did have a Tom Rogan from the McLaughlin

14

00:01:34,859 --> 00:01:33,280

group on earlier today that was an

15

00:01:37,050 --> 00:01:34,869

interesting show and now we have a

16

00:01:40,800 --> 00:01:37,060

wonderful guest by the name of Baco Baco

17

00:01:43,499 --> 00:01:40,810

cirucci and he flew in a 6e intruders

18

00:01:46,770 --> 00:01:43,509

and f-14a tomcat during his 10-year

19

00:01:49,590 --> 00:01:46,780

active duty career he flew the f5 Tiger

20

00:01:51,030 --> 00:01:49,600

to for further 10 years as a bandit

21

00:01:53,880 --> 00:01:51,040

concurrent with his employment as a

22

00:01:56,130 --> 00:01:53,890

commercial pilot Paco is currently a 737

23

00:01:57,840 --> 00:01:56,140

captain Paco is also the creator and

00:02:00,870 --> 00:01:57,850

producer of the award-winning naval

25

00:02:02,820 --> 00:02:00,880

aviation documentary speed and angels

26

00:02:05,370 --> 00:02:02,830

Paco has written articles for various

27

00:02:07,350 --> 00:02:05,380

international domestic magazines as well

28

00:02:09,660 --> 00:02:07,360

as regular contributions to fighter

29

00:02:11,420 --> 00:02:09,670

sweep he has signed with an agent to

30

00:02:14,400 --> 00:02:11,430

represent the sale of his debut novel

31

00:02:17,430 --> 00:02:14,410

lions in the sky a novel aviation

32

00:02:19,800 --> 00:02:17,440

thriller Paco has the standard panoply

33

00:02:21,600 --> 00:02:19,810

of medals and ribbons but his pot

34

00:02:24,780 --> 00:02:21,610

proudest accomplishment is the top

35

00:02:26,130 --> 00:02:24,790

nugget award for landing grades from his

36

00:02:27,990 --> 00:02:26,140

first deployment Paco

37

00:02:29,640 --> 00:02:28,000

would first like to thank you very much

38

00:02:32,310 --> 00:02:29,650

for your service to our great country I

39

00:02:35,490 --> 00:02:32,320

have family in the military and their

40

00:02:37,410 --> 00:02:35,500

Army and Navy one is a pilot also we

41

00:02:39,900 --> 00:02:37,420

appreciate your service to our great

42

00:02:42,600 --> 00:02:39,910

country and I would like thank you on

43

00:02:45,300 --> 00:02:42,610

the show yeah well thank you it was my

44

00:02:47,729 --> 00:02:45,310

pleasure I enjoyed I'm sorry chant it

45

00:02:49,680 --> 00:02:47,739

was my pleasure I enjoyed every minute

46

00:02:52,380 --> 00:02:49,690

of it and I wish they could go back and

47

00:02:53,580 --> 00:02:52,390

do it again great and I also want you to

48

00:02:55,170 --> 00:02:53,590

correct me on something because I think

49

00:02:59,630 --> 00:02:55,180

I may have missed said something during

50

00:03:04,410 --> 00:02:59,640

your bio you flew a an a6 intruders and

51
00:03:06,659 --> 00:03:04,420
f-14a tomcat and then f5 Tiger - can you

52
00:03:08,460 --> 00:03:06,669
tell me did I say any that correctly or

53
00:03:10,470 --> 00:03:08,470
could you just be more clear about that

54
00:03:11,970 --> 00:03:10,480
for our listeners if I wasn't clear

55
00:03:13,680 --> 00:03:11,980
enough you know

56
00:03:17,490 --> 00:03:13,690
that's correct I flew the a-6 intruder

57
00:03:20,119 --> 00:03:17,500
from my first deployment my first tour

58
00:03:22,710 --> 00:03:20,129
and then I transitioned over to the f-14

59
00:03:26,309 --> 00:03:22,720
Tomcat you know the one that's famous

60
00:03:29,640 --> 00:03:26,319
from the first Top Gun movie all right

61
00:03:32,190 --> 00:03:29,650
and I flew the f5 which actually was the

62
00:03:35,699 --> 00:03:32,200
the bad guy that make 28 in the Top Gun

63
00:03:37,500 --> 00:03:35,709

movie so wonderful yeah fantastic well I

64

00:03:39,030 --> 00:03:37,510

just wanted to ask you and first start

65

00:03:41,610 --> 00:03:39,040

off with could you please share with us

66

00:03:44,130 --> 00:03:41,620

a little bit about your background just

67

00:03:46,319 --> 00:03:44,140

who you are as a person and why did you

68

00:03:50,640 --> 00:03:46,329

join the Navy to become a pilot why was

69

00:03:53,190 --> 00:03:50,650

that of interest to you sure I was born

70

00:03:56,490 --> 00:03:53,200

in Bethesda I spent a little bit of time

71

00:03:57,599 --> 00:03:56,500

growing up in Italy and then ended up

72

00:04:00,300 --> 00:03:57,609

going to high school in Rochester New

73

00:04:04,680 --> 00:04:00,310

York I needed some money to go to

74

00:04:07,800 --> 00:04:04,690

college and I was turned towards the

75

00:04:10,680 --> 00:04:07,810

Navy ROTC scholarship and I'm super

76

00:04:11,880 --> 00:04:10,690

grateful that happened nobody in my

77

00:04:14,580 --> 00:04:11,890

family really was in the military

78

00:04:17,699 --> 00:04:14,590

certainly no aviators of my family and

79

00:04:19,830 --> 00:04:17,709

just almost purely by fortune ended up

80

00:04:23,730 --> 00:04:19,840

going to Boston University on a navy

81

00:04:26,100 --> 00:04:23,740

scholarship and the summer before my

82

00:04:27,450 --> 00:04:26,110

sophomore year again I had no aviation

83

00:04:30,900 --> 00:04:27,460

experience I've never really been in a

84

00:04:34,650 --> 00:04:30,910

airplane other than as a passenger but I

85

00:04:38,730 --> 00:04:34,660

got a backseat ride in an f-14 and it

86

00:04:40,350 --> 00:04:38,740

really changed my life it was a like

87

00:04:42,540 --> 00:04:40,360

getting that you know hit of a drug that

88

00:04:46,350 --> 00:04:42,550

you just can't get rid of and I fell in

89

00:04:50,010 --> 00:04:46,360

love in an instant and I've been

90

00:04:52,800 --> 00:04:50,020

involved in flying fighters and bigger

91

00:04:55,800 --> 00:04:52,810

planes ever since great you also

92

00:04:57,960 --> 00:04:55,810

recently wrote a book and wanted it's

93

00:05:00,120 --> 00:04:57,970

called lions in the sky and I would also

94

00:05:03,710 --> 00:05:00,130

like to encourage our listeners to

95

00:05:06,240 --> 00:05:03,720

please go to lions

96

00:05:09,080 --> 00:05:06,250

so it's it's the title of the book is

97

00:05:10,980 --> 00:05:09,090

Lions of the sky and the website is

98

00:05:13,740 --> 00:05:10,990

Lions of the sky.com

99

00:05:15,560 --> 00:05:13,750

and just an aside I wanted to let our

100

00:05:18,570 --> 00:05:15,570

listeners know also to please go to

101
00:05:20,700 --> 00:05:18,580
fighters sweep calm that's a website

102
00:05:23,100 --> 00:05:20,710
that he is associated with regarding

103
00:05:24,899 --> 00:05:23,110
writing articles could you please give

104
00:05:25,710 --> 00:05:24,909
us a summary of that book and what the

105
00:05:29,880 --> 00:05:25,720
essence of it

106
00:05:32,100 --> 00:05:29,890
is sure it's at its spirit courts and

107
00:05:33,450 --> 00:05:32,110
Naval Aviation thrillers so anyone

108
00:05:35,610 --> 00:05:33,460
that's interested in you know the

109
00:05:37,500 --> 00:05:35,620
classic Tom Clancy techno thrillers with

110
00:05:42,870 --> 00:05:37,510
lots of great action and and

111
00:05:44,490 --> 00:05:42,880
geopolitical forces moving you know to

112
00:05:47,160 --> 00:05:44,500
different size sports conflict will be

113
00:05:48,840 --> 00:05:47,170

interested in it but for me it's a much

114

00:05:51,720 --> 00:05:48,850

more personal story than that it's

115

00:05:53,820 --> 00:05:51,730

really about the pilots themselves and

116

00:05:58,080 --> 00:05:53,830

how they deal with going through

117

00:05:59,250 --> 00:05:58,090

training to fly the f-18 and how they

118

00:06:01,610 --> 00:05:59,260

deal with some of their interpersonal

119

00:06:05,340 --> 00:06:01,620

issues there's a there's some women in

120

00:06:08,400 --> 00:06:05,350

the class that come up against some

121

00:06:12,180 --> 00:06:08,410

sexism and and there's a my male lead

122

00:06:14,040 --> 00:06:12,190

has some issues women that he's got to

123

00:06:16,740 --> 00:06:14,050

come to terms with and all of this

124

00:06:18,540 --> 00:06:16,750

obviously is said against the the drama

125

00:06:20,280 --> 00:06:18,550

the natural inherent drama of flying

126

00:06:22,350 --> 00:06:20,290

fighters in the Navy you've got to learn

127

00:06:24,870 --> 00:06:22,360

how to dogfight and drop bombs and fly

128

00:06:26,310 --> 00:06:24,880

the levels and you know your final exam

129

00:06:28,080 --> 00:06:26,320

is landing an aircraft carrier so

130

00:06:31,220 --> 00:06:28,090

there's every chapter is just filled

131

00:06:34,730 --> 00:06:31,230

with both physical and interpersonal

132

00:06:37,260 --> 00:06:34,740

drama and it all leads up to this big

133

00:06:41,700 --> 00:06:37,270

conflict in the South China Sea sort of

134

00:06:44,670 --> 00:06:41,710

a real-world dilemma an issue that comes

135

00:06:46,740 --> 00:06:44,680

to a boil in the novel yes I saw that it

136

00:06:50,550 --> 00:06:46,750

got some really great reviews also I

137

00:06:53,520 --> 00:06:50,560

wanted to ask you as a former well as a

138

00:06:56,159 --> 00:06:53,530

military pilot how do you discern the

139

00:06:58,760 --> 00:06:56,169

differences between stars drones

140

00:07:01,260 --> 00:06:58,770

unmanned aerial vehicles satellites

141

00:07:04,110 --> 00:07:01,270

anything else being flung or flown into

142

00:07:06,540 --> 00:07:04,120

the sky that is anomalous in nature how

143

00:07:09,420 --> 00:07:06,550

do you tell the difference between all

144

00:07:13,409 --> 00:07:09,430

of that and a possible anomaly in the

145

00:07:15,690 --> 00:07:13,419

sky that is distinctly different from a

146

00:07:22,050 --> 00:07:15,700

star a drone an unmanned aerial vehicle

147

00:07:23,700 --> 00:07:22,060

that or satellite as a pilot sure well I

148

00:07:25,710 --> 00:07:23,710

just want to be clear I've never seen

149

00:07:29,190 --> 00:07:25,720

anything that you would consider to be

150

00:07:32,340 --> 00:07:29,200

an anomalous view not anomalous vehicle

151
00:07:35,130 --> 00:07:32,350
that's not an easy one to say you know I

152
00:07:36,570 --> 00:07:35,140
wrote that article and it's a great

153
00:07:37,469 --> 00:07:36,580
story but I personally have never

154
00:07:40,739 --> 00:07:37,479
witnessed anything

155
00:07:43,019 --> 00:07:40,749
like that but to answer your question

156
00:07:44,670 --> 00:07:43,029
you know stars don't move certainly not

157
00:07:48,439 --> 00:07:44,680
to the naked eye they obviously move

158
00:07:50,670 --> 00:07:48,449
across the skies that Earth rotates

159
00:07:52,140 --> 00:07:50,680
satellites do move they look like stars

160
00:07:53,489 --> 00:07:52,150
but they move you can notice them you

161
00:07:54,869 --> 00:07:53,499
can just watch the best they track

162
00:07:56,249 --> 00:07:54,879
across the sky and you can do that in

163
00:08:01,379 --> 00:07:56,259

your backyard

164

00:08:03,510 --> 00:08:01,389

a drone acts like an airplane so it

165

00:08:06,989 --> 00:08:03,520

flies the same as an airplane it just

166

00:08:09,689 --> 00:08:06,999

says I'm a pilot in it obviously and you

167

00:08:11,339 --> 00:08:09,699

become accustomed to the manner in which

168

00:08:14,550 --> 00:08:11,349

objects move

169

00:08:17,249 --> 00:08:14,560

you know airplanes helicopters fighter

170

00:08:20,820 --> 00:08:17,259

planes versus transport planes versus

171

00:08:24,959 --> 00:08:20,830

airliners the the they all have sort of

172

00:08:26,700 --> 00:08:24,969

a very predictable flight pattern or

173

00:08:29,760 --> 00:08:26,710

flight path to them so it's it's it's

174

00:08:31,739 --> 00:08:29,770

not as difficult as you may think and at

175

00:08:34,740 --> 00:08:31,749

night you know everybody's certainly

176
00:08:37,709 --> 00:08:34,750
things that fly man vehicles and drones

177
00:08:39,180 --> 00:08:37,719
have a light pattern to them you know

178
00:08:41,490 --> 00:08:39,190
the green and the red lights and the

179
00:08:45,000 --> 00:08:41,500
white tail lights so it's it's fairly

180
00:08:47,730 --> 00:08:45,010
easy to distinguish between them now you

181
00:08:51,180 --> 00:08:47,740
explain radar recently on an interview

182
00:08:54,660 --> 00:08:51,190
can you share that explanation again and

183
00:08:58,650 --> 00:08:54,670
also how do you fit Fleur and radar into

184
00:09:01,920 --> 00:08:58,660
the topic of the tic-tac topic what is

185
00:09:07,350 --> 00:09:01,930
your understanding of Fleur radar and

186
00:09:11,550 --> 00:09:07,360
the Tic Tac incident okay that's a broad

187
00:09:14,129 --> 00:09:11,560
topic yes sir the way a radar works and

188
00:09:16,050 --> 00:09:14,139

the way I described it in that other

189

00:09:19,139 --> 00:09:16,060

show is that if you could imagine

190

00:09:20,639 --> 00:09:19,149

sitting in a dark room and say like a

191

00:09:23,639 --> 00:09:20,649

30-foot room and at the other end of the

192

00:09:25,949 --> 00:09:23,649

room is a person and if you turn on a

193

00:09:30,180 --> 00:09:25,959

flashlight it's like the same principle

194

00:09:32,220 --> 00:09:30,190

as a radar it emits energy and you see

195

00:09:33,600 --> 00:09:32,230

what that energy bounces back to you so

196

00:09:36,750 --> 00:09:33,610

if you turn on a flashlight and you

197

00:09:39,389 --> 00:09:36,760

sweep it slowly back and forth across

198

00:09:40,889 --> 00:09:39,399

the room you don't see that other person

199

00:09:42,329 --> 00:09:40,899

but you don't see them necessarily very

200

00:09:43,889 --> 00:09:42,339

clearly you can't get a lot of data on

201
00:09:45,750 --> 00:09:43,899
them you know that they're there you

202
00:09:47,790 --> 00:09:45,760
don't know if they're moving and what

203
00:09:49,710 --> 00:09:47,800
speed they're moving at other than every

204
00:09:50,590 --> 00:09:49,720
say 3 to 4 seconds when your beam swoops

205
00:09:53,259 --> 00:09:50,600
across them

206
00:09:56,050 --> 00:09:53,269
and that's range well scan or track well

207
00:09:58,150 --> 00:09:56,060
scan depending on the radar type where

208
00:10:00,990 --> 00:09:58,160
the radar keeps sweeping back and forth

209
00:10:03,930 --> 00:10:01,000
and tries to build up information on

210
00:10:06,129 --> 00:10:03,940
returns that it sees and a computer will

211
00:10:08,410 --> 00:10:06,139
interpolate that data and try to build

212
00:10:10,300 --> 00:10:08,420
what's called a track file now if you

213
00:10:12,309 --> 00:10:10,310

want to target that specific thing you

214

00:10:14,590 --> 00:10:12,319

will take your flashlight and just hold

215

00:10:17,350 --> 00:10:14,600

it steady at that person across the room

216

00:10:20,769 --> 00:10:17,360

or that your radar the equivalent is the

217

00:10:23,170 --> 00:10:20,779

radar holding steady on a aerial target

218

00:10:25,540 --> 00:10:23,180

and now all of a sudden you get all this

219

00:10:27,850 --> 00:10:25,550

great information on this one thing you

220

00:10:31,840 --> 00:10:27,860

can tell exactly its altitude its

221

00:10:33,670 --> 00:10:31,850

airspeed its flight path vector but you

222

00:10:34,960 --> 00:10:33,680

lose the perspective of everything else

223

00:10:37,240 --> 00:10:34,970

in the room so you're getting really

224

00:10:38,829 --> 00:10:37,250

great data on that one thing and it's

225

00:10:41,290 --> 00:10:38,839

called a single target track and makes

226
00:10:43,509 --> 00:10:41,300
sense when you understand the name but

227
00:10:46,569 --> 00:10:43,519
now you're you're essentially blind to

228
00:10:49,480 --> 00:10:46,579
all the other stuff that's going on and

229
00:10:51,160 --> 00:10:49,490
obviously both those radar modes and

230
00:10:53,110 --> 00:10:51,170
there's a variety of by the radar modes

231
00:10:55,540 --> 00:10:53,120
as well but those are the two broad ones

232
00:10:59,079 --> 00:10:55,550
both those radar modes have incredible

233
00:11:04,590 --> 00:10:59,089
utility and you use them you know for

234
00:11:07,660 --> 00:11:04,600
when they're most aptly suited the FLIR

235
00:11:11,410 --> 00:11:07,670
is an acronym for forward-looking

236
00:11:15,309 --> 00:11:11,420
infrared and there's again a variety of

237
00:11:17,679 --> 00:11:15,319
FLIR pods you know in the world the one

238
00:11:20,650 --> 00:11:17,689

that the Super Hornet uses and used at

239

00:11:27,329 --> 00:11:20,660

the time of the Tic Tac incident also

240

00:11:33,340 --> 00:11:31,840

to find a target on the ground and you

241

00:11:34,720 --> 00:11:33,350

can use either the camera mode it's got

242

00:11:36,069 --> 00:11:34,730

three different modes it's got a camera

243

00:11:39,429 --> 00:11:36,079

mode which is just a black and white

244

00:11:41,230 --> 00:11:39,439

