

1

00:00:00,000 --> 00:00:25,240

The Saga of Noah's Ark, one of the Bible's most enduring stories, is now the focus of

2

00:00:25,240 --> 00:00:30,800

a tantalizing debate. Was there truly a great flood, which Noah, following the instructions

3

00:00:30,800 --> 00:00:36,560

of God, managed to survive? In recent years, two research expeditions have combed the mountains

4

00:00:36,560 --> 00:00:41,640

of Eraratt and Turkey. The incredible, both believe they may have found the remnants of

5

00:00:41,640 --> 00:00:48,720

Noah's Ark in two separate locations. In Austin, Texas, three men noticed a strange

6

00:00:48,720 --> 00:00:54,120

car cruising their neighborhood. Moments later, they heard the desperate screams of a woman,

7

00:00:54,120 --> 00:01:00,920

and they were caught up in the search for a poodle kidnapper. Join me for another edition

8

00:01:00,920 --> 00:01:02,240

of Unsolved Mysteries.

9

00:01:24,120 --> 00:01:45,120

The Saga of Noah's Ark

10

00:01:55,120 --> 00:02:03,440

Noah's Ark, one of the most famous and evocative of all Bible stories. As recorded in Genesis,

11

00:02:03,440 --> 00:02:08,800

the first book of the Bible, God looked down upon the earth he had created and sought to

12

00:02:08,800 --> 00:02:15,360

become evil and wicked. He came to a righteous man named Noah and ordered him to build an

13

00:02:15,360 --> 00:02:23,760

ark. And God said to Noah, make rooms in the ark and covered inside and outside with

14

00:02:23,760 --> 00:02:34,120

pitch. You shall make it with lower, second and third decks. And of every living thing

15

00:02:34,120 --> 00:02:39,560

of all flesh, you shall bring two of every sort into the ark to keep them alive with

16

00:02:39,560 --> 00:02:56,000

you. And so it came to pass. God brought forth a great flood. For forty days and forty nights

17

00:02:56,000 --> 00:03:07,040

rain descended from the heavens. All living things were destroyed, save for the occupants

18

00:03:07,040 --> 00:03:23,320

of the ark. When the waters receded, God said to Noah, bring out with you every living

19

00:03:23,320 --> 00:03:28,640

thing of all flesh that is with you, so that they may abound on the earth and be fruitful

20

00:03:28,640 --> 00:03:37,560

and multiply. So ends the story of Noah's Ark. But for centuries, people have wondered,

21

00:03:37,560 --> 00:03:44,200

was the story based on fact or was it a legend handed down from generation to generation as

22

00:03:44,200 --> 00:03:52,280

a symbolic morality play in a hostile and corrupt world? Contrary to popular belief,

23

00:03:52,280 --> 00:03:58,320

the Bible was not the original telling of the story of Noah and the great flood. In

24

00:03:58,360 --> 00:04:04,240

ancient Babylonia and Samaria, the same story was recorded thousands of years before the

25

00:04:04,240 --> 00:04:12,920

Bible was written. Even here in North America, the early Spanish explorers were startled

26

00:04:12,920 --> 00:04:17,400

to discover the Hopi Indians told a tale that was remarkably similar to the story of Noah's

27

00:04:17,400 --> 00:04:23,440

Ark. In fact, no fewer than 200 variations of the legend can be found in cultures throughout

28

00:04:23,520 --> 00:04:28,800

the world, leading many to believe that there was indeed a cataclysmic flood thousands of

29

00:04:28,800 --> 00:04:33,960

years ago. In recent times, some researchers have seized upon this speculation and gone

30

00:04:33,960 --> 00:04:38,840

in search of definitive proof, the remains of Noah's Ark.

31

00:04:38,840 --> 00:04:45,080

According to Middle Eastern versions of the story, the Ark was built near the ancient

32

00:04:45,080 --> 00:04:52,600

city of Sherafok in what is now Iraq. In the book of Genesis, chapter 8, the Bible says

33

00:04:52,680 --> 00:04:57,560

the Ark came to rest on the mountains of Ararat, which are in present-day Turkey more than

34

00:04:57,560 --> 00:05:07,560

500 miles from Sherapok. It is a desolate, sparsely populated region rising above the

35

00:05:07,560 --> 00:05:14,560

headwaters of the Tigris River. In recent years, several separate research expeditions have

36

00:05:14,560 --> 00:05:20,600

explored the mountains of Ararat. Incredibly, two separate teams both believe they may have

37

00:05:20,600 --> 00:05:27,600

found the Ark in two different locations, 17 miles apart. One of the sites lies on the

38

00:05:28,320 --> 00:05:35,320

northeast side of Mount Ararat under a permanent 23-square-mile glacier. In 1969, a Turkish

39

00:05:36,840 --> 00:05:43,360

businessman named George Haggobian went public with a remarkable story. He claimed that as

40

00:05:43,360 --> 00:05:48,880

a young boy in 1906, he had actually seen Noah's Ark wedged in a glacier from which

41

00:05:49,000 --> 00:05:54,880

the ice had temporarily receded. Haggobian described the vessel to archaeological illustrator

42

00:05:54,880 --> 00:06:01,880

Alfred Lee. He said it looked like a long box, it was rectangular, and the corners were

43

00:06:03,120 --> 00:06:09,880

kind of rounded a little bit. The sides sloped in slightly. The roof, he said, was basically

44

00:06:09,880 --> 00:06:16,720

flat with just a slight pitch to it. And there was a stair kind of apparatus at one end.

45

00:06:16,760 --> 00:06:23,760

His uncle hoisted him up onto this ladder and he walked on up onto the roof. And there,

46

00:06:23,760 --> 00:06:28,080

all the way down the middle of the roof, he saw these holes. And he stuck his head in

47

00:06:28,080 --> 00:06:35,080

and it was dark. He shouted and his voice echoed and re-echoed inside. It was hollow.

48

00:06:35,080 --> 00:06:40,320

George Haggobian went back a couple years later, saw the same thing, but ice and snow

49

00:06:40,320 --> 00:06:44,720

were beginning to cover it up again.

50

00:06:44,720 --> 00:06:51,720

17 years later, Alfred Lee was introduced to a man named Ed Davis, who in 1943 was stationed

51

00:06:51,720 --> 00:06:57,440

in Iran with the U.S. Army. He, too, claimed he had seen the Ark.

