

A person wearing a red and white plaid shirt and blue jeans is crouching on a rocky, brownish shore. They are looking down at a circular mark in the water. The background is a rocky, brownish landscape.

HUNT FOR THE SKINWALKER

ICE CIRCLE / PHYSICAL EVIDENCE / BUT OF WHAT?

1
00:00:00,650 --> 00:00:09,660

[Music]

2
00:00:14,890 --> 00:00:12,310

the unknown intelligence on the ranch

3
00:00:16,900 --> 00:00:14,900

seemingly withdrew or went underground

4
00:00:19,600 --> 00:00:16,910

during the latter stages of the knids

5
00:00:22,269 --> 00:00:19,610

investigation its manifestations became

6
00:00:24,609 --> 00:00:22,279

less frequent and less obvious but on

7
00:00:25,750 --> 00:00:24,619

occasion it would remind the locals that

8
00:00:28,660 --> 00:00:25,760

it was still around

9
00:00:30,910 --> 00:00:28,670

dr. colum Kelleher located the exact

10
00:00:33,220 --> 00:00:30,920

spot where the entity scratched out its

11
00:00:36,009 --> 00:00:33,230

autograph in the form of a perfectly

12
00:00:38,320 --> 00:00:36,019

carved ice circle the odd creation was

13
00:00:40,180 --> 00:00:38,330

discovered by the caretaker of the ranch

14

00:00:42,969 --> 00:00:40,190

during his early morning rounds a

15

00:00:46,990 --> 00:00:42,979

geometric figure edged into the thin ice

16

00:00:48,640 --> 00:00:47,000

of an irrigation canal seven o'clock in

17

00:00:52,149 --> 00:00:48,650

the morning he was taking a walk along

18

00:00:57,789 --> 00:00:52,159

the canal here when he stopped and and

19

00:01:00,910 --> 00:00:57,799

saw a perfectly aged five foot nine inch

20

00:01:03,130 --> 00:01:00,920

diameter circle in the water here by

21

00:01:05,800 --> 00:01:03,140

late afternoon it would melt it looked

22

00:01:08,109 --> 00:01:05,810

like an ice skater it just cut it at the

23

00:01:10,959 --> 00:01:08,119

groove itself was probably a quarter of

24

00:01:15,550 --> 00:01:10,969

an inch thick and there were scrapings

25

00:01:17,950 --> 00:01:15,560

of ice all from all around the edge of

26

00:01:20,679 --> 00:01:17,960

the circle ice circles are rare but not

27

00:01:22,450 --> 00:01:20,689

entirely unknown larger specimens have

28

00:01:24,730 --> 00:01:22,460

appeared elsewhere in the world and

29

00:01:27,340 --> 00:01:24,740

scientists think there is one natural

30

00:01:29,859 --> 00:01:27,350

mechanism to explain their creation when

31

00:01:32,260 --> 00:01:29,869

conditions are just right circles can be

32

00:01:35,200 --> 00:01:32,270

formed by the counterclockwise flow of

33

00:01:37,120 --> 00:01:35,210

water there are also a few instances in

34

00:01:39,370 --> 00:01:37,130

Russia and other countries where

35

00:01:42,069 --> 00:01:39,380

eyewitnesses say they saw disc shaped

36

00:01:44,200 --> 00:01:42,079

craft land or the thick ice of frozen

37

00:01:46,149 --> 00:01:44,210

lakes or rivers but neither of those

38

00:01:47,169 --> 00:01:46,159

explanations account for the circle

39

00:01:49,510 --> 00:01:47,179

found on the wrench

40

00:01:50,790 --> 00:01:49,520

nor was it created by any known animal

41

00:01:55,020 --> 00:01:50,800

being is there anything

42

00:01:58,490 --> 00:01:55,030

so explanation that you know I know not

43

00:02:02,160 --> 00:01:58,500

something that is not perfectly

44

00:02:04,110 --> 00:02:02,170

inscribed in terms of uniform 5 foot 9

45

00:02:07,080 --> 00:02:04,120

inch diameter I could imagine an

46

00:02:09,750 --> 00:02:07,090

animal's crawl claws scraping a kind of

47

00:02:11,640 --> 00:02:09,760

haphazard pattern on ice as they maybe

48

00:02:14,430 --> 00:02:11,650

walk across or they look for something

49

00:02:17,460 --> 00:02:14,440

somewhere to drink from but not this

50

00:02:19,680 --> 00:02:17,470