contrast camera a infrared mode which is

245

00:11:42,879 --> 00:11:41,240

it looks similar but everything's

246

00:11:46,389 --> 00:11:42,889

inverse because you're looking for heat

247

00:11:48,490 --> 00:11:46,399

signatures and then this this laser

248

00:11:52,569 --> 00:11:48,500

that's going to be used for ranging and

249

00:11:54,309 --> 00:11:52,579

targeting and so when you're giving a

250

00:11:56,590 --> 00:11:54,319

target on the ground when you're flying

251
00:11:58,179 --> 00:11:56,600
a Super Hornet around you you're linked

252
00:12:00,429 --> 00:11:58,189
up at Target or you find a target and

253
00:12:02,530 --> 00:12:00,439
you slew the FLIR slew means you take

254
00:12:05,920 --> 00:12:02,540
whatever device it is whether it's your

255
00:12:07,980 --> 00:12:05,930
or your weapon seeker head or this in

256
00:12:11,200 --> 00:12:07,990
this case the FLIR and you slave it to

257
00:12:13,570 --> 00:12:11,210
something else to put the cursors over

258
00:12:16,300 --> 00:12:13,580
that target and now you're flying over

259
00:12:19,000 --> 00:12:16,310
the the target say it's a tank at you

260
00:12:21,580 --> 00:12:19,010
know thirty thousand feet and you can

261
00:12:23,860 --> 00:12:21,590
turn the laser on and now you can drop a

262
00:12:26,740 --> 00:12:23,870
laser-guided bomb on that target very

263
00:12:28,540 --> 00:12:26,750

precisely and that's what the FLIR is

264

00:12:30,220 --> 00:12:28,550

designed to do and you can do it at the

265

00:12:33,160 --> 00:12:30,230

night in the night time with the

266

00:12:36,490 --> 00:12:33,170

infrared or you know if it's daytime you

267

00:12:40,240 --> 00:12:36,500

could use just the camera mode so the

268

00:12:42,460 --> 00:12:40,250

video that has that people see of the

269

00:12:45,400 --> 00:12:42,470

ticket Tic Tac incident with the FLIR

270

00:12:48,880 --> 00:12:45,410

switching back and forth between black

271

00:12:50,530 --> 00:12:48,890

contrast and white contrast is a FLIR

272

00:12:52,720 --> 00:12:50,540

being used in a method that it wasn't

273

00:12:55,990 --> 00:12:52,730

really designed to be used for which is

274

00:12:57,640 --> 00:12:56,000

air-to-air there's a different infrared

275

00:12:59,290 --> 00:12:57,650

device that is used for that which

276

00:13:04,090 --> 00:12:59,300

doesn't even come into play in this

277

00:13:07,240 --> 00:13:04,100

incident but this FLIR pod was you know

278

00:13:10,840 --> 00:13:07,250

slaved to the radar track that the wizzo

279

00:13:13,720 --> 00:13:10,850

god of the tic-tac and he was able to

280

00:13:15,730 --> 00:13:13,730

from far further away than the FLIR is

281

00:13:19,420 --> 00:13:15,740

normally designed and used he was able

282

00:13:21,520 --> 00:13:19,430

to capture images of this thing hovering

283

00:13:25,710 --> 00:13:21,530

and then switch back and forth between

284

00:13:29,680 --> 00:13:25,720

camera contrast and IR contrast and and

285

00:13:33,400 --> 00:13:29,690

ascertain that there was no infrared

286

00:13:35,260 --> 00:13:33,410

signature coming out of this tic-tac it

287

00:13:37,150 --> 00:13:35,270

was just hovering there defying gravity

288

00:13:38,680 --> 00:13:37,160

of its you know it's on the listen there

289

00:13:41,290 --> 00:13:38,690

was no wings there was no rotors there

290

00:13:45,220 --> 00:13:41,300

was no engine spilling out any kind of

291

00:13:48,670 --> 00:13:45,230

gases he was too far away to get any of

292

00:13:50,050 --> 00:13:48,680

the real details that the visual guys

293

00:13:52,750 --> 00:13:50,060

got earlier you know with their eyeballs

294

00:13:53,800 --> 00:13:52,760

so he wasn't you could see a blob but he

295

00:13:55,510 --> 00:13:53,810

couldn't really see whether or not that

296

00:13:55,750 --> 00:13:55,520

what windows or wings or anything like

297

00:13:59,560 --> 00:13:55,760

that

298

00:14:01,480 --> 00:13:59,570

now just to jump in and be clear here as

299

00:14:03,760 --> 00:14:01,490

far as I know there were roughly yet

300

00:14:07,360 --> 00:14:03,770

three saw three flights that went out

301
00:14:10,530 --> 00:14:07,370
and engaged this the first one marine

302
00:14:15,450 --> 00:14:10,540
pilot by the name of Douglas Kurth

303
00:14:17,400 --> 00:14:15,460
the the tic-tac then your friend and the

304
00:14:21,120 --> 00:14:17,410
guy who you got the story from David

305
00:14:24,150 --> 00:14:21,130
flavor along with a female pilot they

306
00:14:26,820 --> 00:14:24,160
had a second encounter and then it was

307
00:14:29,220 --> 00:14:26,830
on the third encounter by a pilot named

308
00:14:31,200 --> 00:14:29,230
Chad Underwood I believe who actually

309
00:14:37,170 --> 00:14:31,210
caught the video that has become so

310
00:14:38,720 --> 00:14:37,180
famous right roughly so I'll give you

311
00:14:41,700 --> 00:14:38,730
the the specifics of it

312
00:14:43,140 --> 00:14:41,710
Doug Kurt never actually saw the tic-tac

313
00:14:45,540 --> 00:14:43,150

so he didn't actually engage it he was

314

00:14:49,260 --> 00:14:45,550

vectored out to go check it out okay

315

00:14:50,970 --> 00:14:49,270

and he actually saw the the water the

316

00:14:54,420 --> 00:14:50,980

surface of the ocean

317

00:14:56,790 --> 00:14:54,430

disturbed in a very unusual pattern so

318

00:14:59,340 --> 00:14:56,800

it was it was 11:30 in the morning and a

319

00:15:01,530 --> 00:14:59,350

Southern California day very beautiful

320

00:15:04,350 --> 00:15:01,540

day and the water was glassy smooth

321

00:15:05,640 --> 00:15:04,360

except for this one patch of water that

322

00:15:07,200 --> 00:15:05,650

was kind of foaming as if there was

323

00:15:12,840 --> 00:15:07,210

something underneath it okay like

324

00:15:14,730 --> 00:15:12,850

boiling and that's all that curse saw he

325

00:15:16,380 --> 00:15:14,740

flew over that he saw it and then he

326

00:15:18,420 --> 00:15:16,390

noticed that Dave raver and his wingman

327

00:15:21,210 --> 00:15:18,430

were coming in and he was asked to leave

328

00:15:22,710 --> 00:15:21,220

so as he exited he looked back over his

329

00:15:25,200 --> 00:15:22,720

shoulder and noticed that the water was

330

00:15:29,400 --> 00:15:25,210

now smooth and that was his experience

331

00:15:31,860 --> 00:15:29,410

with the incident and then yes

332

00:15:33,840 --> 00:15:31,870

Dave forever and his wizzo which is the

333

00:15:36,270 --> 00:15:33,850

the weapon system operator in the back

334

00:15:39,200 --> 00:15:36,280

of his airplane and then his wingman and

335

00:15:43,070 --> 00:15:39,210

her wizzo so there was four people and

336

00:15:46,620 --> 00:15:43,080

again I just to jump in her wizzo was

337

00:15:48,060 --> 00:15:46,630

mr. slate is that about right or was

338

00:15:48,720 --> 00:15:48,070

that day are you not sure okay okay

339

00:15:51,090 --> 00:15:48,730

sorry about that

340

00:15:52,980 --> 00:15:51,100

I mean I'm yeah I'm not gonna show the

341

00:15:55,440 --> 00:15:52,990

name I don't know who wants to have

342

00:15:58,740 --> 00:15:55,450

their name put out I just know that Doug

343

00:16:00,000 --> 00:15:58,750

Kurtz and Dave flavor are they've been

344

00:16:01,890 --> 00:16:00,010

associated with this obviously gave

345

00:16:06,210 --> 00:16:01,900

framers comfortable talking about it now

346

00:16:07,950 --> 00:16:06,220

but um so those four people actually saw

347

00:16:13,080 --> 00:16:07,960

the tic-tac they engaged with a Dave

348

00:16:15,980 --> 00:16:13,090

engage with it and you know they had a

349

00:16:19,350 --> 00:16:15,990

minute or so encounter with this thing

350

00:16:20,660 --> 00:16:19,360

before it zoomed away and then the last

351
00:16:23,900 --> 00:16:20,670
one the

352
00:16:26,600 --> 00:16:23,910
the Hornet that captured the tic-tac on

353
00:16:28,220 --> 00:16:26,610
the on the FLIR footage he never

354
00:16:30,680 --> 00:16:28,230
actually saw it or they never actually

355
00:16:33,740 --> 00:16:30,690
saw it again two people will pilot a

356
00:16:35,329 --> 00:16:33,750
Whizzer they never laid eyes on it they

357
00:16:38,540 --> 00:16:35,339
only saw it on radar and they were able

358
00:16:39,980 --> 00:16:38,550
to pick it up like I said on the FLIR at

359
00:16:41,870 --> 00:16:39,990
the outer ranges of the flares

360
00:16:43,819 --> 00:16:41,880
capabilities so that's why the video is

361
00:16:46,009 --> 00:16:43,829
kind of fuzzy and indistinct all right

362
00:16:48,769 --> 00:16:46,019
and now go guy yeah one last thing I

363
00:16:52,130 --> 00:16:48,779

going back to the lady pilot there was a

364

00:16:54,650 --> 00:16:52,140

show that the TTS a Tom DeLonge and Lou

365

00:16:56,750 --> 00:16:54,660

elizondo's group had put together and

366

00:16:59,960 --> 00:16:56,760

she appeared that didn't reveal her name

367

00:17:01,639 --> 00:16:59,970

and stayed in the shadows but were you a

368

00:17:03,170 --> 00:17:01,649

little surprised she went that far and

369

00:17:09,650 --> 00:17:03,180

going forward and not telling her side

370

00:17:10,909 --> 00:17:09,660

of the story no I mean no I first of all

371

00:17:13,549 --> 00:17:10,919

I haven't seen it so I don't know exact

372

00:17:14,900 --> 00:17:13,559

a okay I'm not surprised that she did

373

00:17:19,010 --> 00:17:14,910

that it's you know it's an incredible

374

00:17:22,819 --> 00:17:19,020

event I think it's it's something that

375

00:17:24,500 --> 00:17:22,829

people that witnessed it are you know

376

00:17:27,500 --> 00:17:24,510

they're excited to talk about or at

377

00:17:30,590 --> 00:17:27,510

least share with the world but she

378

00:17:32,530 --> 00:17:30,600

clearly you know values her privacy she

379

00:17:35,419 --> 00:17:32,540

may or may not still be in the Navy so

380

00:17:37,190 --> 00:17:35,429

she doesn't want to be bombarded with

381

00:17:39,380 --> 00:17:37,200

interview requests or anything like that

382

00:17:42,680 --> 00:17:39,390

so she was there to share her bit of the

383

00:17:45,380 --> 00:17:42,690

story and then fade back into the into

384

00:17:48,710 --> 00:17:45,390

the background and your involvement with

385

00:17:50,180 --> 00:17:48,720

spider sweep comm is what's kind of led

386

00:17:52,340 --> 00:17:50,190

you to get there some attention in the

387

00:17:54,860 --> 00:17:52,350

UFO community can you tell us a little

388

00:17:57,080 --> 00:17:54,870

bit about the site and your involvement

389

00:18:02,150 --> 00:17:57,090

with it and why you decided to write

390

00:18:06,799 --> 00:18:02,160

that particular story sure in 2015 so my

391

00:18:10,130 --> 00:18:06,809

good friend is the owner and operator of

392

00:18:13,400 --> 00:18:10,140

fighter shweet Brandon Webb and he he

393

00:18:18,440 --> 00:18:13,410

owns a variety of military affiliated or

394

00:18:21,919 --> 00:18:18,450

associated websites and he asked me to

395

00:18:24,620 --> 00:18:21,929

come in and be the interim editor and I

396

00:18:25,760 --> 00:18:24,630

I told my chemist summer so I was I was

397

00:18:28,159 --> 00:18:25,770

the editor of fighter suite for about

398

00:18:30,230 --> 00:18:28,169

four or five months and one of the first

399

00:18:32,240 --> 00:18:30,240

articles that I wanted to write and it's

400

00:18:35,090 --> 00:18:32,250

a story that I had heard for years and

401

00:18:37,850 --> 00:18:35,100

years since probably 2007

402

00:18:40,310 --> 00:18:37,860

was date favors UFO article I just loved

403

00:18:42,140 --> 00:18:40,320

it and I wanted to I'd heard it so many

404

00:18:43,430 --> 00:18:42,150

times and Dave reminded me actually I've

405

00:18:46,760 --> 00:18:43,440

talked to him recently preparing for the

406

00:18:50,270 --> 00:18:46,770

show he reminded me that at one point I

407

00:18:52,160 --> 00:18:50,280

called him this is probably in 2010 or

408

00:18:54,230 --> 00:18:52,170

11 I called him up while I was having a

409

00:18:55,760 --> 00:18:54,240

party at my house and asked him over

410

00:18:58,730 --> 00:18:55,770

speakerphone to tell everybody at the

411

00:19:00,620 --> 00:18:58,740

party the story and he was kind enough

412

00:19:04,580 --> 00:19:00,630

to do so so it was it was a you know a

413

00:19:06,860 --> 00:19:04,590

great event at this party but it's just

414

00:19:09,500 --> 00:19:06,870

such a phenomenal and fascinating story

415

00:19:12,890 --> 00:19:09,510

and at the time it hadn't been talked

416

00:19:16,910 --> 00:19:12,900

about and nobody had really had any sort

417

00:19:19,400 --> 00:19:16,920

of UFO experience of any credibility at

418

00:19:21,440 --> 00:19:19,410

least you know from where I sat as a you

419

00:19:25,190 --> 00:19:21,450

know someone who doesn't really follow

420

00:19:26,630 --> 00:19:25,200

this world like you guys do and I I knew

421

00:19:27,830 --> 00:19:26,640

this guy really well and I knew that you

422

00:19:29,840 --> 00:19:27,840

know there were all these I I knew all

423

00:19:33,320 --> 00:19:29,850

the circumstances surrounding this story

424

00:19:35,710 --> 00:19:33,330

and it just blew my mind so once I had

425

00:19:39,260 --> 00:19:35,720

this the ability to write like a

426

00:19:40,700 --> 00:19:39,270

professional journalistic article I went

427

00:19:45,140 --> 00:19:40,710

ahead and did that and I called Dave up

428

00:19:47,120 --> 00:19:45,150

to - you know refresh all the the points

429

00:19:50,000 --> 00:19:47,130

that I was gonna write about and that's

430

00:19:52,640 --> 00:19:50,010

when I found out that the a tip had done

431

00:19:54,350 --> 00:19:52,650

an investigation you know oh and I is

432

00:19:57,590 --> 00:19:54,360

what they call themselves but Dave

433

00:20:00,190 --> 00:19:57,600

believes that they were a tip and they

434

00:20:02,810 --> 00:20:00,200

had completed that in 2009 and and

435

00:20:05,270 --> 00:20:02,820

through a variety of different means I

436

00:20:07,430 --> 00:20:05,280

was able to get my hands on the a tip

437

00:20:09,710 --> 00:20:07,440

report before I did my article so my

438

00:20:11,720 --> 00:20:09,720

article is basically the redacted

439

00:20:14,480 --> 00:20:11,730

version of the a tip report how were you

440

00:20:16,160 --> 00:20:14,490

able to get the a tip report just some

441

00:20:20,150 --> 00:20:16,170

folks that were able to send it to me

442

00:20:22,730 --> 00:20:20,160

okay did Dave have any problem going on

443

00:20:25,370 --> 00:20:22,740

the record with you not at all I mean

444

00:20:27,200 --> 00:20:25,380

I've heard the story forever and again I

445

00:20:30,020 --> 00:20:27,210

knew so many of the people that were

446

00:20:32,660 --> 00:20:30,030

involved in this story that you know to

447

00:20:35,180 --> 00:20:32,670

me it was just the karela the

448

00:20:37,280 --> 00:20:35,190

credibility was incredibly high and I

449

00:20:39,920 --> 00:20:37,290

just wanted to get the details of it you

450

00:20:41,240 --> 00:20:39,930

know the actual nuts and bolts of the

451
00:20:43,610 --> 00:20:41,250
story so that I can write it in a

452
00:20:44,720 --> 00:20:43,620
logical manner so I mean if you know I

453
00:20:47,220 --> 00:20:44,730
don't know if you guys share that kind

454
00:20:49,110 --> 00:20:47,230
of stuff but if anybody wants to to

455
00:20:51,480 --> 00:20:49,120
the article which again is basically the

456
00:20:53,520 --> 00:20:51,490
a tech report without names in it you

457
00:20:56,880 --> 00:20:53,530
got a fighter sweep or you go google

458
00:20:58,890 --> 00:20:56,890
there I was the x-files edition and and

459
00:21:01,020 --> 00:20:58,900
it pops right up so it's a thorough

460
00:21:04,230 --> 00:21:01,030
comprehensive article without anybody's

461
00:21:06,210 --> 00:21:04,240
names other than Dave I want I wanted to

462
00:21:08,659 --> 00:21:06,220
let our listeners know just a little bit

463
00:21:10,980 --> 00:21:08,669

before Frank asks his next question

464

00:21:16,049 --> 00:21:10,990

something that might be obvious to some

465

00:21:19,980 --> 00:21:16,059

listeners and not to others that when we

466

00:21:22,470 --> 00:21:19,990

were talking about Keith or him at first

467

00:21:25,560 --> 00:21:22,480

when Paco was saying that he was talking

468

00:21:29,190 --> 00:21:25,570

about commander flavor and so commander

469

00:21:31,440 --> 00:21:29,200

flavor he he piloted the lead Super

470

00:21:33,330 --> 00:21:31,450

Hornet and he's committing officer of

471

00:21:35,010 --> 00:21:33,340

the Strike Fighter Squadron forty ones

