

1

00:00:00,000 --> 00:00:10,880

Most acknowledge that UFO reports are not restricted to one particular country or continent

2

00:00:10,880 --> 00:00:18,040

of peoples. It is a global phenomena and those most closely affected by it, be they researchers

3

00:00:18,040 --> 00:00:23,240

or eyewitnesses, often come together at conferences staged throughout the world to share their

4

00:00:23,240 --> 00:00:32,240

views, information and knowledge. In December 1999 we journeyed to Acapulco in Mexico, a

5

00:00:32,240 --> 00:00:37,600

popular holiday resort on the Pacific coast to participate in the last major conference

6

00:00:37,600 --> 00:00:43,880

of the old millennium. Countless holiday makers flocked to Acapulco from countries far and

7

00:00:43,880 --> 00:00:51,680

wide throughout the year, drawn by sun-drenched beaches, magnificent bays and nightly festivities

8

00:00:51,680 --> 00:00:58,360

which are a throwback to ancient Mexican culture. But the main attraction of that December week

9

00:00:58,360 --> 00:01:05,600

was undoubtedly the Congreso Mundial Ovni, an event which saw several sparkling presentations

10

00:01:05,600 --> 00:01:12,800

by some of the best known figures in international UFO research. During our week-long visit,

11

00:01:12,800 --> 00:01:17,640

we caught up with several of the speakers during breaks in proceedings to seek their

12

00:01:17,640 --> 00:01:22,400

views on matters which are both topical and of particular relevance to their own field

13

00:01:22,400 --> 00:01:29,400

of study. Among them was Dr. Bob Wood and his son Ryan, who, over the past couple of years,

14

00:01:29,400 --> 00:01:34,480

have made several outstanding breakthroughs in analyzing countless documents pertaining

15

00:01:34,480 --> 00:01:42,120

to an alleged COVA UFO study group known as Majestic 12. Later we hear from Dr. Richard

16

00:01:42,120 --> 00:01:49,240

Haynes, widely acknowledged to be the world's leading expert on UFO and pilot encounters.

17

00:01:49,240 --> 00:01:54,000

And we discover what persuaded best-selling author with Mr. Striber to turn his attention

18

00:01:54,000 --> 00:02:00,920

to a new book on the environment entitled The Coming Global Superstore. But we begin

19

00:02:00,920 --> 00:02:06,240

with Bob and Ryan Wood, who later this year will be among the guest speakers at the 19th

20

00:02:06,240 --> 00:02:09,920

Leeds International UFO Conference.

21

00:02:09,920 --> 00:02:17,320

The manual is an instruction manual for personnel to recover crash saucers and ship the parts

22

00:02:17,320 --> 00:02:24,360

to the right places. It does include special procedures for shipping from overseas. And

23

00:02:24,360 --> 00:02:29,560

so in that sense it embraces the overseas aspect. It's important to remember, it is

24

00:02:29,560 --> 00:02:36,560

a field manual for troops in the field. And I think that this was, it didn't give a broad,

25

00:02:36,560 --> 00:02:40,680

very broad overview of the program or maybe the other foreign intelligence that may have

26

00:02:40,680 --> 00:02:46,440

been available, but it was sort of a how-to manual. And when you look at the mundaneness

27

00:02:46,440 --> 00:02:55,560

of crate packing, it is almost an identical copy of an existing field manual, Army field

28

00:02:55,560 --> 00:03:00,860

manual from Carlisle Barracks in Pennsylvania, where they have a reservoir of all these

29

00:03:00,860 --> 00:03:06,400

manuals. And you can find the references in the back of the manual perfectly line up for

30

00:03:06,400 --> 00:03:11,680

the era. And some of the documents changed shortly thereafter. The manual was printed

31

00:03:11,680 --> 00:03:23,920

in April of 54. So it's interesting that it's such a tight fit to that time frame. And even,

32

00:03:23,920 --> 00:03:30,520

you might say that the fact that it's just about pick up recovering wreckage and so forth,

33

00:03:30,520 --> 00:03:37,440

and not about all the other aspects that you mentioned, lends towards its authenticity rather

34

00:03:37,440 --> 00:03:45,440

than tracks. There are some other subtleties associated with the language too. For example,

35

00:03:45,440 --> 00:03:50,400

the use of the word screwdriver is two separate words, is the way it's shown in the manual.

36

00:03:50,400 --> 00:03:55,120

And that is consistent with what was in the dictionary in 1949. And then over the next

37

00:03:55,120 --> 00:03:59,560

decade, the change to one word use as the application to avoid the drink.

38

00:03:59,560 --> 00:04:03,800

Yeah, I'm glad you mentioned some of those things. I mean, the first thing I think of

39

00:04:03,800 --> 00:04:09,560

is the control page in the manual. At first, the control page was not distributed because

40

00:04:09,560 --> 00:04:14,320

Don Berliner didn't perceive it. And then later it was discovered, and the control

41

00:04:14,320 --> 00:04:21,440

page has specific changes in the manual, and then initials and authorizations. And some

42

00:04:21,440 --> 00:04:28,920

of the initials, the JRT and EWL, we've been doing research and trying to identify those

43

00:04:28,920 --> 00:04:35,240

specific soldiers that would have been responsible for that in the Kirkland Air Force Base phone

44

00:04:35,240 --> 00:04:46,080

book stamped inside the manual is unit KB 88, building 21, Kirkland Air Force Base.

45

00:04:46,080 --> 00:04:52,960

And we found there really is a building 21. It's now called Building 750. And we can't

46

00:04:52,960 --> 00:04:59,040

determine whether or not there was a unit 88, but we're in a correspondence with the historians

47

00:04:59,040 --> 00:05:04,200

of Kirkland Air Force Base. And we've been given verbal authorization to get the historic

48

00:05:04,320 --> 00:05:11,600

phone books to review and look for EWL's JRTs and then ultimately find those soldiers and

49

00:05:11,600 --> 00:05:12,600

ask them those questions.

50

00:05:12,600 --> 00:05:19,640

Well, we certainly welcome criticisms or concerns about the authenticity of the manual. In fact,

51

00:05:19,640 --> 00:05:26,960

we keep a running list of the best way to deal with those concerns. And one of the concerns,

52

00:05:26,960 --> 00:05:34,800

for example, was a raised Z. And what happened was when I first met with a specialist at

53

00:05:34,800 --> 00:05:39,600

the government printing office and asked him, so what do you think about this manual, this

54

00:05:39,600 --> 00:05:43,680

document? Does it look authentic to you or not? And he studied it and calls him over for

55

00:05:43,680 --> 00:05:48,280

a little bit. And he said, well, it looks to me like the type is right, monotype modern.

56

00:05:48,280 --> 00:05:53,560

And then he looked and he says, and it's interesting, he said that every so often the Z's are raised

57

00:05:53,600 --> 00:05:57,640

like we used to get in those days. I said, well, why is that? And he said, well, because

58

00:05:57,640 --> 00:06:01,280

once in a while and letters that were not frequently used, they would only have a few

59

00:06:01,280 --> 00:06:08,280

master master brass letters in the stack. And then every so often you get some sort of a

60

00:06:09,480 --> 00:06:15,080

piece of lead on the bottom and you would find a repetition of the Z being raised in

61

00:06:15,080 --> 00:06:22,080

particular. So my partner son went to the Stanford library and he found a document that

62

00:06:23,080 --> 00:06:30,080

was authentic 1954 with just a few raised Z's. And you actually see lots of variability

63

00:06:31,280 --> 00:06:38,280

in the E's and the A's, not so much on their lining up, but the formation of each of those

64

00:06:38,280 --> 00:06:45,280

letters when studied under 400% magnification, you can see that there's, it's a mechanical

65

00:06:45,360 --> 00:06:51,860

process. And the answer is that as Stan Friedman and I followed the trail of the special operation

66

00:06:52,180 --> 00:06:58,020

manual, he continued to receive correspondence from Timothy Cooper, including copies. And

67

00:06:58,020 --> 00:07:01,020

I didn't know that. And then, you know, as we were talking along, he said, well, you

68

00:07:01,020 --> 00:07:05,580

know, I'm getting stuff from a guy who lives in California. In fact, he says he lives

69

00:07:05,580 --> 00:07:11,860

closer to you than I do. Big Bear Lake, why don't you go up and visit it? So I called

70

00:07:11,860 --> 00:07:17,820

him and went to visit this guy, Tim Cooper. And he said that over all the years that he'd

71

00:07:17,820 --> 00:07:21,980

tried to get some interest from somebody in the UFO community, I was the first person

72

00:07:21,980 --> 00:07:28,980

to drive up the hill and say hello. So he was therefore motivated to exchange information.

73

00:07:29,420 --> 00:07:34,500

And after a couple of meetings with him myself, then Ryan and I met with him together. We've

74

00:07:34,500 --> 00:07:41,500

probably had six visits, many dozens of hours. Yeah, 20 or 25 hours time with him. Timothy

75

00:07:41,700 --> 00:07:47,460

Cooper's background is that he grew up near Harlem, Harlem and Air Force Base in Alamogordo.

76

00:07:47,500 --> 00:07:54,500

And his, one of his close relatives was assigned there to work in the Army. And he had an unusual

77

00:07:57,500 --> 00:08:03,100

experience where he was asked, apparently, to run copies of a classified report which

78

00:08:03,100 --> 00:08:09,180

had to do with the crash recovery of the UFO. And he told this story to Timothy and that

79

00:08:09,180 --> 00:08:16,180

caused Timothy to get some interest so that as of 1988, Tim began to file freedom of information

80

00:08:16,740 --> 00:08:23,740

requests and that ultimately transcended 12 different agencies. He has 5,000 pages of

81

00:08:23,780 --> 00:08:28,780

freedom of information request responses in his living room.

82

00:08:28,780 --> 00:08:35,780

Well, he basically has six different source elements. The first element was the legionnaire.

83

00:08:35,780 --> 00:08:42,780

He met the local Big Bear legionnaire. He gave him the air accident report which he later

84

00:08:50,060 --> 00:08:57,060

forwarded to Leo Stringfield who published it in his book, Status Report Number 4, I believe.

85

00:08:58,060 --> 00:09:05,060

And then he had another source, a CIA archivist who apparently contacted him and met him in

86

00:09:10,580 --> 00:09:17,580

person in a parking lot and handed over the Marilyn Monroe document which mentions MJ-12

87

00:09:17,580 --> 00:09:23,580

and the 54-12 committee in the lower left hand corner and signed by James Jesus Angleton.

88

00:09:24,100 --> 00:09:27,100

Now, was that an original document or was it a photocopy?

89

00:09:27,100 --> 00:09:34,100

Both are photocopies present. And then the next source or rival was Cantwheel, the alias

90

00:09:38,740 --> 00:09:45,740

Thomas Sy Cantwheel. I think Sy is his middle name or first name, but Thomas Sy Cantwheel.

91

00:09:45,740 --> 00:09:52,740

And you got mailbox drops first and then there was an in-person meeting with Tim. And

92

00:10:00,140 --> 00:10:07,140

then Salina, there were three mailbox drops in there to meet. Then Salina, the daughter

93

00:10:07,300 --> 00:10:14,300

of Cantwheel, a year later, sort of, I believe after Cantwheel passed away, sort of wrote

94

00:10:15,300 --> 00:10:20,460

a note and attached more documents and said, my father's dying wish to the effect is that

95

00:10:20,460 --> 00:10:24,780

you have these. And so they were delivered.

96

00:10:24,780 --> 00:10:31,780

And then finally in 1999, July 9th, he received a package from a source called S1 in the mail

97

00:10:36,060 --> 00:10:43,060

and also a package from the source S2 which included a large manuscript that was originally

98

00:10:44,500 --> 00:10:51,500

unclassified that was Stanopsecret Magic. So those are the six sources that Tim Cooper

99

00:10:52,060 --> 00:10:53,620

winds up being the Cantwheel for.

100

00:10:53,620 --> 00:11:00,620

Now, it's important to emphasize that Tim tried to correspond with Dick Haynes and Tim Good

101

00:11:00,620 --> 00:11:06,820

and Stan Friedman and maybe a couple other serious researchers and wrote them letters,

102

00:11:06,820 --> 00:11:10,620

gave them documents and so forth, tried to get them interested at all and they weren't

103

00:11:10,620 --> 00:11:17,620

really responsive or interested. And from 1992, I believe, to 1996 until we got involved,

104

00:11:21,940 --> 00:11:26,580

he just kept them in his attic. He was kind of like, I'm not sure the real at all. He

105

00:11:26,580 --> 00:11:30,740

was quite skeptical. He was. He was very skeptical. And he wasn't out to make money or do this

106

00:11:30,740 --> 00:11:35,740

or the other thing. He just sort of sat on it. His whole time job as a security guard.

107

00:11:35,860 --> 00:11:40,860

What is it about these latest documents which have got you to, I think it would be fair

108

00:11:40,860 --> 00:11:41,860

to say, excited?

109

00:11:41,860 --> 00:11:48,860

Yeah, it's the original paper and original ink and original type writing. That's the

110

00:11:48,940 --> 00:11:55,940

number one thing. Those are all forensically testable. And then the sheer volume of material.

111

00:11:56,460 --> 00:11:58,460

The sheer volume of original obscure material.

112

00:11:58,460 --> 00:12:05,460

When you talk about obscure material, what do you mean obscure material?

113

00:12:05,740 --> 00:12:12,740

Things that you couldn't even contemplate fabricating unless you had a degree in military history

114

00:12:14,940 --> 00:12:21,940

had 10 or 20 years as an archivist in one of the many presidential libraries or national

115

00:12:23,940 --> 00:12:30,940

archives. You need those skills to try to create or fake something. They're just weird.

