

1

00:00:00,000 --> 00:00:04,000

You know, I've been around for a while.

2

00:00:04,000 --> 00:00:06,000

Met some interesting people.

3

00:00:06,000 --> 00:00:08,000

Done some crazy things.

4

00:00:08,000 --> 00:00:11,000

See, you just might think that there's not much

5

00:00:11,000 --> 00:00:14,000

that can take you by surprise.

6

00:00:14,000 --> 00:00:16,000

You'd be wrong.

7

00:00:21,000 --> 00:00:24,000

The world is full of stories.

8

00:00:24,000 --> 00:00:27,000

Science and things that are made.

9

00:00:27,000 --> 00:00:30,000

And you can found me every single day.

10

00:00:30,000 --> 00:00:33,000

Incredible mysteries that keep me awake at night.

11

00:00:33,000 --> 00:00:35,000

Some I can answer.

12

00:00:35,000 --> 00:00:37,000

Oh, there's just...

13

00:00:37,000 --> 00:00:39,000

Stify logic.

14

00:00:40,000 --> 00:00:43,000

Are we living on a hostile planet?

15

00:00:45,000 --> 00:00:48,000

In Newfoundland, a small community is devastated

16

00:00:48,000 --> 00:00:51,000

by a mysterious explosion.

17

00:00:51,000 --> 00:00:54,000

It really looked like Japan had done off me.

18

00:00:54,000 --> 00:00:57,000

Was it a secret weapon or a freak of nature?

19

00:00:59,000 --> 00:01:02,000

Unlike Michigan, a yacht vanishes into thin air.

20

00:01:02,000 --> 00:01:06,000

This is the most extraordinary thing I have ever witnessed.

21

00:01:06,000 --> 00:01:09,000

Was it swallowed by an evil fog?

22

00:01:11,000 --> 00:01:15,000

And in the Indian Ocean, two giant flashes of light

23

00:01:15,000 --> 00:01:18,000

send a nation into panic.

24

00:01:18,000 --> 00:01:22,000

Everybody knew for sure this was something to be very concerned about.

25

00:01:22,000 --> 00:01:24,000

Yeah.

26

00:01:24,000 --> 00:01:26,000

It's a weird world.

27

00:01:26,000 --> 00:01:28,000

And I love it.

28

00:01:46,000 --> 00:01:48,000

Listen.

29

00:01:48,000 --> 00:01:51,000

Nature isn't a wonderful...

30

00:01:51,000 --> 00:01:54,000

In a mother earth, she's all we have.

31

00:01:54,000 --> 00:01:57,000

Over six billion of us occupy, possibly,

32

00:01:57,000 --> 00:02:00,000

the only planet in the universe that sustains light.

33

00:02:00,000 --> 00:02:03,000

But yet we take everything from her

34

00:02:03,000 --> 00:02:05,000

and give very little back.

35

00:02:05,000 --> 00:02:08,000

Is she getting mad at us?

36

00:02:08,000 --> 00:02:11,000

Are killer tsunamis, quakes and tornadoes

37

00:02:11,000 --> 00:02:14,000

the Earth's way of saying enough is enough?

38

00:02:14,000 --> 00:02:16,000

Maybe.

39

00:02:18,000 --> 00:02:20,000

But there's something else going on with our planet.

40

00:02:20,000 --> 00:02:23,000

Freaks of nature that are impossible to explain

41

00:02:23,000 --> 00:02:26,000

and can strike you out of the blue.

42

00:02:34,000 --> 00:02:37,000

Sunday, April 2nd, 1978.

43

00:02:37,000 --> 00:02:41,000

Twelve-year-old Darren Bickford was making his way home

44

00:02:41,000 --> 00:02:44,000

on Belle Island, a small community in Newfoundland,

45

00:02:44,000 --> 00:02:47,000

on the east coast of Canada.

46

00:02:47,000 --> 00:02:50,000

I was outside riding my pedal bike,

47

00:02:50,000 --> 00:02:53,000

and I knew one of my favorite shows came on television at 11.

48

00:02:53,000 --> 00:02:56,000

So I was pedaling back home.

49

00:02:56,000 --> 00:02:58,000

As I approached the end of our driveway,

50

00:02:58,000 --> 00:03:00,000

all the birds stopped chirping,

51

00:03:00,000 --> 00:03:02,000

all the dogs stopped barking.

52

00:03:02,000 --> 00:03:04,000

It just went so still.

53

00:03:04,000 --> 00:03:06,000

The ground shook underneath me.

54

00:03:06,000 --> 00:03:10,000

It was the biggest noise I have ever heard in my life.

55

00:03:10,000 --> 00:03:15,000

Suddenly, something unbelievable appears right in front of Darren,

56

00:03:15,000 --> 00:03:18,000

the glowing ball of light.

57

00:03:19,000 --> 00:03:23,000

It was hovering off the ground when it appeared out of thin air,

58

00:03:23,000 --> 00:03:26,000

and the beautiful colors of blue

59

00:03:26,000 --> 00:03:28,000

laid up most of the center of the ball.

60

00:03:28,000 --> 00:03:33,000

And outside of the blue, it was orange and yellow mixing together.

61

00:03:33,000 --> 00:03:38,000

And then just like that, the ball of light just disappeared into thin air.

62

00:03:40,000 --> 00:03:43,000

This is, with no doubt, the strangest,

63

00:03:43,000 --> 00:03:46,000

most terrifying thing I've ever seen.

64

00:03:46,000 --> 00:03:51,000

But I was terrified what I was transfixed by.

65

00:03:51,000 --> 00:03:54,000

It was so beautiful looking, this ball of light,

66

00:03:54,000 --> 00:03:57,000

and the colors and the way it swirled around.

67

00:03:57,000 --> 00:04:01,000

You couldn't help but stare at it, even though I was scared.

68

00:04:01,000 --> 00:04:04,000

I was shaken, but I loved it, and I've never seen anything like it.

69

00:04:04,000 --> 00:04:08,000

And I guess I will probably never see nothing like it again in my life.

70

00:04:08,000 --> 00:04:11,000

It was all over in four or five seconds.

71

00:04:11,000 --> 00:04:16,000

But those four or five seconds are burnt into my brain just like a role of film.

72

00:04:17,000 --> 00:04:20,000

The massive explosion was heard over 60 kilometers away.

73

00:04:20,000 --> 00:04:22,000

Its impact wreaked havoc.

