

1

00:00:00,000 --> 00:00:04,000

Where do UFOs come from?

2

00:00:04,000 --> 00:00:11,000

Do visitors to planet Earth travel vast distances to the only planet boasting intelligent life in this corner of space?

3

00:00:11,000 --> 00:00:15,000

Or do they originate much closer to home?

4

00:00:15,000 --> 00:00:25,000

There are other planets such as Mars with artifacts on them that are suggestive of civilizations that had been there for a long, long time.

5

00:00:25,000 --> 00:00:35,000

The solar system was born over four and a half billion years ago. Earth civilization is only 12,000 years old.

6

00:00:35,000 --> 00:00:41,000

How many others have emerged on different worlds since our planetary neighborhood first took shape?

7

00:00:41,000 --> 00:00:45,000

And if there were other civilizations, what happened to them?

8

00:00:45,000 --> 00:00:48,000

Did they fall victim to natural catastrophes?

9

00:00:48,000 --> 00:00:50,000

Or conquest?

10

00:00:50,000 --> 00:00:54,000

From derelict spacecraft to the face of Mars?

11

00:00:54,000 --> 00:01:03,000

Join us as we investigate the shocking secrets of alien civilizations in our solar system on unsealed alien files.

12

00:01:03,000 --> 00:01:06,000

A global effort has begun.

13

00:01:06,000 --> 00:01:14,000

Secret files hidden from the public for decades detailing every UFO account are now available to the public.

14

00:01:14,000 --> 00:01:19,000

We are about to uncover the truth behind these classified documents.

15

00:01:19,000 --> 00:01:22,000

Find out what the government doesn't want you to know.

16

00:01:22,000 --> 00:01:29,000

Unsealed alien files exposing the biggest secret on planet Earth.

17

00:01:49,000 --> 00:01:56,000

It sends a stunning series of photographs of a mysterious object in the Culper Belt, beyond Neptune.

18

00:01:56,000 --> 00:02:03,000

It's a strange hourglass shaped object in a long, lonely orbit around the distant sun.

19

00:02:03,000 --> 00:02:11,000

Careful analysis has revealed the object to be spinning through space perpendicular to its orbital plane, like an airplane propeller.

20

00:02:11,000 --> 00:02:20,000

The object's spinning motion bears a striking resemblance to existing models for rotating spacecraft, designed to generate artificial gravity,

21

00:02:20,000 --> 00:02:26,000

essential for survival on long journeys through deep space.

22

00:02:26,000 --> 00:02:36,000

The technology aspect of the extraterrestrial phenomenon is the crown jewels of the truth in Bargo.

23

00:02:36,000 --> 00:02:51,000

One can get all excited about where these ETs are from and what they're like, but in terms of the human race and what it means, the technology is the centerpiece.

24

00:02:51,000 --> 00:03:03,000

Is the Nante object in fact a UFO? And if it is an alien spacecraft, how many more might be lurking in the farthest reaches of our solar system?

25

00:03:03,000 --> 00:03:08,000

The space beyond Saturn is a vast, virtually unexplored region.

26

00:03:08,000 --> 00:03:17,000

The only craft to visit the two outer planets of Uranus and Neptune was Voyager 2, that flew by in the late 1980s.

27

00:03:17,000 --> 00:03:27,000

The spacecraft relayed images in unprecedented detail, but in the decades since, we have discovered there was much its cameras missed.

28

00:03:28,000 --> 00:03:33,000

Unsealed case file, Neptune's New Moon.

29

00:03:33,000 --> 00:03:37,000

July 1, 2013.

30

00:03:37,000 --> 00:03:49,000

A scientist with SETI, or the Search for Extraterrestrial Intelligence, announces the discovery of a new moon around the planet Neptune, one of 14 orbiting the planets.

31

00:03:49,000 --> 00:03:56,000

The tiny world, dubbed S2004N1, is only 11 miles in diameter.

32

00:03:56,000 --> 00:04:04,000

The moon was only located through an intense scrutiny of images generated years earlier by the Hubble Space Telescope.

33

00:04:04,000 --> 00:04:08,000

And according to some experts, it should not exist.

34

00:04:08,000 --> 00:04:22,000

They claim the tiny world should have been pulverized by asteroids during the Solar System's formation, or long ago fallen prey to the gravity of the nearby moon Proteus, and dragged down to its fiery destruction.

35

00:04:22,000 --> 00:04:31,000

The object's unlikely survival has led many UFO experts to conclude the moon is a spacecraft.

36

00:04:32,000 --> 00:04:38,000

But if Neptune's newest satellite is in fact a UFO, where does it come from?

37

00:04:40,000 --> 00:04:48,000

Recent evidence has revealed what may be alien spacecraft, active in the distant reaches of our solar system.

