well Sharon any anybody if you wouldn't

356

00:16:36,800 --> 00:16:31,519

Marianna you have come in well what I

357

00:16:39,730 --> 00:16:36,810

might take away is all 41 of our

358

00:16:44,629 --> 00:16:39,740

participants that came for the boot camp

359

00:16:48,680 --> 00:16:44,639

they just came away one camaraderie with

360

00:16:52,639 --> 00:16:48,690

each other and also learned quite a few

361

00:17:00,769 --> 00:16:52,649

things about first of all how to do an

362

00:17:02,900 --> 00:17:00,779

actual CMS case little tips of what

363

00:17:07,299 --> 00:17:02,910

should they look for in the person that

364

00:17:12,169 --> 00:17:07,309

has made the CMS case maybe their

365

00:17:13,250 --> 00:17:12,179

personality their basically their body

366

00:17:17,419 --> 00:17:13,260

language

367

00:17:22,669 --> 00:17:17,429

what they talk about and they've been

368

00:17:25,760 --> 00:17:22,679

able to come away with some new tips on

369

00:17:28,039 --> 00:17:25,770

how to do a CMS case which I thought was

370

00:17:31,100 --> 00:17:28,049

really neat and they were just there

371

00:17:34,370 --> 00:17:31,110

they were so upbeat they wanted to learn

372

00:17:36,820 --> 00:17:34,380

and everyone was just amazing all of the

373

00:17:39,440 --> 00:17:36,830

participants in the at the boot camp

374

00:17:41,659 --> 00:17:39,450

Sharon can you explain real quick about

375

00:17:43,520 --> 00:17:41,669

CMS can you tell us a little bit about

376

00:17:48,289 --> 00:17:43,530

that because I'm not sure everybody's

377

00:17:52,640 --> 00:17:48,299

familiar with well CMS is our way of

378

00:17:56,140 --> 00:17:52,650

recording our investigation it used to

379

00:17:59,150 --> 00:17:56,150

be quite unwieldy but people have now

380

00:18:04,880 --> 00:17:59,160

streamlined it and it's become much

381

00:18:10,010 --> 00:18:04,890

easier but it starts with where when why

382

00:18:13,850 --> 00:18:10,020

how and a little bit about the person as

383

00:18:15,590 --> 00:18:13,860

well is that a database then no that

384

00:18:21,650 --> 00:18:15,600

that you can share with other people

385

00:18:24,140 --> 00:18:21,660

move on okay oh yes great so we still

386

00:18:26,810 --> 00:18:24,150

have a few people left to talk about the

387

00:18:28,700 --> 00:18:26,820

takeaway that they had from the MUFON

388

00:18:32,150 --> 00:18:28,710

boot camp and that would be Russell

389

00:18:34,100 --> 00:18:32,160

Shane I believe Gwen and Tara hey champ

390

00:18:35,690 --> 00:18:34,110

this is Stacey you know what the perfect

391

00:18:38,299 --> 00:18:35,700

person to answer this question would be

392

00:18:40,880 --> 00:18:38,309

terrible because Tara attended last

393

00:18:42,950 --> 00:18:40,890

year's boot camp is just a newbie she

394

00:18:45,170 --> 00:18:42,960

Canfield investigator for us and then

395

00:18:47,540 --> 00:18:45,180

she participated again this year because

396

00:18:49,910 --> 00:18:47,550

she had such great time last year so she

397

00:18:52,310 --> 00:18:49,920

was you know not only a participant but

398

00:18:54,260 --> 00:18:52,320

she was also at the time a certified

399

00:18:55,970 --> 00:18:54,270

field investigator and then she ended up

400

00:18:57,860 --> 00:18:55,980

helping us teach one of the classes as

401
00:19:02,870 --> 00:18:57,870
well so Tara's probably got a lot of

402
00:19:06,200 --> 00:19:02,880
input for this well this is Tara and I'm

403
00:19:08,990 --> 00:19:06,210
very grateful to be here and I was so

404
00:19:11,300 --> 00:19:09,000
grateful to attend both boot camps my

405
00:19:14,390 --> 00:19:11,310
takeaway I can tell you was it gave me a

406
00:19:19,040 --> 00:19:14,400
tremendous amount of confidence and I

407
00:19:21,320 --> 00:19:19,050
knew nothing about any of this - about

408
00:19:25,700 --> 00:19:21,330
two months before the boot camp last

409
00:19:28,490 --> 00:19:25,710
year and so I I have no experience about

410
00:19:31,790 --> 00:19:28,500
anything or investigations or move on or

411
00:19:36,200 --> 00:19:31,800
anything so it gave me the tools I

412
00:19:38,270 --> 00:19:36,210
needed in a live form of visual form

413
00:19:40,790 --> 00:19:38,280

because I'm very visual person so it

414

00:19:43,250 --> 00:19:40,800

gave me filled work practice helped me

415

00:19:46,760 --> 00:19:43,260

understand the tools of the trade gave

416

00:19:49,310 --> 00:19:46,770

me a lot of the do's and don'ts a whole

417

00:19:51,350 --> 00:19:49,320

bunch of resources and it was just a

418

00:19:53,570 --> 00:19:51,360

tremendous amount of information that I

419

00:19:55,400 --> 00:19:53,580

didn't know I needed and I needed it

420

00:19:57,260 --> 00:19:55,410

desperately and so that's why I went

421

00:20:01,010 --> 00:19:57,270

again I don't think you can have enough

422

00:20:04,840 --> 00:20:01,020

training or education but the people I

423

00:20:09,050 --> 00:20:04,850

met were so kind and generous with their

424

00:20:10,040 --> 00:20:09,060

information and it was just it was real

425

00:20:11,690 --> 00:20:10,050

like I said it gave me a lot of

426
00:20:12,800 --> 00:20:11,700
confidence to know that I'm not alone

427
00:20:15,320 --> 00:20:12,810
and I'm on the right track

428
00:20:17,690 --> 00:20:15,330
and and I guess that that's about it

429
00:20:18,320 --> 00:20:17,700
that I was so grateful to attend and I'd

430
00:20:20,930 --> 00:20:18,330
go again

431
00:20:23,270 --> 00:20:20,940
Thank You Tara for that and by the way I

432
00:20:24,890 --> 00:20:23,280
think you a lot of everybody will agree

433
00:20:27,940 --> 00:20:24,900
with you when you say you can't have

434
00:20:29,960 --> 00:20:27,950
enough training regarding MUFON

435
00:20:31,490 --> 00:20:29,970
investigation but go ahead the other

436
00:20:34,300 --> 00:20:31,500
person who is going to speak sorry about

437
00:20:37,450 --> 00:20:34,310
that no that's okay it's mark again

438
00:20:41,210 --> 00:20:37,460

Tara was on the team that I was working

439

00:20:42,410 --> 00:20:41,220

with out in the boot camp and for

440

00:20:44,000 --> 00:20:42,420

someone who didn't have any experience

441

00:20:45,350 --> 00:20:44,010

she sure came off like she knew what the

442

00:20:50,180 --> 00:20:45,360

heck she was doing so she did a really

443

00:20:52,070 --> 00:20:50,190

good job and so you know you see in a

444

00:20:53,690 --> 00:20:52,080

short amount of time the people that are

445

00:20:54,169 --> 00:20:53,700

gifted to be able to do this kind of

446

00:20:56,419 --> 00:20:54,179

work

447

00:20:58,549 --> 00:20:56,429

they kind of rise to the top you know

448

00:21:00,049 --> 00:20:58,559

and I think that you know she's one of

449

00:21:02,649 --> 00:21:00,059

the people that's that's rising to the

450

00:21:05,179 --> 00:21:02,659

top in that way they come in without

451
00:21:07,549 --> 00:21:05,189
blindness on they come in open-minded and

452
00:21:10,029 --> 00:21:07,559
then the result when they leave is they

453
00:21:12,619 --> 00:21:10,039
have a whole new suite of Technology and

454
00:21:14,719 --> 00:21:12,629
capabilities that they almost didn't

455
00:21:16,609 --> 00:21:14,729
even know that you got until later when

456
00:21:19,039 --> 00:21:16,619
they start to do their investigations so

457
00:21:22,819 --> 00:21:19,049
I think that that's something really

458
00:21:25,899 --> 00:21:22,829
good thank you for that input really

459
00:21:28,969 --> 00:21:25,909
appreciate that I believe we have Gwen

460
00:21:34,039 --> 00:21:28,979
Gwen would you mind contributing to that

461
00:21:35,809 --> 00:21:34,049
topic can you hear me okay I'm sorry i

462
00:21:37,879 --> 00:21:35,819
unmuted and I wasn't sure I could get

463
00:21:40,549 --> 00:21:37,889

back on again um I don't really have a

464

00:21:42,919 --> 00:21:40,559

lot to share about a takeaway from the

465

00:21:45,199 --> 00:21:42,929

boot camp because I am NOT an active

466

00:21:47,359 --> 00:21:45,209

field investigator I have been in the

467

00:21:49,459 --> 00:21:47,369

past but I'm not now now I'm an active

468

00:21:51,379 --> 00:21:49,469

member of MUFON experience her research

469

00:21:52,759 --> 00:21:51,389

team which I could talk about a little

470

00:21:56,509 --> 00:21:52,769

bit later if you're interested in

471

00:22:00,649 --> 00:21:56,519

hearing about that so I did I came and

472

00:22:02,299 --> 00:22:00,659

did a talk on that aspect but then I had

473

00:22:04,069 --> 00:22:02,309

to go because I had family who was

474

00:22:07,189 --> 00:22:04,079

visiting in town and I was not able to

475

00:22:09,139 --> 00:22:07,199

attend the rest of it but um I've heard

476

00:22:10,789 --> 00:22:09,149

a lot of feedback on that I'm sure it

477

00:22:12,799 --> 00:22:10,799

was wonderful and I hope maybe I can do

478

00:22:17,599 --> 00:22:12,809

it next year hands thank you for that

479

00:22:21,109 --> 00:22:17,609

and Shane yeah what I was thinking is is

480

00:22:23,389 --> 00:22:21,119

the fact that we have were members of a

481

00:22:27,169 --> 00:22:23,399

volunteer organization but we got some

482

00:22:29,179 --> 00:22:27,179

top quality training you know and that

483

00:22:32,709 --> 00:22:29,189

that doesn't happen a lot I know

484

00:22:36,589 --> 00:22:32,719

volunteer organizations so both on the

485

00:22:37,819 --> 00:22:36,599

field side and on the classroom side I

486

00:22:42,409 --> 00:22:37,829

thought the training was just

487

00:22:44,179 --> 00:22:42,419

outstanding is so helpful great thank

488

00:22:46,399 --> 00:22:44,189

you very much for contributing to that

489

00:22:51,009 --> 00:22:46,409

topic wanted to talk a little bit about

490

00:22:53,599 --> 00:22:51,019

how to conduct an interview

491

00:22:55,999 --> 00:22:53,609

aside from filling out the CMS sighting

492

00:22:57,919 --> 00:22:56,009

reports properly filling out the proper

493

00:23:00,229 --> 00:22:57,929

forms it's important to know how to

494

00:23:01,789 --> 00:23:00,239

conduct an interview I understand that

495

00:23:04,209 --> 00:23:01,799

there could be a 2-person rule

496

00:23:06,619 --> 00:23:04,219

can anybody contribute to that topic

497

00:23:07,460 --> 00:23:06,629

anyone and if you do please be sure to

498

00:23:10,549 --> 00:23:07,470

say

499

00:23:14,690 --> 00:23:10,559

your name thank you chant Allah this

500

00:23:16,249 --> 00:23:14,700

isn't and I'm ahead as a matter of fact

501

00:23:19,549 --> 00:23:16,259

talking about the interview

502

00:23:21,169 --> 00:23:19,559

interrogation myself and my partner Dave

503

00:23:23,930 --> 00:23:21,179

rich who is another Gilbert police

504

00:23:26,289 --> 00:23:23,940

officer for 21 years we were the ones

505

00:23:28,970 --> 00:23:26,299

that taught the interview interrogation

506

00:23:31,999 --> 00:23:28,980

to the in the bootcamp

507

00:23:36,950 --> 00:23:32,009

and our mission with that was basically

508

00:23:41,299 --> 00:23:36,960

is we were talking about how to conduct

509

00:23:44,450 --> 00:23:41,309

a good thorough investigation we started

510

00:23:46,970 --> 00:23:44,460

off with it what is the definition of an

511

00:23:48,950 --> 00:23:46,980

actual interview so that was the first

512

00:23:51,379 --> 00:23:48,960

thing that we wanted to get across to

513

00:23:55,759 --> 00:23:51,389

everyone and then we did talk about the

514

00:23:59,149 --> 00:23:55,769

do's and don'ts of an interview and we

515

00:24:04,460 --> 00:23:59,159

went through each one between body

516

00:24:07,369 --> 00:24:04,470

language between the verbal and one of

517

00:24:09,080 --> 00:24:07,379

the biggest things is to know that when

518

00:24:11,810 --> 00:24:09,090

you do an interview especially with

519

00:24:15,590 --> 00:24:11,820

MUFON 90% of the interviews are going to

520

00:24:18,769 --> 00:24:15,600

be telephonic so we we give people tips

521

00:24:22,100 --> 00:24:18,779

on what to listen for when you're doing

522

00:24:24,499 --> 00:24:22,110

a telephonic interview about 10 percent

523

00:24:27,230 --> 00:24:24,509

is an in-person interview with someone

524

00:24:30,230 --> 00:24:27,240

and we talk about to the participants of

525

00:24:32,509 --> 00:24:30,240

the bootcamp on biggest thing is body

526

00:24:34,730 --> 00:24:32,519

language what are they telling you

527

00:24:36,320 --> 00:24:34,740

without saying a word that is the

528

00:24:39,350 --> 00:24:36,330

biggest thing we talk about also

529

00:24:43,639 --> 00:24:39,360

definitely have to people go with you on

530

00:24:45,830 --> 00:24:43,649

an in-person interview the safety tips

531

00:24:48,080 --> 00:24:45,840

especially as being police officers we

532

00:24:51,139 --> 00:24:48,090

always give safety tips to everyone if

533

00:24:56,779 --> 00:24:51,149

you're going out to a strange place to

534

00:25:02,419 --> 00:24:56,789

do an interview with someone the another

535

00:25:04,610 --> 00:25:02,429

thing is that don't beat a person during

536

00:25:06,529 --> 00:25:04,620

an interview you don't lead that person

537

00:25:09,769 --> 00:25:06,539

with leading questions you always ask

538

00:25:12,830 --> 00:25:09,779

opened in questions so that's that's the

539

00:25:14,899 --> 00:25:12,840

tips that we give someone or the

540

00:25:17,570 --> 00:25:14,909

participants in the bootcamp when we do

541

00:25:19,840 --> 00:25:17,580

for teaching them the interview

542

00:25:21,910 --> 00:25:19,850

interrogation part of the book

543

00:25:25,810 --> 00:25:21,920

how can you give us some examples of

544

00:25:28,870 --> 00:25:25,820

some open-ended questions what you would

545

00:25:32,400 --> 00:25:28,880

say to someone is you know first of all

546

00:25:36,940 --> 00:25:32,410

of course have them tell their story

547

00:25:39,780 --> 00:25:36,950

after that then say they said well you

548

00:25:44,290 --> 00:25:39,790

don't ask well what color was the

549

00:25:49,240 --> 00:25:44,300

spacecraft that you saw 20 feet from you

550

00:25:51,370 --> 00:25:49,250

you ask what did you see when did you

551

00:25:53,110 --> 00:25:51,380

see it where did you see it of course

552

00:25:57,310 --> 00:25:53,120

you go through the who what when where

553

00:25:59,830 --> 00:25:57,320

why in hell you never if they you know

554

00:26:02,170 --> 00:25:59,840

say oh well what color was the spaceship

555

00:26:04,450 --> 00:26:02,180

that you saw if they just said they saw

556

00:26:08,440 --> 00:26:04,460

an object don't put things into their

557

00:26:11,110 --> 00:26:08,450

head say what was explained what sapote

558

00:26:16,510 --> 00:26:11,120

you saw that night and let them explain

559

00:26:19,090 --> 00:26:16,520

that to you in detail also I'm never to

560

00:26:21,490 --> 00:26:19,100

trainees right Marion and an experienced

561

00:26:23,530 --> 00:26:21,500

investigator and if possible a student

562

00:26:27,400 --> 00:26:23,540

investigator but never to trainees

563

00:26:30,120 --> 00:26:27,410

together or to students rather what what

564

00:26:33,370 --> 00:26:30,130

do you mean interview right yeah

565

00:26:36,400 --> 00:26:33,380

regarding investigators who are going to

566

00:26:38,140 --> 00:26:36,410

investigate a case never have two people

567

00:26:40,780 --> 00:26:38,150

who are learning how to do a case

568

00:26:43,150 --> 00:26:40,790

together always have an experienced

569

00:26:46,270 --> 00:26:43,160

person with a student but not two

570

00:26:49,750 --> 00:26:46,280

trainees yeah I meant to what we call

571

00:26:51,700 --> 00:26:49,760

field what we call field not field

572

00:26:53,740 --> 00:26:51,710

investigators but few training

573

00:26:56,500 --> 00:26:53,750

investigators it's called an FTI

574

00:27:00,160 --> 00:26:56,510

a field training investigator we try to

575

00:27:02,770 --> 00:27:00,170

have an experienter anytime that we have

576

00:27:05,860 --> 00:27:02,780

a new field investor come investigator

577

00:27:09,040 --> 00:27:05,870

come in to MUFON there is always an

578

00:27:12,310 --> 00:27:09,050

experienced field investigator that

579

00:27:13,780 --> 00:27:12,320

teaches them and gives them tips and

580

00:27:18,700 --> 00:27:13,790

they do that for about three or four

581

00:27:20,350 --> 00:27:18,710

cases and then they will go out and of

582

00:27:22,990 --> 00:27:20,360

course start their own investigations

583

00:27:25,870 --> 00:27:23,000

but yes anytime there's a new field

584

00:27:28,920 --> 00:27:25,880

investigator there are always teamed up

585

00:27:31,090 --> 00:27:28,930

with a veteran field investigator

586

00:27:33,610 --> 00:27:31,100

regarding safety which you mentioned

587

00:27:36,250 --> 00:27:33,620

briefly if there's a witness

588

00:27:39,760 --> 00:27:36,260

a investigators not feeling comfortable

589

00:27:41,850 --> 00:27:39,770

with they just don't feel comfortable

590

00:27:44,350 --> 00:27:41,860

being around them they feel like maybe

591

00:27:46,630 --> 00:27:44,360

there's something amiss there may be

592

00:27:49,330 --> 00:27:46,640

possible danger or anything along those

593

00:27:53,440 --> 00:27:49,340

lines it's probably just important for

594

00:27:55,659 --> 00:27:53,450

that investigator to make up an excuse

595

00:27:59,049 --> 00:27:55,669

and get out of there if they feel

596

00:28:01,269 --> 00:27:59,059

they're in danger is that correct yes

597

00:28:04,269 --> 00:28:01,279

definitely what we do is before you even

598

00:28:07,510 --> 00:28:04,279

go out you always tell whether another

599

00:28:09,340 --> 00:28:07,520

field investigator a relative maybe the

600

00:28:12,190 --> 00:28:09,350

state director assistant state director

601
00:28:14,529 --> 00:28:12,200
chief investigator you say hey at this

602
00:28:18,850 --> 00:28:14,539
day at this time on going out to meet

603
00:28:21,549 --> 00:28:18,860
this person for an interview you give

604
00:28:24,159 --> 00:28:21,559
another person dates and times that

605
00:28:26,320 --> 00:28:24,169
you're going and where you're going and

606
00:28:30,279 --> 00:28:26,330