116

00:12:30,940 --> 00:12:37,940

The most recent documents that have arrived contain quite a range of material in the sense

117

00:12:43,740 --> 00:12:50,500

that some of it is stamped in red, top secret magic or top secret MJ12. And others of it

118

00:12:50,500 --> 00:12:55,020

are merely newspaper clippings that were included in the original Blue Book files.

119

00:12:56,020 --> 00:13:01,020

Forgive me, we're talking about Blue Book documents that are not contained in the National

120

00:13:01,020 --> 00:13:02,020

Archives.

121

00:13:02,020 --> 00:13:03,020

Yes.

122

00:13:03,020 --> 00:13:05,020

New Blue Book documents.

123

00:13:05,020 --> 00:13:12,020

Many of the documents are unequivocally Blue Book documents. One of the documents not

124

00:13:12,020 --> 00:13:17,020

only references Blue Book in sort of a notation on the upper right, but it also identifies

125

00:13:17,020 --> 00:13:24,020

MJ12 and paperclip files, all in the same document. But the document itself is a publicly available

126

00:13:25,520 --> 00:13:28,020

technical paper on nuclear propulsion.

127

00:13:28,020 --> 00:13:35,020

Right. Yeah, that's actually one of the ones that are posted on the website on [www.mjesticdocuments.com](http://www.mjesticdocuments.com)

128

00:13:35,860 --> 00:13:42,860

is we posted the first 10 or 15 pages of a report on isotope thermal thrusters by John

129

00:13:45,500 --> 00:13:52,500

Martinez, who is alive and well today. And this report is stamped top secret in the National

130

00:13:55,020 --> 00:13:56,020

Archives.

131

00:13:56,020 --> 00:14:03,020

It's a secret magic. It's a photocopy now, but the man's alive. He has the right expertise

132

00:14:03,020 --> 00:14:09,020

and background. Everything sort of checks. The only thing that hasn't been done is to

133

00:14:09,020 --> 00:14:16,020

go confront him or ask him, did you write this? And that's a tricky situation because I believe

134

00:14:18,020 --> 00:14:23,020

for the first time we have somebody who's fingerable as a source for reverse engineering

135

00:14:23,020 --> 00:14:30,020

and reverse science. Here's a technical paper with top secret magic on it. It's talking

136

00:14:31,020 --> 00:14:38,020

about propulsion technologies in the 50s. His papers are from the 50s in some cases,

137

00:14:39,020 --> 00:14:42,020

but this is actually 1968 or 69 paper.

138

00:14:42,020 --> 00:14:48,020

It may sound an obvious question, but how can you approach this guy?

139

00:14:49,020 --> 00:14:54,020

Well, the first thing he would do, suppose he's still clear, he would call a security

140

00:14:54,020 --> 00:15:00,020

office and say, Bob and Ryan just came by to visit me and ask me about classified material.

141

00:15:02,020 --> 00:15:09,020

What should I say? How should I deal with that? I want to plan that and think that through a little bit.

142

00:15:10,020 --> 00:15:13,020

But is this an endless, you know, sound of the oak?

143

00:15:13,020 --> 00:15:18,020

It is on the oak, but nobody really understands to go find it. Until now, I just told you.

144

00:15:19,020 --> 00:15:24,020

We have a long list of actions that we should be taking, one of which is, for example, contacting

145

00:15:25,020 --> 00:15:27,020

Dr. Ray R.E.A.

146

00:15:29,020 --> 00:15:35,020

And then the 93rd Technical Services Unit. I have the complete roster. These are the people that

147

00:15:35,020 --> 00:15:40,020

recovered the wreckage from Roswell according to the Interplanetary Phenomenon Unit. The

148

00:15:40,020 --> 00:15:46,020

Detachment 3 ran around, picked up all the wreckage and so forth. There's 160 and some

149

00:15:47,020 --> 00:15:56,020

unnamed of private, sergeants, BFCs, so forth, that were responsible. And I've found 30 of them

150

00:15:56,020 --> 00:16:01,020

on the internet, on Yahoo's search, people search. And I started to call some of them.

151

00:16:01,020 --> 00:16:06,020

And the question is finding the people that are in Detachment 3. Some of them have recalled,

152

00:16:06,020 --> 00:16:12,020

yeah, I was in New Mexico, I was there, but not talking about anything unusual. It's like,

153

00:16:12,020 --> 00:16:18,020

I picked up rocket debris all summer long. That's what happened to me. That was the one case

154

00:16:18,020 --> 00:16:25,020

and we'd tell probably another 20 witnesses that can be researched. They're easy before you

155

00:16:25,020 --> 00:16:29,020

start getting the names that are exceptionally difficult to find.

156

00:16:30,020 --> 00:16:36,020

It clearly gave coordinates of landing zone 2. And my first question is, I wonder where that is.

157

00:16:36,020 --> 00:16:42,020

I said, Ryan, do you have a SOFO map to go look? And so he did. I got several copies of

158

00:16:42,020 --> 00:16:50,020

Maledon All My Friends and sure enough, about 800 feet or so from the Trinity Burst is this

159

00:16:50,020 --> 00:16:57,020

longitude latitude coordinate. And then the challenge is, well, we need an aerial photograph

160

00:16:57,020 --> 00:17:07,020

of this particular site. And what we found was I went to the Willier Archives in Southern California

161

00:17:07,020 --> 00:17:14,020

and went and found a lot of people that were in the area. And I went to the Willier Archives

162

00:17:15,020 --> 00:17:23,020

in Southern California and went and found aerial photography of the Trinity Burst site.

163

00:17:23,020 --> 00:17:32,020

And this is the Trinity Burst site in the center with a fence around it. This is dated September 23, 1948.

164

00:17:32,020 --> 00:17:40,020

You'll notice in the lower left there's also a small circle and a round zone around that.

165

00:17:41,020 --> 00:17:52,020

And that is the coordinates of LZ2. And I found this particular picture before the summer drops

166

00:17:52,020 --> 00:17:59,020

happened at all, I mean like March or April of this year. And then later in the summer,

167

00:18:00,020 --> 00:18:14,020

we got a picture in a separate envelope that was this picture. And this picture is a leaked photograph

168

00:18:14,020 --> 00:18:22,020

from Source S1 that shows the Trinity Burst, a little 100 meter thing, and then a clear zone

169

00:18:22,020 --> 00:18:30,020

in that lower left-hand corner that has more trampling and a bigger security circle around it.

170

00:18:30,020 --> 00:18:40,020

And so it's very interesting to note these two particular photographs, clearly showing that something happened.

171

00:18:40,020 --> 00:18:49,020

The next photograph we want to get is the one that's dated June 30, 1947, that there was nothing there.

172

00:18:50,020 --> 00:18:57,020

If the Majestic 12 documents turn out to be the real thing, then clearly elements of the United States Air Force

173

00:18:57,020 --> 00:19:05,020

will have had a prominent role in any decision-making process. Over the past 50 years, many Air Force pilots

174

00:19:05,020 --> 00:19:11,020

have submitted their own official accounts of UFO encounters. But it's not just military pilots

175

00:19:11,020 --> 00:19:18,020

who have attracted the keen interest of American researcher Richard Haynes. His interviews with civilian pilots

176

00:19:18,020 --> 00:19:26,020

and flight attendants have helped Richard amass a personal data bank comprising of over 3,000 UFO pilot reports.

177

00:19:26,020 --> 00:19:31,020

It is, by far, away the largest collection of its kind in the world.

178

00:19:36,020 --> 00:19:44,020

And I began this level of work back in the 1960s, doing research for NASA,

179

00:19:45,020 --> 00:19:54,020

and had an opportunity to meet a lot of pilots. And so it's an important area, and I continue to collect data.

180

00:19:54,020 --> 00:20:01,020

I have over 3,000 cases now, very good cases. But I'm trying to specialize in electromagnetic effects.

181

00:20:01,020 --> 00:20:13,020

Some transient change in flight director, altimeter compass, VORs, onboard electronic systems

182

00:20:13,020 --> 00:20:20,020

that only change their behavior when there is the presence of some strange phenomenon near the airplane.

183

00:20:20,020 --> 00:20:29,020

Is this something that has stemmed from a result of actually analyzing the data and looking for specific patterns?

184

00:20:29,020 --> 00:20:37,020

Partly. As a psychologist, I'm very concerned with the entire testimony. And what that means is

185

00:20:37,020 --> 00:20:43,020

not just the words that are used, but the presentation of those words, non-verbal communications,

186

00:20:43,020 --> 00:20:54,020

the engineering aspects, what the pilots tell me. So I've had to study a lot about aeronautical systems, aeronautics in general.

187

00:20:54,020 --> 00:21:03,020

So I can put it in context and try to draw conclusions, not just from the patterns, which are important, but from specific details.

188

00:21:03,020 --> 00:21:14,020

Your background as somebody who began this interest working with NASA, what were you actually doing with the space agency at that time, back in the early 60s?

189

00:21:14,020 --> 00:21:23,020

I was directing a laboratory called the High Luminance Vision Laboratory, which was basically a space simulation.

190

00:21:23,020 --> 00:21:28,020

And I could simulate the way objects looked to the astronauts in outer space.

191

00:21:28,020 --> 00:21:33,020

This was done for rendezvous docking purposes for Gemini, Project Gemini.

192

00:21:33,020 --> 00:21:44,020

And during that research, I came to discover that I could set up an optical situation in my laboratory, it was a clean room, before there were clean rooms.

193

00:21:44,020 --> 00:21:50,020

And there was a solar simulator for realistic sunlight as it exists in space.

194

00:21:50,020 --> 00:21:55,020

And I could set up a target situation that could totally fool the observer.

195

00:21:55,020 --> 00:21:59,020

And I was surprised at that. I didn't expect that that could happen.

196

00:21:59,020 --> 00:22:08,020

But by controlling the optical variables, I discovered that I could fool you. I could make you see anything I wanted you to see practically.

197

00:22:08,020 --> 00:22:16,020

I could change shape, color, size, intensity, orientation, distance.

198

00:22:16,020 --> 00:22:21,020

And so I said to myself, I can explain UFOs, they're just misidentified natural phenomena.

199

00:22:21,020 --> 00:22:26,020

And I think as a skeptic, I set out to disprove the whole thing.

200

00:22:26,020 --> 00:22:32,020

Well, it wasn't very long before I found out that I was wrong. I couldn't explain everything that way.

201

00:22:32,020 --> 00:22:37,020

And that came as a result of interviewing pilots, a lot of them.

202

00:22:37,020 --> 00:22:43,020

Were these in the main military pilots, or was it just a general mix at that time?

203

00:22:43,020 --> 00:22:47,020

It was a general mix. I think there were more commercial pilots, actually.

204

00:22:47,020 --> 00:22:54,020

Because we were testing volunteer commercial pilots in our flight research in simulators.

205

00:22:54,020 --> 00:23:06,020

But was there one specific incident that you can recall that set you on this trail, if you like, of making damn sure that when the opportunity arises,

206

00:23:06,020 --> 00:23:13,020

and you have a quick word with those pilots, and if necessary, if the pilot's conducive to your line of questioning,

207

00:23:13,020 --> 00:23:20,020

do a lengthier study on a particular incident and the like, was the one thing that stuck out?

208

00:23:20,020 --> 00:23:28,020

I wish I could say yes, but my conversion was slow and gradual, because I'm a skeptical kind of a stubborn person.

209

00:23:28,020 --> 00:23:33,020

And I had to let the data speak for itself, and the data came in in bits and pieces.

210

00:23:33,020 --> 00:23:39,020

So it isn't any one case, although there are many spectacular single cases that I've looked at.

211

00:23:39,020 --> 00:23:47,020

It's the constellation. It's the message that is embedded in many, many high quality cases from pilots.

212

00:23:47,020 --> 00:23:52,020

As I fly commercial around the world, I try to make it a point to talk with the flight crew,

213

00:23:52,020 --> 00:23:56,020

both the flight attendants in the back and the flight crew up front.

214

00:23:56,020 --> 00:24:04,020

And I must say that I'm getting about 15 to 20 percent, roughly one out of five people I talk with,

215

00:24:04,020 --> 00:24:12,020

say yes, they've had a strange sighting. That doesn't mean that it's a, quote, traditional UFO, but it's something they couldn't identify.

216

00:24:12,020 --> 00:24:15,020

And with their experience, that's a significant, you see.

217

00:24:15,020 --> 00:24:26,020

I will share one that took place over Lake Michigan on an L-1011, filled with passengers on July 4th, 1979, I think it was.

218

00:24:26,020 --> 00:24:30,020

I don't remember the year very frankly, because I have so many. I'd like to remember them.

219

00:24:30,020 --> 00:24:38,020

But they were on autopilot at cruise altitude, cruise speed. The sun is above them and slightly behind them.

220

00:24:39,020 --> 00:24:48,020

And the captain told me, face to face, sitting in the cockpit of this airplane later on when we reconstructed the whole event,

221

00:24:48,020 --> 00:24:57,020

that he was sitting back in his seat with his hands behind his head, just, you know, nobody's flying the airplane, it's flying itself.

222

00:24:57,020 --> 00:25:04,020

His co-pilot is turned in his seat, looking behind him to the flight engineer, talking about something.

223

00:25:05,020 --> 00:25:08,020

And the sky is blue and no cloud up ahead.

224

00:25:08,020 --> 00:25:18,020

Well, Captain Schultz told me that suddenly something caught his attention out to the left about 30 degrees of straight ahead and 30 degrees above the horizon.

225

00:25:18,020 --> 00:25:23,020

And so he concentrated on it, and he said it appeared very quickly, full size.

226

00:25:23,020 --> 00:25:27,020

It did not appear as a point and enlarged. That's important.