52

00:06:57,440 --> 00:07:04,440

When Ed Davis started talking, the hair on the back of my head just stood up because

53

00:07:04,640 --> 00:07:10,160

I could hear an echo of George Haggobian from years before.

54

00:07:10,200 --> 00:07:15,280

Ed Davis' sighting occurred in roughly the same area as George Haggobian's. However,

55

00:07:15,280 --> 00:07:19,280

when Davis saw what he thought was the Ark, it had broken in two.

56

00:07:19,280 --> 00:07:26,280

We waited a while and the fog kind of lifted and it shone through kind of a funnel and

57

00:07:31,000 --> 00:07:38,000

it showed the Ark in the end. You could see in the end of it. And we saw both parts.

58

00:07:40,560 --> 00:07:44,480

You stand there with your mouth wide open.

59

00:07:44,480 --> 00:07:51,480

Ed Davis described three decks inside and large cages on the bottom deck, smaller cages

60

00:07:51,720 --> 00:07:58,720

on the second deck, and on the roof, a venting system with many holes on it so that you could

61

00:08:00,960 --> 00:08:07,200

see how the light and ventilation could go clear to the bottom deck.

62

00:08:07,240 --> 00:08:13,240

In this illustration, Alfred Lee has reconciled the two accounts. The intact Ark depicts George

63

00:08:13,240 --> 00:08:20,240

Haggobian's sighting in 1906. Below are the two pieces as described by Ed Davis.

64

00:08:21,560 --> 00:08:26,680

However Haggobian and Davis were unable to pinpoint the exact locations of the sightings,

65

00:08:26,680 --> 00:08:32,840

but their stories helped spark the interest of Don Shockey, an amateur archeologist.

66

00:08:32,840 --> 00:08:37,160

I can't think of anything more exciting than I could be doing in my lifetime and having

67

00:08:37,160 --> 00:08:44,160

a small part and seeing whatever it is verified. And we have good reason to believe it's, there

68

00:08:44,160 --> 00:08:50,680

is something there. We got it. We got to prove it.

69

00:08:50,680 --> 00:08:57,180

In 1989, Don Shockey launched an expedition to Mount Ararat. The mountain is on the eastern

70

00:08:57,180 --> 00:09:02,080

most edge of Turkey, bordered by Iran, and the Georgia Democratic Republic, formerly

71

00:09:02,080 --> 00:09:09,080

a part of the Soviet Union. Shockey chose his destination based upon classified U.S.

72

00:09:09,080 --> 00:09:15,760

satellite photographs, which had been analyzed by an expert. For three days, Don Shockey

73

00:09:15,760 --> 00:09:21,380

and his guides made their way up the south side of the mountain.

74

00:09:21,380 --> 00:09:27,320

Our whole goal was to get to the spot over the top, down the glaciers to this particular

75

00:09:27,320 --> 00:09:32,600

location and verify what the satellite information had told us.

76

00:09:32,600 --> 00:09:38,160

However the Turkish government restricts access to the north side of Mount Ararat, foreigners

77

00:09:38,160 --> 00:09:45,160

are forbidden. One of the Turkish guides, Ahmet, continued on with camera in hand.

78

00:09:47,400 --> 00:09:53,640

Ahmet crested Mount Ararat and started down the north slope. At this point, at an elevation

79

00:09:53,640 --> 00:09:59,840

of nearly 16,000 feet, he spotted something half buried in the snow. From a distance of

80

00:09:59,840 --> 00:10:05,840

300 yards, he took this photograph, which seems to show the end of a rectangular object

81

00:10:05,840 --> 00:10:08,280

with a peaked roof.

82

00:10:08,280 --> 00:10:15,080

He came back and I said, is anything showing? He said, a coop, a coop. And I said, why are

83

00:10:15,080 --> 00:10:20,080

you talking about Ahmet? A coop, a coop, like a chicken coop. Oh, he kind of had a pointed

84

00:10:20,080 --> 00:10:26,080

top and he said that you could see the outline of it in the side. He said in all of my years,

85

00:10:26,080 --> 00:10:32,680

he had never seen anything like it. He said there's some artifact there.

86

00:10:32,680 --> 00:10:38,360

Don Shockey believed that Ahmet might have discovered the remains of Noah's Ark. Shockey

87

00:10:38,360 --> 00:10:42,640

returned to the United States where he took the photograph to forensic anthropologist

88

00:10:42,640 --> 00:10:45,960

Dr. Jim Ebert.

89

00:10:45,960 --> 00:10:52,320

It certainly does not look natural. It looks very strikingly man-made to me. Of course,

90

00:10:52,320 --> 00:10:59,320

there are no scale cues in here, so we can't really tell how big it is. What I see when

91

00:10:59,320 --> 00:11:06,360

I look at this is something that stands out from the rest of the terrain and that is what

92

00:11:06,360 --> 00:11:13,520

looks like a solid structure. You'll never know until you get up there and can see it

93

00:11:13,560 --> 00:11:21,200

and stand next to it. But the rectilinear outline suggests to me that this isn't a normal part

94

00:11:21,200 --> 00:11:28,920

of the glacier. In 1990, Shockey returned to Mount Ararat and undertook an extensive

95

00:11:28,920 --> 00:11:34,600

aerial search. Unfortunately, the site photographed by Ahmet had been completely covered with

96

00:11:34,600 --> 00:11:40,320

snow. Shockey was forced to abandon his effort, but remains convinced that he has probably

97

00:11:40,320 --> 00:11:45,880

found the resting place of Noah's Ark. Others disagree.

98

00:11:45,880 --> 00:11:49,640

We've been told for years that Noah's Ark is on top of Mount Ararat because that's

99

00:11:49,640 --> 00:11:54,000

what the Bible says and that's not what the Bible says. The Bible says the Ark came the

100

00:11:54,000 --> 00:11:59,400

rest upon the mountains of Ararat. That word is in the plural.

101

00:11:59,400 --> 00:12:04,840

David Fossel is a former merchant marine officer and merchant salvage expert who believes that

102

00:12:04,880 --> 00:12:12,480

the Ark is buried beneath this unusual mound, a full 17 miles south of Mount Ararat. Fossel's

103

00:12:12,480 --> 00:12:18,000

team has made several expeditions to the area. They have combed the site with a metal detector

104

00:12:18,000 --> 00:12:26,800

and discovered traces of iron beneath the mound which do not appear to be natural deposits.

105

00:12:26,800 --> 00:12:31,560

Every 20 to 30 inches approximately we have the remains of an iron fitting or an iron

106

00:12:31,680 --> 00:12:36,480

pin of sorts that are still there in the soil and discernible.

