

1

00:00:00,000 --> 00:00:06,000

Everything we know about UFOs is changing.

2

00:00:06,000 --> 00:00:10,000

Thanks to a team led by former Pentagon UFO investigator,

3

00:00:10,000 --> 00:00:11,000

Lou Elizondo.

4

00:00:11,000 --> 00:00:14,000

That is real, whatever that is.

5

00:00:14,000 --> 00:00:17,000

And former top intelligence official, Chris Mellon.

6

00:00:17,000 --> 00:00:19,000

This is a current continuing phenomenon.

7

00:00:19,000 --> 00:00:20,000

It's happening.

8

00:00:20,000 --> 00:00:21,000

It continues to happen.

9

00:00:21,000 --> 00:00:24,000

They discovered five unique characters.

10

00:00:24,000 --> 00:00:26,000

They discovered five unique characters.

11

00:00:27,000 --> 00:00:31,000

They discovered five unique characteristics that UFOs have in common.

12

00:00:31,000 --> 00:00:33,000

They call the five observables.

13

00:00:33,000 --> 00:00:36,000

And released groundbreaking videos.

14

00:00:38,000 --> 00:00:43,000

That forced the Navy to admit its pilots were coming face to face with unidentified objects.

15

00:00:43,000 --> 00:00:46,000

The US Navy made a shocking admission today.

16

00:00:46,000 --> 00:00:52,000

Strange flying objects caught on tape by their own fighter pilots are in fact UFOs.

17

00:00:52,000 --> 00:00:54,000

Something needs to be done.

18

00:00:55,000 --> 00:00:59,000

Now a new wave of military witnesses is coming out of the shadows.

19

00:00:59,000 --> 00:01:01,000

I'd be lying if I said I wasn't scared, Bliss.

20

00:01:01,000 --> 00:01:04,000

I've never talked to anybody publicly about this story.

21

00:01:04,000 --> 00:01:06,000

Certainly never on TV, that's for sure.

22

00:01:06,000 --> 00:01:10,000

When you're told as a soldier not to talk about it, you don't talk about it.

23

00:01:10,000 --> 00:01:12,000

I've never seen anything move like that.

24

00:01:12,000 --> 00:01:14,000

Shape, size, speed, it's clearly unidentified.

25

00:01:14,000 --> 00:01:17,000

The team is united on a new mission.

26

00:01:17,000 --> 00:01:21,000

Connect the dots to reveal the truth about UFOs.

27

00:01:22,000 --> 00:01:26,000

This thing had no capability, like anything on Earth.

28

00:01:26,000 --> 00:01:29,000

And warned the world about the dangers they might represent.

29

00:01:30,000 --> 00:01:32,000

Carl Sagan once famously said,

30

00:01:32,000 --> 00:01:35,000

Extraordinary claims require extraordinary proof.

31

00:01:35,000 --> 00:01:38,000

He was absolutely right.

32

00:01:38,000 --> 00:01:41,000

But now we have the proof.

33

00:01:52,000 --> 00:01:57,000

In 2004, Navy pilots on a training exercise from the USS Nimitz

34

00:01:57,000 --> 00:02:01,000

reported coming face to face with a bizarre, unidentified object.

35

00:02:01,000 --> 00:02:04,000

Each pilot reported the same thing.

36

00:02:04,000 --> 00:02:08,000

The UFO had a smooth, oblong shape resembling a tic-tac

37

00:02:08,000 --> 00:02:12,000

and maneuvered in ways impossible to known aircraft.

38

00:02:15,000 --> 00:02:19,000

Video of the Nimitz incident shocked the world when it was released.

39

00:02:19,000 --> 00:02:24,000

But Lou Elizondo and his team believe that sighting is not unprecedented.

40

00:02:24,000 --> 00:02:29,000

New testimony suggests UFOs with similar characteristics to tic-tacs

41

00:02:29,000 --> 00:02:34,000

have been seen in nearly every American war zone in the last 50 years.

42

00:02:34,000 --> 00:02:39,000

We have American troops coming forward and reporting these things in combat theaters.

43

00:02:39,000 --> 00:02:41,000

The question is, why?

44

00:02:41,000 --> 00:02:45,000

Is there an active interest in us conducting warfare?

45

00:02:45,000 --> 00:02:49,000

Or is there an interest in the tools we use to make war?

46

00:02:49,000 --> 00:02:52,000

Conventional tools, nuclear tools.

47

00:02:52,000 --> 00:02:54,000

What is the connection?

48

00:02:54,000 --> 00:02:57,000

To investigate how widespread the sightings are

49

00:02:57,000 --> 00:02:59,000

and what threat they might represent,

50

00:02:59,000 --> 00:03:02,000

Elizondo was meeting with U.S. combat veterans,

51

00:03:02,000 --> 00:03:06,000

starting with one who served on the front lines in Afghanistan.

52

00:03:07,000 --> 00:03:09,000

Tell me a little bit about the situation.

53

00:03:09,000 --> 00:03:11,000

What province were you in and what was it like?

54

00:03:11,000 --> 00:03:13,000

Well, we were in Helmand Province.

55

00:03:13,000 --> 00:03:16,000

Also, man, we were in the hottest part of the country.

56

00:03:16,000 --> 00:03:18,000

The Taliban were getting really thick in that area.

57

00:03:18,000 --> 00:03:21,000

Suicide bombers were always trying to attack the main entry point,

58

00:03:21,000 --> 00:03:25,000

whether they could drive up a fuel tanker on the south side.

59

00:03:25,000 --> 00:03:28,000

Wherever they could try to get in, they were trying to get in.

60

00:03:28,000 --> 00:03:29,000

So was the tense time?

61

00:03:29,000 --> 00:03:30,000

It was very tense, yeah.

62

00:03:30,000 --> 00:03:34,000

In March 2009, President Obama had ordered a massive increase

63

00:03:34,000 --> 00:03:36,000

in American troops to fight the Taliban.

64

00:03:36,000 --> 00:03:37,000

18-4 up!

65

00:03:43,000 --> 00:03:45,000

Get about six men moving back there!

66

00:03:45,000 --> 00:03:47,000

The troops' search was just starting up.

67

00:03:47,000 --> 00:03:51,000

We were that line of defense between the Taliban

68

00:03:51,000 --> 00:03:53,000

and the rest of our forces.

69

00:03:56,000 --> 00:03:58,000

On September 4th, 2009,

70

00:03:58,000 --> 00:04:01,000

Justin Dorfler was assigned tower duty.

71

00:04:01,000 --> 00:04:04,000

You are the first, last, only defense

72

00:04:04,000 --> 00:04:07,000

for everybody in that forward operating base.

73

00:04:07,000 --> 00:04:10,000

You're the eyes, you're the ears, and you're the weapon.

74

00:04:11,000 --> 00:04:14,000

What he sees that night changes his life.

75

00:04:14,000 --> 00:04:17,000

We had done our periodic scans.

76

00:04:17,000 --> 00:04:19,000

All was quiet.

77

00:04:21,000 --> 00:04:23,000

And we hear what sounded like an aircraft.

78

00:04:23,000 --> 00:04:26,000

It was clear night, stars were just out everywhere,

79

00:04:26,000 --> 00:04:28,000

but we could not find this aircraft.

80

00:04:28,000 --> 00:04:29,000

We could hear it.

81

00:04:29,000 --> 00:04:31,000

It sounded like it was flying pretty high.

82

00:04:31,000 --> 00:04:34,000

So I pull out the night vision,

83

00:04:34,000 --> 00:04:38,000

and it records both night vision

84

00:04:38,000 --> 00:04:40,000

and infrared.