74

00:04:22,000 --> 00:04:27,000

People reported exploding TV sets, blue flames shooting from electrical outlets,

75

00:04:27,000 --> 00:04:31,000

and a strange beam of light coming from the sky.

76

00:04:32,000 --> 00:04:36,000

This bizarre event was dubbed the Bell Island Boom.

77

00:04:37,000 --> 00:04:40,000

After this happened, everyone was in bewilderment.

78

00:04:40,000 --> 00:04:44,000

One house seemed to catch the brunt of the boom.

79

00:04:45,000 --> 00:04:48,000

It belonged to Darren's grandfather, James Pickren.

80

00:04:50,000 --> 00:04:55,000

Fuses in his fuse panel were glass fuses that were screwed into the panel.

81

00:04:55,000 --> 00:05:01,000

These had come out like bullets, and went about 20-odd feet the length of their hallway,

82

00:05:01,000 --> 00:05:03,000

and buried yourselves in the wall.

83

00:05:03,000 --> 00:05:08,000

Grandpa's chicken coop is demolished.

84

00:05:08,000 --> 00:05:11,000

The chickens inside killed instantly.

85

00:05:13,000 --> 00:05:15,000

It really looked like the bond had gone off in his shed.

86

00:05:16,000 --> 00:05:24,000

It's a bizarre scene, but even more baffling are three large holes blown into the ground.

87

00:05:25,000 --> 00:05:28,000

There was a cone-shaped hole going three or four feet down.

88

00:05:28,000 --> 00:05:30,000

We didn't know what it was.

89

00:05:31,000 --> 00:05:36,000

This weird and mysterious incident soon generates massive interest around the world.

90

00:05:37,000 --> 00:05:40,000

A lot of people came, the media came.

91

00:05:40,000 --> 00:05:45,000

The television news crew had me describe to them what I had seen.

92

00:05:46,000 --> 00:05:51,000

Myself, I thought something happened to the world, or someone dropped bombs or something.

93

00:05:52,000 --> 00:05:57,000

Now, this is really weird, or what.

94

00:05:57,000 --> 00:06:00,000

Little kid is riding his bike, minding his own business,

95

00:06:00,000 --> 00:06:03,000

when boom, this town suddenly smashed by some mysterious explosion,

96

00:06:03,000 --> 00:06:06,000

turning fuses into lethal weapons, exploding TV,

97

00:06:06,000 --> 00:06:09,000

and what about those poor chickens, awful?

98

00:06:09,000 --> 00:06:12,000

What could have caused something like that?

99

00:06:14,000 --> 00:06:16,000

Was that me?

100

00:06:17,000 --> 00:06:23,000

Jim Farrell was a local fire investigator and one of the first to the scene.

101

00:06:23,000 --> 00:06:25,000

After being asked to investigate,

102

00:06:25,000 --> 00:06:28,000

he sends his report to the Royal Canadian Mounted Police.

103

00:06:28,000 --> 00:06:32,000

The RCMP officially concludes that it was lightning.

104

00:06:32,000 --> 00:06:36,000

I've never encountered anything so great as disforce.

105

00:06:37,000 --> 00:06:40,000

But Jim isn't the only one who wants answers.

106

00:06:40,000 --> 00:06:43,000

Soon, Darren gets a surprise visit.

107

00:06:44,000 --> 00:06:46,000

They were these strange men.

108

00:06:46,000 --> 00:06:51,000

I was told they were scientists from Los Alamos, New Mexico.

109

00:06:53,000 --> 00:06:58,000

The Los Alamos National Laboratory built and tested the first atomic bombs.

110

00:06:59,000 --> 00:07:01,000

Could there be a connection?

111

00:07:02,000 --> 00:07:07,000

The men interview everyone involved, including Darren and Jim.

112

00:07:07,000 --> 00:07:10,000

I told them everything I knew, and they've seen it.

113

00:07:10,000 --> 00:07:15,000

I was more or less ordered to turn over my exhibits to the gentlemen.

114

00:07:15,000 --> 00:07:20,000

Thirty-three years later, and I would still like to know this day,

115

00:07:20,000 --> 00:07:23,000

what was the ball of light that I saw?

116

00:07:26,000 --> 00:07:33,000

If it was lightning, how did it remain stationary and motionless in the air?

117

00:07:33,000 --> 00:07:40,000

How did it appear out of thin air and then disappear into thin air?

118

00:07:40,000 --> 00:07:42,000

Those things aren't supposed to happen.

119

00:07:42,000 --> 00:07:45,000

What they do happen, I saw it happen.

120

00:07:46,000 --> 00:07:50,000

The three strangers leave without giving any concrete answers.

121

00:07:50,000 --> 00:07:52,000

What were they looking for?

122

00:07:52,000 --> 00:07:57,000

What did Darren Victor and the residents of Belle Island witness?

123

00:07:57,000 --> 00:08:01,000

And what could have created the Belle Island boom?

124

00:08:03,000 --> 00:08:09,000

Science journalist Brian Dunning believes the answer isn't so earth-shattering after all.

125

00:08:10,000 --> 00:08:15,000

There's actually about 600 booms between starting in late 1977 going through mid-1978.

126

00:08:15,000 --> 00:08:18,000

Nobody could really localize exactly what was happening,

127

00:08:18,000 --> 00:08:22,000

but it was heard from South Carolina all the way up through Canada.

128

00:08:23,000 --> 00:08:26,000

Could the Belle Island boom be part of a bigger phenomenon?

129

00:08:27,000 --> 00:08:31,000

What could be responsible for this rash of strange booms?

130

00:08:31,000 --> 00:08:36,000

As so often happens when you have a mystery, all kinds of people started coming up with crazy explanations for what these might be.

131

00:08:36,000 --> 00:08:42,000

And the most common one was people thought it was some kind of a military test of a new super weapon,

132

00:08:42,000 --> 00:08:45,000

something like maybe that Nikola Tesla might have envisioned.

133

00:08:45,000 --> 00:08:48,000

Tesla, when he was in his later years and was getting kind of crazy,

134

00:08:48,000 --> 00:08:51,000

he was coming up with all kinds of proposals for ideas.

135

00:08:51,000 --> 00:08:56,000

He never built them or anything, but one of his ideas was a giant atmospheric super weapon

136

00:08:56,000 --> 00:09:00,000

that would move a large chunk of the atmosphere over a city and destroy it.

137

00:09:00,000 --> 00:09:04,000

And some people were saying that this might be a test, an actual test.

