

EXTRAORDINARY
BELIEFS

JEREM

1
00:00:00,900 --> 00:00:05,690
and this is weapons

2
00:00:11,150 --> 00:00:08,930
when OSAP is Born the first case they

3
00:00:13,490 --> 00:00:11,160
start looking at is Tic Tac and the

4
00:00:16,490 --> 00:00:13,500
person they came to rely on to write the

5
00:00:18,950 --> 00:00:16,500
first report and investigate a report on

6
00:00:21,650 --> 00:00:18,960
Tick Tock was Jay Stratton uh I released

7
00:00:23,390 --> 00:00:21,660
that report in 2018 it had no Insignia

8
00:00:25,609 --> 00:00:23,400
on it it wasn't signed it doesn't say

9
00:00:27,050 --> 00:00:25,619
who wrote it but he we could say now

10
00:00:28,670 --> 00:00:27,060
he's the guy who wrote it and it was

11
00:00:30,349 --> 00:00:28,680
great work he talked to all these

12
00:00:33,049 --> 00:00:30,359
aviators and different people are

13
00:00:34,790 --> 00:00:33,059

involved in it it is one report that

14

00:00:36,410 --> 00:00:34,800

then became a much bigger report that

15

00:00:38,630 --> 00:00:36,420

has not been made public but uh

16

00:00:40,970 --> 00:00:38,640

eventually will be someday so that's one

17

00:00:42,470 --> 00:00:40,980

bit of work that he did a second thing

18

00:00:45,069 --> 00:00:42,480

that the public would know about is the

19

00:00:47,630 --> 00:00:45,079

birds there are 38 of these nerds

20

00:00:49,549 --> 00:00:47,640

defense intelligence reference documents

21

00:00:51,889 --> 00:00:49,559

is that that's the acronym what it means

22

00:00:54,170 --> 00:00:51,899

and 38 of those reports were prepared

23

00:00:56,450 --> 00:00:54,180

for the OSAP program and as Jay

24

00:00:57,410 --> 00:00:56,460

explained to us when we when we met with

25

00:00:58,430 --> 00:00:57,420

him

26

00:01:01,189 --> 00:00:58,440

um you know it was meant to be a

27

00:01:03,349 --> 00:01:01,199

Baseline uh to establish what our

28

00:01:06,289 --> 00:01:03,359

Baseline is for Science and Technology

29

00:01:08,149 --> 00:01:06,299

in specific kinds of categories and to

30

00:01:10,130 --> 00:01:08,159

project what it might be 50 years from

31

00:01:11,870 --> 00:01:10,140

now and you know I remember when I made

32

00:01:14,270 --> 00:01:11,880

some of those when you and I release

33

00:01:16,490 --> 00:01:14,280

some of those reports uh people were

34

00:01:18,469 --> 00:01:16,500

gripping and moaning oh this is sci-fi

35

00:01:20,210 --> 00:01:18,479

it's nonsense it's garbage science well

36

00:01:21,830 --> 00:01:20,220

it's not that's not how it was how it

37

00:01:23,810 --> 00:01:21,840

was received by the defense industry

38

00:01:25,550 --> 00:01:23,820

they loved those reports because it was

39

00:01:28,370 --> 00:01:25,560

really good work and they needed a

40

00:01:32,330 --> 00:01:28,380

Baseline from which they could compare

41

00:01:34,370 --> 00:01:32,340

when they had UFO cases to to analyze is

42

00:01:36,770 --> 00:01:34,380

this ours could it be ours could we

43

00:01:38,749 --> 00:01:36,780

duplicate that 50 years from now

44

00:01:41,569 --> 00:01:38,759

um in the and many times the answer was

45

00:01:43,670 --> 00:01:41,579

no right and and Jay actually talked

46

00:01:46,609 --> 00:01:43,680

about this in this interview that we did

47

00:01:48,289 --> 00:01:46,619

it's like he was saying look we were

48

00:01:50,990 --> 00:01:48,299

trying to find the disruptive

49

00:01:52,670 --> 00:01:51,000

Technologies in 50 years from now the

50

00:01:55,190 --> 00:01:52,680

things that we were seeing the things

51
00:01:57,170 --> 00:01:55,200
that were going on we we didn't have

52
00:01:58,910 --> 00:01:57,180
good explanations for so we have to

53
00:02:00,789 --> 00:01:58,920
theorize and get out there like what

54
00:02:03,469 --> 00:02:00,799
could it be how could it be happening

55
00:02:04,730 --> 00:02:03,479
it's so interesting to me the way he

56
00:02:08,990 --> 00:02:04,740
also said

57
00:02:10,430 --> 00:02:09,000