227

00:25:27,020 --> 00:25:38,020

He said it was as if the object had broken through the atmosphere, because as it appeared full size, little radiating lines seemed to appear, like stress cracks.

228

00:25:38,020 --> 00:25:50,020

He took a paper napkin that he had in the cockpit and he held two corners and he held two corners, and he pushed his thumb through the middle, like he was demonstrating this effect.

229

00:25:50,020 --> 00:25:55,020

Well, he said, what's that? He thought he'd have a mid-air collision. He was quite concerned.

230

00:25:55,020 --> 00:26:01,020

His first officer turned in his seat and could see it. I talked to both of them and got the same story.

231

00:26:01,020 --> 00:26:06,020

The object was silvery, reflected sunlight, the way polished metal would.

232

00:26:06,020 --> 00:26:14,020

Came down in altitude to his altitude. Did a high speed turn. I calculated about 30 Gs, roughly.

233

00:26:14,020 --> 00:26:21,020

And about a thousand miles an hour towards him, about a thousand miles an hour going away in a climb, which is significant.

234

00:26:21,020 --> 00:26:28,020

And as it's leaving, it leaves a wispy, dark smoke trail behind it. He didn't see it coming.

235

00:26:28,020 --> 00:26:40,020

He said that he immediately radioed the Milwaukee Center, like traffic troll, and said, do you have any other traffic up here with us?

236

00:26:40,020 --> 00:26:47,020

And they checked the radar and said, no, we have nobody up here. And he didn't report it, obviously.

237

00:26:47,020 --> 00:27:00,020

I met a Soviet fighter pilot who'd retired by the time I met him. This was approximately 1995, 1994 that I met him.

238

00:27:00,020 --> 00:27:09,020

And he came to Novosibirsk, where I was lecturing at the university there, to meet me, from Chelyabinsk.

239

00:27:09,020 --> 00:27:17,020

And because he had this story to tell, and he couldn't find anyone to tell it to. So I'd been there from America, and so he came over.

240

00:27:17,020 --> 00:27:27,020

Well, he was in a Czechoslovak two-place trainer, but he was alone in the cockpit, doing acrobatic training.

241

00:27:27,020 --> 00:27:33,020

It was a clear sunny day, very cold, as you might imagine, in the year old region.

242

00:27:33,020 --> 00:27:43,020

Well, he was doing acrobatic loops, vertical loops. And as he would come over the top and start down the other side, he was generally in the northern direction.

243

00:27:43,020 --> 00:27:49,020

And the city of Chelyabinsk, which is about one and a half million people, was to the north of him.

244

00:27:49,020 --> 00:28:00,020

And he said on three, I think three of these loops, as he got to the top of this loop and looked almost level now in the northern direction,

245

00:28:00,020 --> 00:28:08,020

here was a very long, grayish cigar, just hovering out there in front of him.

246

00:28:08,020 --> 00:28:18,020

Well, he was flabbergasted. I mean, he was shocked. He doesn't speak a word of English. So it was all in Russian.

247

00:28:18,020 --> 00:28:28,020

And he said to me that it didn't move, as far as he could tell. There was no background to compare, actually.

248

00:28:28,020 --> 00:28:36,020

But he was surprised it was above the city, because there was a lot of air defense at that time. This was before Spurshrek.

249

00:28:36,020 --> 00:28:42,020

And he did three of these loops, and each time it was in the same place, and he radiated the field where he had taken off from,

250

00:28:42,020 --> 00:28:46,020

which was to the south and east of the city, quite a ways.

251

00:28:46,020 --> 00:28:54,020

Do you have anything on radar? And they checked, nothing on radar. So they said, come back and land. Don't stay up there.

252

00:28:54,020 --> 00:29:00,020

He had no weapons on board the plane. It was just a training flight. So he did. He immediately went back,

253

00:29:00,020 --> 00:29:08,020

as he's getting ready to land, which would must have been ten minutes later, approximately, he happens to touch his face.

254

00:29:08,020 --> 00:29:16,020

He's wearing a leather flight helmet, no goggles, so it's unexposed around his eyes, and an oxygen mask.

255

00:29:16,020 --> 00:29:24,020

He gave me the oxygen mask as a souvenir. He said, I happened to touch my eye region and my nose,

256

00:29:24,020 --> 00:29:30,020

above where it was protected, and I couldn't feel anything. I was anesthetized.

257

00:29:30,020 --> 00:29:39,020

And he used the Russian word for cork. He said, my skin felt hard and puffy, and I had no sensation there, like cork.

258

00:29:39,020 --> 00:29:46,020

So he landed. He's getting a little concerned, right? Went right, got out of the airplane, went right to the dispensary,

259

00:29:46,020 --> 00:29:53,020

to the doctor. The doctor examined him and said, you have some sort of burns, skin burns.

260

00:29:53,020 --> 00:30:00,020

Come back and see me in a day if they don't repair. Well, he said, for about two and a half to three weeks,

261

00:30:00,020 --> 00:30:06,020

his skin, right in this open region here, puffed out, he said about a half an inch.

262

00:30:06,020 --> 00:30:12,020

Well, I talked to his wife when I was visiting years later in Chelyabinsk, and she backed up the story.

263

00:30:12,020 --> 00:30:19,020

She used her own words, but they backed up the story. She was scared, some sort of radiation she was concerned about.

264

00:30:19,020 --> 00:30:26,020

And eventually, after two, three weeks, it goes back to normal, and there's nothing remaining, by the way, today.

265

00:30:27,020 --> 00:30:35,020

He was very concerned, as you might imagine, and I said, would you be willing to let me hypnotize you?

266

00:30:35,020 --> 00:30:44,020

And this is only the second time I've had a pilot agree, and so in Russian, would you believe, I hypnotized this Russian pilot,

267

00:30:44,020 --> 00:30:51,020

the Soviet pilot, and he comes out with more details under hypnosis, which tells me that it's a valid technique,

268

00:30:52,020 --> 00:30:58,020

and I can't bias him in any significant way, because I don't know that cockpit that well.

269

00:30:58,020 --> 00:31:04,020

Later on, I studied the cockpit and the flight performance of the aircraft, and I can tell you the wavelength transmission of the windows,

270

00:31:04,020 --> 00:31:10,020

because I'm concerned of how many seconds he was exposed, assuming it was from that object.

271

00:31:10,020 --> 00:31:17,020

What is the radiation dose falling on the skin that would produce that level of effect, even though we don't know what it is?

272

00:31:17,020 --> 00:31:25,020

It was edema, it was a water buildup, but we don't understand the hardness, the quark effect, let's call it.

273

00:31:27,020 --> 00:31:30,020

It was a very interesting case from the Soviet Union.

274

00:31:31,020 --> 00:31:44,020

One case comes to mind, a pilot, and three passengers, two of whom were pilots themselves, were flying from Southern Florida up to North Carolina at night,

275

00:31:44,020 --> 00:31:51,020

in a twin-engine propeller plane, and Willie Smith did the analysis with Dr. Heineck years ago.

276

00:31:51,020 --> 00:31:54,020

The two of them interviewed the pilot.

277

00:31:55,020 --> 00:32:03,020

Well, they had electromagnetic problems with their VOR, which is part of the in-flight navigation system,

278

00:32:03,020 --> 00:32:07,020

such that it was drifting them farther and farther out to sea.

279

00:32:07,020 --> 00:32:09,020

They were over the Atlantic Ocean at the time.

280

00:32:09,020 --> 00:32:16,020

They were about 10 miles off the coast of Florida, and they could keep the land in sight, but there was not much traffic,

281

00:32:16,020 --> 00:32:20,020

and the air was as reasonable and so forth, smooth.

282

00:32:20,020 --> 00:32:27,020

Well, that's the first part of the story, that they're drifting more and more, so air traffic control, I think at Atlanta,

283

00:32:27,020 --> 00:32:29,020

calls them and says, where are you going?

284

00:32:29,020 --> 00:32:35,020

Correct your flight path, 10 degrees left, you know, get back to land, so to speak, because you're drifting further and further.

285

00:32:35,020 --> 00:32:46,020

And they check their VOR and find that it's correct, that it's reading correctly, even though the radar from the ground tells them they're in the wrong place, more and more.

286

00:32:46,020 --> 00:32:54,020

Well, this happens twice. They have two corrections in flight over about a 40-minute period.

287

00:32:54,020 --> 00:33:04,020

Well, at one point, off to the east of them in the dark night sky, they see a light coming towards them, and it's fairly fast, it's fairly bright.

288

00:33:04,020 --> 00:33:11,020

They think it's an airplane, so he flashes his landing lights, which is standard operating procedure, right?

289

00:33:11,020 --> 00:33:16,020

Just to signal they see you, because you don't want to have any collision, of course.

290

00:33:16,020 --> 00:33:24,020

The object comes towards them on a bearing about 40 degrees, about the 2 o'clock position, roughly, relative to their heading.

291

00:33:24,020 --> 00:33:36,020

It comes down to their altitude, and the witnesses claim that this was a triangle, an equilateral triangle, whose sides were vertical.

292

00:33:36,020 --> 00:33:45,020

You can think of that, so it isn't a thin triangle, it's a thick triangle, about six stories high, with a 60 feet, 70 feet thick,

293

00:33:45,020 --> 00:33:55,020

and at least, I forget that the estimate was hundreds of feet side to side to side on the three sides, and a triangular opening in the middle.

294

00:33:55,020 --> 00:34:01,020

And the pilot said it was such a huge opening that he was contemplating flying through the middle of this thing to avoid it.

295

00:34:01,020 --> 00:34:08,020

The object comes to an instantaneous stop at some unknown distance, but they don't know how far away it was,

296

00:34:08,020 --> 00:34:16,020

and reverses 180 degrees and goes off as it has come at a high speed, until it's out of sight.

297

00:34:16,020 --> 00:34:21,020

Well, as interesting as that case is, that's a non-erodynamic vehicle, as far as I'm concerned.

298

00:34:21,020 --> 00:34:26,020

It's not ball lightning, it's not birds, it's not a balloon, for lots of reasons.

299

00:34:26,020 --> 00:34:31,020

It's not stealth technology, because you'd never build anything that's stealth that way.

300

00:34:31,020 --> 00:34:36,020

We don't know its propulsion, it did not produce a shock wave.

301

00:34:36,020 --> 00:34:40,020

In that case, there were no electromagnetic effects as it was near the airplane.

302

00:34:40,020 --> 00:34:43,020

Perhaps the earlier effects, we don't know.

303

00:34:43,020 --> 00:34:52,020

It had very bright round lights, like headlights, along this 60 foot high front facing it.

304

00:34:52,020 --> 00:34:56,020

It flew front forward, by the way, not point forward.

305

00:34:56,020 --> 00:35:01,020

Each of these round lights were estimated to be six feet in diameter and white.

306

00:35:01,020 --> 00:35:07,020

So you can calculate the megawatts that are required to light those search lights up, whatever they are.

307

00:35:07,020 --> 00:35:10,020

And by the way, I don't think they're portholes and I don't think they're lights.

308

00:35:10,020 --> 00:35:14,020

I think they're a direct artifact of the propulsion system.

309

00:35:17,020 --> 00:35:24,020

While putting pen to paper has never been a problem for Richard Haynes, the same can't be said of Whitley-Strieber.

310

00:35:24,020 --> 00:35:32,020

Over the past decade, this most complex of characters has unleashed a mind-numbing series of books on UFOs

311

00:35:32,020 --> 00:35:37,020

ever since undergoing a traumatic abduction experience which deeply affected the man.

312

00:35:37,020 --> 00:35:45,020

But what, we wanted to know, had persuaded this gifted writer to set aside all talk of UFOs and abductions

313

00:35:45,020 --> 00:35:51,020

and instead produce an astonishing new book, warning of impending dangers to the global environment.

314

00:35:51,020 --> 00:35:59,020

The subject matter of the new book, which is called the Coming Global Superstorm, is sudden climate change.

315

00:35:59,020 --> 00:36:10,020

In the new scientists of November the 27th, 1999, there is a story about the North Atlantic Drift,

316

00:36:10,020 --> 00:36:15,020

which is a current that is vital to the weather of Europe.

317

00:36:15,020 --> 00:36:24,020

It states that this current is changing its strength because of global warming

318

00:36:24,020 --> 00:36:29,020

and that Europe is liable to get much colder very soon.

319

00:36:29,020 --> 00:36:35,020

A few days ago there was a violent storm that swept across Europe

320

00:36:35,020 --> 00:36:43,020

because apparently of the declining power of the North Atlantic Drift,

321

00:36:43,020 --> 00:36:53,020

the Coming Global Superstorm is about what happens as these currents that bring warm water up from the tropics fail.

322

00:36:53,020 --> 00:37:00,020

And the reason they will fail is that the water in the northern oceans is getting so warm

323

00:37:00,020 --> 00:37:07,020

that the heat pump effect between the tropics and the North is ending.

324

00:37:07,020 --> 00:37:14,020

And the ironic danger of global warming is not that things will get too hot

325

00:37:14,020 --> 00:37:22,020

but that they're going to get very much colder very suddenly and the first place at peril is Europe.

326

00:37:22,020 --> 00:37:28,020

That is essentially the thesis of this book.

327

00:37:28,020 --> 00:37:36,020

What was it, what was the catalyst if there was such a thing that inspired you to research, if you like, the environment

328

00:37:36,020 --> 00:37:39,020

and produce this book?

329

00:37:39,020 --> 00:37:48,020

Well, I was writing a book called The Edge with the radio show host Art Bell.

330

00:37:48,020 --> 00:37:57,020

We were working on it together when I had a meeting in Toronto with a gentleman who seemed to know a great deal

331

00:37:57,020 --> 00:38:05,020

about the way the planet works including giving me a quick two paragraph explanation of ice ages

332

00:38:05,020 --> 00:38:10,020

and the comment he also made was that this was about to happen again.