138

00:09:04,000 --> 00:09:07,000

Maybe someone actually built this weapon and we're trying it out.

139

00:09:07,000 --> 00:09:12,000

We don't know any super weapons that are consistent with what happened at Belle Island.

140

00:09:12,000 --> 00:09:16,000

It's purely conjecture. It's purely just a hypothesis that you make up.

141

00:09:16,000 --> 00:09:18,000

There's no evidence supporting that.

142

00:09:18,000 --> 00:09:21,000

Maybe it is the explanation, but we don't have any reason to think so.

143

00:09:21,000 --> 00:09:25,000

What started happening in December of 1977 is that the Concorde was flying over.

144

00:09:25,000 --> 00:09:28,000

It was making its supersonic flights between New York and Europe,

145

00:09:28,000 --> 00:09:31,000

and that created sonic booms coming over the land.

146

00:09:31,000 --> 00:09:35,000

When planes fly through the air, they make waves just like a boat in the water.

147

00:09:35,000 --> 00:09:39,000

The faster you fly, the closer the waves build up at the tip of the air plane.

148

00:09:39,000 --> 00:09:44,000

And when a plane actually goes faster than the sound waves can move,

149

00:09:44,000 --> 00:09:51,000

they pile up into one big sonic shock wave that can cause damage to the areas on land below.

150

00:09:51,000 --> 00:09:56,000

Could the Belle Island boom just have been the effect of a sonic boom

151

00:09:56,000 --> 00:09:59,000

in the world's first supersonic passenger jet?

152

00:09:59,000 --> 00:10:05,000

Because it was a sonic aircraft and made a big sonic boom, it was supposed to go way out to sea.

153

00:10:05,000 --> 00:10:09,000

However, on hot days, because of fuel expansion issues,

154

00:10:09,000 --> 00:10:12,000

it would have to take a shortcut route and it would go over Nova Scotia.

155

00:10:12,000 --> 00:10:15,000

For all the 600 mystery booms that we heard,

156

00:10:15,000 --> 00:10:20,000

most of them were correlated with sonic booms from the Concorde and other aircraft.

157

00:10:22,000 --> 00:10:28,000

Could the world's fastest passenger jet have caused the tumor on Belle Island?

158

00:10:30,000 --> 00:10:35,000

A small, newfoundland community is thrown into chaos by an earth-shattering boom.

159

00:10:36,000 --> 00:10:39,000

Was it caused by a supersonic airline?

160

00:10:40,000 --> 00:10:43,000

Carl Steffel is a professor of engineering.

161

00:10:43,000 --> 00:10:47,000

His theory is very...electric.

162

00:10:47,000 --> 00:10:52,000

What I've read of the Belle Island boom sounds consistent with a super lightning bolt.

163

00:10:53,000 --> 00:11:00,000

Super lightning bolts are extremely rare, but freakishly powerful bolts of lightning.

164

00:11:00,000 --> 00:11:03,000

Most lightning has a negative charge.

165

00:11:03,000 --> 00:11:08,000

However, about 10% or less of lightning bolts are positively charged.

166

00:11:09,000 --> 00:11:12,000

Positive lightning also tends to travel farther.

167

00:11:12,000 --> 00:11:16,000

It can go several miles from cloud to cloud, for example.

168

00:11:16,000 --> 00:11:22,000

So the eyewitness reports of the Belle Island boom that said the sound was heard for many miles around.

169

00:11:22,000 --> 00:11:32,000

That's consistent with a long, positive lightning bolt that, you know, was going through several clouds in several miles distance.

170

00:11:32,000 --> 00:11:37,000

Superbolts almost always occur in the upper atmosphere over oceans.

171

00:11:37,000 --> 00:11:40,000

Very rarely do they hit land.

172

00:11:40,000 --> 00:11:44,000

But do they explain the weird things seen that day on Belle Island?

173

00:11:44,000 --> 00:11:48,000

Like glass fuses acting like bullets.

174

00:11:48,000 --> 00:11:53,000

Strange things happen when very large currents flow through wires that aren't designed to carry them.

175

00:11:53,000 --> 00:12:00,000

Tremendous forces are set up, magnetic forces that can cause binary objects to fly like projectiles.

176

00:12:01,000 --> 00:12:05,000

Okay, but what about the poor chickens that were roasted in their coop?

177

00:12:05,000 --> 00:12:08,000

Chickens are susceptible to being electrocuted.

178

00:12:08,000 --> 00:12:15,000

What can happen with any kind of animal that are in a place where lightning hits the ground is the current running along the ground

179

00:12:15,000 --> 00:12:20,000

can actually run up through the legs and through the body and kill the animal.

180

00:12:20,000 --> 00:12:26,000

Stefan's Superbolts theory seems to help answer some of the mysterious incidents on Belle Island.

181

00:12:26,000 --> 00:12:29,000

But does it explain the weird glowing ball of light?

182

00:12:29,000 --> 00:12:37,000

Witnessed by Darren Bickford, Stefan believes the answer lies in an incredibly rare natural phenomenon.

183

00:12:39,000 --> 00:12:42,000

The ball of light hovering sounds a whole lot like ball lightning.

184

00:12:42,000 --> 00:12:46,000

Ball lightning is sometimes seen to form right after a lightning strike.

185

00:12:48,000 --> 00:12:51,000

We suspect that it is an electrical phenomenon.

186

00:12:51,000 --> 00:12:55,000

It may be something that science doesn't know about yet.

187

00:12:56,000 --> 00:12:59,000

Did lightning make fuses explode and act like bullets?

188

00:12:59,000 --> 00:13:02,000

Did it roast those chickens?

189

00:13:02,000 --> 00:13:04,000

Questions persist.

190

00:13:04,000 --> 00:13:10,000

If scientists don't even know what ball lightning is, how can they think that that's what Darren saw?

191

00:13:11,000 --> 00:13:19,000

If it was a Superbolt, why did high-level personnel from a top-secret lab show up to investigate?

192

00:13:19,000 --> 00:13:25,000

And finally, what caused the three craters at James Bickford's place?

193

00:13:27,000 --> 00:13:31,000

Lee Tizard is an electromagnetic weapons researcher.

194

00:13:31,000 --> 00:13:35,000

He thinks mother nature shouldn't take the rap for this one.

195

00:13:36,000 --> 00:13:45,000

I believe the evidence indicates that it was caused by something man-made and not something by nature.

