

IONS RUSHING TOWARD POSITIVELY CHARGED GRID COLLIDE WITH NEUTRAL AIR MOLECULES AND THRUST AIR PARTICLES DOWNWARD. IONS STOP AT GRID.

NEUTRAL AIR MOLECULES, WHACKED DOWNWARD BY IONS, PASS THROUGH MESH OF ION-ACCEPTOR GRID. DOWNWASH OF AIR KEEPS IONOCRAFT ALOFT

1  
00:00:07,590 --> 00:00:04,950  
on july 14th five objects were seen in

2  
00:00:09,350 --> 00:00:07,600  
less than a two hour period they have

3  
00:00:11,270 --> 00:00:09,360  
also been observed at various times

4  
00:00:13,509 --> 00:00:11,280  
since the objects were seen over bitter

5  
00:00:15,669 --> 00:00:13,519  
rock mountain range the rest of which

6  
00:00:17,109 --> 00:00:15,679  
forms part of the state boundary between

7  
00:00:19,750 --> 00:00:17,119  
montana and

8  
00:00:25,189 --> 00:00:22,310  
um this was a letter

9  
00:00:27,349 --> 00:00:25,199  
it began dear sir in communication from

10  
00:00:29,509 --> 00:00:27,359  
brigadier general philip blackmore white

11  
00:00:31,910 --> 00:00:29,519  
sands proving grounds new mexico on

12  
00:00:34,870 --> 00:00:31,920  
flying saucers my attention was called

13  
00:00:43,350 --> 00:00:34,880

to a case at hamilton montana on which

14

00:00:50,150 --> 00:00:45,670

secure the typical questions that you

15

00:00:51,990 --> 00:00:50,160

ask people on these ufo reports 200-2

16

00:00:53,110 --> 00:00:52,000

secure the flight direction and confirm

17

00:01:06,630 --> 00:00:53,120

it

18

00:01:10,390 --> 00:01:09,350

one of the things that mrs blank

19

00:01:12,310 --> 00:01:10,400

wanted

20

00:01:14,870 --> 00:01:12,320

them to do verified that the object

21

00:01:16,789 --> 00:01:14,880

seemed to change shape while in flight

22

00:01:18,630 --> 00:01:16,799

this is very important and when this

23

00:01:21,510 --> 00:01:18,640

information is later correlated with

24

00:01:23,830 --> 00:01:21,520

laboratory laboratory work involving

25

00:01:25,910 --> 00:01:23,840

focused wave sections the ionization

26  
00:01:28,390 --> 00:01:25,920  
patterns will already be confirmed from

27  
00:01:30,550 --> 00:01:28,400  
this witness

28  
00:01:35,030 --> 00:01:30,560  
so please give the witness mrs blank all

29  
00:01:35,040 --> 00:01:51,749  
she saw

30  
00:01:55,270 --> 00:01:53,510  
changes in shape and colors may have

31  
00:01:58,230 --> 00:01:55,280  
been observed secure sketches or

32  
00:02:00,230 --> 00:01:58,240  
approximate design shapes or patterns

33  
00:02:02,230 --> 00:02:00,240  
tied to a laboratory experimental work

34  
00:02:04,149 --> 00:02:02,240  
this case will act to prove beyond a

35  
00:02:07,190 --> 00:02:04,159  
doubt that ionization to the point of

36  
00:02:09,109 --> 00:02:07,200  
luminosity in atmospheric elements is

37  
00:02:12,070 --> 00:02:09,119  
being accomplished by russia on a scale

38  
00:02:12,070 --> 00:02:16,070

which makes our own efforts somewhat

39

00:02:20,070 --> 00:02:18,070

parentheses the bouncing on a string is

40

00:02:22,470 --> 00:02:20,080

the visible wave action within the ray

41

00:02:24,949 --> 00:02:22,480

form this is the objects

42

00:02:27,589 --> 00:02:24,959

seems to go up and down as they travel

43

00:02:35,509 --> 00:02:27,599

forward with the ray form i've witnessed

44

00:02:39,670 --> 00:02:37,670

so

45

00:02:43,910 --> 00:02:39,680

with that being said um

46

00:02:45,350 --> 00:02:43,920

that made me look into uh ion

47

00:02:47,030 --> 00:02:45,360

uh propulsion

48

00:02:49,270 --> 00:02:47,040

and there is something called the ion

49

00:02:50,790 --> 00:02:49,280

craft and it was designed by one

50

00:02:53,750 --> 00:02:50,800

alexander d

51  
00:02:55,910 --> 00:02:53,760  
uh saversky

52  
00:02:58,550 --> 00:02:55,920  
who

53  
00:03:01,350 --> 00:02:58,560  
pretty much um was the first one to do

54  
00:03:04,790 --> 00:03:01,360  
that in our country in about 1961 now

55  
00:03:06,550 --> 00:03:04,800  
the thing about it is it's silent

56  
00:03:09,830 --> 00:03:06,560  
and it can move

57  
00:03:14,550 --> 00:03:13,110  
that followed his initial work

58  
00:03:16,229 --> 00:03:14,560  
look like

59  
00:03:17,750 --> 00:03:16,239  
saucers

60  
00:03:23,350 --> 00:03:17,760  
triangles

61  
00:03:28,229 --> 00:03:24,630  
in fact

62  
00:03:29,910 --> 00:03:28,239  
one document on the cia website

63  
00:03:32,070 --> 00:03:29,920

quote unquote this report includes our

64

00:03:33,430 --> 00:03:32,080

latest information on ion propulsion

65

00:03:36,149 --> 00:03:33,440

systems in addition there are

66

00:03:38,229 --> 00:03:36,159

indications of soviet interest in and

67

00:03:40,869 --> 00:03:38,239

basic research applicable to other

68

00:03:44,390 --> 00:03:40,879

exotic propulsion systems for space

69

00:03:46,149 --> 00:03:44,400

applications plasma arc jet propulsion

70

00:03:48,309 --> 00:03:46,159

our information is too limited to

71

00:03:50,470 --> 00:03:48,319

predict any time period for introduction

72

00:03:52,149 --> 00:03:50,480

of such systems but we expect this to

73

00:03:54,390 --> 00:03:52,159

occur

74

00:04:06,390 --> 00:03:54,400

several years after flight testing of

75

00:04:11,830 --> 00:04:08,309

now

76

00:04:23,909 --> 00:04:11,840

what i'm going to do quick is

77

00:04:29,189 --> 00:04:26,710

that actually flew

78

00:04:30,310 --> 00:04:29,199

and that also brought me after alexander

79

00:05:06,950 --> 00:04:30,320

to

80

00:05:12,629 --> 00:05:09,189

so this is kind of the best technology i

81

00:05:16,070 --> 00:05:12,639

could find as far as you know what would

82

00:05:19,749 --> 00:05:16,080

be silent it could be a craft

83

00:05:20,950 --> 00:05:19,759

the best article i found on alexander is

84

00:05:21,250 --> 00:05:20,960

actually

85

00:05:22,390 --> 00:05:21,260

um

86

00:05:24,629 --> 00:05:22,400

[Music]