85

00:04:40,000 --> 00:04:42,000

Infrared cameras identify objects

86

00:04:42,000 --> 00:04:45,000

using temperature differences rather than ambient light,

87

00:04:45,000 --> 00:04:48,000

allowing objects to be seen in complete darkness.

88

00:04:48,000 --> 00:04:52,000

I look back up, I see this jet.

89

00:04:52,000 --> 00:04:54,000

And it was very high up there,

90

00:04:54,000 --> 00:04:56,000

but I could definitely see the heat.

91

00:04:56,000 --> 00:04:59,000

It was probably around five, 600 miles an hour maybe.

92

00:04:59,000 --> 00:05:01,000

But the weirdest thing, I saw it,

93

00:05:01,000 --> 00:05:03,000

at first was a shooting star.

94

00:05:03,000 --> 00:05:06,000

This shooting star, that cleared almost the entire sky,

95

00:05:06,000 --> 00:05:09,000

came to a dead stop, right at this jet.

96

00:05:09,000 --> 00:05:13,000

Went above it, to this side, below it, out front.

97

00:05:13,000 --> 00:05:16,000

And then just sat there, and the jet continued past it.

98

00:05:16,000 --> 00:05:18,000

And this happened a couple of times.

99

00:05:18,000 --> 00:05:21,000

And so at that point, I'm trying to wrap my head around.

100

00:05:23,000 --> 00:05:24,000

How is this possible?

101

00:05:24,000 --> 00:05:26,000

Okay, so let's say, here's the aircraft.

102

00:05:26,000 --> 00:05:28,000

Yep, so there's the aircraft.

103

00:05:28,000 --> 00:05:30,000

It's coming by, and out of nowhere,

104

00:05:30,000 --> 00:05:33,000

this other thing just literally cleared the entire sky

105

00:05:33,000 --> 00:05:36,000

right up to it, went above, to the other side, down below,

106

00:05:36,000 --> 00:05:38,000

and then out front.

107

00:05:38,000 --> 00:05:43,000

Now, it sat there as, like, you're doing, flew right by.

108

00:05:43,000 --> 00:05:45,000

It goes right again, right up to it.

109

00:05:45,000 --> 00:05:47,000

Do you even think that the pilot was aware of it?

110

00:05:47,000 --> 00:05:50,000

Did you see the pilot take any type of evasive maneuvers?

111

00:05:50,000 --> 00:05:52,000

The pilot stayed on a steady track.

112

00:05:52,000 --> 00:05:54,000

This happened for just a little bit longer,

113

00:05:54,000 --> 00:05:56,000

and then it just...

114

00:05:56,000 --> 00:05:58,000

up.

115

00:05:59,000 --> 00:06:01,000

First thought in my head is,

116

00:06:01,000 --> 00:06:03,000

how can someone pilot something like that

117

00:06:03,000 --> 00:06:05,000

without killing yourself?

118

00:06:05,000 --> 00:06:06,000

At the end of the day,

119

00:06:06,000 --> 00:06:08,000

aircraft move over in a predictable way

120

00:06:08,000 --> 00:06:11,000

because they are subject to the same laws of physics

121

00:06:11,000 --> 00:06:13,000

that everything else is.

122

00:06:13,000 --> 00:06:15,000

And yet, when you come across an object that's moving in a way

123

00:06:15,000 --> 00:06:16,000

that it shouldn't be,

124

00:06:16,000 --> 00:06:19,000

an arrow being shot out of a bow is gonna go straight.

125

00:06:19,000 --> 00:06:22,000

You don't expect it to do right-angled turns.

126

00:06:22,000 --> 00:06:25,000

And yet, that's exactly what these things are doing.

127

00:06:25,000 --> 00:06:27,000

The object Dorfler is describing

128

00:06:27,000 --> 00:06:30,000

matches two of Elizondo's five observables,

129

00:06:30,000 --> 00:06:32,000

instantaneous acceleration,

130

00:06:32,000 --> 00:06:34,000

or the ability to go from a complete stop

131

00:06:34,000 --> 00:06:36,000

to an incredibly high rate of speed

132

00:06:36,000 --> 00:06:38,000

and hypersonic velocity,

133

00:06:38,000 --> 00:06:41,000

speeds over 3,700 miles per hour.

134

00:06:42,000 --> 00:06:45,000

Capabilities, Elizondo says he's catalogued

135

00:06:45,000 --> 00:06:46,000

in numerous sightings,

136

00:06:46,000 --> 00:06:49,000

including the 2004 Nimitz incident.

137

00:06:49,000 --> 00:06:51,000

I'm kind of pulling nose to where he's gonna be,

138

00:06:51,000 --> 00:06:52,000

and he's coming up.

139

00:06:52,000 --> 00:06:55,000

He just rapidly accelerates beyond anything that I've ever seen.

140

00:06:55,000 --> 00:06:58,000

Crosses my nose and gets gone.

141

00:06:59,000 --> 00:07:01,000

And I'm like, whoa.

142

00:07:01,000 --> 00:07:05,000

It was so unnerving because it was so unpredictable.

143

00:07:05,000 --> 00:07:08,000

High G, rapid velocity, rapid acceleration.

144

00:07:08,000 --> 00:07:14,000

So you're wondering, you know, how can I possibly fight this?

145

00:07:14,000 --> 00:07:17,000

Instant acceleration, very, very fast velocities.

146

00:07:17,000 --> 00:07:20,000

Looks an awful lot like a flying white tic-tac.

147

00:07:20,000 --> 00:07:22,000

Are we talking about the same thing here?

148

00:07:22,000 --> 00:07:24,000

Sounds pretty similar to me.

149

00:07:26,000 --> 00:07:28,000

While the Nimitz tic-tac encounter

150

00:07:28,000 --> 00:07:30,000

happened during a training exercise,

151

00:07:30,000 --> 00:07:33,000

Dorfler's sighting occurred in an active war zone

152

00:07:33,000 --> 00:07:35,000

to Elizondo's team member Chris Mellon

153

00:07:35,000 --> 00:07:37,000

that raises troubling questions.

154

00:07:37,000 --> 00:07:39,000

The issue of the source, the origin,

155

00:07:39,000 --> 00:07:42,000

the intent of these vehicles, of these craft

156

00:07:42,000 --> 00:07:46,000

is extremely pressing because we don't think there are,

157

00:07:46,000 --> 00:07:52,000

and therefore that raises a host of rather alarming, concerning questions.

158

00:07:52,000 --> 00:07:55,000

Have we been technologically leaped frog?

159

00:07:55,000 --> 00:07:58,000

Couldn't be the Russians or Chinese or someone else.

160

00:07:58,000 --> 00:08:03,000

Whatever he saw, Dorfler chose not to file an official report.

161

00:08:03,000 --> 00:08:05,000

I'm like, how do you write this?

162

00:08:05,000 --> 00:08:06,000

What do you say?

163

00:08:06,000 --> 00:08:07,000

Are you going to get locked up?

164

00:08:07,000 --> 00:08:09,000

Are you going to be made fun of by your peers

165

00:08:09,000 --> 00:08:11,000

for the duration of the deployment?

166

00:08:11,000 --> 00:08:15,000

But to Chris Mellon, the sighting represents a clear threat.

167

00:08:15,000 --> 00:08:18,000

These aircraft, these vehicles are demonstrating capabilities

168

00:08:18,000 --> 00:08:20,000

we do not possess.