say I'm gonna be gone for maybe one hour

607
00:28:33,340 --> 00:28:30,289
give them a certain time everybody has a

608
00:28:34,960 --> 00:28:33,350
sixth sense with them you know the

609
00:28:38,019 --> 00:28:34,970
little hairs on the back of your head

610
00:28:40,450 --> 00:28:38,029
stand up if you ever feel that way to

611
00:28:43,630 --> 00:28:40,460
the slightest degree yes says hey you

612
00:28:46,690 --> 00:28:43,640
know I'm sorry make up a story I'm sorry

613
00:28:48,760 --> 00:28:46,700

I have to leave something came up I'll

614

00:28:51,970 --> 00:28:48,770

go ahead and we'll finish this interview

615

00:28:54,610 --> 00:28:51,980

later on but again you always have two

616

00:28:58,299 --> 00:28:54,620

people one of the things I recommend is

617

00:29:03,310 --> 00:28:58,309

also if you can do your interview in a

618

00:29:05,409 --> 00:29:03,320

public place I don't if you don't have

619

00:29:07,840 --> 00:29:05,419

to go to somebody's house that might be

620

00:29:11,649 --> 00:29:07,850

the best way because it is the

621

00:29:13,269 --> 00:29:11,659

surroundings are not familiar in a

622

00:29:17,019 --> 00:29:13,279

public place they're not familiar with

623

00:29:18,820 --> 00:29:17,029

that witness being in their home they

624

00:29:21,639 --> 00:29:18,830

know what's going on the home you do not

625

00:29:23,620 --> 00:29:21,649

so if you can go to a public place to do

626

00:29:26,320 --> 00:29:23,630

your interview and get a nice quiet

627

00:29:29,200 --> 00:29:26,330

corner that's what I would definitely

628

00:29:31,990 --> 00:29:29,210

recommend and always always to people go

629

00:29:35,350 --> 00:29:32,000

to the interview if not more so let's

630

00:29:40,289 --> 00:29:35,360

just pretend everyone there's a call on

631

00:29:44,080 --> 00:29:40,299

to your team of an alleged UFO landing

632

00:29:51,389 --> 00:29:44,090

what is the protocol for that anybody

633

00:29:59,019 --> 00:29:57,250

it's not okay my understanding

634

00:30:00,549 --> 00:29:59,029

well basically yeah what that what that

635

00:30:02,169 --> 00:30:00,559

can you tell us a little bit about what

636

00:30:04,120 --> 00:30:02,179

happens when you get any kind of a call

637

00:30:06,610 --> 00:30:04,130

whether it's a landing case or you know

638

00:30:11,549 --> 00:30:06,620

land I understand that there's a landing

639

00:30:16,149 --> 00:30:13,720

okay well the understanding have

640

00:30:21,789 --> 00:30:16,159

regarding that is that if there's a

641

00:30:25,240 --> 00:30:21,799

landing exercise that has to be done

642

00:30:27,970 --> 00:30:25,250

that there would be a grid related to

643

00:30:29,799 --> 00:30:27,980

that landing exercise that has to

644

00:30:31,930 --> 00:30:29,809

involve strings and stakes for the grid

645

00:30:36,100 --> 00:30:31,940

marking evidence in the grid and taking

646

00:30:38,409 --> 00:30:36,110

pictures numbering the squares and and

647

00:30:40,659 --> 00:30:38,419

then at the end of that when that's done

648

00:30:42,310 --> 00:30:40,669

because that can be a lengthy process it

649

00:30:45,430 --> 00:30:42,320

looks like a checker board with two feet

650

00:30:47,740 --> 00:30:45,440

squares two foot squares and then is

651

00:30:50,320 --> 00:30:47,750

there any other contributions to that

652

00:30:54,399 --> 00:30:50,330

topic or anybody have anything to say to

653

00:31:00,279 --> 00:30:54,409

that okay I was I was just and I was

654

00:31:02,320 --> 00:31:00,289

going to two other people because I'm

655

00:31:04,659 --> 00:31:02,330

sure they had plenty to say but it's

656

00:31:06,720 --> 00:31:04,669

sort of a question that people have to

657

00:31:09,730 --> 00:31:06,730

think about initially I would suspect

658

00:31:11,049 --> 00:31:09,740

because there's no pattern stuff in our

659

00:31:12,700 --> 00:31:11,059

heads that are just gonna come to play

660

00:31:15,159 --> 00:31:12,710

and we say okay number one do this

661

00:31:17,740 --> 00:31:15,169

number two do that there is rule there

662

00:31:20,350 --> 00:31:17,750

are rules like that but basically you

663

00:31:21,639 --> 00:31:20,360

know as Marianne would know collecting

664

00:31:22,779 --> 00:31:21,649

evidence is gonna be important but you

665

00:31:25,480 --> 00:31:22,789

what do you do with it how do you

666

00:31:27,610 --> 00:31:25,490

collect it if you do did you disturb the

667

00:31:30,669 --> 00:31:27,620

site obviously you don't want to do that

668

00:31:32,500 --> 00:31:30,679

you know so you basically would walk

669

00:31:34,659 --> 00:31:32,510

around the site if you can identify it

670

00:31:36,159 --> 00:31:34,669

and visually making a visual

671

00:31:37,899 --> 00:31:36,169

identification of everything you see in

672

00:31:41,440 --> 00:31:37,909

the site that looks like it's out of

673

00:31:43,450 --> 00:31:41,450

place it can be a branch on the ground

674

00:31:45,639 --> 00:31:43,460

that was moved and you can see where it

675

00:31:47,080 --> 00:31:45,649

was resting from a depression but now it

676
00:31:48,519 --> 00:31:47,090
was moved something moved it well what

677
00:31:51,610 --> 00:31:48,529
moved it yeah maybe it was a coyote

678
00:31:53,230 --> 00:31:51,620
maybe it was a landing UFO that blew it

679
00:31:55,029 --> 00:31:53,240
out of the way are there Scout were

680
00:31:57,519 --> 00:31:55,039
March other things you can identify as

681
00:31:59,799 --> 00:31:57,529
different that might resemble a landing

682
00:32:01,120 --> 00:31:59,809
site what if there is some kind of

683
00:32:02,650 --> 00:32:01,130
material you don't recognize

684
00:32:04,300 --> 00:32:02,660
the ground does a glow under an

685
00:32:06,700 --> 00:32:04,310
ultraviolet light well you have to get

686
00:32:10,390 --> 00:32:06,710
near it to show to do that and there's

687
00:32:12,430 --> 00:32:10,400
procedures in place to do that and in

688
00:32:15,400 --> 00:32:12,440

2014 we did a boot camp out in the

689

00:32:17,020 --> 00:32:15,410

Sonoran Desert we have 35 people from

690

00:32:19,210 --> 00:32:17,030

around the country and we had a crashed

691

00:32:21,550 --> 00:32:19,220

UFO with biological material we had a

692

00:32:23,980 --> 00:32:21,560

car that exhibited magnetic properties

693

00:32:26,320 --> 00:32:23,990

and we had a landing site

694

00:32:29,470 --> 00:32:26,330

it had radioactive sampling that people

695

00:32:31,270 --> 00:32:29,480

had to do or know to do to test for that

696

00:32:33,580 --> 00:32:31,280

and and some of the teams found the

697

00:32:34,810 --> 00:32:33,590

radioactivity we did the same thing for

698

00:32:38,710 --> 00:32:34,820

this boot camp - actually we had

699

00:32:42,310 --> 00:32:38,720

radioactive chips for people to find and

700

00:32:44,920 --> 00:32:42,320

oh I think only one one group of people

701
00:32:46,240 --> 00:32:44,930
that looked at this so we had one group

702
00:32:48,400 --> 00:32:46,250
of people at this one particular site

703
00:32:49,900 --> 00:32:48,410
and we had radioactive material another

704
00:32:51,070 --> 00:32:49,910
site had radioactive material but our

705
00:32:54,520 --> 00:32:51,080
group was the only one that found the

706
00:32:56,470 --> 00:32:54,530
radioactive material and - a radioactive

707
00:32:59,140 --> 00:32:56,480
I do not mean ionizing radiation that

708
00:33:01,150 --> 00:32:59,150
melts your skin off I mean you know the

709
00:33:02,980 --> 00:33:01,160
chips from inside smoke detectors that's

710
00:33:04,900 --> 00:33:02,990
americium and it's very very low

711
00:33:07,240 --> 00:33:04,910
radioactivity and you can detect it very

712
00:33:10,480 --> 00:33:07,250
nicely with these commercially available

713
00:33:12,220 --> 00:33:10,490

detectors okay so and there's procedures

714

00:33:13,750 --> 00:33:12,230

for collecting that stuff you know and

715

00:33:15,700 --> 00:33:13,760

then there's a chain of custody that you

716

00:33:19,360 --> 00:33:15,710

have to go through in order to to pass

717

00:33:21,970 --> 00:33:19,370

the material up the chain of command so

718

00:33:24,220 --> 00:33:21,980

to speak and everything has to be

719

00:33:26,440 --> 00:33:24,230

document the documentation is of supreme

720

00:33:28,720 --> 00:33:26,450

importance you can't have a plastic bag

721

00:33:30,610 --> 00:33:28,730

that just has something in it it has to

722

00:33:32,560 --> 00:33:30,620

be labeled before you even put the thing

723

00:33:34,750 --> 00:33:32,570

in it what's this for what's it gonna be

724

00:33:37,270 --> 00:33:34,760

where'd you collect it photos have to be

725

00:33:41,560 --> 00:33:37,280

taken I mean it goes on and on and you

726
00:33:43,060 --> 00:33:41,570
know so I'm trying to answer a general

727
00:33:45,810 --> 00:33:43,070
question about what do you do when

728
00:33:49,060 --> 00:33:45,820
there's a landing case but in general

729
00:33:52,060 --> 00:33:49,070
the real world what's gonna happen is if

730
00:33:53,470 --> 00:33:52,070
it's a true UFO the military's gonna get

731
00:34:00,160 --> 00:33:53,480
there before us and say okay guys go

732
00:34:02,860 --> 00:34:00,170
home you know regarding radiation yes my

733
00:34:04,870 --> 00:34:02,870
understanding is that well actually I'll

734
00:34:07,950 --> 00:34:04,880
ask you but I have an answer to

735
00:34:14,419 --> 00:34:07,960
contribute to that okay yes there is

736
00:34:18,740 --> 00:34:14,429
real radiation detected or or suspected

737
00:34:21,649 --> 00:34:18,750
yeah even a glimmer of it what does the

738
00:34:23,419 --> 00:34:21,659

MUFON field investor keen a team do what

739

00:34:25,490 --> 00:34:23,429

is what is the proper procedure for that

740

00:34:28,579 --> 00:34:25,500

the proper procedures get the heck out

741

00:34:30,409 --> 00:34:28,589

of there okay and call the clear people

742

00:34:33,799 --> 00:34:30,419

or people in the chain of command that

743

00:34:36,169 --> 00:34:33,809

do that yeah you know there's a lot of

744

00:34:39,039 --> 00:34:36,179

people and MUFON that actually have very

745

00:34:41,690 --> 00:34:39,049

very high-end training in radioactivity

746

00:34:42,980 --> 00:34:41,700

and I think it's important to make sure

747

00:34:46,819 --> 00:34:42,990

that they're in the loop from the very

748

00:34:47,960 --> 00:34:46,829

beginning and of course you know no I

749

00:34:49,369 --> 00:34:47,970

should just go traipsing in there and

750

00:34:51,409 --> 00:34:49,379

say well I'll just put on this tie back

751
00:34:55,190 --> 00:34:51,419
too and I'll be fine you know that's not

752
00:34:56,990 --> 00:34:55,200
true you know if there's a danger you

753
00:34:58,250 --> 00:34:57,000
get out of there you do not stay you

754
00:35:00,109 --> 00:34:58,260
don't say hey let's check for

755
00:35:02,059 --> 00:35:00,119
radioactivity don't worry if I die

756
00:35:04,069 --> 00:35:02,069
take the Geiger counter and run in

757
00:35:05,299 --> 00:35:04,079
yourself I know this isn't your mobile

758
00:35:07,789 --> 00:35:05,309
okay

759
00:35:11,930 --> 00:35:07,799
it's your life so nobody plays those

760
00:35:13,339 --> 00:35:11,940
games but they don't need to be a hero

761
00:35:14,930 --> 00:35:13,349
they need to get a hold of the proper

762
00:35:17,029 --> 00:35:14,940
authorities and leave the area the

763
00:35:18,890 --> 00:35:17,039

proper authorities would be be to

764

00:35:20,120 --> 00:35:18,900

call the fire department is my

765

00:35:23,710 --> 00:35:20,130

understanding when I checked on that

766

00:35:27,650 --> 00:35:23,720

champ this is Jim

767

00:35:32,720 --> 00:35:27,660

yes what we have to remember here and

768

00:35:36,559 --> 00:35:32,730

move on is that we are not the authority

769

00:35:41,930 --> 00:35:36,569

you know having jurisdiction over all of

770

00:35:44,000 --> 00:35:41,940

these these various events we have if we

771

00:35:45,109 --> 00:35:44,010

if we encounter something that we think

772

00:35:48,200 --> 00:35:45,119

is radioactive

773

00:35:50,180 --> 00:35:48,210

yes just like Mark said we have to the

774

00:35:52,549 --> 00:35:50,190

first thing is our own personal safety

775

00:35:54,710 --> 00:35:52,559

and those around us and then get a hold

776

00:35:58,819 --> 00:35:54,720

of the the proper authorities at that

777

00:36:02,150 --> 00:35:58,829

point if if a UFO actually crashed out

778

00:36:06,339 --> 00:36:02,160

in the dry lake bed or something

779

00:36:09,140 --> 00:36:06,349

as Mark mentioned yeah MUFON wants to

780

00:36:13,250 --> 00:36:09,150

get involved and get as much information

781

00:36:16,250 --> 00:36:13,260

as we can document an archive that stuff

782

00:36:18,230 --> 00:36:16,260

but as we all know the local authorities

783

00:36:20,359 --> 00:36:18,240

are going to be the first ones on on the

784

00:36:23,510 --> 00:36:20,369

scene and we have to follow their

785

00:36:26,599 --> 00:36:23,520

instructions we don't want to get in the

786

00:36:27,450 --> 00:36:26,609

way of of you know the US military or

787

00:36:29,190 --> 00:36:27,460

the

788

00:36:30,840 --> 00:36:29,200

local police departments or fire

789

00:36:33,330 --> 00:36:30,850

departments no we don't want to we don't

790

00:36:35,610 --> 00:36:33,340

want to try to try to imagine that we're

791

00:36:37,830 --> 00:36:35,620

more important than they are although we

792

00:36:41,250 --> 00:36:37,840

are many of people within MUFON are

793

00:36:44,370 --> 00:36:41,260

trained and well qualified to do a lot

794

00:36:47,340 --> 00:36:44,380

of hands-on work but there again we you

795

00:36:50,400 --> 00:36:47,350

know we have to work within the

796

00:36:54,210 --> 00:36:50,410

established system of authority wherever

797

00:36:55,980 --> 00:36:54,220

we live and now a few minutes ago when

798

00:36:57,540 --> 00:36:55,990

you asked the question about a landing

799

00:36:59,510 --> 00:36:57,550

or a crash or whatever there was a

800

00:37:02,160 --> 00:36:59,520

little bit of silence on this in because

801

00:37:04,650 --> 00:37:02,170

some of those questions require a little

802

00:37:10,020 --> 00:37:04,660

think work before we answer you with our

803

00:37:11,850 --> 00:37:10,030

procedures are our rather complex and

804

00:37:15,660 --> 00:37:11,860

vast and they've been they've been

805

00:37:19,290 --> 00:37:15,670

polished in over 50 years of of learning

806

00:37:21,560 --> 00:37:19,300

how to do investigations and so many

807

00:37:24,300 --> 00:37:21,570

times even the field investigators even

808

00:37:29,070 --> 00:37:24,310

the veteran field investigators may have

809

00:37:30,600 --> 00:37:29,080

to stop and reference the pros think the

810

00:37:32,790 --> 00:37:30,610

protocol so go back and look at the

811

00:37:35,400 --> 00:37:32,800

manual what am I supposed to do right

812

00:37:38,610 --> 00:37:35,410

now in case of this and and I think

813

00:37:40,470 --> 00:37:38,620

that's probably why I didn't jump in

814

00:37:42,720 --> 00:37:40,480

right away and answer your question

815

00:37:44,700 --> 00:37:42,730

because I even you know even those of us

816

00:37:46,170 --> 00:37:44,710

that have been move on for years we

817

00:37:50,040 --> 00:37:46,180

still have to stop and think about okay

818

00:37:51,810 --> 00:37:50,050

what step do I take next and we have we

819

00:37:54,240 --> 00:37:51,820

have documentation and procedures and

820

00:37:56,610 --> 00:37:54,250

protocols that we follow so but so thank

821

00:38:00,060 --> 00:37:56,620

you Mark for stepping in and answering

822

00:38:01,710 --> 00:38:00,070

those questions and and so some of the

823

00:38:04,350 --> 00:38:01,720

stuff requires until think work when

824

00:38:06,390 --> 00:38:04,360

some of these questions you ask us so we

825

00:38:08,670 --> 00:38:06,400

still appreciate it you know thank you

826

00:38:10,410 --> 00:38:08,680

after you get a consent form for the

827

00:38:13,680 --> 00:38:10,420

property owner to sign in order to

828

00:38:18,090 --> 00:38:13,690

actually enter the property and they

829

00:38:21,990 --> 00:38:18,100

hand you photographs to look at mark who

830

00:38:23,700 --> 00:38:22,000

is a video and photo analyst who knows

831

00:38:26,340 --> 00:38:23,710

how to deal with the forensics regarding

832

00:38:29,340 --> 00:38:26,350

that what is going to ask you mark is if

833

00:38:32,340 --> 00:38:29,350

somebody hands you photos a witness does

834

00:38:35,780 --> 00:38:32,350

that they feel that they have been able

835

00:38:39,450 --> 00:38:35,790

to get from their alleged sighting or

836

00:38:41,720 --> 00:38:39,460

landing of something or whatever how do

837

00:38:43,010 --> 00:38:41,730

you analyze those and if you in my

838

00:38:44,540 --> 00:38:43,020

keeping your answer brief because I'd

839

00:38:45,650 --> 00:38:44,550

like to move on to John Dover and ask

840

00:38:48,230 --> 00:38:45,660

him a few questions

841

00:38:50,030 --> 00:38:48,240

sure the bottom line is that we want to

842

00:38:52,640 --> 00:38:50,040

get the originals and then I put it

843

00:38:55,460 --> 00:38:52,650

through a battery of applications that I

844

00:38:58,930 --> 00:38:55,470

use to validate the data to make sure

845

00:39:01,970 --> 00:38:58,940

it's not faked up and we move from there

846

00:39:03,590 --> 00:39:01,980

that's short okay thank you that was

847

00:39:06,290 --> 00:39:03,600

very short let me ask you another

848

00:39:06,890 --> 00:39:06,300

question what is exif data and why does

849

00:39:08,900 --> 00:39:06,900

that matter

850

00:39:12,410 --> 00:39:08,910

Shane hurt is talked about this at great

851
00:39:15,200 --> 00:39:12,420
length on links on multiple shows that

852
00:39:17,630 --> 00:39:15,210
we've had how important exif data is and

853
00:39:20,210 --> 00:39:17,640
actually just having the opportunity to

854
00:39:22,220 --> 00:39:20,220
forensic ly analyze photos and video

855
00:39:23,750 --> 00:39:22,230
instead of assuming that there's

856
00:39:25,550 --> 00:39:23,760
something on there there's a process to

857
00:39:27,650 --> 00:39:25,560