333

00:38:10,020 --> 00:38:18,020

And I took notes while he was talking and it was complex but I was able to sort them out well enough.

334

00:38:18,020 --> 00:38:29,020

And when I sorted them out I began to realize that what he had described was that the absolute edge of scientific knowledge

335

00:38:29,020 --> 00:38:36,020

of how the process of ice ages has taken place.

336

00:38:36,020 --> 00:38:46,020

And it was very interesting and I could also see that it was a very important warning because things were going to fall to pieces pretty soon

337

00:38:46,020 --> 00:38:50,020

and we really weren't looking for this, we didn't realize it.

338

00:38:50,020 --> 00:38:53,020

So Art and I decided to change the subject of the book and write about this.

339

00:38:53,020 --> 00:38:59,020

This gentleman that I met came to my room in the middle of the night at three o'clock in the morning

340

00:38:59,020 --> 00:39:05,020

and he seemed as human as you and me, he just was terribly brilliant.

341

00:39:05,020 --> 00:39:12,020

And there were many, many other things that he spoke about as well that I thought were richly insightful.

342

00:39:12,020 --> 00:39:16,020

It was a marvelous meeting and that was where it started.

343

00:39:16,020 --> 00:39:23,020

Now there's no mention whatsoever of UFOs or extraterrestrials or anything of that ilk in the book itself.

344

00:39:23,020 --> 00:39:31,020

But nonetheless, would it be fair to say that all of the so-called visitations, all of these global events,

345

00:39:31,020 --> 00:39:37,020

that some label UFO phenomena, some label contacts, some label all manner of things,

346

00:39:37,020 --> 00:39:44,020

would it be fair to say that all of this has now, if you like, you found a meaning for this,

347

00:39:44,020 --> 00:39:53,020

that the well-being, the safety, if you like, of our planet is uppermost in the importance, if you like, of the phenomena

348

00:39:53,020 --> 00:39:55,020

or whoever is behind the phenomena.

349

00:39:55,020 --> 00:40:01,020

The well-being of the planet and the voss is uppermost in my mind.

350

00:40:01,020 --> 00:40:08,020

I have taken from my experiences whatever I could to serve that,

351

00:40:08,020 --> 00:40:15,020

including trying to understand whether or not there really are aliens here.

352

00:40:15,020 --> 00:40:25,020

I tried hard to find this man to understand who he was and how he had gotten to where I was in the middle of the night

353

00:40:25,020 --> 00:40:31,020

when there was no one except just three or four people who even knew where I was.

354

00:40:31,020 --> 00:40:34,020

I was unable to do so.

355

00:40:34,020 --> 00:40:42,020

I consider him to be in some way connected with the phenomenon, but I don't know how he seemed to a totally human.

356

00:40:55,020 --> 00:40:59,020

The UFO Congress in Acapulco was a memorable event,

357

00:40:59,020 --> 00:41:04,020

made all the more so after the Pope gave his personal blessing to the organizers

358

00:41:04,020 --> 00:41:09,020

through his close friend and Catholic Church theologian, Monsignor Carado Balducci.

359

00:41:09,020 --> 00:41:14,020

The same Pope, who only a year before, had travelled to Mexico City

360

00:41:14,020 --> 00:41:23,020

and been greeted not just by millions on the ground below, but an extraordinary fleet of spheres which appeared directly overhead.

361

00:41:29,020 --> 00:41:34,020

The UFO Congress in Acapulco was a memorable event,

362

00:41:34,020 --> 00:41:39,020

made all the more so after the Pope gave his personal blessing to the organizers.

363

00:41:39,020 --> 00:41:44,020

The UFO Congress in Acapulco was a memorable event,

364

00:41:44,020 --> 00:41:49,020

made all the more so after the Pope gave his personal blessing to the organizers.

365

00:41:59,020 --> 00:42:02,020

The UFO Congress in Acapulco was a memorable event,

366

00:42:02,020 --> 00:42:07,020

made all the more so after the Pope gave his personal blessing to the organizers.

367

00:42:12,020 --> 00:42:20,020

For years, skeptics and debunkers and indeed some UFO researchers have poured scorn on the so-called fleets.

368

00:42:20,020 --> 00:42:24,020

They insist that the sphere-like objects are nothing more than balloons.

369

00:42:24,020 --> 00:42:30,020

However, during our visit to Acapulco, Russell Callaghan stumbled across a little known,

370

00:42:30,020 --> 00:42:33,020

but crucial fact that belies this argument.

371

00:42:33,020 --> 00:42:37,020

Here we are putting the final touches to another edition of UFO's Hard Evidence.

372

00:42:37,020 --> 00:42:44,020

Just reflecting on what Graham had to say there, the trip to Acapulco was indeed fantastic.

373

00:42:44,020 --> 00:42:47,020

It was a privilege to be invited there to speak.

374

00:42:47,020 --> 00:42:54,020

We actually showed the Mexican people some of the NASA footage that has got people talking across the globe really.

375

00:42:54,020 --> 00:42:58,020

By way of a thank you, let's be honest now,

376

00:42:58,020 --> 00:43:07,020

Mexico has provided some of the best rational UFO footage and images and accounts

377

00:43:07,020 --> 00:43:10,020

for the last 10 years from anywhere else on the world.

378

00:43:10,020 --> 00:43:15,020

And it's Jaime Massan who has been instrumental in making sure that this stuff goes out to people.

379

00:43:15,020 --> 00:43:19,020

We've done our bit, we've made sure that people see what Jaime's been presenting.

380

00:43:19,020 --> 00:43:25,020

Now, some people will have different feelings on some of the Mexican footage.

381

00:43:25,020 --> 00:43:32,020

For instance, we saw there, Roman Catholic city, or sorry, a Roman Catholic country,

382

00:43:32,020 --> 00:43:38,020

Mexico city alone has 22 million people, 98% of those are Roman Catholics.

383

00:43:38,020 --> 00:43:42,020

The Pope's visit was important and it meant a lot to those people.

384

00:43:43,020 --> 00:43:51,020

Shall we say that the fact that footage was recorded on the day of the Pope's visit isn't surprising.

385

00:43:51,020 --> 00:43:58,020

The Catholic Church, as we've seen in earlier editions of UFOs, had evidence and of course in the magazine.

386

00:43:58,020 --> 00:44:01,020

I'm embracing the subject in Mexico City.

387

00:44:01,020 --> 00:44:09,020

The word UFO is in the Vatican's own directory and Monsignor Carado Balducci seems to

388

00:44:10,020 --> 00:44:14,020

be at ease with the subject with the Mexican people.

389

00:44:14,020 --> 00:44:21,020

So much so that when we stood there on the Wednesday night and heard Carado Balducci deliver the Pope's personal blessing

390

00:44:21,020 --> 00:44:26,020

on the Congress and wishing it success and happiness to the people who were there.

391

00:44:26,020 --> 00:44:31,020

It's a milestone that wasn't talked about anywhere other than in Mexico.

392

00:44:31,020 --> 00:44:35,020

Surely that should make the news, you know, but that's another story.

393

00:44:35,020 --> 00:44:41,020

What we're talking about is how these fleets, the real McCoy, are they balloons?

394

00:44:41,020 --> 00:44:46,020

Are they hoaxes? Are they stars? Well, the stars for me, no.

395

00:44:46,020 --> 00:44:51,020

The skeptics seem to hang on to anything and everything that's feasible.

396

00:44:51,020 --> 00:44:54,020

Stars can't be stars in the day.

397

00:44:54,020 --> 00:44:56,020

These things are moving about for goodness sake.

398

00:44:56,020 --> 00:44:58,020

Look closely at the footage.

399

00:44:58,020 --> 00:45:00,020

They don't move in the same direction.

400

00:45:00,020 --> 00:45:02,020

These things wander around each other.

401

00:45:02,020 --> 00:45:07,020

The formations change, especially this one on the day of the Pope's arrival.

402

00:45:07,020 --> 00:45:10,020

The formations are constantly changing.

403

00:45:10,020 --> 00:45:12,020

Birds don't fly like that.

404

00:45:12,020 --> 00:45:15,020

Birds tend to stay together and move together.

405

00:45:15,020 --> 00:45:27,020

And if we watch carefully, we can see that there's different motion, different speeds within the actual fleet of la Tiller or whatever you'd like to refer to it as.

406

00:45:27,020 --> 00:45:29,020

We don't know what they are.

407

00:45:29,020 --> 00:45:36,020

One thing that I'm fast becoming to accept that they aren't are balloons.

408

00:45:36,020 --> 00:45:50,020

Now, we've heard over the years and last year there were some remarkable footage shot in the south of England that the people at the television company who recorded this footage didn't want to share it with anyone.

409

00:45:50,020 --> 00:46:01,020

The only people who saw it were those fortunate to be in the south of England on the night of the newscast or if someone's been fortunate to see a recording of this thing.

410

00:46:01,020 --> 00:46:06,020

Leading researchers in this country turn around and say, oh, these are just balloons.

411

00:46:06,020 --> 00:46:09,020

Well, Mexico City is a little bit different.

412

00:46:09,020 --> 00:46:13,020

This country, six, seven hundred feet above sea level is the norm.

413

00:46:13,020 --> 00:46:21,020

The high peaks up on the moors of Yorkshire and up in the Cumbria Mountains, a thousand, a thousand one hundred feet above sea level.

414

00:46:21,020 --> 00:46:23,020

That's nothing.

415

00:46:23,020 --> 00:46:27,020

You know, Mexico City is thousands and thousands of metres above sea.

416

00:46:27,020 --> 00:46:36,020

Staying with Jaime who lives in Mexico City itself, I can tell you climbing the stairs to bed on a night was something of a task.

417

00:46:36,020 --> 00:46:39,020

You know, the breath is drawn away from you.

418

00:46:39,020 --> 00:46:49,020

It took me five or seven days just to be able to feel comfortable with the high altitude and the low air content or the low oxygen content within the air.

419

00:46:49,020 --> 00:46:52,020

This poses a problem for things like this.

420

00:46:52,020 --> 00:47:00,020

During the Congress, a young man was there every day with this corona advertising blimp, advertising the Congress, but he was tethered.

421

00:47:00,020 --> 00:47:03,020

And I thought, well, surely going to fly this damn thing.

422

00:47:03,020 --> 00:47:06,020

It was beautiful weather, you know, it was 90 degrees in the shade.

423

00:47:06,020 --> 00:47:08,020

There wasn't a breath of wind.

424

00:47:08,020 --> 00:47:10,020

There shouldn't have been problems.

425

00:47:10,020 --> 00:47:21,020

I spoke to him and in broken English, he explained quite simply that the problem is the altitude in Mexico, more so Mexico City than Acapulco,

426

00:47:21,020 --> 00:47:25,020

because Acapulco is only a few hundred feet above the sea.

427

00:47:25,020 --> 00:47:36,020

But the quality of helium gas that's to go into these things to fill them makes the expense enormous to fill one of these blimps with high quality helium to get lift.

428

00:47:36,020 --> 00:47:43,020

Because of the altitude of Mexico City, even when we get these things buoyant, he described them as being lazy.

429

00:47:43,020 --> 00:47:46,020

They fly very lazily in the sky.

430

00:47:46,020 --> 00:47:48,020

Yes, children's balloons are available.

431

00:47:48,020 --> 00:47:54,020

We've seen the cartoon characters, the little silver balloons, and I've seen them where people have let go of them.

432

00:47:54,020 --> 00:47:56,020

And they don't achieve a great height.

433

00:47:56,020 --> 00:48:06,020

These things seem to saunter about at 10, 15 feet above the ground and end up getting caught in the electricity cables that are only maybe 20 feet above the road.

434

00:48:06,020 --> 00:48:13,020

Now that's due quite simply to the atmosphere, the air conditions in Mexico City.

435

00:48:13,020 --> 00:48:17,020

Again, very high altitude, very thin air.

436

00:48:17,020 --> 00:48:20,020

The helium just can't lift the balloons.

437

00:48:20,020 --> 00:48:29,020

And to say that a fleet of balloons could be released, hundreds of balloons in the pope's image, we've counted 50 different things there, 50 different images.

438

00:48:29,020 --> 00:48:43,020

If this was the case, and these things are flying at several thousand feet, the volume of helium gas and the expense of helium gas to fill these balloons to achieve this sort of lift

439

00:48:43,020 --> 00:48:48,020

would put you in the category of paying somewhere around about 15 or 20 pounds of balloon.

440

00:48:48,020 --> 00:48:51,020

Mexican people don't earn that in a week.

441

00:48:51,020 --> 00:48:54,020

Ask yourself the question, are they going to pay that for a balloon?

442

00:48:54,020 --> 00:48:58,020

No, I do not think these are balloons.

443

00:48:58,020 --> 00:49:06,020

As we approach the dawn of a new millennium, something else of potentially huge importance was

taking place on the other side of the world.

444

00:49:07,020 --> 00:49:16,020

On the 26th of December, the Phenomena exhibition opened its doors at the Fremantle passenger terminal near Perth, Western Australia.

445

00:49:16,020 --> 00:49:31,020

Some two years in the planning and a solid year in the making, the organisers of Phenomena intend to clone the exhibition and, through a worldwide franchising operation, help further educate tens of millions as to the reality of this subject.

446

00:49:32,020 --> 00:49:45,020

Occupying some 12,000 square feet of space and employing some of the very latest visual and display technology, the exhibition is composed of several pods, each comprising of a particular theme.

447

00:49:45,020 --> 00:49:58,020

UFO magazine has worked closely with the exhibition organisers during the past two years and made a sizeable contribution in terms of literature, fact-finding, images and videotape material.