169

00:08:20,000 --> 00:08:24,000

It's difficult to imagine a more urgent requirement

170

00:08:24,000 --> 00:08:27,000

than to find out who is operating these vehicles,

171

00:08:27,000 --> 00:08:30,000

why they're here, what their intentions are.

172

00:08:36,000 --> 00:08:40,000

This is the actual journal that I had in Afghanistan.

173

00:08:40,000 --> 00:08:44,000

I would do my daily entries and logs in this.

174

00:08:46,000 --> 00:08:49,000

Army specialist Justin Dorfler has agreed to divulge his account

175

00:08:49,000 --> 00:08:53,000

of a tic-tac-like UFO he says he witnessed while serving in Afghanistan.

176

00:08:53,000 --> 00:08:56,000

The moment of log entry was 11.56 in the morning.

177

00:08:56,000 --> 00:08:59,000

It started it off with, last night was fun,

178

00:08:59,000 --> 00:09:02,000

something weird that will confuse me for a life.

179

00:09:02,000 --> 00:09:06,000

It's the first time he's publicly shared this diary entry.

180

00:09:06,000 --> 00:09:09,000

Friday, September 4th, 2009.

181

00:09:09,000 --> 00:09:12,000

On my thermal scan, I could see the heat from a plane flying overhead

182

00:09:12,000 --> 00:09:13,000

in blackout mode.

183

00:09:13,000 --> 00:09:17,000

If it wasn't for the thermal imaging, no one would see it.

184

00:09:17,000 --> 00:09:19,000

Not even night vision.

185

00:09:21,000 --> 00:09:23,000

Ugh, this is gonna be weird.

186

00:09:23,000 --> 00:09:26,000

Okay, I don't believe in UFOs or anything,

187

00:09:26,000 --> 00:09:29,000

but something flew up at the plane faster than a missile,

188

00:09:29,000 --> 00:09:31,000

then stopped, looped over it so fast,

189

00:09:31,000 --> 00:09:34,000

then stopped, then around it, then took off so fast,

190

00:09:34,000 --> 00:09:37,000

had mock speeds in a zigzag pattern,

191

00:09:37,000 --> 00:09:39,000

then up and down and stopped again.

192

00:09:39,000 --> 00:09:43,000

Dorfler was so moved by what he saw,

193

00:09:43,000 --> 00:09:46,000

he actually wrote in his diary about the event

194

00:09:46,000 --> 00:09:51,000

and then had the judge advocate general notarize his diary.

195

00:09:53,000 --> 00:09:58,000

So nobody could accuse him of forging these notes after the fact.

196

00:09:59,000 --> 00:10:03,000

At the end of that whole sentence, I ended up putting all forever wonder.

197

00:10:03,000 --> 00:10:06,000

And I tried to, basically I suppressed that.

198

00:10:06,000 --> 00:10:08,000

That didn't happen.

199

00:10:08,000 --> 00:10:12,000

It just, it can't happen. That's not possible.

200

00:10:12,000 --> 00:10:16,000

When you see something, that defies science.

201

00:10:16,000 --> 00:10:19,000

And I am a person of faith.

202

00:10:20,000 --> 00:10:24,000

But I would be lying if I said that wasn't a faith shaker at the time.

203

00:10:26,000 --> 00:10:29,000

Some believe tic-tac-like objects are extraterrestrial,

204

00:10:29,000 --> 00:10:32,000

but could there be an earthly explanation?

205

00:10:33,000 --> 00:10:37,000

Former Air Force Test Craft Engineer and Aviation Week editor Bill Scott

206

00:10:37,000 --> 00:10:41,000

suggests the objects could be secret U.S. technology.

207

00:10:41,000 --> 00:10:46,000

We learned clear back in Kosovo days that you couldn't rely on just stealth alone.

208

00:10:46,000 --> 00:10:51,000

But what if it also had some kind of a protection mechanism?

209

00:10:51,000 --> 00:10:53,000

So we had decoys.

210

00:10:53,000 --> 00:10:57,000

By the time the air campaign started in Afghanistan,

211

00:10:57,000 --> 00:11:01,000

there was a lot of new stuff that was being tried just to see how they work.

212

00:11:02,000 --> 00:11:07,000

Scott is describing small jet-powered decoys launched to fly alongside a plane,

213

00:11:07,000 --> 00:11:10,000

their heat signature used to confuse enemy missiles.

214

00:11:10,000 --> 00:11:12,000

They started calling them angels.

215

00:11:12,000 --> 00:11:17,000

They could fly around these vehicles in highly maneuverable ways.

216

00:11:17,000 --> 00:11:22,000

That could give you some strange visual effects from guys on the ground

217

00:11:22,000 --> 00:11:27,000

because a lot of maneuvers can trick you.

218

00:11:28,000 --> 00:11:32,000

While a missile decoy might explain what Justin Dorfler witnessed in 2009,

219

00:11:32,000 --> 00:11:37,000

can it account for a similar object seen nearly 30 years earlier?

220

00:11:37,000 --> 00:11:42,000

To investigate, Elizondo is meeting with a veteran who claims to have seen a UFO

221

00:11:42,000 --> 00:11:45,000

with tic-tac-like characteristics during the Vietnam War.

222

00:11:45,000 --> 00:11:48,000

Mr. Boshirz, how are you, sir?

223

00:11:49,000 --> 00:11:51,000

Thank you very much for your time and being here.

224

00:11:52,000 --> 00:11:55,000

My name is James Ray Boshirz.

225

00:11:55,000 --> 00:12:01,000

I was in the U.S. Air Force from 1968 to 1973.

226

00:12:01,000 --> 00:12:05,000

I've never shared the story with anyone except my wife

227

00:12:05,000 --> 00:12:07,000

and close friends that we made.

228

00:12:07,000 --> 00:12:12,000

This is an Air Force guy who decides to fly the biggest aircraft that we have,

229

00:12:12,000 --> 00:12:16,000

which is the B-52 Stratofortress bomber.

230

00:12:17,000 --> 00:12:20,000

The B-52 Stratofortress is a long-range heavy bomber

231

00:12:20,000 --> 00:12:24,000

that was the backbone of the U.S. aerial campaign in Vietnam.

232

00:12:24,000 --> 00:12:30,000

I flew missions in South Vietnam, Laos, Cambodia, and North Vietnam.

233

00:12:30,000 --> 00:12:32,000

I flew hundreds of missions.

234

00:12:32,000 --> 00:12:36,000

Southeast Asia, I know exactly, it was 101 missions

235

00:12:36,000 --> 00:12:40,000

because you have to do 100 to get that patch.

236

00:12:40,000 --> 00:12:43,000

Missions were going off around the clock.

237

00:12:43,000 --> 00:12:46,000

The enemy was trying to take over areas,

238

00:12:46,000 --> 00:12:51,000

and the B-52 turned out to be one of the most advantageous bombers.

239

00:12:51,000 --> 00:12:56,000

Their job is to fly a really long distance, drop bombs, and come back.

240

00:12:56,000 --> 00:13:01,000

It was 12 hours of complete boredom with about 30 minutes of sheer terror.

241

00:13:03,000 --> 00:13:06,000

June 1970.

242

00:13:06,000 --> 00:13:10,000

James Boshir and his crew were on their way back to Guam after a bombing run

243

00:13:10,000 --> 00:13:14,000

when they noticed an unidentified object heading their way.

244

00:13:14,000 --> 00:13:18,000

I was in command of the aircraft. I was a co-pilot at that time.