it I know that's part of your job with

858
00:39:30,650 --> 00:39:27,660
MUFON but what is exif data and why

859
00:39:32,930 --> 00:39:30,660
would anybody care about that well the

860
00:39:35,320 --> 00:39:32,940
way the way that digital photos are

861
00:39:38,000 --> 00:39:35,330
taken today every single digital

862
00:39:42,080 --> 00:39:38,010
hardware that takes a photo and acquires

863
00:39:44,150 --> 00:39:42,090

an image stores additional data along

864

00:39:47,420 --> 00:39:44,160

with that image data such as when was it

865

00:39:50,150 --> 00:39:47,430

taken what was the F ratio how fast

866

00:39:52,550 --> 00:39:50,160

there was the exposure what kind of that

867

00:39:54,830 --> 00:39:52,560

Hardware took the picture where was it

868

00:39:57,320 --> 00:39:54,840

taken in in some cases if you do it with

869

00:39:59,510 --> 00:39:57,330

an iPhone and probably Android you can

870

00:40:01,190 --> 00:39:59,520

get your GPS coordinates of actually

871

00:40:04,460 --> 00:40:01,200

where the photo was actually taken for

872

00:40:06,770 --> 00:40:04,470

that moment it's it's important to have

873

00:40:10,250 --> 00:40:06,780

this kind of information so that you can

874

00:40:11,570 --> 00:40:10,260

correlate it against the testimony of

875

00:40:13,940 --> 00:40:11,580

the witness who says they took the

876

00:40:16,820 --> 00:40:13,950

picture I've had countless I can't tell

877

00:40:19,580 --> 00:40:16,830

you how many photos come in yes I took

878

00:40:21,140 --> 00:40:19,590

this outside on my deck I was looking at

879

00:40:23,450 --> 00:40:21,150

the spy and I saw this object moving

880

00:40:24,920 --> 00:40:23,460

through the sky and the exit data shows

881

00:40:26,900 --> 00:40:24,930

that it was taken in the middle of the

882

00:40:29,000 --> 00:40:26,910

woods somewhere else and had nothing to

883

00:40:31,070 --> 00:40:29,010

do with a house on a deck so he clearly

884

00:40:33,050 --> 00:40:31,080

know that they were trying to you know

885

00:40:35,330 --> 00:40:33,060

do something or they were remembering

886

00:40:37,400 --> 00:40:35,340

wrong and I gives people a benefit the

887

00:40:40,550 --> 00:40:37,410

dowel and I say well and I don't tell

888

00:40:41,870 --> 00:40:40,560

him where the exit data says they took

889

00:40:44,180 --> 00:40:41,880

the picture I just let them tell me

890

00:40:45,800 --> 00:40:44,190

their story just like Mary Ann said you

891

00:40:47,840 --> 00:40:45,810

let people tell you what happened and

892

00:40:49,760 --> 00:40:47,850

then I make a judgement after that and

893

00:40:52,640 --> 00:40:49,770

I'll follow up with questions once I've

894

00:40:54,500 --> 00:40:52,650

come to a preliminary decision and my

895

00:40:55,320 --> 00:40:54,510

decisions are by no means you know 100

896

00:40:57,600 --> 00:40:55,330

percent solid

897

00:40:59,010 --> 00:40:57,610

see clearly because we don't really know

898

00:41:01,770 --> 00:40:59,020

everything that's going on out there

899

00:41:04,140 --> 00:41:01,780

they opened mine needs to be retained

900

00:41:06,210 --> 00:41:04,150

and yeah I think it's important to step

901
00:41:09,060 --> 00:41:06,220
in and mention that the folks should

902
00:41:11,130 --> 00:41:09,070
have if they've taken a photo I include

903
00:41:12,810 --> 00:41:11,140
it said the original photo because

904
00:41:15,330 --> 00:41:12,820
what's going to happen if they edit it

905
00:41:18,900 --> 00:41:15,340
if they crop it and save it that exif

906
00:41:21,450 --> 00:41:18,910
data as far as shutter speed f-stop used

907
00:41:24,510 --> 00:41:21,460
that type of thing is going to get wiped

908
00:41:26,100 --> 00:41:24,520
out when it gets received in some cases

909
00:41:28,200 --> 00:41:26,110
it will in some cases it won't but

910
00:41:30,300 --> 00:41:28,210
you're right and the first thing I said

911
00:41:33,270 --> 00:41:30,310
the answer the question was we need the

912
00:41:34,860 --> 00:41:33,280
original photo and usually people will

913
00:41:35,880 --> 00:41:34,870

say what's this object up here in the

914

00:41:37,770 --> 00:41:35,890

left corner my photo

915

00:41:40,530 --> 00:41:37,780

let me just frame that crop it and send

916

00:41:42,570 --> 00:41:40,540

that and that's not even helpful because

917

00:41:45,360 --> 00:41:42,580

that's that takes it out of the context

918

00:41:47,100 --> 00:41:45,370

from which the photo was taken and we

919

00:41:48,810 --> 00:41:47,110

can't have that I can do that work I can

920

00:41:51,450 --> 00:41:48,820

zoom in I can do all the things you did

921

00:41:54,150 --> 00:41:51,460

and a lot more so I will do that for you

922

00:41:57,540 --> 00:41:54,160

and with you if you want that so that's

923

00:41:59,820 --> 00:41:57,550

important we have John Dover on with us

924

00:42:02,520 --> 00:41:59,830

and John also want to make sure that

925

00:42:05,750 --> 00:42:02,530

your title is set accurately is it

926

00:42:09,720 --> 00:42:05,760

Navajo Nation's arranger is that correct

927

00:42:13,920 --> 00:42:09,730

yeah that's correct and we mind sharing

928

00:42:15,480 --> 00:42:13,930

a little bit of background okay I was a

929

00:42:20,430 --> 00:42:15,490

lieutenant with the Navajo Nation

930

00:42:22,950 --> 00:42:20,440

Rangers we recognized federal officers I

931

00:42:26,040 --> 00:42:22,960

have been to the federal law enforcement

932

00:42:29,960 --> 00:42:26,050

training centers criminal investigation

933

00:42:34,890 --> 00:42:29,970

program that was a SWAT team commander

934

00:42:39,080 --> 00:42:34,900

so Mountain Rescue instructor federal

935

00:42:43,320 --> 00:42:39,090

firearms instructor as an EMT be

936

00:42:48,870 --> 00:42:43,330

emergency medical technician you know

937

00:42:50,760 --> 00:42:48,880

just all kinds of varied stuff and I was

938

00:42:53,900 --> 00:42:50,770

a specialist in archaeological

939

00:42:59,490 --> 00:42:53,910

investigations which are by nature very

940

00:43:00,600 --> 00:42:59,500

forensic okay and you know I had the

941

00:43:05,310 --> 00:43:00,610

privilege of interviewing yourself

942

00:43:08,320 --> 00:43:05,320

Stacey Wright Shane herd and a few other

943

00:43:10,780 --> 00:43:08,330

folks over at the Phoenix lights

944

00:43:13,870 --> 00:43:10,790

movie special that doctor linkit i held

945

00:43:15,340 --> 00:43:13,880

this year in phoenix and you were

946

00:43:17,590 --> 00:43:15,350

speaking about some really amazing

947

00:43:19,240 --> 00:43:17,600

things and it was a really wonderful

948

00:43:20,650 --> 00:43:19,250

interview thank you for having done that

949

00:43:23,140 --> 00:43:20,660

interview with me what I was going to

950

00:43:26,200 --> 00:43:23,150

ask you is what was the role that you

951
00:43:28,710 --> 00:43:26,210
held during the Phoenix MUFON boot camp

952
00:43:33,910 --> 00:43:28,720
what did you do while you were there

953
00:43:37,500 --> 00:43:33,920
okay I was doing an introduction to the

954
00:43:40,270 --> 00:43:37,510
collection of evidence location

955
00:43:44,200 --> 00:43:40,280
collection bagging tagging all that kind

956
00:43:46,440 --> 00:43:44,210
of stuff and one of the things will

957
00:43:48,840 --> 00:43:46,450
earlier I was going to chime in

958
00:43:51,190 --> 00:43:48,850
everybody else answered it really well

959
00:43:55,240 --> 00:43:51,200
one of the first things you do when you

960
00:43:58,810 --> 00:43:55,250
get to a scene is you assess for officer

961
00:44:00,850 --> 00:43:58,820
safety so you're going to look at not

962
00:44:03,160 --> 00:44:00,860
only radiation but you're going to look

963
00:44:04,990 --> 00:44:03,170

at environmental factors you know are

964

00:44:09,340 --> 00:44:05,000

you going to watch it walk into a huge

965

00:44:11,650 --> 00:44:09,350

patch of cactus you know or you are

966

00:44:14,860 --> 00:44:11,660

there snakes in there you know they're

967

00:44:18,040 --> 00:44:14,870

there's all kinds of actual dangers or

968

00:44:19,690 --> 00:44:18,050

even terrain dangers that can negate the

969

00:44:24,280 --> 00:44:19,700

possibility of you getting in there

970

00:44:28,720 --> 00:44:24,290

right away but for evidence

971

00:44:31,510 --> 00:44:28,730

what we did is evidence is absolutely

972

00:44:35,530 --> 00:44:31,520

crucial in an investigation I have been

973

00:44:38,650 --> 00:44:35,540

a criminal investigator almost all of my

974

00:44:41,950 --> 00:44:38,660

career for 31 years and when you're

975

00:44:43,900 --> 00:44:41,960

investigating you look first at the

976

00:44:47,020 --> 00:44:43,910

evidence say there's a car accident

977

00:44:49,120 --> 00:44:47,030

scene as a technical accident

978

00:44:51,670 --> 00:44:49,130

investigator I would go to the scene I

979

00:44:54,370 --> 00:44:51,680

would look at the evidence on the scene

980

00:44:57,010 --> 00:44:54,380

do a walk through the skid marks and the

981

00:45:00,520 --> 00:44:57,020

crush damage and everything else any

982

00:45:02,950 --> 00:45:00,530

vows that occurred in my mind I'm

983

00:45:06,300 --> 00:45:02,960

already doing mathematical calculations

984

00:45:10,210 --> 00:45:06,310

as to Vault formulas skid formulas

985

00:45:12,070 --> 00:45:10,220

coefficient of friction and then I would

986

00:45:17,200 --> 00:45:12,080

go back and I would start interviewing

987

00:45:21,190 --> 00:45:17,210

witnesses and the evidence always speaks

988

00:45:21,680 --> 00:45:21,200

for itself your your witness statements

989

00:45:25,480 --> 00:45:21,690

should

990

00:45:28,190 --> 00:45:25,490

what you're seeing with the evidence and

991

00:45:31,940 --> 00:45:28,200

so when you go into a scene you don't

992

00:45:34,880 --> 00:45:31,950

make a predisposition as far as what you

993

00:45:37,790 --> 00:45:34,890

think happened you look at the evidence

994

00:45:40,220 --> 00:45:37,800

first then you go on with the rest of

995

00:45:44,090 --> 00:45:40,230

the investigation thank you that was a

996

00:45:46,160 --> 00:45:44,100

great summary of what you did at the

997

00:45:50,330 --> 00:45:46,170

boot camp I wanted to talk to you about

998

00:45:52,550 --> 00:45:50,340

soil samples taking a control sample my

999

00:45:55,520 --> 00:45:52,560

understanding is it's possible and okay

1000

00:45:58,280 --> 00:45:55,530

you tell me if it is okay or not for

1001
00:46:00,650 --> 00:45:58,290
someone if they have plastic pipes on

1002
00:46:03,350 --> 00:46:00,660
them with the cap to go ahead and just

1003
00:46:08,060 --> 00:46:03,360
hammer that plastic pipe into the soil

1004
00:46:12,080 --> 00:46:08,070
and then cap it off same thing in an

1005
00:46:14,090 --> 00:46:12,090
alleged UFO landing area and then you

1006
00:46:15,680 --> 00:46:14,100
mark where you did the soil sample is

1007
00:46:19,940 --> 00:46:15,690
that right where is there any other way

1008
00:46:21,980 --> 00:46:19,950
to do it well what's important with any

1009
00:46:26,990 --> 00:46:21,990
collection of evidence is that your

1010
00:46:29,480 --> 00:46:27,000
tools have to be clean and in most cases

1011
00:46:33,860 --> 00:46:29,490
for forensic evidence you're talking

1012
00:46:36,740 --> 00:46:33,870
about sterile tools tweezers trowels

1013
00:46:39,050 --> 00:46:36,750

whatever you're going to use has to be

1014

00:46:41,510 --> 00:46:39,060

absolutely clean and pre bagged and

1015

00:46:42,950 --> 00:46:41,520

sealed and you're going to break it out

1016

00:46:46,370 --> 00:46:42,960

there so you're not going to cross

1017

00:46:48,290 --> 00:46:46,380

contaminate anything like if you were in

1018

00:46:50,840 --> 00:46:48,300

your own yard gardening and shoveling

1019

00:46:52,070 --> 00:46:50,850

manure with your trowel and then you

1020

00:46:54,350 --> 00:46:52,080

took it along with you on an

1021

00:46:57,020 --> 00:46:54,360

investigation and took soil samples with

1022

00:47:00,230 --> 00:46:57,030

it you're transferring that that

1023

00:47:02,350 --> 00:47:00,240

material to your sample so you want to

1024

00:47:05,320 --> 00:47:02,360

be very careful about that any

1025

00:47:10,370 --> 00:47:05,330

containers that you're using should be

1026

00:47:12,860 --> 00:47:10,380

again sterile field clean you you don't

1027

00:47:15,920 --> 00:47:12,870

want to use a mason jar that you that

1028

00:47:18,980 --> 00:47:15,930

you know you had your homemade marmalade

1029

00:47:21,290 --> 00:47:18,990

in and take it with you and then dump

1030

00:47:23,660 --> 00:47:21,300

soil in there the storing of content

1031

00:47:26,360 --> 00:47:23,670

again yeah it would contaminate the

1032

00:47:28,700 --> 00:47:26,370

evidence so where so let's just say

1033

00:47:32,660 --> 00:47:28,710

we're on site and we have our clean

1034

00:47:35,510 --> 00:47:32,670

tools and clean containers and then you

1035

00:47:36,950 --> 00:47:35,520

go ahead and take the sample correctly

1036

00:47:40,970 --> 00:47:36,960

where do we store them out while we're

1037

00:47:43,280 --> 00:47:40,980

on her way to wherever okay as soon as

1038

00:47:46,330 --> 00:47:43,290

you'd picked up the sample and you've

1039

00:47:49,030 --> 00:47:46,340

you've bagged it you want to tag it and

1040

00:47:52,070 --> 00:47:49,040

by tagging it you're going to put

1041

00:47:55,550 --> 00:47:52,080

something on it usually in indelible

1042

00:47:57,380 --> 00:47:55,560

marker with your initials to say not

1043

00:47:59,840 --> 00:47:57,390

only say this is the date and time I

1044

00:48:02,720 --> 00:47:59,850

picked it up this is who picked it up

1045

00:48:05,030 --> 00:48:02,730

because all of that evidence you could

1046

00:48:08,480 --> 00:48:05,040

have several hundred pieces of evidence

1047

00:48:10,550 --> 00:48:08,490

in a case and you have to track those

1048

00:48:13,280 --> 00:48:10,560

you have to keep a log of everything

1049

00:48:18,290 --> 00:48:13,290

that you've picked up and it all has to

1050

00:48:20,590 --> 00:48:18,300

be documented so very very important you

1051
00:48:25,030 --> 00:48:20,600
almost get to be like an accountant

1052
00:48:30,710 --> 00:48:25,040
keeping track of things okay and then if

1053
00:48:33,320 --> 00:48:30,720
if we have to put this stuff into you

1054
00:48:35,360 --> 00:48:33,330
know a vehicle and go somewhere are

1055
00:48:36,410 --> 00:48:35,370
there are there situations at times

1056
00:48:39,860 --> 00:48:36,420
where we have to put them in

1057
00:48:41,660 --> 00:48:39,870
refrigerated areas or you know is it

1058
00:48:43,280 --> 00:48:41,670
okay to just throw them in the back of

1059
00:48:45,560 --> 00:48:43,290
the vehicle how would we store them on

1060
00:48:54,550 --> 00:48:45,570
our way back to headquarters so to speak

1061
00:48:57,650 --> 00:48:54,560
oh sure there's a whole biological

1062
00:49:03,170 --> 00:48:57,660
material may need to be put on ice or

1063
00:49:05,840 --> 00:49:03,180

frozen with dry ice it could be that if

1064

00:49:09,530 --> 00:49:05,850

you put biological material in plastic

1065

00:49:11,150 --> 00:49:09,540

it'll start to deteriorate so you don't

1066

00:49:16,190 --> 00:49:11,160

want to do that if you want to use paper

1067

00:49:19,310 --> 00:49:16,200

bags so there's there's a whole separate

1068

00:49:21,590 --> 00:49:19,320

subgroup of study involved in how to

1069

00:49:24,910 --> 00:49:21,600

collect and properly bag the evidence

1070

00:49:28,910 --> 00:49:24,920

and you know all we're doing is giving

1071

00:49:32,810 --> 00:49:28,920

giving everybody the basics of how to do

1072

00:49:35,350 --> 00:49:32,820

this and some practical experience and

1073

00:49:39,080 --> 00:49:35,360

then it's going to take many many cases

1074

00:49:42,950 --> 00:49:39,090

to to get the experience necessary to

1075

00:49:45,620 --> 00:49:42,960

continue on with this okay and then

1076

00:49:47,270 --> 00:49:45,630

taking pictures of the area if anyone

1077

00:49:49,100 --> 00:49:47,280

anyone at all wants to try them in on

1078

00:49:51,950 --> 00:49:49,110

this please do it just remember to say

1079

00:49:56,420 --> 00:49:51,960

who you are my understanding is it's

1080

00:49:58,880 --> 00:49:56,430

okay for folks in MUFON to use multiple

1081

00:50:00,950 --> 00:49:58,890

cameras and so let's just pretend they

1082

00:50:02,450 --> 00:50:00,960

have they have their iPhone but they

1083

00:50:05,330 --> 00:50:02,460

also happen to have a really great

1084

00:50:07,070 --> 00:50:05,340

camera other than their iPhone if they

1085

00:50:09,590 --> 00:50:07,080

wanted to take pictures from both

1086

00:50:19,070 --> 00:50:09,600

devices just for the heck of it they

1087

00:50:24,020 --> 00:50:19,080

could is that right yeah okay go ahead I

1088

00:50:26,650 --> 00:50:24,030

was just gonna say yeah it is it is

1089

00:50:29,510 --> 00:50:26,660

possible and practical to do it that way

1090

00:50:32,860 --> 00:50:29,520

again you're gonna have to have a photo

1091

00:50:37,400 --> 00:50:32,870

log of each picture where it was taken

1092

00:50:41,560 --> 00:50:37,410

which direction it was taken and there

1093

00:50:47,330 --> 00:50:41,570

is a difference between digital and

1094

00:50:50,540 --> 00:50:47,340

analog pictures digital when you blow it

1095

00:50:53,150 --> 00:50:50,550

up tends to pixelate a la 35-millimeter

1096

00:50:58,250 --> 00:50:53,160

on the other hand gives you a very clean

1097

00:51:00,950 --> 00:50:58,260

picture that can be blown up Polaroid

1098

00:51:03,140 --> 00:51:00,960

photography is actually excellent

1099

00:51:06,130 --> 00:51:03,150

because there's no way you could really

1100

00:51:09,440 --> 00:51:06,140

manipulate anything within the picture

1101
00:51:13,400 --> 00:51:09,450
so there there's a whole lot of things

1102
00:51:17,330 --> 00:51:13,410
in our arsenal and we should use as much

1103
00:51:20,390 --> 00:51:17,340
of our arsenal as we can you know just

1104
00:51:23,230 --> 00:51:20,400
jump in here real quick and a little

1105
00:51:26,120 --> 00:51:23,240
little anecdote I used to work in the

1106
00:51:29,300 --> 00:51:26,130