38

00:04:48,000 --> 00:04:58,000

The photos have left many wondering whether these spacecraft came here from another star system, or if they originated here in our own planetary neighborhood.

39

00:04:59,000 --> 00:05:11,000

August 16, 2012. A flying disk appears in the sky over the planet Mars. It hurdles toward the surface at great speed, but it isn't a UFO.

40

00:05:11,000 --> 00:05:24,000

It's the landing craft for NASA's Curiosity rover. Its mission? To travel the surface of Mars, and use its high-tech instruments to search the rocks and soil for signs of life.

41

00:05:24,000 --> 00:05:28,000

It's the latest in a series of missions searching for life.

42

00:05:30,000 --> 00:05:42,000

When they discovered that there was at one time, possibly water on the surface of Mars, that blew open the door of possibility for there being extraterrestrial life in our solar system, let alone the universe.

43

00:05:43,000 --> 00:05:47,000

Unsealed case file. The face of Mars.

44

00:05:48,000 --> 00:05:54,000

On June 19, 1976, Viking 1 enters orbit around the red planet.

45

00:05:54,000 --> 00:06:02,000

A day later, on July 20th, it releases the Viking lander, which makes the first touchdown on Mars.

46

00:06:02,000 --> 00:06:08,000

The lander's instruments conduct the first ever scientific analysis of the surface of another planet.

47

00:06:09,000 --> 00:06:17,000

The experiments add volumes to our knowledge of the solar system, but ultimately find no signs of life.

48

00:06:17,000 --> 00:06:22,000

High above the planet, however, a different story is unfolding.

49

00:06:22,000 --> 00:06:31,000

The Viking orbiter continues to circle the planet, relaying data from the lander back to Earth, and taking photos of the surface below.

50

00:06:32,000 --> 00:06:39,000

Five days after touchdown, it captures an image that will send shock waves around the world.

51

00:06:40,000 --> 00:06:46,000

One of the most well-known photographs from the surface of Mars is what we've all known in pop culture as the face on Mars.

52

00:06:46,000 --> 00:06:56,000

This is something that scientists estimate is about two miles across, and it really shows and depicts what is arguably a face.

53

00:06:56,000 --> 00:07:03,000

You can clearly see eyes, you can clearly see a nose, you can clearly see a mouth, and you can clearly see an outline of a face.

54

00:07:03,000 --> 00:07:15,000

Now, there's a lot of coincidences there if this wasn't artificial or manufactured, so you have to ask, was this just a trick of lights and shadows by the cameras, or was this really a manufactured structure?

55

00:07:16,000 --> 00:07:21,000

Most are prepared to pass off the phenomenon as a trick of the light.

56

00:07:21,000 --> 00:07:26,000

That is, until another shocking image appears in the Viking photos.

57

00:07:26,000 --> 00:07:37,000

It's a series of high points in the Martian landscape that bear an uncanny resemblance to the mightiest monuments of Earth's past, the pyramids of ancient Egypt.

58

00:07:39,000 --> 00:07:49,000

In the decades since Viking, many in the scientific community have embraced the theory that life here on Earth was sparked by the impact of a Martian meteor.

59

00:07:50,000 --> 00:07:55,000

Is it possible that meteor brought alien DNA to our planets?

60

00:07:55,000 --> 00:08:01,000

And could the pyramids be evidence of a genetic link with our Martian ancestors?

61

00:08:01,000 --> 00:08:05,000

Look at civilizations here on Earth stretching back thousands of years.

62

00:08:05,000 --> 00:08:11,000

You've got giant structures in the middle of Egypt, one of which just happens to be a very large face on the sphinx.

63

00:08:11,000 --> 00:08:17,000

You've got other structures from other cultures that are being built that you can only see from the sky.

64

00:08:17,000 --> 00:08:27,000

So when you look at those commonalities, you have to see maybe there's a connection between life 3,000, 4,000, 5,000 years ago here on Earth,

65

00:08:27,000 --> 00:08:31,000

and quite possibly a life starting on the planet of Mars.

66

00:08:32,000 --> 00:08:42,000

Recent missions have revealed the Red Planet once had a much thicker atmosphere and water on its surface, both essential to life as we understand it.

67

00:08:42,000 --> 00:08:55,000

The question is, what happened to Mars? Was it hit by a natural catastrophe? Or was it conquered? And if it was conquered, where are the victors?

68

00:08:56,000 --> 00:09:06,000

August 25, 2013. NASA releases a series of photos taken by the Curiosity rover, the latest generation of its Mars landers.

69

00:09:07,000 --> 00:09:16,000

Among them are two images taken by the vehicle's rear hazard detection camera that reveal what appear to be flying saucers.