245

00:13:18,000 --> 00:13:22,000

And the navigator came on the intercom to me and said,

246

00:13:22,000 --> 00:13:27,000

co-pilot, do you see a bogey at about 12 o'clock and high above us?

247

00:13:27,000 --> 00:13:31,000

And I looked out the window and I just saw a bogey.

248

00:13:31,000 --> 00:13:35,000

I looked out the window and I couldn't see anything right off the bat.

249

00:13:35,000 --> 00:13:39,000

And then he said, well, it's about 20 miles or so from us,

250

00:13:39,000 --> 00:13:42,000

and it's coming towards us.

251

00:13:42,000 --> 00:13:46,000

All of a sudden, I saw a white light, and it was up high,

252

00:13:46,000 --> 00:13:49,000

and it just kept getting bigger as it was getting closer to us.

253

00:13:49,000 --> 00:13:52,000

But it never fluctuated, it didn't flash.

254

00:13:52,000 --> 00:13:54,000

I said, wake up the radar.

255

00:13:54,000 --> 00:13:58,000

He came on the intercom and said, yeah, I've got a bogey for you at 12 o'clock,

256

00:13:58,000 --> 00:14:00,000

and it's really high.

257

00:14:00,000 --> 00:14:05,000

But I don't know if this is the best experience I'd ever heard of one of our aircraft

258

00:14:05,000 --> 00:14:08,000

being able to go up higher than 70,000 feet.

259

00:14:08,000 --> 00:14:11,000

This was already above 60,000 feet.

260

00:14:11,000 --> 00:14:17,000

Thousands of feet up in his B-52, James Boshiers realizes the rest of his crew

261

00:14:17,000 --> 00:14:20,000

is also an all of the object.

262

00:14:20,000 --> 00:14:24,000

And then the radar navigator comes back and says, holy smoke.

263

00:14:24,000 --> 00:14:27,000

This bogey just made a sharp left turn.

264

00:14:27,000 --> 00:14:30,000

It made like almost a 90 degree turn instantly.

265

00:14:30,000 --> 00:14:32,000

And we're going, nobody can do that.

266

00:14:32,000 --> 00:14:35,000

And he said, it's coming straight for us.

267

00:14:35,000 --> 00:14:39,000

The bright light he says he witnessed is similar to the nighttime reports

268

00:14:39,000 --> 00:14:44,000

of glowing white tic-tac-like objects during the 2004 USS Nimitz event.

269

00:14:44,000 --> 00:14:48,000

And like those UFOs, it displayed two of Elizondo's five observables,

270

00:14:48,000 --> 00:14:53,000

instantaneous acceleration, and hypersonic velocity.

271

00:14:53,000 --> 00:14:58,000

The radar navigator comes back and says, pilot, he succeeded 6,000 knots.

272

00:14:58,000 --> 00:15:04,000

And now he's made another sharp turn to the north at 6,000 knots.

273

00:15:04,000 --> 00:15:08,000

So the radar navigator said, I'm turning on the camera.

274

00:15:08,000 --> 00:15:12,000

He had a camera that could snap pictures of the radar screen.

275

00:15:12,000 --> 00:15:16,000

So we had proof that this thing was flying at the speed that it was flying.

276

00:15:16,000 --> 00:15:21,000

And he finally said, it's increasing altitude and it's over 6,000 knots and climbing.

277

00:15:21,000 --> 00:15:26,000

No transponder signals, no squawking, no radio, and then the light just disappeared.

278

00:15:26,000 --> 00:15:32,000

He said he lost him on radar when the object reached about 100,000 feet.

279

00:15:32,000 --> 00:15:38,000

The command pilot told the crew, he says, hey guys, well now you've seen a UFO.

280

00:15:38,000 --> 00:15:44,000

Boshir's reported the incident to Air Force Intelligence officers.

281

00:15:44,000 --> 00:15:48,000

What happens next would only deepen the mystery.

282

00:15:51,000 --> 00:15:55,000

So the radar navigator said, I'm turning on the camera.

283

00:15:55,000 --> 00:15:58,000

He had a camera that could snap pictures of the radar screen.

284

00:15:58,000 --> 00:16:05,000

B-52 pilot James Boshir spotted a Tic Tac like UFO after a bombing run during the height of the Vietnam War.

285

00:16:05,000 --> 00:16:11,000

He says his navigator was able to capture photographs of its flight path on his radar screen.

286

00:16:11,000 --> 00:16:17,000

But in their routine briefing with Air Force Intelligence officers the next day, something strange happened.

287

00:16:17,000 --> 00:16:21,000

We told them all about it and we wanted to know if we could get some copies of the pictures.

288

00:16:21,000 --> 00:16:26,000

And they said, yeah, that shouldn't be a problem. There's nothing out there.

289

00:16:26,000 --> 00:16:33,000

The next morning our radar went back to get the pictures and when he got there they said, oh, you can't have any pictures.

290

00:16:33,000 --> 00:16:36,000

They've reclassified them as top secret.

291

00:16:36,000 --> 00:16:46,000

So I'm in the process of gathering some information in order that I can initiate a Freedom of Information Act request through the US government.

292

00:16:46,000 --> 00:16:49,000

Believing these photos could provide important evidence.

293

00:16:49,000 --> 00:16:55,000

Elizondo and his team filed a Freedom of Information Act request, but there's been no response so far.

294

00:16:55,000 --> 00:16:59,000

Most of the time things remain classified for up to 25 years.

295

00:16:59,000 --> 00:17:08,000

I can't imagine why a photograph or the radar scope taken back in the 1960s would still after 50 years remain classified.

296

00:17:08,000 --> 00:17:12,000

With the missing photos revealed the earliest known Tic Tac.

297

00:17:12,000 --> 00:17:19,000

Some theorize these advanced craft are merely secret technology deployed by the US or an adversary.

298

00:17:19,000 --> 00:17:25,000

But could that explain the incredible speed and maneuverability Bocher says his crew witnessed?

299

00:17:25,000 --> 00:17:33,000

When they encountered this object somewhere over the Pacific Ocean in 1970, there's really only two man-made objects that could even fly at hypersonic velocities.

300

00:17:33,000 --> 00:17:37,000

Those were the man-made rockets that were putting people in orbit.

301

00:17:37,000 --> 00:17:41,000

And that was the X-15 experimental aircraft rocket plane.

302

00:17:41,000 --> 00:17:43,000

Keeping in mind a rocket goes up into space.

303

00:17:43,000 --> 00:17:47,000

It doesn't follow you if you're at a B-52.

304

00:17:47,000 --> 00:17:54,000

And the X-15 was a very specific purpose-built vehicle that was never flying over the Pacific Ocean.

305

00:17:56,000 --> 00:18:01,000

Chris Mellon believes the objects could be spying on US military technology.

306

00:18:01,000 --> 00:18:07,000

Bear in mind that those B-52s that we employed during the Vietnam War to deliver conventional ordnance,

307

00:18:07,000 --> 00:18:12,000

their primary function was as part of the strategic air command's nuclear deterrent.

308

00:18:12,000 --> 00:18:16,000

The potential adversary would be very interested in their capabilities.

309

00:18:16,000 --> 00:18:22,000

Not surprising that the Russians or Chinese would be interested in collecting on them,

310

00:18:22,000 --> 00:18:31,000

but it's hard to relate that particular set of observations with any known capability that either we or they possess.

311

00:18:33,000 --> 00:18:37,000

On the trail of tic-tacs, Elizondo is meeting with another Vietnam veteran.

312

00:18:37,000 --> 00:18:43,000

His testimony may provide more insight into UFOs reported during that war.

