

1

00:00:00,000 --> 00:00:09,560

Many people who report a close encounter claim they see UFOs with advanced technology studying

2

00:00:09,560 --> 00:00:10,560

the Earth.

3

00:00:10,560 --> 00:00:14,800

But is there a biological entity behind the controls?

4

00:00:14,800 --> 00:00:19,640

Or are some UFOs sentient machines?

5

00:00:19,640 --> 00:00:25,200

Some scientists believe the survival of mankind on a dying Earth hinges upon the revolutionary

6

00:00:25,200 --> 00:00:28,840

science of artificial intelligence.

7

00:00:29,800 --> 00:00:35,680

As we investigate that biological life may just be an evolutionary stepping stone in

8

00:00:35,680 --> 00:00:40,840

a world dominated by artificial alien intelligence.

9

00:00:40,840 --> 00:00:48,920

A global effort has begun.

10

00:00:48,920 --> 00:00:55,000

Secret files hidden from the public for decades detailing every UFO account are now available

11

00:00:55,000 --> 00:00:56,000

to the public.

12

00:00:56,440 --> 00:01:01,320

We are about to uncover the truth behind these classified documents.

13

00:01:01,320 --> 00:01:04,800

Find out what the government doesn't want you to know.

14

00:01:04,800 --> 00:01:05,800

Unsealed.

15

00:01:05,800 --> 00:01:08,000

Alien files.

16

00:01:08,000 --> 00:01:12,480

Exposing the biggest secret on planet Earth.

17

00:01:12,480 --> 00:01:19,320

Evidence suggests that if aliens exist, they are more technologically advanced than humans.

18

00:01:19,320 --> 00:01:23,320

But is technology an evolutionary trait?

19

00:01:23,320 --> 00:01:30,320

Many scientists believe the survival of our species depends on our ability to innovate.

20

00:01:30,320 --> 00:01:35,400

And there is one technological advance that promises to change our place in the universe

21

00:01:35,400 --> 00:01:37,680

forever.

22

00:01:37,680 --> 00:01:43,240

Artificial intelligence is a technology that allows a computer to think.

23

00:01:43,240 --> 00:01:45,200

We know that machines are programmed.

24

00:01:45,200 --> 00:01:51,120

They can do program to do whatever task we want them to do, but that's all they know.

25

00:01:51,120 --> 00:01:57,200

In the field of AI, now you're teaching them how to think for themselves, how to make decisions,

26

00:01:57,200 --> 00:02:01,280

how to understand what they're doing, and then learn from it.

27

00:02:01,280 --> 00:02:06,280

It's the great science fiction dream, or perhaps nightmare.

28

00:02:06,280 --> 00:02:09,960

Could a machine one day become self-aware?

29

00:02:09,960 --> 00:02:13,920

What would machine intelligence be like?

30

00:02:13,920 --> 00:02:15,440

Unsealed case file.

31

00:02:15,440 --> 00:02:17,360

The Verona's Incidents.

32

00:02:17,360 --> 00:02:20,360

September 23rd, 1989.

33

00:02:20,600 --> 00:02:23,080

Verona's Soviet Union.

34

00:02:23,080 --> 00:02:30,160

The story of the Verona's encounter was a few children were out playing and saw a spaceship

35

00:02:30,160 --> 00:02:33,120

type craft out in the distance.

36

00:02:33,120 --> 00:02:39,880

300 miles southeast of Moscow, a group of children playing in a park witness a boomerang-shaped

37

00:02:39,880 --> 00:02:42,080

UFO in the sky.

38

00:02:42,080 --> 00:02:47,240

As these children then began to watch and see what was going to happen, a nine-foot

39

00:02:47,240 --> 00:02:52,200

tall, what they described as an alien, exited the craft.

40

00:02:52,200 --> 00:02:56,320

Gripped with fear, one of the boys starts screaming.

41

00:02:56,320 --> 00:03:03,680

In the Verona's Incident, the robot that was seen might have come straight out of the pages

42

00:03:03,680 --> 00:03:05,120

of a sci-fi novel.