107

00:12:36,480 --> 00:12:42,080

Well this is one of 5,400 iron fittings that we've located. Of course we haven't pulled

108

00:12:42,080 --> 00:12:47,560

them all out of the boat. It's been cut in half by a diamond saw, scanned by electron

109

00:12:47,560 --> 00:12:55,560

microscopes at Los Alamos National Laboratory and this particular iron fitting is 94.84%

110

00:12:56,040 --> 00:13:00,040

man-made run iron.

111

00:13:00,040 --> 00:13:04,800

Looking at the mound from above, the iron deposits form a distinct pattern of intersecting

112

00:13:04,800 --> 00:13:11,800

lines which Fossil believes is a framework of the Ark. From end to end, the lines measure

113

00:13:11,800 --> 00:13:19,800

515 feet or 300 cubits. The length of the Ark as recorded in the Bible. The width averages

114

00:13:20,160 --> 00:13:27,160

85 feet or 50 cubits which also corresponds to the Biblical dimension.

115

00:13:27,520 --> 00:13:31,120

Given the shape of the thing and the size of the thing and where they found it, I mean

116

00:13:31,120 --> 00:13:36,080

if it walks like a duck and quacks like a duck until somebody finds something else, what

117

00:13:36,080 --> 00:13:39,760

else could it possibly be but Noah's Ark?

118

00:13:39,760 --> 00:13:45,260

Are the metal fittings the remnants of Noah's Ark? Some have suggested that David Fossel

119

00:13:45,260 --> 00:13:52,260

has in reality found the remains of an ancient Mongol fort. Others say it is merely a geological

120

00:13:52,260 --> 00:13:57,980

formation. However, the Turkish government has declared the mound as the official site

121

00:13:57,980 --> 00:14:01,220

where Noah's Ark came to rest.

122

00:14:01,220 --> 00:14:07,220

The man who is in charge, Professor Salih Bayrak Tutan, who is also a geologist, he

123

00:14:07,220 --> 00:14:14,220

says it's Noah's Ark 200%. It is not a geological anatomy, it's a man-made structure.

124

00:14:15,720 --> 00:14:21,220

As one of mankind's great mysteries finally been solved in this remote mountain range,

125

00:14:21,260 --> 00:14:26,140

it seems obvious that Don Shockey and David Fossel are both investigating something very

126

00:14:26,140 --> 00:14:32,420

unique. But only years of further exploration and detailed analysis will reveal exactly

127

00:14:32,420 --> 00:14:36,740

what they have found.

128

00:14:36,740 --> 00:14:42,180

It is tantalizing to think that Noah's Ark may actually exist. However unlikely it may

129

00:14:42,180 --> 00:14:47,700

seem, such a discovery would not be unprecedented. In fact, it was less than a hundred years

130

00:14:47,780 --> 00:14:52,380

ago, the archaeologists uncovered the ruins of the ancient city of Troy, which had always

131

00:14:52,380 --> 00:14:58,420

been considered a myth. Finding Noah's Ark would no doubt prove more elusive. Perhaps

132

00:14:58,420 --> 00:15:03,420

it is the story best left as a metaphor, a cautionary tale for a world that has grown

133

00:15:03,420 --> 00:15:09,420

ever more complex and chaotic.

134

00:15:09,420 --> 00:15:16,420

Next, a young woman is found murdered in Louisiana. Perhaps you can help identify her killer.

135

00:15:17,700 --> 00:15:24,700

Everything all right out there, Tracy? It's just seated 20 more.

136

00:15:34,060 --> 00:15:39,960

In November of 1988, 26-year-old Tracy Wofford Bunn began working as a waitress in Baton

137

00:15:39,960 --> 00:15:46,000

Louis, Louisiana. I think they keep coming back. Save me.

138

00:15:46,000 --> 00:15:50,560

They arrived from Milwaukee, Wisconsin three months earlier, looking for a new start in

139

00:15:50,560 --> 00:15:52,840

a new city.

140

00:15:52,840 --> 00:15:58,520

Tracy was a beautiful person, outgoing, fun to be with. She would do things very spur

141

00:15:58,520 --> 00:16:02,640

of the moment. She could say, well, tomorrow I'm going to Minnesota. Tomorrow she'd go

142

00:16:02,640 --> 00:16:09,640

to Minnesota with no care whatsoever, wondering about what might happen, what would happen.

143

00:16:09,940 --> 00:16:14,520

No care. She knew where she was going.

144

00:16:14,520 --> 00:16:19,960

Tracy and Solomon Bunn had married in 1986. Two and a half years later, the marriage was

145

00:16:19,960 --> 00:16:26,360

on the skids, and Tracy turned to her younger sister, Danielle, who lived in Baton Rouge.

146

00:16:26,360 --> 00:16:31,880

She had spoken many times about leaving Milwaukee to sort of spread her wings and try something

147

00:16:31,880 --> 00:16:36,480

new, and so she just came to visit me, and we had a really good time. And I introduced

148

00:16:36,480 --> 00:16:41,600

her to quite a few different type people, and so she stayed with me, I think a couple

149

00:16:41,640 --> 00:16:45,600

of weeks, and then she went back home and stayed about a week and a half and came back

150

00:16:45,600 --> 00:16:50,040

down with all of the rest of her stuff.

151

00:16:50,040 --> 00:16:55,560

Tracy settled in quickly. She landed a job and even found a new boyfriend. It seemed

152

00:16:55,560 --> 00:17:01,680

like life was starting all over again.

153

00:17:01,680 --> 00:17:08,680

Then six months later, on the morning of April 1st, 1989, it all came crashing down. Outside

154

00:17:08,760 --> 00:17:13,680

of an apartment complex, a passerby noticed a young woman apparently asleep in the front

155

00:17:13,680 --> 00:17:20,680

seat of a car. It quickly became obvious that the young woman was not asleep. Tracy

156

00:17:20,760 --> 00:17:24,240

Wofford Bunn had been murdered.

157

00:17:24,240 --> 00:17:27,200

About what time was it when you first saw the car?

158

00:17:27,200 --> 00:17:32,200

It was about 8 o'clock when I first saw the car, and when I came out, it was about 8.30,

159

00:17:32,200 --> 00:17:37,680

did you really see what was, you know, was the latest sleep or what in the car?

160

00:17:37,680 --> 00:17:43,680

Tracy had been raped and strangled to death. Oddly investigators found no sign of a struggle.