313

00:18:43,000 --> 00:18:48,000

I'm heading down to see Lieutenant Commander Brian Weston and meet with him in his home.

314

00:18:48,000 --> 00:18:53,000

When one of these individuals are sharing with you an experience they had in Vietnam, that carries a lot of weight.

315

00:18:53,000 --> 00:18:55,000

I think we need to listen to what they have to say.

316

00:18:59,000 --> 00:19:00,000

Hello, good sir!

317

00:19:00,000 --> 00:19:01,000

Hey, how you doing?

318

00:19:01,000 --> 00:19:03,000

Take some oranges if you want to.

319

00:19:03,000 --> 00:19:05,000

I was just gonna say, you know, I may take an orange or two.

320

00:19:05,000 --> 00:19:06,000

There you go, no problem.

321

00:19:08,000 --> 00:19:10,000

First of all, I want to thank you for your service.

322

00:19:10,000 --> 00:19:17,000

Lieutenant Commander Brian Weston is a highly decorated Navy pilot who flew dangerous low-altitude bombing runs over North Vietnam.

323

00:19:19,000 --> 00:19:24,000

Weston's A-6 intruder was one of the most advanced aircraft of its time,

324

00:19:24,000 --> 00:19:30,000

able to rain down 18,000 pounds of munitions onto the enemy under any weather condition.

325

00:19:34,000 --> 00:19:42,000

The unusual high-performance aircraft could have caught the attention of foreign powers, Russian, Chinese, or something else.

326

00:19:43,000 --> 00:19:48,000

You were awarded one of the highest honors that the Navy has.

327

00:19:50,000 --> 00:19:55,000

In the spring of 1966, the pilot of Weston's plane was wounded by North Vietnamese ground fire,

328

00:19:55,000 --> 00:19:58,000

and their aircraft crashed into the Gulf of Tonkin.

329

00:20:00,000 --> 00:20:06,000

For rescuing the wounded pilot from shark-infested waters, Weston was awarded the prestigious Navy Cross Medal.

330

00:20:07,000 --> 00:20:10,000

But while the harrowing experience nearly cost him his life,

331

00:20:10,000 --> 00:20:14,000

it's an incident that took place three weeks earlier that has haunted him for decades.

332

00:20:16,000 --> 00:20:21,000

Can you describe the events leading up to, with your pilot slash co-pilot, what you saw that day?

333

00:20:21,000 --> 00:20:26,000

That day was a mini-strike, which was kind of an in-between alpha strike,

334

00:20:26,000 --> 00:20:29,000

where you're really intense and losing people.

335

00:20:29,000 --> 00:20:33,000

We were going with two A-4 Charlies, and they're very slow.

336

00:20:33,000 --> 00:20:37,000

And so we're just trucking over to go to Ho Chi Minh Trail.

337

00:20:37,000 --> 00:20:46,000

April 6, 1966, Weston's A-6 intruder is accompanying the slower A-4 Skyhawks on a quick hit-and-run bombing raid,

338

00:20:46,000 --> 00:20:50,000

when suddenly he notices something strange off his right wing.

339

00:20:50,000 --> 00:20:53,000

This thing just wafted over the wing or right next to it.

340

00:20:53,000 --> 00:20:58,000

I mean, it was within an inch, it was that close, and I was going to say, did you see that?

341

00:20:58,000 --> 00:21:00,000

I didn't even get the duh out.

342

00:21:00,000 --> 00:21:02,000

What the f was that?

343

00:21:02,000 --> 00:21:07,000

And he banked the airplane to the right, and we're looking at the damn thing.

344

00:21:07,000 --> 00:21:13,000

Nothing. I mean, couldn't see the object, couldn't see a contrail, couldn't see a puff of smoke, couldn't see nothing.

345

00:21:13,000 --> 00:21:16,000

So what I'm going to ask you to do if it's okay, can you draw for me?

346

00:21:16,000 --> 00:21:18,000

I'm not a very good drawer.

347

00:21:18,000 --> 00:21:19,000

That's okay.

348

00:21:19,000 --> 00:21:20,000

Oh, you got it?

349

00:21:20,000 --> 00:21:21,000

Yeah.

350

00:21:21,000 --> 00:21:22,000

Okay, great.

351

00:21:22,000 --> 00:21:25,000

Kind of a ratio of about, kind of about like that.

352

00:21:25,000 --> 00:21:27,000

Just the size of a water heater.

353

00:21:27,000 --> 00:21:38,000

It's as if you took a humongous blob of mercury and puffed it up into that perfect shape, shimmering, perfect chromium polysilver.

354

00:21:38,000 --> 00:21:42,000

No windows, no wings, no protuberances, no little nothing.

355

00:21:42,000 --> 00:21:50,000

If somebody said, well, it could be a tic-tac, I suppose it could have been on the edge of, like a tic-tac type thing.

356

00:21:50,000 --> 00:21:56,000

The UFO, Weston says he saw, demonstrated another of Elizondo's five observables, anti-gravity.

357

00:21:56,000 --> 00:22:04,000

That's the ability to move without any obvious signs of propulsion, and it's a trait reported in multiple sightings of tic-tacs.

358

00:22:04,000 --> 00:22:07,000

I mean, it's not flying, no we know flying.

359

00:22:07,000 --> 00:22:12,000

I mean, to me it had to be, if it is there, sitting there, it doesn't just sit there.

360

00:22:12,000 --> 00:22:16,000

It has to be some way of controlling, like magnetically, or something.

361

00:22:16,000 --> 00:22:18,000

Yeah, some sort of physics.

362

00:22:18,000 --> 00:22:19,000

Some sort of physics.

363

00:22:19,000 --> 00:22:24,000

Did Weston witness a UFO similar to what later pilots compared to a tic-tac?

364

00:22:24,000 --> 00:22:29,000

Or can the strange metallic object be explained by military technology of the time?

365

00:22:29,000 --> 00:22:31,000

I'd like to know what the heck it was.

366

00:22:31,000 --> 00:22:35,000

And if it wasn't ours, and it wasn't the Russians, or the Chinese, or the North Koreans,

367

00:22:35,000 --> 00:22:39,000

I'm convinced that there's stuff out there that people don't want to come to grips with.

368

00:22:39,000 --> 00:22:41,000

You could throw out some possibilities.

369

00:22:41,000 --> 00:22:48,000

Very unlikely that it could be a gravity drop bomb, because they tend to go down very quickly.

370

00:22:48,000 --> 00:22:55,000

Pretty unlikely that it would be a surface-to-air missile, because pilots describe those as flying telephone poles.

371

00:22:55,000 --> 00:23:03,000

Fuel tanks would tend to drop away very quickly, and that pretty much leaves it in the category of, we don't know.

372

00:23:03,000 --> 00:23:12,000

If this is indeed one of our terrestrial adversaries, there's great cause for concern that we may have been technologically leapfrog.

373

00:23:12,000 --> 00:23:15,000

They're also demonstrating an interest in our technology.

374

00:23:15,000 --> 00:23:20,000

They seem to be very uncannily interested in our military capabilities.

375

00:23:20,000 --> 00:23:23,000

So we have every reason to be concerned about that.

376

00:23:26,000 --> 00:23:31,000

We're putting together the mosaic with disparate pieces of data.

377

00:23:31,000 --> 00:23:33,000

It's a bit like putting together a jigsaw puzzle.

378

00:23:33,000 --> 00:23:40,000

At first you have all these little pieces on the table, but little by little the more pieces you have, the more the picture becomes in focus.