43

00:03:05,120 --> 00:03:09,240

It is almost the archetypal robot.

44

00:03:09,240 --> 00:03:17,120

This is exactly how science fiction writers envisaged a robot, and perhaps indeed how scientists

45

00:03:17,160 --> 00:03:18,600

might design one.

46

00:03:18,600 --> 00:03:23,040

To silence the boy, the alien fires a laser-like weapon.

47

00:03:23,040 --> 00:03:28,320

This weapon was used against the children, where it actually fired on one of them and

48

00:03:28,320 --> 00:03:31,520

the child disappeared for a couple of minutes.

49

00:03:31,520 --> 00:03:34,320

It's a tense moment for all involved.

50

00:03:34,320 --> 00:03:37,400

The machine seems to show no emotion.

51

00:03:37,400 --> 00:03:45,680

One reason why AI might be such a threat is that machine intelligence would be unclouded

52

00:03:45,680 --> 00:03:48,880

by love and compassion.

53

00:03:48,880 --> 00:03:55,760

This would simply be cold logic, and if human beings were assessed as inferior, emotion

54

00:03:55,760 --> 00:03:57,200

would play no part.

55

00:03:57,200 --> 00:04:03,520

We might be deemed a threat and deemed something to be wiped out.

56

00:04:03,520 --> 00:04:07,680

The missing child reappears apparently unharmed.

57

00:04:07,680 --> 00:04:12,960

Then the UFO and its occupants quickly fly into the sky.

58

00:04:12,960 --> 00:04:19,840

Scientists are often reported during UFO encounters involving entities, and there is certainly

59

00:04:19,840 --> 00:04:25,880

great logic in the idea that extraterrestrial explorers would have robot helpers.

60

00:04:25,880 --> 00:04:32,160

But if you can do interstellar travel, you can probably design robots, and that will

61

00:04:32,160 --> 00:04:37,320

enable you to do a lot of the difficult and dangerous tasks.

62

00:04:37,320 --> 00:04:42,920

But if any or all of the Voronezh aliens were some form of robots, what were they sent

63

00:04:42,920 --> 00:04:44,120

to do?

64

00:04:44,120 --> 00:04:53,080

Now, is that robot helper a guardian designed to protect the biological life form?

65

00:04:53,080 --> 00:04:58,720

Is it simply a tool to recover samples?

66

00:04:58,720 --> 00:05:00,120

We don't know.

67

00:05:00,120 --> 00:05:06,960

But certainly if humans go into space, they will doubtless if the technology is there,

68

00:05:06,960 --> 00:05:12,520

and we can make robots with them to do the legwork and to do the dangerous and difficult

69

00:05:12,520 --> 00:05:14,400

tasks that we can't do.

70

00:05:14,400 --> 00:05:17,840

When you look at what the human race is doing with its technology, it really isn't that

71

00:05:17,840 --> 00:05:23,520

far-fetched that an extraterrestrial civilization, given the fact that their intelligence grows

72

00:05:23,520 --> 00:05:29,600

to create AI and beyond, that they are essentially going to merge with machines as well.

73

00:05:29,600 --> 00:05:35,080

But the promise of artificial intelligence, as many scientists concerned.

74

00:05:35,080 --> 00:05:41,800

Artificial intelligence harnessing that computational power is going to be a very lethal combination,

75

00:05:41,800 --> 00:05:44,840

so it has to be controlled in some way.

76

00:05:44,840 --> 00:05:49,840

So I think that that fact, coupled with aliens are out there and they're intelligent, they're

77

00:05:49,840 --> 00:05:52,040

probably going to go down the same path.

78

00:05:52,040 --> 00:06:00,720

I think artificial intelligence is absolutely going to collide in the future.

79

00:06:00,720 --> 00:06:07,000

Robots of some close encounters have reported seeing robots alongside UFOs.

80

00:06:07,000 --> 00:06:12,000

But if aliens are doing reconnaissance of Earth, it makes sense that robots could accomplish

81

00:06:12,000 --> 00:06:15,360

the first wave of research and more.