camera company that manufactured cameras

1107
00:51:31,040 --> 00:51:29,310
and we had quite a few a police

1108
00:51:33,380 --> 00:51:31,050
department says customers with different

1109
00:51:36,050 --> 00:51:33,390
questions about this and that and I

1110
00:51:37,610 --> 00:51:36,060
always noticed that the the patrolmen

1111
00:51:39,800 --> 00:51:37,620
they generally got the point-and-shoot

1112
00:51:42,680 --> 00:51:39,810
cameras and the detectives generally got

1113
00:51:44,390 --> 00:51:42,690

the better DSLR cameras so I'll just

1114

00:51:46,990 --> 00:51:44,400

leave it at that and that continued on

1115

00:51:49,550 --> 00:51:47,000

channel just wanted to share that little

1116

00:51:53,390 --> 00:51:49,560

thank you so much and was that Russell

1117

00:51:55,220 --> 00:51:53,400

speaking who were the person who's going

1118

00:51:57,020 --> 00:51:55,230

to interject it was that mark or Russell

1119

00:52:02,170 --> 00:51:57,030

who was that

1120

00:52:07,559 --> 00:52:04,690

hi I just wanted to interject some on

1121

00:52:10,539 --> 00:52:07,569

the photography I'm trained in forensic

1122

00:52:12,819 --> 00:52:10,549

photography and so there's if you're

1123

00:52:14,710 --> 00:52:12,829

going to be doing a lot of photography

1124

00:52:18,510 --> 00:52:14,720

or if you really want to do it correctly

1125

00:52:24,240 --> 00:52:18,520

you should study forensic photography

1126
00:52:27,279 --> 00:52:24,250
for instance say there's a footprint or

1127
00:52:29,470 --> 00:52:27,289
an impression from you know a landing

1128
00:52:34,589 --> 00:52:29,480
pod or something you want to put a ruler

1129
00:52:36,609 --> 00:52:34,599
there you can see the size of it you

1130
00:52:39,370 --> 00:52:36,619
might photograph it from different

1131
00:52:42,569 --> 00:52:39,380
angles so that you get more detail in

1132
00:52:49,690 --> 00:52:42,579
the photo you mark where everything is

1133
00:52:52,329 --> 00:52:49,700
but it's whole science unto it so one

1134
00:52:55,839 --> 00:52:52,339
thing earlier you know you're talking

1135
00:52:58,839 --> 00:52:55,849
about like a landing first thing you do

1136
00:53:01,599 --> 00:52:58,849
is check for radiation Lanny's often

1137
00:53:04,960 --> 00:53:01,609
have radiation associated with them so

1138
00:53:06,819 --> 00:53:04,970

there every investigator really should

1139

00:53:11,430 --> 00:53:06,829

you know when they can afford to get a

1140

00:53:14,049 --> 00:53:11,440

radiation detector radiation meter

1141

00:53:18,430 --> 00:53:14,059

that's great thank you so much for that

1142

00:53:21,970 --> 00:53:18,440

input and Mark Dantonio was going to ask

1143

00:53:24,730 --> 00:53:21,980

you does it sound okay by you if a field

1144

00:53:27,940 --> 00:53:24,740

investigator told you they're at a site

1145

00:53:30,519 --> 00:53:27,950

and they have their iPhone and they also

1146

00:53:32,589 --> 00:53:30,529

have another kind of camera a camera

1147

00:53:34,240 --> 00:53:32,599

that sounds acceptable to you and that

1148

00:53:37,180 --> 00:53:34,250

investigator wants to take pictures with

1149

00:53:40,480 --> 00:53:37,190

both kinds of devices is that does that

1150

00:53:43,839 --> 00:53:40,490

sound okay to you absolutely enough for

1151
00:53:45,970 --> 00:53:43,849
me and and but here's the issue each

1152
00:53:48,220 --> 00:53:45,980
camera has its own quirks its own

1153
00:53:50,740 --> 00:53:48,230
nuances each camera detects color

1154
00:53:53,260 --> 00:53:50,750
differently the sensors will pick up

1155
00:53:56,200 --> 00:53:53,270
different levels of information in the

1156
00:53:58,329 --> 00:53:56,210
spectrum some cameras are you know

1157
00:53:59,589 --> 00:53:58,339
better at taking kind of the red end of

1158
00:54:01,930 --> 00:53:59,599
the spectrum you know we have red orange

1159
00:54:04,299 --> 00:54:01,940
yellow green blue indigo and violet in

1160
00:54:05,799 --> 00:54:04,309
our spectrum some cameras lean toward

1161
00:54:08,799 --> 00:54:05,809
the red some cameras lean toward the

1162
00:54:10,599 --> 00:54:08,809
green some go toward the blue and so if

1163
00:54:12,519 --> 00:54:10,609

someone's gonna use a different camera I

1164

00:54:14,740 --> 00:54:12,529

just need to know all the specifics of

1165

00:54:16,059 --> 00:54:14,750

each camera and I can look that up

1166

00:54:17,559 --> 00:54:16,069

I don't need you know then

1167

00:54:19,689 --> 00:54:17,569

to do that for me that's something I can

1168

00:54:21,939 --> 00:54:19,699

do getting the information they should

1169

00:54:24,279 --> 00:54:21,949

not be thwarted because they're thinking

1170

00:54:26,979 --> 00:54:24,289

gee can I use this camera to take this

1171

00:54:28,930 --> 00:54:26,989

picture and then miss the picture okay

1172

00:54:30,279 --> 00:54:28,940

take all the pictures you want but then

1173

00:54:33,699 --> 00:54:30,289

get me the information and if the

1174

00:54:36,009 --> 00:54:33,709

information of the video is you know a

1175

00:54:37,539 --> 00:54:36,019

poor quality or it's shaken around I can

1176

00:54:39,939 --> 00:54:37,549

stabilize that I can make it look like

1177

00:54:41,410 --> 00:54:39,949

it's rock-solid in the view and make it

1178

00:54:42,670 --> 00:54:41,420

like you never were shaking around

1179

00:54:43,289 --> 00:54:42,680

because you were so scared out of your

1180

00:54:46,509 --> 00:54:43,299

mind

1181

00:54:47,969 --> 00:54:46,519

okay and Shane I was gonna ask you do

1182

00:54:52,749 --> 00:54:47,979

you bring a laptop

1183

00:54:55,539 --> 00:54:52,759

to an investigation and also let's let's

1184

00:54:57,969 --> 00:54:55,549

just go back to a landing site idea do

1185

00:54:59,380 --> 00:54:57,979

you set up a command center a center you

1186

00:55:03,189 --> 00:54:59,390

know where there's all kinds of tools

1187

00:55:05,680 --> 00:55:03,199

like laptops and forensic tools and then

1188

00:55:09,849 --> 00:55:05,690

clean containers like what does that

1189

00:55:11,489 --> 00:55:09,859

area look like when you have your teen

1190

00:55:14,140 --> 00:55:11,499

there setting it up what would you have

1191

00:55:16,479 --> 00:55:14,150

yeah you do set up a staging area for

1192

00:55:18,400 --> 00:55:16,489

your materials and stuff you know a

1193

00:55:21,279 --> 00:55:18,410

sufficient amount of distance away from

1194

00:55:23,529 --> 00:55:21,289

the actual site itself so that it's safe

1195

00:55:27,099 --> 00:55:23,539

and you have working you know room to

1196

00:55:29,079 --> 00:55:27,109

work and that sort of thing but yeah you

1197

00:55:32,049 --> 00:55:29,089

can stay Josef materials again as we

1198

00:55:32,499 --> 00:55:32,059

talked about some are sterile have to be

1199

00:55:34,420 --> 00:55:32,509

handled

1200

00:55:36,819 --> 00:55:34,430

you know correctly I've gloves that you

1201
00:55:39,309 --> 00:55:36,829
have to have and switch out and a lot of

1202
00:55:41,979 --> 00:55:39,319
a lot of things like that logistically

1203
00:55:44,469 --> 00:55:41,989
so that's that's a good way to set it up

1204
00:55:47,469 --> 00:55:44,479
and have a little Basecamp a staging

1205
00:55:49,449 --> 00:55:47,479
area and you know a gap a room between

1206
00:55:51,279 --> 00:55:49,459
the actual site so you can properly

1207
00:55:53,979 --> 00:55:51,289
process that site as well

1208
00:55:57,309 --> 00:55:53,989
great the other thing that we still need

1209
00:55:59,650 --> 00:55:57,319
to cover is let's say you have dotted

1210
00:56:00,789 --> 00:55:59,660
all your eyes and you have everything

1211
00:56:03,819 --> 00:56:00,799
done perfectly

1212
00:56:06,749 --> 00:56:03,829
you have your soil samples all the

1213
00:56:09,999 --> 00:56:06,759

proper forms have been filled out and

1214

00:56:13,779 --> 00:56:10,009

then you need to send those soil samples

1215

00:56:16,420 --> 00:56:13,789

and any other kind of say biological

1216

00:56:19,209 --> 00:56:16,430

samples or fill in the blank samples

1217

00:56:22,920 --> 00:56:19,219

where do you send them to and what is

1218

00:56:26,130 --> 00:56:22,930

the first thing you do regarding that

1219

00:56:39,479 --> 00:56:34,979

well I could throw this in I think

1220

00:56:41,609 --> 00:56:39,489

that's right yeah yeah this was first

1221

00:56:44,900 --> 00:56:41,619

thing I do on something like that I

1222

00:56:48,599 --> 00:56:44,910

would contact the chief investigator I

1223

00:56:50,489 --> 00:56:48,609

get them involved and have them with it

1224

00:56:56,670 --> 00:56:50,499

the entire investigation on something

1225

00:56:59,489 --> 00:56:56,680

that important and with that I would let

1226

00:57:02,970 --> 00:56:59,499

them determine where it goes up the

1227

00:57:04,890 --> 00:57:02,980

chain okay and you know I go ahead

1228

00:57:07,220 --> 00:57:04,900

please whoever that is please interrupt

1229

00:57:12,059 --> 00:57:07,230

hi mark go ahead just we do have a

1230

00:57:16,589 --> 00:57:12,069

materials scientist on on the staff and

1231

00:57:19,529 --> 00:57:16,599

her name is Phyllis and she can take

1232

00:57:21,630 --> 00:57:19,539

samples and I think that we don't we

1233

00:57:23,489 --> 00:57:21,640

wouldn't send them directly to her as a

1234

00:57:24,960 --> 00:57:23,499

field investigator for instance you

1235

00:57:26,819 --> 00:57:24,970

would contact us Russell just said

1236

00:57:29,880 --> 00:57:26,829

you're chief investigator he would

1237

00:57:31,829 --> 00:57:29,890

coordinate the back and forth with the

1238

00:57:34,079 --> 00:57:31,839

material scientists and the materials

1239

00:57:35,640 --> 00:57:34,089

lab and then they can test to see what's

1240

00:57:37,319 --> 00:57:35,650

going on with these materials and

1241

00:57:42,120 --> 00:57:37,329

determine whether it's something of

1242

00:57:44,279 --> 00:57:42,130

earthly or otherworldly origin yeah I

1243

00:57:46,859 --> 00:57:44,289

actually contacted MUFON on this

1244

00:57:50,190 --> 00:57:46,869

question and they said to absolutely

1245

00:57:53,009 --> 00:57:50,200

follow a chain of command to to call the

1246

00:57:54,749 --> 00:57:53,019

deal by perhaps maybe that's not the

1247

00:57:58,319 --> 00:57:54,759

right terminology I might not be using

1248

00:58:01,470 --> 00:57:58,329

it part of the that that acronym

1249

00:58:03,239 --> 00:58:01,480

correctly but called the do DOI they

1250

00:58:05,160 --> 00:58:03,249

said and then they evaluate whether or

1251

00:58:07,710 --> 00:58:05,170

not these are valuable samples or not

1252

00:58:09,749 --> 00:58:07,720

and then the DOI or MCI will give more

1253

00:58:13,109 --> 00:58:09,759

information from there does that sound

1254

00:58:15,779 --> 00:58:13,119

right to you guys yes this is Stacey and

1255

00:58:17,789 --> 00:58:15,789

I actually spoke with the MUFON chief

1256

00:58:19,319 --> 00:58:17,799

investigator about this as well because

1257

00:58:20,460 --> 00:58:19,329

I just wasn't really clear on it I

1258

00:58:23,039 --> 00:58:20,470

wanted to make sure that we had our

1259

00:58:25,499 --> 00:58:23,049

ducks in a row if whatever happened so

1260

00:58:27,150 --> 00:58:25,509

what he told me is that when taking any

1261

00:58:29,160 --> 00:58:27,160

samples it's recommended that the field

1262

00:58:31,559 --> 00:58:29,170

investigator gather three sets if

1263

00:58:33,329 --> 00:58:31,569

possible and then all the samples

1264

00:58:36,120 --> 00:58:33,339

secured and they're sealed sample

1265

00:58:38,579 --> 00:58:36,130

containers and to make sure the chain of

1266

00:58:39,089 --> 00:58:38,589

custody documents were created and

1267

00:58:42,660 --> 00:58:39,099

maintained

1268

00:58:44,609 --> 00:58:42,670

at each handoff of those samples then

1269

00:58:47,969 --> 00:58:44,619

one set of samples is always sent to a

1270

00:58:49,979 --> 00:58:47,979

certain person in Missouri and she would

1271

00:58:52,859 --> 00:58:49,989

be contacted for specifics before we

1272

00:58:54,539 --> 00:58:52,869

send the samples a second set of samples

1273

00:58:57,029 --> 00:58:54,549

would be kept by the state director for

1274

00:58:58,890 --> 00:58:57,039

safekeeping and if a third set was

1275

00:59:02,130 --> 00:58:58,900

possible it should be kept by the lead

1276

00:59:03,989 --> 00:59:02,140

fi the field investigator so these extra

1277

00:59:05,549 --> 00:59:03,999

two sets of samples are to be held in

1278

00:59:09,029 --> 00:59:05,559

case anything should happen the first

1279

00:59:10,949 --> 00:59:09,039

set sent to the lab in Missouri and then

1280

00:59:12,870 --> 00:59:10,959

he said also if it becomes necessary or

1281

00:59:15,689 --> 00:59:12,880

just desirable to have a second lab

1282

00:59:18,749 --> 00:59:15,699

examine the samples the set held by the

1283

00:59:21,329 --> 00:59:18,759

field investigator should be sent if the

1284

00:59:23,999 --> 00:59:21,339

third set is not needed once the case is

1285

00:59:26,819 --> 00:59:24,009

completed the third set is forwarded to

1286

00:59:28,859 --> 00:59:26,829

MUFON headquarters so they want to just

1287

00:59:32,219 --> 00:59:28,869

make sure that the chain of custody is

1288

00:59:36,660 --> 00:59:32,229

maintained in all cases here we're going

1289

00:59:38,130 --> 00:59:36,670

to move on to a very serious part not

1290

00:59:40,140 --> 00:59:38,140

that this whole thing hasn't been very

1291

00:59:42,870 --> 00:59:40,150

serious but this might this part is even

1292

00:59:45,449 --> 00:59:42,880

more serious regarding the boot camp and

1293

00:59:49,439 --> 00:59:45,459

that is talking about folks who have

1294

00:59:52,859 --> 00:59:49,449

been traumatized by experiences they

1295

00:59:56,579 --> 00:59:52,869

believe have to do with et related

1296

00:59:59,249 --> 00:59:56,589

contact when you have a witness you're

1297

01:00:04,739 --> 00:59:59,259

talking to who feels that they have been

1298

01:00:06,930 --> 01:00:04,749

deeply traumatized what do you do anyone

1299

01:00:11,569 --> 01:00:06,940

and be sure to please say your name when

1300

01:00:15,599 --> 01:00:11,579

you're introducing the topic okay Jim

1301

01:00:17,969 --> 01:00:15,609

you're talking about cases and that

1302

01:00:20,189 --> 01:00:17,979

would be of course referred to the

1303

01:00:23,689 --> 01:00:20,199

experience or research team at this

1304

01:00:28,079 --> 01:00:23,699

point which is the ERT I here in Arizona

1305

01:00:33,959 --> 01:00:28,089

Gwen is on that team and so maybe Gwen

1306

01:00:37,680 --> 01:00:33,969

can answer some of that okay hi yeah I'm

1307

01:00:41,309 --> 01:00:37,690

glad to speak to that a little bit the

1308

01:00:42,809 --> 01:00:41,319

field investigator is sometimes the

1309

01:00:45,749 --> 01:00:42,819

first individual who comes in contact

1310

01:00:49,160 --> 01:00:45,759

with that person it depends on how an

1311

01:00:50,990 --> 01:00:49,170

individual comes to MUFON if they have a

1312

01:00:54,079 --> 01:00:51,000

writing that they would like to report

1313

01:00:56,030 --> 01:00:54,089

they can go through the CMS and they can

1314

01:00:58,309 --> 01:00:56,040

request to have a field investigator

1315

01:01:01,670 --> 01:00:58,319

assigned for their sighting to be

1316

01:01:05,089 --> 01:01:01,680

investigated or they have an option they

1317

01:01:07,520 --> 01:01:05,099

can also go in through another way if

1318

01:01:09,799 --> 01:01:07,530

they don't have a specific sighting but

1319

01:01:13,010 --> 01:01:09,809

they believe they have had a contact

1320

01:01:15,140 --> 01:01:13,020

experience of some kind then they can

1321

01:01:17,660 --> 01:01:15,150

make contact with the experienter

1322

01:01:21,620 --> 01:01:17,670

research team and they will come through

1323

01:01:24,559 --> 01:01:21,630

to the team that I work with and we do

1324

01:01:27,559 --> 01:01:24,569

not do investigations in the same way

1325

01:01:30,470 --> 01:01:27,569

that the field investigators do the

1326

01:01:34,039 --> 01:01:30,480

purpose of the ERT or the experience or

1327

01:01:37,640 --> 01:01:34,049

research team is to give support to

1328

01:01:39,740 --> 01:01:37,650

these individuals I'm sure as you can

1329

01:01:42,530 --> 01:01:39,750

imagine people who have these

1330

01:01:45,230 --> 01:01:42,540

experiences experiences often don't have

1331

01:01:47,359 --> 01:01:45,240

anybody else to talk to and so there

1332

01:01:49,309 --> 01:01:47,369

there really need help and guidance and

1333

01:01:52,010 --> 01:01:49,319

you know what to do with what's happened

1334

01:01:53,930 --> 01:01:52,020

to them many of the members of the

1335

01:01:56,870 --> 01:01:53,940

experience or research team have had

1336

01:01:58,849 --> 01:01:56,880

training in this particular area I am an

1337

01:02:00,740 --> 01:01:58,859

experienced her therapist - certified

1338

01:02:02,599 --> 01:02:00,750

hypnotherapist and I've been working

1339

01:02:05,299 --> 01:02:02,609

face-to-face and in groups with

1340

01:02:09,349 --> 01:02:05,309

experiencers for about 12 years doing

1341

01:02:12,099 --> 01:02:09,359

this work so I do that kind of work with

1342

01:02:15,440 --> 01:02:12,109

the experience - research team as well

1343

01:02:17,450 --> 01:02:15,450

we are when someone comes in to us then

1344

01:02:20,089 --> 01:02:17,460

they are assigned to one of the members

1345

01:02:22,490 --> 01:02:20,099

of the team we contact that person and

1346

01:02:25,190 --> 01:02:22,500

we spot we talk with them we listen to

1347

01:02:28,809 --> 01:02:25,200

them we are there to give them support

1348

01:02:35,680 --> 01:02:28,819

and to give them information if we can

1349

01:02:39,770 --> 01:02:35,690

MUFON maintains a list of individuals

1350

01:02:41,990 --> 01:02:39,780

therapists and groups that have gone

1351
01:02:45,410 --> 01:02:42,000
through MUFON they have been vetted they

1352
01:02:48,620 --> 01:02:45,420
have been approved by MUFON and we are

1353
01:02:51,710 --> 01:02:48,630
able to take individuals from that list

1354
01:02:54,680 --> 01:02:51,720