70

00:09:20,000 --> 00:09:24,000

Are we the only civilization to ever appear in the solar system?

71

00:09:24,000 --> 00:09:31,000

Mounting evidence suggests there may have once been a thriving alien culture on the planet Mars.

72

00:09:32,000 --> 00:09:36,000

But is this the only place outside of Earth where intelligent life has taken root?

73

00:09:36,000 --> 00:09:43,000

Recent events suggest there may have been others, and in the most unlikely places imaginable.

74

00:09:44,000 --> 00:09:52,000

We are a young star, a young system. There are stars and systems out there that are billions of years older than us.

75

00:09:52,000 --> 00:09:56,000

So how much contact have we had?

76

00:09:57,000 --> 00:10:09,000

December 1, 2012. NASA's Stereo-A satellite captures stunning images of a massive burst of energy blasting out into space from the surface of the sun.

77

00:10:10,000 --> 00:10:19,000

In the days that follow, an amateur ufologist conducts a careful analysis of the photos and discovers something silhouetted by the blast.

78

00:10:20,000 --> 00:10:25,000

It's a strange rectangular shaped anomaly hovering in space near the planet Mercury.

79

00:10:26,000 --> 00:10:32,000

The object's outcroppings bear a striking resemblance to the solar panels found in our own satellites and space stations.

80

00:10:33,000 --> 00:10:36,000

But there are no known spacecraft in the area.

81

00:10:37,000 --> 00:10:45,000

The ufologist posts his findings on the internet, causing an instant sensation among alien enthusiasts and scientists alike.

82

00:10:45,000 --> 00:10:49,000

But this isn't the kind of attention NASA is looking for.

83

00:10:50,000 --> 00:10:59,000

The agency claims the mysterious craft to be in reality a solar filament, a naturally occurring jet of gas protruding from the sun.

84

00:11:00,000 --> 00:11:06,000

Despite this innocent explanation, the agency then abruptly shuts down Stereo's image feed.

85

00:11:07,000 --> 00:11:18,000

In a statement, NASA explains that Stereo has gone into an unexpected emergency sun reacquisition mode and that they were working on the recovery of the spacecraft.

86

00:11:19,000 --> 00:11:25,000

Why did NASA close the Stereo image feed a day after the Mercury UFO was revealed to the world?

87

00:11:26,000 --> 00:11:34,000

Were the agency's technical difficulties merely a coincidence? Or does NASA allegedly have something to hide?

88

00:11:35,000 --> 00:11:41,000

Like Neptune and Mars before, the answer may be found on the surface below.

89

00:11:42,000 --> 00:11:54,000

In October 2013, an amateur UFO investigator analyzing photos taken by NASA's messenger probe discovers a series of strange features that look like cities.

90

00:11:55,000 --> 00:12:01,000

Leading some experts to conclude, there was once a civilization on the closest planet to the sun.

91

00:12:01,000 --> 00:12:05,000

But could a society thrive in such a hostile environment?

92

00:12:06,000 --> 00:12:15,000

The answer to this and many other vital questions about our solar systems past may be found on the surface of Mercury's closest neighbor.

93

00:12:16,000 --> 00:12:19,000

Unsealed case file, Venus.

94

00:12:21,000 --> 00:12:25,000

Venus has confounded scientists for centuries.

95

00:12:25,000 --> 00:12:29,000

Apart from the moon, it is the brightest object in the night sky.

96

00:12:30,000 --> 00:12:35,000

But its atmosphere is shrouded in dense cloud, obscuring everything on the surface below.

97

00:12:36,000 --> 00:12:46,000

Generations of astronomers imagined what lay beneath those clouds and visioning massive, gleaming cities populated by a race of ethereal beings.

98

00:12:47,000 --> 00:12:53,000

The reality, however, would turn out to be much different than anyone ever imagined.

99

00:12:55,000 --> 00:13:05,000

Between 1967 and 1985, the Soviet Union lands a series of probes on the planet's surface in a program called Venera.

100

00:13:06,000 --> 00:13:19,000

They discover a true-to-life vision of hell, a desolate landscape littered with volcanoes and an upper atmosphere that generates endless rainfall of sulfuric acid.

101

00:13:20,000 --> 00:13:29,000

A crushing atmospheric pressure more than 90 times that of Earth ensures that none of the probes survive more than a few hours on the surface.

102

00:13:30,000 --> 00:13:34,000

But more recent studies suggest that Venus wasn't always like this.

103

00:13:35,000 --> 00:13:41,000

Billions of years ago, Venus was not unlike Earth, complete with large bodies of water.