196

00:13:45,000 --> 00:13:48,000

It was an accident.

197

00:13:50,000 --> 00:13:57,000

But what could cause an accident on this scale? What kind of accident blows holes in islands?

198

00:13:58,000 --> 00:14:08,000

During that time frame, the Russians were pounding North America with a very powerful and disruptive signal called the Woodpecker signal.

199

00:14:09,000 --> 00:14:17,000

The Woodpecker signal was a radio signal used by the Soviets in the 1970s to provide early warning of an enemy weapons launch.

200

00:14:18,000 --> 00:14:28,000

By bouncing radio waves off the Earth's upper atmosphere, the ionosphere, they could analyze the returning waves for disruptions indicating a missile attack.

201

00:14:28,000 --> 00:14:43,000

It was so disruptive that the UN and a number of countries banded together at the UN and protested to the Soviet Union when they found out that it was originating from Gomal in the Soviet Union.

202

00:14:43,000 --> 00:14:47,000

They protested and demanded it be stopped, but it really didn't stop for a long time.

203

00:14:47,000 --> 00:14:54,000

I think it stopped in the mid-80s, but it went on for at least 10 years, the mid-70s to the mid-80s.

204

00:14:54,000 --> 00:15:01,000

According to Tizard, the Woodpecker signal was a ticking time bomb. He believes it's use.

205

00:15:01,000 --> 00:15:08,000

Accidentally created a column of electromagnetic energy known as a standing columnar wave over North America.

206

00:15:08,000 --> 00:15:15,000

Despite being invisible to the eye, this huge energy field had the potential to be disastrous.

207

00:15:16,000 --> 00:15:22,000

I believe that the standing columnar wave that was established collapsed.

208

00:15:22,000 --> 00:15:30,000

And when the standing columnar wave collapses, it creates these vortices of electromagnetic energy that have to dissipate.

209

00:15:31,000 --> 00:15:42,000

It sent down three spinning vortices of electromagnetic energy, and that's what we believe struck explaining the three holes.

210

00:15:43,000 --> 00:15:52,000

It's believed that the standing columnar wave that was created by the Woodpecker signal was attracted to Bell Island because of the iron ore content.

211

00:15:52,000 --> 00:15:55,000

It was a former iron ore mine.

212

00:15:55,000 --> 00:16:04,000

Did the iron-rich Bell Island act as a giant magnet for a massive burst of electromagnetic energy caused by the Soviets?

213

00:16:04,000 --> 00:16:10,000

Or was it struck by a superbowl with a side dish of ball lightning?

214

00:16:10,000 --> 00:16:18,000

Whatever the truth, Darren Bickford and the other survivors of the Bell Island boom may never know.

215

00:16:18,000 --> 00:16:20,000

Weird.

216

00:16:20,000 --> 00:16:22,000

What?

217

00:16:28,000 --> 00:16:36,000

A mysterious deadly fog haunts Lake Michigan, swallowing ships and planes and bending time.

218

00:16:36,000 --> 00:16:42,000

Is this a true freak of nature? Is it weird? Or what?

219

00:16:43,000 --> 00:16:46,000

In three meters, turn right.

220

00:16:46,000 --> 00:16:48,000

You know, modern technology is amazing.

221

00:16:48,000 --> 00:16:50,000

Turn right.

222

00:16:50,000 --> 00:16:56,000

I mean, with nothing but this tiny gadget I can navigate to within an inch of wherever I want to go.

223

00:16:56,000 --> 00:16:57,000

Look.

224

00:16:57,000 --> 00:17:03,000

Prepare to turn left. Turn left. Go straight ahead.

225

00:17:03,000 --> 00:17:08,000

It even talks to you. What a nice lady. And it's so accurate.

226

00:17:08,000 --> 00:17:10,000

Turn right.

227

00:17:11,000 --> 00:17:14,000

Turn right. Turn right.

228

00:17:14,000 --> 00:17:18,000

Can't turn right. You stupid thing. There's a wall here.

229

00:17:18,000 --> 00:17:20,000

Go straight ahead.

230

00:17:22,000 --> 00:17:24,000

Go straight ahead.

231

00:17:25,000 --> 00:17:27,000

Calculating route.

232

00:17:27,000 --> 00:17:32,000

Have you ever felt yourself disoriented like you're lost in the woods?

233

00:17:32,000 --> 00:17:34,000

Well, I am.

234

00:17:34,000 --> 00:17:36,000

Go straight ahead.

235

00:17:36,000 --> 00:17:38,000

No!

236

00:17:40,000 --> 00:17:43,000

It's not a pleasant experience. I can assure you.

237

00:17:44,000 --> 00:17:48,000

The Great Lakes of North America hold the fifth of the world's fresh water.

238

00:17:48,000 --> 00:17:53,000

They're also one of the most popular areas for sailing in the world.

239

00:17:53,000 --> 00:18:01,000

But on a summer night, nearly two decades ago, Kathy Doer discovered these gentle waters aren't quite what they seem.

240

00:18:03,000 --> 00:18:08,000

The events of that night challenged my conventional view of reality.

241

00:18:08,000 --> 00:18:13,000

It's a warm July evening when Kathy sets off for a leisurely sail.

242

00:18:15,000 --> 00:18:20,000

Clear sky, light chop. It was beautiful out and it was hot.

243

00:18:20,000 --> 00:18:29,000

Just around nightfall, her calm journey is upended by something mysterious and alarming.

244

00:18:29,000 --> 00:18:38,000

Very abruptly, we encountered fog. A very strange fog. It just descended on us.

245

00:18:38,000 --> 00:18:45,000

Oof, just like that. At that point, I became very, very, very cold. In fact, I was freezing.

246

00:18:46,000 --> 00:18:52,000

Blinded and cold, Kathy and her yacht have seemingly disappeared into a void.

247

00:18:52,000 --> 00:19:02,000

The boat began a strange aquatic dance. It began to turn, almost as if it were peruecting on its axis.

248

00:19:03,000 --> 00:19:06,000

There was no movement of the sea. This was not a whirlpool.

249

00:19:07,000 --> 00:19:14,000

I looked at the captain and I said, who's steering the vessel? And he said, nobody is steering itself.

250

00:19:14,000 --> 00:19:24,000

Amazingly, the vessel does three complete 360-degree turns. Then, as quickly as it appeared, the fog suddenly vanishes.