472

00:21:37,289 --> 00:21:35,020

so I just want to make that clear who

473

00:21:39,990 --> 00:21:37,299

commander David flavor is and at Frank's

474

00:21:41,970 --> 00:21:40,000

ro had yeah the next question I was

475

00:21:44,730 --> 00:21:41,980

going to ask was related to the article

476

00:21:47,070 --> 00:21:44,740

itself now that article was cited in the

477

00:21:50,010 --> 00:21:47,080

I guess the introductory kickoff of the

478

00:21:52,680 --> 00:21:50,020

to the Stars Academy and they took a

479

00:21:55,220 --> 00:21:52,690

little bit of heat because they used an

480

00:21:58,789 --> 00:21:55,230

image from the article that was a

481

00:22:01,860 --> 00:21:58,799

basically a number one mylar balloon and

482

00:22:04,049 --> 00:22:01,870

Chris melon had suggested that that was

483

00:22:06,600 --> 00:22:04,059

an actual picture of the tic-tac that

484

00:22:08,880 --> 00:22:06,610

can you explain a little bit about the

485

00:22:11,190 --> 00:22:08,890

process in terms of how the art was

486

00:22:16,039 --> 00:22:11,200

chosen for that particular article yeah

487

00:22:19,710 --> 00:22:16,049

that's a great question so when I in the

488

00:22:20,190 --> 00:22:19,720

in the previous reconning z-- of the

489

00:22:22,650 --> 00:22:20,200

story

490

00:22:24,510 --> 00:22:22,660

I would always show that tic-tac video

491

00:22:25,799 --> 00:22:24,520

last so I would tell you know sit around

492

00:22:27,030 --> 00:22:25,809

a bar whatever have some friends over

493

00:22:28,620 --> 00:22:27,040

for dinner and tell him the story or

494

00:22:30,659 --> 00:22:28,630

have David call and a speaker bone and

495

00:22:31,860 --> 00:22:30,669

tell the story and then I wouldn't show

496

00:22:33,750 --> 00:22:31,870

him that tic-tac video till the end

497

00:22:35,669 --> 00:22:33,760

because it really doesn't make it it

498

00:22:37,560 --> 00:22:35,679

doesn't have any weight to it without

499

00:22:41,880 --> 00:22:37,570

context without the context of the story

500

00:22:43,440 --> 00:22:41,890

or the Crandall and as I was calling

501
00:22:46,860 --> 00:22:43,450
David getting ready to write the article

502
00:22:49,020 --> 00:22:46,870
one of the things he told me was and and

503
00:22:51,049 --> 00:22:49,030
that that video was always on YouTube it

504
00:22:53,150 --> 00:22:51,059
had been on YouTube since I think

505
00:22:55,950 --> 00:22:53,160
2007-2008 you know it was just out there

506
00:22:57,960 --> 00:22:55,960
and it was unremarkable if you didn't

507
00:23:01,020 --> 00:22:57,970
have the story wrapped around it

508
00:23:07,830 --> 00:23:01,030
so in the process of writing the article

509
00:23:10,530 --> 00:23:07,840
2015 I discovered that a tip or somebody

510
00:23:13,350 --> 00:23:10,540
had had taken that video down off of

511
00:23:15,480 --> 00:23:13,360
youtube I think it's since back up again

512
00:23:17,970 --> 00:23:15,490
but at the time it wasn't and so we were

513
00:23:19,860 --> 00:23:17,980

struggling to find some art at fighters

514

00:23:23,160 --> 00:23:19,870

sweep and you know somebody just threw

515

00:23:26,850 --> 00:23:23,170

some standard you know UFO art up there

516

00:23:29,850 --> 00:23:26,860

or so and that you had mentioned the the

517

00:23:32,570 --> 00:23:29,860

video being up and it was for a while

518

00:23:37,380 --> 00:23:32,580

and someone had sent it to a

519

00:23:39,210 --> 00:23:37,390

german-based special effects art house

520

00:23:42,480 --> 00:23:39,220

basically and now they had had it

521

00:23:44,370 --> 00:23:42,490

uploaded for a while it seems like maybe

522

00:23:47,130 --> 00:23:44,380

somebody leaked that a long time ago I

523

00:23:49,170 --> 00:23:47,140

do you have any thoughts about that I'm

524

00:23:50,550 --> 00:23:49,180

purely speculating here I have no

525

00:23:55,680 --> 00:23:50,560

information on this but I'm guessing

526

00:23:57,540 --> 00:23:55,690

that the wizzo had kept a copy of it

527

00:24:01,320 --> 00:23:57,550

which probably is not a hundred cent

528

00:24:02,580 --> 00:24:01,330

legal and you know anonymously put it up

529

00:24:04,050 --> 00:24:02,590

on YouTube just cuz it was such an

530

00:24:07,830 --> 00:24:04,060

amazing thing and you wanted to share it

531

00:24:09,180 --> 00:24:07,840

but that I have zero I don't know who

532

00:24:10,410 --> 00:24:09,190

that I don't know that was I've never

533

00:24:12,780 --> 00:24:10,420

met him before I'm just purely guessing

534

00:24:15,120 --> 00:24:12,790

I'm I'm using my own experience is a you

535

00:24:16,320 --> 00:24:15,130

know a former naval aviator that's

536

00:24:20,810 --> 00:24:16,330

probably something that I would have

537

00:24:24,450 --> 00:24:20,820

done so and since all this has come out

538

00:24:27,120 --> 00:24:24,460

I mean it's been really two years now

539

00:24:29,190 --> 00:24:27,130

and really add that today is the two

540

00:24:32,400 --> 00:24:29,200

year anniversary of the famous New York

541

00:24:36,090 --> 00:24:32,410

Times article featuring Dave and some of

542

00:24:38,460 --> 00:24:36,100

the TTS people Lou Elizondo as well you

543

00:24:41,760 --> 00:24:38,470

know what what do you think about all

544

00:24:43,320 --> 00:24:41,770

this you know my thoughts haven't really

545

00:24:45,750 --> 00:24:43,330

changed that much I mean I wrote the

546

00:24:49,890 --> 00:24:45,760

article two years before the New York

547

00:24:51,960 --> 00:24:49,900

Times wrote their article and again I've

548

00:24:56,610 --> 00:24:51,970

heard the stories for well over ten

549

00:25:00,450 --> 00:24:56,620

years now so I'm I'm uncomfortable with

550

00:25:02,420 --> 00:25:00,460

the way the story unfolds I'm I have no

551
00:25:05,070 --> 00:25:02,430
answers a really any conjecture as to

552
00:25:07,680 --> 00:25:05,080
what they saw what the radar on the

553
00:25:10,560 --> 00:25:07,690
Princeton saw you know what they were

554
00:25:14,610 --> 00:25:10,570
wrapped up with flying you know sort of

555
00:25:15,210 --> 00:25:14,620
a semi dogfight their day I will tell

556
00:25:17,370 --> 00:25:15,220
you the Dave

557
00:25:18,480 --> 00:25:17,380
does not think it's of this world and to

558
00:25:21,029 --> 00:25:18,490
me that carries a lot of weight but

559
00:25:22,020 --> 00:25:21,039
again that's just his opinion you know

560
00:25:24,779 --> 00:25:22,030
there's certain things that are facts

561
00:25:27,140 --> 00:25:24,789
and certain things that are opinions and

562
00:25:30,600 --> 00:25:27,150
he he does not believe it's you know

563
00:25:32,430 --> 00:25:30,610

terrestrial it's I guess by default an

564

00:25:34,529 --> 00:25:32,440

extraterrestrial fair enough

565

00:25:37,140 --> 00:25:34,539

one of the things that he had mentioned

566

00:25:39,000 --> 00:25:37,150

was that when he got that close to the

567

00:25:42,510 --> 00:25:39,010

the rendezvous point with this tic-tac

568

00:25:44,669 --> 00:25:42,520

his radar was jammed and can you tell us

569

00:25:47,700 --> 00:25:44,679

a little bit about does that kind of

570

00:25:52,380 --> 00:25:47,710

thing happen often that seems kind of

571

00:25:54,480 --> 00:25:52,390

unusual yeah no it is very unusual yeah

572

00:25:56,460 --> 00:25:54,490

I've only had mine jammed you know a

573

00:25:59,510 --> 00:25:56,470

couple times during exercises and you

574

00:26:01,440 --> 00:25:59,520

kind of knew it was going to come I

575

00:26:03,960 --> 00:26:01,450

again I'm not sure whether they were

576

00:26:06,270 --> 00:26:03,970

jammed or whether they the radar just

577

00:26:10,140 --> 00:26:06,280

couldn't grab a lock on this thing

578

00:26:12,630 --> 00:26:10,150

although the Princeton's could and you

579

00:26:16,409 --> 00:26:12,640

know in certain modes I guess the the

580

00:26:20,580 --> 00:26:16,419

second wave of super hornets was able to

581

00:26:22,529 --> 00:26:20,590

get a weak track on it so I'm not sure I

582

00:26:24,029 --> 00:26:22,539

do know that nobody was ever able to get

583

00:26:25,950 --> 00:26:24,039

a single target track on it and again

584

00:26:29,490 --> 00:26:25,960

that's that when you hold the flashlight

585

00:26:31,980 --> 00:26:29,500

on that one one place to get the most

586

00:26:35,419 --> 00:26:31,990

information possible so nobody ever was

587

00:26:39,120 --> 00:26:35,429

able to get a single target track on it

588

00:26:41,430 --> 00:26:39,130

okay go ahead what do you got oh yeah

589

00:26:43,850 --> 00:26:41,440

actually I do have something I wanted to

590

00:26:47,669 --> 00:26:43,860

ask him I'm just going to it right now

591

00:26:51,029 --> 00:26:47,679

yeah I wanted to talk about the USS

592

00:26:52,890 --> 00:26:51,039

Princeton wanted to know if you could

593

00:26:55,140 --> 00:26:52,900

let us know what you think may have

594

00:26:56,419 --> 00:26:55,150

happened to their radar data regarding

595

00:26:59,730 --> 00:26:56,429

this incident

596

00:27:01,320 --> 00:26:59,740

well again so I wasn't there I've never

597

00:27:03,690 --> 00:27:01,330

been on the Princeton I don't know

598

00:27:06,060 --> 00:27:03,700

menace amount of experience with you

599

00:27:08,669 --> 00:27:06,070

know that either the spy one or you know

600

00:27:11,010 --> 00:27:08,679

cruisers and destroyers in general all I

601
00:27:13,380 --> 00:27:11,020
can tell you is what I heard from my

602
00:27:16,020 --> 00:27:13,390
friend Dave who knew the commanding

603
00:27:18,299 --> 00:27:16,030
officer at Princeton very well they had

604
00:27:21,779 --> 00:27:18,309
dinner aboard the carrier you know he's

605
00:27:23,340 --> 00:27:21,789
a high ranking department head so he all

606
00:27:27,210 --> 00:27:23,350
the commanding officers would have

607
00:27:29,160 --> 00:27:27,220
meetings and dinners frequently many

608
00:27:32,030 --> 00:27:29,170
times a week

609
00:27:35,280 --> 00:27:32,040
and they talked about the incident and

610
00:27:38,250 --> 00:27:35,290
he never once inferred that anybody came

611
00:27:41,760 --> 00:27:38,260
out to his ship and anybody took any

612
00:27:43,320 --> 00:27:41,770
tapes or anything like that so again I

613
00:27:45,030 --> 00:27:43,330

don't know that that happened or didn't

614

00:27:46,920 --> 00:27:45,040

happen I'm just telling you what Dave

615

00:27:48,780 --> 00:27:46,930

said Dave does not believe that happened

616

00:27:53,220 --> 00:27:48,790

it doesn't make any sense to me again I

617

00:27:56,450 --> 00:27:54,690

these people would talk about stuff like

618

00:27:59,820 --> 00:27:56,460

that they're you know they're not

619

00:28:01,560 --> 00:27:59,830

they're not movie stereotypes there are

620

00:28:03,540 --> 00:28:01,570

real human beings and and if somebody

621

00:28:07,500 --> 00:28:03,550

came out to your ship you would you tell

622

00:28:09,030 --> 00:28:07,510

your friend yeah yeah let me let me jump

623

00:28:11,150 --> 00:28:09,040

in here this is one question I I

624

00:28:14,340 --> 00:28:11,160

definitely want to ask you mentioned

625

00:28:16,820 --> 00:28:14,350

everybody being human beings and one

626

00:28:19,350 --> 00:28:16,830

thing in my very brief experience in

627

00:28:22,560 --> 00:28:19,360

working as an outside contractor on a

628

00:28:24,870 --> 00:28:22,570

naval base one of the highlights of the

629

00:28:27,300 --> 00:28:24,880

day it seemed among all the people in

630

00:28:28,950 --> 00:28:27,310

the Navy at this particular base was

631

00:28:31,820 --> 00:28:28,960

basically busting each other's balls

632

00:28:34,980 --> 00:28:31,830

throughout the day and you had mentioned

633

00:28:38,250 --> 00:28:34,990

David gotten a little bit of a heat from

634

00:28:40,140 --> 00:28:38,260

some of his fellow shipmates after this

635

00:28:43,860 --> 00:28:40,150

had happened and can you tell us a

636

00:28:45,990 --> 00:28:43,870

little bit about that and that just tell

637

00:28:48,660 --> 00:28:46,000

us a little bit about that yeah I mean

638

00:28:50,820 --> 00:28:48,670

you're absolutely right so it's it's a

639

00:28:53,280 --> 00:28:50,830

ruthless you know environment where

640

00:28:56,120 --> 00:28:53,290

people get grief for any little misstep

641

00:29:00,090 --> 00:28:56,130

or you know any slight or precise

642

00:29:01,620 --> 00:29:00,100

perceived sign of weakness but in the

643

00:29:05,340 --> 00:29:01,630

best possible way it's just you know

644

00:29:07,260 --> 00:29:05,350

it's like a fraternity and sorority all

645

00:29:10,080 --> 00:29:07,270

mixed up together and everybody's giving

646

00:29:13,530 --> 00:29:10,090

each other grief the whole time when he

647

00:29:15,000 --> 00:29:13,540

landed back on on the Nimitz and he went

648

00:29:18,140 --> 00:29:15,010

in after every mission you go in to

649

00:29:21,210 --> 00:29:18,150

debrief with carrier operations

650

00:29:24,180 --> 00:29:21,220

intelligence folks and he went in there

651
00:29:26,270 --> 00:29:24,190
to do his debrief and all the

652
00:29:32,160 --> 00:29:26,280
intelligence guys were in tinfoil hats

653
00:29:34,520 --> 00:29:32,170
which is hilarious and it's also I mean

654
00:29:37,200 --> 00:29:34,530
it's just a dick ative of how people

655
00:29:39,850 --> 00:29:37,210
approach the topic at the time you know

656
00:29:42,009 --> 00:29:39,860
in 2004 UFOs were

657
00:29:45,580 --> 00:29:42,019
not a real thing at least not in

658
00:29:49,120 --> 00:29:45,590
people's minds and and had Dave not been

659
00:29:51,730 --> 00:29:49,130
a senior and as serious and respected a

660
00:29:54,250 --> 00:29:51,740
person as he is or and was and had there

661
00:29:58,539 --> 00:29:54,260
not been three other witnesses nobody

662
00:30:00,970 --> 00:29:58,549
would have believed him period you know

663
00:30:03,009 --> 00:30:00,980

even with the Princeton radar footage

664

00:30:07,210 --> 00:30:03,019

and all that kind of stuff so a radar

665

00:30:08,620 --> 00:30:07,220

data and you know the next day every day

666

00:30:11,289 --> 00:30:08,630

there's an airplane put out and the air

667

00:30:13,779 --> 00:30:11,299

plan is kind of a general schedule of

668

00:30:15,610 --> 00:30:13,789

events and not the squadrons write their

669

00:30:18,970 --> 00:30:15,620

own flight schedules based on this air

670

00:30:21,159 --> 00:30:18,980

plan and the air plan has a cartoon and

671

00:30:23,289 --> 00:30:21,169

and you know the guys that write it will

672

00:30:25,450 --> 00:30:23,299

take a Gary Larson cartoon and like a

673

00:30:27,460 --> 00:30:25,460

far side cartoon or Calvin and Hobbes or

674

00:30:29,289 --> 00:30:27,470

something like that and whatever fits

675

00:30:31,389 --> 00:30:29,299

the mood and then they'll change the

676

00:30:32,950 --> 00:30:31,399

dialogue to make it you know fit this

677

00:30:34,750 --> 00:30:32,960

specific incident and they're always

678

00:30:37,240 --> 00:30:34,760

sort of gently ribbing or maybe less

679

00:30:38,860 --> 00:30:37,250

than gently living somebody whoever the

680

00:30:42,279 --> 00:30:38,870

target of that cartoon is and on the

681

00:30:45,039 --> 00:30:42,289

next day's air plan you know dave was

682

00:30:47,259 --> 00:30:45,049

lampooned a little bit you know there

683

00:30:49,870 --> 00:30:47,269

was a picture of a UFO that had crashed

684

00:30:51,759 --> 00:30:49,880

in the ocean and people were aliens were

685

00:30:54,759 --> 00:30:51,769

swimming away while there's an f-18

686

00:30:56,110 --> 00:30:54,769

flying away you know and the caption is

687

00:30:58,539 --> 00:30:56,120

something to the effect that you know

688

00:31:00,100 --> 00:30:58,549

the UFO never stood a chance against the

689

00:31:02,230 --> 00:31:00,110

amazing fighter pilot you know Dave

690

00:31:04,899 --> 00:31:02,240

flavour but well but nothing that rose

691

00:31:07,750 --> 00:31:04,909

to the level of being abusive and then

692

00:31:09,129 --> 00:31:07,760

no no negative ramifications on anyone's

693

00:31:13,360 --> 00:31:09,139

career that you're aware of

694

00:31:14,889 --> 00:31:13,370

no absolutely not okay I have a question

695

00:31:16,720 --> 00:31:14,899

for you I'm sorry interrupt but I wanted

696

00:31:18,669 --> 00:31:16,730

to ask you a follow-up because you're

697

00:31:22,419 --> 00:31:18,679

talking about you guys were talking

698

00:31:25,419 --> 00:31:22,429

about a UFO the topic of it being a

699

00:31:29,169 --> 00:31:25,429

threat if you don't think the tick-tack