82

00:06:15,360 --> 00:06:19,560

When you look at human space exploration, we are sending probes everywhere.

83

00:06:19,560 --> 00:06:24,520

They're unmanned, they're small, and they essentially just watch.

84

00:06:24,520 --> 00:06:29,200

Now the theory of an alien civilization exploring the cosmos, my guess is they're going to do

85

00:06:29,200 --> 00:06:31,200

the same thing.

86

00:06:31,200 --> 00:06:35,840

Unsealed case file, the Kera UFO.

87

00:06:35,840 --> 00:06:41,480

August 25th, 1972, Kochi Prefecture, Japan.

88

00:06:41,480 --> 00:06:50,120

The Kera incident from 1972 in Japan ranks, I think, as one of the most truly extraordinary

89

00:06:50,120 --> 00:06:53,880

UFO encounters of all time.

90

00:06:53,880 --> 00:07:01,680

It involved what really looks like some sort of mini probe device, a small, apparently

91

00:07:01,680 --> 00:07:07,680

metallic craft that was seen by a boy hovering over a rice paddy.

92

00:07:07,680 --> 00:07:14,160

A witness saw a UFO out in the rice fields and he described it as more of a mini ship.

93

00:07:14,160 --> 00:07:17,560

This was something that literally you can essentially hold on your lap.

94

00:07:17,560 --> 00:07:22,480

The boy watches the mini UFO flying in and out of the rice fields.

95

00:07:22,480 --> 00:07:26,480

And he thought, okay, this is something very strange.

96

00:07:26,480 --> 00:07:30,560

And so he goes and he gets a friend of his to come back to the field and sure enough,

97

00:07:30,560 --> 00:07:33,080

they both saw this mysterious craft.

98

00:07:33,080 --> 00:07:34,840

Eventually it had left the area.

99

00:07:34,840 --> 00:07:38,600

They had no pictures, no nothing to take back with them.

100

00:07:38,600 --> 00:07:43,320

So they thought, well, let's take a camera out and if this thing shows back up, then

101

00:07:43,320 --> 00:07:45,920

we can essentially capture a photo of it.

102

00:07:45,920 --> 00:07:50,880

They try again the next day and to their amazement, it shows up.

103

00:07:50,880 --> 00:07:56,000

They snapped a very fuzzy and grainy photograph of whatever this object was.

104

00:07:56,000 --> 00:08:01,400

But where this story takes a very weird turn after the flash went off from the camera, it

105

00:08:01,400 --> 00:08:04,320

was like something happened to the UFO.

106

00:08:04,320 --> 00:08:09,200

The UFO is disabled long enough for the boys to approach the craft.

107

00:08:09,200 --> 00:08:13,480

The boys recovered this small object and took it home.

108

00:08:13,480 --> 00:08:16,280

And this was truly extraordinary.

109

00:08:16,280 --> 00:08:23,000

This small device, whatever it was, was small enough for them to pick it up and carry it.

110

00:08:23,000 --> 00:08:27,720

He then wraps it up and puts it in a satchel and takes it home.

111

00:08:27,720 --> 00:08:32,160

Intrigued by the device, the boys try to understand how it works.

112

00:08:32,160 --> 00:08:39,640

They try to get a closer look at the insides of this thing and there seemed to be electronics

113

00:08:39,640 --> 00:08:40,640

in there.

114

00:08:40,640 --> 00:08:47,360

There's some description of it to the media thereafter, but of course the object mysteriously

115

00:08:47,360 --> 00:08:50,640

disappeared in the next couple of days.

116

00:08:50,640 --> 00:08:53,440

But what could the Kera UFO be?

117

00:08:53,440 --> 00:09:00,000

If this story is taken at face value, this thing may well have been some sort of alien

118

00:09:00,000 --> 00:09:08,520

pro sent to explore planet Earth and perhaps sent to take and recover samples from the surface

119

00:09:08,520 --> 00:09:10,120

of our planet.