251

00:19:25,000 --> 00:19:33,000

They regain control of the boat and head for home. But when Kathy looks at her watch, she makes a startling discovery.

252

00:19:34,000 --> 00:19:39,000

I've gone over this a hundred times. We should have been back by 10 p.m. and it was after midnight.

253

00:19:40,000 --> 00:19:46,000

We cannot count for two hours. I don't know what happened to that time.

254

00:19:47,000 --> 00:19:51,000

Kathy's pleasure cruise had somehow become a nightmare.

255

00:19:54,000 --> 00:19:59,000

I just remember thinking, this is the most extraordinary thing I have ever, ever witnessed.

256

00:20:00,000 --> 00:20:09,000

What happened to Kathy and her yacht? Remarkably, her experience isn't the only weird event to occur on Lake Michigan.

257

00:20:10,000 --> 00:20:12,000

Numerous unexplained mysteries have occurred here.

258

00:20:15,000 --> 00:20:22,000

Passenger airplanes vanishing without a trace. Legends of ghost ships appearing out of nowhere.

259

00:20:22,000 --> 00:20:31,000

And thousands of UFO sightings. Could the mysterious fog Kathy encountered be linked to these strange events?

260

00:20:32,000 --> 00:20:35,000

Was it a natural phenomenon or something unknown?

261

00:20:39,000 --> 00:20:41,000

Pilot Bruce Gernon believes he has the answer.

262

00:20:43,000 --> 00:20:50,000

When I first heard Kathy's story, I immediately realized that she had experienced what I call

electronic fog.

263

00:20:52,000 --> 00:21:02,000

Bruce believes that sometimes different magnetic fields from the Earth collide in powerful, freaked thunderstorms over remote bodies of water such as Lake Michigan.

264

00:21:03,000 --> 00:21:07,000

The result is a metallic, highly charged fog.

265

00:21:08,000 --> 00:21:15,000

It's been known to actually chase vessels and try to capture them.

266

00:21:16,000 --> 00:21:26,000

And once it captures them, it clings to them and the people become disoriented because it doesn't make sense to them.

267

00:21:27,000 --> 00:21:36,000

No one has ever realized that it's attached to them. Everyone always thinks that they're moving inside this fog.

268

00:21:37,000 --> 00:21:39,000

They don't realize that the fog is moving with them.

269

00:21:40,000 --> 00:21:55,000

Once formed, the electronic fog is magnetically attracted to metal objects like ships and airplanes, raking havoc on their navigational controls and displaying other incredible properties.

270

00:21:56,000 --> 00:22:02,000

NASA has just recently announced that they have discovered something new in certain types of thunderstorms.

271

00:22:03,000 --> 00:22:08,000

And it appears at the top of the storm, the emitting antimatter.

272

00:22:10,000 --> 00:22:17,000

Created by massive lightning within a storm, antimatter produces 10,000 times more power than nuclear energy.

273

00:22:18,000 --> 00:22:24,000

Sometimes it's speculated that this sort of power could open doors to new dimensions of time and space.

274

00:22:25,000 --> 00:22:30,000

And this is a critical discovery that relates to the electronic fog.

275

00:22:32,000 --> 00:22:35,000

Could a mystery fog have sucked Kathy Dorff forward in time?

276

00:22:36,000 --> 00:22:39,000

Do we need to rewrite our science books?

277

00:22:40,000 --> 00:22:43,000

This is a very real phenomenon.

278

00:22:46,000 --> 00:22:54,000

A woman and her yacht suddenly disappear while sailing on Lake Michigan, where they're taken by a freak of nature known as electronic fog.

279

00:22:57,000 --> 00:22:59,000

Dr. Don Adrian Rice doesn't think so.

280

00:23:00,000 --> 00:23:06,000

Human beings are not always reliable witnesses to our own experiences.

281

00:23:07,000 --> 00:23:09,000

For him, the explanation is far more straightforward.

282

00:23:10,000 --> 00:23:14,000

I think what the person was experiencing was sensory deprivation.

283

00:23:16,000 --> 00:23:26,000

Typically, they began to either hallucinate visually. They could have auditory hallucinations or they could have kinesthetic hallucinations with the body.

284

00:23:27,000 --> 00:23:34,000

Could a regular fog cause Kathy Dorff to hallucinate and mistake an ordinary event for something fantastical?

285

00:23:35,000 --> 00:23:39,000

Maybe, but how could it explain those two missing hours?

286

00:23:41,000 --> 00:23:46,000

You're having a great time at a party or someplace. Time seems to go by very quickly.

287

00:23:47,000 --> 00:23:51,000

If you're sitting in a meeting, time goes very slowly.

288

00:23:51,000 --> 00:23:57,000

And, of course, objectively, the clocks are moving exactly the same, but that's not your experience of it.

289

00:24:00,000 --> 00:24:07,000

Dr. Rice is so convinced that sensory deprivation is the culprit, he's offered to recreate the weird events of an electronic fog in his lab.

290

00:24:08,000 --> 00:24:20,000

The experiment itself is one where an individual is deprived of visual information by having goggles with ping pong balls.

291

00:24:21,000 --> 00:24:26,000

The goggles cut out, placed over the eyes, which lets in a little light.

292

00:24:27,000 --> 00:24:34,000

But otherwise, the person is deprived and, at the same time, will have them listen to white noise sound.

293

00:24:36,000 --> 00:24:40,000

The participants are not told how long their senses will be deprived.

294

00:24:43,000 --> 00:24:45,000

Tell me a little bit about what you experienced.

295

00:24:45,000 --> 00:24:50,000

I've seen sort of outlines of things, almost like looking at clouds and you see shapes in them a little bit.

296

00:24:51,000 --> 00:24:58,000

Sort of like the outline of an eye or a mask sometimes. Maybe that sort of shape of a house.

297

00:24:59,000 --> 00:25:01,000

A sensation almost as though I was sinking down a little bit.

298

00:25:02,000 --> 00:25:06,000

I've started feeling a little bit uneasy, a bit nauseous as it felt like things were moving around a little bit.

299

00:25:07,000 --> 00:25:12,000

Dr. Rice has proved that depriving the senses affects perception. But did they also lose track of time?

300

00:25:16,000 --> 00:25:22,000

I was thinking about five minutes. I wouldn't have been surprised if it was actually two minutes.

301

00:25:23,000 --> 00:25:28,000

I was thinking probably somewhere between five and ten, like closer to ten.

302

00:25:29,000 --> 00:25:34,000

It didn't feel like very long, maybe, I don't know, five minutes.