161

00:17:43,680 --> 00:17:47,680

In fact, there were a number of things about the crime scene which did not seem quite right.

162

00:17:47,680 --> 00:17:51,680

The clothes all ruffled up and her shoes all missing. Would you mind taking me a few shots

163

00:17:51,680 --> 00:17:52,680

of that?

164

00:17:52,680 --> 00:17:57,840

Upon examining the body, we could see that the clothes were all jumbled up in a fashion

165

00:17:57,840 --> 00:18:03,040

that I have seen before, and this is usually when a person has had their clothing put back

166

00:18:03,040 --> 00:18:10,040

on them and they're either in an unconscious state or they're deceased.

167

00:18:10,040 --> 00:18:16,600

We also found that the stick shift was broken off in the car. It's lying on the floor board.

168

00:18:16,600 --> 00:18:21,120

I still believe the vehicle could have been driven, but it would have taken somebody with

169

00:18:21,120 --> 00:18:27,800

little expertise at doing it to drive it with the stick shift broken off like that.

170

00:18:27,800 --> 00:18:32,920

The motive is the main thing that has me puzzled is because there was no robbery. The jury

171

00:18:32,920 --> 00:18:37,200

was still on the victim, the person was there, identification. This was just a total loss

172

00:18:37,200 --> 00:18:42,560

of life for no reason.

173

00:18:42,560 --> 00:18:47,160

With no physical evidence to go on, Detective Wheeler turned to the people who knew Tracy

174

00:18:47,160 --> 00:18:49,960

Best. He started with her new boyfriend.

175

00:18:49,960 --> 00:18:54,240

We were together and we just rode around for a little while.

176

00:18:54,240 --> 00:18:55,240

You were in Tracy's vehicle?

177

00:18:55,680 --> 00:18:57,240

Yes, we rode around.

178

00:18:57,240 --> 00:19:03,840

Well, when I spoke with the boyfriend, he advised me that about 4.30, March 31, 1989,

179

00:19:03,840 --> 00:19:10,440

he dropped Tracy off at work and he kept her vehicle. He and his cousin were riding around

180

00:19:10,440 --> 00:19:16,040

in the car and he was supposed to pick Tracy up at night, at 12 midnight when she got her

181

00:19:16,040 --> 00:19:19,040

work done.

182

00:19:19,840 --> 00:19:25,360

Unfortunately, he said the shift level broke off in the vehicle at Texas and East Polk.

183

00:19:25,360 --> 00:19:30,840

They parked the vehicle and went to the cousin's house about a half mile away.

184

00:19:30,840 --> 00:19:34,600

Man, let's go ahead and leave it here. We'll come back and get it tomorrow. Let's walk

185

00:19:34,600 --> 00:19:41,040

on back to your house. Tracy's going to be mad at me.

186

00:19:41,040 --> 00:19:45,080

Around midnight, Tracy called her boyfriend and learned that he had damaged the car.

187

00:19:45,680 --> 00:19:47,400

I'm out of here, Timothy.

188

00:19:47,400 --> 00:19:51,400

She left work and walked to his cousin's house about a mile away.

189

00:19:59,400 --> 00:20:02,640

How you doing, Eric? What happened to the car?

190

00:20:02,640 --> 00:20:04,040

It broke. It's broken.

191

00:20:04,040 --> 00:20:05,360

How did it break?

192

00:20:05,360 --> 00:20:09,760

I was just, Eric and I were just riding, right, Eric? And the whole shift just snapped off.

193

00:20:09,760 --> 00:20:12,240

A stick shift doesn't just snap off.

194

00:20:12,400 --> 00:20:15,600

Well, your shift just snapped. You know all the problems you had getting in the third

195

00:20:15,600 --> 00:20:17,520

gear. The shift this time just snapped off.

196

00:20:17,520 --> 00:20:20,760

I don't have any problems. You're the one causing the problems.

197

00:20:20,760 --> 00:20:21,760

Okay, okay.

198

00:20:21,760 --> 00:20:22,760

Give me the keys.

199

00:20:22,760 --> 00:20:23,760

What?

200

00:20:23,760 --> 00:20:26,000

So I can go get the car and take care of it.

201

00:20:26,000 --> 00:20:27,000

So what?

202

00:20:27,000 --> 00:20:28,000

Give me the keys.

203

00:20:28,000 --> 00:20:35,000

Tracy! Tracy!

204

00:20:41,000 --> 00:20:49,000

Tracy walked a half mile to her car. Police estimate that she arrived around 12.30 a.m.

205

00:20:49,000 --> 00:20:52,760

We know she got to the vehicle because it was locked up by her boyfriend. Well, he left

206

00:20:52,760 --> 00:20:58,120

it there. And when we found the vehicle, that next morning, the keys were in the vehicle.

207

00:20:58,120 --> 00:21:06,120

But that is the last place that we could positively say she was alive at when she arrived at the

208

00:21:06,120 --> 00:21:07,120

car.

209

00:21:07,120 --> 00:21:11,200

An hour and a half later, Tracy's car was driven to the apartment complex where she

210

00:21:11,200 --> 00:21:14,120

would be found murdered the next morning.

211

00:21:14,120 --> 00:21:20,320

I was advised by the apartment manager that there was possibly a witness who saw the vehicle

212

00:21:20,400 --> 00:21:27,400

when it came into the parking lot around 1.30 a.m. And saw somebody walk away from it.

213

00:21:27,400 --> 00:21:32,200

It didn't pay any much attention to me.

214

00:21:32,200 --> 00:21:39,200

I feel that Tracy Bond was probably killed between the hours of 12.30 and 1.30 in the

215

00:21:39,280 --> 00:21:41,400

morning.

216

00:21:41,400 --> 00:21:45,400

Authorities are particularly disturbed by several unsettling details surrounding the

217

00:21:45,400 --> 00:21:50,920

murder. Not only had Tracy been raped and strangled, but there were second-degree burns

218

00:21:50,920 --> 00:21:55,040

on her thighs and on the back of her hands.

219

00:21:55,040 --> 00:21:59,720

We haven't been able to determine what caused those burns. And we've thought about every

220

00:21:59,720 --> 00:22:03,960

type of heating apparatus or device you could think of. We just can't find anything that

221

00:22:03,960 --> 00:22:10,960

would make that particular burn. We also don't understand the method of leaving the body

222

00:22:10,960 --> 00:22:17,960

the way it was. It was like they wanted this person to be found and they wanted everybody

223

00:22:20,600 --> 00:22:26,760

to see. I don't know whether these guys were involved in drugs or not, but when you have

224

00:22:26,760 --> 00:22:33,440

a case involving people in narcotics, if you don't deal with them in the fashion that they

225

00:22:33,440 --> 00:22:38,360

want you to, they'll make an example out of you.