700

00:31:31,509 --> 00:31:29,179

or a UFO is a threat then what would you

701
00:31:33,580 --> 00:31:31,519
say to those who are concerned that this

702
00:31:36,279 --> 00:31:33,590
type of encounter might happen off the

703
00:31:38,200 --> 00:31:36,289
coast of Iran for example couldn't there

704
00:31:40,060 --> 00:31:38,210
be a possibility of an encounter with

705
00:31:41,590 --> 00:31:40,070
another government who might turn out

706
00:31:43,149 --> 00:31:41,600
that might turn out differently than

707
00:31:45,419 --> 00:31:43,159
what's what happened with ours with the

708
00:31:48,070 --> 00:31:45,429
tic-tock could they respond differently

709
00:31:51,100 --> 00:31:48,080
other governments could be armed is

710
00:31:53,090 --> 00:31:51,110
there a possibility of starting a war

711
00:31:54,769 --> 00:31:53,100
over something like that

712
00:31:56,960 --> 00:31:54,779
by the way those two last questions I

713
00:31:59,149 --> 00:31:56,970

just asked came from Phoenix MUFON and

714

00:32:01,039 --> 00:31:59,159

that was the one about the Princeton and

715

00:32:02,899 --> 00:32:01,049

the radar data and then this one from

716

00:32:05,749 --> 00:32:02,909

them regarding if you don't think the

717

00:32:07,850 --> 00:32:05,759

tic-tac is a UFO or a UFO as a threat

718

00:32:09,379 --> 00:32:07,860

then what would you say to those who are

719

00:32:11,960 --> 00:32:09,389

concerned that this type of encounter

720

00:32:14,269 --> 00:32:11,970

could happen for example off the coast

721

00:32:15,940 --> 00:32:14,279

of Iran couldn't there be a possibility

722

00:32:18,560 --> 00:32:15,950

of an encounter with another government

723

00:32:20,539 --> 00:32:18,570

that might take that threat very as a

724

00:32:23,419 --> 00:32:20,549

threat and take it very seriously and

725

00:32:29,440 --> 00:32:23,429

respond in a manner that could be World

726

00:32:41,740 --> 00:32:37,789

okay I do know that one of the reasons

727

00:32:45,889 --> 00:32:41,750

that that a tip investigation from 2009

728

00:32:48,649 --> 00:32:45,899

was commissioned was because you know

729

00:32:50,710 --> 00:32:48,659

they wanted to see what this thing was

730

00:32:54,490 --> 00:32:50,720

or learn as much as they could about it

731

00:32:57,889 --> 00:32:54,500

because none of the carrier's defenses

732

00:33:00,200 --> 00:32:57,899

were able to to deal with it right so if

733

00:33:02,149 --> 00:33:00,210

it had been a threat on the Battle of

734

00:33:04,879 --> 00:33:02,159

the Carrier Strike Group or against the

735

00:33:06,590 --> 00:33:04,889

f-18s there was nothing that we could

736

00:33:09,830 --> 00:33:06,600

have done we couldn't have attracted we

737

00:33:11,330 --> 00:33:09,840

couldn't have shot anything at it we

738

00:33:13,610 --> 00:33:11,340

were defenseless against it and that's

739

00:33:14,960 --> 00:33:13,620

what the investigation kind of centered

740

00:33:19,039 --> 00:33:14,970

on or at least the launching point for

741

00:33:21,259 --> 00:33:19,049

it whether I think another nation such

742

00:33:25,220 --> 00:33:21,269

as Iran could launch World War 3 based

743

00:33:28,850 --> 00:33:25,230

on a tic-tac you know going into the

744

00:33:30,049 --> 00:33:28,860

waters I I mean that's a stretch I don't

745

00:33:31,490 --> 00:33:30,059

know first of all I don't know that Iran

746

00:33:32,950 --> 00:33:31,500

could start World War 3 they don't have

747

00:33:36,289 --> 00:33:32,960

a nuclear weapon they don't have a

748

00:33:38,659 --> 00:33:36,299

military big enough to really achieve

749

00:33:41,049 --> 00:33:38,669

that kind of military critical mass to

750

00:33:43,789 --> 00:33:41,059

start World War 3

751

00:33:46,460 --> 00:33:43,799

China and Russia could start over three

752

00:33:48,200 --> 00:33:46,470

they have obviously thousands of nuclear

753

00:33:49,879 --> 00:33:48,210

weapons and they have massive militaries

754

00:33:52,610 --> 00:33:49,889

and they could you know get other

755

00:33:55,279 --> 00:33:52,620

nations involved we know we know that

756

00:33:58,220 --> 00:33:55,289

Russia and India for example they have a

757

00:34:01,850 --> 00:33:58,230

much faster missile then we do my

758

00:34:04,190 --> 00:34:01,860

understanding on that so regarding any

759

00:34:07,070 --> 00:34:04,200

other country do you feel it's possible

760

00:34:10,609 --> 00:34:07,080

that they could view a UFO as a threat

761

00:34:14,450 --> 00:34:10,619

and view it in a warlike fashion or yeah

762

00:34:16,010 --> 00:34:14,460

or react in that manner they may I mean

763

00:34:18,680 --> 00:34:16,020

it's I don't know how somebody's gonna

764

00:34:21,440 --> 00:34:18,690

react so the the tic-tac when it was off

765

00:34:23,869 --> 00:34:21,450

the coast of San Diego didn't do

766

00:34:26,299 --> 00:34:23,879

anything that could be deemed as

767

00:34:27,859 --> 00:34:26,309

offensive right it just was it seemed

768

00:34:30,020 --> 00:34:27,869

like it was going about its own business

769

00:34:32,809 --> 00:34:30,030

it wasn't buzzing around the ship it

770

00:34:35,299 --> 00:34:32,819

wasn't you know interacting with the

771

00:34:37,879 --> 00:34:35,309

Hornets in a way that made them feel

772

00:34:39,589 --> 00:34:37,889

really defensive like Dave and his women

773

00:34:42,909 --> 00:34:39,599

never felt threatened they were just

774

00:34:44,869 --> 00:34:42,919

super curious and and you know they were

775

00:34:46,250 --> 00:34:44,879

aggressively trying to get closer to

776

00:34:47,990 --> 00:34:46,260

this thing but they never thought that

777

00:34:50,089 --> 00:34:48,000

they needed to you know defend

778

00:34:51,559 --> 00:34:50,099

themselves or they they never wished

779

00:34:52,520 --> 00:34:51,569

that they had weapons on board or

780

00:34:53,780 --> 00:34:52,530

anything like that and they were just

781

00:34:54,440 --> 00:34:53,790

like what the hell is this and let's go

782

00:34:57,230 --> 00:34:54,450

check it out

783

00:34:59,120 --> 00:34:57,240

all right the bat the Princeton you know

784

00:35:01,579 --> 00:34:59,130

which was tracking the tic-tac on the on

785

00:35:03,380 --> 00:35:01,589

its radar it never at any point it never

786

00:35:04,700 --> 00:35:03,390

felt threatened in fact the commanding

787

00:35:07,990 --> 00:35:04,710

officer the ship was like I don't know

788

00:35:11,870 --> 00:35:09,950

obviously that's different

789

00:35:14,180 --> 00:35:11,880

all right because we know a little bit

790

00:35:15,170 --> 00:35:14,190

more about it and there was some other

791

00:35:19,190 --> 00:35:15,180

stuff that happened off the east coast

792

00:35:21,770 --> 00:35:19,200

with aircraft and off the Roosevelt so

793

00:35:24,079 --> 00:35:21,780

but even still in that instance nobody

794

00:35:25,760 --> 00:35:24,089

ever really felt threatened nobody felt

795

00:35:29,390 --> 00:35:25,770

that it was a curiosity more than

796

00:35:31,160 --> 00:35:29,400

anything else now that doesn't mean that

797

00:35:33,049 --> 00:35:31,170

the Iranians wouldn't see something

798

00:35:34,940 --> 00:35:33,059

floating off their coast and go after it

799

00:35:36,200 --> 00:35:34,950

or the Russians you know it in and you

800

00:35:38,180 --> 00:35:36,210

mentioned they have the hypersonic

801
00:35:39,530 --> 00:35:38,190
weapons but they're still development

802
00:35:40,789 --> 00:35:39,540
and and even if you have something

803
00:35:44,920 --> 00:35:40,799
that's incredibly fast it doesn't mean

804
00:35:47,180 --> 00:35:44,930
it could target a tic-tac it doesn't and

805
00:35:50,599 --> 00:35:47,190
it's still not gonna be anywhere near as

806
00:35:53,089 --> 00:35:50,609
fast is multi Mach as fast as that

807
00:35:54,829 --> 00:35:53,099
tic-tac was going so yeah I just a part

808
00:35:57,920 --> 00:35:54,839
no I let me yeah I want to follow up on

809
00:35:59,690 --> 00:35:57,930
that with the pocker was just talking

810
00:36:03,589 --> 00:35:59,700
about a little bit we see once in awhile

811
00:36:05,510 --> 00:36:03,599
now and again video from US Navy ships

812
00:36:10,130 --> 00:36:05,520
where they are literally getting buzzed

813
00:36:11,569 --> 00:36:10,140

by MiG's and how did they get so close

814

00:36:14,770 --> 00:36:11,579

how does that happen

815

00:36:17,089 --> 00:36:14,780

and what's the usual response to that

816

00:36:18,829 --> 00:36:17,099

well that's been happening you know

817

00:36:20,290 --> 00:36:18,839

since the end of World War two since the

818

00:36:23,170 --> 00:36:20,300

dawn of the jet age you know

819

00:36:29,400 --> 00:36:23,180

this is a dance that's been going on

820

00:36:32,200 --> 00:36:29,410

beyond the public's view for 6070 years

821

00:36:34,240 --> 00:36:32,210

it's just a it's just a game that these

822

00:36:35,980 --> 00:36:34,250

nations play with us and we play it with

823

00:36:37,990 --> 00:36:35,990

them you know we go we want to go check

824

00:36:39,820 --> 00:36:38,000

out a ship and and when you go check it

825

00:36:42,220 --> 00:36:39,830

out use your FLIR to take as much videos

826
00:36:44,140 --> 00:36:42,230
you can and glean as much intelligence

827
00:36:46,390 --> 00:36:44,150
information as you can and they don't

828
00:36:48,340 --> 00:36:46,400
like that so they send a fighter out to

829
00:36:50,140 --> 00:36:48,350
do a fighter to intercept many miles

830
00:36:52,060 --> 00:36:50,150
away and do a fighter escort and they

831
00:36:54,610 --> 00:36:52,070
you know the rule is you always want to

832
00:36:59,320 --> 00:36:54,620
have one of your planes between the ship

833
00:37:02,920 --> 00:36:59,330
and the enemy airplane so it's been

834
00:37:04,540 --> 00:37:02,930
going on forever it's just that you know

835
00:37:05,890 --> 00:37:04,550
the tools to report this kind of stuff

836
00:37:07,780 --> 00:37:05,900
are more sophisticated than they ever

837
00:37:12,700 --> 00:37:07,790
were and there's a 24-hour news channel

838
00:37:14,380 --> 00:37:12,710

or a news cycle that that is interested

839

00:37:15,970 --> 00:37:14,390

in stuff like that but it's not new

840

00:37:17,860 --> 00:37:15,980

certainly not new to the people in the

841

00:37:20,230 --> 00:37:17,870

military does that regard it is that

842

00:37:22,180 --> 00:37:20,240

kind of an annoyance or is it just that

843

00:37:25,240 --> 00:37:22,190

well you know they're doing the same job

844

00:37:27,520 --> 00:37:25,250

we are so we kind of respect a little

845

00:37:29,890 --> 00:37:27,530

bit or every now what are the feelings

846

00:37:32,740 --> 00:37:29,900

on that type of thing yeah I mean it's

847

00:37:35,710 --> 00:37:32,750

you know it's it's titillating it's

848

00:37:36,970 --> 00:37:35,720

thrilling you know it's there here come

849

00:37:38,770 --> 00:37:36,980

you know they're coming they're coming

850

00:37:40,960 --> 00:37:38,780

you could tell you pick them up on radar

851

00:37:43,930 --> 00:37:40,970

you know there's there's this whole

852

00:37:46,420 --> 00:37:43,940

network of interconnected intelligence

853

00:37:49,270 --> 00:37:46,430

gathering pools you know including

854

00:37:52,600 --> 00:37:49,280

satellites and human intelligence and

855

00:37:55,090 --> 00:37:52,610

you know long-range radars in Alaska and

856

00:37:56,800 --> 00:37:55,100

Nova Scotia and stuff like that so it's

857

00:37:59,560 --> 00:37:56,810

not like they're sneaking up on us we

858

00:38:01,180 --> 00:37:59,570

know they're there and then you send out

859

00:38:04,440 --> 00:38:01,190

a fighter to intercept them a long way

860

00:38:07,210 --> 00:38:04,450

away and escort them through there

861

00:38:08,590 --> 00:38:07,220

through their rendezvous with the ship

862

00:38:09,910 --> 00:38:08,600

or whatever and then you know like I

863

00:38:14,050 --> 00:38:09,920

said we do the same thing to them you

864

00:38:16,210 --> 00:38:14,060

know we send p3s to look at the Chinese

865

00:38:18,930 --> 00:38:16,220

in the South China Sea and into the

866

00:38:21,220 --> 00:38:18,940

Black Sea we send ships to shadow

867

00:38:23,230 --> 00:38:21,230

Russian ships in the Black Sea all the

868

00:38:26,350 --> 00:38:23,240

time because those are international

869

00:38:29,050 --> 00:38:26,360

waters so we we exercise our rights to

870

00:38:31,420 --> 00:38:29,060

fly and sail in international waters and

871

00:38:34,060 --> 00:38:31,430

whether they like it or not um is it

872

00:38:36,640 --> 00:38:34,070

illegal for branches of government

873

00:38:42,250 --> 00:38:36,650

secretly scheduler stack exercises on

874

00:38:45,610 --> 00:38:42,260

top of each other illegal I don't know

875

00:38:49,630 --> 00:38:45,620

it's not done doesn't make any sense to

876

00:38:51,610 --> 00:38:49,640

do anything like that I covered this a

877

00:38:53,770 --> 00:38:51,620

little bit in a previous discussion but

878

00:38:56,890 --> 00:38:53,780

that's not the way that weapon systems

879

00:38:59,670 --> 00:38:56,900

are tested it doesn't make any sense to

880

00:39:04,090 --> 00:38:59,680

to to do things like that because

881

00:39:05,590 --> 00:39:04,100

there's no real benefit to to sneaking

882

00:39:07,270 --> 00:39:05,600

up on somebody like that you're not

883

00:39:10,200 --> 00:39:07,280

necessarily gonna get you you want to

884

00:39:13,930 --> 00:39:10,210

test things in a controlled way and

885

00:39:16,180 --> 00:39:13,940

increase the challenge of your testing

886

00:39:18,940 --> 00:39:16,190

as much as possible but in a logical and

887

00:39:22,180 --> 00:39:18,950

stair-stepped manner and I think you're

888

00:39:23,650 --> 00:39:22,190

alluding to the fact or the the the

889

00:39:27,580 --> 00:39:23,660

question as to whether or not this was a

890

00:39:30,880 --> 00:39:27,590

us tick attack a us build technology

891

00:39:35,230 --> 00:39:30,890

that was testing itself against a

892

00:39:36,580 --> 00:39:35,240

carrier strike group for a hundred

893

00:39:37,480 --> 00:39:36,590

thousand reasons that doesn't make any

894

00:39:41,320 --> 00:39:37,490

sense

895

00:39:43,180 --> 00:39:41,330

the least of which is you know you don't

896

00:39:44,320 --> 00:39:43,190

want to have these planes come into

897

00:39:46,930 --> 00:39:44,330

contact with this thing and then

898

00:39:48,730 --> 00:39:46,940

somebody crash and die and then now you

899

00:39:54,370 --> 00:39:48,740

for no reason you've killed somebody or

900

00:39:56,980 --> 00:39:54,380

two people or four people if you if you

901
00:39:59,320 --> 00:39:56,990
if we built this tic-tac this is us

902
00:40:02,410 --> 00:39:59,330
technology and assuming it's built in

903
00:40:04,300 --> 00:40:02,420
area 51 and it's gonna be the most

904
00:40:07,000 --> 00:40:04,310
expensive thing that anybody in the

905
00:40:09,760 --> 00:40:07,010
world has ever built then it would be

906
00:40:11,230 --> 00:40:09,770
child's play to take a spy-1 radar like

907
00:40:13,600 --> 00:40:11,240
the one that's on the Princeton and

908
00:40:17,080 --> 00:40:13,610
bring it out to the desert and have this

909
00:40:18,640 --> 00:40:17,090
thing fly against the spy-1 radar and to

910
00:40:20,380 --> 00:40:18,650
get an f-18 and bring it out to the

911
00:40:24,100 --> 00:40:20,390
desert and have the f-18 fly against the

912
00:40:27,670 --> 00:40:24,110
tic-tac there's there's no value to that

913
00:40:29,860 --> 00:40:27,680

test as as as it would have been with

914

00:40:30,660 --> 00:40:29,870

the 2004 Nimitz incident that it doesn't

915

00:40:32,650 --> 00:40:30,670

make any sense

916

00:40:35,440 --> 00:40:32,660

nobody would design a test I've been

917

00:40:37,240 --> 00:40:35,450

understood so how likely is it and by

918

00:40:39,010 --> 00:40:37,250

the way that last question was the last

919

00:40:40,630 --> 00:40:39,020

question I'll ask of Phoenix MUFON so

920

00:40:43,540 --> 00:40:40,640

that was a question fronted from their

921

00:40:45,460 --> 00:40:43,550

team how likely is it that we can

922

00:40:47,000 --> 00:40:45,470

reverse-engineer the technology that has

923

00:40:49,520 --> 00:40:47,010

seen in the these

924

00:40:51,560 --> 00:40:49,530

tic-tac another UFOs on earth with our

925

00:40:55,580 --> 00:40:51,570

current technology that we may have

926
00:40:56,780 --> 00:40:55,590
given that the et technology allegedly

927
00:40:59,360 --> 00:40:56,790
could be thousands or even millions

928
00:41:02,000 --> 00:40:59,370