303

00:25:35,000 --> 00:25:38,000

Incredibly, the experiment lasted for twenty minutes.

304

00:25:38,000 --> 00:25:42,000

I think the most interesting thing for all three was the time distortion.

305

00:25:43,000 --> 00:25:49,000

Because this lasted for twenty minutes and they experienced it from five to ten minutes.

306

00:25:50,000 --> 00:25:59,000

So again, that's consistent with the experience that the person had in the fog or others who have been in these kinds of situations where they experienced time distortion.

307

00:25:59,000 --> 00:26:10,000

So in this short experiment here, if that were to be generalized to a larger situation, a person may experience themselves as losing even more hours.

308

00:26:11,000 --> 00:26:24,000

So that would be very possible. But what you can actually see here is how our brain works and how our brain tries to make sense out of a situation where the senses are deprived.

309

00:26:24,000 --> 00:26:26,000

The brain is deprived of the light.

310

00:26:29,000 --> 00:26:35,000

American author David Childress disagrees these strange occurrences are simply tricks of the mind.

311

00:26:36,000 --> 00:26:39,000

For Childress, the answer lies in lay lines.

312

00:26:40,000 --> 00:26:47,000

A matrix of magnetic pathways crisscrossing the earth, connected by ancient ceremonial sites.

313

00:26:48,000 --> 00:26:54,000

He believes they can create vortexes of energy and manifest as the paranormal fog.

314

00:26:56,000 --> 00:27:02,000

Other people call these lay lines different things. The ancient Chinese call them dragon lines.

315

00:27:03,000 --> 00:27:11,000

We might call them earth currents or in Australia, the aboriginals there call them dreaming tracks.

316

00:27:11,000 --> 00:27:19,000

The earth itself is like a giant magnet and it has a north pole and a south pole of magnetic energy.

317

00:27:20,000 --> 00:27:28,000

And that energy is created by the rotating swirling magma inside the earth. It do is magnetic.

318

00:27:29,000 --> 00:27:40,000

And with this ball that's the planet earth with the magnetic lines running all through it, it has its own special energy.

319

00:27:41,000 --> 00:27:56,000

And it's where these magnetic lines cross and come together in certain powerful areas, geometrically scattered around our planet that these vortex hyperspace spots occur.

320

00:27:56,000 --> 00:28:08,000

And it's my view that these vortexes of energy occasionally are activated and become alive and become portals or doorways to other time-space dimensions.

321

00:28:09,000 --> 00:28:15,000

This is what people get caught up in the Bermuda Triangle or in the Great Lakes Triangle.

322

00:28:15,000 --> 00:28:25,000

Does this solve the mystery? Did Cathie Dorr sail into a patch of fog or into another dimension?

323

00:28:26,000 --> 00:28:35,000

Was she merely hallucinating as a result of sensory deprivation or had she entered a time vortex created by lay lines?

324

00:28:36,000 --> 00:28:42,000

Whatever the answer, it's most definitely weird or what.

325

00:28:46,000 --> 00:28:56,000

A blinding double flash of light is detected over the Indian Ocean. Did it nearly cause world war?

326

00:28:57,000 --> 00:29:00,000

Everybody knew for sure this was something to be very concerned about.

327

00:29:01,000 --> 00:29:06,000

When it comes to the mysteries of Mother Nature, there's a lot of things that aren't quite as they seem.

328

00:29:06,000 --> 00:29:15,000

It's all a matter of perspective. On one hand, it could look perfectly normal. On another, it could look like the end of the world.

329

00:29:16,000 --> 00:29:19,000

That's exactly what happened in 1979.

330

00:29:20,000 --> 00:29:33,000

Jeffrey Richardson is a US security analyst. He knows lots of secrets, but he's yet to solve one of the biggest, the true, behind a mysterious event known as the Veila Incident.

331

00:29:33,000 --> 00:29:40,000

It's a fascinating anomaly. It's a mystery that reads like a techno thriller.

332

00:29:41,000 --> 00:29:47,000

The tiny Crozet Islands lie in the Indian Ocean over 1,000 miles south of Africa.

333

00:29:48,000 --> 00:29:56,000

Ground 3 AM on September 22, 1979. Something extraordinary happened there.

334

00:29:57,000 --> 00:30:05,000

Without warning, two giant blinding flashes of light lit up its way.

335

00:30:06,000 --> 00:30:09,000

Everybody knew for sure this was something to be very concerned about.

336

00:30:09,000 --> 00:30:22,000

Incredibly, 70,000 miles away, the flashes were also detected by a US satellite called Veila 6911.

337

00:30:23,000 --> 00:30:32,000

That triggered a very high-level alert. And from there, word went to the White House that something might have happened. They started calling in advisors.

338

00:30:32,000 --> 00:30:34,000

They started calling in advisors.

339

00:30:35,000 --> 00:30:37,000

They started calling in advisors.

340

00:30:38,000 --> 00:30:45,000

Russian CIA agents to the area and military planes. But what treated this extreme response?

341

00:30:46,000 --> 00:30:53,000

In 1979, the United States had concluded a series of arms-controlled treaties with the Soviet Union.

342

00:30:54,000 --> 00:31:01,000

The Cold War rivals had just agreed to stop nuclear tests. But the flash detected the light fell as it's in the middle of the park.

343

00:31:02,000 --> 00:31:05,000

It could mean the Soviets were just playing games.

344

00:31:06,000 --> 00:31:14,000

The Veila satellites' prime purpose was to detect nuclear detonations. What they saw was something that's very indicative of a nuclear explosion.

345

00:31:16,000 --> 00:31:22,000

Had the Soviets broken faith? Had they really violated the new treaty and set off a nuclear bomb?

346

00:31:23,000 --> 00:31:30,000

Each side had thousands of nuclear warheads pointed at the other. The stakes couldn't be higher.

347

00:31:31,000 --> 00:31:41,000

At first, the administration tried to keep wraps on the story and it was full-court press of intelligence activities to try to determine what was actually going on.

348

00:31:46,000 --> 00:31:54,000

With a potential global crisis on its hands, the US tries to confirm its suspicions by sending CIA sniffer planes to the Indian Ocean.

349

00:31:55,000 --> 00:32:03,000

Equipped with sensitive radiation detectors, they get an unsettling surprise.

350

00:32:07,000 --> 00:32:12,000

There was no radiation detected. There was a mystery.