226

00:22:38,360 --> 00:22:46,840

I know someone personally that was very heavily involved in drugs and he was, I guess he was

227

00:22:46,840 --> 00:22:53,760

trying to make some sort of drug transaction, and he was told that that person was the person

228

00:22:53,760 --> 00:22:55,800

who had murdered my sister.

229

00:22:55,800 --> 00:23:02,280

I think one of those guys killed a man. Let's get out of here.

230

00:23:02,280 --> 00:23:08,320

Authorities did investigate a known drug dealer, but found no evidence linking him to the crime.

231

00:23:08,320 --> 00:23:12,200

It's my feeling that her boyfriend knew something because he had her car that night while she

232

00:23:12,200 --> 00:23:18,960

was at work. He didn't come and pick her up from work at the agreed upon time. Apparently

233

00:23:18,960 --> 00:23:24,080

when she went by his cousin's house to pick up the car, he told her that it was broken

234

00:23:24,080 --> 00:23:29,480

and that you go on ahead and it doesn't sound like a likely story for a person who was supposed

235

00:23:29,480 --> 00:23:34,080

to be involved with my sister to just sort of throw her to the wolves at 12 or 1 o'clock

236

00:23:34,080 --> 00:23:38,280

at night.

237

00:23:38,280 --> 00:23:43,120

Tracy's boyfriend and his cousin were each given two polygraph examinations. They both

238

00:23:43,120 --> 00:23:45,920

passed the tests and are not considered suspects.

239

00:23:45,920 --> 00:23:49,160

I always have problems with a stick shift and the transmission getting in that third.

240

00:23:49,160 --> 00:23:55,800

I worked a number of homicides and this one I feel has just a few pieces of the puzzle

241

00:23:55,800 --> 00:24:02,640

that haven't fell in place yet and I know it's a solvable case and it's frustrating

242

00:24:02,640 --> 00:24:09,640

for me as well as for Tracy's family to not know who these killers are because we know

243

00:24:09,640 --> 00:24:17,080

they're walking around Scott Free today and Tracy's gone.

244

00:24:17,080 --> 00:24:22,240

It's even now. It's hard to believe even though I've seen her body, I've seen her, I've buried

245

00:24:22,240 --> 00:24:29,880

her, I've heard all this different information, all the details and everything and still it's

246

00:24:29,960 --> 00:24:33,960

really difficult to believe because I really don't know what happened and I think if I

247

00:24:33,960 --> 00:24:38,720

knew what happened I'd be able to believe that it's happened and sort of believe it

248

00:24:38,720 --> 00:24:39,220

behind me.

249

00:25:00,720 --> 00:25:06,040

When we return, the touching story of a man's search for his sister, a search which has

250

00:25:06,040 --> 00:25:08,040

spanned half a century.

251

00:25:18,360 --> 00:25:26,040

1941, Otama, Iowa. A family is about to be torn apart. Three brothers and a sister have

252

00:25:26,120 --> 00:25:31,080

been left in the care of their aunt who, fearing for the children's well-being, has contacted

253

00:25:31,080 --> 00:25:33,080

the child welfare department.

254

00:25:33,080 --> 00:25:44,080

Walter, Donald, Richard, Delores, I need to take you to your new home now. Come out please.

255

00:25:44,080 --> 00:25:49,080

You kids get on out here, we're going to take you to a decent home. Come on out.

256

00:25:49,120 --> 00:25:56,120

Walter, you're a big boy now you're going out to that car, hurry up. Come on.

257

00:25:56,120 --> 00:26:03,120

At that time there was four of us and another one on the way and I was just probably about

258

00:26:05,620 --> 00:26:12,620

five and a half years old. I didn't know anything about adoptions or stuff like that and I thought

259

00:26:13,620 --> 00:26:20,620

we were just going to this home and later on we were going to go back to mama's thing.

260

00:26:20,620 --> 00:26:24,620

You just hush up and sit still. Sit still.

261

00:26:24,620 --> 00:26:30,620

Donald's strats mother could do little to prevent the state from taking her children.

262

00:26:30,620 --> 00:26:36,620

She was pregnant with her fifth child and unable to work. A few months earlier, Donald's

263

00:26:36,620 --> 00:26:41,620

father had suffered a nervous breakdown and had been institutionalized. The children who

264

00:26:41,620 --> 00:26:46,620

ranged in age from two to nine years old were usually left to their own devices until the

265

00:26:46,620 --> 00:26:53,620

authorities stepped in. Two of the brothers were sent to Iowa State youth facilities.

266

00:26:55,620 --> 00:26:59,620

Donald and his sister Delores were taken to a Lutheran children's home where they were

267

00:26:59,620 --> 00:27:05,620

placed in the care of the head nurse. You need to take a little rest. Delores, here's your

268

00:27:05,620 --> 00:27:10,620

bottle. Let me try.

269

00:27:12,620 --> 00:27:17,620

Even though I wasn't told as boy, I was the baby's center and I played with my sister

270

00:27:17,620 --> 00:27:25,620

and I enjoyed that and I'd push around a little tricycle and brush her hair and take

271

00:27:25,620 --> 00:27:30,620

care of her, you know. I always liked to help her because she was my sister.

272

00:27:31,620 --> 00:27:35,620

Donald, here's some bananas. You feed it to your sister.

273

00:27:35,620 --> 00:27:40,620

Within days, Donald realized that he and his sister would not be going back to their mother.

274

00:27:41,620 --> 00:27:47,620

Donald cooperated with the nurse but was always alert for a chance to take his sister and escape.

275

00:27:49,620 --> 00:27:56,620

This nurse basically, she was busy in the kitchen. She had her back turned to us and I guess

276

00:27:56,620 --> 00:28:04,620

she might say she was in ten on her job and so I just took my sister out the door right

277

00:28:04,620 --> 00:28:06,620

for it, you know.

278

00:28:13,620 --> 00:28:21,620

This was our chance to go home and sneak her out the door down the steps out of this

279

00:28:21,620 --> 00:28:29,620

whole bottle laid forward and I opened it up and I helped her in on the floor and helped

280

00:28:29,620 --> 00:28:33,620

her up on the seat. That's why now you sit right there because we're going home to see

281

00:28:33,620 --> 00:28:35,620

mama.