and refer them to these experiences who

1355
01:02:59,059 --> 01:02:54,690
experiencers who are contacting us so if

1356
01:03:01,430 --> 01:02:59,069
someone contacts us from Arkansas and I

1357
01:03:03,079 --> 01:03:01,440
speak with them then I can go to muffins

1358
01:03:04,969 --> 01:03:03,089
list and I can look

1359
01:03:08,239 --> 01:03:04,979
see if there's any a group or an

1360
01:03:10,160 --> 01:03:08,249
experience or therapist in their area of

1361
01:03:12,650 --> 01:03:10,170
Arkansas and I can give them that

1362
01:03:15,579 --> 01:03:12,660
information so then if they want to they

1363
01:03:20,079 --> 01:03:15,589

can make connection with those with that

1364

01:03:23,599 --> 01:03:20,089

so what we do is listen we support and

1365

01:03:26,630 --> 01:03:23,609

then we help to try to sort of hook them

1366

01:03:29,359 --> 01:03:26,640

up with with groups or therapists in

1367

01:03:31,519 --> 01:03:29,369

their area of the country where they can

1368

01:03:35,209 --> 01:03:31,529

get the help face-to-face help that they

1369

01:03:39,170 --> 01:03:35,219

really need thank you very much for that

1370

01:03:43,219 --> 01:03:39,180

I wanted to ask Sharon Jackson the

1371

01:03:45,079 --> 01:03:43,229

cydonia MUFON director when you have an

1372

01:03:49,430 --> 01:03:45,089

individual who comes to you where you're

1373

01:03:52,549 --> 01:03:49,440

at in Sedona who do you assign to that

1374

01:03:56,779 --> 01:03:52,559

witness who feels that they have had a

1375

01:04:01,130 --> 01:03:56,789

traumatic situation occur to them well

1376

01:04:03,529 --> 01:04:01,140

first of all I listen and that is so

1377

01:04:06,529 --> 01:04:03,539

important because frequently these

1378

01:04:09,680 --> 01:04:06,539

people have had no one to share their

1379

01:04:13,029 --> 01:04:09,690

story with and no one who believes them

1380

01:04:16,690 --> 01:04:13,039

so it is so important just to listen and

1381

01:04:21,469 --> 01:04:16,700

then after I listen I can suggest that

1382

01:04:25,279 --> 01:04:21,479

they get in contact with when there is a

1383

01:04:28,279 --> 01:04:25,289

channel through CMS for them to get in

1384

01:04:34,089 --> 01:04:28,289

in contact with a experienced or

1385

01:04:38,959 --> 01:04:34,099

research team so I okay psychiatric

1386

01:04:43,209 --> 01:04:38,969

experience mm-hmm as a nurse and and I

1387

01:04:45,709 --> 01:04:43,219

do know that listening is just the key

1388

01:04:48,589 --> 01:04:45,719

that's wonderful thank you very much for

1389

01:04:51,109 --> 01:04:48,599

contributing to that topic John Dover

1390

01:04:53,779 --> 01:04:51,119

wanted to ask you you've been involved

1391

01:04:56,599 --> 01:04:53,789

in investigations of all kinds of for

1392

01:04:58,910 --> 01:04:56,609

decades now when you had a witness of

1393

01:05:01,789 --> 01:04:58,920

any kind regarding any kind of case and

1394

01:05:06,259 --> 01:05:01,799

they were severely traumatized what did

1395

01:05:09,079 --> 01:05:06,269

you do well in the case of a severely

1396

01:05:12,140 --> 01:05:09,089

traumatized witness we would try to get

1397

01:05:15,680 --> 01:05:12,150

them some kind of help whether it was

1398

01:05:20,059 --> 01:05:15,690

through a local hospital

1399

01:05:23,299 --> 01:05:20,069

you know however that happens in the

1400

01:05:26,630 --> 01:05:23,309

case of MUFON they have the ERT team

1401

01:05:30,880 --> 01:05:26,640

that we would refer to refer them to but

1402

01:05:35,089 --> 01:05:30,890

a lot of times it's just like they said

1403

01:05:37,459 --> 01:05:35,099

and most people are told from a law

1404

01:05:40,009 --> 01:05:37,469

enforcement standpoint oh we don't do

1405

01:05:43,489 --> 01:05:40,019

that you know or or they look at you

1406

01:05:46,700 --> 01:05:43,499

like you're crazy and I think my

1407

01:05:50,289 --> 01:05:46,710

department was probably the only one to

1408

01:05:53,180 --> 01:05:50,299

start with in the nation that actually

1409

01:05:55,370 --> 01:05:53,190

told its officers you will investigate

1410

01:05:57,950 --> 01:05:55,380

these cases you will treat them

1411

01:06:03,640 --> 01:05:57,960

professionally and you will write the

1412

01:06:06,979 --> 01:06:03,650

reports on them and submit them and so

1413

01:06:09,109 --> 01:06:06,989

there there are always very difficult

1414

01:06:13,009 --> 01:06:09,119

cases but I've had people talking to me

1415

01:06:15,289 --> 01:06:13,019

that have broken down in tears and and

1416

01:06:18,469 --> 01:06:15,299

told me that nobody else would listen to

1417

01:06:21,140 --> 01:06:18,479

them and just listening to them really

1418

01:06:24,140 --> 01:06:21,150

really helps have there ever been any

1419

01:06:29,779 --> 01:06:24,150

cases this question is to everyone on

1420

01:06:34,160 --> 01:06:29,789

the panel that have appeared to not be

1421

01:06:38,239 --> 01:06:34,170

real authentic but then you change your

1422

01:06:40,609 --> 01:06:38,249

mind and you realize that the case that

1423

01:06:44,059 --> 01:06:40,619

you were helping to work on with this

1424

01:06:46,660 --> 01:06:44,069

witness turned out to have some very

1425

01:06:53,589 --> 01:06:46,670

authentic angles to it

1426

01:06:56,269 --> 01:06:53,599

anyone well this is Mark I'll just say

1427

01:06:59,029 --> 01:06:56,279

usually it's the opposite direction for

1428

01:07:01,370 --> 01:06:59,039

me I went to every case thinking okay is

1429

01:07:02,839 --> 01:07:01,380

this this possibly a real thing and then

1430

01:07:06,229 --> 01:07:02,849

finding out at the end of the day that

1431

01:07:19,430 --> 01:07:06,239

it's not I've never seen it from the

1432

01:07:21,289 --> 01:07:19,440

opposite side personally like that okay

1433

01:07:23,329 --> 01:07:21,299

great thank you and the other person who

1434

01:07:29,560 --> 01:07:23,339

was wanting to speak go ahead please do

1435

01:07:36,349 --> 01:07:33,290

okay I wanted to ask everybody about the

1436

01:07:38,630 --> 01:07:36,359

cases they have had can anybody please

1437

01:07:41,840 --> 01:07:38,640

talk about a case that they feel is okay

1438

01:07:44,980 --> 01:07:41,850

to talk about as an example regarding an

1439

01:07:53,990 --> 01:07:44,990

authentic case they think they have had

1440

01:07:57,040 --> 01:07:54,000

the opportunity to investigate this is

1441

01:07:59,990 --> 01:07:57,050

Shane I've got one okay Shane thank you

1442

01:08:05,390 --> 01:08:00,000

this was a case actually that ended up

1443

01:08:08,060 --> 01:08:05,400

in the 2017 UFO case book for MUFON it

1444

01:08:10,190 --> 01:08:08,070

was case in the Grand Canyon and a

1445

01:08:14,060 --> 01:08:10,200

couple were hiking in the bottom of the

1446

01:08:16,970 --> 01:08:14,070

canyon one night and it was course

1447

01:08:20,450 --> 01:08:16,980

extremely remote in that area and they

1448

01:08:24,650 --> 01:08:20,460

saw two objects that flew from above the

1449

01:08:27,640 --> 01:08:24,660

canyon walls down below the canyon walls

1450

01:08:31,630 --> 01:08:27,650

making no noise strange lights

1451

01:08:34,789 --> 01:08:31,640

performance that was highly unusual and

1452

01:08:37,789 --> 01:08:34,799

through throughout investigation

1453

01:08:40,130 --> 01:08:37,799

determined you know drones are illegal

1454

01:08:43,729 --> 01:08:40,140

in the area and they're watched for

1455

01:08:45,229 --> 01:08:43,739

quite aptly by the Forest Service and

1456

01:08:48,289 --> 01:08:45,239

just you know all these other things

1457

01:08:51,320 --> 01:08:48,299

sort of a checklist when we do do a case

1458

01:08:52,940 --> 01:08:51,330

you you eliminate the most obvious all

1459

01:08:58,670 --> 01:08:52,950

the way down ultimately

1460

01:09:00,650 --> 01:08:58,680

we turned it in as an unknown thank you

1461

01:09:04,760 --> 01:09:00,660

very much for that and was that Sharon

1462

01:09:07,610 --> 01:09:04,770

who was talking by the way yes sorry

1463

01:09:13,220 --> 01:09:07,620

Sharon please do go ahead thank you well

1464

01:09:17,510 --> 01:09:13,230

one of my very first cases as an SI was

1465

01:09:22,729 --> 01:09:17,520

with a minor who was in the Bradshaw's

1466

01:09:24,499 --> 01:09:22,739

and he was mining at night and it was

1467

01:09:28,840 --> 01:09:24,509

about 1 o'clock in the morning he came

1468

01:09:31,789 --> 01:09:28,850

down a dirt road trying to go home and

1469

01:09:36,289 --> 01:09:31,799

ended up with red orb

1470

01:09:39,410 --> 01:09:36,299

following his car and it scared him very

1471

01:09:42,830 --> 01:09:39,420

badly so he came to a little town called

1472

01:09:45,770 --> 01:09:42,840

Congress and at one o'clock in the

1473

01:09:51,850 --> 01:09:45,780

morning Congress is a crossroads so no

1474

01:09:55,640 --> 01:09:51,860

one is awake and stirring and this thing

1475

01:09:58,310 --> 01:09:55,650

hovered on the hood of his car and he

1476

01:10:01,070 --> 01:09:58,320

felt like he was being watched he felt

1477

01:10:07,940 --> 01:10:01,080

like there was intelligence behind this

1478

01:10:14,780 --> 01:10:07,950

and the poor man was so frightened that

1479

01:10:18,020 --> 01:10:14,790

he wet his pants so I investigated along

1480

01:10:21,010 --> 01:10:18,030

with another investigator and we both

1481

01:10:26,030 --> 01:10:21,020

felt that this was an authentic case it

1482

01:10:28,370 --> 01:10:26,040

ended up being unidentified thank you

1483

01:10:31,310 --> 01:10:28,380

very much for that part of what MUFON

1484

01:10:36,200 --> 01:10:31,320

investigates also is orb activity or

1485

01:10:38,270 --> 01:10:36,210

orbs is that correct yet why and this is

1486

01:10:41,390 --> 01:10:38,280

for yourself Sharon and anybody else who

1487

01:10:42,490 --> 01:10:41,400

wants to contribute to this topic why is

1488

01:10:50,050 --> 01:10:42,500

that

1489

01:11:00,080 --> 01:10:55,220

John Dover in in our investigations

1490

01:11:04,430 --> 01:11:00,090

we've seen a progression we've seen dis

1491

01:11:07,940 --> 01:11:04,440

or the the typical flying saucer we've

1492

01:11:11,870 --> 01:11:07,950

seen cases involving cigar shaped

1493

01:11:15,610 --> 01:11:11,880

objects both large and small we've seen

1494

01:11:20,600 --> 01:11:15,620

other cases involving

1495

01:11:25,100 --> 01:11:20,610

DeltaWing craft or triangles we've even

1496

01:11:28,400 --> 01:11:25,110

seen squares we started to see more and

1497

01:11:32,300 --> 01:11:28,410

more orbs and many of these were

1498

01:11:36,050 --> 01:11:32,310

actually it appeared to be under

1499

01:11:36,820 --> 01:11:36,060

intelligent control the direction they

1500

01:11:40,220 --> 01:11:36,830

were going

1501
01:11:43,900 --> 01:11:40,230
hugging close to the ground stopping and

1502
01:11:48,740 --> 01:11:43,910
and you know basically looking at people

1503
01:11:51,570 --> 01:11:48,750
or chasing them away from areas and so

1504
01:11:54,180 --> 01:11:51,580
it becomes a whole subset

1505
01:12:01,620 --> 01:11:54,190
of the different types of craft that are

1506
01:12:04,740 --> 01:12:01,630
encountered in UFO cases great thank you

1507
01:12:08,760 --> 01:12:04,750
very much for that Jim and Stacey was

1508
01:12:11,100 --> 01:12:08,770
going to ask you a wide why do you feel

1509
01:12:15,420 --> 01:12:11,110
orbs are important for MUFON to

1510
01:12:17,820 --> 01:12:15,430
investigate well this is Jim I orbs have

1511
01:12:22,470 --> 01:12:17,830
not always been something that move up

1512
01:12:25,140 --> 01:12:22,480
bothers to investigate orbs are one of

1513
01:12:29,220 --> 01:12:25,150

those things that kind of urge or kind

1514

01:12:32,340 --> 01:12:29,230

of kind of go between what's paranormal

1515

01:12:35,040 --> 01:12:32,350

and what's actually physical science

1516

01:12:37,580 --> 01:12:35,050

that were that were investigating but as

1517

01:12:41,370 --> 01:12:37,590

John Dober had just mentioned that

1518

01:12:42,360 --> 01:12:41,380

sometimes these orbs display intelligent

1519

01:12:46,650 --> 01:12:42,370

control

1520

01:12:48,420 --> 01:12:46,660

and so therefore we you know we we've

1521

01:12:50,130 --> 01:12:48,430

we've kind of picked it up over the

1522

01:12:52,920 --> 01:12:50,140

years is something that we're going to

1523

01:12:55,220 --> 01:12:52,930

investigate MUFON has been in a constant

1524

01:12:57,270 --> 01:12:55,230

state of evolution for 50 years and

1525

01:13:00,120 --> 01:12:57,280

there was a time we would have never

1526
01:13:01,920 --> 01:13:00,130
touched a report of an orb because we

1527
01:13:07,730 --> 01:13:01,930
would have just sort of well that's not

1528
01:13:10,260 --> 01:13:07,740
really a UFO but since they do display

1529
01:13:14,300 --> 01:13:10,270
intelligent control and I think that is

1530
01:13:17,670 --> 01:13:14,310
probably the only reason we even bother

1531
01:13:19,020 --> 01:13:17,680
investigating orbs but orbs Azure it's

1532
01:13:21,960 --> 01:13:19,030
kind of a strange little thing because

1533
01:13:24,390 --> 01:13:21,970
many times people will see orbs in their

1534
01:13:26,400 --> 01:13:24,400
photographs not necessarily with their

1535
01:13:28,170 --> 01:13:26,410
own with their naked eye they'll see

1536
01:13:31,500 --> 01:13:28,180
them in photographs that show up later

1537
01:13:35,400 --> 01:13:31,510
on mark will tell you that there's been

1538
01:13:39,000 --> 01:13:35,410

so many photographs admitted t to move

1539

01:13:41,910 --> 01:13:39,010

on where there's been an over you know

1540

01:13:43,770 --> 01:13:41,920

and it turned out that it was a some

1541

01:13:47,640 --> 01:13:43,780

sort of uh you know a camera the camera

1542

01:13:50,280 --> 01:13:47,650

anomaly uh a lot of times folks will use

1543

01:13:51,840 --> 01:13:50,290

the flash and what that will do is

1544

01:13:53,970 --> 01:13:51,850

there'll be little dust or dirt

1545

01:13:56,100 --> 01:13:53,980

particles in the air and they'll reflect

1546

01:13:58,830 --> 01:13:56,110

back very brightly look like orbs that

1547

01:14:00,370 --> 01:13:58,840

happen yeah and I'm sure Mark probably

1548

01:14:03,280 --> 01:14:00,380

has some has

1549

01:14:06,250 --> 01:14:03,290

a good take on an orbs I'm sure he's

1550

01:14:08,500 --> 01:14:06,260

done his fair share of investigating

1551

01:14:12,400 --> 01:14:08,510

photographs with orbs in my correct mark

1552

01:14:14,200 --> 01:14:12,410

that is correct Jim I have and and as

1553

01:14:15,520 --> 01:14:14,210

Frank just said you know it the bottom

1554

01:14:16,720 --> 01:14:15,530

line is that if you have the flash I

1555

01:14:19,240 --> 01:14:16,730

mean you take a picture at night and aim

1556

01:14:23,680 --> 01:14:19,250

it up into the sky I guarantee you're

1557

01:14:25,360 --> 01:14:23,690

gonna get beautiful orbs and I produced

1558

01:14:27,190 --> 01:14:25,370

many photographs when people show me a

1559

01:14:28,780 --> 01:14:27,200

photograph I don't just make

1560

01:14:31,480 --> 01:14:28,790

pronouncements as to what I think it is

1561

01:14:33,190 --> 01:14:31,490

I actually reproduce it if I can and

1562

01:14:35,230 --> 01:14:33,200

then I send them that photograph and say

1563

01:14:37,720 --> 01:14:35,240

well I took this and and since it looks

1564

01:14:39,640 --> 01:14:37,730

just like yours you have to have better

1565

01:14:42,340 --> 01:14:39,650

data to convince me that it's not just

1566

01:14:45,430 --> 01:14:42,350

this see I mean that's the diligence you

1567

01:14:47,500 --> 01:14:45,440

have to do we see and and the folks will

1568

01:14:48,490 --> 01:14:47,510

then move on you know they may hearken

1569

01:14:52,240 --> 01:14:48,500

to that very well

1570

01:14:54,070 --> 01:14:52,250

so yes orbs can be flash artifacts

1571

01:14:55,420 --> 01:14:54,080

absolutely right wanted to talk to you

1572

01:14:58,090 --> 01:14:55,430

about something mark you and I have

1573

01:15:00,520 --> 01:14:58,100

talked about at length both on a show

1574

01:15:04,380 --> 01:15:00,530

and off the show and that is regarding

1575

01:15:07,200 --> 01:15:04,390

up in the sky satellites going around

1576
01:15:09,670 --> 01:15:07,210
sometimes moving sometimes not and I

1577
01:15:12,640 --> 01:15:09,680
wanted to couple that topic with

1578
01:15:16,740 --> 01:15:12,650
something that does happen and that is

1579
01:15:23,140 --> 01:15:16,750
folks who have tours around the world

1580
01:15:25,270 --> 01:15:23,150
who are dedicated to their guests

1581
01:15:27,130 --> 01:15:25,280
looking up in the sky and looking at

1582
01:15:30,340 --> 01:15:27,140
hopefully what they what they hope to

1583
01:15:34,480 --> 01:15:30,350
see is UFO activity when in when in

1584
01:15:38,620 --> 01:15:34,490
actuality they're they're looking at

1585
01:15:40,600 --> 01:15:38,630
satellites now one thing we also wanted

1586
01:15:43,390 --> 01:15:40,610
to make clear on the show to everybody

1587
01:15:46,900 --> 01:15:43,400
is look up satellite activity look up

1588
01:15:49,090 --> 01:15:46,910

apps that you can good apps that you can

1589

01:15:51,730 --> 01:15:49,100

use to find out which satellites are in

1590

01:15:53,860 --> 01:15:51,740

the sky that's fine but then also know

1591

01:15:56,470 --> 01:15:53,870

that there are top-secret satellites

1592

01:15:58,750 --> 01:15:56,480

that are used that will not be listed on

1593

01:16:00,550 --> 01:15:58,760

those apps so just because it's not

1594

01:16:02,590 --> 01:16:00,560

listed in the app and you're looking at

1595

01:16:04,210 --> 01:16:02,600

the sky going oh wow that's not listed

1596

01:16:07,060 --> 01:16:04,220

in my satellite app doesn't mean it's

1597

01:16:09,310 --> 01:16:07,070

not a satellite can you please let us

1598

01:16:10,240 --> 01:16:09,320

know what your personal your perspective

1599

01:16:13,000 --> 01:16:10,250

is on that topic

1600

01:16:15,819 --> 01:16:13,010

sure I've actually been

1601

01:16:17,799 --> 01:16:15,829

as a trying to be a silent observer on

1602

01:16:20,620 --> 01:16:17,809