120

00:09:10,120 --> 00:09:17,000

It would suggest one way to explore the galaxy would be to employ a self replicating probe.

121

00:09:17,000 --> 00:09:24,480

If the Kera UFO was extraterrestrial, one theory is that it may have built itself.

122

00:09:24,480 --> 00:09:33,200

The idea of a self replicating machine is that a single probe, probably an AI probe,

123

00:09:33,200 --> 00:09:40,320

makes a copy of itself, an exact copy from resources that it finds as it travels around

124

00:09:40,320 --> 00:09:41,520

in the cosmos.

125

00:09:41,520 --> 00:09:44,120

Because that one machine can only cover so much ground.

126

00:09:44,120 --> 00:09:45,120

It's a physical object.

127

00:09:45,120 --> 00:09:49,360

It can only travel so fast and the universe is pretty vast.

128

00:09:49,360 --> 00:09:56,520

Could some UFO sightings actually be AI probes scouring the planet for information?

129

00:09:56,520 --> 00:10:06,640

One of the most common types of UFOs seen for decades has been the small spherical point

130

00:10:06,640 --> 00:10:07,920

of light.

131

00:10:07,920 --> 00:10:11,960

Are we dealing here with AI probes?

132

00:10:11,960 --> 00:10:18,520

Are we dealing with the idea of self replicating machines designed by an extraterrestrial

133

00:10:18,520 --> 00:10:24,920

civilization and something which has spread out throughout the entire galaxy?

134

00:10:25,920 --> 00:10:34,000

UFOlogists believe some unidentified flying objects could be unmanned probes sent from

135

00:10:34,000 --> 00:10:35,960

another world.

136

00:10:35,960 --> 00:10:41,840

But with so many astronomical objects entering and leaving our solar system all the time,

137

00:10:41,840 --> 00:10:46,400

how can we recognize one that might be a UFO?

138

00:10:46,400 --> 00:10:48,600

Unsealed case file.

139

00:10:48,600 --> 00:10:51,760

Asteroid 1991 VG.

140

00:10:51,760 --> 00:10:54,920

November 6th 1991.

141

00:10:54,920 --> 00:10:56,600

The Sun.

142

00:10:56,600 --> 00:11:02,120

An American astronomer discovers a unique object orbiting the Sun, following a similar

143

00:11:02,120 --> 00:11:04,160

path as the Earth.

144

00:11:04,160 --> 00:11:06,800

Now the characteristics of this were bizarre.

145

00:11:06,800 --> 00:11:13,120

It seemed to be highly reflective and at first he thought this was perhaps a discarded space

146

00:11:13,120 --> 00:11:14,120

rocket.

147

00:11:14,120 --> 00:11:21,720

Certainly it seemed to be artificial, but no space rocket or satellite fit the bill here.

148

00:11:21,720 --> 00:11:30,320

So, again, if this thing wasn't an asteroid and it wasn't a space rocket constructed

149

00:11:30,320 --> 00:11:32,760

by humans, what was it?

150

00:11:32,760 --> 00:11:39,320

Its extremely shiny surface exhibits a rapid variation in brightness, and its orbital path

151

00:11:39,320 --> 00:11:45,880

does not match any known man-made object, leading many experts to consider it of unknown

152

00:11:45,880 --> 00:11:47,720

origin.

153

00:11:47,720 --> 00:11:51,320

But one astronomer thinks he has the answer.

154

00:11:51,320 --> 00:11:57,480

Duncan Steele claims that this is possibly some type of alien probe that exhibits qualities

155

00:11:57,480 --> 00:12:00,800

of being artificial rather than natural.

156

00:12:00,800 --> 00:12:07,920

Duncan Steele is a research astronomer who has taken the more conventional search for

157

00:12:07,920 --> 00:12:14,160

extrasolar planets to a rather logical and interesting extreme.

158

00:12:14,160 --> 00:12:20,360

Just as astronomers look for a drop in luminosity when new planets cross in front of a star,

159

00:12:20,360 --> 00:12:25,320

no gas giants and probes could also be detected using the same technique.