perfectly inscribed 5 foot 9 inch

51
00:02:21,690 --> 00:02:19,690
diameter circle an investigator for

52
00:02:24,330 --> 00:02:21,700
needs was on the scene within an hour of

53
00:02:26,820 --> 00:02:24,340
the circles discovery and took photos he

54
00:02:29,310 --> 00:02:26,830
also examined the muddy soil around the

55
00:02:31,710 --> 00:02:29,320
circle to look for any prints the only

56
00:02:33,720 --> 00:02:31,720
ones found belong to cattle in a

57
00:02:36,150 --> 00:02:33,730
subsequent report written by the mid

58
00:02:38,220 --> 00:02:36,160
scientists it was reported the ice was

59
00:02:40,020 --> 00:02:38,230
three-quarters of an inch thick and the

60
00:02:42,300 --> 00:02:40,030
circle had been carved a quarter inch

61
00:02:44,460 --> 00:02:42,310
deep if it had been carved just a little

62
00:02:46,080 --> 00:02:44,470
deeper the ice would have collapsed and

63
00:02:47,850 --> 00:02:46,090

the circle would have been dissolved

64

00:02:50,220 --> 00:02:47,860

before it could be seen by the rancher

65

00:02:52,320 --> 00:02:50,230

the ice was too thin to support the

66

00:02:54,150 --> 00:02:52,330

weight of a human and there was no mark

67

00:02:56,729 --> 00:02:54,160

in the middle to indicate a tool had

68

00:02:58,830 --> 00:02:56,739

been used to draw the perfect circle but

69

00:03:01,350 --> 00:02:58,840

the scientists concluded a tool was

70

00:03:03,060 --> 00:03:01,360

definitely used to do the carving some

71

00:03:05,729 --> 00:03:03,070

of the shavings were collected for

72

00:03:08,430 --> 00:03:05,739

chemical analysis readings were taken to

73

00:03:11,190 --> 00:03:08,440

detect magnetic anomalies or radiations

74

00:03:15,660 --> 00:03:11,200

we took ice samples from outside the

75

00:03:19,080 --> 00:03:15,670

circle the actual etching from the that

76
00:03:21,390 --> 00:03:19,090
had made the circle and we we sent them

77
00:03:24,090 --> 00:03:21,400
to one of the the better laboratories

78
00:03:26,280 --> 00:03:24,100
for analysis and there was absolutely

79
00:03:28,410 --> 00:03:26,290
nothing unusual found the team also

80
00:03:30,360 --> 00:03:28,420
analyzed the flow of water in the

81
00:03:33,150 --> 00:03:30,370
irrigation ditch and concluded there is

82
00:03:36,330 --> 00:03:33,160
no way the circle was created by natural

83
00:03:38,850 --> 00:03:36,340
forces someone or some thing carved it

84
00:03:41,460 --> 00:03:38,860
and seemingly anticipated it would be

85
00:03:43,440 --> 00:03:41,470
noticed before the afternoon Sun melted

86
00:03:44,449 --> 00:03:43,450
it away it was not like tonya harding's

87
00:03:45,649 --> 00:03:44,459
lived in here and

88
00:03:46,819 --> 00:03:45,659

in the evening and did a little

89

00:03:49,069 --> 00:03:46,829

ice-skating because I'm going to

90

00:03:52,369 --> 00:03:49,079

supported her that's right 15 pounds of

91

00:03:54,470 --> 00:03:52,379

weight by by early afternoon that the

92

00:03:56,780 --> 00:03:54,480

ice had melted it was a very thin layer

93

00:03:58,819 --> 00:03:56,790

of ice it had totally melted and it was

94

00:04:00,559 --> 00:03:58,829

gone you know the other thing is that it

95

00:04:04,459 --> 00:04:00,569

was pretty obvious that it happened the

96

00:04:09,729 --> 00:04:04,469

night before because the the ice melts

97

00:04:12,110 --> 00:04:09,739

every day in February case unsolved

98

00:04:14,420 --> 00:04:12,120

investigators were unable to determine

99

00:04:17,270 --> 00:04:14,430

how the formation had been created or

100

00:04:19,729 --> 00:04:17,280

more importantly why the mystery circle

101

00:04:22,099 --> 00:04:19,739

became the last definitive episode of

102

00:04:25,380 --> 00:04:22,109

the knids era and it was interpreted by