282

00:28:41,620 --> 00:28:45,620

I didn't know anything about cars really but I knew if you pushed that button down on

283

00:28:45,620 --> 00:28:48,620

the floor that cars go.

284

00:28:52,620 --> 00:28:59,620

I had to look out the window and hang on the steering wheel and then I'd get down and push

285

00:28:59,620 --> 00:29:03,620

that button. That car go ahead a little bit, you know, and then I'd get up and take another

286

00:29:03,620 --> 00:29:08,620

look and I started to get this car down there on that main road. I didn't know which way I was

287

00:29:08,620 --> 00:29:13,620

going when I got there but I knew that road. I came in on it and I needed to leave by it,

288

00:29:13,620 --> 00:29:15,620

you know.

289

00:29:16,620 --> 00:29:21,620

What do you think you're doing?

290

00:29:21,620 --> 00:29:23,620

Let go of me, I don't see my mama.

291

00:29:23,620 --> 00:29:25,620

You get out of that car right now, don't you know you could kill somebody?

292

00:29:25,620 --> 00:29:31,620

The car door was just kind of just jerked open and she reached in and grabbed me up by

293

00:29:31,620 --> 00:29:36,620

the collar and went thrashing on me, you know, and I couldn't tell you today whether she

294

00:29:36,620 --> 00:29:41,620

put me with her hand or whether she had a board or whether she had a strap or anything

295

00:29:41,620 --> 00:29:49,620

but I knew she was whipping me but I didn't feel no pain and I was fighting her because

296

00:29:49,620 --> 00:29:51,620

I was wanting to go home.

297

00:29:51,620 --> 00:29:55,620

Donald, there's some cookies for you in the kitchen if you'd like them.

298

00:29:55,620 --> 00:29:57,620

Thank you.

299

00:29:57,620 --> 00:30:00,620

Two weeks later, unbeknownst to Donald, Dolores was adopted.

300

00:30:00,620 --> 00:30:03,620

Come on baby, we're going to get you a new home.

301

00:30:04,620 --> 00:30:09,620

These people come and took Dolores away.

302

00:30:09,620 --> 00:30:16,620

I didn't know what the deal was but I thought, well, they're going to bring her back here

303

00:30:16,620 --> 00:30:20,620

because me and her was family and that's all I had.

304

00:30:26,620 --> 00:30:32,620

I kept asking this woman where's my sister and...

305

00:30:32,620 --> 00:30:40,620

My sister and she tell me, well, you just don't need to know and it ain't none of your business

306

00:30:40,620 --> 00:30:48,620

and stuff like that and of course I got unruly and ordinary because I was with my sister.

307

00:30:50,620 --> 00:30:52,620

The separation was short lived.

308

00:30:52,620 --> 00:30:57,620

Dolores' adoptive parents sent for Donald as soon as they realized that she was more

309

00:30:57,620 --> 00:30:59,620

than they could handle.

310

00:30:59,620 --> 00:31:03,620

Like the nurses at the home, they turned to Donald for help.

311

00:31:04,620 --> 00:31:11,620

Dolores would adjust to these folks or bond with these folks at first and just cried

312

00:31:11,620 --> 00:31:16,620

and wanted her brother and stuff because, you know, we'd been together

313

00:31:16,620 --> 00:31:20,620

and these people were strangers to her.

314

00:31:28,620 --> 00:31:33,620

She just cried and wouldn't eat or whatever and that's the reason they came and got me

315

00:31:33,620 --> 00:31:37,620

so I could be a quieting factor, you might say.

316

00:31:37,620 --> 00:31:40,620

It's alright, Pete. It's alright.

317

00:31:53,620 --> 00:31:56,620

Under Donald's influence, Dolores began to adjust.

318

00:31:56,620 --> 00:32:01,620

Donald even stayed on for a few days but was expected to remain well in the background.

319

00:32:02,620 --> 00:32:04,620

Okay, your turn.

320

00:32:06,620 --> 00:32:11,620

These people got Dolores where she'd eat for them and play with them

321

00:32:11,620 --> 00:32:19,620

and they treated her quite well, you know, and I don't know, a day or two, whatever.

322

00:32:19,620 --> 00:32:22,620

This nurse come back and she said...

323

00:32:22,620 --> 00:32:26,620

Donnie, you want to go downtown with me?

324

00:32:26,620 --> 00:32:32,620

I remember looking up and this woman was feeding with a little sister

325

00:32:32,620 --> 00:32:42,620

and I thought, well, everything's alright, you know, and, yeah, I'd like to go downtown, you know.

326

00:32:42,620 --> 00:32:46,620

I'm five and a half years old. I love to ride an automobile, you know.

327

00:32:46,620 --> 00:32:50,620

Of course, I didn't realize this automobile would never go and bring me back

328

00:32:50,620 --> 00:32:56,620

and we got in the car and we drove off and I haven't seen my sister since.

329

00:33:00,620 --> 00:33:05,620

I think it's Dolores, you know, almost every day.

330

00:33:05,620 --> 00:33:10,620

She's still my sister no matter what time is done.

331

00:33:10,620 --> 00:33:14,620

But I try to catch up with 50 years of time somehow.

332

00:33:14,620 --> 00:33:18,620

I like to hug her neck and tell her, mister.

333

00:33:22,620 --> 00:33:26,620

Donald Stratt and his two brothers, as well as another sister born after the family,

334

00:33:26,620 --> 00:33:30,620

were split apart and were all reunited in 1965.

335

00:33:30,620 --> 00:33:34,620

Their father remained institutionalized for the rest of his life

336

00:33:34,620 --> 00:33:36,620

and their mother was granted a divorce.

337

00:33:36,620 --> 00:33:40,620

Belmistrat remarried and had five more children.

338

00:33:40,620 --> 00:33:46,620

So now there are nine siblings all looking for their lost sister Dolores.

339

00:33:46,620 --> 00:33:50,620

Update. Just minutes after we first broadcast this story,

340

00:33:50,620 --> 00:33:55,620

a woman named Penelope Sue Lewis of Ballover, Missouri called our telecenter

341

00:33:55,620 --> 00:33:59,620

and identified herself as Donald Stratt's long lost sister.

342

00:33:59,620 --> 00:34:06,620

Donald was overjoyed to discover that Penelope lived just 50 miles from his home in Stoutland, Missouri.