some of these outings I've actually gone

1603

01:16:22,930 --> 01:16:20,630

on these outings and I just can't be

1604

01:16:25,810 --> 01:16:22,940

quiet sometimes because when I hear the

1605

01:16:29,049 --> 01:16:25,820

person leading the outing giving really

1606

01:16:31,419 --> 01:16:29,059

really incorrect information you know as

1607

01:16:34,359 --> 01:16:31,429

we know it or saying things that aren't

1608

01:16:36,669 --> 01:16:34,369

correct I I tend to say I can't let this

1609

01:16:38,080 --> 01:16:36,679

go huh and you know that's a fault of

1610

01:16:40,270 --> 01:16:38,090

mine you know I want it correct but I

1611

01:16:41,799 --> 01:16:40,280

gently do it and I do it aside Oh out of

1612

01:16:44,259 --> 01:16:41,809

the public view I don't want them to be

1613

01:16:46,029 --> 01:16:44,269

embarrassed because it but the problem I

1614

01:16:47,620 --> 01:16:46,039

have is if you're charging someone to

1615

01:16:49,930 --> 01:16:47,630

come out and and you're guaranteeing

1616

01:16:51,640 --> 01:16:49,940

them that you're gonna see UFOs you're

1617

01:16:53,439 --> 01:16:51,650

already studying up a bad premise and

1618

01:16:56,879 --> 01:16:53,449

and that's not good

1619

01:16:59,259 --> 01:16:56,889

there was a guy who did I was at a

1620

01:17:01,569 --> 01:16:59,269

conference talk in Las Vegas and I

1621

01:17:03,759 --> 01:17:01,579

talked about these objects in the sky

1622

01:17:05,439 --> 01:17:03,769

and I demonstrated how they could

1623

01:17:08,740 --> 01:17:05,449

actually be bats and insects being

1624

01:17:10,330 --> 01:17:08,750

caught in the infrared as the cameras

1625

01:17:12,069 --> 01:17:10,340

looking up because infrareds a new

1626

01:17:13,589 --> 01:17:12,079

technology for most people they it's

1627

01:17:16,720 --> 01:17:13,599

been around for many many years decades

1628

01:17:18,580 --> 01:17:16,730

upon decades but not many people get to

1629

01:17:19,839 --> 01:17:18,590

actually experiment with it play with it

1630

01:17:22,330 --> 01:17:19,849

so when they see things in the sky they

1631

01:17:25,149 --> 01:17:22,340

look god well there's one guy he was

1632

01:17:27,790 --> 01:17:25,159

charging people upwards of 50 to \$75 a

1633

01:17:29,859 --> 01:17:27,800

head and taking out 25 or 30 people at a

1634

01:17:32,680 --> 01:17:29,869

time and quote-unquote guaranteeing them

1635

01:17:34,810 --> 01:17:32,690

that they would see UFOs and I didn't

1636

01:17:35,919 --> 01:17:34,820

take him on directly I just said well

1637

01:17:39,490 --> 01:17:35,929

when they look up in the sky with these

1638

01:17:42,310 --> 01:17:39,500

night-vision scopes you you will most

1639

01:17:46,029 --> 01:17:42,320

likely see insects and bats and we can

1640

01:17:47,649 --> 01:17:46,039

prove that you know and this man took

1641

01:17:49,890 --> 01:17:47,659

such issue with that that he approached

1642

01:17:52,450 --> 01:17:49,900

me to punch me in the face after my talk

1643

01:17:53,770 --> 01:17:52,460

and luckily he didn't and he was

1644

01:17:58,180 --> 01:17:53,780

arrested the next day actually for

1645

01:18:01,509 --> 01:17:58,190

having fun so someone else anyway so you

1646

01:18:03,009 --> 01:18:01,519

can see those with passions fly passions

1647

01:18:05,500 --> 01:18:03,019

fly and for the record I held my ground

1648

01:18:07,060 --> 01:18:05,510

and I didn't change my outlook because I

1649

01:18:09,430 --> 01:18:07,070

knew that in that case I was on the

1650

01:18:11,200 --> 01:18:09,440

right side so but yes there are

1651

01:18:12,970 --> 01:18:11,210

satellites and when the satellite goes

1652

01:18:16,240 --> 01:18:12,980

over you'll see that it will seem to

1653

01:18:17,740 --> 01:18:16,250

fade in and seem to fade out some of the

1654

01:18:19,810 --> 01:18:17,750

erroneous information you get is that

1655

01:18:21,689 --> 01:18:19,820

satellites always go horizon the horizon

1656

01:18:24,220 --> 01:18:21,699

that's absolutely untrue

1657

01:18:26,510 --> 01:18:24,230

another thing you hear about is that

1658

01:18:28,910 --> 01:18:26,520

satellites will

1659

01:18:30,890 --> 01:18:28,920

change colors and if they do change

1660

01:18:32,570 --> 01:18:30,900

colors that UFOs not satellites well

1661

01:18:34,940 --> 01:18:32,580

that's absolutely false they do change

1662

01:18:36,590 --> 01:18:34,950

colors because for them as they're going

1663

01:18:38,180 --> 01:18:36,600

into the dark side of the earth they're

1664

01:18:40,190 --> 01:18:38,190

seeing the sunset from their point of

1665

01:18:42,440 --> 01:18:40,200

view and what colors the sunset orange

1666

01:18:45,110 --> 01:18:42,450

so the satellites tend to get yellowish

1667

01:18:47,690 --> 01:18:45,120

orange just before they fade out every

1668

01:18:49,729 --> 01:18:47,700

single time so you know there's a lot of

1669

01:18:53,330 --> 01:18:49,739

a lot of stuff that people don't

1670

01:18:55,880 --> 01:18:53,340

understand and as you're aware of and is

1671

01:18:57,920 --> 01:18:55,890

your your showing there are a lot of

1672

01:19:00,110 --> 01:18:57,930

applications you can use to actually

1673

01:19:03,020 --> 01:19:00,120

determine whether something is a

1674

01:19:06,200 --> 01:19:03,030

satellite and now I use go Sat watch

1675

01:19:08,390 --> 01:19:06,210

which is actually a iPhone application -

1676

01:19:09,979 --> 01:19:08,400

I know I see you have Geo set watch

1677

01:19:13,340 --> 01:19:09,989

there that the one I have it's called go

1678

01:19:14,959 --> 01:19:13,350

set watch and it will show you where all

1679

01:19:16,750 --> 01:19:14,969

the satellites are over your head and

1680

01:19:18,650 --> 01:19:16,760

will even give you the Iridium flasher

1681

01:19:21,080 --> 01:19:18,660

times when you actually see these

1682

01:19:24,380 --> 01:19:21,090

spectacular flashes in the sky that

1683

01:19:25,910 --> 01:19:24,390

lasts like a second they just get so

1684

01:19:28,070 --> 01:19:25,920

bright sometimes you can see your shadow

1685

01:19:31,400 --> 01:19:28,080

by this flash that's how bright they can

1686

01:19:33,080 --> 01:19:31,410

get and then they go away so yes there's

1687

01:19:34,850 --> 01:19:33,090

a lot of satellites up there and many

1688

01:19:39,110 --> 01:19:34,860

many more thanks to Elon Musk throwing

1689

01:19:41,240 --> 01:19:39,120

up the new network of satellites in fact

1690

01:19:43,250 --> 01:19:41,250

UFO case I got a UFO case just recently

1691

01:19:46,340 --> 01:19:43,260

from someone sent me a photo which was

1692

01:19:50,030 --> 01:19:46,350

really quite well done it was real it

1693

01:19:52,729 --> 01:19:50,040

was 64 dots in the sky all behind each

1694

01:19:54,920 --> 01:19:52,739

other all traveling through the sky it's

1695

01:19:58,430 --> 01:19:54,930

really quite stunning but it's really

1696

01:20:01,040 --> 01:19:58,440

just Elon Musk you know as it was

1697

01:20:02,360 --> 01:20:01,050

launched at the 60 for satellites he was

1698

01:20:05,720 --> 01:20:02,370

putting up there for the internet for

1699

01:20:09,229 --> 01:20:05,730

the world thing very interesting but

1700

01:20:15,590 --> 01:20:09,239

unfortunately very human yeah real quick

1701
01:20:17,870 --> 01:20:15,600
guys Jim just when was it marked that

1702
01:20:20,990 --> 01:20:17,880
they at Starling the Starling mission

1703
01:20:23,180 --> 01:20:21,000
had just launched those satellites we

1704
01:20:27,650 --> 01:20:23,190
had I think we picked up like eight or

1705
01:20:29,120 --> 01:20:27,660
nine cases was it November 11th eight or

1706
01:20:31,550 --> 01:20:29,130
nine cases I mean people thought that

1707
01:20:33,020 --> 01:20:31,560
the Phoenix lights were back they they

1708
01:20:36,740 --> 01:20:33,030
thought all you know all sorts of things

1709
01:20:39,440 --> 01:20:36,750
and yeah but the StarLink mission is

1710
01:20:40,340 --> 01:20:39,450
really gonna gonna complicate things

1711
01:20:44,170 --> 01:20:40,350
here in the next

1712
01:20:46,640 --> 01:20:44,180
few years as far as the sky so

1713
01:20:48,560 --> 01:20:46,650

especially for me I'm an astronomer so

1714

01:20:51,170 --> 01:20:48,570

and I'm building an observatory in

1715

01:20:53,320 --> 01:20:51,180

Arizona right now okay it's gonna be in

1716

01:20:55,840 --> 01:20:53,330

a Sonoran Desert and I guarantee you

1717

01:20:58,580 --> 01:20:55,850

when I look toward the celestial equator

1718

01:21:00,800 --> 01:20:58,590

I'm gonna see a lot of geosynchronous

1719

01:21:02,540 --> 01:21:00,810

satellites in my views and when I look

1720

01:21:04,220 --> 01:21:02,550

elsewhere we're gonna catch a lot going

1721

01:21:06,830 --> 01:21:04,230

through we did it the other night last

1722

01:21:09,770 --> 01:21:06,840

night we streamed for two hours and we

1723

01:21:11,570 --> 01:21:09,780

caught two satellites at a time passing

1724

01:21:14,510 --> 01:21:11,580

through our field some time where they

1725

01:21:16,220 --> 01:21:14,520

StarLink maybe either way they're

1726

01:21:18,920 --> 01:21:16,230

they're stinky link I don't like them

1727

01:21:20,330 --> 01:21:18,930

they ruin our pictures but they take

1728

01:21:22,520 --> 01:21:20,340

away from the data you can get for

1729

01:21:24,910 --> 01:21:22,530

astronomy but that's the real real

1730

01:21:26,720 --> 01:21:24,920

Bugaboo that people have about them I'll

1731

01:21:29,420 --> 01:21:26,730

them to see this guy

1732

01:21:30,950 --> 01:21:29,430

thank you I also looked up satellites

1733

01:21:34,790 --> 01:21:30,960

recently and I was surprised to find

1734

01:21:36,920 --> 01:21:34,800

that there are there is such thing as

1735

01:21:39,470 --> 01:21:36,930

satellites just staying still in the sky

1736

01:21:41,810 --> 01:21:39,480

not all of them do that but there are

1737

01:21:44,090 --> 01:21:41,820

times that satellites will not move yes

1738

01:21:47,300 --> 01:21:44,100

those are the the geosynchronous birds

1739

01:21:49,010 --> 01:21:47,310

and what happens is they're 22,000 miles

1740

01:21:50,960 --> 01:21:49,020

away from the earth in their orbital

1741

01:21:52,730 --> 01:21:50,970

altitude mm-hmm and they have to be that

1742

01:21:54,800 --> 01:21:52,740

far away so that the speed they move in

1743

01:21:58,250 --> 01:21:54,810

their orbit puts them over the same

1744

01:22:01,450 --> 01:21:58,260

exact spot on the earth all right and

1745

01:22:05,570 --> 01:22:01,460

there's others that are anywhere between

1746

01:22:07,460 --> 01:22:05,580

you know 200 nautical miles up and 20 mm

1747

01:22:11,450 --> 01:22:07,470

and these objects depending on where

1748

01:22:13,750 --> 01:22:11,460

they are they could appear to move you

1749

01:22:16,310 --> 01:22:13,760

know at the same speed of the the stars

1750

01:22:21,260 --> 01:22:16,320

as well you know for different reasons

1751
01:22:23,540 --> 01:22:21,270
and so they really can be very oddly and

1752
01:22:26,120 --> 01:22:23,550
that their motion characteristics motion

1753
01:22:28,250 --> 01:22:26,130
characteristics can be pretty odd so and

1754
01:22:30,770 --> 01:22:28,260
we have to take that apart you know now

1755
01:22:32,780 --> 01:22:30,780
I take part in some of these lunar sky

1756
01:22:33,590 --> 01:22:32,790
watches you know pn k space imaging

1757
01:22:35,450 --> 01:22:33,600
great guys

1758
01:22:37,700 --> 01:22:35,460
ok hours of sky through life and we do

1759
01:22:39,080 --> 01:22:37,710
deep sky they do the moon well many

1760
01:22:41,360 --> 01:22:39,090
times you'll see an object cross the

1761
01:22:44,030 --> 01:22:41,370
moon and people say oh look at UFO

1762
01:22:45,710 --> 01:22:44,040
crossing the moon well you can actually

1763
01:22:47,990 --> 01:22:45,720

calculate based on how far it goes

1764

01:22:49,820 --> 01:22:48,000

across the moon what size it is how fast

1765

01:22:52,040 --> 01:22:49,830

and how long it takes to go you can

1766

01:22:54,500 --> 01:22:52,050

actually then figure out just what it is

1767

01:22:56,330 --> 01:22:54,510

you can see oh it's a satellite likely

1768

01:22:58,430 --> 01:22:56,340

particular satellite at this particular

1769

01:23:01,070 --> 01:22:58,440

altitude you have all that information

1770

01:23:03,020 --> 01:23:01,080

you can get and the ones that I like the

1771

01:23:05,210 --> 01:23:03,030

ones that don't match any of that now

1772

01:23:07,910 --> 01:23:05,220

those could be the dark birds the ones

1773

01:23:09,470 --> 01:23:07,920

that are in or DoD tasks the missions

1774

01:23:12,140 --> 01:23:09,480

which you won't get in a general

1775

01:23:15,770 --> 01:23:12,150

catalogue or they can be something more

1776

01:23:18,140 --> 01:23:15,780

right so unfortunately with everything

1777

01:23:19,760 --> 01:23:18,150

out there we're not gonna get a really

1778

01:23:21,980 --> 01:23:19,770

good answer eventually you know maybe

1779

01:23:23,390 --> 01:23:21,990

eventually but not right now because

1780

01:23:25,610 --> 01:23:23,400

everyone's too secretive everyone's

1781

01:23:27,740 --> 01:23:25,620

keeping it all close to the vest thank

1782

01:23:31,100 --> 01:23:27,750

you for that I wanted to talk to the

1783

01:23:33,230 --> 01:23:31,110

team here and the rest of our guests

1784

01:23:35,770 --> 01:23:33,240

about these interesting applications we

1785

01:23:39,560 --> 01:23:35,780

covered this on a show just dedicated to

1786

01:23:41,630 --> 01:23:39,570

UFO tools and applications and other

1787

01:23:43,640 --> 01:23:41,640

items that folks might use for UFO

1788

01:23:45,530 --> 01:23:43,650

investigations I want to go ahead and

1789

01:23:47,780 --> 01:23:45,540

read off what I have in front of me and

1790

01:23:51,290 --> 01:23:47,790

the individual who wrote this up was

1791

01:23:52,670 --> 01:23:51,300

rich Hoffman that is and please correct

1792

01:23:56,150 --> 01:23:52,680

me if I'm saying anything wrong because

1793

01:23:58,640 --> 01:23:56,160

I will probably do that that is the

1794

01:24:00,800 --> 01:23:58,650

theodolite this is an app that has a

1795

01:24:02,960 --> 01:24:00,810

camera records GPS the bearing can

1796

01:24:04,880 --> 01:24:02,970

provide angular size and help compute

1797

01:24:07,100 --> 01:24:04,890

the distance and altitude for a few

1798

01:24:09,470 --> 01:24:07,110

bucks and a rich recommends this over

1799

01:24:12,200 --> 01:24:09,480

the camera on the iPhone still REM this

1800

01:24:13,550 --> 01:24:12,210

is one of among many astronomy tools and

1801
01:24:15,650 --> 01:24:13,560
apps that allows you to determine

1802
01:24:18,950 --> 01:24:15,660
whether the object is a star planet a

1803
01:24:21,890 --> 01:24:18,960
comment and more geo stat watch a geo

1804
01:24:22,580 --> 01:24:21,900
sat watch this are like satellites to

1805
01:24:29,450 --> 01:24:22,590
chant on

1806
01:24:31,250 --> 01:24:29,460
stellarium it's not that accurate we

1807
01:24:32,510 --> 01:24:31,260
actually tested it last night I used to

1808
01:24:33,140 --> 01:24:32,520
let him to control our Observatory

1809
01:24:36,890 --> 01:24:33,150
telescope

1810
01:24:38,360 --> 01:24:36,900
okay it has hooks to do that and on the

1811
01:24:41,900 --> 01:24:38,370
satellites that were shown going through

1812
01:24:43,670 --> 01:24:41,910
the very object we're looking at we're

1813
01:24:49,410 --> 01:24:43,680

not present on the actual photographs so

1814

01:24:53,939 --> 01:24:51,570

it's not a cure it's not the best that

1815

01:24:56,669 --> 01:24:53,949

watch it's actually geo SAT watch it's

1816

01:24:57,750 --> 01:24:56,679

just go sat well that's okay that's okay

1817

01:25:00,419 --> 01:24:57,760

I mean that's for the iPhone that's the

1818

01:25:02,970 --> 01:25:00,429

one that it is and and and that's the

1819

01:25:04,260 --> 01:25:02,980

one that's actually the the the I say

1820

01:25:06,810 --> 01:25:04,270

quintessential app that will tell you

1821

01:25:08,669 --> 01:25:06,820

exactly where things are and I don't see

1822

01:25:11,129 --> 01:25:08,679

on your list I don't see heavens above

1823

01:25:13,050 --> 01:25:11,139

comm if no one has a cell phone they can

1824

01:25:15,359 --> 01:25:13,060

still get all this information heavens

1825

01:25:18,840 --> 01:25:15,369

above comm you can see the satellites

1826

01:25:20,820 --> 01:25:18,850

and get historical data to see if it was

1827

01:25:22,200 --> 01:25:20,830

a satellite that someone saw this is an

1828

01:25:24,419 --> 01:25:22,210

extremely important tool for field

1829

01:25:26,160 --> 01:25:24,429

investigators I saw this thing go right

1830

01:25:27,600 --> 01:25:26,170

across the sky right here when well at

1831

01:25:30,000 --> 01:25:27,610

this time and at that location in the

1832

01:25:32,850 --> 01:25:30,010

sky the field investigate can go right

1833

01:25:34,890 --> 01:25:32,860

to heavens above comm put in that

1834

01:25:36,390 --> 01:25:34,900

historical date and time and see what

1835

01:25:47,240 --> 01:25:36,400

was going through this guy and where at

1836

01:25:51,149 --> 01:25:49,740

what Mark was saying you know he's

1837

01:25:53,220 --> 01:25:51,159

talking about going down all these

1838

01:25:55,770 --> 01:25:53,230

listen at the bootcamp what they did

1839

01:25:59,580 --> 01:25:55,780

provide us with was an investigation

1840

01:26:01,109 --> 01:25:59,590

tools list and when I do my cases I go

1841

01:26:03,750 --> 01:26:01,119

through that and just start at the top

1842

01:26:05,550 --> 01:26:03,760

and just like Mark was saying you you

1843

01:26:07,859 --> 01:26:05,560

kind of rule out things and I just go

1844

01:26:11,070 --> 01:26:07,869

down that list but it includes UFO

1845

01:26:14,490 --> 01:26:11,080

Reporting agencies local media military

1846

01:26:16,220 --> 01:26:14,500

law enforcement airports all that type

1847

01:26:18,959 --> 01:26:16,230

of thing astronomical references

1848

01:26:21,149 --> 01:26:18,969

Geographic and so I just want to say

1849

01:26:23,430 --> 01:26:21,159

that's part of what we do as well as is

1850