he was so dismissive in a in a calm cool

58
00:02:12,050 --> 00:02:10,440
collected way because he really

59
00:02:15,050 --> 00:02:12,060
empathizes with people that have less

60
00:02:17,990 --> 00:02:15,060
information than him and and I get that

61
00:02:20,210 --> 00:02:18,000
so so certain things that are classified

62
00:02:21,589 --> 00:02:20,220
within our Department of Defense he

63
00:02:23,390 --> 00:02:21,599

can't just like go out on Twitter and

64

00:02:25,309 --> 00:02:23,400

say even if he gets on Twitter you know

65

00:02:27,170 --> 00:02:25,319

what I mean so but

66

00:02:30,290 --> 00:02:27,180

he was very clear

67

00:02:33,229 --> 00:02:30,300

that if something was identifiable if

68

00:02:36,890 --> 00:02:33,239

something was ours if something was a

69

00:02:38,030 --> 00:02:36,900

traditional object or a known for a

70

00:02:39,589 --> 00:02:38,040

nation

71

00:02:42,530 --> 00:02:39,599

or even a question there could be a

72

00:02:45,050 --> 00:02:42,540

foreign Nation known despite the

73

00:02:47,330 --> 00:02:45,060

capabilities that those would not be

74

00:02:50,809 --> 00:02:47,340

included in his reporting in his

75

00:02:52,309 --> 00:02:50,819

analysis and he really specifically said

76

00:02:54,290 --> 00:02:52,319

you know I get it that people think it's

77

00:02:56,630 --> 00:02:54,300

just one piece of evidence like just a

78

00:02:58,910 --> 00:02:56,640

video but you and I are hyper personally

79

00:03:00,830 --> 00:02:58,920

aware that there's other corroborative

80

00:03:02,869 --> 00:03:00,840

evidence that is not for public

81

00:03:05,030 --> 00:03:02,879

consumption Jay says it himself though

82

00:03:07,490 --> 00:03:05,040

we had more information and so when you

83

00:03:09,890 --> 00:03:07,500

when you say oh it's you know Birds

84

00:03:13,369 --> 00:03:09,900

balloons optical illusions Reflections

85

00:03:15,589 --> 00:03:13,379

pilot error he's like it's not

86

00:03:17,270 --> 00:03:15,599

we would never have included it and it's

87

00:03:19,490 --> 00:03:17,280

nice to hear him say that because it

88

00:03:21,710 --> 00:03:19,500

carries a lot more weight than just you

89

00:03:23,210 --> 00:03:21,720

know it actually supports the the pilots

90

00:03:25,009 --> 00:03:23,220

and and people that know because they

91

00:03:28,009 --> 00:03:25,019

were there exactly I mean you know the

92

00:03:30,470 --> 00:03:28,019

uh the armchair experts the debunkers on

93

00:03:32,630 --> 00:03:30,480

social media just throw anything out

94

00:03:34,850 --> 00:03:32,640

throw it out and see what sticks against

95

00:03:37,070 --> 00:03:34,860

the wall it's Birds it's flares it's you

96

00:03:39,830 --> 00:03:37,080

know it's exhaust from a jet it's

97

00:03:43,190 --> 00:03:39,840

ridiculous is what it is yeah and uh you

98

00:03:45,050 --> 00:03:43,200

know for that explanation to work any of

99

00:03:47,449 --> 00:03:45,060

those you have to assume the US military

100

00:03:49,550 --> 00:03:47,459

are idiots that the pilots are idiots

101
00:03:51,949 --> 00:03:49,560
that the people uh Manning the sensors

102
00:03:53,809 --> 00:03:51,959
are idiots that the analysis done by

103
00:03:55,369 --> 00:03:53,819
intelligence officials afterward that

104
00:03:57,589 --> 00:03:55,379
they're all idiots that they don't

105
00:03:59,809 --> 00:03:57,599
recognize a bird from uh you know an

106
00:04:03,110 --> 00:03:59,819
unknown object traveling at a high rate

107
00:04:06,770 --> 00:04:03,120
of speed so Jay did share with us

108
00:04:08,330 --> 00:04:06,780
that there is so much information that

109
00:04:10,009 --> 00:04:08,340
cannot be shared with the public for

110
00:04:13,070 --> 00:04:10,019
national security reasons that went into

111
00:04:15,589 --> 00:04:13,080
their analyzes of these key cases gimbal

112
00:04:17,440 --> 00:04:15,599
Tic Tac go fast and a lot of others that

113
00:04:19,569 --> 00:04:17,450

you and I got into