351

00:32:12,000 --> 00:32:25,000

They even sent people, CIA officers, into West Africa to get the leaves off the trees to see if there was a residue from a nuclear explosion.

352

00:32:26,000 --> 00:32:28,000

So what had Veila really seen?

353

00:32:29,000 --> 00:32:38,000

They didn't know what actually happened. It's been such a mystery for so many years. In terms of strange events, I think it's at the top of the list.

354

00:32:38,000 --> 00:32:50,000

What happened over the Indian Ocean? What could cause a giant flash of light so powerful it could be seen 70,000 miles away?

355

00:32:51,000 --> 00:32:55,000

Tom Reade is an expert in nuclear weapons.

356

00:32:56,000 --> 00:32:58,000

I've fired them. I've built them. I've seen them go off.

357

00:32:59,000 --> 00:33:01,000

He believes there is only one explanation.

358

00:33:02,000 --> 00:33:04,000

I believe it was a nuclear test.

359

00:33:04,000 --> 00:33:13,000

A nuclear detonation is kind of hard to hide. It's not some pin drop of a night. It's a very major event.

360

00:33:16,000 --> 00:33:22,000

But if no one witnessed the explosion, how could he be sure that Veila detected a nuclear blast?

361

00:33:23,000 --> 00:33:27,000

A nuclear explosion has this sort of fingerprint. It is unmistakable.

362

00:33:28,000 --> 00:33:33,000

This fingerprint is caused by the way a nuclear bomb explodes.

363

00:33:34,000 --> 00:33:40,000

First it blasts out deadly gamma radiation at the speed of light, 186,000 miles per second.

364

00:33:44,000 --> 00:33:50,000

Technically it's a flash, but to the human eye, it's as ball of fire as the sun has come to Earth.

365

00:33:50,000 --> 00:33:57,000

Then as the explosion grows, the shock wave produces a second flash.

366

00:34:02,000 --> 00:34:05,000

It's very mind-boggling. And it's very frightening.

367

00:34:09,000 --> 00:34:13,000

Does the data from Veila confirm the signature double flash of a nuclear bomb?

368

00:34:14,000 --> 00:34:20,000

The recorded flashes are shown as curves on a graph.

369

00:34:21,000 --> 00:34:23,000

These curves, those are like fingerprints.

370

00:34:24,000 --> 00:34:31,000

This first peak of the device going off as the bubble expands, the energy releases again and so you get this second rise.

371

00:34:34,000 --> 00:34:38,000

But if Veila really saw a nuclear blast, where was the other fingerprint?

372

00:34:38,000 --> 00:34:40,000

The radioactivity.

373

00:34:42,000 --> 00:34:46,000

They decided to put it in a part of the world with mostly water.

374

00:34:47,000 --> 00:34:56,000

They then picked a weather condition like a typhoon, a really serious typhoon to wash all the radioactive debris right back into the ocean.

375

00:34:57,000 --> 00:34:59,000

The best solution to pollution is dilution.

376

00:35:01,000 --> 00:35:04,000

Incredibly, weather records confirm a typhoon was in the air.

377

00:35:04,000 --> 00:35:09,000

But who would take such elaborate precautions to conceal a nuclear test?

378

00:35:10,000 --> 00:35:14,000

People don't develop nuclear weapons just because it's Thursday. There has to be some reason.

379

00:35:15,000 --> 00:35:20,000

Every nation that has gone nuclear has gone in response to a very clear and present threat.

380

00:35:23,000 --> 00:35:28,000

Did some nation, or even the nation, have a nuclear war?

381

00:35:28,000 --> 00:35:30,000

Threat.

382

00:35:32,000 --> 00:35:36,000

Did some nation have a reason to feel threatened in 1979?

383

00:35:37,000 --> 00:35:39,000

Reed believes the answer is obvious.

384

00:35:40,000 --> 00:35:42,000

Israel has very clear and present dangers on its borders.

385

00:35:43,000 --> 00:35:47,000

The Israelis have technology, they know weapons, but they didn't know if uranium.

386

00:35:48,000 --> 00:35:51,000

Israel could only make the bomb if it had a supply.

387

00:35:52,000 --> 00:35:56,000

But who else was threatened enough to upend the test-band apple cart?

388

00:35:56,000 --> 00:36:00,000

At the same time, the Soviets were pouring troops into Africa.

389

00:36:01,000 --> 00:36:06,000

South Africans, mine, uranium is a byproduct of gold. They got so much of it they don't know what to do with it.

390

00:36:07,000 --> 00:36:14,000

With Soviet forces in nearby Angola, did South Africa have reason to partner with Israel and build a nuclear bomb?

391

00:36:17,000 --> 00:36:22,000

Does this explain why a flag occurred in the remote regions of the Indian Ocean?

392

00:36:23,000 --> 00:36:31,000

It is quite clear to me that this was a test by the Israelis with logistical support by the South Africans.

393

00:36:32,000 --> 00:36:36,000

Why is it that whenever someone sees something weird, they always assume the worst?

394

00:36:37,000 --> 00:36:39,000

I mean honestly, is the world so paranoid?

395

00:36:40,000 --> 00:36:44,000

Are we really looking at a massive Cold War cover-up?

396

00:36:45,000 --> 00:36:49,000

Was the Veila incident nothing more than a crazy conspiracy theory?

397

00:36:49,000 --> 00:36:54,000

Or is there another way to solve this mystery?

398

00:36:55,000 --> 00:36:59,000

Giant flash of light over the Indian Ocean puts the world on nuclear alert.

399

00:37:00,000 --> 00:37:04,000

Was it a freak of nature or something more sinister?

400

00:37:07,000 --> 00:37:10,000

Professor Richard Muller is a physicist.

401

00:37:11,000 --> 00:37:15,000

US President Jimmy Carter appointed him to investigate the Veila incident.

402

00:37:15,000 --> 00:37:23,000

It was an important international issue with diplomatic consequences and they needed good scientific review of the data.

403

00:37:24,000 --> 00:37:31,000

Muller has analyzed the same information as the nuclear experts, but he's come to an entirely different conclusion.

404

00:37:32,000 --> 00:37:38,000

When we began our study, we were all convinced this really looks like it was a nuclear explosion.

405

00:37:39,000 --> 00:37:41,000

Next step though is to check ourselves.

406

00:37:42,000 --> 00:37:44,000

We're all scientists, we're all scientists who have discovered things.