ahead of our technology that is from a

929
00:41:02,390 --> 00:41:02,010
neuroscientist that question I'll read

930
00:41:07,700 --> 00:41:02,400
it again

931
00:41:10,360 --> 00:41:07,710
in your opinion well if he is indeed a

932
00:41:12,410 --> 00:41:10,370
neuroscientist and he is far more

933
00:41:14,810 --> 00:41:12,420
qualified to answer that question than I

934
00:41:18,800 --> 00:41:14,820
am I you know just a fighter pilot in

935
00:41:21,400 --> 00:41:18,810
the Navy I would imagine that you know

936
00:41:24,920 --> 00:41:21,410
if we indeed got our hands on some

937
00:41:26,570 --> 00:41:24,930
extraterrestrial tech we would throw it

938
00:41:28,750 --> 00:41:26,580

would make the Manhattan Project look

939

00:41:31,730 --> 00:41:28,760

you know like a kindergarten you know

940

00:41:34,090 --> 00:41:31,740

group project you know we would pull in

941

00:41:35,840 --> 00:41:34,100

the best and the brightest from

942

00:41:38,930 --> 00:41:35,850

everywhere that we could get our hands

943

00:41:41,630 --> 00:41:38,940

on and and you know throw them at this

944

00:41:47,060 --> 00:41:41,640

problem I don't know I don't know I'm

945

00:41:48,860 --> 00:41:47,070

not an engineer I don't know the first

946

00:41:51,260 --> 00:41:48,870

engineering works other than sort of the

947

00:41:55,430 --> 00:41:51,270

obvious you take a part in you you make

948

00:41:56,900 --> 00:41:55,440

it again it would be interesting that to

949

00:41:58,910 --> 00:41:56,910

me that's a that's an interesting

950

00:42:01,040 --> 00:41:58,920

proposition it'd be kind of cool if that

951

00:42:03,170 --> 00:42:01,050

were true but I have no data on that

952

00:42:05,380 --> 00:42:03,180

okay and that question was from Roger a

953

00:42:08,600 --> 00:42:05,390

Stankovic she's the director of

954

00:42:12,070 --> 00:42:08,610

Australia MUFON we have one from Ruben

955

00:42:15,320 --> 00:42:12,080

Uriarte who's a director of MUFON in

956

00:42:18,290 --> 00:42:15,330

believe it's Northern California he says

957

00:42:21,020 --> 00:42:18,300

Paco have you had contact from military

958

00:42:24,440 --> 00:42:21,030

pilots from other countries who have had

959

00:42:26,030 --> 00:42:24,450

you a PE / UFO encounters if so do you

960

00:42:31,400 --> 00:42:26,040

mind sharing a few of those if you have

961

00:42:33,950 --> 00:42:31,410

any to share I'm not in fact you know I

962

00:42:35,510 --> 00:42:33,960

feel like I'm very underwhelming and in

963

00:42:38,540 --> 00:42:35,520

this UFO world because I've only really

964

00:42:39,860 --> 00:42:38,550

had any expertise with this nimitz

965

00:42:43,190 --> 00:42:39,870

incident because i know dave raver

966

00:42:46,040 --> 00:42:43,200

really well I have not had any contact

967

00:42:47,630 --> 00:42:46,050

with other people that have had you know

968

00:42:49,490 --> 00:42:47,640

what I consider credible I've had some

969

00:42:51,590 --> 00:42:49,500

other people come up and say they've

970

00:42:54,650 --> 00:42:51,600

seen UFOs but you know there's no

971

00:42:56,540 --> 00:42:54,660

there's no proof and there's no there's

972

00:42:58,760 --> 00:42:56,550

no video there's no radar returns or

973

00:42:59,430 --> 00:42:58,770

anything like that so no yes would be

974

00:43:03,000 --> 00:42:59,440

now

975

00:43:05,549 --> 00:43:03,010

okay up Frank did you have a question

976

00:43:09,299 --> 00:43:05,559

because I did have one from Irina Scott

977

00:43:13,470 --> 00:43:09,309

dr. finish up was your question okay so

978

00:43:15,150 --> 00:43:13,480

uh so dr. arena Scott she worked for the

979

00:43:17,210 --> 00:43:15,160

government for a long period of time and

980

00:43:20,250 --> 00:43:17,220

her husband actually works at area 51

981

00:43:22,710 --> 00:43:20,260

she says she has a few questions she

982

00:43:25,170 --> 00:43:22,720

says does anyone know any more about the

983

00:43:28,349 --> 00:43:25,180

other objects seen initially and did

984

00:43:31,650 --> 00:43:28,359

anyone tape the returns of a AVS that

985

00:43:33,900 --> 00:43:31,660

would drop from the ATK to hover about

986

00:43:37,410 --> 00:43:33,910

50 feet off the water in a matter of

987

00:43:39,569 --> 00:43:37,420

seconds and similar acrobatics and then

988

00:43:43,140 --> 00:43:39,579

as she wanted to know is there any

989

00:43:44,730 --> 00:43:43,150

information about why you think she I'll

990

00:43:46,529 --> 00:43:44,740

just read it as she wrote it is there

991

00:43:49,289 --> 00:43:46,539

any information about why he thinks his

992

00:43:50,910 --> 00:43:49,299

radar was unable to lock on the object

993

00:43:53,579 --> 00:43:50,920

when it was so close I think you kind of

994

00:43:55,559 --> 00:43:53,589

already explained that and what were the

995

00:43:57,660 --> 00:43:55,569

jamming indications I think you may have

996

00:44:00,720 --> 00:43:57,670

already gone over that and has he heard

997

00:44:03,539 --> 00:44:00,730

anything about how even newer radar

998

00:44:06,000 --> 00:44:03,549

performs and is there any information

999

00:44:08,579 --> 00:44:06,010

that they have equipped ships and planes

1000

00:44:12,569 --> 00:44:08,589

with more of the type of radar detected

1001
00:44:14,250 --> 00:44:12,579
the that detected the Avs and is there

1002
00:44:15,779 --> 00:44:14,260
any information that similar events have

1003
00:44:16,920 --> 00:44:15,789
happened or are being censored by the

1004
00:44:18,930 --> 00:44:16,930
government so it looks like she has

1005
00:44:21,210 --> 00:44:18,940
quite a few questions sir I think you

1006
00:44:23,579 --> 00:44:21,220
answered a few of them but let's start

1007
00:44:25,769 --> 00:44:23,589
off with one and does anyone know any

1008
00:44:27,660 --> 00:44:25,779
more about the other objects seen

1009
00:44:30,089 --> 00:44:27,670
initially and did anyone tape the

1010
00:44:33,029 --> 00:44:30,099
returns of a AVS that would drop from

1011
00:44:34,589 --> 00:44:33,039
the ADK to hover about 50 feet off the

1012
00:44:38,400 --> 00:44:34,599
water in a matter of seconds and similar

1013
00:44:39,990 --> 00:44:38,410

acrobatics so from what I understand

1014

00:44:45,569 --> 00:44:40,000

there was nothing was taped nothing was

1015

00:44:49,890 --> 00:44:45,579

recorded so the only video or the only

1016

00:44:53,180 --> 00:44:49,900

recording that was sent back to Third

1017

00:44:55,769 --> 00:44:53,190

Fleet intelligence was that video from

1018

00:44:58,559 --> 00:44:55,779

the second wave of Hornets that went out

1019

00:45:03,660 --> 00:44:58,569

the tic-tac video that we all know and

1020

00:45:06,680 --> 00:45:03,670

love at this point in Princeton as far

1021

00:45:10,200 --> 00:45:06,690

as I understand from Dave the Princeton

1022

00:45:11,970 --> 00:45:10,210

spy-1 radar tapes they don't record that

1023

00:45:12,640 --> 00:45:11,980

or if they do they just tape right over

1024

00:45:19,180 --> 00:45:12,650

it

1025

00:45:21,490 --> 00:45:19,190

there were no other tapes and have you

1026

00:45:23,350 --> 00:45:21,500

heard about how whatever other questions

1027

00:45:24,820 --> 00:45:23,360

was because we're gonna we're skipping

1028

00:45:26,740 --> 00:45:24,830

past the jammy indications because you

1029

00:45:28,690 --> 00:45:26,750

already went over jamming and you are

1030

00:45:31,720 --> 00:45:28,700

ready went over go ahead

1031

00:45:33,700 --> 00:45:31,730

yes specifically the indication of

1032

00:45:37,270 --> 00:45:33,710

jamming at least on that video on the

1033

00:45:39,430 --> 00:45:37,280

Fleur video that you see so when you're

1034

00:45:41,650 --> 00:45:39,440

closing in on a target you get what's

1035

00:45:44,530 --> 00:45:41,660

called a V subsea velocity of closure

1036

00:45:48,460 --> 00:45:44,540

and that will pop up on your radar and

1037

00:45:50,140 --> 00:45:48,470

it'll show the the velocity that the two

1038

00:45:52,030 --> 00:45:50,150

objects are coming towards each other so

1039

00:45:53,320 --> 00:45:52,040

you know your speed say you're going 300

1040

00:45:54,430 --> 00:45:53,330

miles an hour and the other object is

1041

00:45:57,480 --> 00:45:54,440

coming at you through outer miles an

1042

00:46:00,670 --> 00:45:57,490

hour you v6e would be 600 miles an hour

1043

00:46:03,700 --> 00:46:00,680

one of the strong indications of jamming

1044

00:46:05,050 --> 00:46:03,710

is a V sub C of 99 9 at least in that

1045

00:46:07,390 --> 00:46:05,060

piece of equipment that they had that

1046

00:46:09,220 --> 00:46:07,400

day which means basically it's not

1047

00:46:11,530 --> 00:46:09,230

getting any data it's not getting enough

1048

00:46:14,350 --> 00:46:11,540

radar return or information to be able

1049

00:46:16,450 --> 00:46:14,360

to build a track file that would say

1050

00:46:20,010 --> 00:46:16,460

this is our closure on this thing

1051
00:46:23,350 --> 00:46:20,020
so there were there were a couple other

1052
00:46:24,610 --> 00:46:23,360
indications of jamming that I think are

1053
00:46:26,050 --> 00:46:24,620
classified so I'm not gonna go into

1054
00:46:29,320 --> 00:46:26,060
those but that's an easy one and it's on

1055
00:46:31,590 --> 00:46:29,330
the it's on the it's on the tic-tock

1056
00:46:34,390 --> 00:46:31,600
video itself you can see the 999 s there

1057
00:46:36,100 --> 00:46:34,400
okay and then we already kind of went

1058
00:46:42,480 --> 00:46:36,110
over why you think radar was unable to

1059
00:46:46,840 --> 00:46:44,890
yeah I know that it wasn't I don't know

1060
00:46:48,610 --> 00:46:46,850
why and there's a couple of there's a

1061
00:46:50,620 --> 00:46:48,620
cup there's basically two explanations

1062
00:46:52,510 --> 00:46:50,630
for the inability to lock on something

1063
00:46:55,510 --> 00:46:52,520

one is that its stealth right like a

1064

00:46:58,090 --> 00:46:55,520

modern stealth fighter that it's

1065

00:47:01,330 --> 00:46:58,100

designed in such a way to either radar

1066

00:47:03,250 --> 00:47:01,340

absorb the radar energy or deflect it

1067

00:47:05,710 --> 00:47:03,260

elsewhere so that it doesn't go back to

1068

00:47:08,620 --> 00:47:05,720

its source right there to pick up a

1069

00:47:11,560 --> 00:47:08,630

returned a fighter plane needs to send

1070

00:47:13,090 --> 00:47:11,570

out energy from its radar it bounces off

1071

00:47:16,990 --> 00:47:13,100

the object the target and comes right

1072

00:47:19,780 --> 00:47:17,000

back to the the fighter plane if it's

1073

00:47:21,370 --> 00:47:19,790

say you know bounced up into space or

1074

00:47:23,260 --> 00:47:21,380

elsewhere then you don't get that energy

1075

00:47:25,660 --> 00:47:23,270

back you don't get any rate over terms

1076

00:47:26,450 --> 00:47:25,670

you have no information so that's one

1077

00:47:29,720 --> 00:47:26,460

information

1078

00:47:32,329 --> 00:47:29,730

one possibilities that was some sort of

1079

00:47:34,820 --> 00:47:32,339

very sophisticated stealth and the other

1080

00:47:37,160 --> 00:47:34,830

is that it was using jamming or both

1081

00:47:40,160 --> 00:47:37,170

right I mean like you know f-35 Fighters

1082

00:47:41,510 --> 00:47:40,170

use both they use jamming and stealth so

1083

00:47:43,760 --> 00:47:41,520

that they're not picked up on radar so

1084

00:47:45,470 --> 00:47:43,770

okay so I would like to ask you a kind

1085

00:47:47,630 --> 00:47:45,480

of a point-blank question because I'm

1086

00:47:50,810 --> 00:47:47,640

confused and I'm going to come across as

1087

00:47:53,270 --> 00:47:50,820

a novice here so bear with me if

1088

00:47:58,880 --> 00:47:53,280

commander flavor believes that this

1089

00:48:01,099 --> 00:47:58,890

could be et technology could be a

1090

00:48:04,940 --> 00:48:01,109

related technology regarding the

1091

00:48:08,240 --> 00:48:04,950

tick-tock and you believe it's not no no

1092

00:48:09,940 --> 00:48:08,250

I didn't say that okay so so then thank

1093

00:48:13,760 --> 00:48:09,950

you for correcting me on that by the way

1094

00:48:17,839 --> 00:48:13,770

let me just ask you do you believe that

1095

00:48:20,990 --> 00:48:17,849

this tick-tock was et technology related

1096

00:48:26,020 --> 00:48:21,000

or the technology may have been derived

1097

00:48:28,430 --> 00:48:26,030

from et related technology or it was our

1098

00:48:32,690 --> 00:48:28,440

technology or another first world

1099

00:48:37,430 --> 00:48:32,700

governments technology and it was in our

1100

00:48:43,490 --> 00:48:37,440

airspace or other which of those do you

1101
00:48:46,430 --> 00:48:43,500
think it was well I mean it's a hundred

1102
00:48:48,410 --> 00:48:46,440
percent conjecture at this point I don't

1103
00:48:51,380 --> 00:48:48,420
have I don't have the information to

1104
00:48:53,780 --> 00:48:51,390
really give you a solid answer Dave

1105
00:48:56,240 --> 00:48:53,790
believes it's from another world that's

1106
00:48:58,640 --> 00:48:56,250
I'm gonna put a lot of credibility to

1107
00:49:01,700 --> 00:48:58,650
that because he and his other three

1108
00:49:03,380 --> 00:49:01,710
eyewitnesses saw it and he you know he

1109
00:49:05,030 --> 00:49:03,390
was a fighter pilot for 20 years he saw

1110
00:49:09,260 --> 00:49:05,040
things that flew all the time and that

1111
00:49:11,900 --> 00:49:09,270
was his job I don't believe it's US tech

1112
00:49:14,450 --> 00:49:11,910
or US tech that's developed from a UFO

1113
00:49:15,859 --> 00:49:14,460

because we're not a country that's

1114

00:49:18,020 --> 00:49:15,869

really good at keeping secrets we're a

1115

00:49:20,300 --> 00:49:18,030

very open society somebody would have

1116

00:49:22,849 --> 00:49:20,310

said something about it and we've been

1117

00:49:24,920 --> 00:49:22,859

developing this what is considered the

1118

00:49:27,620 --> 00:49:24,930

most expensive weapon system ever built

1119

00:49:29,510 --> 00:49:27,630

the strike fighter program for the last

1120

00:49:31,280 --> 00:49:29,520

15 to 20 years

1121

00:49:36,560 --> 00:49:31,290

you know if we're developing another

1122

00:49:38,200 --> 00:49:36,570

even more expensive and something that

1123

00:49:41,960 --> 00:49:38,210

would render the after

1124

00:49:43,130 --> 00:49:41,970

the useless you know it makes no sense

1125

00:49:49,790 --> 00:49:43,140

to me right why would you do both of

1126

00:49:52,130 --> 00:49:49,800

those things build a wall built a

1127

00:49:53,870 --> 00:49:52,140

balloon built you know Fantasy Island

1128

00:49:56,150 --> 00:49:53,880

whatever it's trillions of dollars that

1129

00:49:58,160 --> 00:49:56,160

you're spending and wasting so I don't

1130

00:50:05,140 --> 00:49:58,170

for the same reason I don't believe that

1131

00:50:09,020 --> 00:50:05,150

it's a foreign powers technology because

1132

00:50:11,330 --> 00:50:09,030

something of that magnitude you wouldn't

1133

00:50:15,310 --> 00:50:11,340

you wouldn't use it in the way that it

1134

00:50:18,260 --> 00:50:15,320

was used off the coast of San Diego as a

1135

00:50:20,180 --> 00:50:18,270

demonstration of force or as a

1136

00:50:21,860 --> 00:50:20,190

demonstration of technology you know

1137

00:50:23,270 --> 00:50:21,870

it's and there's been no follow up on it

1138

00:50:25,070 --> 00:50:23,280

so why would you do something like that

1139

00:50:26,990 --> 00:50:25,080

if it was Chinese why would they follow

1140

00:50:28,730 --> 00:50:27,000

it fly it over to San Diego just to have

1141

00:50:30,620 --> 00:50:28,740

it do a quick turn with the Nimitz and

1142

00:50:33,590 --> 00:50:30,630

go home I mean you know certain

1143

00:50:37,280 --> 00:50:33,600

assumptions can be made without that

1144

00:50:39,620 --> 00:50:37,290

time and expense it's just a just a

1145

00:50:42,020 --> 00:50:39,630

comment I wanted to make a comment and

1146

00:50:44,030 --> 00:50:42,030

that is and I'm sure it doesn't bother

1147

00:50:45,800 --> 00:50:44,040

you in the least when I say this but I

1148

00:50:49,340 --> 00:50:45,810

think some people might wrestle with you

1149

00:50:52,670 --> 00:50:49,350

a little bit regarding your perspective

1150

00:50:54,500 --> 00:50:52,680

on how the the government may not be

1151
00:50:57,770 --> 00:50:54,510
able to necessarily hide something like

1152
00:51:01,520 --> 00:50:57,780
that very easily or or technology like

1153
00:51:04,130 --> 00:51:01,530
that I think some folks believe in and

1154
00:51:07,250 --> 00:51:04,140
out of the UFO community that the u.s.