448

00:49:58,020 --> 00:50:13,020

Elsewhere, Dr. Roger Lear has supported the venture by kindly donating some of his prize surgically removed implants, while a mysterious sphere that fell to earth in Mexico several years ago was loaned by Hamim Hasan

449

00:50:13,020 --> 00:50:16,020

and housed in an impressive glass casing.

450

00:50:17,020 --> 00:50:29,020

So join with us now as we wander through this truly unique exhibition, one that will reopen its doors in Sydney later in the year and later appear in towns and cities across the globe.

451

00:51:13,020 --> 00:51:15,020

Thank you.

452

00:51:44,020 --> 00:51:50,020

Welcome to the International UFO Congress and Film Convention.

453

00:51:50,020 --> 00:51:55,020

The largest UFO conference of its type stays anywhere in the world.

454

00:51:57,020 --> 00:52:04,020

The International UFO Congress is the largest UFO conference in the world.

455

00:52:04,020 --> 00:52:10,300

us to Loughlin, Nevada, home to the International UFO Congress and Film Convention, the largest

456

00:52:10,300 --> 00:52:14,980

UFO conference of its type staged anywhere in the world.

457

00:52:14,980 --> 00:52:19,860

Once more, our cameras were present to record several on-the-spot interviews with some of

458

00:52:19,860 --> 00:52:22,300

the key speakers.

459

00:52:22,300 --> 00:52:27,820

Larry Warren is no stranger to UK shores, but did he have anything new to add to those

460

00:52:27,820 --> 00:52:32,740

events he first described in his book *Left at East Gate*, which claimed, among other

461

00:52:32,740 --> 00:52:40,460

things, that a UFO appeared over Rendlesham Forest in December 1980?

462

00:52:40,460 --> 00:52:44,660

Cameras and such like were taken into the woods over this period of time, but nobody

463

00:52:44,660 --> 00:52:47,500

until now has ever seen any images.

464

00:52:47,500 --> 00:52:49,100

You produced images.

465

00:52:49,100 --> 00:52:50,300

Tell us about that.

466

00:52:50,300 --> 00:52:55,460

The images that I showed, I showed one picture which didn't reproduce very well.

467

00:52:55,460 --> 00:53:00,540

We'll work on that glitch for leads, sorted out by then.

468

00:53:01,060 --> 00:53:04,780

What happened to me since our book came out, and of course we really did have a great

469

00:53:04,780 --> 00:53:09,260

deal of success as far as reaching people in England and feeling empowered, that this

470

00:53:09,260 --> 00:53:14,780

event is your Roswell and it is something not to be ashamed of or not look at.

471

00:53:14,780 --> 00:53:18,940

It's something you don't really sink your teeth into and get involved.

472

00:53:18,940 --> 00:53:24,140

Well, having a book come out and with the advent of the Internet, which I'm not up on

473

00:53:24,140 --> 00:53:31,140

unfortunately yet, a lot of witnesses that went through these events had no idea that

474

00:53:31,140 --> 00:53:32,940

word one had been mentioned about it.

475

00:53:32,940 --> 00:53:35,300

They went on with their careers.

476

00:53:35,300 --> 00:53:40,420

They retired, and in the last few years, five years or so, we've seen most of the people

477

00:53:40,420 --> 00:53:44,820

I was with either long out of the military starting to see the stuff come up on their

478

00:53:44,820 --> 00:53:51,220

computers or seeing the book on television, Benthwater's my god, it's out.

479

00:53:51,820 --> 00:53:56,620

On the Internet, easily accessing it because there's the Benthwater's alumni site, people

480

00:53:56,620 --> 00:54:00,660

that were stationed there over a 40-year period, and they're starting to see, well,

481

00:54:00,660 --> 00:54:04,340

this is the UFO thing, it's out, and then they found it.

482

00:54:04,340 --> 00:54:08,860

What happened to Peter and I is that through our publisher, back when they did cooperate

483

00:54:08,860 --> 00:54:14,540

with us and before they decided to keep the book sales, is that we would get letters forwarded

484

00:54:14,540 --> 00:54:19,980

to us, and many times they're from regular folks that come to these conferences, and

485

00:54:19,980 --> 00:54:25,940

more often than I started to find they were from very key players in this event that were

486

00:54:25,940 --> 00:54:29,340

higher ranked than I or equivalent rank.

487

00:54:29,340 --> 00:54:34,060

Some were friends, some I knew peripherally, saying, good for you, glad you did it.

488

00:54:34,060 --> 00:54:39,940

A few were, I have to be honest, saying, well, I don't remember any of this.

489

00:54:39,940 --> 00:54:44,300

A number of them were my god, it filled in the gap because I couldn't get off my post

490

00:54:44,300 --> 00:54:45,300

that night.

491

00:54:45,620 --> 00:54:51,100

But it also countered, and will counter over this next year, is that I've been accused

492

00:54:51,100 --> 00:54:57,740

of it all, we all know this, but over the years people have said that there was a rumor

493

00:54:57,740 --> 00:55:00,380

mill, and so anyone could have picked up on this information.

494

00:55:00,380 --> 00:55:04,660

It will be very apparent to people over the next year that there was no rumor mill when

495

00:55:04,660 --> 00:55:10,660

people that worked on our flight that didn't get out there had no idea what had happened.

496

00:55:10,660 --> 00:55:14,380

At all, it was that clamped down, like some senior people said.

497

00:55:14,380 --> 00:55:18,580

I got a letter, first of all, that said, I want to thank you for what you did.

498

00:55:18,580 --> 00:55:21,540

This is leading to the pictures.

499

00:55:21,540 --> 00:55:25,940

They came out and this gentleman said to me, and I'm holding his name right now because

500

00:55:25,940 --> 00:55:29,380

he's not sure what he would like to actually be dealing with this.

501

00:55:29,380 --> 00:55:33,460

I said, I don't know if I'm too controversial, I shouldn't be the guy.

502

00:55:33,460 --> 00:55:38,820

His view, counter view on that is that I've done this from the beginning.

503

00:55:38,820 --> 00:55:41,180

He's watched it develop.

504

00:55:41,180 --> 00:55:44,740

He said no matter what they do to you, you keep coming back.

505

00:55:44,740 --> 00:55:50,580

He has children, he has a lot to lose as an executive now.

506

00:55:50,580 --> 00:55:52,580

He took these pictures as he told me.

507

00:55:52,580 --> 00:55:54,620

I have all of it in his own handwriting.

508

00:55:54,620 --> 00:55:59,220

I even have the negatives, the original negatives that can be analyzed and will.

509

00:55:59,220 --> 00:56:01,360

I've sat on these for two years.

510

00:56:01,360 --> 00:56:04,620

Even my dear co-author, Pete, has been very nervous about these.

511

00:56:04,620 --> 00:56:07,180

I think I've frightened of them.

512

00:56:07,180 --> 00:56:11,940

I have shown a few people and over the years I think it's one more nail in the coffin.

513

00:56:11,940 --> 00:56:14,700

Oh, Jesus, this guy might be right for God's sake.

514

00:56:14,700 --> 00:56:16,740

A lot of people don't want that to be right.

515

00:56:16,740 --> 00:56:17,740

I don't want to be right.

516

00:56:17,740 --> 00:56:18,860

I want to know what happened tonight.

517

00:56:18,860 --> 00:56:22,820

He told me I have these pictures and I'm like, look, I'm not even an expert on this.

518

00:56:22,820 --> 00:56:25,740

I have enough to deal with on my plate.

519

00:56:25,740 --> 00:56:31,380

Basically this guy was involved on the first night, snapped pictures with a Canon camera

520

00:56:31,380 --> 00:56:36,740

that was in the back of a law enforcement car for accident investigation.

521

00:56:36,780 --> 00:56:40,420

He took the film, they encountered, this is literally when they were thinking they were

522

00:56:40,420 --> 00:56:46,540

encountering a crash plane, started taking pictures of this triangular object as described

523

00:56:46,540 --> 00:56:50,380

as seen in some of the reports that are coming out from the next day now.

524

00:56:50,380 --> 00:56:51,820

Same lighting configuration.

525

00:56:51,820 --> 00:56:54,820

It has density to the triangle, a black triangle.

526

00:56:54,820 --> 00:56:58,780

It doesn't look like what I saw two nights later at all.

527

00:56:58,780 --> 00:56:59,900

It really doesn't.

528

00:56:59,900 --> 00:57:04,940

But it does match exactly the verbal descriptions and written descriptions of the gentleman on

529

00:57:04,940 --> 00:57:05,940

the first night.

530

00:57:05,980 --> 00:57:08,300

He did something quite unique with the film.

531

00:57:08,300 --> 00:57:09,300

Amazing.

532

00:57:09,300 --> 00:57:15,300

What he did, he was higher ranked and had been in the game, knew this was extreme significance.

533

00:57:15,300 --> 00:57:18,900

These gentlemen did experience missing time, which they're having a great deal of problems

534

00:57:18,900 --> 00:57:19,900

with.

535

00:57:19,900 --> 00:57:28,140

These people are now seeking out UFO or experience your friendly therapist to heal some things

536

00:57:28,140 --> 00:57:32,660

that are in their lives, the memories.

537

00:57:32,700 --> 00:57:37,300

He took the film, what he did is that with his knowledge of this, he said this film will

538

00:57:37,300 --> 00:57:40,620

never be seen again.

539

00:57:40,620 --> 00:57:45,660

To another person that was with him, he took the camera, he fired off pictures.

540

00:57:45,660 --> 00:57:50,740

The first picture I showed today is taken at a distance of 150 feet approximately in

541

00:57:50,740 --> 00:57:51,740

a clearing.

542

00:57:51,740 --> 00:57:54,780

I know exactly where this clearing is and have been bringing people there for years.

543

00:57:54,780 --> 00:58:00,460

It's not the site on the third night on Capel Green, it's before that.

544

00:58:00,460 --> 00:58:03,740

He took the fire that first shot.

545

00:58:03,740 --> 00:58:07,980

His sense in his heart is that this phenomenon knew they were there.

546

00:58:07,980 --> 00:58:13,620

The clicking of the camera told, he sensed because it started moving toward him.

547

00:58:13,620 --> 00:58:17,100

He took that picture, he got pictures within five feet of it.

548

00:58:17,100 --> 00:58:21,980

He is not the Jim Peniston who touched the object and had the telepathy.

549

00:58:21,980 --> 00:58:24,300

I believe what Peniston says about that.

550

00:58:24,300 --> 00:58:27,140

I believe that was said to him by whatever was in.

551

00:58:27,140 --> 00:58:32,300

This gentleman continued to fire pictures often but because of the, he thought he had

552

00:58:32,300 --> 00:58:35,220

taken at least 15 to 20.

553

00:58:35,220 --> 00:58:36,900

I have seven.

554

00:58:36,900 --> 00:58:40,220

I have the actual film, they just go blank.

555

00:58:40,220 --> 00:58:43,580

But there's a moment where radio contact was cut off in that forest.

556

00:58:43,580 --> 00:58:49,300

CSC couldn't reach these guys for four hours and this is where I believe and other things

557

00:58:49,300 --> 00:58:50,620

happen.

558

00:58:50,620 --> 00:58:57,020

Rod Regia has worked on several classified projects involving satellite surveillance technology.

559

00:58:57,020 --> 00:59:02,660

In his lecture, Regia demonstrated how some UFO activity had unquestionably been recorded

560

00:59:02,660 --> 00:59:04,340

from space.

561

00:59:04,340 --> 00:59:08,540

But how important are satellites to this subject and what are the future?

562

00:59:08,540 --> 00:59:13,340

I started working in the aerospace industry as an aeronautical, astronautical engineer

563

00:59:13,340 --> 00:59:17,340

in 1964.

564

00:59:17,340 --> 00:59:22,580

I worked on the Saturn Apollo moon rocket and my job was to design the interface wiring

565

00:59:22,580 --> 00:59:27,460

between the various elements of the rocket at different stages.

566

00:59:27,460 --> 00:59:33,780

Then I worked on the first space station, the Skylab, which readers and viewers will know

567

00:59:33,780 --> 00:59:36,220

impacted Australia several years ago.

568

00:59:36,220 --> 00:59:38,980

I'd love to have a presentation for that.

569

00:59:38,980 --> 00:59:47,500

And then moved on to a small company in California that's primarily designing remote sensors

570

00:59:47,500 --> 00:59:50,660

that has nothing to do with the psychological remote sensors.

571

00:59:50,660 --> 00:59:55,740

These are items designed to detect events at a far distance.

572

00:59:55,740 --> 01:00:02,100

I always like to indicate, and I didn't in this presentation, but that there's a paranoia

573

01:00:02,100 --> 01:00:08,700

that starts to develop amongst people when they're around spy satellites and other things.

574

01:00:08,700 --> 01:00:11,660

They see maybe too many movies or something.

575

01:00:11,660 --> 01:00:17,340

I guarantee you these satellites cost millions and billions of dollars and their operation

576

01:00:17,340 --> 01:00:20,900

runs into the millions of dollars per day.

577

01:00:20,900 --> 01:00:26,060

Our 15 minutes of satellite data is a computer printout a little over six inches thick of

578

01:00:26,060 --> 01:00:32,060

which we have technicians wade through it to get some of the items that don't pass muster,

579

01:00:32,060 --> 01:00:33,980

so to speak, in the first breath.

580

01:00:33,980 --> 01:00:39,580

And so what we have is a tremendous amount of data and for the resources to be spent

581

01:00:39,580 --> 01:00:45,220

on determining who's visiting whom and what meeting, it would be in the intelligence agency's

582

01:00:45,220 --> 01:00:50,100

best interest to pick up the telephone and have the local sheriff or police drop by and

583

01:00:50,100 --> 01:00:55,660

pay them a visit rather than to vote a very expensive reconnaissance satellite to take

584

01:00:55,660 --> 01:01:00,420

pictures of the licensed places of the automobiles in the front yard.