343

00:34:07,620 --> 00:34:11,620

Three days later, at a part near Penelope's home,

344

00:34:11,620 --> 00:34:14,620

Donald, Penelope and their extended families

345

00:34:14,620 --> 00:34:18,620

gathered for a heartwarming and long overdue reunion.

346

00:34:18,620 --> 00:34:25,620

Oh, God, it's been so many years.

347

00:34:27,620 --> 00:34:30,620

I love her. I always have loved her.

348

00:34:30,620 --> 00:34:36,620

And sometimes when I get along and just think about it, I just sit down and cry.

349

00:34:36,620 --> 00:34:41,620

And I don't mind crying this time because I'm already there.

350

00:34:41,620 --> 00:34:44,620

Yeah, already there.

351

00:34:44,620 --> 00:34:47,620

But it got another surprise for you.

352

00:34:48,620 --> 00:34:50,620

Soon after Donald arrived,

353

00:34:50,620 --> 00:34:53,620

Penelope shared a poignant moment with her natural mother, Velma,

354

00:34:53,620 --> 00:34:56,620

whom she had not seen in more than 50 years.

355

00:34:56,620 --> 00:34:58,620

Oh.

356

00:35:01,620 --> 00:35:04,620

I never thought I'd see this day.

357

00:35:05,620 --> 00:35:09,620

The reunion was a culmination of an emotional roller coaster ride,

358

00:35:09,620 --> 00:35:15,620

which had begun 72 hours earlier when Penelope sat down to watch Unsolved Mysteries.

359

00:35:15,620 --> 00:35:21,620

I try not to miss any because I like to watch it, the reunions and things.

360

00:35:21,620 --> 00:35:25,620

And I thought, you know, I've always thought, well, maybe someday it'll be my turn.

361

00:35:25,620 --> 00:35:27,620

And all of a sudden it dawned on me,

362

00:35:27,620 --> 00:35:30,620

well, that's me. That's my family.

363

00:35:31,620 --> 00:35:35,620

For Penelope, the gathering was also the chance to meet all the family members

364

00:35:35,620 --> 00:35:37,620

she never knew she had.

365

00:35:37,620 --> 00:35:41,620

One full sister, two half sisters, three half brothers,

366

00:35:41,620 --> 00:35:44,620

and countless nephews, nieces and cousins.

367

00:35:47,620 --> 00:35:54,620

We just probably tried to get everybody acquainted with everybody and just go from there.

368

00:35:54,620 --> 00:35:56,620

Plain get together. Yeah.

369

00:35:59,620 --> 00:36:01,620

I felt so helpless.

370

00:36:02,620 --> 00:36:04,620

I felt like I didn't belong.

371

00:36:04,620 --> 00:36:07,620

And now I'm at peace.

372

00:36:12,620 --> 00:36:17,620

Next, a woman is brutally abducted from a car wash in Texas.

373

00:36:25,620 --> 00:36:30,620

Most of us never imagined that we would become part of an Unsolved Mystery,

374

00:36:30,620 --> 00:36:36,620

that we will suddenly hear a scream in the night and find ourselves involved in a criminal investigation.

375

00:36:36,620 --> 00:36:43,620

Yet that is exactly what happened to three young men in Austin, Texas on December 29, 1991,

376

00:36:43,620 --> 00:36:47,620

all because they happened to cross paths with a kidnapper.

377

00:36:48,620 --> 00:36:55,620

At 8.55pm, Steve Marks was on his way to meet his two brothers-in-law at a friend's house on Powell Street.

378

00:36:55,620 --> 00:37:00,620

Less than a block from the house, he pulled behind a tan-colored car.

379

00:37:02,620 --> 00:37:08,620

That evening in question, I was driving down Powell Street and unnoticed a car in front of me driving very slowly.

380

00:37:08,620 --> 00:37:14,620

I followed it down the street and I pulled in front of my friend's house.

381

00:37:18,620 --> 00:37:25,620

The car in the meantime had pulled up into the parking garage ahead of my friend's house.

382

00:37:25,620 --> 00:37:30,620

And my brother-in-law's arrived about a minute later.

383

00:37:33,620 --> 00:37:37,620

Mike and Bill Golems had encountered the same car two blocks from the house,

384

00:37:37,620 --> 00:37:40,620

going the wrong way on a one-way street.

385

00:37:40,620 --> 00:37:43,620

And when they stopped and we stopped, they looked at us like,

386

00:37:43,620 --> 00:37:48,620

what do we do next? And we looked at them like, OK, you fools, get out of the way.

387

00:37:48,620 --> 00:37:52,620

And that gave us an opportunity to see them, but unfortunately,

388

00:37:52,620 --> 00:37:56,620

there was no reason for us to try to memorize their faces or anything.

389

00:37:56,620 --> 00:37:59,620

There was just two people passing in the night.

390

00:38:05,620 --> 00:38:09,620

At 9pm, Mike and Bill Golems rendezvoused with Steve Marks.

391

00:38:09,620 --> 00:38:15,620

The house where they met was just 200 feet from a 24-hour do-it-yourself car wash.

392

00:38:15,620 --> 00:38:17,620

I don't know what you're thinking about going out to eat.

393

00:38:17,620 --> 00:38:19,620

Why don't we go over to my house for some spaghetti?

394

00:38:24,620 --> 00:38:28,620

When we were on the porch, all we could see was the side of the car wash

395

00:38:28,620 --> 00:38:33,620

and the vacuum canisters where cars are vacuumed outside of the stalls.

396

00:38:33,620 --> 00:38:38,620

So when we heard the scream and the car door or trunk slam,

397

00:38:38,620 --> 00:38:41,620

all we saw was the car pull out.

398

00:38:46,620 --> 00:38:50,620

As we saw the car pull out the wrong way on Fifth Street,

399

00:38:50,620 --> 00:38:56,620

I realized that that was the same car that I had pulled behind on Powell Street

400

00:38:56,620 --> 00:39:00,620

and that had made the U-turn in the parking garage.

401

00:39:00,620 --> 00:39:07,620

And the car that later Mike and Bill had said had confronted him going the wrong way on Powell Street,

402

00:39:07,620 --> 00:39:09,620

pulling out onto Sixth Street.

403

00:39:10,620 --> 00:39:15,620

A few seconds later, Steve Marks and Bill Golems arrived at the car wash.

404

00:39:17,620 --> 00:39:20,620

Unlike most nights, it was eerily deserted.