1155
00:51:10,520 --> 00:51:07,260
government has quite easily according to

1156
00:51:14,240 --> 00:51:10,530
their perspectives kept secrets very

1157
00:51:16,610 --> 00:51:14,250
easily regarding certain topics but what

1158
00:51:20,030 --> 00:51:16,620
I was going to ask you is just another

1159
00:51:22,220 --> 00:51:20,040
question from dr. arena and that is have

1160
00:51:27,350 --> 00:51:22,230
you heard anything about how even newer

1161
00:51:30,640 --> 00:51:27,360
radar performs I haven't and I think the

1162
00:51:34,040 --> 00:51:30,650
spy-1 you know from 2004 in terms of

1163
00:51:36,350 --> 00:51:34,050

radar technologies is not that really

1164

00:51:37,970 --> 00:51:36,360

that long ago and it was a brand new

1165

00:51:40,070 --> 00:51:37,980

radar at the time I think that was

1166

00:51:43,970 --> 00:51:40,080

pretty much the most sophisticated thing

1167

00:51:46,550 --> 00:51:43,980

on the planet so I don't know I don't

1168

00:51:48,470 --> 00:51:46,560

know that there's been other I don't

1169

00:51:50,840 --> 00:51:48,480

have been other encounters to be honest

1170

00:51:51,500 --> 00:51:50,850

that involved a ship with a with a radar

1171

00:51:54,470 --> 00:51:51,510

picking up

1172

00:51:57,350 --> 00:51:54,480

like that so nothing that I've heard

1173

00:51:59,360 --> 00:51:57,360

okay I'm gonna defer my questions to

1174

00:52:01,160 --> 00:51:59,370

Frank I'll let him ask him in yeah we're

1175

00:52:03,710 --> 00:52:01,170

we're talking a little bit about the

1176
00:52:06,860 --> 00:52:03,720
radar and apparently there was an e-2

1177
00:52:08,930 --> 00:52:06,870
Hawkeye radar plane that was at least up

1178
00:52:10,520 --> 00:52:08,940
in the air and can you explain to the

1179
00:52:12,950 --> 00:52:10,530
folks a little bit it seems like

1180
00:52:15,620 --> 00:52:12,960
everybody's got their own radar set the

1181
00:52:18,500 --> 00:52:15,630
individual jets do the ships do and then

1182
00:52:21,200 --> 00:52:18,510
there are these e - Hawkeye planes and

1183
00:52:22,880 --> 00:52:21,210
what is their role when you've got that

1184
00:52:24,830 --> 00:52:22,890
planes up in the air they always up in

1185
00:52:29,810 --> 00:52:24,840
the air tell us a little bit about the

1186
00:52:33,680 --> 00:52:29,820
role that the e 2 planes have in terms

1187
00:52:35,360 --> 00:52:33,690
of running a carrier group sure so

1188
00:52:37,340 --> 00:52:35,370

you're right everybody's got a radar

1189

00:52:41,600 --> 00:52:37,350

everybody down - the missiles themselves

1190

00:52:43,700 --> 00:52:41,610

have radars on board so and each of

1191

00:52:47,300 --> 00:52:43,710

those radars has a different role

1192

00:52:49,880 --> 00:52:47,310

so the Princeton is in charge of the

1193

00:52:52,160 --> 00:52:49,890

fleet air defense the strike group air

1194

00:52:54,800 --> 00:52:52,170

defense so it's it's really designed to

1195

00:52:56,840 --> 00:52:54,810

primarily protect the ships in the

1196

00:52:59,600 --> 00:52:56,850

Carrier Strike Group from inbound

1197

00:53:01,130 --> 00:52:59,610

targets whatever they may be and to be

1198

00:53:03,370 --> 00:53:01,140

able to shoot what's called a SMT

1199

00:53:06,200 --> 00:53:03,380

withstand a missile - out and shoot down

1200

00:53:09,020 --> 00:53:06,210

you know whatever enemy is coming at you

1201

00:53:12,200 --> 00:53:09,030

that's the simplified version of what

1202

00:53:16,010 --> 00:53:12,210

the Princeton's job is the e2s job is to

1203

00:53:18,350 --> 00:53:16,020

be the overall sort of God's eye view

1204

00:53:25,070 --> 00:53:18,360

quarterback of the aerial battlefield

1205

00:53:27,170 --> 00:53:25,080

and when you go into a combat action you

1206

00:53:30,020 --> 00:53:27,180

take you launch the e - first and it's a

1207

00:53:33,530 --> 00:53:30,030

slower airplane so it launches first and

1208

00:53:35,810 --> 00:53:33,540

it goes out with an escort to get close

1209

00:53:38,270 --> 00:53:35,820

enough to the wherever the action is

1210

00:53:39,980 --> 00:53:38,280

gonna be they've got this huge radar

1211

00:53:44,960 --> 00:53:39,990

that spins on top like it looks like a

1212

00:53:46,880 --> 00:53:44,970

big flying saucer and it is able to pick

1213

00:53:49,610 --> 00:53:46,890

up like I said the God's eye view of

1214

00:53:51,440 --> 00:53:49,620

what's going on now the fighters will

1215

00:53:53,000 --> 00:53:51,450

launch and they'll check in with the eto

1216

00:53:56,060 --> 00:53:53,010

and the et will say hey why don't you

1217

00:53:58,330 --> 00:53:56,070

head west because there's four fighters

1218

00:54:00,950 --> 00:53:58,340

that you've got a you know target and

1219

00:54:02,570 --> 00:54:00,960

when we see them and we're putting you

1220

00:54:04,490 --> 00:54:02,580

guys in charge of that group to the west

1221

00:54:04,920 --> 00:54:04,500

and then the next guys will check in and

1222

00:54:06,420 --> 00:54:04,930

say

1223

00:54:08,579 --> 00:54:06,430

you guys go north there's another group

1224

00:54:10,530 --> 00:54:08,589

to the north you guys go north and once

1225

00:54:12,720 --> 00:54:10,540

you're targeted by the e2 then the

1226

00:54:14,910 --> 00:54:12,730

fighters at a certain range can pick up

1227

00:54:16,950 --> 00:54:14,920

the the threat on their own radars and

1228

00:54:19,230 --> 00:54:16,960

then they do the fine-tuning of whatever

1229

00:54:21,839 --> 00:54:19,240

intercept or military action needs to

1230

00:54:25,380 --> 00:54:21,849

take place and then as I mentioned when

1231

00:54:26,280 --> 00:54:25,390

you if you shoot a missile modern

1232

00:54:28,440 --> 00:54:26,290

missiles

1233

00:54:31,740 --> 00:54:28,450

you know you launch them at a target

1234

00:54:33,420 --> 00:54:31,750

many tens of miles away and in the

1235

00:54:35,880 --> 00:54:33,430

endgame they turn on their own little

1236

00:54:39,109 --> 00:54:35,890

onboard radars and they guide themselves

1237

00:54:41,940 --> 00:54:39,119

into the target all by themselves so you

1238

00:54:45,319 --> 00:54:41,950

know the radar is used in a variety of

1239

00:54:53,130 --> 00:54:45,329

different functions throughout the

1240

00:54:54,450 --> 00:54:53,140

battlefield and back to you champ okay

1241

00:54:58,829 --> 00:54:54,460

great yeah I did have a question

1242

00:55:00,660 --> 00:54:58,839

actually and that is this one again from

1243

00:55:02,910 --> 00:55:00,670

the Phoenix MUFON team they actually

1244

00:55:06,470 --> 00:55:02,920

gave quite a large list of questions but

1245

00:55:09,270 --> 00:55:06,480

I'm only asking a fraction of them and

1246

00:55:12,390 --> 00:55:09,280

thank you for your patience did

1247

00:55:14,760 --> 00:55:12,400

commander flavor only see the tic-tac or

1248

00:55:18,750 --> 00:55:14,770

did he also see the fleet that was

1249

00:55:20,670 --> 00:55:18,760

positioned higher up in the sky he only

1250

00:55:23,490 --> 00:55:20,680

saw the tick well he's on a tic-tac and

1251

00:55:26,760 --> 00:55:23,500

he saw that disc of water or that was

1252

00:55:29,520 --> 00:55:26,770

disturbed beneath the tic-tac so the way

1253

00:55:34,200 --> 00:55:29,530

that played out is yeah he and he and

1254

00:55:39,059 --> 00:55:34,210

his wingmen and the other Hornet by a

1255

00:55:42,539 --> 00:55:39,069

piloted by Colonel Kurth were vectored

1256

00:55:44,609 --> 00:55:42,549

at the same contact Kurth flew over it

1257

00:55:46,650 --> 00:55:44,619

and left and all he said was the disc

1258

00:55:48,599 --> 00:55:46,660

and then obviously forever his wingman

1259

00:55:50,460 --> 00:55:48,609

flew over the disc of water and that's

1260

00:55:53,910 --> 00:55:50,470

the first thing that they saw that

1261

00:55:55,410 --> 00:55:53,920

bubbling disc of disturbed water and as

1262

00:55:57,480 --> 00:55:55,420

soon as they noticed the tic-tac

1263

00:55:59,730 --> 00:55:57,490

hovering and zipping around over the

1264

00:56:02,609 --> 00:55:59,740

water and the tic-tac seemed to take

1265

00:56:05,640 --> 00:56:02,619

note of them the the what the ocean went

1266

00:56:09,420 --> 00:56:05,650

smooth so that's what everybody saw I've

1267

00:56:13,079 --> 00:56:09,430

never heard any evidence that there was

1268

00:56:15,930 --> 00:56:13,089

more tic tacs present at the moment you

1269

00:56:18,420 --> 00:56:15,940

know a fleet of them up high that's

1270

00:56:18,960 --> 00:56:18,430

that's new to me I'm not saying it

1271

00:56:21,000 --> 00:56:18,970

didn't happen

1272

00:56:23,550 --> 00:56:21,010

is not present in the report and nobody

1273

00:56:26,580 --> 00:56:23,560

has ever really mentioned it you know

1274

00:56:29,160 --> 00:56:26,590

that was in a position of authority okay

1275

00:56:32,460 --> 00:56:29,170

this one is from John Aldridge he is a

1276

00:56:34,410 --> 00:56:32,470

well known researcher and historian in

1277

00:56:38,490 --> 00:56:34,420

the UFO community he's researched this

1278

00:56:42,230 --> 00:56:38,500

topic for almost six decades now he runs

1279

00:56:44,790 --> 00:56:42,240

what's called Project 1947 calm and

1280

00:56:47,160 --> 00:56:44,800

wanted to ask you this question

1281

00:56:51,210 --> 00:56:47,170

and then he has an explanation for it

1282

00:56:52,980 --> 00:56:51,220

also your opinion of the scu report that

1283

00:56:56,120 --> 00:56:52,990

would be the scientific coalition of you

1284

00:56:58,440 --> 00:56:56,130

ApS they wrote up a report on this I

1285

00:57:00,630 --> 00:56:58,450

don't know if you're aware of that I did

1286

00:57:03,390 --> 00:57:00,640

send you the link on it they called it

1287

00:57:05,850 --> 00:57:03,400

the 2004 USS Nimitz strike Navy group

1288

00:57:09,420 --> 00:57:05,860

incident and the scientific Coalition

1289

00:57:12,120 --> 00:57:09,430

for you a piece did analysis of the

1290

00:57:14,610 --> 00:57:12,130

evidence and resulting conclusions that

1291

00:57:22,980 --> 00:57:14,620

they had on that did you get a chance to

1292

00:57:24,990 --> 00:57:22,990

review that report I'm sorry okay well

1293

00:57:27,480 --> 00:57:25,000

then let's move on because John had

1294

00:57:30,660 --> 00:57:27,490

another I think it's another question I

1295

00:57:32,820 --> 00:57:30,670

wanted to ask you comments on what

1296

00:57:35,130 --> 00:57:32,830

appears hit meaning your comments on

1297

00:57:37,770 --> 00:57:35,140

what appears to be a perversion in

1298

00:57:39,750 --> 00:57:37,780

John's eyes I believe his perspective

1299

00:57:42,180 --> 00:57:39,760

your comments and what appears to be a

1300

00:57:44,880 --> 00:57:42,190

perversion of the FOIA process by the

1301
00:57:47,330 --> 00:57:44,890
military in this case when I asked him

1302
00:57:49,920 --> 00:57:47,340
what he meant by that he said this

1303
00:57:52,560 --> 00:57:49,930
according to Paco the day he called

1304
00:57:54,990 --> 00:57:52,570
commander freighter in 2015

1305
00:57:57,570 --> 00:57:55,000
flavor told him the Office of Naval

1306
00:58:00,600 --> 00:57:57,580
Intelligence had just left after

1307
00:58:04,980 --> 00:58:00,610
investigation on the 2004 incident every

1308
00:58:07,710 --> 00:58:04,990
Navy activity reported a record some

1309
00:58:11,250 --> 00:58:07,720
Navy and USMC personnel in the FOIA

1310
00:58:16,130 --> 00:58:11,260
process knew of the Tic Tac incident

1311
00:58:19,620 --> 00:58:16,140
- that was number one - he said go ahead

1312
00:58:24,990 --> 00:58:19,630
one at a time before before I forget the

1313
00:58:28,200 --> 00:58:25,000

first question so - to clarify what I

1314

00:58:30,830 --> 00:58:28,210

said earlier I did say that the eighth

1315

00:58:32,690 --> 00:58:30,840

tip investigation was 2015 Dave

1316

00:58:36,290 --> 00:58:32,700

directed me I talked him recently he

1317

00:58:38,150 --> 00:58:36,300

said it was actually in 2009 but he had

1318

00:58:41,060 --> 00:58:38,160

heard about it you know when I called

1319

00:58:42,910 --> 00:58:41,070

him in 2015 he had just you know heard

1320

00:58:46,270 --> 00:58:42,920

about it or gotten the results or

1321

00:58:49,220 --> 00:58:46,280

something like that so the actual

1322

00:58:50,990 --> 00:58:49,230

investigation took place in 2009 so five

1323

00:58:57,920 --> 00:58:51,000

years after the incident not 9 years

1324

00:59:01,010 --> 00:58:57,930

after the incident and I don't so the

1325

00:59:05,510 --> 00:59:01,020

folks in the Navy according to this a

1326

00:59:08,080 --> 00:59:05,520

tip reporters did everything correctly

1327

00:59:11,630 --> 00:59:08,090

they sent you know the intelligence

1328

00:59:14,890 --> 00:59:11,640

community sent their report up to 3rd

1329

00:59:16,760 --> 00:59:14,900

fleet and 3rd fleet received it and

1330

00:59:18,800 --> 00:59:16,770

didn't really know what to do with it

1331

00:59:21,910 --> 00:59:18,810

and it just stayed in a pile of messages

1332

00:59:24,200 --> 00:59:21,920

that eventually were superseded by the

1333

00:59:29,840 --> 00:59:24,210

tens of millions of other messages that

1334

00:59:32,270 --> 00:59:29,850

come through that office nothing ever

1335

00:59:33,530 --> 00:59:32,280

happened again to make them go back and

1336

00:59:36,970 --> 00:59:33,540

look at it you know what I mean so if

1337

00:59:38,780 --> 00:59:36,980

say there was something else that had

1338

00:59:40,820 --> 00:59:38,790

escalated this incident they would have

1339

00:59:42,260 --> 00:59:40,830

been able to go back and revive it at a

1340

00:59:44,210 --> 00:59:42,270

certain amount of time but I think it

1341

00:59:47,110 --> 00:59:44,220

just I think it just went away

1342

00:59:49,100 --> 00:59:47,120

you know nobody it was it this radical

1343

00:59:50,510 --> 00:59:49,110

incident that people didn't know how to

1344

00:59:54,710 --> 00:59:50,520

wrap their heads around and there was no

1345

01:00:00,140 --> 00:59:54,720