104

00:13:41,000 --> 00:13:53,000

But long ago, the planet fell victim to a runaway greenhouse effect, not unlike that plaguing our world today, leaving Venus the desolate pressure cooker it is today.

105

00:13:54,000 --> 00:13:57,000

Legend, however, tells a different story.

106

00:13:58,000 --> 00:14:05,000

According to Greek and Roman mythology, the goddess Venus launched a sudden attack on Mars, the God of War,

107

00:14:05,000 --> 00:14:10,000

mortally wounding him in a battle of unprecedented scale.

108

00:14:11,000 --> 00:14:17,000

Ancient Roman records talk about eyewitnesses seeing a fire in the sky, which they later found to be the planet Mars.

109

00:14:18,000 --> 00:14:24,000

That planet Mars then became associated with their deity, Ares, the God of War.

110

00:14:25,000 --> 00:14:35,000

According to controversial author Immanuel Velikovsky, ancient observers describe a giant, serpent-like dust plume extending off Mars.

111

00:14:36,000 --> 00:14:40,000

Is it possible that these legends have a basis in reality?

112

00:14:41,000 --> 00:14:45,000

Did ancient astronomers pay witness to a distant interplanetary war?

113

00:14:46,000 --> 00:14:53,000

And while the myth says Mars alone was defeated, did Venus also suffer a mortal blow in the course of battle?

114

00:14:54,000 --> 00:14:59,000

Or was it one whose devastating effect played out quietly over a much longer period of time?

115

00:15:02,000 --> 00:15:08,000

In 1989, NASA launches the Magellan probe to map the Venusian landscape.

116

00:15:09,000 --> 00:15:16,000

Over the past two decades, UFO experts have discovered compelling evidence of structures on the planet's surface.

117

00:15:17,000 --> 00:15:20,000

Are these the ruins of ancient Venus?

118

00:15:20,000 --> 00:15:26,000

Was this planet once home to a race of aliens who launched an interplanetary war against Mars?

119

00:15:27,000 --> 00:15:31,000

And if it was, what happened to their civilization?

120

00:15:33,000 --> 00:15:40,000

Mounting evidence suggests that ancient civilizations existed on at least four other worlds in our solar system.

121

00:15:41,000 --> 00:15:48,000

It's a revelation that has left many experts searching for an answer to what may be the greatest question of our time.

122

00:15:48,000 --> 00:15:52,000

What caused each of them to fall into ruin?

123

00:15:53,000 --> 00:15:55,000

There are many possible scenarios.

124

00:15:56,000 --> 00:16:05,000

They may have fallen victim to natural catastrophe or destroyed themselves in a catastrophic war like the legendary battle between Venus and Mars.

125

00:16:08,000 --> 00:16:14,000

But some experts have a different theory, one that strikes at the heart of our world today.

126

00:16:14,000 --> 00:16:30,000

It appears that every time there's this major leap in technology, that somehow, somewhere, there's a reported alien encounter looking in the background.

127

00:16:31,000 --> 00:16:41,000

They believe every civilization accelerates toward a period of unprecedented technological advancements, culminating with the creation of artificial intelligence.

128

00:16:42,000 --> 00:16:52,000

Could an alien species, reliant or infected by a destructive artificial intelligence, view the human race as inferior?

129

00:16:53,000 --> 00:16:58,000

All you have to do is walk down the street and you can see how dependent the human race has become on technology.

130

00:16:59,000 --> 00:17:05,000

Each of us has one of our cell phones glued to our hip. We're either on it, texting with it, or taking photos with it.

131

00:17:05,000 --> 00:17:11,000

There are cameras on every street corner. It's safe to say that technology is a huge part of the human race.

132

00:17:12,000 --> 00:17:22,000

Digital based logic may inevitably lead an out of control artificial intelligence to see their creators as a threat to their continued existence.

133

00:17:23,000 --> 00:17:29,000

The machines may see no other choice but to eliminate them by any means at their disposal.

134

00:17:30,000 --> 00:17:35,000

Is it possible this catastrophe has already happened on other worlds?

135

00:17:36,000 --> 00:17:42,000

Did an alien civilization on a neighboring planet fall prey to its own technology?

136

00:17:43,000 --> 00:17:52,000

And is a robot fleet lying in wait somewhere in the distant reaches of the solar system ready to lay waste to Earth when the time is right?

137

00:17:52,000 --> 00:17:59,000

Or have they already planted the technological seeds of our doom?

138

00:18:00,000 --> 00:18:04,000

Secretly giving birth to the digital age.

139

00:18:08,000 --> 00:18:15,000

This is Unsealed Alien Files, exposing the biggest secret on planet Earth.

140

00:18:22,000 --> 00:18:27,000

Unsealed Alien Files