585

01:01:00,420 --> 01:01:05,020

When viewing conditions are right, we can read the newspaper that's on the front yard

586

01:01:05,020 --> 01:01:07,820

of somebody's house for deep space.

587

01:01:07,820 --> 01:01:09,340

We can do that.

588

01:01:09,340 --> 01:01:13,100

And we've been able to do that for years.

589

01:01:13,100 --> 01:01:20,900

More important though is we can also use these for beneficial measures that beyond the surreptitious

590

01:01:20,900 --> 01:01:26,620

observation of our neighbors and that is to look out to exploit mineral deposits, find

591

01:01:26,620 --> 01:01:30,660

oil fields, look at pollution tracking.

592

01:01:30,660 --> 01:01:35,740

For law enforcement, we can track vehicles that may present a problem to us.

593

01:01:35,740 --> 01:01:37,300

We can watch troop movements.

594

01:01:37,300 --> 01:01:42,100

We can see refugees and maybe allocate resources.

595

01:01:42,100 --> 01:01:44,220

We can look for prop failures.

596

01:01:44,220 --> 01:01:50,940

You liken this to possibly the major event in terms of credibility of eyewitness reports

597

01:01:50,940 --> 01:01:54,740

in terms of the data and the like.

598

01:01:54,740 --> 01:01:59,660

How significant do you think it is therefore that we have collaboration, if you like, from

599

01:01:59,660 --> 01:02:06,260

an American reconnaissance satellite that something was over Tehran at that time?

600

01:02:06,260 --> 01:02:12,820

I think the primary importance was that it demonstrated graphically, I believe, for the

601

01:02:12,820 --> 01:02:17,580

first time both the capability and the limitations.

602

01:02:17,580 --> 01:02:18,900

We spotted this thing.

603

01:02:18,900 --> 01:02:20,420

We had it.

604

01:02:20,420 --> 01:02:23,340

And yet we were defenseless against it.

605

01:02:23,340 --> 01:02:29,780

Fortunately, I think we were able to sort of sit back and say, it's happening to a neighbor

606

01:02:29,780 --> 01:02:34,340

and therefore we can fully observe it as opposed to it's happening in my front yard and I must

607

01:02:34,420 --> 01:02:38,380

worry to defend my family against it.

608

01:02:38,380 --> 01:02:40,580

I think that allowed us to put ends to the major.

609

01:02:40,580 --> 01:02:45,420

I know one of them was the improved communication system that enabled us to get the information

610

01:02:45,420 --> 01:02:47,100

back sooner.

611

01:02:47,100 --> 01:02:52,580

I think that the lessons learned from the Tehran were instrumental in helping us in the Gulf

612

01:02:52,580 --> 01:02:59,580

War because we greatly increased our capability between those two events in a short period

613

01:02:59,580 --> 01:03:04,220

of time when we were talking about the time lag in military procurement and the activities

614

01:03:04,220 --> 01:03:06,820

to go along.

615

01:03:06,820 --> 01:03:13,020

Intrigued to learn of the post-Teran reports as this thing spent through the Mediterranean

616

01:03:13,020 --> 01:03:20,660

and out towards Atlantic, presumably then was there no means for the satellite technology?

617

01:03:20,660 --> 01:03:24,460

It might have obviously been passed on to another satellite, I don't know.

618

01:03:24,460 --> 01:03:30,300

No data suggests that this thing was tracked by satellite at that time.

619

01:03:30,300 --> 01:03:33,460

Our satellite did not track it.

620

01:03:33,460 --> 01:03:41,300

What I believe happened is as they changed energy states, they become the spectrum of

621

01:03:41,300 --> 01:03:46,340

observation shifts and when they change energy states, we get to the point where we can't

622

01:03:46,340 --> 01:03:47,340

really be tracked.

623

01:03:47,340 --> 01:03:52,860

That's where I said the ultraviolet would be good for that visible light.

624

01:03:52,860 --> 01:03:55,780

When they reach a high energy state, they disappear.

625

01:03:55,780 --> 01:03:59,580

Where do you think satellite technology is going to be, say, 10, 20 years hence from

626

01:03:59,580 --> 01:04:03,260

now and what impact do you think, generally speaking, that's going to have here for people

627

01:04:03,260 --> 01:04:04,260

on Earth?

628

01:04:04,260 --> 01:04:10,260

I believe the big push that we've already seen at start is we'll be on Earth resources

629

01:04:10,260 --> 01:04:11,260

management.

630

01:04:11,260 --> 01:04:19,260

I mean that as the population continues to grow, we need to find new oil deposits to

631

01:04:19,260 --> 01:04:27,220

exploit, we need new mineral deposits, we need to really vigorously pursue monitoring

632

01:04:27,220 --> 01:04:31,460

the cleanliness of our water and our atmosphere.

633

01:04:31,460 --> 01:04:37,260

Where are the sources of pollution and we can do that readily from space.

634

01:04:37,260 --> 01:04:41,740

The person who's doing the pollution can be tracked down and not his innocent neighbor.

635

01:04:41,740 --> 01:04:45,420

We happen to have a smaller checkbook.

636

01:04:45,420 --> 01:04:52,900

The biggest thing of growth area I see is enabling you and me to have a much better

637

01:04:52,900 --> 01:04:59,620

life as a result of applying this technology to our day-to-day living experiences.

638

01:04:59,620 --> 01:05:06,660

Traffic patterns, cattle and animal migrations, there's all manner of, we're only limited

639

01:05:06,660 --> 01:05:15,260

by our imagination, by what we can see looking down at this beautiful planet of ours and

640

01:05:16,100 --> 01:05:20,900

trying to monitor and care for it and nurture it and I think we've got an opportunity to

641

01:05:20,900 --> 01:05:24,260

do that now that we've never had before.

642

01:05:24,260 --> 01:05:30,020

At the beginning of the year, Peter Gerstin, head of Citizens Against UFO Secrecy, challenged

643

01:05:30,020 --> 01:05:35,540

the US government in court to come clean about its knowledge of flying triangles.

644

01:05:35,540 --> 01:05:39,860

After winning a preliminary judgment in his favor, he later lost the argument when the

645

01:05:39,860 --> 01:05:42,660

judge ruled in favor of the government.

646

01:05:42,660 --> 01:05:47,500

Although this interview was conducted before the appeal, it nonetheless affords a fascinating

647

01:05:47,500 --> 01:05:53,780

insight into the mindset and thinking behind one of UFO's most influential characters.

648

01:05:53,780 --> 01:06:00,220

Peter, fantastic interest throughout the UK in the recent trials and tribulations shall

649

01:06:00,220 --> 01:06:09,220

we say regarding your efforts to challenge various government departments as to the dissemination

650

01:06:09,220 --> 01:06:14,620

if you will of documented information relating to triangular craft.

651

01:06:14,620 --> 01:06:21,620

You're the man on the spot shall we say, how would you appraise the current situation?

652

01:06:21,620 --> 01:06:26,340

I mean this is quite a unique thing isn't it, to get the judge to actually side with

653

01:06:26,340 --> 01:06:27,340

you.

654

01:06:27,340 --> 01:06:31,220

Oh yes, this is the first time it causes broad citizens against UFO secrecy.

655

01:06:31,220 --> 01:06:34,020

In the last 20 years it has brought maybe six lawsuits.

656

01:06:34,020 --> 01:06:39,140

This is the first time the judge has been receptive to my arguments, receptive to the

657

01:06:39,140 --> 01:06:45,580

point of directing a governmental agency to provide a UFO group with additional information.

658

01:06:45,580 --> 01:06:53,460

Now what is it about the triangles that you feel is so significant or is this just a part

659

01:06:53,460 --> 01:06:55,780

of the whole big picture here?

660

01:06:55,780 --> 01:06:57,700

Well you're right on both accounts.

661

01:06:57,700 --> 01:07:03,020

Number one it's part of the big picture but it also involves an object the size of a football

662

01:07:03,020 --> 01:07:08,300

field that can hover or what's described from witnesses as floating which is unusual

663

01:07:08,300 --> 01:07:14,300

described in mechanical craft that can accelerate rapidly, attain high speeds that's virtually

664

01:07:14,300 --> 01:07:19,940

noiseless that has orbs around the sides that detach and attach.

665

01:07:19,940 --> 01:07:25,300

I think that since this object is being seen in populated areas over the last 20 years

666

01:07:25,300 --> 01:07:29,620

not only in this country but in England, in Belgium and other countries I think it's

667

01:07:29,620 --> 01:07:33,800

this time we found out about it and what's more significant is that when we inquired

668

01:07:33,800 --> 01:07:39,260

of this object from the Department of Defense they told us they conducted a reasonable search

669

01:07:39,260 --> 01:07:42,260

and can find no information on this object.

670

01:07:42,260 --> 01:07:44,580

As far as I'm concerned they're lying to us.

671

01:07:44,580 --> 01:07:50,740

It can't be possible because they searched the Defense Advanced Research Projects Agency

672

01:07:50,740 --> 01:07:52,380

and they had no information.

673

01:07:52,380 --> 01:07:57,660

They searched the Joint Chiefs of Staff and they had no information and the Department

674

01:07:57,660 --> 01:08:02,860

of Defense is charged with gathering intelligence and providing security for the citizens of

675

01:08:02,860 --> 01:08:07,380

this country so how can they not know about an object that's seen at treetop level in

676

01:08:07,380 --> 01:08:12,980

populated areas over major cities in this age of terrorism?

677

01:08:12,980 --> 01:08:16,260

Well the Department of Defense for whatever reason has not come to the courtroom, has

678

01:08:16,260 --> 01:08:18,620

not sent any attorneys.

679

01:08:18,620 --> 01:08:25,180

They are represented by the US Attorney's Office and they just tow the party line.

680

01:08:25,180 --> 01:08:29,020

They treat this as any other freedom of information request.

681

01:08:29,020 --> 01:08:30,780

The agency does the search.

682

01:08:30,780 --> 01:08:33,340

If they don't find documents they move to dismiss it.

683

01:08:33,340 --> 01:08:35,460

On the grounds a reasonable search was done.

684

01:08:35,460 --> 01:08:39,020

If they find documents they either release them or withhold them on national security

685

01:08:39,020 --> 01:08:41,820

grounds and that's what I thought this case would be about.

686

01:08:41,820 --> 01:08:45,940

Department of Defense would find documents and say national security as they did in

687

01:08:45,940 --> 01:08:48,220

the other cases cause brought and that would be the end of it.

688

01:08:48,220 --> 01:08:51,700

No judge has gone against that ruling but they didn't.

689

01:08:51,700 --> 01:08:53,620

They stated they found no documents.

690

01:08:53,620 --> 01:08:55,140

They did a reasonable search.

691

01:08:55,140 --> 01:08:58,980

So the US Attorney is just putting forward that position that they didn't have to do

692

01:08:58,980 --> 01:09:00,820

an exhaustive search.

693

01:09:00,820 --> 01:09:02,460

All they had to do was a reasonable search.

694

01:09:02,460 --> 01:09:03,540

They did a reasonable search.

695

01:09:03,540 --> 01:09:04,980

There are no documents.

696

01:09:04,980 --> 01:09:11,220

What we submitted, what citizens against UFO secrecy submitted was 33 affidavits from

697

01:09:11,220 --> 01:09:17,020

people that actually saw the object were willing to come forward, put it down on tape and then

698

01:09:17,020 --> 01:09:18,920

swear to the contents.

699

01:09:18,920 --> 01:09:20,540

So we submitted this to the judge.

700

01:09:20,540 --> 01:09:24,300

Said judge, look this object exists judge.

701

01:09:24,300 --> 01:09:29,700

It exists not only over the last 20 years but it was seen last month.

702

01:09:29,700 --> 01:09:31,340

So how could they not have information?

703

01:09:31,340 --> 01:09:34,460

How could they have done a reasonable search and not found anything?

704

01:09:34,460 --> 01:09:39,460

And the judge was convinced that at least at this level they have to provide us with

705

01:09:39,460 --> 01:09:42,340

more information telling us about their search.

706

01:09:42,340 --> 01:09:46,980

The obvious question then arises where are we going with this now?

707

01:09:46,980 --> 01:09:52,580

Where does Peter Gerstin and Citizens Against UFO secrecy hope to take this now?

708

01:09:52,580 --> 01:09:53,580

What's the next step?

709

01:09:53,580 --> 01:09:56,860

We hope to go where no group has gone before.

710

01:09:56,860 --> 01:10:03,180

We hope to go into the darkest recesses of these governmental agencies to search for

711

01:10:03,180 --> 01:10:08,340

the truth and to end the secrecy.

712

01:10:08,340 --> 01:10:13,740

Although Bob and Ryan would kindly spoke of their majestic 12 research in Acapulco, here

713

01:10:13,740 --> 01:10:18,860

at Loughlin, Ryan took the opportunity to share with us just a part of his massive image

714

01:10:18,860 --> 01:10:19,860

portfolio.

715

01:10:19,860 --> 01:10:29,900

The example, this happens to be on phone records for 30 June 47 back to Roswell.

716

01:10:29,900 --> 01:10:36,900

There's other documents, here's one on 14 July 47 all talking about phone records.

717

01:10:36,900 --> 01:10:41,420

Basically there's a big complaint that people are using the phone too much and that only

718

01:10:41,420 --> 01:10:45,460

certain top level brass can use the phone back to Washington because the lines are always

719

01:10:45,460 --> 01:10:46,460

jammed.