407

00:37:45,000 --> 00:37:52,000

You know the process of discovery consists of coming up with an idea with a hypothesis and then really checking and double checking yourself in every possible way.

408

00:37:53,000 --> 00:37:56,000

So we had a long list of questions that we wanted to have investigated.

409

00:37:57,000 --> 00:38:01,000

Next step was to have these teams look at these questions, get back answers to us.

410

00:38:02,000 --> 00:38:05,000

But after that first day, I was pretty convinced this was a nuclear bomb.

411

00:38:05,000 --> 00:38:10,000

But when we did a scientific review of the data, there was something new and different.

412

00:38:11,000 --> 00:38:15,000

They discovered that Veila had connected its data with two light sensors called bang meters.

413

00:38:16,000 --> 00:38:21,000

Bang meter was a relatively simple device designed to detect flashes of light.

414

00:38:22,000 --> 00:38:29,000

It's spelled B-H-A-N-G. It's actually named after a drug using an Indian term.

415

00:38:29,000 --> 00:38:34,000

A drug that if you take it, gives you hallucinations as you see flashes of light.

416

00:38:35,000 --> 00:38:38,000

So someone with a sense of humor named these bang meters.

417

00:38:40,000 --> 00:38:44,000

But remember, the double flash recorded by each of the two bang meters was different.

418

00:38:46,000 --> 00:38:50,000

The two pulses from the two bang meters didn't match each other.

419

00:38:51,000 --> 00:38:55,000

That was a real mystery but it indicated that this thing just didn't look right.

420

00:38:55,000 --> 00:38:58,000

The experts are mystified until...

421

00:38:59,000 --> 00:39:01,000

...mullered as a flash of insight.

422

00:39:02,000 --> 00:39:05,000

What if it wasn't anything on Earth at all?

423

00:39:06,000 --> 00:39:10,000

Veila satellite is out of medium Earth orbit. It's far away in space.

424

00:39:11,000 --> 00:39:15,000

70,000 miles above the planet, the light wasn't protected by Earth's atmosphere.

425

00:39:16,000 --> 00:39:21,000

It was bombarded by tiny bits of rock and metal called micrometeorites.

426

00:39:21,000 --> 00:39:25,000

These micrometeorites don't reach the ground because of the atmosphere.

427

00:39:26,000 --> 00:39:28,000

It slows them down and absorbs their energy.

428

00:39:29,000 --> 00:39:33,000

A satellite such as Veila satellite is frequently hit by micro-nibb-ites.

429

00:39:34,000 --> 00:39:39,000

But even if micrometeorites smacked into Earth, how could specks of space dust...

430

00:39:40,000 --> 00:39:44,000

...replicate a massive double hump shock wave of a nuclear explosion?

431

00:39:46,000 --> 00:39:50,000

If a micrometeorite hits the surface of the satellite, it knocks off dust.

432

00:39:51,000 --> 00:39:54,000

Dust reflects sunlight differently into the two bang-meters.

433

00:39:55,000 --> 00:39:57,000

This could be the signal.

434

00:39:58,000 --> 00:40:02,000

Is it possible the whole world was freaked out by a fleck of space dust...

435

00:40:03,000 --> 00:40:06,000

...not used by a microscopic space pebble?

436

00:40:07,000 --> 00:40:12,000

After running more tests, Mueller and his team finally reached a conclusion.

437

00:40:13,000 --> 00:40:18,000

What we thought was a bright flash thousands of miles away was actually just a dim flash.

438

00:40:18,000 --> 00:40:20,000

That's only a few inches away.

439

00:40:20,000 --> 00:40:24,000

They were never recording the secret nuclear test. It was micrometeorites.

440

00:40:24,000 --> 00:40:29,000

That's almost certainly what we saw back on September 22nd, 1979.

441

00:40:29,000 --> 00:40:33,000

Could this whole mystery be solved by something as simple as space dust?

442

00:40:33,000 --> 00:40:36,000

After all, no one actually ever saw the flash.

443

00:40:36,000 --> 00:40:40,000

Mueller's theory became the official explanation of the US government.

444

00:40:41,000 --> 00:40:44,000

But not everyone is convinced.

445

00:40:45,000 --> 00:40:51,000

Clearly, to me, from a political point of view, every reason the world has tried to not talk about this...

446

00:40:51,000 --> 00:40:54,000

...form a committee and kick it down the street.

447

00:40:55,000 --> 00:41:02,000

Incredibly, in 2010, declassified South African documents revealed nuclear discussions with Israel...

448

00:41:02,000 --> 00:41:05,000

...in the years leading up to the Bella incident.

449

00:41:05,000 --> 00:41:09,000

Could the space dust explanation just be a cover-up?

450

00:41:10,000 --> 00:41:13,000

There are conspiracy theorists who keep these things alive...

451

00:41:13,000 --> 00:41:19,000

...despite the fact that they were pretty much saddled by people who understood the arguments at the time.

452

00:41:20,000 --> 00:41:24,000

In the end, we are left with a mystery.

453

00:41:24,000 --> 00:41:28,000

Was the Bella incident proven of a secret nuclear weapons test?

454

00:41:28,000 --> 00:41:32,000

Or was it merely some space dust that nearly took the world to the brink of disaster?

455

00:41:34,000 --> 00:41:35,000

Weird.

456

00:41:35,000 --> 00:41:37,000

Or what?

457

00:41:40,000 --> 00:41:41,000

Whoa!

458

00:41:45,000 --> 00:41:47,000

So there we have it.

459

00:41:47,000 --> 00:41:50,000

Stories of mysterious freaks of nature from all over the world.

460

00:41:51,000 --> 00:41:58,000

On the east coast of Canada, an earth-shattering boom stuns a community of new scientists scratching their hands.

461

00:42:00,000 --> 00:42:04,000

Unlike Michigan, a mysterious fog terrorizes a sailor...

462

00:42:05,000 --> 00:42:08,000

...and alters the very fabric of time.

463

00:42:09,000 --> 00:42:15,000

And over the Indian Ocean, a blinding double-flash of light creates a nuclear crisis.

464

00:42:17,000 --> 00:42:22,000

Are these stories evidence of mysterious forces at work within the world?

465

00:42:23,000 --> 00:42:27,000

Do we dismiss those who claim they are true?

466

00:42:28,000 --> 00:42:29,000

You decide.

467

00:42:31,000 --> 00:42:38,000

Join me again next time for more stories that will undoubtedly be weird or what.