01:26:26,520 --> 01:26:23,440

all of those it's not just apps

1851
01:26:28,649 --> 01:26:26,530
sometimes locations internet-based as

1852
01:26:31,260 --> 01:26:28,659
well I'm glad you said that and by the

1853
01:26:33,090 --> 01:26:31,270
way everybody this is your show so

1854
01:26:36,600 --> 01:26:33,100
interrupt me whenever you want because

1855
01:26:38,729 --> 01:26:36,610
it's not about what but I have this

1856
01:26:40,229 --> 01:26:38,739
error me it's about what you have to say

1857
01:26:41,280 --> 01:26:40,239
so please do interrupt and thank you for

1858
01:26:44,189 --> 01:26:41,290
that was a very important contribution

1859
01:26:46,680 --> 01:26:44,199
we appreciate that moving along here to

1860
01:26:48,780 --> 01:26:46,690
flightradar24 determine the aircraft

1861
01:26:50,669 --> 01:26:48,790
overhead Tesla meter leverages iPhone

1862
01:26:54,419 --> 01:26:50,679
Magna meter to measure background

1863
01:26:55,950 --> 01:26:54,429

radiation and then it says there are

1864

01:26:58,140 --> 01:26:55,960

small devices that can be added to your

1865

01:27:00,390 --> 01:26:58,150

smartphone we have I seek thermal

1866

01:27:02,860 --> 01:27:00,400

devices temperature and humidity devices

1867

01:27:05,590 --> 01:27:02,870

radiation detector devices

1868

01:27:08,290 --> 01:27:05,600

heavens above dot-com is what Mark

1869

01:27:10,390 --> 01:27:08,300

Dantonio recommended and I know that

1870

01:27:12,370 --> 01:27:10,400

Mark probably has a grocery list of

1871

01:27:14,590 --> 01:27:12,380

other applications but before I ask

1872

01:27:17,950 --> 01:27:14,600

about that what I was going to ask John

1873

01:27:20,230 --> 01:27:17,960

Dover what applications if any do you

1874

01:27:22,840 --> 01:27:20,240

use on your iPhone or laptop if you're

1875

01:27:25,060 --> 01:27:22,850

doing an investigation of any kind

1876

01:27:27,760 --> 01:27:25,070

whether it be for visual or anything

1877

01:27:30,040 --> 01:27:27,770

else do you use any recording devices to

1878

01:27:32,200 --> 01:27:30,050

record witnesses when they talk really

1879

01:27:34,650 --> 01:27:32,210

any kind of application at all do you

1880

01:27:38,920 --> 01:27:34,660

use any kind of software in your

1881

01:27:41,260 --> 01:27:38,930

investigations and you might have your

1882

01:27:51,670 --> 01:27:41,270

mute my your mic muted just just so you

1883

01:27:56,650 --> 01:27:51,680

know okay it looks like John's

1884

01:27:58,300 --> 01:27:56,660

mic is muted yeah kane any Wells after

1885

01:28:00,610 --> 01:27:58,310

John figures I'll help him out with that

1886

01:28:03,270 --> 01:28:00,620

can canadian anyone else contribute on

1887

01:28:05,920 --> 01:28:03,280

that topic like shane like or Russell

1888

01:28:10,380 --> 01:28:05,930

can you go ahead John alright here John

1889

01:28:14,560 --> 01:28:10,390

Arius okay I figured it out

1890

01:28:16,270 --> 01:28:14,570

okay here's we use every anything and

1891

01:28:21,780 --> 01:28:16,280

everything that we can get our hands on

1892

01:28:25,090 --> 01:28:21,790

to do an investigation we just I mean we

1893

01:28:27,820 --> 01:28:25,100

try to be as thorough as you can with

1894

01:28:31,360 --> 01:28:27,830

with a lot of these cases so we're using

1895

01:28:34,380 --> 01:28:31,370

flight radar we're using star maps you

1896

01:28:41,530 --> 01:28:34,390

know for natural stuff we're using

1897

01:28:46,270 --> 01:28:41,540

satellite trackers and and aside from

1898

01:28:52,480 --> 01:28:46,280

that you know we we also had Believe It

1899

01:28:55,750 --> 01:28:52,490

or Not years before the video cameras

1900

01:28:57,850 --> 01:28:55,760

for police officers were being used you

1901

01:29:02,440 --> 01:28:57,860

could get them miniature versions of

1902

01:29:05,100 --> 01:29:02,450

those through online places like eBay or

1903

01:29:08,500 --> 01:29:05,110

Amazon you could get them through

1904

01:29:12,400 --> 01:29:08,510

Brookstone and they would record for

1905

01:29:15,340 --> 01:29:12,410

about two hours which is about a good

1906

01:29:16,300 --> 01:29:15,350

interview and you could take it and

1907

01:29:18,130 --> 01:29:16,310

download it and

1908

01:29:21,270 --> 01:29:18,140

Dave that interviewed and I've got quite

1909

01:29:24,010 --> 01:29:21,280

a few of those still in my archives so

1910

01:29:26,680 --> 01:29:24,020

we were using video technology a long

1911

01:29:29,200 --> 01:29:26,690

time before anybody else and it actually

1912

01:29:34,300 --> 01:29:29,210

saved some of our officers being accused

1913

01:29:37,600 --> 01:29:34,310

of misconduct so yeah there's there's a

1914

01:29:42,640 --> 01:29:37,610

lot of things out there and they're

1915

01:29:45,700 --> 01:29:42,650

tools you know bottom line your ability

1916

01:29:49,210 --> 01:29:45,710

as an investigator is key everything

1917

01:29:52,240 --> 01:29:49,220

else augments what you have and enhance

1918

01:29:57,670 --> 01:29:52,250

to it thank you for that I think Russell

1919

01:29:59,920 --> 01:29:57,680

and Shayne and I had wanted to I'm sorry

1920

01:30:02,470 --> 01:29:59,930

I had talked about these applications

1921

01:30:04,540 --> 01:30:02,480

and kind of go over a few that might

1922

01:30:07,480 --> 01:30:04,550

work for them that they may have used

1923

01:30:09,580 --> 01:30:07,490

and I was going to ask Russell and then

1924

01:30:12,130 --> 01:30:09,590

Shane Russ do you use any of the

1925

01:30:15,640 --> 01:30:12,140

theodolites tellurium geo SAT watch

1926

01:30:17,860 --> 01:30:15,650

flightradar24 Tesla meter any any

1927

01:30:24,730 --> 01:30:17,870

applications at all on your iPhone or

1928

01:30:27,790 --> 01:30:24,740

your smartphone so to speak one you just

1929

01:30:30,700 --> 01:30:27,800

mentioned the flight radar one I also

1930

01:30:35,470 --> 01:30:30,710

used to learn quite a bit heavens above

1931

01:30:38,080 --> 01:30:35,480

is another one Google Earth you know and

1932

01:30:40,950 --> 01:30:38,090

I just do Google searches to on some of

1933

01:30:44,860 --> 01:30:40,960

the stuff just to see if anything else

1934

01:30:49,650 --> 01:30:44,870

has been reported on verify longitude

1935

01:30:54,040 --> 01:30:49,660

latitude through apps those are the

1936

01:30:56,650 --> 01:30:54,050

primary ones I use okay great thank you

1937

01:30:59,620 --> 01:30:56,660

and Shane do you use any applications on

1938

01:31:00,970 --> 01:30:59,630

your laptop or any of your devices by

1939

01:31:04,990 --> 01:31:00,980

the way just one let our audience know

1940

01:31:08,770 --> 01:31:05,000

Shane actually runs a technology

1941

01:31:11,410 --> 01:31:08,780

department that is in his career so he

1942

01:31:14,590 --> 01:31:11,420

is involved in the realm of technology

1943

01:31:16,960 --> 01:31:14,600

and not saying that you're the expert on

1944

01:31:18,670 --> 01:31:16,970

the panel but I I am saying that you do

1945

01:31:23,470 --> 01:31:18,680

know a little bit about technology so

1946

01:31:27,430 --> 01:31:23,480

you are tech savvy you might have your

1947

01:31:29,870 --> 01:31:27,440

mute mic your mic muted by the way Shane

1948

01:31:36,950 --> 01:31:29,880

that's bad when he just told he's just

1949

01:31:39,729 --> 01:31:36,960

technology guru and it's my committee if

1950

01:31:43,879 --> 01:31:39,739

that happened I did it to him I'm sorry

1951

01:31:47,479 --> 01:31:43,889

okay so uh anyway I wanted to ask if Jim

1952

01:31:50,840 --> 01:31:47,489

Marion or Stacy if they have used any of

1953

01:31:53,419 --> 01:31:50,850

these applications or applications of

1954

01:32:02,090 --> 01:31:53,429

any kind on any devices for any UFO

1955

01:32:06,109 --> 01:32:02,100

related investigations well we have we

1956

01:32:10,970 --> 01:32:06,119

use the Astronomy program all the time

1957

01:32:14,709 --> 01:32:10,980

stellarium I as the state director I

1958

01:32:18,109 --> 01:32:14,719

don't actually do field investigations I

1959

01:32:20,660 --> 01:32:18,119

certainly I handled the administrative

1960

01:32:25,090 --> 01:32:20,670

end of the of the chapter here but maybe

1961

01:32:28,700 --> 01:32:25,100

Maryanne can give a little input on this

1962

01:32:35,149 --> 01:32:28,710

Chad this Maryanne um basically I do

1963

01:32:39,140 --> 01:32:35,159

exactly like Tara you have a list of all

1964

01:32:41,090 --> 01:32:39,150

of the research engines that are better

1965

01:32:44,600 --> 01:32:41,100

available that you just I just go down

1966

01:32:48,260 --> 01:32:44,610

each one Stellarium again the local

1967

01:32:50,060 --> 01:32:48,270

newspaper I get on the the national UFO

1968

01:32:51,649 --> 01:32:50,070

Reporting Center just go down

1969

01:32:54,320 --> 01:32:51,659

chronologically and just see if there's

1970

01:32:56,410 --> 01:32:54,330

anything even on the Internet

1971

01:33:00,680 --> 01:32:56,420

see if there's anything out there that

1972

01:33:02,689 --> 01:33:00,690

that other people might have reported so

1973

01:33:06,290 --> 01:33:02,699

I just again I just go down a list one

1974

01:33:08,390 --> 01:33:06,300

the heavens above I just that was a new

1975

01:33:12,250 --> 01:33:08,400

one for me and that's fantastic and I'm

1976

01:33:15,790 --> 01:33:12,260

definitely adding that to my list oh

1977

01:33:18,080 --> 01:33:15,800

great thank you very much for that input

1978

01:33:21,320 --> 01:33:18,090

mark I know there was something I had

1979

01:33:24,109 --> 01:33:21,330

wanted to talk to you about when you

1980

01:33:26,660 --> 01:33:24,119

have people who have insisted to you in

1981

01:33:34,089 --> 01:33:26,670

the past that they have captured

1982

01:33:36,350 --> 01:33:34,099

possible ET crafts in videos or photos I

1983

01:33:40,160 --> 01:33:36,360

feel like I know you well enough to say

1984

01:33:41,840 --> 01:33:40,170

that you're you're already you

1985

01:33:44,930 --> 01:33:41,850

already have a sense of scrutiny

1986

01:33:46,220 --> 01:33:44,940

building up regarding that but where you

1987

01:33:48,190 --> 01:33:46,230

want to go ahead and apply heavy

1988

01:33:51,440 --> 01:33:48,200

scrutiny to what they're talking about

1989

01:33:53,780 --> 01:33:51,450

but what I wanted to know is if it turns

1990

01:33:55,700 --> 01:33:53,790

out to be a drone and you you can

1991

01:33:58,750 --> 01:33:55,710

absolutely rule everything out and it is

1992

01:34:02,780 --> 01:33:58,760

absolutely a drone how do you prove that

1993

01:34:05,150 --> 01:34:02,790

that it is a drone and it's not anything

1994

01:34:07,370 --> 01:34:05,160

else or in addition to that how do you

1995

01:34:10,190 --> 01:34:07,380

prove it's a satellite and not anything

1996

01:34:13,070 --> 01:34:10,200

else yeah the truth is when you're going

1997

01:34:16,580 --> 01:34:13,080

when you're trying to say prove the

1998

01:34:19,040 --> 01:34:16,590

truth that that's possibly you know a

1999

01:34:20,180 --> 01:34:19,050

drone or not a satellite or something

2000

01:34:21,710 --> 01:34:20,190

like that

2001

01:34:23,660 --> 01:34:21,720

first of all I mean I have a fleet of

2002

01:34:25,370 --> 01:34:23,670

drones you know and one of my Jones is

2003

01:34:27,650 --> 01:34:25,380

in quit equip with the infrared system

2004

01:34:28,630 --> 01:34:27,660

so I can you know find lost kids or do

2005

01:34:30,710 --> 01:34:28,640

you know things like that

2006

01:34:32,330 --> 01:34:30,720

so I'm very familiar with drone

2007

01:34:36,710 --> 01:34:32,340

operations and how they operate how they

2008

01:34:38,780 --> 01:34:36,720

look they fly a certain way some drones

2009

01:34:41,030 --> 01:34:38,790

have wings like planes but other drones

2010

01:34:43,700 --> 01:34:41,040

are quadcopter type things or a

2011

01:34:46,550 --> 01:34:43,710

hexacopter octocopter you know you know

2012

01:34:50,920 --> 01:34:46,560

four six or eight propeller systems

2013

01:34:53,870 --> 01:34:50,930

these things are are really quite

2014

01:34:57,980 --> 01:34:53,880

stunning they do amazing maneuvers they

2015

01:34:59,270 --> 01:34:57,990

act oddly in the sky but you know how do

2016

01:35:03,620 --> 01:34:59,280

you rule them out well you rule them out

2017

01:35:06,020 --> 01:35:03,630

only by how they may look to the eye as

2018

01:35:07,160 --> 01:35:06,030

they move and sometimes I'll take video

2019

01:35:10,520 --> 01:35:07,170

footage of these things moving in the

2020

01:35:12,140 --> 01:35:10,530

sky and I'll accelerate them and by

2021

01:35:14,510 --> 01:35:12,150

accelerating them it picks up some of

2022

01:35:16,190 --> 01:35:14,520

the nuanced motions that you get that

2023

01:35:18,500 --> 01:35:16,200

you miss when it's group moving

2024

01:35:21,380 --> 01:35:18,510

gradually across the sky and that you

2025

01:35:24,290 --> 01:35:21,390

want so she can include flicking thumbs

2026

01:35:25,760 --> 01:35:24,300

on the control sticks as it's moving

2027

01:35:27,830 --> 01:35:25,770

through the sky when they're when it's

2028

01:35:30,980 --> 01:35:27,840

moving they're under human control so

2029

01:35:34,370 --> 01:35:30,990

there's a possibility now of figuring

2030

01:35:36,290 --> 01:35:34,380

out that way as far as a building of

2031

01:35:39,380 --> 01:35:36,300

skepticism I'm not always skeptical

2032

01:35:42,710 --> 01:35:39,390

actually I take every case as if it's an

2033

01:35:43,970 --> 01:35:42,720

actual real sighting and then the data

2034

01:35:46,850 --> 01:35:43,980

speaks for itself

2035

01:35:48,170 --> 01:35:46,860

you know and yeah when they when they

2036

01:35:49,880 --> 01:35:48,180

get the feeling that the data speaking

2037

01:35:51,520 --> 01:35:49,890

for itself and it says ya know this is

2038

01:35:53,430 --> 01:35:51,530

actually just an ordinary object

2039

01:35:55,980 --> 01:35:53,440

potentially

2040

01:35:57,330 --> 01:35:55,990

then my other instincts kick in to say

2041

01:35:58,830 --> 01:35:57,340

okay now you got to prove it and then

2042

01:36:01,410 --> 01:35:58,840

you have to go through the measures to

2043

01:36:02,970 --> 01:36:01,420

try and prove it so like I said look for

2044

01:36:05,400 --> 01:36:02,980

the nuanced motions either in fast

2045

01:36:07,440 --> 01:36:05,410

motion or whatever for like people that

2046

01:36:07,920 --> 01:36:07,450

are running drones and see where it's

2047

01:36:10,080 --> 01:36:07,930

going

2048

01:36:11,820 --> 01:36:10,090

I had one case come in where there were

2049

01:36:14,340 --> 01:36:11,830

these spiraling lights coming out of the

2050

01:36:16,800 --> 01:36:14,350

sky really beautiful and it was real it

2051
01:36:19,970 --> 01:36:16,810
wasn't a hoax and it turned out it was

2052
01:36:22,200 --> 01:36:19,980
skydivers no skydiving into a stadium

2053
01:36:24,240 --> 01:36:22,210
there's several of these cases that came

2054
01:36:25,950 --> 01:36:24,250
through and several of them I they were

2055
01:36:27,390 --> 01:36:25,960
not mine though there was one case that

2056
01:36:29,850 --> 01:36:27,400
came in with it someone sent it's mean

2057
01:36:33,390 --> 01:36:29,860
it was the skydivers and it was just

2058
01:36:34,680 --> 01:36:33,400
like well see there's a lot of things

2059
01:36:36,660 --> 01:36:34,690
that are capable of you know getting

2060
01:36:38,790 --> 01:36:36,670
your attention and now I know that

2061
01:36:40,740 --> 01:36:38,800
skydivers diving in with flares on their

2062
01:36:49,590 --> 01:36:40,750
legs for a long distance can look like

2063
01:36:51,600 --> 01:36:49,600

really oddly shaped UFOs so yeah thank

2064

01:36:54,540 --> 01:36:51,610

you very much for letting us know about

2065

01:36:56,430 --> 01:36:54,550

that I really appreciate that and wanted

2066

01:36:59,610 --> 01:36:56,440

to go ahead and start wrapping up the

2067

01:37:01,590 --> 01:36:59,620

show and are there any last parting

2068

01:37:09,900 --> 01:37:01,600

statements that anybody wanted to make

2069

01:37:14,840 --> 01:37:09,910

regarding the show okay we'll get back

2070

01:37:18,260 --> 01:37:14,850

to Mary go ahead rust sorry okay

2071

01:37:21,840 --> 01:37:18,270

regarding the boot camp one of the

2072

01:37:24,030 --> 01:37:21,850

advantages to attending is you make a

2073

01:37:26,940 --> 01:37:24,040

lot of friends across the country and

2074

01:37:29,670 --> 01:37:26,950

with that you also establish your own

2075

01:37:35,130 --> 01:37:29,680

personal network of other investigators

2076

01:37:38,220 --> 01:37:35,140

and and investigators talk to each other

2077

01:37:41,250 --> 01:37:38,230

we don't necessarily share names of you

2078

01:37:43,790 --> 01:37:41,260

know the people are stuff like that but

2079

01:37:46,260 --> 01:37:43,800

we we report what happened and

2080

01:37:48,390 --> 01:37:46,270

particularly ones that are interesting

2081

01:37:50,880 --> 01:37:48,400

or odd and you can gain a lot of

2082

01:37:52,590 --> 01:37:50,890

information from clear across the

2083

01:37:54,540 --> 01:37:52,600

country or Canada

2084

01:37:56,970 --> 01:37:54,550

simply by attending and making

2085

01:38:02,760 --> 01:37:56,980

environment it's an establishing your

2086

01:38:06,220 --> 01:38:02,770

own Network and because this this topic

2087

01:38:09,750 --> 01:38:06,230

is always full of surprises

2088

01:38:12,760 --> 01:38:09,760

and it's your forever learning so

2089

01:38:17,080 --> 01:38:12,770

attending the bootcamp I've been to

2090

01:38:20,229 --> 01:38:17,090

three now I was I was a student in the

2091

01:38:21,720 --> 01:38:20,239

first gentleman his last one I saw

2092

01:38:25,330 --> 01:38:21,730

through it I photographed everything

2093

01:38:29,140 --> 01:38:25,340

I've learned something from every single

2094

01:38:31,030 --> 01:38:29,150

one of them and and and I've established

2095

01:38:35,500 --> 01:38:31,040

some great friendships but also I've

2096

01:38:37,570 --> 01:38:35,510

established networks of learning so that

2097

01:38:39,250 --> 01:38:37,580

is important that you did that thank you