procedure in place to to really take

1346

01:00:03,650 --> 01:00:00,150

note of it properly ok ok yeah let me

1347

01:00:05,480 --> 01:00:03,660

jump in before you change subject sir we

1348

01:00:07,250 --> 01:00:05,490

I was just reading the last comment that

1349

01:00:12,470 --> 01:00:07,260

he had it wasn't a question it was just

1350

01:00:15,470 --> 01:00:12,480

a comment by Jan 2 to Paco and that was

1351

01:00:17,540 --> 01:00:15,480

he said we fired the 1954 filming of

1352

01:00:19,760 --> 01:00:17,550

UFOs by the balloon and a Navy chase

1353

01:00:22,130 --> 01:00:19,770

plane the request was not general but

1354

01:00:24,020 --> 01:00:22,140

for info on a specific incident the

1355

01:00:26,630 --> 01:00:24,030

answer was a general press release on

1356

01:00:28,700 --> 01:00:26,640

the moby-dick balloons also it said that

1357

01:00:30,740 --> 01:00:28,710

any pill was denied in advance the

1358

01:00:32,360 --> 01:00:30,750

Inspector General is usually interested

1359

01:00:35,180 --> 01:00:32,370

in activities which are not doing their

1360

01:00:37,670 --> 01:00:35,190

job or acting improperly the IG takes

1361

01:00:39,800 --> 01:00:37,680

the incompetence part I expect items

1362

01:00:41,900 --> 01:00:39,810

dealing with UFOs are probably collected

1363

01:00:44,750 --> 01:00:41,910

sequestered so the original activity can

1364

01:00:47,420 --> 01:00:44,760

honestly say no record

1365

01:00:49,250 --> 01:00:47,430

that was his comment go ahead yeah and

1366

01:00:51,740 --> 01:00:49,260

just in the news that within the last

1367

01:00:54,590 --> 01:00:51,750

couple years within the last year was an

1368

01:00:57,950 --> 01:00:54,600

apparent very wide open change in navy

1369

01:00:59,740 --> 01:00:57,960

policy basically saying if you deal with

1370

01:01:02,870 --> 01:00:59,750

something like this some kind of a

1371

01:01:06,290 --> 01:01:02,880

anomalous aircraft or whatever the case

1372

01:01:07,970 --> 01:01:06,300

may be we want that report and what did

1373

01:01:10,160 --> 01:01:07,980

you think about that change in policy

1374

01:01:12,830 --> 01:01:10,170

why I mean I think it makes perfect

1375

01:01:16,180 --> 01:01:12,840

sense you know we've had obviously

1376

01:01:18,980 --> 01:01:16,190

Dave's incident and then off the coast

1377

01:01:22,280 --> 01:01:18,990

off the East Coast off the Roosevelt I

1378

01:01:26,030 --> 01:01:22,290

think it was there was another series of

1379

01:01:29,950 --> 01:01:26,040

incidents you know caught on FLIR and so

1380

01:01:32,000 --> 01:01:29,960

the Navy wants to know more and it makes

1381

01:01:35,990 --> 01:01:32,010

it makes perfect sense

1382

01:01:38,210 --> 01:01:36,000

you know it's we we have procedures in

1383

01:01:42,710 --> 01:01:38,220

place to deal with things that we know

1384

01:01:45,020 --> 01:01:42,720

of and when we learn of new things new

1385

01:01:47,240 --> 01:01:45,030

threats new curiosities we have to

1386

01:01:50,540 --> 01:01:47,250

develop new procedures to deal with it's

1387

01:01:53,090 --> 01:01:50,550

an enormous organization you know it's

1388

01:01:54,830 --> 01:01:53,100

the military in the u.s. is the biggest

1389

01:01:57,320 --> 01:01:54,840

bureaucracy in the world it's not I

1390

01:02:01,580 --> 01:01:57,330

think to think that there's something

1391

01:02:05,450 --> 01:02:01,590

nefarious going on in the Navy with with

1392

01:02:07,160 --> 01:02:05,460

normal Navy people I mean from my point

1393

01:02:09,010 --> 01:02:07,170

of view is comical because you know I've

1394

01:02:11,660 --> 01:02:09,020

dealt with these people my whole lives

1395

01:02:13,070 --> 01:02:11,670

but I understand perhaps from an

1396

01:02:16,040 --> 01:02:13,080

outsider's point of view that they think

1397

01:02:21,140 --> 01:02:16,050

well somebody's withholding or hiding or

1398

01:02:22,610 --> 01:02:21,150

you know lying about what they know so I

1399

01:02:24,470 --> 01:02:22,620

was listening to an interview that you

1400

01:02:27,590 --> 01:02:24,480

did I believe with Jim Breslow that was

1401

01:02:30,080 --> 01:02:27,600

a wonderful interview by the way and you

1402

01:02:33,740 --> 01:02:30,090

mentioned that that's just not how the

1403

01:02:36,020 --> 01:02:33,750

military does business now wouldn't you

1404

01:02:39,590 --> 01:02:36,030

say the same thing and again in this

1405

01:02:42,890 --> 01:02:39,600

respect and that is there was a theory

1406

01:02:46,010 --> 01:02:42,900

going around the UFO community that

1407

01:02:49,280 --> 01:02:46,020

possibly DARPA was performing a test on

1408

01:02:52,250 --> 01:02:49,290

technology regarding the tic-tac as a

1409

01:02:54,860 --> 01:02:52,260

type of sort of a social or military

1410

01:02:57,410 --> 01:02:54,870

readiness test or that it was a secret

1411

01:02:59,180 --> 01:02:57,420

test by some other faction of the US

1412

01:03:02,570 --> 01:02:59,190

government

1413

01:03:04,820 --> 01:03:02,580

now I'm pretty I'm confident that you

1414

01:03:08,720 --> 01:03:04,830

may say that's just not how the military

1415

01:03:10,580 --> 01:03:08,730

does business wouldn't you say that yeah

1416

01:03:13,070 --> 01:03:10,590

I mean that doesn't ring true to me and

1417

01:03:14,870 --> 01:03:13,080

even the slightest manner because I

1418

01:03:17,780 --> 01:03:14,880

think I touched on this earlier there's

1419

01:03:20,900 --> 01:03:17,790

there's basically no logical reason to

1420

01:03:22,160 --> 01:03:20,910

design a test of that nature especially

1421

01:03:26,120 --> 01:03:22,170

if you're dealing with something so

1422

01:03:27,860 --> 01:03:26,130

expensive it doesn't make any sense

1423

01:03:29,840 --> 01:03:27,870

there's no nobody would do something

1424

01:03:31,760 --> 01:03:29,850

like that yeah and I understand that the

1425

01:03:34,970 --> 01:03:31,770

ships by the way had no weapons during

1426

01:03:36,290 --> 01:03:34,980

that period of time for a reason can you

1427

01:03:37,730 --> 01:03:36,300

explain why that is

1428

01:03:40,430 --> 01:03:37,740

well the ships had weapons on board

1429

01:03:43,340 --> 01:03:40,440

there they have a magazine and an armory

1430

01:03:45,860 --> 01:03:43,350

and you know that those things have a

1431

01:03:47,780 --> 01:03:45,870

supply well I think did not interrupt

1432

01:03:49,520 --> 01:03:47,790

but I think she means the the Jets

1433

01:03:53,960 --> 01:03:49,530

themselves they were unarmed at that

1434

01:03:54,260 --> 01:03:53,970

point thank you yes that's exactly what

1435

01:03:56,720 --> 01:03:54,270

I meant

1436

01:03:59,060 --> 01:03:56,730

and then also up Paco you described a

1437

01:04:00,920 --> 01:03:59,070

ship like an apartment building in an

1438

01:04:03,380 --> 01:04:00,930

interview can you please explain why

1439

01:04:05,090 --> 01:04:03,390

that is so our listeners can understand

1440

01:04:07,100 --> 01:04:05,100

why you would do that give that kind of

1441

01:04:13,100 --> 01:04:07,110

a description of a ship like an

1442

01:04:16,310 --> 01:04:13,110

apartment building yes yeah the fighter

1443

01:04:18,800 --> 01:04:16,320

planes only put weapons on on them when

1444

01:04:22,010 --> 01:04:18,810

they are in a combat zone and the reason

1445

01:04:26,030 --> 01:04:22,020

that you do that is just pure safety are

1446

01:04:29,480 --> 01:04:26,040

the way we the way we practice and train

1447

01:04:31,370 --> 01:04:29,490

is developed over time and it's refined

1448

01:04:33,560 --> 01:04:31,380

over time due to things that have

1449

01:04:35,180 --> 01:04:33,570

happened and a few times in our past

1450

01:04:37,310 --> 01:04:35,190

guys would be out training with live

1451

01:04:39,650 --> 01:04:37,320

weapons on board and accidentally switch

1452

01:04:41,870 --> 01:04:39,660

a weapon station on and shoot down

1453

01:04:44,690 --> 01:04:41,880

another airplane it's happened you know

1454

01:04:46,610 --> 01:04:44,700

you believe it or not so unless we're

1455

01:04:48,830 --> 01:04:46,620

going into a combat zone or doing a

1456

01:04:49,370 --> 01:04:48,840

missile exercise or strafing or

1457

01:04:50,870 --> 01:04:49,380

something like that

1458

01:04:55,490 --> 01:04:50,880

we don't have live weapons on the

1459

01:04:57,800 --> 01:04:55,500

airplanes does it make sense yeah

1460

01:04:58,940 --> 01:04:57,810

absolutely thank you for being so clear

1461

01:05:01,880 --> 01:04:58,950

about that I think that's a great

1462

01:05:04,580 --> 01:05:01,890

metaphor also so that the average

1463

01:05:07,190 --> 01:05:04,590

layperson so to speak and understand a

1464

01:05:11,460 --> 01:05:07,200

little bit more about that complex topic

1465

01:05:15,859 --> 01:05:11,470

what I wanted to ask you

1466

01:05:18,390 --> 01:05:15,869

building well question so please do that

1467

01:05:20,579 --> 01:05:18,400

was specifically that that comment was

1468

01:05:23,250 --> 01:05:20,589

in reference to the aircraft carrier

1469

01:05:25,140 --> 01:05:23,260

itself and an aircraft carrier is in a

1470

01:05:28,589 --> 01:05:25,150

lot of ways like an apartment building

1471

01:05:29,849 --> 01:05:28,599

in the sense that you have a commander

1472

01:05:31,440 --> 01:05:29,859

of the captain of the aircraft carrier

1473

01:05:33,120 --> 01:05:31,450

is the guy who owns the apartment

1474

01:05:36,780 --> 01:05:33,130

building so he's got this big beautiful

1475

01:05:38,910 --> 01:05:36,790

ship and there's maybe 2,500 and 3,000

1476

01:05:41,520 --> 01:05:38,920

people that work for him on the ship

1477

01:05:43,349 --> 01:05:41,530

that run the ship you know all the way

1478

01:05:45,660 --> 01:05:43,359

from the nuclear actors to the screws to

1479

01:05:48,210 --> 01:05:45,670

you know cooking food or whatever and

1480

01:05:50,700 --> 01:05:48,220

they they own the ship and then there's

1481

01:05:53,250 --> 01:05:50,710

these squadrons that fly on board in the

1482

01:05:54,630 --> 01:05:53,260

form of an Air Wing roughly nine

1483

01:05:56,609 --> 01:05:54,640

squadrons that show up and they are

1484

01:06:00,329 --> 01:05:56,619

called the tenant commands just like you

1485

01:06:03,030 --> 01:06:00,339

rent an apartment you know to move into

1486

01:06:04,710 --> 01:06:03,040

every time a ship deploys the tenant

1487

01:06:07,170 --> 01:06:04,720

commands move onboard and they literally

1488

01:06:09,150 --> 01:06:07,180

bring everything they bring you know

1489

01:06:11,040 --> 01:06:09,160

obviously the beds are there already but

1490

01:06:13,020 --> 01:06:11,050

they bring all their tools and their

1491

01:06:15,270 --> 01:06:13,030

books maintenance books maintenance

1492

01:06:18,030 --> 01:06:15,280

manuals are the squadrons have to

1493

01:06:20,280 --> 01:06:18,040

decorate the ready room I mean it that

1494

01:06:22,200 --> 01:06:20,290

you show up and it's just a blank room

1495

01:06:24,150 --> 01:06:22,210

with chairs in it and whiteboards and

1496

01:06:27,270 --> 01:06:24,160

and you have to bring your whiteboard

1497

01:06:30,089 --> 01:06:27,280

markers and you know everything so that

1498

01:06:31,980 --> 01:06:30,099

and the Air Wing is commanded by a

1499

01:06:33,750 --> 01:06:31,990

commander of the Air Wing and he's also

1500

01:06:35,819 --> 01:06:33,760

a captain so you've got on an aircraft

1501
01:06:37,740 --> 01:06:35,829
carrier you've got two captains of equal

1502
01:06:40,380 --> 01:06:37,750
people of equal rank that work together

1503
01:06:42,960 --> 01:06:40,390
to make the ship and the Air Wing work

1504
01:06:45,240 --> 01:06:42,970
efficiently together okay and then we

1505
01:06:49,349 --> 01:06:45,250
did have one last question from Reuben

1506
01:06:52,470 --> 01:06:49,359
ori at the the northern northern

1507
01:06:55,800 --> 01:06:52,480
california director of FINA of MUFON and

1508
01:06:59,280 --> 01:06:55,810
his last question to you was do you

1509
01:07:01,710 --> 01:06:59,290
imagine or could there be or possible

1510
01:07:04,109 --> 01:07:01,720
consequences of any kind for military

1511
01:07:06,720 --> 01:07:04,119
pilots who report their experiences to

1512
01:07:09,839 --> 01:07:06,730
NGOs outside of the pilots chain of

1513
01:07:11,040 --> 01:07:09,849

command I mean I may not be reading that

1514

01:07:13,680 --> 01:07:11,050

right but I think really what he's

1515

01:07:15,270 --> 01:07:13,690

asking or can you can you can you read

1516

01:07:17,730 --> 01:07:15,280

his inference regarding what he's

1517

01:07:19,970 --> 01:07:17,740

actually saying there yeah no I mean

1518

01:07:21,840 --> 01:07:19,980

there's none like when I when I

1519

01:07:24,150 --> 01:07:21,850

interviewed Dave

1520

01:07:26,760 --> 01:07:24,160

David was very public about what he saw

1521

01:07:28,740 --> 01:07:26,770

from the moment he saw it you know as

1522

01:07:30,240 --> 01:07:28,750

where the people on the Princeton you

1523

01:07:32,400 --> 01:07:30,250

know that there was nobody that ever

1524

01:07:35,310 --> 01:07:32,410

came and said hey keep this down nobody

1525

01:07:38,940 --> 01:07:35,320

had to sign an NDA hey or anything like

1526

01:07:42,300 --> 01:07:38,950

that those that didn't happen and and

1527

01:07:47,340 --> 01:07:42,310

you're not know unless it's a government

1528

01:07:48,810 --> 01:07:47,350

classified secret which this is not you

1529

01:07:51,270 --> 01:07:48,820

know you can you can speak your mind

1530

01:07:52,980 --> 01:07:51,280

about whatever you see um where were you

1531

01:07:55,050 --> 01:07:52,990

stationed by the way this questions from

1532

01:07:58,020 --> 01:07:55,060

listener Dean Ashley who's an expert on

1533

01:08:00,480 --> 01:07:58,030

Fleur and radar technology he wanted to

1534

01:08:02,220 --> 01:08:00,490

ask you and by the way he's a he's a fan

1535

01:08:03,840 --> 01:08:02,230