720

01:10:46,460 --> 01:10:52,820

Now talk about good circumstantial evidence and it's right here in historical typewriter

721

01:10:52,820 --> 01:10:55,860

on negative off microfilm.

722

01:10:55,860 --> 01:11:01,460

For somebody to fake this is an incredible amount of work for an unclear nebulous purpose.

723

01:11:01,460 --> 01:11:07,900

This is the envelope where the other 77 pictures came addressed to Tim Cooper and postmarked

724

01:11:07,900 --> 01:11:10,620

McLean, Virginia.

725

01:11:10,620 --> 01:11:14,820

And what was in this envelope was a series of color pictures which I've broken into

726

01:11:14,820 --> 01:11:24,780

several different categories, craft back channels, group photos, documents, MJ12 portraits

727

01:11:24,780 --> 01:11:27,660

and then autopsy.

728

01:11:27,660 --> 01:11:34,540

One of the craft pictures was a picture of the X-plane.

729

01:11:34,540 --> 01:11:41,340

And the X-plane is noteworthy in our documents because it's an experimental aircraft that

730

01:11:41,340 --> 01:11:46,220

crashed in New Mexico along the same time as one of the UFOs.

731

01:11:46,220 --> 01:11:52,180

And it's the earliest experimental aircraft which the U2 spy plane was based upon.

732

01:11:52,180 --> 01:11:56,180

It was made by Convair.

733

01:11:56,180 --> 01:12:04,220

I'll mention this one for a second.

734

01:12:04,220 --> 01:12:10,340

This is an unusual looking craft that says DOD video.

735

01:12:10,340 --> 01:12:15,980

And what I just realized really after watching Wendell Stephens give his talk is that this

736

01:12:15,980 --> 01:12:23,740

looks very similar to the egg beater type craft that was near Area 51 or was alleged

737

01:12:23,740 --> 01:12:30,380

to come from Area 51 with these funny looking protrusions.

738

01:12:30,380 --> 01:12:38,100

So I think that this is actually a U.S. built craft of some sort and not extraterrestrial.

739

01:12:38,100 --> 01:12:48,540

And that brings up a whole new thought in my mind of am I getting junk along with...

740

01:12:48,540 --> 01:12:53,820

This is a picture of sort of an unknown object.

741

01:12:53,820 --> 01:12:59,660

It's unclear and it's not sure that we don't have it right side up or upside down.

742

01:13:00,660 --> 01:13:08,780

But it looks like a spacecraft of some sort although there seems to be like rivets or

743

01:13:08,780 --> 01:13:18,500

spark plug like edges which are consistent with some other witness testimony for craft.

744

01:13:18,500 --> 01:13:26,540

A couple of Russian or KGB officers, an MJ-12 back channel, we don't know his name.

745

01:13:26,540 --> 01:13:32,580

This one is a KGB intelligence chief.

746

01:13:32,580 --> 01:13:35,220

I can't remember his name right off the bat.

747

01:13:35,220 --> 01:13:36,460

But you have IDMG IDES.

748

01:13:36,460 --> 01:13:42,740

Yes, one of our friends has got a name.

749

01:13:42,740 --> 01:13:49,500

And then here's a group picture of a variety of the MJ-12 players.

750

01:13:49,500 --> 01:13:56,220

Forrestal being front and center with Van and Berg and Bradley over here.

751

01:13:56,220 --> 01:13:58,620

This is an admiral of some sort.

752

01:13:58,620 --> 01:14:01,980

He has a naval uniform on.

753

01:14:01,980 --> 01:14:03,180

But I don't know his name.

754

01:14:03,180 --> 01:14:07,220

And this one around the table.

755

01:14:07,220 --> 01:14:08,220

Okay.

756

01:14:08,220 --> 01:14:09,220

Which is...

757

01:14:09,220 --> 01:14:10,220

Yeah.

758

01:14:10,220 --> 01:14:20,060

And this is a picture of the scientific advisory board in 1947 with Peter von Karman at the

759

01:14:20,060 --> 01:14:24,780

head of the table and the label of MJ-12.

760

01:14:24,780 --> 01:14:31,340

It's not clear if everyone was cleared or briefed for MJ-12, but I think that many people

761

01:14:31,340 --> 01:14:33,940

were involved and involved in the reverse engineering.

762

01:14:33,940 --> 01:14:38,740

It may have been parceled out and they've only given one aspect of the problem to work

763

01:14:38,740 --> 01:14:39,740

on.

764

01:14:39,740 --> 01:14:48,020

But these people were most likely involved in a serious way.

765

01:14:48,020 --> 01:14:53,660

Earlier, we mentioned how Dr. Roger Lear had kindly donated some of his surgically removed

766

01:14:53,660 --> 01:14:56,620

implants to the Phenomena Exhibition.

767

01:14:56,620 --> 01:14:58,180

But what is it about these impl...

768

01:14:58,180 --> 01:15:02,580

But that the makeup of the implants themselves points to an extraterrestrial presence.

769

01:15:02,580 --> 01:15:08,580

Well, I was the one performing the first surgery because it was a foot case.

770

01:15:08,580 --> 01:15:12,860

And the general surgeon then acted as my assistant.

771

01:15:12,860 --> 01:15:19,020

In doing so, I was the one that did the active probing through the tissues to look for the

772

01:15:19,020 --> 01:15:20,020

object.

773

01:15:20,020 --> 01:15:26,060

And me, for example, as an assistant does, uses the retractors to hold the wound open

774

01:15:26,060 --> 01:15:31,220

and assist me with light and advice.

775

01:15:31,220 --> 01:15:38,260

One surprise came during this portion of the surgery when I touched something hard and

776

01:15:38,260 --> 01:15:43,820

the patient jerked a foot off the table, came out of the hypnoanesthesia and just cried

777

01:15:43,820 --> 01:15:47,180

out in excruciating pain.

778

01:15:47,180 --> 01:15:52,780

This was a very big surprise because just for the anesthesia that I had in the toe

779

01:15:52,780 --> 01:15:55,940

alone, she should have felt absolutely nothing.

780

01:15:55,940 --> 01:16:01,420

Now I always look for rational and normal answers to these things.

781

01:16:01,420 --> 01:16:06,620

And I felt that one of the things that could possibly happen was that in touching something

782

01:16:06,620 --> 01:16:12,700

I might have, let's say, pulled some major nerve trunk that was outside the field of

783

01:16:12,700 --> 01:16:13,700

anesthesia.

784

01:16:13,700 --> 01:16:15,540

And sometimes that happens.

785

01:16:15,540 --> 01:16:22,660

And so although it was a big surprise, it wasn't thoroughly in the realm of impossibility.

786

01:16:22,660 --> 01:16:29,980

So Darryl had reintroduced the hypnoanesthesia I called for more local, we put in more anesthesia.

787

01:16:29,980 --> 01:16:37,220

I was the one with the forceps, as you say, to initially grab the object and its jaws

788

01:16:37,220 --> 01:16:44,300

and to get it loosened from the surrounding tissue and removed it.

789

01:16:44,300 --> 01:16:49,620

At that point the patient also had a rather biodejection and felt discomfort.

790

01:16:49,620 --> 01:16:57,580

When I took it out and I put it on a white 4x4 Gullisponge and I looked at it, I was

791

01:16:57,580 --> 01:17:04,140

absolutely amazed because I had never seen anything like this in 37-1 years of surgery.

792

01:17:04,140 --> 01:17:09,780

And when you look at the general surgeon's clinical history too, he was just as amazed

793

01:17:09,780 --> 01:17:12,820

because he never seen anything that looked like that either.

794

01:17:12,820 --> 01:17:19,260

The next step was to ascertain as much information that we could from the material at hand.

795

01:17:19,260 --> 01:17:23,820

And the material at hand consisted of two types of material.

796

01:17:23,820 --> 01:17:30,620

One was the metallic portion of the implant and one was the biological portion.

797

01:17:30,620 --> 01:17:36,060

Then we could say that the biological portion also was subdivided into two portions.

798

01:17:36,060 --> 01:17:42,980

The tissue that I had removed that surrounded the area where the implant was in and the

799

01:17:42,980 --> 01:17:45,660

tissue that composed the membrane itself.

800

01:17:45,660 --> 01:17:50,820

So our first concern was the tissue that surrounded the implant.

801

01:17:50,820 --> 01:17:53,620

That's the first thing that went out for analysis.

802

01:17:53,620 --> 01:17:56,740

That's the first thing that I got reports on.

803

01:17:56,740 --> 01:18:04,580

That is the first thing that probably pushed me over the edge from a consummate's skeptic

804

01:18:04,620 --> 01:18:08,340

to a maybe strange.

805

01:18:08,340 --> 01:18:15,180

Because we found two things in the surgical pathology came back separately.

806

01:18:15,180 --> 01:18:20,980

They were only told, laboratories were only told, that this was soft tissue surrounding

807

01:18:20,980 --> 01:18:24,940

a foreign body and the place that it was taken from.

808

01:18:24,940 --> 01:18:31,180

The primary concern of a laboratory when receiving a soft tissue specimen today is whether it's

809

01:18:31,180 --> 01:18:32,980

malignant or benign.

810

01:18:32,980 --> 01:18:34,700

That's their primary interest.

811

01:18:34,700 --> 01:18:38,180

And so first of all they came back, the tissue was benign.

812

01:18:38,180 --> 01:18:43,940

There was nothing there to indicate any kind of malignancy, no tumor type tissue.

813

01:18:43,940 --> 01:18:51,660

Next thing what we found was that the tissue contained no evidence of an inflammatory response.

814

01:18:51,660 --> 01:18:55,220

And when I saw this I read the first report, I said, gee, this is weird.

815

01:18:55,220 --> 01:18:57,340

What kind of a fluke is this?

816

01:18:57,340 --> 01:19:04,340

And I think to myself, this lady must be a very strange lady because she doesn't react

817

01:19:04,340 --> 01:19:08,300

to inflammation when she gets something in her body.

818

01:19:08,300 --> 01:19:11,100

Individual thing, individual anomaly.

819

01:19:11,100 --> 01:19:14,140

Strange, but could happen.

820

01:19:14,140 --> 01:19:18,820

Then I read the second pathology report which came back on the gentleman with the object

821

01:19:18,820 --> 01:19:25,500

in the hand and again in different language, different words, but same thing.

822

01:19:25,500 --> 01:19:27,020

No inflammatory response.

823

01:19:27,020 --> 01:19:30,100

And I said, wait a minute.

824

01:19:30,100 --> 01:19:31,100

Two individuals?

825

01:19:31,100 --> 01:19:34,180

Oh, there's something very strange here.

826

01:19:34,180 --> 01:19:41,260

Then the second strange thing we found that in both individuals these areas were loaded

827

01:19:41,260 --> 01:19:48,740

with what are called nerve proprioceptors, little special sensor organs of nerves, M-tissue

828

01:19:48,740 --> 01:19:53,620

where it is not anatomically correct to be.

829

01:19:54,060 --> 01:19:59,180

If we look at the body or we look at the chart or we look at a copy of Gray's Anatomy

830

01:19:59,180 --> 01:20:06,540

or if you do surgery for 30 years, there's areas in the body where structures are constant.

831

01:20:06,540 --> 01:20:11,140

In other words, if you opened up a toe, you would expect to find bone.

832

01:20:11,140 --> 01:20:13,220

You would expect to find muscle.

833

01:20:13,220 --> 01:20:15,260

You would expect to find some blood supply.

834

01:20:15,260 --> 01:20:19,140

You would expect to find some nerve supply.

835

01:20:19,140 --> 01:20:24,700

Structures and specialized nerve tissue run in the areas where they're supposed to be

836

01:20:24,700 --> 01:20:26,500

anatomically correct.

837

01:20:26,500 --> 01:20:29,740

If you look in a book, this is the training.

838

01:20:29,740 --> 01:20:37,060

Most human beings, if we open them up, certain areas of the body, all the anatomical structures

839

01:20:37,060 --> 01:20:38,940

will be the same.

840

01:20:38,940 --> 01:20:42,940

So that's actually what allows surgery to take place.

841

01:20:42,940 --> 01:20:48,860

We don't expect to open a chest and then one individual will find the heart, two thirds

842

01:20:48,900 --> 01:20:51,100

on the right, one third on the left.

843

01:20:51,100 --> 01:20:54,900

It's always two thirds on the left, one third on the right.

844

01:20:54,900 --> 01:21:01,300

The tissues where these objects came out of were sort of a fatty, fibrous, cushioning

845

01:21:01,300 --> 01:21:02,980

type of tissue.

846

01:21:02,980 --> 01:21:06,700

Deep, down next to a bone.

847

01:21:06,700 --> 01:21:12,420

These are not places where you find specialized end organs for nerves.

848

01:21:12,420 --> 01:21:19,780

It was found that if the objects were taken out of the blood serum solution and dried,

849

01:21:19,780 --> 01:21:25,100

the membrane became brittle and lost its tensile strength.

850

01:21:25,100 --> 01:21:31,180

And then you could take any sharp instrument and cut through it, scrape it off the metal

851

01:21:31,180 --> 01:21:32,660

that was within.

852

01:21:32,660 --> 01:21:38,060

And when we first did that, we found out that there was two pieces of metal that composed

853

01:21:38,060 --> 01:21:41,180

the T-shaped object, not one.

854

01:21:41,180 --> 01:21:46,500

But it would be impossible to know that as it came out of the body because you could

855

01:21:46,500 --> 01:21:50,820

not move one little metal member on the other.

856

01:21:50,820 --> 01:21:51,820

It would not move.

857

01:21:51,820 --> 01:21:57,700

It was wrapped so tightly with this membrane structure, one piece of metal would not move

858

01:21:57,700 --> 01:21:58,980

upon the other.