379

00:23:40,000 --> 00:23:47,000

Llewella Zando has just interviewed a second Vietnam veteran about a strange object he saw in an active war zone.

380

00:23:47,000 --> 00:23:49,000

But he needs to gather more data.

381

00:23:49,000 --> 00:23:54,000

If we can establish the things that they were seeing back then in the past from the Vietnam War,

382

00:23:54,000 --> 00:24:00,000

are indeed the same types of vehicles being observed, and perhaps the same type of technology that we're seeing today,

383

00:24:00,000 --> 00:24:05,000

then maybe it'll help us figure out what these things are and where they're from.

384

00:24:06,000 --> 00:24:13,000

Today he's sitting down with a veteran who witnessed a similar object during the NATO bombing of Kosovo in 1999.

385

00:24:14,000 --> 00:24:16,000

Mr. Tarr, I presume.

386

00:24:16,000 --> 00:24:18,000

Hey, how are you, sir?

387

00:24:18,000 --> 00:24:21,000

Thank you very much for coming here and speaking with me. I really appreciate it.

388

00:24:21,000 --> 00:24:27,000

My name is Derek Tarr. I was a senior airman during the late 90s serving in the United States Air Force.

389

00:24:27,000 --> 00:24:30,000

This is the first time I've ever told this story.

390

00:24:31,000 --> 00:24:39,000

Derek Tarr was a boom operator on an Air Force KC-10, responsible for the mid-air refueling of NATO jets between bombing runs.

391

00:24:39,000 --> 00:24:43,000

You've got a lot of pilots out there, but you have very few boom operators.

392

00:24:43,000 --> 00:24:48,000

These individuals are trained experts on all sorts of Allied NATO aircraft.

393

00:24:48,000 --> 00:24:54,000

They know the difference between an F-18 Hornet between an F-117 night fighter and F-16.

394

00:24:54,000 --> 00:24:57,000

They know all these aircraft because they see them day in and day out.

395

00:24:58,000 --> 00:25:06,000

On March 24, 1999, Tarr is on a refueling mission over the Adriatic Sea when suddenly he sees a strange light.

396

00:25:06,000 --> 00:25:11,000

I was sitting in the boom pod in the back of the KC-10 just waiting for the next set of receivers to arrive.

397

00:25:11,000 --> 00:25:18,000

I noticed a bright light that was behind us slightly below our altitude.

398

00:25:19,000 --> 00:25:24,000

I just kind of hung back. Didn't seem to make any more forward progress towards our aircraft.

399

00:25:24,000 --> 00:25:27,000

That's when I kind of started to wonder what was going on.

400

00:25:27,000 --> 00:25:34,000

I called up to my pilot on the interphone to ask him if we had more receivers coming and said that we did not have anyone scheduled.

401

00:25:38,000 --> 00:25:43,000

Tarr says the control center monitoring the airspace reported all known aircraft were accounted for.

402

00:25:43,000 --> 00:25:48,000

We started into a turn and as I look back, it was just a bright white orb.

403

00:25:48,000 --> 00:25:56,000

It was very bouncy, almost like a super ball. Very short, very succinct, very sharp movements, but extremely rapid.

404

00:25:58,000 --> 00:26:06,000

The jostling or oscillations that it was doing were certainly not minute adjustments, probably several hundred feet up, down, side to side.

405

00:26:07,000 --> 00:26:16,000

Once I got to about our eight o'clock position, it did a rapid climb and just in the blink of an eye went straight up and just shot right up in the sky.

406

00:26:17,000 --> 00:26:19,000

Fastest thing I've ever seen.

407

00:26:20,000 --> 00:26:27,000

The UFO Tarr claims he saw was spherical instead of the oblong shape of tic-tacs, but it featured some of the same five observables.

408

00:26:28,000 --> 00:26:34,000

We have hypersonic velocities, instantaneous acceleration, and of course positive lift or vernacular anti-gravity.

409

00:26:36,000 --> 00:26:41,000

Four new sightings spanning decades in Kosovo, Afghanistan and Vietnam.

410

00:26:41,000 --> 00:26:47,000

U.S. military eyewitnesses reported single objects in close proximity to American planes.

411

00:26:48,000 --> 00:26:56,000

And in the 2004 Nimitz Encounter, where an entire carrier strike group was present, radar operators reported a fleet of objects.

412

00:26:56,000 --> 00:27:04,000

What Tarr saw and what the Nimitz folks had reported back in 2004, there were some commonalities in the performance of these things.

413

00:27:04,000 --> 00:27:11,000

The team needs to gather more data to address the biggest question. Are these the same objects? And if so, what are they?

414

00:27:12,000 --> 00:27:16,000

In the case of Derek Tarr's sighting, could the conflict itself offer a clue?

415

00:27:17,000 --> 00:27:30,000

Clearly when we engage Kosovo, we're operating in fairly close proximity to Russia and it's an opportunity for them to collect intelligence on these cutting-edge aircraft in the U.S. inventory, including the stealth bomber.

416

00:27:30,000 --> 00:27:38,000

The B-2 stealth bomber was first used in combat in the Kosovo war. At the time, it was America's most advanced aircraft.

417

00:27:39,000 --> 00:27:51,000

So all of those kinds of technologies are very pertinent to the Russian military who are constantly preparing for the eventuality in which they may have to engage the United States.

418

00:27:54,000 --> 00:27:57,000

The thought did cross my mind that it certainly could be a hostile.

419

00:27:57,000 --> 00:28:05,000

Are they really an adversarial technology that has managed to hoodwink us and leapfrog ahead of the United States going back decades?

420

00:28:06,000 --> 00:28:15,000

If that's the case, then I think we have a much, much bigger problem on our hands because that means there is something inherently broken with our national security apparatus.

421

00:28:16,000 --> 00:28:25,000

I think it very well could be a significant national security issue if we just kind of bury our head in the sand or look away, we're screwed.

422

00:28:28,000 --> 00:28:45,000

Lua Elizondo has returned from meeting four American veterans who claim to have seen UFOs similar to the Tic Tac witnessed by pilots from the USS Nimitz in 2004, sightings in war zones dating back 50 years.

423

00:28:45,000 --> 00:28:57,000

The testimony that we are seeing now from these courageous individuals, I think it's beginning to open the aperture and what we're now realizing it wasn't just the USS Nimitz and flying Tic Tacs.

424

00:28:58,000 --> 00:28:59,000

It goes all the way back to Vietnam.

425

00:29:00,000 --> 00:29:06,000

For Elizondo and his team, serious questions remain about the origin of these objects and the threat they represent.

426

00:29:06,000 --> 00:29:23,000

The stunning and concerning thing about these unidentified aerial phenomenon is they demonstrate performance characteristics that are far superior to anything in the U.S. inventory at either a classified or unclassified level.

427

00:29:24,000 --> 00:29:27,000

If it's not us, then it's not them that have me to somebody else.

428

00:29:28,000 --> 00:29:35,000

Now he's meeting with his team member, Steve Justice, one of the most respected aviation experts in the United States.

429

00:29:36,000 --> 00:29:42,000

Justice was a director at Lockheed Martin's Skunk Works, where he helped develop some of America's most advanced top-secret aircraft.

430

00:29:43,000 --> 00:29:49,000

I kind of want to run by you some of these scenarios, these experiences, if you're okay with that.

431

00:29:50,000 --> 00:29:51,000

Yeah, yeah, sure.

432

00:29:51,000 --> 00:29:58,000

Elizondo wants Justice to explore whether wartime sightings of Tic Tac-like objects can be explained by conventional technology.