2098

01:38:41,439 --> 01:38:39,260

very much for having done that I know

2099

01:38:43,060 --> 01:38:41,449

Maryann wanted to speak please go ahead

2100

01:38:46,060 --> 01:38:43,070

by the way I let Russ through just

2101

01:38:47,919 --> 01:38:46,070

because it's hard for him to hear at

2102

01:38:50,380 --> 01:38:47,929

times when were saying something so I

2103

01:38:51,760 --> 01:38:50,390

apologize I meant for you to go ahead

2104

01:38:53,680 --> 01:38:51,770

and go first but it was just due to a

2105

01:38:55,300 --> 01:38:53,690

tech issue that I let him go please go

2106

01:38:57,160 --> 01:38:55,310

ahead Maryann we want to hear what you

2107

01:39:01,780 --> 01:38:57,170

have to say that's quite all right

2108

01:39:03,400 --> 01:39:01,790

chant I love Russ he was my training

2109

01:39:05,560 --> 01:39:03,410

field investigator and he was just

2110

01:39:07,750 --> 01:39:05,570

absolutely amazing I've learned so much

2111

01:39:10,000 --> 01:39:07,760

from him so I have no problem going

2112

01:39:12,370 --> 01:39:10,010

second with Russ

2113

01:39:14,950 --> 01:39:12,380

hey just piggyback on what Mark said

2114

01:39:17,410 --> 01:39:14,960

about skydivers one of the things that I

2115

01:39:20,830 --> 01:39:17,420

like to do and I I kind of learned this

2116

01:39:24,669 --> 01:39:20,840

from our chief investigator Dennis is if

2117

01:39:27,910 --> 01:39:24,679

we can when we're taking the photo

2118

01:39:30,010 --> 01:39:27,920

evidence the video evidence what I'd

2119

01:39:33,070 --> 01:39:30,020

like to do is like skydivers like Mark

2120

01:39:35,979 --> 01:39:33,080

was talking about what I've done with my

2121

01:39:39,220 --> 01:39:35,989

husband we went out back a couple years

2122

01:39:43,540 --> 01:39:39,230

ago Gilbert had an event that happened

2123

01:39:45,700 --> 01:39:43,550

at night and we had skydivers come in

2124

01:39:48,130 --> 01:39:45,710

with players that nighttime skydivers

2125

01:39:51,910 --> 01:39:48,140

and they had the flares on their shoes

2126
01:39:54,070 --> 01:39:51,920
and we had probably Gilbert would get

2127
01:39:56,229 --> 01:39:54,080
her excuse me Phoenix MUFON would get

2128
01:39:58,870 --> 01:39:56,239
numerous calls the next day saying they

2129
01:40:01,350 --> 01:39:58,880
saw all these UFOs so what we started to

2130
01:40:03,970 --> 01:40:01,360
do was we would go out at night and

2131
01:40:07,959 --> 01:40:03,980
videotape all of this and we would put

2132
01:40:10,689 --> 01:40:07,969
it in a database I've had that I've

2133
01:40:13,780 --> 01:40:10,699
actually had an orb it looks like I was

2134
01:40:18,130 --> 01:40:13,790
taking a video of snow through a window

2135
01:40:18,669 --> 01:40:18,140
and when I looked at it later on I had

2136
01:40:20,919 --> 01:40:18,679
an axe

2137
01:40:23,080 --> 01:40:20,929
pink orb it was like it was coming from

2138
01:40:26,290 --> 01:40:23,090

outside through the window into my

2139

01:40:29,110 --> 01:40:26,300

camera it was amazing and come to find

2140

01:40:31,240 --> 01:40:29,120

it it was it was an under bit was just a

2141

01:40:36,160 --> 01:40:31,250

lens flare it was amazing but what I

2142

01:40:38,649 --> 01:40:36,170

tell people if possible is keep a log of

2143

01:40:42,910 --> 01:40:38,659

all these little a non-anonymous

2144

01:40:46,750 --> 01:40:42,920

I can talk and not normally happen and

2145

01:40:50,410 --> 01:40:46,760

we can have a journal of all this so if

2146

01:40:53,110 --> 01:40:50,420

we get a video on one of our CMS cases

2147

01:40:55,510 --> 01:40:53,120

we might be able to match it and see oh

2148

01:40:58,990 --> 01:40:55,520

wait a minute that's just a skydiver

2149

01:41:01,180 --> 01:40:59,000

because it it has the same properties as

2150

01:41:04,090 --> 01:41:01,190

a skydiver coming in so we can match

2151
01:41:07,810 --> 01:41:04,100
that up one one other thing that was

2152
01:41:11,169 --> 01:41:07,820
really good is mark made a video with

2153
01:41:15,459 --> 01:41:11,179
Alejandro Rojas and it was really cool

2154
01:41:18,580 --> 01:41:15,469
talking about these what looks like a

2155
01:41:21,430 --> 01:41:18,590
UFO but actually is someone taking video

2156
01:41:24,160 --> 01:41:21,440
or pictures and it's an actual bird and

2157
01:41:26,229 --> 01:41:24,170
a lot of times we get insects birds but

2158
01:41:28,720 --> 01:41:26,239
because they made this video that helped

2159
01:41:32,169 --> 01:41:28,730
me out tremendously that I was able to

2160
01:41:36,100 --> 01:41:32,179
look at one of my CMS cases and was able

2161
01:41:38,709 --> 01:41:36,110
to tell yes determined that was there

2162
01:41:40,899 --> 01:41:38,719
was a the person that did the report

2163
01:41:44,410 --> 01:41:40,909

actually he took the picture of a bird

2164

01:41:46,060 --> 01:41:44,420

and it's amazing but that's one thing I

2165

01:41:47,890 --> 01:41:46,070

was saying just about the skydivers is

2166

01:41:50,860 --> 01:41:47,900

if they can take video of an actual

2167

01:41:54,010 --> 01:41:50,870

skydiver keeping it an archive so if you

2168

01:41:55,810 --> 01:41:54,020

get a report on this that you can look

2169

01:41:58,120 --> 01:41:55,820

back and you'd be able to match that up

2170

01:42:00,100 --> 01:41:58,130

saying yes this is what this is probably

2171

01:42:04,540 --> 01:42:00,110

what it was that you saw there's a

2172

01:42:06,820 --> 01:42:04,550

YouTube's out there show that okay thank

2173

01:42:10,090 --> 01:42:06,830

you very much for for giving us your

2174

01:42:12,520 --> 01:42:10,100

input on on those topics and Shane I

2175

01:42:14,580 --> 01:42:12,530

don't know if your mic is on apologize I

2176
01:42:19,930 --> 01:42:14,590
had muted your mic that was my fault

2177
01:42:22,180 --> 01:42:19,940
Shane are you with us right now I think

2178
01:42:24,580 --> 01:42:22,190
there's actually tech issue going on for

2179
01:42:26,830 --> 01:42:24,590
Shane I was gonna ask if anybody else

2180
01:42:31,120 --> 01:42:26,840
had any last things to say before we

2181
01:42:32,169 --> 01:42:31,130
move forward on ending the show this is

2182
01:42:34,840 --> 01:42:32,179
Sharon

2183
01:42:37,840 --> 01:42:34,850
one thing I wanted to say was that in

2184
01:42:43,300 --> 01:42:37,850
the very beginning of our training Denis

2185
01:42:46,530 --> 01:42:43,310
our chief investigator emphasized that

2186
01:42:51,430 --> 01:42:46,540
we record our interviews on a digital

2187
01:42:54,220 --> 01:42:51,440
reporter and that is a really invaluable

2188
01:42:56,740 --> 01:42:54,230

tool because you can go back and check

2189

01:42:59,320 --> 01:42:56,750

your accuracy you can go back and check

2190

01:43:02,080 --> 01:42:59,330

exactly what the witness said during the

2191

01:43:06,340 --> 01:43:02,090

interview and you have a record of that

2192

01:43:08,320 --> 01:43:06,350

interview wow that's great that's good

2193

01:43:09,850 --> 01:43:08,330

to know yeah it's really important for

2194

01:43:12,610 --> 01:43:09,860

us to have these last parting tips

2195

01:43:14,530 --> 01:43:12,620

because our listeners take them to heart

2196

01:43:16,030 --> 01:43:14,540

and they actually our listeners are very

2197

01:43:18,850 --> 01:43:16,040

serious about what we cover they make

2198

01:43:21,240 --> 01:43:18,860

notes on it and it's important for

2199

01:43:23,229 --> 01:43:21,250

everybody to have extra tips like that

2200

01:43:25,300 --> 01:43:23,239

thank you Mark for having been on the

2201

01:43:27,729 --> 01:43:25,310

show he's actually he has to take off is

2202

01:43:30,939 --> 01:43:27,739

a very busy schedule today

2203

01:43:32,439 --> 01:43:30,949

but John Dover before we head out here

2204

01:43:34,870 --> 01:43:32,449

is there anything important that you

2205

01:43:38,770 --> 01:43:34,880

have left to contribute to the topics

2206

01:43:43,120 --> 01:43:38,780

that we've covered today oh sure

2207

01:43:45,760 --> 01:43:43,130

we one of the things I'm very interested

2208

01:43:48,280 --> 01:43:45,770

in you have to understand that when when

2209

01:43:51,880 --> 01:43:48,290

my buddy Stan and I were assigned these

2210

01:43:54,939 --> 01:43:51,890

cases we we didn't we knew about them

2211

01:43:56,470 --> 01:43:54,949

that happened all the time we've had

2212

01:44:01,479 --> 01:43:56,480

sightings of our own

2213

01:44:04,959 --> 01:44:01,489

however we were voluntold to do these

2214

01:44:11,200 --> 01:44:04,969

cases we didn't jump out and say yeah we

2215

01:44:14,320 --> 01:44:11,210

want to do them and in doing these cases

2216

01:44:18,220 --> 01:44:14,330

we found out that there is something to

2217

01:44:21,580 --> 01:44:18,230

it you have to understand that for us as

2218

01:44:25,000 --> 01:44:21,590

criminal investigators we look at what's

2219

01:44:27,790 --> 01:44:25,010

what kind of evidence is acceptable into

2220

01:44:30,790 --> 01:44:27,800

a court of law that you could use to

2221

01:44:36,010 --> 01:44:30,800

convict somebody and put them in jail

2222

01:44:39,669 --> 01:44:36,020

and we've seen enough evidence to show

2223

01:44:43,229 --> 01:44:39,679

that the UFO phenomenon is real there is

2224

01:44:44,669 --> 01:44:43,239

something to it we don't know what it is

2225

01:44:49,140 --> 01:44:44,679

hence

2226

01:44:52,140 --> 01:44:49,150

the investigator bootcamp and when you

2227

01:44:55,830 --> 01:44:52,150

become an investigator you it's a

2228

01:44:59,459 --> 01:44:55,840

lifelong thing you will learn I learned

2229

01:45:04,110 --> 01:44:59,469

things at the boot camp that were

2230

01:45:06,780 --> 01:45:04,120

totally new to me and so you know it's

2231

01:45:10,729 --> 01:45:06,790

it's great it was really great

2232

01:45:13,290 --> 01:45:10,739

experience very grateful for you to have

2233

01:45:14,700 --> 01:45:13,300

taken time to be on our show today John

2234

01:45:25,200 --> 01:45:14,710

Dover

2235

01:45:27,450 --> 01:45:25,210

he is a Navajo Nation's sorry Ranger yes

2236

01:45:29,220 --> 01:45:27,460

sorry I I have a I have a guest list

2237

01:45:30,600 --> 01:45:29,230

here of a dozen people and I was looking

2238

01:45:32,220 --> 01:45:30,610

for your name apologize for that thank

2239

01:45:34,800 --> 01:45:32,230

you very much for filling in on that and

2240

01:45:37,320 --> 01:45:34,810

then we had Mark Dantonio today who is a

2241

01:45:40,740 --> 01:45:37,330

MUFON chief video photo analyst and

2242

01:45:42,120 --> 01:45:40,750

astronomer and then we also had in no

2243

01:45:44,010 --> 01:45:42,130

particular order here I'm just going to

2244

01:45:45,990 --> 01:45:44,020

mention who's been on the show and we

2245

01:45:49,050 --> 01:45:46,000

had as Shane heard field investigator

2246

01:45:55,439 --> 01:45:49,060

for Arizona MUFON Tara Delius same and

2247

01:45:56,820 --> 01:45:55,449

then we are Oh Gwen our luma funds

2248

01:46:03,649 --> 01:45:56,830

experience your team member we also had

2249

01:46:07,229 --> 01:46:03,659

Mary on field investigator and the

2250

01:46:09,030 --> 01:46:07,239

earths and then Stacey Wright is the

2251

01:46:12,060 --> 01:46:09,040

assistant director and before we go I

2252

01:46:13,470 --> 01:46:12,070

would like for Jim and Stacey either one

2253

01:46:15,720 --> 01:46:13,480

of you if you wouldn't mind and also

2254

01:46:18,120 --> 01:46:15,730

Russell as as built by the way very

2255

01:46:21,450 --> 01:46:18,130

important to say his name who's been on

2256

01:46:23,720 --> 01:46:21,460

another show with us wanted to ask Jim

2257

01:46:26,250 --> 01:46:23,730

and Stacey could you please let us know

2258

01:46:30,689 --> 01:46:26,260

what the state of Arizona gave to you

2259

01:46:33,209 --> 01:46:30,699

all so that you could have for everybody

2260

01:46:34,979 --> 01:46:33,219

to come and see it was something I

2261

01:46:36,959 --> 01:46:34,989

wanted to go actually see you all in

2262

01:46:39,360 --> 01:46:36,969

person and do an interview with you on

2263

01:46:41,220 --> 01:46:39,370

regarding mass sighting could you please

2264

01:46:45,979 --> 01:46:41,230

let our listeners know what they can go

2265

01:46:51,750 --> 01:46:49,380

well we have monthly meetings at Phoenix

2266

01:46:53,850 --> 01:46:51,760

move on we have been doing meetings and

2267

01:46:56,669 --> 01:46:53,860

presentations there for over 12 years

2268

01:46:57,450 --> 01:46:56,679

without missing one month so if anyone

2269

01:46:59,790 --> 01:46:57,460

wants to come

2270

01:47:02,490 --> 01:46:59,800

a really great informative afternoon

2271

01:47:04,590 --> 01:47:02,500

they can look us up at Phoenix MUFON

2272

01:47:07,350 --> 01:47:04,600

comm and find out who our guest speakers

2273

01:47:08,910 --> 01:47:07,360

are and what the subject matter is if

2274

01:47:10,770 --> 01:47:08,920

anyone is interested in attending the

2275

01:47:12,060 --> 01:47:10,780

boot camp we will be holding it again

2276

01:47:15,840 --> 01:47:12,070

this next November

2277

01:47:18,690 --> 01:47:15,850

it'll be November 6th 7th and 8th here

2278

01:47:20,520 --> 01:47:18,700

in Mesa Arizona again and we will follow

2279

01:47:22,260 --> 01:47:20,530

a little bit of the same protocol that

2280

01:47:24,570 --> 01:47:22,270

we had the last two years because it

2281

01:47:25,950 --> 01:47:24,580

works so successfully so if anyone is

2282

01:47:29,670 --> 01:47:25,960

interested in that they can register for

2283

01:47:32,700 --> 01:47:29,680

that through MUFON comm great and then

2284

01:47:34,290 --> 01:47:32,710

was there also something given to you by

2285

01:47:37,440 --> 01:47:34,300

the state of Arizona or the City of

2286

01:47:39,600 --> 01:47:37,450

Phoenix regarding a mass sighting is

2287

01:47:43,080 --> 01:47:39,610

there anything that you have regarding

2288

01:47:46,350 --> 01:47:43,090

that well we can tell you is that an

2289

01:47:48,480 --> 01:47:46,360

exhibit yeah yeah at the Arizona

2290

01:47:52,620 --> 01:47:48,490

Heritage Center or the Arizona

2291

01:47:55,320 --> 01:47:52,630

Historical Society Museum when we were

2292

01:47:56,820 --> 01:47:55,330

invited to come over there and start

2293

01:47:58,830 --> 01:47:56,830

having our meetings there we thought

2294

01:48:00,900 --> 01:47:58,840

that was wonderful but then they

2295

01:48:06,170 --> 01:48:00,910

extended to us the invitation to help

2296

01:48:10,170 --> 01:48:06,180

them put together a very stimulating

2297

01:48:13,440 --> 01:48:10,180

exhibit regarding the Phoenix lights and

2298

01:48:15,360 --> 01:48:13,450

so we jumped on that of course and so

2299

01:48:18,060 --> 01:48:15,370

now when you go to the museum the

2300

01:48:21,870 --> 01:48:18,070

Heritage Center there is this really

2301

01:48:24,000 --> 01:48:21,880

cool exhibit of the Phoenix lights and

2302

01:48:26,010 --> 01:48:24,010

we're very proud of it it's actually the

2303

01:48:28,140 --> 01:48:26,020

very last exhibit you see when you

2304

01:48:29,610 --> 01:48:28,150

before you leave the building so it's

2305

01:48:31,770 --> 01:48:29,620

kind of like the last impression that

2306

01:48:34,740 --> 01:48:31,780

you get when you leave the museum was

2307

01:48:36,960 --> 01:48:34,750

like so that's kind of cool and in the

2308

01:48:39,840 --> 01:48:36,970

fact that the Arizona Historical Society

2309

01:48:43,350 --> 01:48:39,850

would view the Phoenix lights a UFO

2310

01:48:46,260 --> 01:48:43,360

sighting as a an actual historical event

2311

01:48:50,190 --> 01:48:46,270

is just that's phenomenal in itself so

2312

01:48:52,500 --> 01:48:50,200

it is like to just let everybody know

2313

01:48:55,020 --> 01:48:52,510

what the Phoenix lights also known as a

2314

01:48:56,220 --> 01:48:55,030

mass sighting was about and Jim thank

2315

01:48:58,650 --> 01:48:56,230

you very much for letting us know about

2316

01:49:00,540 --> 01:48:58,660

that exhibit that you have the privilege

2317

01:49:02,340 --> 01:49:00,550

of being able to show to everyone

2318

01:49:04,500 --> 01:49:02,350

there were a series of widely sighting

2319

01:49:06,050 --> 01:49:04,510

unidentified flying objects observed in

2320

01:49:08,610 --> 01:49:06,060

the skies over the US states of Arizona

2321

01:49:11,040 --> 01:49:08,620

Nevada and the Mexican state of Sonora

2322

01:49:13,590 --> 01:49:11,050

on March 13 1997

2323

01:49:15,630 --> 01:49:13,600

and want to thank everybody for having

2324

01:49:19,230 --> 01:49:15,640

been on our show today I did also want

2325

01:49:22,080 --> 01:49:19,240

to point out that Gwen Farrell also is

2326

01:49:24,510 --> 01:49:22,090

mufon experience or team members she's

2327

01:49:26,580 --> 01:49:24,520

not just having had been a field

2328

01:49:28,710 --> 01:49:26,590

investigator but she's an experienced or

2329

01:49:30,120 --> 01:49:28,720

team member she specializes in that area

2330

01:49:32,160 --> 01:49:30,130

and has done so

2331

01:49:36,000 --> 01:49:32,170

Gwen did you say was that for 12 years

2332

01:49:37,860 --> 01:49:36,010

is that correct yes I've been working

2333

01:49:38,760 --> 01:49:37,870

with experiencers for almost 12 years

2334

01:49:40,200 --> 01:49:38,770

mm-hmm

2335

01:49:42,080 --> 01:49:40,210

I've only been with the experienced a

2336

01:49:44,520 --> 01:49:42,090

research team for about two years oh

2337

01:49:46,500 --> 01:49:44,530

okay thank you for letting us know that

2338

01:49:47,640 --> 01:49:46,510

thank you everybody for having taken the

2339

01:49:49,680 --> 01:49:47,650

time to have been on our show today

2340

01:49:52,770 --> 01:49:49,690

we're very grateful to you for having

2341

01:49:53,880 --> 01:49:52,780

done so and this wraps up our Phoenix

2342

01:49:56,910 --> 01:49:53,890

boot camp

2343

01:49:58,380 --> 01:49:56,920

MUFON special yep thanks everybody for

2344

01:50:01,080 --> 01:49:58,390

joining in we'll be back I think

2345

01:50:03,180 --> 01:50:01,090

Wednesday night thanks everybody on the

2346

01:50:05,400 --> 01:50:03,190

panel and that chant you did a great job