859

01:21:58,980 --> 01:22:03,980

So that's how we got it off and that's the next step, was that we took pieces of the

860

01:22:03,980 --> 01:22:07,420

membrane and we sent that for analysis.

861

01:22:07,420 --> 01:22:14,020

The results of the membrane analysis again was one of the many surprises now, one piled

862

01:22:14,020 --> 01:22:22,660

upon another, which propelled me into an area that I wound up in today.

863

01:22:22,660 --> 01:22:29,980

The membrane was composed of only three simple human biological substances.

864

01:22:29,980 --> 01:22:35,460

One is called a protein coagulant, which just means that its protein derived from clotted

865

01:22:35,460 --> 01:22:36,460

blood.

866

01:22:37,180 --> 01:22:38,620

That's the bulk.

867

01:22:38,620 --> 01:22:43,620

And in this bulk, if you look at it under the microscope, you see some brown granules

868

01:22:43,620 --> 01:22:45,300

that look like raisins.

869

01:22:45,300 --> 01:22:51,260

And these brown granules were subjected to an iron stain and it came back positive and

870

01:22:51,260 --> 01:22:56,660

it was determined then that these brown granules was a substance called hemo-siderin.

871

01:22:56,660 --> 01:23:00,060

And hemo-siderin is an iron pigment.

872

01:23:00,700 --> 01:23:07,340

It's oxygen binding pigment, the cousin of which is hemoglobin, which is in the red cells.

873

01:23:07,340 --> 01:23:13,060

It's the carrier transport mechanism for oxygen about the body.

874

01:23:13,060 --> 01:23:18,340

Then the third and the last thing that we found were strands of keratin.

875

01:23:18,340 --> 01:23:25,460

And keratin makes up the outer layer of your skin, makes up your fingernails, toenails,

876

01:23:25,460 --> 01:23:29,500

your hair and the first few layers of the cornea of the eye.

877

01:23:29,500 --> 01:23:34,860

And those are the only places you find keratin on the body.

878

01:23:34,860 --> 01:23:37,140

Now there is a pathological situation.

879

01:23:37,140 --> 01:23:42,340

In other words, abnormal physiology is pathology.

880

01:23:42,340 --> 01:23:48,900

There are abnormal situations where you can find a process occurring in deep tissues of

881

01:23:48,900 --> 01:23:52,260

the body called keratinization.

882

01:23:52,260 --> 01:23:57,020

In other words, things can be coated with keratin.

883

01:23:57,060 --> 01:24:02,500

We don't know why that occurs, but it's some sort of a genetic anomaly.

884

01:24:02,500 --> 01:24:05,580

But this was not keratinization.

885

01:24:05,580 --> 01:24:11,260

This was actually keratin strands that were in this membrane.

886

01:24:11,260 --> 01:24:18,460

And after learning that, I went into the medical school textbooks at Stanford, Harvard University,

887

01:24:18,460 --> 01:24:24,300

George Washington School of Medicine on the computer and tried to see if there was something

888

01:24:24,300 --> 01:24:29,220

listed in the pathology books that I was not aware of or something that may have been

889

01:24:29,220 --> 01:24:34,300

discovered for my 30 years of practice that I did not know.

890

01:24:34,300 --> 01:24:39,740

And I was unable to find anything that had ever been removed from the human body that

891

01:24:39,740 --> 01:24:43,100

was composed of these three substances.

892

01:24:43,100 --> 01:24:49,020

And this is a challenge that I put out today that I make, of course, to anyone in a scientific

893

01:24:49,020 --> 01:24:53,300

field is that they think these are mundane objects.

894

01:24:53,300 --> 01:25:00,260

Then please, please direct me to where I might look into a textbook and see this material

895

01:25:00,260 --> 01:25:01,260

somewhere else.

896

01:25:01,260 --> 01:25:10,020

I think we might say that the total sum of what I've done so far is do eight surgeries

897

01:25:10,020 --> 01:25:16,500

to date and that the eight surgeries have netted us nine objects.

898

01:25:16,500 --> 01:25:21,860

And of the nine objects, one turned out to be an ordinary piece of strange glass that

899

01:25:21,860 --> 01:25:23,780

contains sulfur.

900

01:25:23,780 --> 01:25:31,460

So that leaves us with eight objects from eight surgeries, all which turn out to be very strange.

901

01:25:31,460 --> 01:25:38,140

Three of these eight objects are little grayish white balls that are attached to an abnormality

902

01:25:38,140 --> 01:25:40,380

of the skin.

903

01:25:40,380 --> 01:25:47,420

And these were mistaken by a dermatologist in one case to be a lesion called a calcifying

904

01:25:47,420 --> 01:25:53,060

epithelioma saying that the little grayish white ball was a ball of calcium.

905

01:25:53,060 --> 01:25:57,660

This was one of the first specimens that went into the National Institute for Discovery

906

01:25:57,660 --> 01:26:04,780

Science and it turned out to have 21 different elements and none was calcium.

907

01:26:04,780 --> 01:26:11,660

The information on the other balls we are just starting now to get that information

908

01:26:11,660 --> 01:26:17,220

in because of the lack of funding and the cost of these tests.

909

01:26:17,220 --> 01:26:25,340

Now the other five objects are all metal objects and all covered with this very strange membrane.

910

01:26:25,340 --> 01:26:33,180

Three of the five objects are little cantaloupe seed shaped affairs and once the membrane

911

01:26:33,180 --> 01:26:37,780

is removed there is a little metallic rod inside.

912

01:26:37,780 --> 01:26:43,860

The other one that was removed from the toe of the lady was a T-shaped object which contained

913

01:26:43,860 --> 01:26:49,380

two little metallic rods, one butted against the other.

914

01:26:49,380 --> 01:26:57,500

And the last one was a metallic triangle that was removed from a gentleman's jaw also covered

915

01:26:57,500 --> 01:27:00,300

with this very strange membrane.

916

01:27:00,300 --> 01:27:05,900

Now the first set of results came because the National Institute for Discovery Science

917

01:27:05,900 --> 01:27:11,060

had sent some of these metallic objects to Los Alamos National Labs.

918

01:27:11,060 --> 01:27:17,780

Los Alamos did a comprehensive examination with an electron microscope and told us what

919

01:27:17,780 --> 01:27:24,980

elements were in the metal rods and at the end of their report they merely suggested

920

01:27:24,980 --> 01:27:27,980

more research, more tests should be done.

921

01:27:28,460 --> 01:27:33,100

At that point we knew we didn't have an ordinary piece of wood or twig.

922

01:27:33,100 --> 01:27:39,940

We knew that a prestigious laboratory such as Los Alamos would not say go do further

923

01:27:39,940 --> 01:27:43,860

testing if they had an ordinary mundane object.

924

01:27:43,860 --> 01:27:50,660

So the objects then went back to NEDS and from NEDS they went out to New Mexico Tech

925

01:27:50,660 --> 01:27:57,540

which is another world class laboratory and an entire battery of metallurgical examinations

926

01:27:57,580 --> 01:27:59,620

were performed.

927

01:27:59,620 --> 01:28:06,620

The results, their conclusion was that these were objects that were most likely samples

928

01:28:06,620 --> 01:28:11,140

of meteorites and they were not told the origin.

929

01:28:11,140 --> 01:28:17,820

The laboratories were never told whether these fell off an ostrich's feather or whether

930

01:28:17,820 --> 01:28:20,860

it was found on the bottom of the ocean.

931

01:28:20,860 --> 01:28:27,860

So we know without a doubt since there is no skin abnormalities with metallic objects,

932

01:28:28,500 --> 01:28:35,300

no scar, no visible port of entry, we certainly know that the lady did not step on a meteorite

933

01:28:35,300 --> 01:28:40,460

and the gentleman didn't whack one with the back of his hand.

934

01:28:40,460 --> 01:28:47,460

Finally to top off the metallurgical testing, a test we run at the University of California

935

01:28:48,300 --> 01:28:53,380

and the researcher there determined that some of the metals, some of the elements in these

936

01:28:53,380 --> 01:29:00,380

objects contain non-terrestrial isotopic ratios which means they don't come from this

937

01:29:01,220 --> 01:29:03,220

earth.

938

01:29:03,220 --> 01:29:08,820

By this time I don't think that I could have had any further surprises that would push

939

01:29:08,820 --> 01:29:13,060

me farther over the edge than I already was.

940

01:29:13,060 --> 01:29:15,460

This was the icing on the cake.

941

01:29:15,460 --> 01:29:22,460

This then meant that we were proposing the most profound question that could absolutely

942

01:29:22,500 --> 01:29:29,500

be proposed to mankind and that is people who ledge alien abduction, wind up with objects

943

01:29:31,740 --> 01:29:38,740

in their body that contain extraterrestrial isotopic ratios and therefore the only conclusion

944

01:29:39,540 --> 01:29:46,540

that I could draw was that these people are telling the truth and this is proof that mankind

945

01:29:46,860 --> 01:29:53,860

has been manipulated by extraterrestrial, inter-dimensional, some other being other than human being.

946

01:29:58,100 --> 01:30:03,380

To end this edition of UFO's Hard Evidence, here's a look at some recent and not so recent

947

01:30:03,380 --> 01:30:07,820

video footage, gleaned from UFO enthusiasts around the world.

948

01:30:07,820 --> 01:30:12,180

Until the next time, thanks for watching and we look forward to the pleasure of your company

949

01:30:12,180 --> 01:30:15,180

again in the not too distant future.

950

01:30:33,380 --> 01:30:40,380

Thank you.

951

01:31:03,380 --> 01:31:10,380

It occurred on Saturday the 29th of April.

952

01:31:23,860 --> 01:31:28,620

What was unusual about this sighting was there were at four separate sightings of craft

953

01:31:28,620 --> 01:31:35,340

within the space of roughly an hour and a half. This first video you can see here shows

954

01:31:35,340 --> 01:31:42,340

a UFO with an aircraft in its very immediate vicinity. The aircraft seems to be above the

955

01:31:42,660 --> 01:31:47,500

cloud because it gets obscured behind the cloud. The UFO is actually I believe beneath

956

01:31:47,500 --> 01:31:53,100

it because it hovers underneath so there could be some distance between the two craft but

957

01:31:53,100 --> 01:31:59,580

still in aviation terms it's quite a near miss event so I think it's quite significant

958

01:31:59,580 --> 01:32:06,580

for those reasons. You can also see that there's quite a bit of aircraft traffic in the vicinity.

959

01:32:06,580 --> 01:32:12,580

It's a very busy part of London. You've got city aircores, you've got traffic coming into

960

01:32:12,580 --> 01:32:18,580

Heathrow, in the west it's very busy.

961

01:32:19,380 --> 01:32:25,380

This second sighting occurred approximately 30 minutes after the first at around 3.22pm.

962

01:32:25,380 --> 01:32:32,880

Again this object was quite indeterminate in shape, possibly spherical, very reflective

963

01:32:32,880 --> 01:32:38,100

and was visible for approximately about a minute. Again it appeared beside the cloud,

964

01:32:38,100 --> 01:32:42,100

hovered and disappeared.

965

01:32:42,620 --> 01:32:49,620

Okay, we've seen two objects this afternoon. One was just a couple of minutes ago, very

966

01:32:50,660 --> 01:32:57,660

high altitude, that direction. It wasn't very near but definitely a solid destruction

967

01:32:59,660 --> 01:33:06,660

craft. That's two sightings in about 35 minutes so it's very exciting. I'm hoping that all

968

01:33:06,660 --> 01:33:13,660

of these are craft. This third object was probably the most unusual out of the four.

969

01:33:14,660 --> 01:33:21,660

It consisted of a dumbbell type of craft, two spheres very closely linked together as you'll

970

01:33:22,740 --> 01:33:28,340

be able to see from the video. It seems to be a kind of rotation going on with these

971

01:33:28,340 --> 01:33:34,740

two objects and you'll also notice the top of the sphere seems to link in and out of

972

01:33:34,740 --> 01:33:40,220

visibility, very unusual. Again suggests that this isn't a balloon or two balloons

973

01:33:40,220 --> 01:33:45,980

thrown together because again it's swaying on a particular axis and if these were balloons

974

01:33:45,980 --> 01:33:51,580

being buffeted around by the wind you wouldn't really expect this kind of uniform rotation

975

01:33:51,580 --> 01:33:58,580

going on. I believe that personally this is some kind of dumbbell craft that is actually

976

01:33:59,380 --> 01:34:05,140

coming in and out of our dimensional plane if you like. God knows what the physics involved

977

01:34:05,140 --> 01:34:12,140

is but one minute you can see this object and the next minute it's kind of hazy.

978

01:34:14,980 --> 01:34:20,260

This final object appeared approximately full 20, roughly 35 minutes after the dumbbell

979

01:34:20,260 --> 01:34:25,260

craft. Again it just appeared from out of the blue. What's interesting about this object

980

01:34:25,260 --> 01:34:30,020

is that it seems to hug the control of the clouds. It seems to me that it's definitely

981

01:34:30,020 --> 01:34:37,020

under intelligent control. If it were a balloon you'd expect it to just be blown around randomly

982

01:34:37,020 --> 01:34:42,780

in the sky but it's actually following the control of this cloud as if to keep itself

983

01:34:42,780 --> 01:34:49,780

concealed from the inquisitive eyes. This whole event drew to a close roughly about 425.

984

01:34:50,780 --> 01:34:57,780

So we're talking about an hour, hour and a half in which fall craft appeared at separate

985

01:35:00,180 --> 01:35:07,180

times. Again this is a precedent for me. I think it's very significant that these craft

986

01:35:07,180 --> 01:35:13,620

are appearing greater numbers and more often. I think there's definitely hint that this

987

01:35:13,620 --> 01:35:18,620

is an attempt at communication by the occupants or the pilots of these objects.