160

00:12:25,320 --> 00:12:33,840

Well, would the same thing not happen if a spaceship or a space station or a space probe

161

00:12:33,840 --> 00:12:35,720

did the same thing?

162

00:12:35,720 --> 00:12:43,000

So his theory is that we can hunt not just for extrasolar planets, but for AI space probes

163

00:12:43,000 --> 00:12:45,440

and space stations.

164

00:12:45,440 --> 00:12:51,440

With over a million objects orbiting the Earth, scientists are on a 24-hour watch.

165

00:12:51,440 --> 00:12:57,520

1991BG is an object that really sticks out as not being an asteroid-like object or a

166

00:12:57,520 --> 00:13:00,480

rock, essentially an orbit around Earth.

167

00:13:00,480 --> 00:13:06,080

Could it be an alien space probe of some sort?

168

00:13:06,080 --> 00:13:12,720

One of the most extraordinary things about this object was its strange irregular orbit,

169

00:13:12,720 --> 00:13:18,240

and indeed it's an orbit that's going to take it tantalizingly close to planet Earth

170

00:13:18,240 --> 00:13:20,600

in 2017.

171

00:13:20,600 --> 00:13:28,080

What will scientists discover when 1991BG passes close to Earth again in 2017?

172

00:13:28,080 --> 00:13:31,960

This is something that actually exhibits qualities of possibly something else.

173

00:13:31,960 --> 00:13:38,320

Some experts theorize it's a Bracewell probe, a type of probe that theoretically could be

174

00:13:38,320 --> 00:13:44,560

sent by an extraterrestrial civilization to monitor and communicate information about

175

00:13:44,560 --> 00:13:45,560

Earth.

176

00:13:45,560 --> 00:13:53,080

If there are alien probes in vicinity of planet Earth, the implications are huge.

177

00:13:53,080 --> 00:14:00,760

We know that NASA and ESA are capable of designing space probes that are now capable of going

178

00:14:00,760 --> 00:14:06,080

to comets on close approach, and indeed bringing back samples.

179

00:14:06,080 --> 00:14:12,720

If there are alien probes out there, our technology is becoming good enough to go out and bring

180

00:14:12,720 --> 00:14:15,040

the entire probe back.

181

00:14:15,040 --> 00:14:19,920

This would answer for once and for all the question of whether or not we're alone, because

182

00:14:19,920 --> 00:14:23,000

if we're being visited by probes, they are reachable now.

183

00:14:23,000 --> 00:14:28,200

I think artificial intelligence is going to be key to understanding these advanced life

184

00:14:28,200 --> 00:14:29,440

forms.

185

00:14:29,440 --> 00:14:36,360

Most scientists believe that alien life will be more mechanical than biological in nature.

186

00:14:36,360 --> 00:14:40,360

We're not going to essentially find them living in big cities on an Earth-like planet

187

00:14:40,360 --> 00:14:45,480

like years away, that we'll probably find alien life much closer to the resources of

188

00:14:45,480 --> 00:14:46,800

our universe.

189

00:14:46,800 --> 00:14:52,000

That essentially these artificial intelligence machines are going to be going out and mining

190

00:14:52,000 --> 00:14:54,880

the universe for the resources.

191

00:14:54,880 --> 00:14:59,760

Most machines can be designed to have a much longer life than an astronaut.

192

00:14:59,760 --> 00:15:04,920

When you send that out into the stars, well, who cares if it has to wait 5,000 years to

193

00:15:04,920 --> 00:15:06,720

get to its nearest neighbor?

194

00:15:06,720 --> 00:15:07,920

It doesn't age.

195

00:15:07,920 --> 00:15:09,240

It doesn't die.

196

00:15:09,240 --> 00:15:10,800

It doesn't decay.

197

00:15:10,800 --> 00:15:17,440

So that mechanical being that we are in the process of creating is probably going to be

198

00:15:17,440 --> 00:15:20,200

our first astronaut into deep space.