433

00:29:59,000 --> 00:30:07,000

Once I got to our eight o'clock position, it did a rapid climb and just in the blink of an eye, went straight up and just shot right up in the sky.

434

00:30:08,000 --> 00:30:22,000

1999, where were we with our technology then, as far as objects that could operate from 30,000 feet and all of a sudden pop up to 80,000 feet and disappear?

435

00:30:23,000 --> 00:30:29,000

We don't have that today, so I don't know why we would have it, you know, in the 1990s.

436

00:30:30,000 --> 00:30:32,000

In 1999, which we did have lasers.

437

00:30:33,000 --> 00:30:34,000

Oh, absolutely.

438

00:30:34,000 --> 00:30:37,000

It's possible that someone could have been shooting a laser from the ground.

439

00:30:38,000 --> 00:30:44,000

In the late 1990s, the U.S. had begun testing a ground-based chemical laser capable of hitting objects in space.

440

00:30:45,000 --> 00:30:49,000

If there were nighttime and it were visible laser, then you would see the beam.

441

00:30:50,000 --> 00:30:56,000

So, what technology can you talk about that the enemy might have had in the late 90s?

442

00:30:57,000 --> 00:30:59,000

The only things I know of are all very conventional things.

443

00:31:00,000 --> 00:31:03,000

I don't know of anything that was exotic.

444

00:31:04,000 --> 00:31:11,000

Elizondo also wants to know what justice thinks about a nighttime sighting ten years later by Justin Dorfler in Afghanistan.

445

00:31:12,000 --> 00:31:16,000

This thing from a dead stop, going straight, straight, it only moved in straight lines.

446

00:31:17,000 --> 00:31:21,000

Aviation expert Bill Scott theorized the objects could be anti-missile decoys.

447

00:31:23,000 --> 00:31:30,000

But Afghanistan also saw a new generation of unmanned aerial vehicles, or UAVs. Could it have been one of them?

448

00:31:30,000 --> 00:31:33,000

This was kind of the place where UAVs really got their traction.

449

00:31:34,000 --> 00:31:37,000

But I don't know of any UAVs that do that.

450

00:31:38,000 --> 00:31:41,000

Maneuver like that? Yes, but not at those speeds.

451

00:31:42,000 --> 00:31:48,000

Elizondo has one more sighting he wants Steve Justice to look at. One that's also confounded the experts.

452

00:31:49,000 --> 00:31:58,000

The bizarre metallic object that appeared to be hovering in the sky as Brian Weston's A6 intruder flew by more than five decades earlier over North Vietnam.

453

00:31:58,000 --> 00:32:09,000

Probably about three feet in diameter and maybe five or eight feet long. This thing just wafted over the wing or right next to it. I mean, was it with an inch?

454

00:32:10,000 --> 00:32:14,000

Could it have been an artillery shell visible from Weston's low-flying A6?

455

00:32:15,000 --> 00:32:17,000

Think of a tic-tac with a flat end on the back.

456

00:32:18,000 --> 00:32:23,000

Artillery shells that are fired off of battleships are relatively blunt.

457

00:32:24,000 --> 00:32:26,000

I've seen one 5'5" shell from Paladins.

458

00:32:26,000 --> 00:32:33,000

If you know what you're looking for, you can see them. You know, I'll admit, I can't explain. Low altitude, typically shells are arching through the air.

459

00:32:34,000 --> 00:32:35,000

He said it was just sitting there.

460

00:32:35,000 --> 00:32:36,000

So I can't explain that.

461

00:32:36,000 --> 00:32:37,000

Color. Let's go to color.

462

00:32:38,000 --> 00:32:39,000

Silver. Like, color.

463

00:32:40,000 --> 00:32:42,000

Yeah, I can't really explain that.

464

00:32:43,000 --> 00:32:49,000

And what about if it's not going up an object coming down like some sort of reconnaissance balloon?

465

00:32:50,000 --> 00:32:55,000

I mean, the closest thing to the shape that you've described is an A-pump canister, to be perfectly honest with you.

466

00:32:57,000 --> 00:33:02,000

But an A-pump was also dropped from relatively low altitudes, who were dropped from treetop levels.

467

00:33:03,000 --> 00:33:07,000

What other considerations then should we be looking at here?

468

00:33:08,000 --> 00:33:13,000

This falls into that unidentified category. You know, there's just some of these things that can't be explained.

469

00:33:17,000 --> 00:33:24,000

David Clark is an investigative journalist who combed through the British National Archives, studying military UFO sightings.

470

00:33:24,000 --> 00:33:28,000

Pilots, however highly trained they are, are human beings.

471

00:33:29,000 --> 00:33:32,000

He believes that many of these sightings can be attributed to the fog of war.

472

00:33:33,000 --> 00:33:37,000

Particularly in wartime, where you're on edge, every time you go out, you don't know whether you're going to return.

473

00:33:38,000 --> 00:33:39,000

You're going without sleep.

474

00:33:40,000 --> 00:33:46,000

Some of the pilots have actually admitted this, that maybe they saw quite ordinary things and thought there was something extraordinary.

475

00:33:47,000 --> 00:33:51,000

Others disagree and say the heat of battle can make service members better observers.

476

00:33:51,000 --> 00:33:58,000

I think you have to look at these reports on a case-by-case basis and the data that's available.

477

00:33:59,000 --> 00:34:03,000

I don't think you can paint with a broad brush and say, oh, that's just the fog of war.

478

00:34:04,000 --> 00:34:06,000

If anything, your senses are raised during that.

479

00:34:07,000 --> 00:34:12,000

Because of the heightened sense of awareness, they saw something they might not have normally seen.

480

00:34:13,000 --> 00:34:15,000

I think that's a benefit to us, not a liability.

481

00:34:16,000 --> 00:34:20,000

For the veterans who remember these events as if they were yesterday, there's no question.

482

00:34:21,000 --> 00:34:28,000

For something to be in your airspace without any form that you can recognize, no wings, no engine, no exhaust.

483

00:34:29,000 --> 00:34:32,000

And it's like, well, it shouldn't have been there, but what do you do when it is there?

484

00:34:33,000 --> 00:34:34,000

And somebody said, well, it really wasn't there.

485

00:34:35,000 --> 00:34:41,000

Well, all I can say is it was there. I saw it clearly. Bill saw it clearly. It was startling.

486

00:34:46,000 --> 00:34:53,000

Louis Elizondo has been investigating a pattern of sightings of tic-tac-like UFOs in America's war zones.

487

00:34:54,000 --> 00:34:56,000

Could they be a threat to national security?

488

00:34:57,000 --> 00:35:03,000

Today, he's briefing the team, Tom DeLong, Chris Mellon and Steve Justice, on what he's found.

489

00:35:04,000 --> 00:35:10,000

When I was in ATIP, we really focused primarily looking at the USS Nimitz incident and forward.

490

00:35:10,000 --> 00:35:22,000

I was shocked to learn that some of the same observables that we noticed were precisely the same observables that were being reported even back in the 1960s.

491

00:35:23,000 --> 00:35:30,000

Elizondo details Derek Tarr's UFO sighting during the Kosovo conflict in 1999, which displayed some of those observables.

492

00:35:31,000 --> 00:35:39,000

It starts to maneuver in a very peculiar manner, something that we now know from the Nimitz event, the tic-tac event.

493

00:35:40,000 --> 00:35:45,000

Basically this weird type of 90-degree right turns.

494

00:35:46,000 --> 00:35:47,000

The ricochet kind of thing.

