# PATIENT SEVENTEEN

ALIEN IMPLANTS
NOT OF THIS WORLD!

1
00:00:06,760 --> 00:00:12,080
[Music]

2
00:00:17,099 --> 00:00:14,880
we got quickie elements here I don't see

3
00:00:18,779 --> 00:00:17,109
we have played in which is addicted also

4
00:00:21,450 --> 00:00:18,789
indicative of meteoric iron there's some

5
00:00:27,269 --> 00:00:21,460
clef you precious metals like play diem

6
00:00:29,040 --> 00:00:27,279
platinum rhodium in meteoric iron so we

7
00:00:31,169 --> 00:00:29,050
have a total of 36 elements here

8
00:00:34,200 --> 00:00:31,179
most industrial alloys don't have never

9
00:00:36,119 --> 00:00:34,210
that many almonds in them the next move

10
00:00:39,979 --> 00:00:36,129
was to get interpretation of the data

11
00:00:43,830 --> 00:00:39,989
from a scientist known as nano man a

12
00:00:46,439 --> 00:00:43,840
military funded nano physicist who might

13
00:00:50,549 --> 00:00:46,449

be able to shine light on our seemingly

14
00:00:52,860 --> 00:00:50,559
anomalous analysis this is the most

15
00:00:56,819 --> 00:00:52,870
astounding array of elements in a single

16
00:00:59,910 --> 00:00:56,829
sample I've ever seen our most complex

17
00:01:05,550 --> 00:00:59,920
alloys maybe you will have five

18
00:01:09,330 --> 00:01:05,560
different metals or oxides present in an

19
00:01:13,350 --> 00:01:09,340
alloy this sample has an astounding

20
00:01:16,740 --> 00:01:13,360
array of metals present we have a huge

21
00:01:19,050 --> 00:01:16,750
amount of vitriol inside this natrium is

22
00:01:21,150 --> 00:01:19,060
extremely toxic machining

23
00:01:24,330 --> 00:01:21,160
superconductors you have to wear masks

24
00:01:27,399 --> 00:01:24,340
and gloves because the powder is deadly

25
00:01:29,830 --> 00:01:27,409
it's not from here

26
00:01:32,499 --> 00:01:29,840
this sample did not come from our solar

27
00:01:37,330 --> 00:01:32,509
system much less the earth these