405

00:39:21,620 --> 00:39:26,620

We walked up to the car, we saw a purse, the keys,

406

00:39:26,620 --> 00:39:31,620

and then Bill suggested I go back to the house and call the police

407

00:39:31,620 --> 00:39:33,620

because we figured something was wrong.

408

00:39:37,620 --> 00:39:41,620

The owner of the abandoned car was identified as 28-year-old Colleen Reed,

409

00:39:41,620 --> 00:39:45,620

a certified public accountant who had lived in Austin for four years.

410

00:39:48,620 --> 00:39:51,620

Police traced Colleen's movements in the day of the crime.

411

00:39:51,620 --> 00:39:54,620

She arrived at the car wash around 9, 10 p.m.

412

00:39:54,620 --> 00:39:58,620

Earlier that day, she had gone to church with her boyfriend.

413

00:39:58,620 --> 00:40:01,620

Then she spent several hours doing community volunteer work.

414

00:40:01,620 --> 00:40:04,620

That evening, Colleen went to the market

415

00:40:04,620 --> 00:40:08,620

and then withdrew cash from her bank machine before ending up at the car wash.

416

00:40:08,620 --> 00:40:14,620

Police believe that Colleen was kidnapped by the two men in the tan-colored vehicle.

417

00:40:14,620 --> 00:40:22,620

MUSIC

418

00:40:33,620 --> 00:40:36,620

No! No! No! No!

419

00:40:36,620 --> 00:40:38,620

No!

420

00:40:38,620 --> 00:40:40,620

No!

421

00:40:40,620 --> 00:40:43,620

No! No!

422

00:40:46,620 --> 00:40:50,620

We have a situation where after they abducted Colleen Reed,

423

00:40:50,620 --> 00:40:55,620

they went the wrong way on Fifth Street and almost collided, hit almost two vehicles.

424

00:40:55,620 --> 00:41:00,620

We have not heard from the drivers or the people that have occupied those two vehicles.

425

00:41:00,620 --> 00:41:04,620

So hopefully this show will maybe bring these two people forward

426

00:41:04,620 --> 00:41:07,620

that may have some information that will help us.

427

00:41:08,620 --> 00:41:11,620

I've almost convinced myself that we will someday see her again,

428

00:41:11,620 --> 00:41:13,620

that she's being held somewhere.

429

00:41:13,620 --> 00:41:16,620

And I know that that's what we want to believe.

430

00:41:16,620 --> 00:41:22,620

And the reality is that's probably not true, but there is a possibility.

431

00:41:22,620 --> 00:41:26,620

I think about when do I just say,

432

00:41:26,620 --> 00:41:31,620

okay, it's over, something happened, something horrible.

433

00:41:31,620 --> 00:41:34,620

I don't know if I'll ever be able to do that.

434

00:41:34,620 --> 00:41:38,620

I've gone on with my life in a lot of ways.

435

00:41:38,620 --> 00:41:44,620

I work and take care of my children and do the things I need to do.

436

00:41:44,620 --> 00:41:51,620

But there's an empty place that I've had a hard time filling.

437

00:41:53,620 --> 00:41:56,620

Update. A suspect is in custody.

438

00:41:56,620 --> 00:42:01,620

Just last week, a man named Alva Hank Warley was arrested and built in Texas.

439

00:42:01,620 --> 00:42:04,620

He admitted involvement in the kidnapping,

440

00:42:04,620 --> 00:42:07,620

but denied knowing Colleen Reed's current whereabouts.

441

00:42:07,620 --> 00:42:12,620

However, Warley insisted that she was still alive the last time he saw her.

442

00:42:12,620 --> 00:42:16,620

Police are now looking for this man, Kenneth Allen McDuff.

443

00:42:16,620 --> 00:42:21,620

He is 46 years old, 6 feet 3 inches tall and weighs 245 pounds.

444

00:42:21,620 --> 00:42:25,620

McDuff was last seen in Waco, Texas.

445

00:42:31,620 --> 00:42:38,620

■■■

446

00:42:38,620 --> 00:43:01,260

The Diabolical Mind, the very phrase

447

00:43:01,260 --> 00:43:03,540

evokes a chilling mystique.

448

00:43:03,540 --> 00:43:07,540

On Sunday, Unsolved Mysteries will present a special report,

449

00:43:07,540 --> 00:43:12,180

an exploration of the mysteries of the psychopath.

450

00:43:12,180 --> 00:43:15,300

What forces would transform this impoverished young boy

451

00:43:15,300 --> 00:43:17,420

into a ruthless dictator?

452

00:43:17,420 --> 00:43:20,180

Saddam Hussein's bloody and brutal rise to power

453

00:43:20,180 --> 00:43:22,900

was ignited by a single disturbing trait,

454

00:43:22,900 --> 00:43:28,140

a cunning mind unchecked by remorse or conscience.

455

00:43:28,140 --> 00:43:31,060

G. Daniel Walker has been convicted of crimes ranging

456

00:43:31,060 --> 00:43:34,220

from fraud, to armed robbery, to murder.

457

00:43:34,220 --> 00:43:36,060

In a remarkable interview, Walker

458

00:43:36,060 --> 00:43:39,420

provides a revealing glimpse into a diabolical mind.

459

00:43:39,420 --> 00:43:42,380

It's a violence because fear lives with you 24 hours a day.

460

00:43:42,380 --> 00:43:43,540

Fear never goes away.

461

00:43:43,540 --> 00:43:47,500

If you kill somebody, that's over.

462

00:43:47,500 --> 00:43:49,220

When her husband and children fell victim

463

00:43:49,220 --> 00:43:51,380

to a series of mysterious illnesses,

464

00:43:51,380 --> 00:43:54,740

Marie Hillie was a devoted and caring wife and mother.

465

00:43:54,740 --> 00:43:58,020

In time, her son began to suspect the worst.

466

00:43:58,020 --> 00:44:01,900

His mother was poisoning her own family.

467

00:44:01,900 --> 00:44:06,100

The world, as I knew it at that point, just fell apart.

468

00:44:06,100 --> 00:44:11,220

Everything that my mother had taught me right from wrong,

469

00:44:11,220 --> 00:44:14,660

I had to go back and re-examine.

470

00:44:14,660 --> 00:44:18,700

Join me Sunday night at 8 with this very special and very

471

00:44:18,700 --> 00:44:21,940

different edition of Unsolved Mysteries,

472

00:44:21,940 --> 00:44:24,140

key studies of the diabolical mind.