495

00:35:48,000 --> 00:35:49,000

Like a ping-pong, right? Like a ricochet.

496

00:35:50,000 --> 00:35:57,000

The team finds clear similarities between the UFOs seen during recent conflicts and the object observed by US Navy pilots in 2004.

497

00:35:57,000 --> 00:36:02,000

I think this fits in the same category as the reports on the East Coast and the tic-tacs.

498

00:36:03,000 --> 00:36:09,000

In each case, they believe the tic-tacs were displaying capabilities not consistent with known technology, US or otherwise.

499

00:36:10,000 --> 00:36:12,000

But there's one last piece of the puzzle to consider.

500

00:36:13,000 --> 00:36:17,000

Gentlemen, I'd like to introduce you to a friend of mine.

501

00:36:18,000 --> 00:36:20,000

This is Lieutenant Commander Brian Westin, retired.

502

00:36:20,000 --> 00:36:29,000

Elizondo has invited retired Lieutenant Commander Brian Westin to meet the team and discuss the UFO he saw over North Vietnam in 1966.

503

00:36:30,000 --> 00:36:37,000

This individual happens to not only be a patriot, but frankly, in my opinion, a war hero during the early days of Vietnam.

504

00:36:38,000 --> 00:36:41,000

He encountered a pretty remarkable event.

505

00:36:42,000 --> 00:36:45,000

What I saw didn't make any sense in the context of the time.

506

00:36:45,000 --> 00:36:51,000

Here we have something that is not unlike the description of the tic-tac and other things that we reported on.

507

00:36:52,000 --> 00:36:55,000

And you have this instantaneous acceleration and even low observability.

508

00:36:56,000 --> 00:36:58,000

And this is going back to 1966.

509

00:36:59,000 --> 00:37:02,000

Was it flying the opposite direction or something? Or you pass it potentially?

510

00:37:03,000 --> 00:37:06,000

Did not see it coming. All I saw was right there, just wafted by it.

511

00:37:07,000 --> 00:37:08,000

This thing was in here. It got there somehow.

512

00:37:08,000 --> 00:37:13,000

If it wasn't propulsion like I'm used to or a jet or a rocket or something, no wings.

513

00:37:14,000 --> 00:37:17,000

I mean, there's about only one thing left as far as I can see is anti-gravity.

514

00:37:18,000 --> 00:37:24,000

And if we had that and people knew about it, how they could sit on it would be absolutely beyond me.

515

00:37:25,000 --> 00:37:31,000

When we develop a game-changing technology, it's not uncommon that we feel that during times of conflict, right?

516

00:37:31,000 --> 00:37:48,000

I can't imagine, given our conflict in Afghanistan and Iraq and Kosovo and Vietnam, that we have managed to sit on a game-changing technology, putting pilot's lives in danger this entire time for more than a damn near 60 years.

517

00:37:49,000 --> 00:37:54,000

We just don't sit on technology that long, even with nuclear technology. We use it. We implement it.

518

00:37:55,000 --> 00:37:56,000

We don't necessarily use it.

519

00:37:57,000 --> 00:37:58,000

Okay, so we don't use it as a library.

520

00:37:58,000 --> 00:37:59,000

We don't use it as a library.

521

00:38:00,000 --> 00:38:02,000

It would be a strict case where we would use it.

522

00:38:03,000 --> 00:38:04,000

We use them every day for deterrents.

523

00:38:05,000 --> 00:38:06,000

So I'm going to take the other side of the devil's advocate thing.

524

00:38:07,000 --> 00:38:12,000

So unlike nuclear weapons, which do represent a big deterrent, if you were to talk about this, would it be a deterrent?

525

00:38:13,000 --> 00:38:14,000

No, if anything, it would just draw curiosity.

526

00:38:15,000 --> 00:38:24,000

So if it represented a game-changing capability, would you not tend to sit on it and hold it down tight?

527

00:38:25,000 --> 00:38:27,000

Yes, but I wouldn't be then flying it.

528

00:38:28,000 --> 00:38:30,000

You keep it secret, it's locked in a warehouse and nobody sees it.

529

00:38:31,000 --> 00:38:39,000

You do not fly that thing within inches of a fully combat-capable A6 over North Vietnam.

530

00:38:40,000 --> 00:38:44,000

If you're talking about whether this thing was some secret US weapons program, heck no.

531

00:38:45,000 --> 00:38:54,000

For now, the team can't definitively conclude that the UFOs reported during the Vietnam War match those seen in more recent conflicts.

532

00:38:55,000 --> 00:38:56,000

But one thing is certain.

533

00:38:56,000 --> 00:39:00,000

What you lived through, what you survived, what you did is amazing.

534

00:39:01,000 --> 00:39:03,000

It was a lot of sacrifice too, incredible.

535

00:39:04,000 --> 00:39:05,000

I mean, it's burdened into my memory.

536

00:39:06,000 --> 00:39:13,000

So too is their ongoing mission, the need to keep investigating the strange objects in the sky and determine what they might be.

537

00:39:15,000 --> 00:39:20,000

It took me a decade. I stayed in the shadows. I now know I wasn't alone.

538

00:39:20,000 --> 00:39:27,000

And I'm telling you guys, you're not alone either. The conversation's open and it's not going away.

539

00:39:28,000 --> 00:39:39,000

I don't think that calculus has changed since Vietnam, or frankly from World War II, or frankly from the 1900s, or frankly from the Civil War, or frankly from 2,000 years ago in Rome.

540

00:39:40,000 --> 00:39:43,000

And I think the time has come that we open our eyes and we finally address what the hell's going on.

541

00:39:44,000 --> 00:39:46,000

This season on Unidentified.

542

00:39:46,000 --> 00:39:51,000

The team scours the globe on covering UFO hotspots.

543

00:39:52,000 --> 00:39:55,000

Are they seeing the same thing in the skies that we are?

544

00:39:56,000 --> 00:39:59,000

Oscar Santamaria was given the order. They fit his in ours, shoot it down.

545

00:40:00,000 --> 00:40:02,000

And hunts for answers to the biggest UFO mysteries.

546

00:40:03,000 --> 00:40:07,000

It was a perfect black equilateral triangle.

547

00:40:08,000 --> 00:40:09,000

Shines back at you.

548

00:40:10,000 --> 00:40:11,000

Revealing never before seen videos.

549

00:40:12,000 --> 00:40:16,000

I saw this bright light and when I assumed I had to see this circular shape.

550

00:40:17,000 --> 00:40:18,000

Never before heard stories.

551

00:40:19,000 --> 00:40:22,000

They were there scoping out our capabilities.

552

00:40:23,000 --> 00:40:25,000

It's as if it's never left. It changed everything.

553

00:40:26,000 --> 00:40:29,000

And stunning revelations about the most famous UFO encounters.

554

00:40:30,000 --> 00:40:34,000

And out of nowhere, this object drops out from the sky at an incredible speed.

555

00:40:35,000 --> 00:40:36,000

Vea lovriente.

556

00:40:37,000 --> 00:40:38,000

What?

557

00:40:39,000 --> 00:40:40,000

That for me was a drop the mic moment.

558

00:40:41,000 --> 00:40:42,000

We were flying in our skies.

559

00:40:43,000 --> 00:40:48,000

They definitely weren't planes. They had different lights and just no rhyme or reason to where they were flying.

560

00:40:49,000 --> 00:40:54,000

Something was coming up underneath me. Unverifiable, unidentifiable, but undeniable.

561

00:40:55,000 --> 00:40:59,000

If one of these did hit one of our airplanes, it most likely would kill everybody on board.