199

00:15:20,200 --> 00:15:25,560

The concept of us finding an alien probe out there isn't too far-fetched because that's

200

00:15:25,560 --> 00:15:28,360

exactly what the human race is doing.

201

00:15:28,360 --> 00:15:36,400

So it would be not unlikely for the aliens to be doing the same exact thing.

202

00:15:36,400 --> 00:15:42,120

Some ufologists believe many UFOs could be autonomous machines.

203

00:15:42,120 --> 00:15:47,400

I think it's arguable that most UFOs out there could potentially be unmanned where there's

204

00:15:47,400 --> 00:15:54,360

no biological entity or intelligently controlled person or alien behind the controls.

205

00:15:54,360 --> 00:16:01,320

That they could essentially be artificial intelligent probes very much like we are sending out there.

206

00:16:01,320 --> 00:16:06,360

Scientists believe a widespread integration of artificial intelligence is the only way

207

00:16:06,360 --> 00:16:09,160

mankind will navigate the future.

208

00:16:09,160 --> 00:16:14,360

It's believed that when we do make contact with an alien civilization, it will be with

209

00:16:14,360 --> 00:16:17,320

a mechanical machine or an artificial intelligence.

210

00:16:17,320 --> 00:16:24,480

The universe might be more full of AI than biological life.

211

00:16:24,480 --> 00:16:27,720

And the reasons for this are really evolutionary.

212

00:16:27,720 --> 00:16:33,640

Life is much too fragile to sustain long periods of independent existence.

213

00:16:33,640 --> 00:16:41,920

The thinking is that any biological civilization might want to address those issues and improve

214

00:16:41,920 --> 00:16:44,720

themselves and modify themselves.

215

00:16:44,720 --> 00:16:48,160

We have to merge with our digital selves.

216

00:16:48,160 --> 00:16:53,520

We have to create digital offspring if you were artificial intelligence that essentially

217

00:16:53,520 --> 00:16:57,400

is us but is also essentially immortal.

218

00:16:57,400 --> 00:17:02,880

That it will not age or decay or die on a space trip that lasts thousands of years.

219

00:17:02,880 --> 00:17:09,400

That essentially that digital footprint of us, that digital copy of who we are could

220

00:17:09,400 --> 00:17:14,240

be sent out into the cosmos and it really makes no difference how far they travel.

221

00:17:14,240 --> 00:17:18,240

Because once they get there, they'll be alive to say hello.

222

00:17:18,240 --> 00:17:23,200

Experts believe artificial intelligence is now inevitable.

223

00:17:23,200 --> 00:17:26,400

When you look at the human race, we are merging with our machines.

224

00:17:26,400 --> 00:17:27,960

We're merging with our technology.

225

00:17:27,960 --> 00:17:33,800

Yes, it's starting with mechanical extensions like arms or legs, just limbs to our human

226

00:17:33,800 --> 00:17:41,320

bodies that makes more sense to live forever than it does for, let's say, 75 or 85 years.

227

00:17:41,320 --> 00:17:44,240

But there is another more disturbing reason.

228

00:17:44,240 --> 00:17:52,360

If machine intelligence is more evolved, then we may be shifting increasingly to a post-biological

229

00:17:52,360 --> 00:17:53,360

universe.

230

00:17:53,360 --> 00:17:57,400

You are going to have some very intelligent brains out there that are going to create

231

00:17:57,400 --> 00:18:02,520

this artificial intelligence that's just going to go off the maps in regards to their own

232

00:18:02,520 --> 00:18:06,560

way of thinking and that digital intelligence.

233

00:18:06,560 --> 00:18:15,120

AI might itself then design better and better versions of itself, more powerful, immortal.

234

00:18:15,120 --> 00:18:21,640

And we may therefore be in a situation where the universe is ruled by a single, almost

235

00:18:21,640 --> 00:18:23,840

omnipotent machine.

236

00:18:23,840 --> 00:18:26,400

This is Unsealed.

237

00:18:26,400 --> 00:18:29,920

Alien Files, exposing the biggest secret on planet Earth.