ears and he says that if you're ever in

1536

01:08:09,030 --> 01:08:03,850

town where he's at if you guys could go

1537

01:08:11,640 --> 01:08:09,040

have a beer he said he wanted to ask you

1538

01:08:16,079 --> 01:08:11,650

I would first ask him where was he

1539

01:08:18,240 --> 01:08:16,089

stationed when in the Navy of when he

1540

01:08:21,030 --> 01:08:18,250

was in the Navy okay so he was stationed

1541

01:08:23,460 --> 01:08:21,040

in the Navy in 1996 to 2000 I guess

1542

01:08:28,079 --> 01:08:23,470

where were you at he wanted to know what

1543

01:08:30,180 --> 01:08:28,089

not I was in nes would be Island up near

1544

01:08:32,640 --> 01:08:30,190

Seattle and then when I flew Tomcats

1545

01:08:35,849 --> 01:08:32,650

that was at Miramar down in San Diego

1546

01:08:37,050 --> 01:08:35,859

and when I flew f5s I was reservists but

1547

01:08:38,670 --> 01:08:37,060

I was flying out of the Naval Air

1548

01:08:41,039 --> 01:08:38,680

Station falen which is up near Reno

1549

01:08:42,809 --> 01:08:41,049

Nevada okay he wanted to share with you

1550

01:08:45,420 --> 01:08:42,819

that during that period of time he was

1551

01:08:48,480 --> 01:08:45,430
in Cecil field and then it says in

1552

01:08:50,579 --> 01:08:48,490
parentheses slam - er and then in the

1553

01:08:53,190 --> 01:08:50,589
parenthesis and then NEC was the mad

1554

01:08:58,680 --> 01:08:53,200
system and he worked on Bullwinkle pods

1555

01:09:00,630 --> 01:08:58,690
in signal ax or signal ax okay yes and

1556

01:09:02,970 --> 01:09:00,640
anyway and then he says the next

1557

01:09:05,760 --> 01:09:02,980
question is I would ask him if he thinks

1558

01:09:08,039 --> 01:09:05,770
any of the ad Fleur videos were digital

1559

01:09:10,320 --> 01:09:08,049
and he says I'm under the assumption

1560

01:09:13,170 --> 01:09:10,330
that they were analog all analog and

1561

01:09:14,550 --> 01:09:13,180
that there was a huge jump in in fair

1562

01:09:18,900 --> 01:09:14,560
technology at the turn of the century

1563

01:09:22,349 --> 01:09:18,910

and it makes a difference comments yes

1564

01:09:24,990 --> 01:09:22,359

and this was in 2004 I don't pretty sure

1565

01:09:28,050 --> 01:09:25,000

that 80 Flair and for whatever reason

1566

01:09:30,650 --> 01:09:28,060

people call it the 80 Flair I'm pretty

1567

01:09:32,490 --> 01:09:30,660

sure the 80 player was digital

1568

01:09:34,770 --> 01:09:32,500

especially since it was on a Super

1569

01:09:35,490 --> 01:09:34,780

Hornet I never play with an 80 FLIR I

1570

01:09:38,570 --> 01:09:35,500

flew with different

1571

01:09:41,880 --> 01:09:38,580

types of flares on the a6 in the f-14

1572

01:09:45,050 --> 01:09:41,890

what it did not have was the ability at

1573

01:09:48,030 --> 01:09:45,060

the time in 2004 to transmit live video

1574

01:09:50,550 --> 01:09:48,040

elsewhere so what would have happened is

1575

01:09:55,020 --> 01:09:50,560

they would have landed taken the drive

1576
01:09:59,130 --> 01:09:55,030
that the 80 clear recording was on and

1577
01:10:02,250 --> 01:09:59,140
then brought that in for a you know

1578
01:10:05,100 --> 01:10:02,260
investigation by intelligence so in

1579
01:10:08,160 --> 01:10:05,110
today's world an eighteen flare can

1580
01:10:10,260 --> 01:10:08,170
actually transmit LED video and it's

1581
01:10:12,090 --> 01:10:10,270
really used to transmit to guys on the

1582
01:10:13,380 --> 01:10:12,100
ground so that they can make sure that

1583
01:10:17,670 --> 01:10:13,390
the airplane is targeting something

1584
01:10:19,620 --> 01:10:17,680
properly so you know the people that say

1585
01:10:23,730 --> 01:10:19,630
that they saw eighty FLIR video of the

1586
01:10:27,090 --> 01:10:23,740
Hornets engaged with the tic-tac in a

1587
01:10:29,000 --> 01:10:27,100
ten minute video or I don't know what

1588
01:10:32,090 --> 01:10:29,010

what they saw but that they didn't see

1589

01:10:35,010 --> 01:10:32,100

you know they didn't see a forty one

1590

01:10:38,220 --> 01:10:35,020

Hornet with the tic-tac it's just not

1591

01:10:40,200 --> 01:10:38,230

possible okay and then I have kind of an

1592

01:10:42,690 --> 01:10:40,210

odd question for you if you don't care

1593

01:10:44,970 --> 01:10:42,700

to answer that's uh that's no problem at

1594

01:10:47,730 --> 01:10:44,980

all but I wanted to ask you do you think

1595

01:10:50,820 --> 01:10:47,740

the United Nations the UN will pass ever

1596

01:10:53,190 --> 01:10:50,830

passed any resolutions on the UAP topic

1597

01:10:56,940 --> 01:10:53,200

I asked you that because on December 1st

1598

01:10:59,340 --> 01:10:56,950

of 1977 there was a proposal pass that

1599

01:11:04,080 --> 01:10:59,350

was being asked to be passed by the UN

1600

01:11:04,980 --> 01:11:04,090

regarding studying this topic and it did

1601
01:11:07,980 --> 01:11:04,990
not pass

1602
01:11:11,940 --> 01:11:07,990
there was no votes on it so wanted to

1603
01:11:15,360 --> 01:11:11,950
know do you think is that Congress or

1604
01:11:17,370 --> 01:11:15,370
the UN may in the future whether it be

1605
01:11:19,590 --> 01:11:17,380
the near future or way off future ever

1606
01:11:21,650 --> 01:11:19,600
consider putting together some kind of

1607
01:11:24,120 --> 01:11:21,660
study group with the credentialed people

1608
01:11:25,950 --> 01:11:24,130
people that they feel are appropriate to

1609
01:11:28,500 --> 01:11:25,960
studying this topic in its entirety or

1610
01:11:31,920 --> 01:11:28,510
the best of their ability do you think

1611
01:11:34,380 --> 01:11:31,930
that that's a possibility and if so when

1612
01:11:37,560 --> 01:11:34,390
do you foresee that possibility and why

1613
01:11:40,050 --> 01:11:37,570

I mean certainly anything's possible

1614

01:11:42,050 --> 01:11:40,060

I I envision that something like that

1615

01:11:45,420 --> 01:11:42,060

would happen if we started seeing on

1616

01:11:49,050 --> 01:11:45,430

planet earth around the world

1617

01:11:51,300 --> 01:11:49,060

lots of incidents like the 22,000

1618

01:11:53,610 --> 01:11:51,310

for Nimitz and then 2015 off the East

1619

01:11:55,710 --> 01:11:53,620

Coast you know if everybody started

1620

01:11:58,320 --> 01:11:55,720

picking up these tic tacs and and they

1621

01:12:01,430 --> 01:11:58,330

you know we were equally befuddled then

1622

01:12:06,900 --> 01:12:01,440

it would make perfect sense for us as a

1623

01:12:08,100 --> 01:12:06,910

planet as a species to you know put our

1624

01:12:10,950 --> 01:12:08,110

heads together and try to figure out

1625

01:12:12,840 --> 01:12:10,960

what we were dealing with okay before we

1626
01:12:14,640 --> 01:12:12,850
wrap this up because so we're going to

1627
01:12:16,440 --> 01:12:14,650
do that I wanted to mention to you that

1628
01:12:18,720 --> 01:12:16,450
I was listening to you during an

1629
01:12:20,640 --> 01:12:18,730
interview again Jim Breslin wonderful

1630
01:12:22,020 --> 01:12:20,650
interview with you it was a great

1631
01:12:23,310 --> 01:12:22,030
interview by the way did wonderfully in

1632
01:12:25,680 --> 01:12:23,320
that interview you're very clear on

1633
01:12:27,000 --> 01:12:25,690
everything thank you I wanted to ask you

1634
01:12:30,870 --> 01:12:27,010
about something you brought up and that

1635
01:12:34,170 --> 01:12:30,880
was you said that the Gimbel video was

1636
01:12:37,170 --> 01:12:34,180
to you sort of a math video wasn't that

1637
01:12:39,000 --> 01:12:37,180
crystal clear and the go-fast video was

1638
01:12:41,790 --> 01:12:39,010

far more impressive to you as far as the

1639

01:12:43,530 --> 01:12:41,800

crystal clarity of it that it was insane

1640

01:12:45,600 --> 01:12:43,540

so to speak I think is what you the word

1641

01:12:47,520 --> 01:12:45,610

you used can you tell me why you think

1642

01:12:49,860 --> 01:12:47,530

the Gimbel video wasn't that great

1643

01:12:54,480 --> 01:12:49,870

compared to say the go-fast video which

1644

01:12:56,070 --> 01:12:54,490

may have impressed you more I think if I

1645

01:12:58,710 --> 01:12:56,080

didn't say this I meant to say so the

1646

01:13:01,560 --> 01:12:58,720

the tic-tac video is kind of grainy and

1647

01:13:03,900 --> 01:13:01,570

fuzzy because it was so far away you did

1648

01:13:07,290 --> 01:13:03,910

go over that yes yeah so it's you know

1649

01:13:09,270 --> 01:13:07,300

it exceeded the the the normal tactical

1650

01:13:14,190 --> 01:13:09,280

range that you would expect to be able

1651
01:13:17,150 --> 01:13:14,200
to use the 80 FLIR for the go-fast video

1652
01:13:19,380 --> 01:13:17,160
to me it could be anything it could be

1653
01:13:21,360 --> 01:13:19,390
you know a cruise missile that they're

1654
01:13:23,550 --> 01:13:21,370
picking up cruising over the surface

1655
01:13:28,170 --> 01:13:23,560
I've seen I chased a cruise missile once

1656
01:13:30,120 --> 01:13:28,180
and and that's what it reminded me of it

1657
01:13:31,440 --> 01:13:30,130
could also be a tic-tac so I wasn't

1658
01:13:34,830 --> 01:13:31,450
there I didn't see it I don't have any

1659
01:13:37,710 --> 01:13:34,840
data on that the gimble video is the one

1660
01:13:41,190 --> 01:13:37,720
that to me is quite remarkable and all

1661
01:13:42,450 --> 01:13:41,200
the all the assertions around that that

1662
01:13:46,290 --> 01:13:42,460
there was actually a fleet of these

1663
01:13:48,360 --> 01:13:46,300

things with gimble the bull ship in the

1664

01:13:49,590 --> 01:13:48,370

middle that was you know rotating

1665

01:13:53,580 --> 01:13:49,600

obviously that's why it's called imbel

1666

01:13:55,530 --> 01:13:53,590

gimble around like a top that's the one

1667

01:13:57,150 --> 01:13:55,540

that's I think of all the video there's

1668

01:13:59,880 --> 01:13:57,160

basically three videos right there's the

1669

01:14:02,490 --> 01:13:59,890

original tic-tac go fast and the gimble

1670

01:14:04,110 --> 01:14:02,500

my ones that are out there I think the

1671

01:14:08,610 --> 01:14:04,120

gimble is the one that is most right

1672

01:14:11,130 --> 01:14:08,620

yeah the most go ahead I'm sorry there's

1673

01:14:13,440 --> 01:14:11,140

a time lapse thing going on here it's

1674

01:14:14,760 --> 01:14:13,450

the most what I apologize it's the most

1675

01:14:19,140 --> 01:14:14,770

remarkable because it actually shows

1676

01:14:23,060 --> 01:14:19,150

movement that you know you can you can

1677

01:14:24,990 --> 01:14:23,070

discern that is clearly clearly not

1678

01:14:26,640 --> 01:14:25,000

anything that you know we're familiar

1679

01:14:28,380 --> 01:14:26,650

with whether it's of this world or not

1680

01:14:31,200 --> 01:14:28,390

of this right and that's what you said

1681

01:14:32,670 --> 01:14:31,210

actually you said that the go-fast could

1682

01:14:35,460 --> 01:14:32,680

be a cruise missile for all you know you

1683

01:14:37,770 --> 01:14:35,470

also said that you weren't sure you said

1684

01:14:39,900 --> 01:14:37,780

the gimble one is insane if it's real

1685

01:14:41,700 --> 01:14:39,910

and not a fabrication I remember now and

1686

01:14:43,590 --> 01:14:41,710

you also said it's a remarkable video

1687

01:14:45,180 --> 01:14:43,600

and then you said the gimbal is

1688

01:14:47,790 --> 01:14:45,190

different than the tick-tock and you

1689

01:14:51,930 --> 01:14:47,800

went on to explain why so yes thank you

1690

01:14:53,880 --> 01:14:51,940

for explaining and not so clearly so uh

1691

01:14:55,410 --> 01:14:53,890

Frank did you have any last questions

1692

01:14:57,480 --> 01:14:55,420

because I think I'm done with my

1693

01:15:01,320 --> 01:14:57,490

questions we're able to interrogate the

1694

01:15:03,780 --> 01:15:01,330

heck out of Paco and he did rain yeah we

1695

01:15:04,650 --> 01:15:03,790

sure do appreciate it Paco and we had a

1696

01:15:07,320 --> 01:15:04,660

big day today

1697

01:15:09,480 --> 01:15:07,330

and we capped it off beautifully with

1698

01:15:12,150 --> 01:15:09,490

this interview I sure do appreciate you

1699

01:15:16,230 --> 01:15:12,160

coming on yeah and I do wanna let our

1700

01:15:20,160 --> 01:15:16,240

folks know before Paco's since his

1701

1713

01:15:55,530 --> 01:15:52,300

wanted to mention and that prior to

1714

1726

01:16:26,069 --> 01:16:23,019

great sacrifice and we are very grateful

1727

01:16:28,410 --> 01:16:26,079

1728

01:16:29,910 --> 01:16:28,420

1729

01:16:33,600 --> 01:16:29,920

minute of it and thank you for having me

1730

01:16:36,000 --> 01:16:33,610

1731

01:16:39,689 --> 01:16:36,010

question Frank I apologize and that it

1732

01:16:42,299 --> 01:16:39,699

wanted to ask you if at any time perhaps

1733

01:16:44,129 --> 01:16:42,309

maybe sometime next year if you wouldn't

1734

01:16:46,310 --> 01:16:44,139

mind considering being on a panel we

1735

01:16:50,189 --> 01:16:46,320

have big panels we have about 20 people

1736

01:16:52,589 --> 01:16:50,199

or less on panels of experts around the

1737

01:16:54,089 --> 01:16:52,599

world on various topics and I wanted to

1738

01:16:55,500 --> 01:16:54,099

know if maybe in the future you wouldn't

1739

01:16:59,429 --> 01:16:55,510

mind considering being on one of those

1740

01:17:03,000 --> 01:16:59,439

panels sure where is it some more fun

1741

01:17:09,209 --> 01:17:03,010

like right right right in your homeroom

1742

01:17:11,100 --> 01:17:09,219

right where you're at now very much for

1743

01:17:12,689 --> 01:17:11,110

your patience and perseverance of this

1744

01:17:15,120 --> 01:17:12,699

interview we're very grateful to you

1745

01:17:16,469 --> 01:17:15,130

we've really enjoyed it okay my pleasure

1746

01:17:18,919 --> 01:17:16,479

thank you so much pocket I really

1747

01:17:22,080 --> 01:17:18,929

appreciate it goodbye and thank you and

1748

01:17:24,419 --> 01:17:22,090

we'll be back this weekend with another

1751

01:17:30,959 --> 01:17:30,130

show and thanks for tuning in and good
